INFORMATION AND CORRESPONDENCE

**(1) Official Patent Office Mailing Address
Remains Washington, D.C.**

The official mailing address for all communications sent to the Patent Office remains:

Commissioner of Patents and Trademarks
Washington, D.C. 20231

Any telegrams sent to the Patent Office must also bear the above identical address.

The physical location of the Patent Office is 2021 Jefferson Davis Highway, Arlington, Virginia. This address must not be used when addressing mail to the Patent Office.

No reference to Crystal Plaza, Virginia, should be made in the address of any communication intended for delivery to the Patent Office by the Post Office Department or Western Union.

Compliance with this instruction will help prevent any unnecessary delay of mail, telegrams, etc.

C. A. KALK,
Director of Administration.

Feb. 20, 1969.

(Office name change per Public Law 93-596, Jan. 2, 1975)

[860 O.G. 662]

**(2) Group Number on all Communications Going
to the Examining Groups**

Applicants and their attorneys or agents are reminded that the Group number should be typed on amendments and other communications relating to matters handled in the examining groups in order to expedite the processing of mail. The number of the Group should be placed on right-hand side, opposite the serial number or name of the applicant.

This reminder does not apply to notices and reasons of appeal to the United States Court of Appeals for the Federal Circuit.

These communications should be sent to the Solicitor at the address below:

Solicitor
Box 8
U.S. Patent and Trademark Office
Washington, D.C. 20231

Attention to these details will improve the efficiency and reduce the time necessary to process incoming mail.

Nov. 23, 1983.

THERESA A. BRELSFORD,
*Assistant Commissioner
for Administration.*

[1037 OG 25]

**(3) Mailing of Papers to the PTO in
Patent Interference Proceedings**

Effective immediately, attorneys and agents are requested to address all papers mailed to the Patent and Trademark Office in connection with an interference proceeding, and any patent or application involved in an interference proceeding, as follows:

BOX INTERFERENCE
Commissioner of Patents and Trademarks
Washington, D.C. 20231

Use of this address will considerably assist the Board in its administration of patent interference proceedings.

Nov. 28, 1983.

DONALD J. QUIGG,
*Deputy Commissioner of
Patents and Trademarks.*

[1037 OG 25]

**(4) Establishment of a Special Box for
Expedited Processing of Issue Fees**

Effective immediately, the Patent and Trademark Office has established a special box designator for issue fees to allow expedited processing of the Issue Fee Transmittal (PTOL Form 85), and the order for advance copies.

In order to take advantage of this new service, the envelope should be addressed:

Box Issue Fees
Commissioner of Patents and Trademarks
Washington, D.C. 20231

Only the Issue Fee Transmittal (PTOL Form 85), advance copy orders and the fees associated with these two services are to be placed in the envelope. Including documents other than those specified will delay their reaching the area for which they were intended.

PLEASE USE THE NEW ISSUE FEE BOX.

Mar. 4, 1988

THERESA A. BRELSFORD,
*Assistant Commissioner
for Administration.*

[1088 OG 41]

**(5) Establishment of Three Special Boxes
for Expedited Processing**

The Patent and Trademark Office has established three additional special boxes to allow expedited processing of non-fee amendments to patent applications, petitions for filing date and/or serial number information for patent applications, and issue fees.

In order to take advantage of these new expedited services, the envelope must be addressed:

(6)

For non-fee amendments to patent applications:
Box Non-Fee Amendments (Pats)
Commissioner of Patents and Trademarks
Washington, D.C. 20231

For petitions under 37 CFR 1.182 and associated fees for obtaining filing date and/or serial number information for patent applications prior to receipt of the official "Filing Receipt", "Notice to File Missing Parts", or "Notice of Incomplete Application".

Box SN
Commissioner of Patents and Trademarks
Washington, D.C. 20231

For Issue Fee Transmittals (PTOL Form 85) and associated fees and corrected drawings:

Box Issue Fees
Commissioner of Patents and Trademarks
Washington, D.C. 20231

Only those documents specified for the special box are to be placed in the envelope addressed to that special box. Placing extraneous documents in an envelope marked for any special box will significantly delay their reaching the area for which they were intended.

Mar. 22, 1988.

THERESA A. BRELSFORD,
*Assistant Commissioner
for Administration.*

[1089 OG 45]

(6)

Changes in How Papers May be Filed in the Patent and Trademark Office

Beginning April 21, 1992, an improved service will be offered to people who wish to file papers directly with the Patent and Trademark Office (PTO) by extending the hours of operation for the Attorneys' Window located in Room 1B03 of Crystal Plaza Building 2, Arlington, Virginia. The current hours of operation are from 8:30 a.m. to 5:00 p.m., Monday through Friday, except Federal holidays within the District of Columbia. The change will extend the hours of operation until 12:00 midnight on Monday through Friday, except holidays, on a trial basis. If, after six months, usage does not warrant retaining operations until midnight, the hours of operation will be reduced.

This change will provide walk-up, personalized service to firms and individuals who are filing documents with the PTO. The PTO will continue to stamp postcard-type receipts to acknowledge the receipt of papers filed at the Attorneys' Window.

Also, effective on April 21, 1992, the PTO is discontinuing the use of drop boxes in the lobby of Crystal Plaza Building 3, Arlington, Virginia, and at the main entrance of the Department of Commerce Building, Washington, D.C. (37 CFR 1.6(c)) as means for receiving papers.

These changes will provide improved services with respect to receipt and processing of documents while, at the same time, overcoming problems with the present arrangement.

Problems encountered with the present arrangement for the drop boxes have occasionally made it difficult to determine the dates of actual deposit of papers. For example, there have been many incidents of papers being found outside of the drop boxes (e.g., on the floor of the main lobby of the Department of Commerce Building, on the guard's desk, on a nearby table, etc.). On occasion, the PTO and/or filers have been denied access to the drop box at the Department of Commerce by building security guards due to a special event taking place in the lobby.

Provisions are also available for filing papers through the use of the certificate of mailing (37 CFR 1.8) and the Express Mail (37 CFR 1.10) procedures.

March 17, 1992

HARRY F. MANBECK, Jr.
*Assistant Secretary and Commissioner
of Patents and Trademarks*

[1137 OG 7]

(7) Identifying Application Correspondence With Issue Batch Number

Applicants or their attorney or agent can facilitate matching incoming papers with the corresponding application file by indicating the Issue Batch Number on all papers filed in the Office after receiving the Notice of Allowance and before the time the Issue Fee Receipt is received.

The Issue Batch Number is printed on the Notice of Allowance form in Box 4 in the lower left-hand corner below the address. The Issue Batch Number consists of a capital letter followed by two digits, for example; "A03," "D18," "F42," "J79." Any lower case letters before the Issue Batch Number should be ignored since they are the typist's initials. Use of the Issue Batch Numbers is important since the allowed applications are filed by these numbers.

Any paper filed after receiving the Issue Fee Receipt should include the indicated patent number rather than the Issue Batch Number. At this time in the processing, the Issue Batch Number is no longer useful since the application has been removed from the batch at the time the patent number was assigned.

Jan. 16, 1976.

RICHARD J. SHAKMAN,
*Assistant Commissioner
for Administration.*

[943 O.G. 519]

(8) Post Card Receipt Reminder

Applicants and the agents are reminded of the provision in Section 717.01(a) (now Section 503) of the Manual of Patent Examining Procedure relating to the use of post cards as "receipts" of papers filed in the Patent Office.

If a receipt for any paper filed in the Patent Office is desired, it may be had by enclosing with the paper a self-addressed post card identifying the paper. The Patent Office will stamp the receipt date on the card and place it in the outgoing mail.

The identifying data on the card should be so complete as to match the paper with the application or other document to which it is to be associated. For example, the document should be identified by the applicant's name(s), Serial No., filing date, appeal number, interference number, etc., and the paper should be identified by specifying the type thereof, viz, affidavit, amendment, appeal, application papers, brief, drawings, fees, motions, supplemental oath or declaration, petition, etc.

When papers for more than one document are filed under a single cover a return post card should be attached to the paper for each document for which a receipt is desired.

Nov. 21, 1968.

RICHARD A. WAHL,
Assistant Commissioner.

[857 O.G. 667]

(9) Acknowledgement of Receipt of a Patent or Trademark Application

When early notification of the serial number of newly filed application papers is desired, a *stamped, self-addressed post card* should be submitted with each application. Immediately after the mail has been opened in the Patent and Trademark Office, the post card will be stamped with both the receipt date and the serial number, and then returned to the addressee.

Within recent months, hundreds of cards could not be successfully returned because of insufficient postage or incomplete or nonexistent forwarding addresses. Accurate and complete addresses, including ZIP codes, are necessary to ensure prompt acknowledgement of the receipt of patent and trademark applications.

To assist in easy identification once the post card has been returned, it is suggested that the post card include applicant's names and title of invention.

When more than one set of application papers is filed under one cover, a return post card should be attached to each set of papers for which a receipt is desired.

July 19, 1982.

THERESA A. BRELSFORD,
*Acting Assistant Commissioner
for Administration.*

[1021 O.G. 96]

(10)

Inclusion of Preliminary Classification on Filing Receipts

In response to a request from a patent attorney, we will print the preliminary classification assigned to an application on the filing receipt. It will show the class only and will be labeled "PRELIMINARY CLASS:". The new field will appear on the filing receipt shortly. We will not accept requests to correct the filing receipt for errors in or changes to the preliminary class.

Feb. 18, 1987.

THERESA A. BRELSFORD,
*Assistant Commissioner
for Administration.*

[1076 OG 25]

(11)

Handling of Status Inquiries

This notice is intended to supplement the discussion set forth in the *Official Gazette* Notice published at 893 *Official Gazette* 810 entitled "Status Inquires" (Dec. 21, 1971).

It has come to the attention of the Patent and Trademark Office (PTO) that its employees may have improperly released confidential information concerning pending applications. Specifically, issue date and patent number information assigned to pending applications may have been improperly released.

No information concerning pending or abandoned patent applications (except reissue applications and reexamination proceedings) may be given to the public by the PTO without the authorization of the applicant or the assignee or attorney or agent of record. 35 USC § 122 and 37 CFR § 1.14. Other exceptions are specified at 37 CFR § 1.14.

However, PTO employees will release information on the status of patent applications to the applicant or assignee or attorney or agent of record if the identity of the requestor can be adequately verified as set forth below.

Telephonic status inquiries should continue to be directed to the PTO clerical personnel. The PTO clerical personnel will obtain the caller's full name, the application serial number and the caller's telephone number. The PTO clerical personnel will ask the caller if there is an attorney or agent of record.

If there is an attorney or agent of record, the PTO clerical personnel will ask for his/her registration number. If the registration number is not known, the PTO clerical personnel will ask for the name of the attorney or agent of record. The PTO clerical personnel will inform the caller that an attorney or agent of record will be called after verification of his/her identity and that the requested status information concerning the application will be released to that attorney or agent.

If there is no attorney or agent of record, the PTO clerical personnel will ask the caller why he/she is entitled to information concerning the application. If the caller identifies himself/herself as an applicant or an authorized representative of the assignee of record, the PTO clerical personnel will ask for the correspondence address of record. Then, the PTO clerical personnel will inform caller that his/her association with the application must be verified before any information concerning the application can be released, and that he/she will be called back. If the caller indicates that he/she is not an applicant or an authorized representative of the assignee of record, the PTO clerical personnel will inform caller that no information concerning that application will be released.

The PTO clerical personnel will then verify the identity of any caller claiming to be associated with the application by

checking the Patent Application Locating and Monitoring (PALM) system or the application file.

If an attorney or agent is of record in the application, the PTO clerical personnel will release the status information concerning the application by calling the attorney's or agent's telephone number obtained from PALM or the application file.

If the applicant or an authorized representative of the assignee of record requests information, and there is no attorney or agent of record and the correspondence of record has been verified, the PTO clerical personnel will release the status information to the caller using the telephone number given by the caller. If the caller's association with the application cannot be verified, no information concerning the application will be released. However, the caller should be informed that the caller's association with the application could not be verified.

In handling an in-person status request, PTO clerical personnel will ask the requester to wait while verifying their identification as set forth above.

May 14, 1990

HARRY F. MANBECK, Jr.
*Assistant Secretary and Commissioner
of Patents and Trademarks*

[1115 O.G. 17]

(12)

Change in Legal Holidays

The Commissioner's Notice of Sept. 25, 1979, "Change in Legal Holidays," is hereby rescinded, in view of Public Law 98-144, enacted Nov. 2, 1983, which amended the listing of legal public holidays in 5 USC § 6103. That amendment took effect in 1986 and added a new legal holiday relating to the birthday of Martin Luther King, Jr. This new holiday is designated for the third Mon. in Jan.

Section 6103, as amended, reads as follows:

New Year's Day, Jan. 1.
Birthday of Martin Luther King, Jr., the third
Mon. in Jan.
Washington's Birthday, the third Mon. in Feb.
Memorial Day, the last Mon. in May.
Independence Day, July 4.
Labor Day, the first Mon. in Sept.
Columbus Day, the second Mon. in Oct.
Veterans Day, Nov. 11.
Thanksgiving Day, the fourth Thurs. in Nov.
Christmas Day, Dec. 25.

Each of the holidays enumerated will constitute a "Federal holiday within the District of Columbia," as referred to in Section 21, Title 35, United States Code. In accordance with 37 CFR 1.6(a) and 1.10(a), the Patent and Trademark Office will not receive papers on these holidays. Actions required to be taken on such days may be taken on the next succeeding day that the Office is open for business in accordance with 37 CFR 1.7.

July 15, 1986.

DONALD J. QUIGG,
*Assistant Secretary and
Commissioner of Patents
and Trademarks.*

[1069 OG 12]

(13) Closing of Patent and Trademark Office on Monday, Jan. 26, 1987

In view of the official closing of the Federal and District of Columbia government offices in the Washington, D.C. metropolitan area, including the Patent and Trademark Office, on Jan. 26, 1987, the Patent and Trademark Office will consider Jan. 26, 1987, a "federal holiday within the District of Columbia" under 35 U.S.C. § 21. Any action or fee due that day will be considered as timely for the purpose of, e.g., 35 U.S.C. §§

(14)

119, 133 and 151, if the action is taken, or fee paid, on Jan. 27, 1987.

Jan. 28, 1987.

DONALD W. PETERSON,
*Acting Assistant Secretary
and Commissioner of Patents
and Trademarks.*

[1075 OG 29]

(14) **Closing of Patent and Trademark Office
on Monday, Feb. 23, 1987**

In view of the official closing of the Federal and District of Columbia government offices in the Washington, D.C. metropolitan area, including the Patent and Trademark Office, on Feb. 23, 1987, the Patent and Trademark Office will consider Feb. 23, 1987, a "federal holiday within the District of Columbia" under 35 U.S.C. § 21. Any action or fee due that day will be considered as timely for the purposes of, e.g., 35 U.S.C. §§ 119, 133 and 151, if the action is taken, or fee paid, on Feb. 24, 1987.

Feb. 27, 1987.

DONALD J. QUIGG,
*Assistant Secretary and
Commissioner of Patents
and Trademarks.*

[1098 OG 548]

(15) **Closing of the Patent and Trademark Office
on Friday, Jan. 20, 1989**

In view of the fact that Federal and District of Columbia government offices in Washington, D.C. metropolitan area, including the Patent and Trademark Office were officially closed on Jan. 20, 1989, the Patent and Trademark Office will consider Jan. 20, 1989, a "holiday within the District of Columbia" under 35 U.S.C. § 21. Any action or fee due that day will be considered as timely for the purposes of e.g. 35 U.S.C. §§ 119, 133 and 151, if the action is taken, or fee paid, on Jan. 23, 1989. Papers deposited in U.S. Department of Commerce District Offices on Jan. 20, 1989, will similarly be considered timely for the purposes of 35 U.S.C. §§ 119, 133 and 151.

Jan. 6, 1989

DONALD J. QUIGG,
*Assistant Secretary and
Commissioner of Patents
and Trademarks.*

[1098 OG 548]

(16) **Filing of Papers During Unscheduled Closings
of the Patent and Trademark Office**

When the Patent and Trademark Office is officially closed by Executive Order of the President or by the Office of Personnel Management for an entire day because of some unscheduled event, such as adverse weather conditions, the Patent and Trademark Office will consider that day as a "federal holiday within the District of Columbia" under 35 U.S.C. § 21. Any action or fee due that day will be considered as timely for the purposes of, e.g., 35 U.S.C. §§ 119, 133 and 151, if the action is taken, or fee paid, on the next succeeding business day on which the Patent and Trademark Office is open.

When the Patent and Trademark Office is open for business during any part of a business day between 8:30 a.m. and 5:00 p.m., papers are due on that day even though the Office may be officially closed for some period of time during the business day because of an unscheduled event. The procedures of 37 CFR 1.8 or 1.10 may be used, as appropriate, for the filing of papers. On any day the Office is open for at least part of the day, papers may also be deposited up to midnight in any boxes which are

provided by the Patent and Trademark Office under 37 CFR 1.6(c).

Information regarding whether or not the Office is officially closed on any particular day may be obtained by calling (703)-557-INFO.

Nov. 18, 1988

DONALD J. QUIGG,
*Assistant Secretary and
Commissioner of Patents
and Trademarks*

[1097 OG 53]

(17) **Iraqi Sanctions Regulations**

On January 18, 1991, the Department of the Treasury, Office of Foreign Assets Control (OFAC), published the Iraqi Sanctions Regulations (Regulations) (31 CFR Part 575). 56 Fed. Reg. 2112. The regulations implement Executive Orders 12722 (August 2, 1990) and 12724 (August 9, 1990) relating to certain property and transactions in which the Government of Iraq and persons in Iraq may have an interest.

It appears that the provisions of the Executive Orders and Regulations prohibit transactions relating to the filing or prosecution of applications for patents or for registration of trademarks, where an Iraqi interest is involved. The prohibited transactions, however, may be authorized by a specific license issued pursuant to the procedures described in Section 575.801 of Subpart H of the Regulations.

This notice is intended to alert practitioners and applicants to the prohibitions which may apply to matters before the Patent and Trademark Office, (PTO) if Iraqi interests are involved. This notice is further intended to advise that where such interests or potential interests come to the attention of the PTO, an appropriate specific license from OFAC may be required

Jan. 29, 1991

HARRY F. MANBECK, Jr.
*Commissioner of Patents
and Trademarks*

[1123 OG 37]

(18) **Drawings in Patent Applications Filed
After January 1, 1989**

The general rule applicable to release of any paper in a patent application file is that no paper (including a drawing) will be returned for any purpose whatever. 37 CFR 1.59. New rules published in the *Official Gazette* (1097 OG 36 (December 13, 1988)) effective January 1, 1989, no longer require the submission of formal drawings in a patent application. Since corrections are the responsibility of the applicant, the original drawing(s) should be retained by the applicant for future correction, if necessary.

As a result of adoption of these new rules relating to drawings, the Patent and Trademark Office will no longer release to applicants, bonded drafting companies or others, drawings from patent applications filed after January 1, 1989, and after January 1, 1991, no drawings may be borrowed from the office.

Access to applications is still provided with the proper power to inspect. If copies of any papers or drawings within the application are required, arrangements may be made through the File Information Unit and copies may be made in the Public Search Room. If there is some extraordinary situation that requires release of an original drawing in possession of the office, relief may be requested by filing a petition under 37 CFR 1.183.

July 7, 1989

THERESA A. BRELSFORD
*Assistant Commissioner
for Administration*

[1105 OG 68]

(19) Submission of Corrected Drawings in Allowed Applications

When drawings need to be corrected in an allowed application, the applicant is required to submit acceptable corrected drawings within a three-month shortened statutory period. Within that three-month period, two weeks should be allowed for review of the correction by the Office. If a correction is determined to be unacceptable by the Office, the applicant must arrange to have an acceptable correction re-submitted within the original three-month period to avoid the necessity of obtaining an extension of time and of paying the extension fee. Therefore, the applicant should file corrected drawings as soon as possible following the setting of the three-month shortened statutory period.

Jan. 14, 1985.

THERESA A. BRELSFORD,
Assistant Commissioner
for Administration.

[1051 OG 3]

(20) Rules Concerning Conduct on Patent and Trademark Premises**1. Applicability**

These rules apply to all premises under the charge and control of the U.S. Patent and Trademark Office (PTO) through the General Services Administration and to all persons entering such premises.

2. Admission to Property

Patent and Trademark Office facilities are closed to the public outside of normal working hours. During normal working hours, a valid User Pass is required to enter PTO premises.

The individual's User Pass must be displayed at all times while on PTO premises.

3. Preservation of Property/Conduct on PTO Premises

The following activities are prohibited on PTO premises:

a. Improperly disposing of rubbish; willfully destroying or damaging property; theft of property; creating a hazard to persons or things; and placing Government documents or materials in storage lockers.

b. The willful and unlawful concealment, removal, mutilation, obliteration or destruction, or attempts to do so, or, with intent to do so, or taking and carrying away of any record, book, paper, document, or other things from the facilities shall result in a fine of not more than \$2,000 or imprisonment of not more than 3 years, or both. See 18 U.S.C. § 2071.

c. Removal of papers, materials, or other Government property from designated areas. Within a designated area, papers or other Government property must be returned to its proper location after use, unless otherwise posted.

d. Using PTO premises and facilities as a place of business. It is prohibited to reserve work areas, use PTO as a mailing address, use PTO stationery, or a PTO telephone number as a personal telephone number.

4. Inspection

Packages, briefcases, storage lockers and other containers in the possession of visitors, employees, or other persons arriving at, working at, visiting, or departing from the PTO are subject to inspection. See 41 CFR § 101-20.301.

5. Disturbances

Disorderly conduct or other conduct which creates a loud or unusual noise or a nuisance which impedes or disrupts the performance of official duties by Government employees or which prevents the public from obtaining the administrative

services provided on the property in a timely manner is prohibited. See 41 CFR § 101-20.305.

6. Conformity with signs and directions

Persons on the PTO premises shall at all times comply with the official signs of a prohibitory, regulatory or directory nature and with the lawful direction of PTO employees.

No rude or abusive conduct to PTO employees and fellow users.

No food or beverages are permitted.

No smoking except in designated areas.

No mechanical or electronic equipment such as radios, televisions, typewriters, computers, or photographic equipment may be used without prior permission from the Assistant Commissioner for Administration.

No use of PTO telephone and office equipment, except as specifically designated for public use.

7. Penalties and other laws.

Nothing in these rules shall be construed to abrogate any other Federal laws or regulations or any State and local laws and regulations applicable to any area in which property under the charge and control of the PTO through the U.S. General Services Administration is situated. See 40 U.S.C. §§ 318(c) and 486(c).

41 CFR § 101-20.315 provides that whoever is found guilty of violating the rules of conduct on Federal property contained in 41 CFR § 101-20.3 while on any property under the charge and control of the U.S. General Services Administration is subject to a fine of not more than \$50, imprisonment of not more than 30 days, or both. See 40 U.S.C. § 318c.

Failure to follow these rules may result in immediate removal from the premises, suspension of user privileges, and/or enforcement of any criminal sanctions that may apply.

Aug. 30, 1991

THERESA A. BRELSFORD
Assistant Commissioner for
Administration

[1131 OG 7]

(21) Unlawful Removal of Labels

We have found a large number of security labels, torn from Search Room patent copies, in stack areas of the Public Search Room. We remind persons removing security labels or otherwise mutilating Search Room patent copies, or removing Search Room patent copies from the Search Room without authorization, that such acts are criminal offenses punishable by fine, imprisonment or both.

You should be aware that engaging in such acts violates the prohibition against "the willful destruction of or damage to property; the theft of property." 41 Code of Federal Regulations § 101-20.303. Violations are punishable by "a fine of not more than \$50 or imprisonment of not more than 30 days, or both." 41 Code of Federal Regulations § 101-20.315.

You should also be aware that engaging in such acts subjects you to punishment under the following criminal provision in Title 18 U.S. Code, § 2071:

(a) Whoever willfully and unlawfully conceals, removes, mutilates, obliterates, or destroys, or attempts to do so, or, with intent to do so takes and carries away any record, proceeding, map, book, paper, document or other thing * * * shall be fined not more than \$2,000 or imprisoned not more than three years, or both.

(b) Whoever, having custody of any such record, proceeding, map, book, document, paper, or other thing,

(22)

willfully and unlawfully conceals, removes, mutilates, obliterates, falsifies, or destroys the same, shall be fined not more than \$2,000 or imprisoned not more than three years, or both; and shall forfeit his office and be disqualified from holding any office under the United States.

UNLESS THE REMOVAL OF SECURITY LABELS FROM SEARCH ROOM PATENT COPIES CEASES, THE OFFICE WILL TAKE APPROPRIATE ACTION, SUCH AS EXERCISING ITS AUTHORITY UNDER 41 CODE OF FEDERAL REGULATIONS § 101-20.301 TO INSPECT PACKAGES, BRIEFCASES AND OTHER CONTAINERS BROUGHT INTO, WHILE ON, OR BEING REMOVED FROM THE SEARCH ROOM.

Mar. 28, 1983.

GERALD J. MOSSINGHOFF,
*Commissioner of Patents
and Trademarks.*

[1029 OG 136]

(22)

Out-of-Town Request for Files

Delays are being experienced in receiving files ordered from the Federal Records Center in Suitland, Md. Therefore, more time must be allowed when out-of-town requestors are ordering patented files or abandoned or registered trademark files in advance of their arrival in the area. Until recently, a five-day notice was sufficient to obtain a file located in the Federal Records Center. Now we are suggesting that ten days be allowed when ordering Suitland files. A 24-hour notice is still normally adequate when the file is located in the PTO File Repository in Crystal City. Out-of-town requests for files should be directed to Ms. Jacqueline Waldo on (703) 557-2977. Requestors will be notified by phone, prior to planned arrival date, whether or not the requested file will be available.

Use of Certificate of Correction Forms

The purpose of this notice is, to once again, remind patentees and their attorneys and agents to submit the text of any correction under 37 CFR 1.322 and 1.323 on the Certificate of Correction form, PTO-1050, which is available free of charge from the Patent and Trademark Office. The presentation of all corrections on this form permits its use as camera copy for prompt, direct offset printing of the Certificate of Correction.

Instructions for use of Form PTO-1050 are printed on the top portion thereof, and are also set forth, in further detail, in Section 1402.02 of the Manual of Patent Examining Procedures. It is especially important that the typing be clean and clear. Both thin, light type and heavy, smudged type should be avoided. Changes and corrections are preferably made by use of white opaque correction fluid.

The typing should be within the borders printed on the form and a two-inch blank space should be left at the bottom of the last page of the form for the placement of the signature of the Attesting Officer.

Both sheets of the printed form should be forwarded to the Office. The copies should be stapled together only at the upper left-hand margin at the indicated location.

Copies of form PTO-1050 may be obtained, as needed, from either the Correspondence and Mail Division in Building 2, or from the receptionist in the lobby of Building 3, Crystal Plaza, Arlington, Va.

May 10, 1977.

RICHARD J. SHAKMAN,
*Assistant Commissioner for
Administration.*

Notice to Subscribers

The Patent and Trademark Office announces a change in the point of contact for subscribers who have not been receiving all of their copies of the Official Gazette, Manual of Patent Examining Procedures Revisions, Annual Indices, or other patent and trademark publications. All correspondence and inquiries concerning subscription services including requests for reinstatement or renewal of subscriptions should be directed to:

Mr. Michael F. DiMario
Assistant Public Printer
Superintendent of Documents (SD)
U.S. Government Printing Office
Washington, D.C. 20401

Furthermore, the Superintendent of Documents advises that expiration notices are sent out approximately three months before the expiration date. However, subscribers should not rely on this schedule. If a notice is not received within two months of the expiration date, the subscriber should renew the subscription with the Superintendent of Documents. Attach a label from the envelope in which the publication is received, together with a check covering the amount of the subscription. If a deposit account with the Superintendent of Documents is to be used, include the deposit account number with the renewal.

This notice is effective with the publication date and supersedes the notice published on this subject in 969 O.G. 2, dated Mar. 14, 1978.

Aug. 3, 1984.

THERESA A. BRELSFORD,
*Assistant Commissioner
for Administration.*

[1045 O.G. 28]

(25) Filing of a Notice of Appeal to the Court of Appeals for the Federal Circuit in the Patent And Trademark Office

This notice supersedes a notice entitled Filing of a Notice of Appeal to the Federal Circuit and Service of Court Papers on the Commissioner of Patents and Trademarks published at 1079 Off. Gaz. Office 72 (June 30, 1987).

A notice of appeal to the Court of Appeals for the Federal Circuit may be filed in the Patent and Trademark Office in any one of the following ways:

A. By first-class mail addressed as follows, in which case the notice of appeal must actually reach the Patent and Trademark Office by the due date:

Box 8
Commissioner of Patents and Trademarks
Washington, D.C. 20231
Attention: Office of the Solicitor

B. By "Express Mail" (U.S. Postal Service only) under 37 CFR § 1.10 addressed as follows, in which case the notice of appeal is deemed filed on the date of the Express Mail certificate:

Box 8
Commissioner of Patents and Trademarks
Washington, D.C. 20231
Attention: Office of the Solicitor

C. By hand (on or before the due date) to the Office of the Solicitor. The Office of the Solicitor is located at:

Crystal Park II
Suite 918
2121 Crystal Drive
Arlington, Va.

D. By facsimile transmission to the Office of the Solicitor. The telephone number for accessing the Office of the Solicitor facsimile machine is (703) 557-9373. A notice of appeal will be deemed timely filed on the date the facsimile transmission is received by the Office of the Solicitor, provided an original

notice of appeal is subsequently received in either of the following ways:

(1) An original, signed copy of the notice of appeal is actually received in the Office of the Solicitor within five calendar days of the facsimile transmission; or,

(2) An original, signed copy of the notice of appeal is mailed by "Express Mail" (U.S. Postal Service only) under 37 CFR § 1.10 on the day of the facsimile transmission.

The facsimile machine for receiving a notice of appeal is located in the Office of the Solicitor and is staffed during the business hours of 8:30 a.m. to 5:00 p.m., Monday through Friday, excluding holidays. Due to possible equipment failure or maintenance requirements, precautions must be taken when relying on the availability of this service near the end of the time for filing a notice of appeal.

Mar. 22, 1990

FRED E. McKELVEY
Solicitor

[1113 O.G. 27]

(26) Service of Court Papers on the Commissioner of Patents and Trademarks

Court papers other than a notice of appeal to the U.S. Court of Appeals for the Federal Circuit may be served on the Commissioner in either of the following ways:

A. By *hand* between 8:30 a.m. and 5:00 p.m. at the Office of the Solicitor, located in Crystal Park II, Suite 918, 2121 Crystal Drive, Arlington, Va.

B. By *mail* in an envelope addressed as follows:
Office of the Solicitor
P.O. Box 15667
Arlington, Va. 22215

While the above mail service address may be supplemented to include the name of the particular attorney assigned to the court case, it must *not* be supplemented to refer to either the Commissioner of Patents and Trademarks or the U.S. Patent and Trademark Office (PTO).

Court papers mailed to an address other than the above mail service address and court papers delivered by hand are deemed to have been served on the Commissioner when actually received in the Office of the Solicitor.

Papers which are not court papers and are intended to be filed in the PTO in connection with an application or other proceeding pending in the Office shall not be mailed to the Solicitor's mail service address. Any such papers which are mailed to the Solicitor's mail service address will not be considered to have been filed in the PTO. Instead, all such papers will be returned. No exceptions will be made to this policy.

Mar. 22, 1990

FRED E. McKELVEY
Solicitor

[1113 O.G. 28]

(27) Appeals to the Federal Circuit

Patent applicants should designate as appellants all named inventors in any notice of appeal to the U. S. Court of Appeals for the Federal Circuit when appealing a decision of the Board of Patent Appeals and Interferences.

In a recent unpublished opinion in *In re Deckert*, Appeal No. 89-1386 (Fed. Cir. Nov. 29, 1989), the Federal Circuit notes:

Deckert's co-inventors Couble and Bonnetti are not parties to this appeal because they were not specifically named in the notice of appeal. Fed. R. App. P. 15(a). See *Torres v.*

Oakland Scavenger Co., 108 S. Ct. 2405, 2409 (1988) (construing similar requirement of Fed. R. App. P. 3(c)).

Dec. 14, 1989

FRED E. McKELVEY
Solicitor

[1110 O.G. 620]

(28)

Department of Commerce Patent and Trademark Office 37 CFR Parts 1 and 2

[Docket No. 80480]

Communications with the Office of the Solicitor

Agency: Patent and Trademark Office, Commerce.

Action: Final rule; technical amendments.

Summary: On Mar. 24, 1987, final rules regarding the address of certain communications to the Patent and Trademark Office were issued. (52 FR 9394, Mar. 24, 1987.) Also, on Mar. 7, 1985 and Aug. 11, 1986, final rules regarding the court review of decisions by the Patent and Trademark Office Board of Patent Appeals and Interferences and the Trademark Trial and Appeal Board, respectively, were issued. (50 FR 9383, Mar. 7, 1985 and 51 FR 28710, Aug. 11, 1987.)

This notice makes technical corrections to § 1.1, 1.302 and 2.145(b) by specifying the address to which correspondence should be sent to the Office of the Solicitor. The change reflects existing practice consistent with rules of court governing service of court papers on the Solicitor. The change also will expedite the processing of other non-court communications with the Office of the Solicitor.

Effective Date: June 9, 1988

For Further Information Contact: John H. Raubitschek by telephone at (703) 557-4035 or by mail marked to his attention and addressed to Box 8, Commissioner of Patents and Trademarks, Washington, D.C. 20231.

Supplementary Information: The Patent and Trademark Office (PTO) finds for good cause that because the technical changes made by this rule will have no substantive effect, it is unnecessary to seek prior public comment of this rule under 5 U.S.C. 553. Because a notice of proposed rulemaking and an opportunity for public comment is not required for this technical amendment, this rule is also exempt from the provisions of the Regulatory Flexibility Act requiring a regulatory flexibility analysis. The PTO has determined that this rule is not a major rule within the meaning of section 1(b) of Executive Order 12291. The PTO has also determined that this rule has no federalism implications affecting the relationship between the national government and the States as outlined in Executive Order 12612. This rule does not contain a collection of information for purposes of the Paperwork Reduction Act.

List of subjects:

Administrative practice and procedure, Courts, Inventions and patents, Trademarks

For the reasons set forth above, 37 CFR Parts 1 and 2 are amended as follows:

Part 1—Rules of Practice in Patent Cases

1. The authority citation for 37 CFR Part 1 continues to read as follows:

Authority: 35 U.S.C. 6, unless otherwise noted.

2. Section 1.1 [Amended]

Section 1.1 is amended by adding new paragraph (g)

(g) All communications relating to pending litigation which are required by the Federal Rules of Civil or Appellate Procedure or by a rule or order of a court to be served on the Solicitor

(29)

shall be hand-delivered to the Office of the Solicitor or shall be mailed to: Office of the Solicitor, P.O. Box 15667, Arlington, Va. 22215 or such other address as may be designated in writing in the litigation. All other communications to the Office of the Solicitor should be addressed to: Box 8, Commissioner of Patents and Trademarks, Washington, D.C. 20231. Any communication which does not involve pending litigation which is received at P.O. Box 15667 will not be filed in the Office but will be returned. See § 1.302(c) and 2.145(b)(3) for filing a notice of appeal to the U.S. Court of Appeals for the Federal Circuit.

3. Section 1.302 [Amended]

Section 1.302 is amended by adding new paragraph (c)

(c) A notice of appeal, if mailed to the Office, shall be addressed as follows: Box 8, Commissioner of Patents and Trademarks, Washington, D.C. 20231.

Part 2—Rules of Practice in Trademark Cases

4. The authority citation for 37 CFR Part 2 continues to read as follows:

Authority: 15 U.S.C. 1123; 35 U.S.C. 6, unless otherwise noted.

5. Section 2.145(b) [Amended]

Section 2.145(b) is amended by adding new paragraph (b)(3).

(b)(3) The notice, if mailed to the Office, shall be addressed as follows: Box 8, Commissioner of Patents and Trademarks, Washington, D.C. 20231.

DONALD J. QUIGG
Assistant Secretary and
Commissioner of Patents
and Trademarks.

May 3, 1988.

[1090 O.G. 72]

(29) Appeals to the Federal Circuit from PTO

This notice was originally prepared by the Solicitor and Associate Solicitor Richard E. Schafer for presentation at the Eighth Annual Judicial Conference of the U.S. Court of Appeals for the Federal Circuit. The notice discusses litigation philosophy of the Office of the Solicitor of the Patent and Trademark Office and other matters which may be helpful to appellants and others seeking judicial review of PTO decisions in the U.S. Court of Appeals for the Federal Circuit.

October 5, 1990

FRED E. McKELVEY
Solicitor

I. Introduction

This notice discusses the philosophy of the Office of the Solicitor when representing the Commissioner before the Federal Circuit and other courts. The notice is also designed to assist appellants and others seeking judicial review of Patent and Trademark Office (PTO) decisions in the Federal Circuit. Much of what is said in the notice is also applicable to those instances where judicial review is sought of PTO decisions in a district court.

II. Solicitor's litigation philosophy

The Office of the Solicitor and its attorneys start with the proposition that justice is done when the right result is reached. The Solicitor is not an advocate who needs to win to be satisfied. Rather, the public interest is served when:

- (1) a patent issues on a patentable invention;
- (2) a patent is refused on an unpatentable invention;

- (3) a trademark is registered if entitled to registration under Title 15;
- (4) a trademark is refused registration if not entitled to registration under Title 15; or
- (5) PTO rules are properly applied within PTO and by reviewing courts.

Our litigation philosophy is expressed in *Berger v. United States*, 295 U.S. 78, 88 (1935):

The . . . [Government attorney] is the representative not of an ordinary party to a controversy, but of a sovereignty whose obligation to govern impartially is as compelling as its obligation to govern at all; and whose interest . . . is not that it shall win a case, but that justice shall be done. As such, he is in a peculiar and very definite sense the servant of the law, the twofold aim of which is that guilt shall not escape or innocence suffer.

The Office of the Solicitor does more than simply "defend" an appeal. Rather, it will determine whether:

- (a) appeals are ripe for judicial consideration;
- (b) there are steps a party might take in PTO to obviate the appeal, e.g., amendments which might be made to claims to conform an argument to the subject matter being claimed—we often find that arguments in a brief are based on limitations which do not appear in the claims;
- (c) there is material not in the record which might provide a full answer to an argument—particularly a new one—made in a brief; and/or
- (d) the deciding official or board should be approached to see if it wishes to reevaluate its decision in view of a change in the law, a credible argument that the decision may not be correct, or a matter which may have been overlooked.

Most of the time, it takes more effort to implement this philosophy than it would take simply to brief and argue a matter.

Generally, in a Federal Circuit matter, the Office of the Solicitor—apart from designating an appendix—does not "get deeply into" a case until appellant's brief is filed. Exceptions occur, i.e., *inter partes* patent and trademark cases where the board opinion is reviewed to see if an *amicus* brief might be appropriate to assist the Federal Circuit with PTO practice.¹ This is not to say that an appellant should not feel free to discuss an appeal with an attorney in the Solicitor's Office. But, ordinarily in an *ex parte* case, we do not spend time until we see appellant's brief. The reason is that a large number of appeals are simply dismissed without the need for us to do much, if any, work.

Table 1, below, shows the disposition of appeals from October 1985 through April 1990. About 23%, i.e., 146, of the cases were dismissed with little, if any, work having been done by the Office of the Solicitor on the appeal. If we conducted a review of all appeals when filed, our Federal Circuit "workload" would increase about 23%. We do not have the resources to effectively carry on 23% more work.

We find a lot of cases are not ripe or otherwise ready for judicial review. When we determine that more work needs to be done before the Federal Circuit should consider a case, we generally move to remand. Fed. Cir. R. 27(c) provides that a remand generally should be requested prior to briefing. However, since we generally cannot efficiently take up cases until appellant's brief is filed, we now file motions to remand along with our brief. A merits panel is then in a position to evaluate whether it should hear the case on the merits or order a remand.

There are a variety of reasons why we seek remands.

¹ See e.g., *Fujiie v. Verhagen*, Fed. Cir. No. 89-1126; *Hahn v. Wong*, 13 USPQ2d 1211 (Bd. Pat. App. & Int.), *aff'd*, 892 F.2d 1028, 13 USPQ2d 1313 (Fed. Cir. 1989); *Perkins v. Kwon*, 886 F.2d 325, 12 USPQ2d 1308 (Fed. Cir. 1989); and *Winkler v. Guglielmino*, Fed. Cir. No. 89-1571. See also *Copelands' Enterprises, Inc. v. CNV, Inc.*, 887 F.2d 1065, 12 USPQ2d 1562 (Fed. Cir. 1989) (en banc) and *Kellogg Co. v. Pack'em Enterprises, Inc.*, Fed. Cir. No. 90-1336.

Mandamus granted-in-Part	1	0	1
Mandamus denied	6	2	8
Mandamus dismissed	3	0	3
Totals:	541	102	643

A.

An appellant may argue that a certain feature of a claim is not shown in the prior art. Such an argument may prompt us to determine whether the feature is known. If we find the feature, we will probably ask for a remand for the purpose of making an additional rejection.⁴ In like manner, based on our respective backgrounds or other cases handled by the Office of the Solicitor, we may know of prior art which strengthens a rejection.⁵

B.

Similarly, an appellant may argue that a certain fact is true. Upon looking into the matter, we have found literature from the appellant's assignee or other evidence which, in our opinion, demonstrates that the argument may not be factually correct.⁶ Since the literature or other evidence is not part of the record, we have asked for a remand so that the case may be fully developed before a merits panel is required to consider the case. We have also filed a brief on the merits asking the Federal Circuit to take judicial notice of a fact while concurrently filing a contingent motion to remand in the event the merits panel believes that judicial notice is not appropriate.⁷

C.

We have had cases where the sole issue is whether a Rule 131, 37 CFR § 1.131, affidavit is sufficient to antedate a reference. When the sufficiency of a Rule 131 affidavit is in issue, we search for a foreign or other equivalent statutory bar. When an equivalent statutory bar is found, we move to remand suggesting that the issue on appeal may well be moot.⁸

D.

In *re Steele*, 305 F.2d 859, 134 USPQ 292 (CCPA 1962), suggests that indefiniteness should be taken care of prior to considering obviousness. There have been cases in which the claims are so indefinite that judicial review of an obviousness issue simply would not make sense. Remands, over appellant's objection, have been ordered.⁹

² Approximately 80% of the remands were ordered based on motions to remand filed by the Office of the Solicitor. See the discussion on remands, *infra*.

³ All transfers were from a regional court of appeals to the Federal Circuit.

⁴ In *re Yashuhara*, Fed. Cir. No. 85-889. The reference added on remand was relied upon by the Federal Circuit in a later decision affirming the rejection made on remand. In *re Yashuhara*, Fed. Cir. No. 86-1634. See also In *re Merz*, Fed. Cir. No. 86-615, and *R. D. Werner Co. v. Quigg*, Civil Action No. 85-0945 (D.D.C.).

⁵ See e.g., In *re Trogan*, Fed. Cir. No. 85-2724, *Flexiwatt v. Quigg*, Civil Action No. 86-2666 (D.D.C.), In *re Nilssen*, Fed. Cir. No. 87-1349, In *re Nilssen*, Fed. Cir. No. 87-1392, and *Hepar Chimie v. Mossinghoff*, Civil Action No. 85-1912 (D.D.C.).

⁶ In *re Weitz*, Fed. Cir. No. 85-879; In *re Lowrance Electronics, Inc.*, Fed. Cir. No. 88-1180.

⁷ In *re Klang*, Fed. Cir. No. 85-2825.

⁸ In *re Lockner*, Fed. Cir. No. 86-1269.

⁹ In *re Jacobs*, Fed. Cir. No. 85-2210.

E.

There have been occasions where the Board, TTAB, or the Commissioner decides to change or reconsider a decision. A change of decision can occur, *inter alia*, due to:

1. new "law" as announced in a court or administrative decision,¹⁰ or
2. a deciding official or tribunal determines that:
 - (a) a decision may not be correct,
 - (b) a matter was overlooked,¹¹ or
 - (c) a decision otherwise needs to be reconsidered.¹²

F.

There have been cases where, although not argued by the appellant, it did not make sense to apply existing law in a particular context. We have moved to remand. In one instance, the Board reconsidered its position, established new law, and granted relief.¹³

G.

In its opinion, the Board — without entering a new ground of rejection under Rule 196(b), 37 CFR § 1.196 — may suggest that if there is to be further prosecution, an examiner may wish to look into several possible rejections. Generally in such a case the appellant will abandon or refile under 35 U.S.C. § 120. On occasion, however, an appellant will seek judicial review. Ordinarily, we seek remands in such a case in order to avoid piecemeal judicial review.¹⁴

H.

We had one case in which an appellant "dropped" an appeal as to all but a dependent claim — only the independent claim had been discussed in appellant's brief to the Board and the Board discussed only the independent claim. We sought a remand — after the appellant's brief had been filed — so that PTO could articulate a rationale as to the sole claim left in the appeal.¹⁵ Alternatively, we could have argued the appeal on the basis of the independent claim. However, in the context of the particular case, that alternative did not make sense.

I.

We had a case where the application on appeal was deemed to be abandoned. We moved to remand to clarify the status of the application.¹⁶ We also had a trademark appeal in which registration in the United States could not occur until registration took place abroad.¹⁷ Obviously, there was no reason to proceed in the Federal Circuit until registration occurred in the foreign country. When an appeal is taken in a trademark case, we always check to be sure that the registration relied upon is "alive." Appellant also should be sure that the registration has not expired. In one trademark appeal, the likelihood of confusion issue became moot on appeal when we discovered that the registration cited against the appellant expired without being renewed.

Most attorneys representing appellants will agree to a remand when approached by an attorney in the Office of the Solicitor — regardless of the time a suggestion to remand is made. A remand saves appellant, the Federal Circuit and our office time and money and in the long run contributes to the effective administration of justice within PTO and the Federal Circuit. In some cases, our motions to remand have been opposed. In one published opinion, an opposed motion was granted

¹⁰ In *re Eastin*, Fed. Cir. No. 90-1439.

¹¹ In *re Giordano*, Fed. Cir. No. 87-1029; In *re Raleigh Stores Corp.*, Fed. Cir. No. 87-1183; In *re Whaleco*, Fed. Cir. No. 87-1522.

¹⁷ In *re Matsushita Electric*, Fed. Cir. No. 89-1526.

(29)

notwithstanding appellant has filed its principal brief;¹⁸ in another opinion, relief was denied.¹⁹ It appears the Federal Circuit has adopted, as a general rule, the latter opinion. *See* Fed. Cir. R. 27(c).

We will not attempt to reconcile Fed. Cir. R. 27(c) with what we regard to be the better policy expressed in *In re Gould*. We will point out, however, that if an appeal proceeds in the face of a motion to remand,

(a) an appellant will have to spend money to have its attorney appear for oral argument,

(b) the merits panel will have to spend time preparing for oral argument, holding oral argument, and writing an opinion,

(c) PTO will have to expend resources preparing for and presenting oral argument, and

(d) prosecution on the merits may be reopened after a mandate is entered if a viable rejection remains to be considered.

It is possible, of course, that we might prevail on the merits, thereby obviating any need for a remand. However, if we do not prevail, PTO can — and often does — reopen prosecution of the application upon entry of the Federal Circuit's mandate to consider the matter raised by a motion to remand.²⁰

Sometimes an appellant will decide to file a second application, i.e., a continuation application or another trademark application, and simultaneously pursue the appeal. We believe appellant has a responsibility to call our attention to the fact that a second application has been filed. Knowledge of the second application is material to steps we might take.

First, perhaps any appeal (or civil action) should be suspended pending outcome of proceedings on the second application or dismissed without prejudice to another appeal in the event a final adverse Board decision is entered in the second application. In effect, by filing a second application, appellant admits that there are available administrative remedies and that those remedies have not been exhausted.

Second, it is in PTO's best interest that the examiner handling the second application be aware of the existence of an appeal. The examiner may ask our office for assistance, as may the Board, during prosecution of the second application.

III. Notice of appeal

Recent amendments have been made to conform PTO practice as much as possible to Fed. R. App. 4. *See* 54 Fed. Reg. 29548 (July 13, 1989), *reprinted in*, 1105 Off. Gaz. Pat. Office 5 (Aug. 1, 1989).

A. Time for appeal

If an appeal from a PTO decision to the Federal Circuit is authorized by law, the time for filing a notice of appeal in PTO was changed in August 1989 to two (2) months or 60 days, whichever is longer. The time for seeking judicial review by civil action under 35 U.S.C. §§ 145 or 146 is also two (2) months or 60 days, whichever is longer.

The filing of a request for reconsideration in PTO tolls the time for filing a notice of appeal. After a decision on reconsideration is entered in PTO, the two month period begins to run.

The time for appeal to the Federal Circuit is set by the Commissioner. 35 U.S.C. § 142; 15 U.S.C. § 1071(a)(2). The period for appeal must be at least 60 days. A notice of final rule was effective in August 1989 setting the time for appeal to two months or 60 days — whichever is longer. The dichotomy which used to exist between the 60-day period for initial decisions and the 30-day period for decisions on reconsideration²¹ no longer exists.

¹⁸ *In re Gould*, 673 F.2d 1385, 213 USPQ 628 (CCPA 1982). Relief in this case was ultimately granted in PTO. *Ex parte Gould*, 6 USPQ2d 1680 (Bd. Pat. App. & Int. 1987).

¹⁹ *In re Hester*, 838 F.2d 1193, 5 USPQ2d 1832 (Fed. Cir. 1988). Relief on the merits was ultimately granted by the Federal Circuit in an unpublished opinion.

²⁰ *In re Ruschig*, 379 F.2d 990, 154 USPQ 118 (CCPA 1967); *In re Fisher*, 448 F.2d 1406, 171 USPQ 292 (CCPA 1971).

²¹ 37 CFR § 1.304(a) (1989); 37 CFR § 2.145(d) (1989).

B. Cross appeals

In *inter partes* cases, a cross-appeal may be filed within fourteen (14) days of service of an appeal or two months after the PTO decision being appealed, whichever is later.

C. Requests to extend time to appeal

A request for an extension of time to file a notice of appeal before the appeal period expires can be granted by the Commissioner upon a showing of good cause.

A request after the appeal period expires must establish excusable neglect. The "excusable neglect" standard applied by PTO is the same as that applied by the courts of appeals.

All requests for an extension of time to appeal should be directed to the attention of the Office of the Solicitor.

D. Where to file a notice of appeal

The original notice must be filed in PTO — filing only in the Federal Circuit does not perfect an appeal. However, a copy must also be filed in the Federal Circuit. Fed. Cir. R. 15. A copy of the decision being appealed, and any decision on reconsideration, should be attached to the copy of the notice of appeal filed in PTO and with the Federal Circuit.

The original notice may be filed in any of the following ways:

1. By hand-delivery to the Office of the Solicitor between 8:30 a.m. and 5:00 p.m. at:
Office of the Solicitor
2121 Crystal Drive
Suite 918
Arlington, Virginia
2. By first-class mail addressed to:
Box 8
Commissioner of Patents and Trademarks
Washington, D.C. 20231
Attention: Office of the Solicitor
3. By Express Mail under 37 CFR § 1.10 addressed to:
Box 8
Commissioner of Patents and Trademarks
Washington, D.C. 20231
Attention: Office of the Solicitor

A certificate of mailing under 37 CFR § 1.8 cannot be used to file a notice of appeal. A notice of appeal filed in PTO using a certificate of mailing under 37 CFR § 1.8 is deemed filed when received in PTO. *In re Thrifty Corp.*, 231 USPQ 560 (Comm'r Pat. 1986).

A notice of appeal mailed to the Solicitor's Postal Box in Arlington, Virginia is deemed filed when received in the Office of the Solicitor.

E. Content of notice of appeal

A notice of appeal should identify all parties appealing. Fed. R. App. P. 15(a). *See* *Torres v. Oakland Scavenger Co.*, 487 U.S. 312, 317 (1988) [construing similar requirement of Fed. R. App. P. 3(c)].

Thus, in a case where there are joint inventors, the notice of appeal should identify all inventors. The notice of appeal should not identify John Doe et al. as appellants; rather, it should identify as appellants all named inventors, i.e., "John Doe and Richard Roe appeal . . ."

A notice of appeal need simply state that:

John Doe and Richard Roe appeal to the U.S. Court of Appeals for the Federal Circuit from a final decision entered by the Board of Patent Appeals and Interferences on June 15, 1990, and from a decision on reconsideration entered by the Board on July 15, 1990.

There is no need to give reasons in the notice of appeal. *See* 37 CFR §§ 1.4 and 1.5 for material which should appear in the "heading" of the notice of appeal.

IV. Transmittal of certified list

After a notice of appeal is received, a determination is made whether the notice was timely filed.

Appellant will be advised if the appeal is untimely. Fed. Cir. R. 15(b)(1) governs proceedings when a notice of appeal is not timely filed:

If the Commissioner notifies the clerk that the notice of appeal was not timely, the clerk shall order the appellant to show cause why the appeal should not be dismissed, and thereupon refer the response to the court.

In order to properly respond to the Federal Circuit, an appellant may wish to file a request for an extension of time, which should be filed in the Office of the Solicitor, and establish that the untimely filing of the notice of appeal was a result of excusable neglect. Any decision on the request will be copied to the Clerk of the Federal Circuit for such action as may be appropriate. A decision by the Commissioner *granting* a request to extend the time for filing the notice of appeal will discharge the show cause order entered by the Clerk.

A certified list, consisting of the contents of the application, interference, opposition, cancellation, or other proceeding is copied and forwarded to the Federal Circuit with a statement indicating whether the notice of appeal was considered timely filed. In *ex parte* patent appeals the certified list usually does not include the contents to any "parent" applications unless the application involved in the appeal is a "file wrapper continuation" under 37 CFR § 1.62.

A copy of the certified list is mailed to the appellant or, in the case of an *inter partes* proceeding, all parties.

In *ex parte* patent or trademark appeals, an attorney in the Office of the Solicitor is assigned to the appeal at the time the certified list is forwarded to the Federal Circuit. Counsel for appellant should initiate a discussion with the Solicitor's Office attorney assigned to the case to determine the contents of the appendix.

Upon receipt of the certified list, the appeal will be docketed by the Federal Circuit. An appeal number is assigned to each appeal by the Federal Circuit. Appellant's 60-day period for filing a brief runs from the later of the date the appeal is docketed by the Federal Circuit or the certified list is served. Fed. Cir. R. 31(a). Since the appeal is docketed after the certified list is served in the case of PTO appeals, the 60-day period almost always runs from the date the appeal is docketed.

V. Service of court papers on the Solicitor

The mail service address for the Solicitor is:

Office of the Solicitor
P. O. Box 15667
Arlington, Virginia 22215

Only litigation papers should be mailed to the Post Office box address. Other papers intended for filing in PTO should be addressed as specified in 37 CFR § 1.1. Non-litigation papers will be *returned* and will *not* be forwarded to the Mail Room.

Litigation papers not served by hand must be mailed to our Post Office box. Litigation papers mailed or delivered to the Mail Room of PTO, left in PTO's night deposit box, or left with a PTO employee in an office other than the Office of the Solicitor, are deemed served when *received* in the Office of the Solicitor.

The Office of the Solicitor is open from 8:30 a.m. to 5:00 p.m. Litigation papers served by hand must be delivered between 8:30 a.m. and 5:00 p.m. to:

Office of the Solicitor
2121 Crystal Drive
Suite 918
Arlington, Virginia

Unless permitted by court rules or order, delivery does *not* include facsimile transmission.

VI. Motions

Motions are inevitable in Federal Circuit and other court practice. Before a motion is filed, appellant should contact the Solicitor's Office to see if there is agreement on the requested relief and the *proposed order*. If there is no opposition to a procedural order, it can be entered by the Clerk, thereby obtaining prompt relief and obviating the need for a judge or motions panel to consider the matter.

VII. Appendix

A. Designation

The Office of the Solicitor typically designates the following items for inclusion in the appendix in addition to the mandatory items specified in Fed. Cir. R. 30.

In *ex parte* patent cases, we generally designate:

- (1) the specification;
- (2) any drawings;
- (3) the prior art supporting the rejection;
- (4) the final rejection and any Office action referenced in the final rejection;
- (5) the examiner's answer; and
- (6) any evidence submitted to support patentability.

In *ex parte* trademark cases, we generally designate:

- (1) the trademark application, including the drawing;
- (2) specimens;
- (3) the trademark examining attorney's statement; and
- (4) registrations supporting the refusal and any other evidence relied upon by the examining attorney the TTAB.

It should be noted that Fed. Cir. R. 30(a)(2)(iii) prohibits the inclusion of briefs filed by an applicant in PTO without leave of the court. However, the examiner's answer and examining attorney's statement may be designated and included without leave. Fed. Cir. R. 30(a)(2).

While the items in the appendix differ from case to case, a typical appendix in an *ex parte* patent appeal contains the following items in the following order:

- (1) table of contents;
- (2) the initial decision of the Board;
- (3) any decision on reconsideration;
- (4) a copy of the certified list, which corresponds to the docket entries mentioned in Fed. R. App. P. 29(a)(1) ;
- (5) the specification;
- (6) the final rejection;
- (7) the examiner's answer;
- (8) any prior art relied upon by PTO;
- (9) any rebuttal evidence, e.g., affidavits under Rule 131, 37 CFR § 1.131, or Rule 132, 37 CFR § 1.132; and
- (10) a copy of the rejected claims.

With respect to the last item, Fed. Cir. R. 30(a)(3) provides:

In appeals from . . . [PTO], the appendix shall, unless the parties mutually agree to the contrary, include a copy of all rejected claims in an *ex parte* patent appeal, a copy of all counts in a patent interference appeal, and both a copy of the trademark sought to be registered or cancelled and a copy of any registration relied upon to refuse or oppose registration or to seek cancellation of a registered mark in an *ex parte* or an *inter partes* trademark appeal

If the material designated as the appendix exceeds 100 pages, a draft copy of the appendix, with page numbers, should be sent to the Office of the Solicitor. Upon receipt, if we see any problem with the appendix, including any failure to comply with Federal Circuit rules, we promptly advise appellant. Preparation of a draft appendix will also insure that all briefs properly refer to pages of the appendix.

B. Page numbering

Fed. Cir. R. 30(c)(2) requires that page numbers be centered in the bottom margin of each page and that other pagination marks be redacted if necessary to avoid confusion. Numbering the appendix pages with a format such as "0001" generally avoids confusion with other page numbers.

If the designated appendix is less than 100 pages (which should be copied on both the front and back), the appendix is bound with appellant's principal brief. If the designated appendix is more than 100 pages, the appendix is filed separately within seven (7) days of the date the last reply brief is filed. Fed. Cir. R. 30(a)(4).

C. Legible materials

An appendix will often contain copies of materials which are illegible. In cases where counsel for an appellant does not have legible copies of materials which are available in PTO, contact the Office of the Solicitor and we will arrange to send a legible copy.

Handwritten notes in the margin of counsel's copy of Office actions should be removed. The proper place to argue a case is in a brief — not in notes in the margin.

(29)

VIII. Briefs

A. Statement of the facts

Fed. R. App. P. 28(a)(3) requires that an appellant file a statement of facts relevant to the issues presented for review. Fed. Cir. R. 28(b) provides that the appellee's statement of the case should be limited to the specific areas of disagreement with those of the appellant. Absent disagreement the appellee shall not include a statement of the case in his brief. *Id.* In our view these rules place the responsibility to provide a complete and neutral statement of facts on the appellant. Appellant should remember that it *lost* below. Hence, the "facts" are not those the appellant would like them to be; rather, the "facts" are those found by the Board. The statement of the facts in a brief is not the place to *argue* that the Board was clearly erroneous in making a finding of fact.

In our experience, appellants' statement of the facts invariably include argument; fail to describe all the facts relevant to the issues; state the facts in a light most favorable to appellant despite contrary findings below; or state conclusions — often without citation to the appendix. As a result, we typically find it necessary to include a detailed and, we believe, a complete and neutral statement of facts — with full citations to the appendix.

We particularly note that when "new" counsel is retained to handle the Federal Circuit appeal, the arguments on appeal often bear no resemblance to the arguments made to the Board. As a matter of logic, it would seem that the Board could not possibly have erred below on the basis of an argument made for the first time in the Federal Circuit. See *Keebler Co. v. Murray Bakery Products*, 866 F.2d 1386, 9 USPQ2d 1736 (Fed. Cir. 1989) (since Keebler failed to tell the TTAB it was interested in Murray's "intent," it could not use intent as a basis for showing "error" by the TTAB; *prescience* is not a required characteristic of the board and the board need not divine all possible afterthoughts of counsel that might be asserted for the first time on appeal).

B. References in brief to the appendix

All factual assertions made in the brief should be supported with citation to the appendix. How the Federal Circuit is supposed to know that an assertion is correct, when no reference is made to the appendix in support of the assertion, is something we have not been able to figure out. The Federal Circuit has often noted, with apparent disapproval, the absence of a citation to the appendix in support of a party's position.²² Failure to cite to the appendix may affect an attorney's credibility before the Federal Circuit and diminish the impact of otherwise meritorious arguments. If counsel feels that it is necessary to make factual assertions and cannot point to the specific portion of the appendix supporting the assertion, consideration should be given to refiling the application. Argument which depends on factual assertions not supported by the record cannot have any relevance to any error in the decision under review.

Moreover, to the extent that we have influence within PTO to bring about a favorable result by way of settlement, we need to be convinced. Allegations, not supported by references to the appendix, are not likely to convince any attorney in the Office of the Solicitor of the merits of an appellant's position.

IX. Oral argument

A. When we appear

An attorney from the Solicitor's Office will appear and present argument in cases in which the appellant intends to present oral argument. We will submit on the briefs only (1) where appellant submits on brief and (2) no reply brief has been filed or we conclude that the reply brief does not require comment at the oral hearing. On the other hand, if a reply brief raises a substantial issue, particularly a "new" issue, we will appear even if appellant waives oral argument.

B. Discussing the [alleged] error

An appellant has a burden of showing that the Board erred in its decision.²³ Factual findings below must be shown to be

clearly erroneous,²⁴ while legal conclusions are reviewed for correctness or error as a matter of law.²⁵ Having only a short time for oral hearing, typically fifteen minutes, appellants should direct their remarks to the purported errors in the Board's decision. Based upon the 60 to 80 cases we argue annually, we can assure appellants that Federal Circuit merits panels are familiar with the record and the proceedings under review. Counsel may not want to use part of the 15 minutes normally allocated for oral argument by:

- (1) explaining that the case is an appeal from the Patent and Trademark Office (the merits panel already knows that because the briefs have been read),
- (2) identifying the appellant or assignee (because it is essentially irrelevant),
- (3) reviewing the facts of the case, etc.

However, counsel should be thoroughly familiar with the record and be prepared to identify the portions which support their arguments.

We suggest oral argument by an appellant should start by saying "The error below was . . ." and here's why.

C. Visual aides

Fed. Cir. R. 34(c) encourages the use of visual aids. If the visual aid was not used during the administrative proceeding, written notice of the proposed use must be given at least 15 days prior to the hearing. Any written objections must be filed at least 5 days before the hearing. The rule also provides that counsel may agree on the use of visual aids.

Whether or not we will agree depends on the particular facts. We ordinarily do not disagree with enlargements ("blow-ups") of portions of the record. Where the proposed visual aid is not part of the record, we will not agree until we have had an opportunity to see the visual aid.

X. Petitions for rehearing

Petitions for rehearing can be useful if properly used. But, in our experience, petitions for rehearing filed by appellants simply reargue the case. We do not believe this is a proper function of a petition for rehearing.

Generally we will file a petition for rehearing only when (a) we believe the merits panel has made a genuine mistake — not merely a "judgment" call which happens to differ from our judgment, or (b) even where the result is correct, an opinion contains language which we believe will seriously and adversely affect PTO's ability to properly and effectively administer the patent or trademark laws. See *Markey*, "Semantic Antics in Patent Cases," 88 F.R.D. 103, 108 (1980) (suggesting rehearing should be requested to modify opinion language which confuses the law of patents).

We suggest, and do not believe, that there is such a thing as a "routine" petition for rehearing. A truly extraordinary situation must exist before a petition for rehearing can be deemed proper.²⁶ The Office of the Solicitor has been relatively successful with petitions for rehearing. In a 20-year period before the CCPA and Federal Circuit, we can recall filing approximately 12 petitions for rehearing. Some form of relief has been granted in nine, i.e., claims found patentable in the original decision were found unpatentable on rehearing,²⁷ language was changed in the opinion,²⁸ relief was granted in part,²⁹ etc.

XI. Issuance of mandates/termination of proceedings

As provided in Fed. R. App. P. 41(a), the Court's mandate usually issues 21 days after the entry of its decision. A request

²⁴ *Stock Pot Restaurant v. Stockpot, Inc.*, 737 F.2d 1576, 1578, 222 USPQ 665, 667 (Fed. Cir. 1984) (findings of fact of the TTAB are reviewed under the clearly erroneous standard); *In re Caveney*, 761 F.2d 671, 674, 225 USPQ 1, 3 (Fed. Cir. 1985) (findings of fact by the Board of Patent Appeals and Interferences are reviewed under the clearly erroneous standard).

²⁵ *In re Fine*, 837 F.2d 1071, 5 USPQ2d 1596 (Fed. Cir. 1988).

²⁶ In the case of a suggestion for rehearing en banc, we obtain approval from the Solicitor General.

²⁷ *In re Tiffin*, 448 F.2d 791, 171 USPQ 294 (CCPA 1971).

²⁸ *Parks v. Fine*, 773 F.2d 1577, 227 USPQ 432 (Fed. Cir. 1985), opinion amended, 783 F.2d 1036, 228 USPQ 677 (Fed. Cir. 1986).

²⁹ *Newman v. Quigg*, 877 F.2d 1575, 11 USPQ2d 1340 (Fed. Cir. 1992), reh'g on costs granted in part, 886 F.2d 329 (Fed. Cir. 1989).

²² See e.g., *Datascope Corp. v. SMEC, Inc.*, 879 F.2d 820, 827, 11 USPQ2d 1321, 1325 (Fed. Cir. 1989), cert. denied, 110 S.Ct. 729 (1990).

²³ *In re Durden*, 763 F.2d 1406, 1409, 226 USPQ 359, 361 (Fed. Cir. 1985) (The burden is on appellant to persuade the court that the Board was wrong).

for rehearing stays the mandate until seven days after an order by the merits panel denying rehearing. Unless there are allowable claims or the Court's decision requires further proceedings by the Office, the receipt of the mandate by PTO "terminates the proceedings" for purposes of continuity under 35 U.S.C. § 120. 37 CFR § 1.197(c), 54 Fed. Reg. 29548, 29552 (July 13, 1989) *reprinted in*, 1105 Off. Gaz. Pat. Office 5, 9 (Aug. 1, 1989). If an appellant contemplates filing a "continuing" application, it should be filed prior to the receipt of the mandate by PTO to preserve the benefit of the filing date of the parent application. Proceedings terminate on receipt of the mandate, *not* upon the expiration of the period for applying for certiorari to the Supreme Court.³⁰

XII. Costs

In *ex parte* patent and trademark appeals from PTO, costs are not awarded for or against the Commissioner. See Fed. Cir. Practice Note to Fed. Cir. R. 39.³¹ Hence, we do not file bills of costs in *ex parte* cases.

[1120 OG 23]

(30) Filing of Certain Papers and Authorizations to Charge Deposit Accounts by Facsimile Transmission

Effective Nov. 1, 1988, certain papers to be filed in national patent applications and reexamination proceedings for consideration by the Office of the Assistant Commissioner for Patents, the Office of the Deputy Assistant Commissioner for Patents, and the Patent Examining Groups (Patent Examining Corps) may be submitted to the Patent and Trademark Office (PTO) by facsimile transmission.

The provision of 37 CFR 1.33(a), requiring signatures on amendments and other papers filed in applications, is hereby waived to the extent that a facsimile signature is acceptable. The paper that is used as the original for the facsimile transmission must have an original signature, and should be retained by applicant or the representative as evidence of the content of the facsimile transmission. No special format, addressing information or written ratification is required for facsimile transmissions. However, the paper size must be 8 1/2" by 14" or smaller to be accepted.

A facsimile center has been established in the Patent Examining Corps to receive and process submissions. The filing date accorded the submission will be the date the complete transmission is received by the PTO facsimile unit unless that date is a Saturday, Sunday or Federal holiday within the District of Columbia, in which case the official date of receipt will be the next business day.

Each transmission session must be limited to papers to be filed in a single national patent application or reexamination proceeding. It is recommended that the Serial Number of the application or Control Number of the reexamination be entered as a part of the sender's identification, if possible. It is also recommended that the sending facsimile machine generate a report confirming transmission for each transmission session. The transmitting activity report should be retained along with the paper used as the original.

³⁰ *In re Jones*, 542 F.2d 65, 69, 191 USPQ 249, 252 (CCPA 1976) (when PTO receives CCPA mandate, proceedings in patent application are terminated); *Continental Can Co. v. Schuyler*, 326 F. Supp. 283, 168 USPQ 625 (D.D.C. 1970) (proceedings terminate within meaning of 35 U.S.C. § 120 when mandate of CCPA was issued). See also *In re Willis*, 537 F.2d 513, 515, 190 USPQ 327, 329 (CCPA 1976). Once a mandate is issued, it is our experience that a motion to withdraw the mandate to secure "copendency" with a continuation will not be granted. *In re Iwashita*, Fed. Cir. No. 90-1162, *In re Nakahama*, Fed. Cir. No. 90-1166, and *In re Nakahama*, Fed. Cir. No. 90-1187.

³¹ See also *In re Kochan*, Fed. Cir. No. 83-502 (May 25, 1983); *In re Lobdell*, Fed. Cir. No. 83-674 (Sept. 22, 1983); *In re Piasecki*, Fed. Cir. No. 84-775 (Nov. 9, 1984); *In re Shivers*, Fed. Cir. No. 85-1544 (Dec. 19, 1985); *In re Wrenn*, Fed. Cir. No. 86-743 (July 17, 1986); and *In re Dow Chemical*, Fed. Cir. No. 87-1406 (Feb. 11, 1988).

The papers, including authorizations to charge deposit accounts, which may be submitted using this procedure, are limited to those which may be filed in national patent applications and reexamination proceedings and which are to be considered by the PTO organizations named above. Examples of such papers are amendments, responses to restriction requirements, request for reconsideration before the examiner, petitions, terminal disclaimers, powers of attorney, notices of appeal and appeal briefs.

New or continuing patent applications of any type, assignments, issue fee payments, maintenance fee payments, declarations or oaths under 37 CFR 1.63 or 1.67, and formal drawings are excluded, as are all papers relating to international patent applications. Papers to be filed in applications that are subject to a secrecy order under 37 CFR 5.1 - 5.8, and directly related to the secrecy order content of the application, are also excluded. Informal communications between applicant and the examiner, such as proposed claims for interview purposes, are permissible and are encouraged. Informal communications from applicants will not be made of record in the application or reexamination and must be clearly identified as informal such as by including the word "DRAFT" on each paper. To facilitate informal communications from examiners, applicants are encouraged to supply their facsimile phone numbers on communications to the Office.

The facsimile submissions may include a certificate for each paper stating the date of transmission. A copy of the facsimile submission with a certificate attached thereto will be evidence of transmission of the paper should the original be misplaced. The person signing the certificate should have a reasonable basis to expect that the paper would be facsimile transmitted on the date indicated. An example of a preferred certificate is:

Certification of Facsimile Transmission

I hereby certify that this paper is being facsimile transmitted to the Patent and Trademark Office on the date shown below.

Type or print name of person signing certification _____

Signature _____ Date _____

When possible, the certification should appear on a portion of the paper being transmitted. If the certification is presented on a separate paper, it must identify the application to which it relates, and the type of paper being transmitted; e.g. amendment, notice of appeal, etc.

In the event that the facsimile submission is misplaced or lost in the PTO, the submission will be considered filed as of the date of the transmission, if the party who transmitted the paper:

- (1) Informs the PTO of the previous facsimile transmission promptly after becoming aware that the submission has been misplaced or lost;
- (2) Supplies another copy of the previously transmitted submission with the Certification of Transmission; and
- (3) Supplies a copy of the sending unit's report confirming transmission of the submission. In the event that a copy of the report is not available, the party who transmitted the paper may file a declaration under 37 CFR 1.68 which attests on a personal knowledge basis or to the satisfaction of the Commissioner to the previous timely transmission.

If all criteria above cannot be met, the PTO will require applicant to submit a verified showing of facts. Such a showing must show to the satisfaction of the Commissioner the date the PTO received the submission.

The facsimile center will have five facsimile units and will be staffed during the business hours of 8:30 a.m. and 5:00 p.m., Monday through Friday, excluding holidays. Although the units may normally be accessed at all times, including non-business hours, there may be times when reception is not possible due to equipment failure or maintenance requirements. Accordingly, applicants are cautioned not to rely on the availability of this service at the end of response periods.

The telephone number for accessing the facsimile machines is (703) 557-9564. In the event that the transmission cannot be accepted at the telephone number above, a backup number has

(31)

been established at (703) 557-9567. The facsimile center staff can be reached at telephone number (703) 557-4277 during normal business hours.

Oct. 19, 1988
DONALD J. QUIGG,
*Assistant Secretary and
Commissioner for Patents
and Trademarks*

[1096 OG 30]

(31) Filing of Certain Papers with the Board of Patent Appeals and Interferences by Facsimile Transmission

A facsimile machine has recently been installed at the Board of Patent Appeals and Interferences (Board). Accordingly, a party who wishes to file papers in a patent application or reexamination proceeding in which an appeal is pending and which is located at the Board may do so via the Board's facsimile machine, the telephone number of which is (703)557-8642. Normally, the file of a patent application or reexamination proceeding in which an appeal is pending is forwarded to the Board approximately six weeks after the examiner's answer has been mailed.

Certain papers in interference proceedings may also be filed via the Board's facsimile machine, for example, motions, briefs, designations of lead attorney, etc. The following are *excluded*: transcripts of depositions or of interrogatories, cross-interrogatories or recorded answers; preliminary statements; exhibits; and evidentiary records under 37 CFR 1.653.

All papers filed with the Board by facsimile transmission are subject to the provisions, requirements and exclusions stated in the Commissioner's Notice of October 19, 1988 (1096 O.G. 30, Nov. 15, 1988), entitled "Filing of Certain Papers and Authorization to Charge Deposit Accounts by Facsimile Transmission."

October 17, 1989
SAUL I. SEROTA
*Chairman
Board of Patent Appeals and Interferences*

**(32) DEPARTMENT OF COMMERCE
Patent and Trademark Office
37 CFR Parts 1, 2 and 3
[Docket No. 910246-2140]
RIN 0651-AA43**

Changes in Patent and Trademark Assignment Practice

Agency: Patent and Trademark Office, Commerce
Action: Final Rule.
Summary: The Patent and Trademark Office (Office) is amending the rules of practice regarding assignments in patent and trademark cases to improve and clarify the rules, to codify changes in practice and to consolidate the rules. The Office has combined the assignment rules currently in Parts 1 and 2 into a new Part 3 directed to assignments.
Effective Date: Sept. 4, 1992. These rules will be applicable to all documents filed with the Office on or after the effective date.
For Further Information Contact: Trademark related matters: Lynne Beresford by telephone at (703) 305-9464 or by mail marked to her attention addressed to the Commissioner of Patents and Trademarks, Washington, D.C. 20231. Patent related matters: Jeffrey V. Nase by telephone at (703) 305-9282 or by mail marked to his attention and addressed to Commissioner of Patents and Trademarks, Box DAC, Washington, D.C. 20231.
Supplementary Information: In a Notice of Proposed Rulemaking published in the Federal Register on May 10, 1991 at 56 FR 21641 and in the Patent and Trademark Office "Official Gazette" of June 4, 1991 at 1127 O.G. 8-16, the Office proposed to amend the rules of practice in patent and trademark cases to revise,

simplify, remove, or clarify existing assignment rules or to codify certain practices currently in effect. Changes were proposed for rules relating to the documents that will be recorded, to the requirements for recording a document, to the effect of recording, to new cover sheet requirements, to the appointment of domestic representatives; and to prosecution by assignees and issuance to assignees. While the existing rules do not require a cover sheet to accompany each document submitted for recording, typically a cover letter is submitted to ensure proper processing of the document.

The Office has encouraged the public to use a cover letter containing specific information concerning the document being submitted with each document submitted for recording. See "Helpful Hints", 1114 *Official Gazette* 77 (May 29, 1990). The public has adopted the suggested procedure to such an extent that most documents now submitted for recordation are accompanied by a cover letter which contains the suggested data. Documents submitted with these cover letters have enabled the Office to greatly improve the quality and efficiency of the recording process. To better ensure that the correct data is captured in recordation and recorded promptly, the Office is making a cover sheet mandatory. The cover sheet will contain all the information necessary for the Assignment Branch to properly and promptly process the document.

Written comments were submitted by 12 firms, 2 individuals, 4 corporations and 1 organization. No one testified at the oral hearing held on July 17, 1991.

The following includes a brief discussion of the rules being changed and the reasons for those changes, a detailed section-by-section analysis of the final rules, and an analysis of the comments received in response to the notice of proposed rulemaking.

Specific Rules to be Deleted or Added: The existing rules of practice in Parts 1 and 2 of Title 37 of the Code of Federal Regulations which are deleted are §§ 1.32, 1.331, 1.332, 1.333, 1.334, 2.185, 2.186 and 2.187. These rules are deleted in their entirety and rewritten and renumbered under a new Part 3. Table 1 is provided to assist readers in correlating previous rules with the new rules.

TABLE 1

Old Section	New Section
1.32	3.71 & 3.73
1.331(a)	3.11
1.331(b)	3.26
1.331(c)	3.21
1.332	3.51
1.333	3.56
1.334	3.81
2.185(a)	3.11
2.185(a)(1)	3.31
2.185(a)(2)	3.26
2.185(a)(3)	3.41
2.185(a)(4)	3.61
2.185(b)	3.31(b)
2.185(C)	3.51
2.186	3.71 & 3.73
2.187	3.85

Consideration was given to moving § 1.12 (Assignment records open to public inspection.) to Part 3. However, since this section primarily relates to records maintained by the Office and procedures for accessing those records, and no comments were received regarding the placement of § 1.12, this section remains under the general heading "Records and Files" of the Patent and Trademark Office.

Discussion of Specific Rules to be Changed or Added: Section 1.12(a) is revised to reflect the fact that all assignment records related to pre-1955 trademark records and pre-1957 patent records were transferred to the National Archives and Records Administration (NARA) during 1990. All assignments recorded on or after January 1, 1955, for trademarks and May 1, 1957, for patents continue to be maintained by the Office. The pre-1955/1957 records have been transferred to NARA to allow for greater accessibility to the public, improvement of file integrity for the older records, and preservation of these materials. The pre-1955/1957 assignment cards, digest books, and libers were stored in four locations: the Assignment Search Room (ASR) at the

Office, the Federal Records Center in Suitland, Maryland, the National Archives in downtown Washington, D.C., and the National Archives location in Alexandria, Virginia. Storage of information in these various locations made searching of old assignment records difficult. The materials located at the Federal Records Center could be ordered from the ASR. However, many times it took months to receive the materials.

All assignment records from 1837 to December 31, 1954, for trademarks and from 1837 to April 30, 1957, for patents are now maintained and are open for public inspection in the National Archives Research Room located at the Washington National Records Center Building, 4205 Suitland Road, Suitland, Maryland 20746. Assignments recorded before 1837 are maintained at the National Archives and Records Administration, 841 South Pickett Street, Alexandria, Virginia 22304.

All requests for abstracts of title continue to be provided by the Office upon request and payment of fees set forth in §§ 1.19 and 2.6. Requests for copies and certified copies of the pre-1955 records for trademarks and pre-1957 records for patents should be directed to NARA since those records are not maintained by the Office. Since these records are maintained by NARA, it is more expeditious to request copies directly from NARA, rather than the Office, which would then have to route the requests to NARA. Payment of the fees required by NARA should accompany all requests for copies.

Another change makes clear that separate assignment records are kept for patents and trademarks, and that an extra charge will be imposed by the Office on requests for copies of recorded assignments if the correct reel and frame number are not identified.

Sections 1.17 and 1.46 are amended to make reference to § 3.81, which replaces § 1.334, and delete reference to § 1.334. The amount of the fee for recording a document is not affected by this rule change.

Section 1.104(e) is amended to make reference to Part 3, which replaces § 1.331, and delete reference to § 1.331.

Section 3.1 is added to set out definitions of terms used in Part 3. Terms which are defined include "application," "assignment," "document," "Office" (meaning Patent and Trademark Office), "recorded document," and "registration." Definitions are provided to make clear the intended meanings of the terms used in Part 3. These definitions are intended to be applicable only to Part 3. For example, the term "application" is defined, for the purpose of Part 3, to mean a national application for patent, an international application for patent that designates the United States of America, or an application to register a trademark, unless otherwise indicated.

Section 3.11 replaces and modifies the practice set forth in §§ 1.331(a) and 2.185(a), which specify the documents the Office will record. This section specifies that assignments of patents and registrations will be recorded, as well as other documents which affect title to applications, registrations and patents. Section 3.11 requires that a completed cover sheet as specified in §§ 3.28 and 3.31 be submitted with the document to be recorded.

Section 3.16 is added to incorporate the limitation set out in 15 U.S.C. § 1060 proscribing the assignment of an intent-to-use trademark application prior to the filing of a statement of use, except as a part of the sale of an on-going business. Because the rules in Part 3 are intended to address all rules relating to assignments, it is appropriate to refer to the statutory requirements of an assignment of an intent-to-use trademark application.

Section 3.21 replaces and modifies the practice of § 1.331(c). Section 3.21 sets forth requirements for the identification of patents or patent applications in documents submitted for recording. An assignment relating to a patent must identify the patent by number. The name of the inventor, the issue date, and title of the invention as stated in the patent may also be given in the assignment to provide additional information on the patent being assigned. An assignment relating to a national patent application must identify the national patent application by application number (consisting of the series code and the serial number, e.g., 07/123,456) or serial number and filing date. An assignment relating to an international patent application which designates the United States of America must identify the international application number (e.g., PCT/US90/01234). The name of the inventor, date of filing, and title of the invention as stated in the patent application may also be given in the assignment. If an assignment is executed concurrently with, or subsequent to,

the execution of the patent application, but before the patent application is filed, it must identify the patent application by its date of execution, name of each inventor, and title of the invention so that there can be no mistake as to the patent application intended. Assignments submitted for recording that do not identify the patent or patent application as required by this section will not be recorded, but will be returned to the correspondence address that is required to be provided on the cover sheet by § 3.31(e).

Section 3.24 is added to set out formal document requirements to facilitate and expedite the recording process. This section requires that documents, either the original or a true copy of the original, submitted for recording be legible, using only one side of each page. The paper used should be flexible, white, durable, and preferably no larger than 21.6 x 33.1 cm. (8 x 14 inches), with a 2.5 cm. (one-inch) margin on all sides. Documents submitted in this form are camera-ready and can be recorded expeditiously with little additional handling required. Documents that fail to meet the legibility and single-sided paper requirements of this section will be returned as set forth in § 3.51.

Section 3.26 replaces and modifies the practice of §§ 1.331(b) and 2.185(a)(2). Section 3.26 provides that the Office will accept and record non-English documents provided they are accompanied by a verified English translation signed by the translator. Documents submitted that fail to meet the requirements of this section will be returned as set forth in § 3.51.

Section 3.27 is added to set out how documents submitted for recording should be addressed to the Office. To ensure prompt and proper processing, documents and their cover sheets should be addressed to the Commissioner of Patents and Trademarks, Box Assignments, Washington, D.C. 20231, unless they are filed together with new applications or with a petition under § 3.81(b). Petitions under § 3.81(b) should be addressed to the Commissioner of Patents and Trademarks, Box DAC, Washington, D.C. 20231. New applications and other petitions should be addressed to the Commissioner of Patents and Trademarks, Washington, D.C. 20231.

Section 3.28 is added to set out the requirement that all documents submitted to the Office for recording be accompanied by at least one cover sheet referring either to the patent applications and patents or to the trademark applications and registrations against which the document is to be recorded. Only one set of documents and cover sheets to be recorded should be filed. If a document to be recorded includes interests in, or transactions involving, both patents and trademarks, separate patent and trademark cover sheets must be submitted. If a document to be recorded is not accompanied by a completed cover sheet, the document and any incomplete cover sheet will be returned to the correspondence address for proper completion of the cover sheet and resubmission of the cover sheet and document. While the previous rules did not require a cover sheet to accompany each document submitted for recording, typically a cover letter is submitted to ensure proper processing of the document. The Office is making a cover sheet mandatory in order to better ensure prompt and proper processing of all documents submitted for recording. The cover sheet contains all the information necessary for the Office to process the document.

Section 3.31 is added to set out the formal requirements of the cover sheet. Section 3.31 requires that each patent or trademark cover sheet must contain (1) the name of the party conveying the interest; (2) the name and address of the party receiving the interest; (3) a brief description of the interest conveyed or transaction to be recorded (e.g., assignment, license, change of name, merger, security agreement, etc.); (4) each application number, patent number or registration number against which the document is to be recorded, or an indication that the document is filed together with a patent application; (5) the name and address of the party to whom correspondence concerning the document to be recorded should be mailed; (6) the number of applications, patents or registrations identified in the cover sheet and the total fee; (7) the date the document was executed; (8) an indication that the assignee of a trademark application or registration who is not domiciled in the United States has designated a domestic representative; (9) a statement by the party submitting the document that to the best of the person's knowledge and belief, the information contained on the cover sheet is true and correct, and (10) the signature of the party submitting the document. The term "party" as used in this rule means the person whose name

(32)

appears on the documents to be recorded, that person's attorney or registered agent, or a corporate officer where a corporation's name appears on the document. Sample cover sheets for patent documents and for trademark documents are shown in Appendices A and B.

Section 3.34 is added to set out the procedure to correct obvious errors in a recorded cover sheet. This section requires that if a recorded cover sheet contains an error that is apparent when the cover sheet is compared with the recorded document, the error will be corrected only if a corrected cover sheet is filed for recordation. The corrected cover sheet must be accompanied by the originally-recorded document or a copy of the originally-recorded document and by a new assignment recording fee in the appropriate amount.

Section 3.41 replaces and consolidates practice under §§ 1.331(a) and 2.185(a)(3) regarding recording fees. Section 3.41 requires that all requests to record documents be accompanied by the appropriate fee. A fee is charged for each application, patent and registration identified in the cover sheet. The recording fee for patents and patent applications is specified in § 1.21(h). The recording fee for trademark registrations and applications is specified in § 2.6(q).

Section 3.51 replaces and modifies the practice of §§ 1.332 and 2.185(c). Section 3.51 sets the date of recording of a document as the date the document meeting the requirements for recording set forth in this Part is filed in the Office. A document which does not comply with the identification requirements of § 3.21 will not be recorded. For documents not accepted for recording, parties can petition under 37 CFR §§ 1.181 and 2.146(a). Other documents not meeting the requirements for recording, for example, a document submitted without a completed cover sheet, without the required fee, or without any required translation, will be returned for correction to the sender when a return address is available. The returned papers, stamped with the official date of receipt in the Office, will be accompanied by a letter indicating that if the returned papers are corrected and resubmitted to the Office within time specified in the letter, the Office will consider the original date of filing of the papers as the date of recording of the papers. Submitters can use the certificate procedure under either § 1.8 or § 1.10 for resubmissions of returned papers if they desire to have the benefit of the date of deposit in the United States Postal Service. If the returned papers are not corrected and resubmitted within the specified period, the date of filing of the corrected papers will be considered to be the date of recording of the papers. Extensions of time will not be available to extend the specified period to resubmit the returned papers.

Section 3.54 is added to set out the effect of recording a document. This section states that the recording of a document is not a determination by the Office of the validity of the document or the effect that document has on the title to an application, a patent, or a registration. The Office will determine, when necessary, what effect a document has, including whether a party has the authority to take an action in a matter pending before the Office. Examples of when the Office will need to determine whether a party has the authority to take an action in a matter pending before the Office include: (1) prosecution by the assignee as in § 3.71; (2) consent of an assignee to the filing of a reissue application as provided in § 1.172; and (3) execution of a disclaimer under § 1.321 by an assignee.

Section 3.56 replaces and modifies the practice of § 1.333. Section 3.56 provides that an assignment, which at the time of its execution is conditional on a given act or event, will be treated by the Office as an absolute assignment. This section serves as notification as to how a conditional assignment will be treated by the Office in any proceeding requiring a determination of the owner of an application, patent or registration. Since the Office will not determine whether a condition has been fulfilled, the Office will treat the submission of such an assignment for recordation as signifying that the act or event has occurred.

Section 3.61 replaces and modifies the practice of § 2.185(a)(4). Section 3.61 sets forth that an assignee of a trademark application or registration not domiciled in the United States must designate a domestic representative in writing to the Office. Assignees of patent applications or patents may designate domestic representatives if the assignee is not residing in the United States. 35 U.S.C. § 293. The designation is required to state the name and address of a person residing within the United States on whom may be served process or notice of proceedings

affecting the application, patent or registration or rights thereunder.

Section 3.71 replaces and modifies the practice of §§ 1.32 and 2.186. Section 3.71 sets forth that the assignee of record of the entire right, title and interest in an application for patent is entitled to conduct the prosecution of the patent application to the exclusion of the named inventor. Similarly, the assignee of an application for registration is entitled to conduct the prosecution of the trademark application to the exclusion of the applicant.

Section 3.73 is added to set out the procedure by which an assignee can establish the right to take action in an application, patent or registration. The inventor is presumed to be the original owner of a patent application and any patent that may issue therefrom, unless there is an assignment. The original applicant is presumed to be the original owner of a trademark application and any registration that may issue therefrom, unless there is an assignment. Any action before the Office with respect to an assigned patent application, patent, or reexamination may be taken by the assignee of the entire right, title, and interest, provided ownership is established to the satisfaction of the Commissioner. The assignee may establish ownership by submitting to the Office documentary evidence of a chain of title from the original owner to the assignee or by specifying (e.g., reel and frame number, etc.) where such evidence is recorded in the Office. Additionally, when a patent assignee is not represented by an attorney or registered agent, a statement signed by the assignee must also be submitted stating the evidence has been reviewed and certifying that, to the best of the party's knowledge and belief, title is in the party seeking to take the action. Documents submitted to establish ownership may be required to be recorded in the Office as a condition to permitting the requesting party to take action in a matter pending before the Office. Any action before the Office with respect to an assigned trademark registration, application or post-registration matter, may be taken by the assignee provided ownership is established to the satisfaction of the Commissioner by recording an assignment to the assignee or by submitting other proof of the assignment.

Section 3.81 replaces and modifies the practice of § 1.334. Section 3.81 sets forth the procedure for issuance of a patent to an assignee. If an assignment of the entire right, title, and interest is recorded before the issue fee is paid for a patent application, the patent may issue in the name of the assignee. If the assignee holds an undivided part interest, the patent may issue jointly to the inventor and the assignee. At the time the issue fee is paid, the name of the assignee must be provided if the patent is to issue solely or jointly to that assignee. If the assignment is submitted for recording after the date of payment of the issue fee, but prior to issuance of the patent, the assignee may petition that the patent issue to the assignee. Any such petition must be accompanied by the fee set forth in § 1.17(i)(1).

Section 3.85 replaces and modifies the practice of § 2.187. Section 3.85 sets forth the procedure for issuance of a registration to an assignee. The certificate of registration may be issued to the assignee of the applicant, or in a new name of the applicant, provided that the party files a written request in the trademark application record by the time the application is being prepared for issuance of the certificate of registration, and an appropriate document is recorded in the Office. If the assignment or name change document has not been recorded in the Office, then the written request must state that the document has been filed for recordation. The address of the assignee must be made of record in the trademark application file.

Response to Comments on the Rules

The comments received in response to the notice of proposed rulemaking have been given careful consideration and a number of the suggested modifications have been adopted. The comments and responses are discussed below.

In this discussion, "Patent and Trademark Office" is abbreviated as "Office" or "PTO."

Comment: Two comments were received addressed to the overall rule package. One comment expressed concern over the potential confusion of instituting a new Part 3. It was suggested that Parts 1 and 2 be amended to contain the necessary changes. Another comment was concerned that the rules and specifically the new cover sheet requirement would impede promptness and accuracy of the recordation process.

Response: The Office has determined that the new rules will result in greater efficiency and accuracy in the recordation process and improve the integrity of the records maintained by the PTO. Further, the PTO believes that a new Part 3, containing all rules relating to assignments, will be beneficial to the majority of patent and trademark system users.

Comment: Section 3.1 was proposed to define "application" as an application for patent or an application to register a trademark. One comment questioned whether international applications filed under the Patent Cooperation Treaty were included in the definition of the word "application."

Two comments were received concerning the definition of "assignment." As proposed, § 3.1 defines "assignment" of a trademark in terms of a "trademark application" or "registration." The comments suggested that because Section 10 of the Trademark Act, 15 U.S.C. § 1060, speaks in terms of a "registered mark" or a "mark for which application to register has been filed," which was reflected in previous trademark rule 2.186, the different terminology may be construed to permit assignment of a trademark without assignment of the underlying goodwill.

Response: The wording of § 3.1 has been changed to include both national applications for patent and international applications that designate the United States in the term "application."

Also to avoid any potential confusion over the definition of a trademark assignment, the Office adopted the suggestion to reflect Section 10 of the Trademark Act and to refer to a "registered mark" or a "mark for which application to register has been filed" in its definition of assignment.

Comment: As proposed, § 3.16 provides that an application to register a mark under 15 U.S.C. § 1051(b) cannot be assigned before a statement of use is filed except to a successor to an ongoing business of the original applicant. One comment suggested § 3.16 be further amended to correct a legislative oversight and permit assignment of the application after an amendment to allege use is filed.

One other comment suggested the PTO define the statutory language "successor to the business of the applicant."

Response: As proposed, Rule 3.16 merely restates the statute. To permit the filing of an assignment to a successor to an ongoing business before an amendment to allege use has been filed would make the rule inconsistent with the statute.

As to the definition of "successor to the business of the applicant," it has been determined that in the absence of any statutory definition, it is better left to case law to establish the meaning. A business, or portion thereof, can be transferred or assigned in a variety of ways, and the question of valid ownership might arise in a variety of circumstances. For the PTO to define what constitutes a successor may be duly restrictive.

Accordingly, the suggested modifications have not been adopted.

Comment: Section 3.21, as proposed, provides that an assignment of a patent or patent application must be identified by number. One comment requested a further amendment to allow the filing of a patent assignment after filing an application for patent but before knowing the application number by allowing identification by the execution date, inventors and title of the invention instead of the application number.

Another comment suggested that assignments relating to trademark applications and registrations should also be required to have the identifying serial and registration numbers within the body of the assignment document.

One comment questioned whether the patent identification number was required in the document or whether the number could just appear on the cover sheet.

Response: Providing the identifying number in the assignment document allows for greater efficiency and accuracy in recording assignments. However, unlike patents, trademarks can have an indefinite life. Assignments may be recorded years after an assignment has occurred to clear up the chain of title. It may not be possible to execute a new assignment to include identifying numbers in the document years later. Accordingly, it is preferable for the PTO to be more flexible in recording trademark assignments which may contain the identifying number in the cover sheet rather than in the document itself. Because of the nature of a patent, less flexibility is permitted. Patent rights, unlike trademark rights, do not exist apart from the issued patent. Accordingly, when an interest in a patent is transferred, the patent identifying number must be in the assignment document.

This requirement only applies to assignments, not to documents other than assignments.

The PTO makes every effort to provide applicants with the application numbers for newly-filed patent applications as soon as possible. It is suggested, however, that assignment documents may be written to allow entry of the identifying number after the execution of the assignment. An example of acceptable wording is: "I hereby authorize and request my attorney, (Insert name), of (Insert address), to insert here in parentheses (Application number _____, filed) the filing date and application number of said application when known."

Accordingly, the suggested modifications have not been adopted.

Comment: Section 3.24, as proposed, provides the formal requirements for the documents which are to be recorded and the cover sheet. Three comments stated that the one-side only requirement was unreasonable in light of PTO's issuance of two-sided patent and trademark copies and of the practices of other governments and corporations over which the submitter would have no control.

One comment requested clarification of "bond weight paper" and suggested the language used in the rules setting out drawing requirements be adopted.

One comment stated that the document size requirements should only pertain to documents prepared and executed by parties who wish to convey title.

Two comments questioned whether the PTO would permit the filing of copies or true copies in lieu of the original documents for recording.

Response: The formal requirements set out in § 3.24 are related to PTO's ability to capture on film papers filed with the PTO. The requirements are not related to the other printing or photocopying services PTO provides. Micrographics reproduction requires that only one side of each page be used for efficiency. If the original document is two-sided or the wrong size, the practitioner can comply with this requirement by providing a true copy of the original document using only one side of each page on the correct size paper. The language in § 3.24 has been changed to clarify that true copies or originals are acceptable. Further, the language describing the type of paper to be used has been changed to be consistent with the drawing requirement rules.

Comment: Section 3.28, as proposed, provides that all requests to record a document must be accompanied by the document to be recorded and at least one cover sheet. One comment expressed confusion over whether the document must be accompanied by a cover letter as well as a request for recording. One comment stated the requirement for a cover sheet did not help the PTO with the documents which are file with applications and the commenter did not see the need for an additional paper included among the papers for a new application.

Response: The first sentence has been rewritten to clarify that only the document and a cover sheet(s) must be submitted. A separate request for recording is not required or needed. Because the cover sheet provides all pertinent information in one place, it will greatly assist the processing of assignments by the PTO. For those applications which are filed with an assignment, the additional cover sheet required for the assignment aids the processing of the assignment.

Comment: Numerous comments were received on the proposed cover sheet requirements of § 3.31. One comment questioned whether the form or the contents of the form are being required and cautioned that the cover sheet should not become a technical obstacle to recordation.

Two comments claimed the cover sheet requirement would be burdensome and the documents recorded should speak for themselves.

Two comments objected to the requirement for the characterization of the interest being conveyed. One of the commentators indicated it was not the best evidence of what the interest is and may be misleading while the second commentator was concerned practitioners would be subject to malpractice claims and be made parties to litigation involving the transfer.

One comment stated that requiring the assignee's address was burdensome and excessive. Three comments questioned the lack of consistency between proposed subsections (a) and (b) of § 3.31 which requires only the name of the conveyor but both the name and address of the receiver.

(32)

Two comments stated that the language of the rule was unclear as to whether the list of properties within the assignment document should be retyped on the cover sheet, which would be burdensome and fraught with potential errors.

One comment was received suggesting that properties be identified with as much information as possible (i.e., serial number, patent number, filing date, inventors, etc.).

Four comments stated that the requirement for an execution date of the document is excessive and burdensome. One of the comments stated that the execution date may not be as important as the effective date of the document. One suggested the effective date would be more accurate and another suggested the document should speak for itself. One additional comment stated that a *nunc pro tunc* assignment of the substantive rights of an assignee or assignor may be unduly affected by the requirement for recitation of the execution date.

Nine comments were received objecting to the language of the proposed verification. Some comments recommended that the verification statement be deleted. Other comments recommended that the verification statement be based on "information and belief." The comments indicated (1) practitioners did not want to be held responsible for the information entered on the cover sheet, (2) there was no purpose served by signing the cover sheet because the documents should speak for themselves and (3) under 37 C.F.R. § 10.18, a registered practitioner's signature indicates that the filing is correct.

One comment suggested that proposed § 3.31(i) does not recognize the right of some non-lawyers to practice in trademark matters before the PTO.

Additionally, many comments and suggestions were received on the layout of the sample cover sheets.

Response: The proposed purpose of the cover sheet is to provide a synopsis of the vital information contained in a recorded document. The cover sheet form itself is not required, only the information outlined in § 3.31 is required. Use of the sample cover sheet formats appearing as Appendices A and B to the rule package is encouraged. The Office will make paper copies of the sample cover sheets available for customer use. Persons wishing to obtain paper copies of the sample cover sheets should contact the Public Service Center at (703) 305-HELP. Questions regarding the sample cover sheets should be directed to the Assignment and Certification Services Division at (703) 308-9700.

As indicated in the proposed rule package, a majority of documents presently filed for recording are accompanied by a cover letter containing much of the information required in § 3.31. The PTO does not believe standardization of the information submitted is an undue burden. Standardization ensures easy reference to all critical information. Further, the parties or their representatives are in a better position to know or ascertain the nature of the interest involved than the PTO. The document will always speak for itself. However, a characterization assists in putting others on notice as to the nature of the transaction.

It was determined that a verification is not required. The language has been changed to a statement on the cover sheet based on "information and belief." Further, § 3.31(i) has been divided into two paragraphs, one for the statement that is required and one for the signature.

The address of the assignee or receiving party is vital information for maintaining complete assignment records. The original owner is the applicant, for which the Office has the address of record. Each subsequent assignee address is then obtained under this requirement and is of record if the PTO or public needs to contact the present assignee. The execution date is required to determine whether an assignment has been recorded within three months provided in 35 U.S.C. § 261 and 15 U.S.C. § 1060.

When there is a listing of properties contained within a document, any listing may be copied and attached to the cover sheet to reduce the amount of typing necessary. A notation of this attachment can be made in lieu of entering every property identification number on the cover sheet. Should submitters provide information in addition to that required by § 3.31, it is always welcome, but not required.

The comments received on the layout of the sample cover sheets have all been considered and some modifications have been made. However, the sample cover sheet is not required and it is not part of the rules.

Comment: Section 3.34, as proposed, provides for correction of errors in a recorded cover sheet when the error is apparent by

comparing the information on the cover sheet with the recorded document itself. One comment received expressed confusion regarding the correction procedure. Another comment suggested that corrections should not be limited to apparent errors.

Response: The PTO will not compare the cover sheet with the original documents during the recording process except to assure that application and patent numbers are present in patent assignments. Otherwise, it will only check to see that the cover sheet is complete. When a submitter discovers an obvious error on the recorded cover sheet, the PTO will consider a request to correct it when it receives: (1) the original recorded document (or a copy); (2) a corrected cover sheet; and (3) the appropriate fee for each property to be corrected. The PTO will then compare the cover sheet with the document to determine whether the error is apparent on its face. If the error is obvious, the corrected cover sheet will be recorded and the respective Office records corrected. If the error is not obvious, the procedure set forth in the Manual of Patent Examining Procedure, MPEP § 323 will govern for patents and the procedure set forth in *In re Abacab International Computers Ltd.* (Assignee of IHEC, Ltd.), 21 USPQ2d 1078 (Comm'r Pats. 1987), on reconsideration, 21 USPQ2d 1079 (Comm'r Pats. 1988) will govern for trademarks. Submitters may also petition under § 1.833 or § 2.146 for other corrections. Typographical errors made by the Office will be corrected without charge when brought to our attention.

Accordingly, the suggested modification has not been adopted. The rule has only been changed to correct a cross reference.

Comment: As proposed, § 3.51 provides that the date of recording is the date all of the required information is filed in the Office. Incomplete documents will be returned. If the returned documents are resubmitted timely, the document will retain the date on which it was received as incomplete. Two comments were received regarding the time period to be set by the PTO. One comment indicated that any delay may affect the requirements of 15 U.S.C. § 1060. It was therefore recommended that the PTO make some type of "conditional entry" in the records indicating an assignment has been submitted so interested members of the public could ascertain that there may be an effective recording date. The other comment suggested the time period for resubmission be long enough to allow communication with foreign parties, but it should be no longer than six months.

Response: After a review of the proposed rule, it was determined that the language of § 3.51 should be clarified to reflect that the originally-submitted papers with the official Office date stamp indicating the original receipt date in the Office must be returned in order to retain the original date. It is the intent of the PTO to set the time for response at one month from the date of mailing of the returned documents from the PTO. It is believed that most correctable errors will involve an incomplete cover sheet or the amount of the fee submitted, both of which can be corrected within one month.

Further, it is the policy of the PTO to make of record only those documents which meet the requirements for recording. It is not beneficial to cloud title to properties with potential transfers.

Comment: Section 3.56, as proposed, is a restatement of former § 1.333 and is made applicable to trademarks. It provides that an assignment which is made conditional upon a condition subsequent will be regarded by the Office as an absolute assignment. One comment was received inquiring as to whether § 3.56 applied to security interests, another was received requesting a reference in the rules to recording of security agreements.

Response: Section 3.56 is applicable only to assignments, as they are defined by § 3.1, that is, a transfer of right, title and interest in a patent or a trademark. A security interest or a security agreement is in the nature of a lien, not an assignment. Accordingly, § 3.56 would not apply to security interests or security agreements which are also recordable. It applies to conditional assignments because the Office has no way of determining whether and when conditions are satisfied and therefore must address this type of assignment in a uniform manner. The reference to the recordability of security agreements is referred to here in the final rule package.

Comment: The second sentence of § 3.71, as proposed, provides: "[t]he assignee of record of the entire right title and interest in a trademark application or registration is entitled to conduct the prosecution of the trademark application or registration to the exclusion of the original applicant or previous assignee." One comment suggested, as had been recommended for

the definitions in § 3.1, that language be adopted consistent with Section 10 of the Trademark Act, 15 U.S.C. § 1060, so there be no confusion as to what can be assigned in the trademark area and further, that the language requiring "entire right, title and interest" be deleted.

Response: As was the case with the PTO's review of § 3.1, the language in § 3.71 has also been modified to eliminate any confusion. Accordingly, § 3.71 now provides for assignments of registered marks or a mark for which an application for registration has been filed, making it consistent with § 3.1. While this change cannot prevent assignments from being made without the underlying goodwill, it may eliminate some confusion.

Comment: Section 3.73, as proposed, provided that a full assignee could take any action before the Office with respect to the assigned application, patent, or registration provide ownership is established to the satisfaction of the Commissioner. The rule further provided that ownership could be established by providing documentary evidence of the chain of title to the assignee. The assignee was also required to submit a verified statement stating the evidence had been reviewed and certifying to the best of the party's belief, title is in the party seeking to take the action. The Office reserved the right to require recordation of any ownership documents. One comment suggested the procedure was too "elaborate" and "confusing" to permit the submitting party to act rapidly. Another comment suggested the Office use the language of former § 2.186 which only required "the assignment has been recorded or that proof of the assignment has been submitted" to enable action by the assignee.

Another comment suggested that a simple statement identifying the documents thought to place ownership in a party should be sufficient. It was believed that no additional benefit accrued by having the party state that they believed they were entitled to take the action because whether or not a party can act is a determination the PTO must make.

Two comments suggested that a literal reading of the rule would require every paper filed on behalf of an assignee be accompanied by a proof of ownership. One comment suggested it was too harsh to preclude a party from taking action in a trademark matter until proof of ownership is established to the satisfaction of the Commissioner. Rather, it was suggested that a party be permitted to take action once documents establishing ownership are filed.

One comment received pointed to the proposed language of § 3.73 providing the statement must be signed by the party or its attorney or agent of record which was a greater requirement than § 1.34(a), if that was intended.

Another comment suggested that the proposed language be changed by deleting the provision that ownership must be established to the satisfaction of the Commissioner and substituting therefore "provided the assignee is owner of the entire right, title, and interest in the patent application, patent, registered mark or mark for which an application for registration has been filed."

One final comment suggested that § 3.73 be changed to specifically set forth that it applied to secure Office acceptance of a Section 8 or 15 affidavit or a Section 9 application, 15 U.S.C. §§ 1058, 1059, for trademark filings, and requested examples of the types of documents necessary to establish ownership.

Response: Ownership need only be established the first time the new party wants to act in patent and trademark cases, provided the appropriate documents are recorded. Section 3.73(b) is modified to provide that a statement of ownership need only be provided when a patent assignee wishes to act on a matter. For patents, the PTO believes it is appropriate for the patent assignee to review the documents it believes establishes its ownership prior to filing a paper signed by that assignee. Additionally, the statement will certify that to the best of the assignee's knowledge and belief, title is in that assignee. This will establish, to the satisfaction of the Commissioner, that the assignee knows of no other document establishing title in someone other than the assignee. The PTO will still make the determination of whether the assignee is entitled to take action after a review of the documents.

For trademarks the action sought to be taken can be submitted simultaneously by the party. The action will be examined as will the claim of ownership and the party will be notified whether it is satisfactory. As in the past, "any action" refers to post-registration documents as well.

Other Considerations

The rule changes are in conformity with the requirements of the Regulatory Flexibility Act (5 U.S.C. 601 et seq.), Executive Orders 12291 and 12612 and the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 et seq.

The General Counsel of the Department of Commerce has certified to the Chief Counsel for Advocacy, Small Business Administration, that these rule changes will not have a significant adverse economic impact on a substantial number of small entities (Regulatory Flexibility Act, 5 U.S.C. 605(b)). The principal impact of these changes is to require that a cover sheet accompany each document submitted for recording. The rule change includes no additional or increased fees. Substantive rights to use trademarks and patents are not adversely affected.

The Office has determined that these rule changes are not a major rule under Executive Order 12291. The annual effect on the economy will be less than \$100 million. Because most of the changes reduce procedural burdens, there will be no major increase in costs or prices for consumers; individual industries; Federal, state or local government agencies; or geographic regions. There will be no significant adverse effects on competition, employment, investment, productivity, or innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

These rule changes contain a collection-of-information requirement subject to the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 et seq. The rule changes add a requirement for a cover sheet to be submitted with each document to be recorded that will expedite the recording process and improve quality. This collection of information requirement is cleared under OMB Control No. 0651-0011. The public reporting burden for this requirement is estimated to be *one-half* hour per filing, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collections of information.

The Office has also determined that this notice has no Federalism implications affecting the relationship between the National Government and the States as outlined in Executive Order 12612.

List of Subjects

37 CFR Part 1

Administrative practice and procedure, Courts, Freedom of information, Inventions and patents, Reporting and recordkeeping requirement.

37 CFR Part 2

Administrative practice and procedure, Courts, Lawyers, Trademarks.

37 CFR Part 3

Administrative practice and procedure, Inventions and patents, Trademarks, Reporting and recordkeeping requirement.

For the reasons set out in the preamble and pursuant to the authority contained in 15 U.S.C. 1123 and 35 U.S.C. 6, parts 1, 2 and 3 of title 37 of the Code of Federal Regulations are amended as set forth below.

PART I - RULES OF PRACTICE IN PATENT CASES

1. The authority citation for 37 CFR Part 1 would continue to read as follows:

Authority: 35 U.S.C. 6, unless otherwise noted.

2. Section 1.12 paragraphs (a) and (d) are revised to read as follows:

§ 1.12 Assignment records open to public inspection.

(a) (1) Separate assignment records are maintained in the Patent and Trademark Office for patents and trademarks. The assignment records, relating to original or reissue patents, in-

(32)

cluding digests and indexes, for assignments recorded on or after May 1, 1957, and assignment records relating to pending or abandoned trademark applications and to trademark registrations, for assignments recorded on or after January 1, 1955, are open to public inspection at the Patent and Trademark Office, and copies of those assignment records may be obtained upon request and payment of the fee set forth in §§ 1.19 and 2.6 of this Chapter.

(2) All records of assignments of patents recorded before May 1, 1957, and all records of trademark assignments recorded before January 1, 1955, are maintained by the National Archives and Records Administration (NARA). The records are open to public inspection. Certified and uncertified copies of those assignment records are provided by NARA upon request and payment of the fees required by NARA.

(d) An order for a copy of an assignment or other document should identify the reel and frame number where the assignment or document is recorded. If a document is identified without specifying its correct reel and frame, an extra charge as set forth in § 1.21(j) will be made for the time consumed in making a search for such assignment.

3. Section 1.17 is amended by revising paragraph (i)(1) to read as follows:

§ 1.17 Patent application processing fees.

(i)(1) For filing a petition to the Commissioner under a section of this part listed below which refers to this paragraph \$130.00

§ 1.12 — for access to an assignment record.

§ 1.14 — for access to an application.

§ 1.53 — to accord a filing date.

§ 1.55 — for entry of late priority papers.

§ 1.60 — to accord a filing date.

§ 1.62 — to accord a filing date.

§ 1.103 — to suspend action in application.

§ 1.177 — for divisional reissues to issues separately.

§ 1.312 — for amendment after payment of issue fee.

§ 1.313 — to withdraw an application from issue.

§ 1.314 — to defer issuance of a patent.

§ 1.666(b) — for access to interference settlement agreement.

§ 3.81 — for patent to issue to assignee, assignment submitted after payment of the issue fee.

4. Section 1.32 is removed and reserved.

1.32 [Reserved]

5. Section 1.46 is revised to read as follows:

§ 1.46 Assigned inventions and patents.

In case the whole or a part interest in the invention or in the patent to be issued is assigned, the application must still be made or authorized to be made, and an oath or declaration signed, by the inventor or one of the persons mentioned in §§ 1.42, 1.43, or 1.47. However, the patent may be issued to the assignee or jointly to the inventor and the assignee as provided in § 3.81.

6. Section 1.104 is amended by revising paragraph (e) to read as follows:

§ 1.104 Nature of examination; examiner's action.

(e) Co-pending applications will be considered by the examiner to be owned by, or subject to an obligation of assignment to, the same person if:

(1) the application files refer to assignments recorded in the Patent and Trademark Office in accordance with Part 3 of this chapter which convey the entire rights in the applications to the same person or organization; or

(2) copies of unrecorded assignments which convey the entire rights in the applications to the same person or organization are filed in each of the applications; or

(3) an affidavit or declaration by the common owner is filed which states that there is common ownership and states facts which explain why the affiant or declarant believes there is common ownership; or

(4) other evidence is submitted which establishes common ownership of the applications.

In circumstances where the common owner is a corporation or other organization, an affidavit or declaration may be signed by an official of the corporation or organization empowered to act on behalf of the corporation or organization.

7. The undesignated center head above § 1.331 is revised to read as follows:

Arbitration Awards

8. Sections 1.331 through 1.334 are removed and reserved.

§ 1.331-1.334 [Reserved]

Part 2—RULES OF PRACTICE IN TRADEMARK CASES

9. The authority citation for 37 CFR Part 2 continues to read as follows:

Authority: 15 U.S.C. 1123; 35 U.S.C. 6, unless otherwise noted.

10. The undesignated center head § 2.185 is removed.

11. Sections 2.185 through 2.187 are removed and reserved.

§ 2.185-2.187 [Reserved]

12. Part 3 is added to read as follows:

Part 3—ASSIGNMENT, RECORDING AND RIGHTS OF ASSIGNEE

Sec.

Authority: 15 U.S.C. 1123; 35 U.S.C. 6.

§ 3.1 Definitions.

For purposes of this part, the following definitions shall apply:

Application means a national application for patent, an international application that designates the United States of America, or an application to register a trademark unless otherwise indicated.

Assignment means a transfer by a party of all or part of its right, title and interest in a patent or patent application, or a transfer of its entire right, title and interest in a registered mark or a mark for which an application to register has been filed.

Document means a document which a party requests to be recorded in the Office pursuant to § 3.11 and which affects some interest in an application, patent, or registration.

Office means the Patent and Trademark Office.

Recorded document means a document which has been recorded in the Office pursuant to § 3.11.

Registration means a trademark registration issued by the Office.

DOCUMENTS ELIGIBLE FOR RECORDING**§ 3.11 Documents which will be recorded.**

Assignments of applications, patents, and registrations, accompanied by completed cover sheets as specified in §§ 3.28 and 3.31, will be recorded in the Office. Other documents, accompanied by completed cover sheets as specified in §§ 3.28 and 3.31, affecting title to applications, patents, or registrations, will be recorded as provided in this Part or at the discretion of the Commissioner.

§ 3.16 Assignability of trademark prior to filing of use statement.

No application to register a mark under 15 U.S.C. 1051(b) is assignable prior to the filing of the verified statement of use under 15 U.S.C. 1051(d) except to a successor to the business of the applicant, or portion thereof, to which the mark pertains, if that business is ongoing and existing.

REQUIREMENTS FOR RECORDING**§ 3.21 Identification of patents and patent applications.**

An assignment relating to a patent must identify the patent by the patent number. An assignment relating to a national patent application must identify the national patent application by the application number (consisting of the series code and the serial number, e.g., 07/123,456) or the serial number and filing date. An assignment relating to an international patent application which designates the United States of America must identify the international application by the international application number (e.g., PCT/US90/01234). If an assignment is executed concurrently with, or subsequent to, the execution of the patent application, but before the patent application is filed, it must

identify the patent application by its date of execution, name of each inventor, and title of the invention so that there can be no mistake as to the patent application intended.

§ 3.24 Formal requirements for documents and cover sheets.

The document and cover sheet must be legible. Either the original document or a true copy of the original document, may be submitted for recording. Only one side of each page shall be used. The paper used should be flexible, strong, white, non-shiny, durable, and preferably no larger than 21.6 x 33.1 cm. (8 1/4 x 14 inches) with a 2.5 cm. (one-inch) margin on all sides.

§ 3.26 English language requirement.

The Office will accept and record non-English language documents only if accompanied by a verified English translation signed by the individual making the translation.

§ 3.27 Mailing address for submitting documents to be recorded.

Documents and cover sheets to be recorded should be addressed to the Commissioner of Patents and Trademarks, Box Assignments, Washington, D.C. 20231, unless they are filed together with new applications or with a petition under § 3.81(b).

§ 3.28 Requests for recording.

Each document submitted to the Office for recording must be accompanied by at least one cover sheet as specified in § 3.31 referring either to those patent applications and patents, or to those trademark applications and registrations, against which the document is to be recorded. If a document to be recorded includes interests in, or transactions involving, both patents and trademarks, separate patent and trademark cover sheets must be submitted. Only one set of documents and cover sheets to be recorded should be filed. If a document to be recorded is not accompanied by a completed cover sheet, the document and any incomplete cover sheet will be returned pursuant to § 3.51 for proper completion of a cover sheet and resubmission of the document and a completed cover sheet.

COVER SHEET REQUIREMENTS**§ 3.31 Cover sheet content.**

(a) Each patent or trademark cover sheet required by § 3.28 must contain:

- (1) the name of the party conveying the interest;
- (2) the name and address of the party receiving the interest;
- (3) a description of the interest conveyed or transaction to be recorded;
- (4) each application number, patent number or registration number against which the document is to be recorded, or an indication that the document is filed together with a patent application;
- (5) the name and address of the party to whom correspondence concerning the request to record the document should be mailed;
- (6) the number of applications, patents or registrations identified in the cover sheet and the total fee;
- (7) the date the document was executed;
- (8) an indication that the assignee of a trademark application or registration who is not domiciled in the United States has designated a domestic representative (see § 3.61); and
- (9) a statement by the party submitting the document that to the best of the person's knowledge and belief, the information contained on the cover sheet is true and correct and any copy submitted is a true copy of the original document; and
- (10) the signature of the party submitting the document.

(b) A cover sheet may not refer to both patents and trademarks.

(32)

§ 3.34 Correction of cover sheet errors.

(a) An error in a cover sheet recorded pursuant to 3.11 will be corrected only if:

- (1) the error is apparent when the cover sheet is compared with the recorded document to which it pertains and
- (2) a corrected cover sheet is filed for recordation.

(b) The corrected cover sheet must be accompanied by the originally recorded document or a copy of the originally recorded document and by the recording fee as set forth in § 3.41.

FEES**§ 3.41 Recording fees.**

All requests to record documents must be accompanied by the appropriate fee. A fee is required for each application, patent and registration against which the document is recorded as identified in the cover sheet. The recording fee is set in § 1.21(h) of this Chapter for patents and in § 2.6(q) of this Chapter for trademarks.

DATE AND EFFECT OF RECORDING**§ 3.51 Recording date.**

The date of recording of a document is the date the document meeting the requirements for recording set forth in this Part is filed in the Office. A document which does not comply with the identification requirements of § 3.21 will not be recorded. Documents not meeting the other requirements for recording, for example, a document submitted without a completed cover sheet or without the required fee, will be returned for correction to the sender where a correspondence address is available. The returned papers, stamped with the original date of receipt by the Office, will be accompanied by a letter which will indicate that if the returned papers are corrected and resubmitted to the Office within the time specified in the letter, the Office will consider the original date of filing of the papers as the date of recording of the document. The certification procedure under either § 1.8 or § 1.10 of this Chapter may be used for resubmissions of returned papers to have the benefit of the date of deposit in the United States Postal Service. If the returned papers are not corrected and resubmitted within the specified period, the date of filing of the corrected papers will be considered to be the date of recording of the document. The specified period to resubmit the returned papers will not be extended.

§ 3.54 Effect of recording.

The recording of a document pursuant to § 3.11 is not a determination by the Office of the validity of the document or the effect that document has on the title to an application, a patent, or a registration. When necessary, the Office will determine what effect a document has, including whether a party has the authority to take an action in a matter pending before the Office.

§ 3.56 Conditional assignments.

Assignments which are made conditional on the performance of certain acts or events, such as the payment of money or other condition subsequent, if recorded in the Office, are regarded as absolute assignments for Office purposes until cancelled with the written consent of all parties or by the decree of a court of competent jurisdiction. The Office does not determine whether such conditions have been fulfilled.

DOMESTIC REPRESENTATIVE**§ 3.61 Domestic representative.**

If the assignee of a trademark application or registration is not domiciled in the United States, the assignee must designate, in writing to the Office, a domestic representative. An assignee of a patent application or patent may designate a domestic representative if the assignee is not residing in the United States. The designation shall state the name and address of a person residing within the United States on whom may be served process or

notice of proceedings affecting the application, patent or registration or rights thereunder.

PROSECUTION BY ASSIGNEE**§ 3.71 Prosecution by assignee.**

The assignee of record of the entire right, title and interest in an application for patent is entitled to conduct the prosecution of the patent application to the exclusion of the named inventor or previous assignee. The assignee of a registered trademark or a trademark for which an application to register has been filed is entitled to conduct the prosecution of the trademark application or registration to the exclusion of the original applicant or previous assignee.

§ 3.73 Establishing right of assignee to prosecute.

(a) The inventor is presumed to be the owner of a patent application, and any patent that may issue therefrom, unless there is an assignment. The original applicant is presumed to be the owner of a trademark application unless there is an assignment.

(b) When the assignee of the entire right, title and interest seeks to take action in a matter before the Office with respect to a patent application, trademark application, patent, registration, or reexamination proceeding, the assignee must establish its ownership of the property to the satisfaction of the Commissioner. Ownership is established by submitting to the Office documentary evidence of a chain of title from the original owner to the assignee or by specifying (e.g. reel and frame number, etc.) where such evidence is recorded in the Office. Documents submitted to establish ownership may be required to be recorded as a condition to permitting the assignee to take action in a matter pending before the Office. In addition, the assignee of a patent application or patent must submit a statement specifying that the evidentiary documents have been reviewed and certifying that, to the best of assignee's knowledge and belief, title is in the assignee seeking to take the action.

ISSUANCE TO ASSIGNEE**§ 3.81 Issue of patent to assignee.**

(a) For a patent application, if an assignment of the entire right, title, and interest is recorded before the issue fee is paid, the patent may issue in the name of the assignee. If the assignee holds an undivided part interest, the patent may issue jointly to the inventor and the assignee. At the time the issue fee is paid, the name of the assignee must be provided if the patent is to issue solely or jointly to that assignee.

(b) If the assignment is submitted for recording after the date of payment of the issue fee, but prior to issuance of the patent, the assignee may petition that the patent issue to the assignee. Any such petition must be accompanied by the fee set forth in § 1.17(i)(1) of this Chapter.

§ 3.85 Issue of registration to assignee.

The certificate of registration may be issued to the assignee of the applicant, or in a new name of the applicant, provided that the party files a written request in the trademark application by the time the application is being prepared for issuance of the certificate of registration, and the appropriate document is recorded in the Office. If the assignment or name change document has not been recorded in the Office, then the written request must state that the document has been filed for recordation. The address of the assignee must be made of record in the application file.

(33) **DEPARTMENT OF COMMERCE**
Patent and Trademark Office
37 CFR Parts 1, 2 & 3

[Docket No. 910246-2140]
 RIN 0651-AA43

Changes in Patent and Trademark Assignment Practice

Agency: Patent and Trademark Office, Commerce

Action: Final Rule; correction.

Summary: The Patent and Trademark Office (Office) amended the rules of practice regarding assignments in patent and trademark cases to improve and clarify the rules, to codify changes in practice and to consolidate the rules into a new Part 3 directed to assignments. In the final assignment rules a fee change promulgated in January 1992 was inadvertently omitted from the §1.17(i)(1) listing.

Effective Date: September 4, 1992.

For Further Information Contact: Jeffery V. Nase by telephone at (703) 305-9282 or by mail marked to his attention and addressed to Commissioner of Patents and Trademarks, Box DAC, Washington, D.C. 20231.

Supplementary Information: The amended assignment rules first appeared in a notice of proposed rulemaking published in the *Federal Register* on May 10, 1991, at 56 FR 21641, and the Patent and Trademark Office *Official Gazette* of June 4, 1991, at 1127 OG 8-16. The final rules appeared in the *Federal Register* on July 6, 1992, at 57 FR 29634. Between the time the proposed and final rules were published, 37 CFR §1.97(d) was amended, effective March 16, 1992, by a final rule which appeared in the *Federal Register* of January 17, 1992, 57 FR 2021, relating to the duty of disclosure. The amendment provided for a new petition fee which was referenced in 37 CFR § 1.17, patent application processing fees. The reproduction of §1.17 in the final assignment rule package neglected to add the reference to the new petition under § 1.97(d).

Section 1.17(i)(1) is reproduced in its entirety to include the reference to §1.97(d) which was inadvertently omitted. The amount of the fee for considering an information disclosure statement is not affected by this rule change.

List of Subjects

37 CFR Part 1

Administrative practice and procedure, Courts, Freedom of information, Inventions and patents.

For the reasons set out in the preamble and pursuant to the authority contained in 35 U.S.C. 6, part 1 of title 37 of the Code of Federal Regulations has been amended as set forth below.

PART 1 - RULES OF PRACTICE IN PATENT CASES

1. The authority citation for 37 CFR Part 1 would continue to read as follows:

Authority: 35 U.S.C. 6, unless otherwise noted.

2. Section 1.17 is amended by revising paragraph (i)(1) to read as follows:

§1.17 Patent application processing fees.

(i)(1) For filing a petition to the Commissioner under a section of this part listed below which refers to this paragraph \$130.00

§1.12 - for access to an assignment record.

§1.14 - for access to an application.

§1.53 - to accord a filing date.

§1.55 - for entry of late priority papers.

§1.60 - to accord a filing date.

§1.62 - to accord a filing date.

§1.97(d) - to consider an information disclosure statement.

§1.103 - to suspend action in application.

§1.177 - for divisional reissues to issue separately.

§1.312 - for amendment after payment of issue fee.

§1.313 - to withdraw an application from issue.

§1.314 - to defer issuance of a patent.

§1.666(b) - for access to interference settlement agreement.

§3.81 - for patent to issue to assignee, assignment submitted after payment of the issue fee.

July 17, 1992

DOUGLAS B. COMER

 Commissioner of Patents
 and Trademarks*

[1141 OG 38]

(34) **Submission of Uniform Assignee Names
 on the Issue Fee Payment Form PTOL-85b**

The Patent and Trademark Office is experiencing problems when computer-sorting assignee names for the Patentee Index because of the non-uniform use of the names of certain companies and corporations on the issue fee payment form PTOL-85b. The use of different spellings or nomenclature for the same company requires the Office to expend time and effort to determine whether the various name forms are in fact for the same company. If such inconsistencies are not corrected, patents to the same company will appear in different locations in the Patentee Index. An example of inconsistent use is "ABC Company, Ltd." and "ABC Co., Limited."

Therefore, persons who list assignee names on issue fee payment form PTOL-85b should ensure that the same company name form is used for all patents issuing to a particular company.

RICHARD J. SHAKMAN,
*Assistant Commissioner
 for Administration.*

Nov. 17, 1977.

[965 O.G. 8]

(35) **Recordability of Foreclosures
 for Assignment Purposes**

It has been the practice of the Assignment Branch to record security agreements between a secured party and a debtor which refer specifically to a patent or a patent application and which are signed by the debtor. However, foreclosures by the secured party were not recorded because they were not signed by the debtor. Accordingly, before recording a foreclosure not signed by a debtor, the Assignment Branch required a Court order. This requirement forced the secured party to bring action in a court of law where otherwise Court action might not have been necessary.

To facilitate recording of foreclosures not signed by a debtor and avoid unnecessary court proceedings, the Office will record foreclosures which comply with all of the following criteria:

- (1) Submission of the foreclosure document with original endorsement by the secured party, or a verified copy thereof;
- (2) Identification of the patent by patent number or the patent application by serial number, or other acceptable identifier(s) as specified in 37 CFR 1.331(c), in the body of the foreclosure document itself or any addenda incorporated by reference;
- (3) Reference to the security agreement recorded under 37 CFR 1.331; and
- (4) Submission of a verified statement by a representative of the secured party stating that the patent or the patent

(36)

application has been legally foreclosed on based upon the applicable state laws.

A foreclosure document complying with the above criteria will be deemed to be a recordable instrument in accordance with 37 CFR 1.331.

March 14, 1988.

THERESA A. BRELSFORD,
*Assistant Commissioner
for Administration.*

[1089 OG 35]

(36) Transfer of Pre-1955/1957 Assignment Records to National Archives and Records Administration

The Patent and Trademark Office (PTO) is transferring all of the pre-1955/1957 assignment records under its jurisdiction to the National Archives and Records Administration. These records will be transferred as soon as possible. Notice of the actual date of the transfer will be placed in all PTO public search facilities.

The records will be transferred to the National Archives to allow for greater accessibility to the public, improvement of file integrity for these records, and to ensure preservation of these materials. The pre-1955/1957 records are currently stored in four locations: The Assignment Search Room, the Federal Records Center, the National Archives in downtown Washington, and the National Archives location in Alexandria. Storage of information in these various locations makes searching of these materials difficult. The materials located at the Federal Records Center can be ordered from the Assignment Search Room. However, many times it takes months to receive the materials to complete a search.

The National Archives will store and maintain all patent and trademark assignment records dating from 1837 to December 31, 1954, for trademarks, and from 1837 to April 30, 1957, for patents. These records will be stored at the Washington National Records Center in Suitland, Maryland, and will be available for public inspection in the National Archives research room located at the Washington National Records Center. The research room is open to the public Monday through Friday 8:00 a.m. to 4:15 p.m. and by appointment on Saturday. The Washington National Records Center has adequate parking in addition to a shuttle bus service which leaves from the National Archives on Pennsylvania Avenue five times a day. Self-service photocopies are available for use at ten cents a page. National Archives staff will provide photocopies for a fee of thirty-five cents a page. For more information concerning the operation of the National Archives search facilities in Suitland, call the Suitland Reference Branch at (301)763-7410.

37 CFR 1.12(a) will be waived to the extent fees for copies of records for pre-1955/1957 assignments records will not be established by the PTO. Copies of the pre-1955/1957 assignment records may be obtained upon request and payment of fees required by the National Archives and Records Administration.

HARRY F. MANBECK, JR.
*Assistant Secretary
and Commissioner
of Patents and Trademarks*

[1114 O.G. 17]

(37) Title of Invention Carried on Office Records

The Patent and Trademark Office is experiencing an increased incidence in the number of newly filed applications in which the title of the invention is inconsistent within the papers. This has resulted in applicants requesting correction of the official filing receipt in many instances to indicate the title preferred by applicants.

Hereafter, whenever the title of the invention appears inconsistent within the papers of a newly filed application for patent, the records of the Office will carry the title as indicated on the first page of the specification and no corrected filing receipt will be issued to indicate another title. Note that 37 CFR 1.72(a)

indicates that the title of the invention should appear as a heading on the first page of the specification.

It should also be noted that applicant may amend the title under 37 CFR 1.115 if any changes are subsequently desired before issuance of a patent.

Aug. 31, 1977.

BRADFORD R. HUTHER,
*Acting Assistant Commissioner
for Administration.*

[962 O.G. 23]

(38) Notice to Patent Owners and Parties Responsible for Paying Maintenance Fees Concerning Fee Address and Payor Number

37 CFR 1.363, effective Nov. 1, 1984, provides for a "fee address" to be entered in the Office patent file records for use in all correspondence relating to maintenance fees. The "fee address" is in addition to the "correspondence address" under 37 CFR 1.33 which will continue to be used for all reexamination and interference purposes. If no separate "fee address" is specified, the "correspondence address" will also be used for maintenance fee correspondence.

In order to simplify changes in address by patent owners having several patents, and data input by the Patent and Trademark Office, a "payor number" will be assigned to each "fee address" when a "fee address" is presented to the Office in a patent or request. A request for a "payor number" before a maintenance fee is paid or due will permit a patent owner to request that the "fee address" or "payor number" be recorded in the Office records of the patents owned on which maintenance fees are due so that all notices relating to maintenance fees will be sent to the "fee address".

The Patent and Trademark Office has established a procedure for assigning a "payor number" upon request by a patent owner or a party responsible for paying maintenance fees. Such a party may be, for example, the finance office of a corporation or of a separate organization specializing in maintenance fee payments. Under the procedure, a patent owner or other party may request a "payor number" for a particular "fee address" by writing to: Commissioner of Patents and Trademarks, Box M. Fee, Washington, D.C. 20231. Each request for a "payor number" should include:

- the "fee address" to be used by the Office, and
- the telephone number of the fee addressee to be used to resolve problems.

After receipt of a "payor number", it may be used to indicate to the Patent and Trademark Office the "fee address" to be used in particular patents on which maintenance fees will become due and in applications in which issue fees have been or are being paid. Any request for entry of a "payor number" or "fee address" in the Office records of a patent, however, must be signed by the patent owner or his or her attorney or agent of record.

After a "payor number" has been assigned, it should be used in all future maintenance fee payments and related correspondence. However, where a "payor number" has not been previously entered in the Office records for a patent, the mere indication of a "payor number" at the time of payment of the maintenance fee, without the signature of the patent owner or the owner's attorney or agent of record, will not serve to make the "payor number" of record in the Office for that patent.

Oct. 19, 1984.

THERESA A. BRELSFORD,
*Assistant Commissioner
for Administration.*

[1048 O.G. 48]

(39) Policy Regarding Storage, Retention and Availability of the Foreign Patent Documents in the Numeric Collection of the Patent & Trademark Office*

The U.S. Patent and Trademark Office (PTO) maintains the largest collection of foreign patent documents in the United

States. This collection is a major technical information resource that supports the patent examination function as well as the PTO's mission of disseminating technical information. The collection is divided into two parts: the classified collection which is distributed among the examiners' search files, and the numeric collection which is maintained by the PTO's Scientific Library. A large portion of the numeric collection is in paper form, but it also includes considerable microfilm with some overlap between the two forms. Some of the documents are republished versions of earlier publications (e.g., unexamined and examined applications). One of the PTO's objectives has been to reduce the bulky paper foreign patent files in the numeric collection by replacing them, where possible, with good quality microfilm and by eliminating duplicates. A number of other considerations bear on the management of this collection. Because of the importance of the collection, the PTO has established a policy intended to ensure the effective storage, retention, and availability of the foreign patent documents in its numeric collection. The purpose of this notice is to inform the public of this policy which is set forth below.

The public is invited to consider and submit comments on the policy. Please address comments to:

William S. Lawson
Administrator for Documentation
U.S. Patent and Trademark Office
Washington, D.C. 20231

General Policy

The U.S. Patent and Trademark Office (1) is the National repository for all foreign patent documents, except design patents; (2) will maintain, in numerically retrievable collections, as many as possible of these documents for which there is or may be a reasonable level of need, and (3) will make these documents conveniently accessible to the PTO and to the public.

Implementation

1. The Scientific Library is responsible for policy implementation.
2. At least all post-1920 foreign patent documents needed to meet "Minimum Documentation" requirements of the Patent Cooperation Treaty will be housed in the Scientific Library in either paper or microfilm form.
3. All paper copies of foreign patent documents not needed to meet "Minimum Documentation" requirements will be housed either in the Scientific Library or other storage space in accordance with usage activity. The documents with greater activity will be housed in the Scientific Library until space therein is exhausted and the remaining documents will be housed in the other storage space.
4. All foreign journals (official gazettes) will be housed in the Scientific Library.
5. All paper copies of foreign patent documents needed for copy request fulfillment will be stored in a form accessible for prompt retrieval.
6. Whenever feasible, paper copies of foreign patent documents will be replaced by good quality microfilm.
7. 16mm roll microfilm will be the microform preferred for PTO use and archival storage. If 16mm microfilm is not available or is unacceptable, the Library may decide, on a case-by-case basis, whether a different microform should be obtained.
8. All microfilm of foreign patent documents intended for use by the PTO and the public will be housed in the Scientific Library. All archival microfilm will be housed in a facility that is suitable for the preservation and protection of the microfilm and for needed access.
9. Paper copies of foreign patent documents will be disposed of if good quality microfilm of the corresponding documents is available in the Library, good quality archival microfilm is available in the PTO, and the PTO has the legal rights to sell paper copies made from the microfilm and to reproduce the microfilm for internal use; paper copies for which there is little or no demand may be disposed of despite the availability of only marginal-quality microfilm. Paper copies for which good quality microfilm is available in the Library, but for which the other conditions noted above are not met, will be retained, although they need not be stored in a form accessible for prompt

retrieval. However, such documents will be stored in accordance with a procedure designed to ensure preservation of the documents, adequate records of stored material and efficient utilization of space.

10. Where an application has been republished, a decision will be made on a "country-by-country" basis as to whether the duplicate version or versions of the initial document will be retained. The basis for this decision will be the current or anticipated utility of the duplicate documents to the PTO and the public.

11. Collections of paper copies that are not needed by the PTO will be disposed of promptly. Such collections will first be offered, for a limited time, to developing countries through the World Intellectual Property Organization. Collections which cannot be disposed of in this manner may then be disposed of, preferably by offering them for sale, as part of some exchange, or as gifts. However, if unneeded paper copy collections cannot be disposed of in a beneficial manner within a reasonable period of time, they will be discarded.

12. Requests for copies of foreign patent documents from within the PTO and from the public will be fulfilled promptly.

13. Fees to the public for copies of foreign patent documents will be set at a level commensurate with full cost recovery and with the provision of prompt, efficient copy service.

14. As the complete text of foreign patent documents is captured in electronic form and becomes retrievable, numerically and otherwise, to the PTO and to the public, in the automated patent system, paper copies will be disposed of and the retention of microfilm reconsidered.

15. It is recognized that this policy does not provide for all possible circumstances regarding the foreign patent document collection and there may be limited instances where some deviation from the policy is justified. In such cases, the deviation will be justified in writing by the Program Manager of the Scientific Library and approved by the Administrator for Documentation and the Assistant Commissioner for Patents.

WILLIAM S. LAWSON,
Administrator for
Documentation.

Nov. 26, 1984.

[1052 OG 3]

The PTO also maintains a very large, technologically classified collection of foreign patent documents. This policy *does not* apply to the classified collection.

Fees and Payment of Money

(40) Department of Commerce
Patent and Trademark Office
37 CFR Parts 1 and 2
Revision of Patent and Trademark Fees

Agency: Patent and Trademark Office, Commerce

Action: Final Rule.

Summary: The Patent and Trademark Office is amending the rules of practice in patent and trademark cases to establish fee related procedures and fees in amounts which would comply with the requirements of either Public Law 96-517 or H.R. 6260, dependent upon which is effective on Oct. 1, 1982. This action is necessary at this time in view of the requirements to establish fees and procedures contained in Public Law 96-517 and the requirements which would also be present under H.R. 6260 enacted as a Public Law. This final rule is being issued in two sections with the first section relating to patent fees and the second section relating to trademark fees. This final rule is also being issued in alternative form so that the proper fees and procedures will become effective on Oct. 1, 1982, under either Public Law 96-517 or the Public Law which results from enactment of H.R. 6260. Thus, if Public Law 96-517 remains fully effective on Oct. 1, 1982, the rule changes contained herein which are common to Public Law 96-517 and H.R. 6260, as well as those specific to Public Law 96-517, contained in Alternative A of each section, will become effective. Upon

(40)

enactment of H.R. 6260 as a Public Law prior to Oct. 1, 1982, the rule changes contained herein which are common to Public Law 96-517 and H.R. 6260, as well as those specific to H.R. 6260, contained in Alternative B of each section, will become effective. Thus, the intended effect of this action is to adopt rules which will be effective on Oct. 1, 1982, establishing patent and trademark fees and procedures regardless of whether Public Law 96-517 remains fully effective or whether H.R. 6260 has been enacted.

Effective Date: Oct. 1, 1982. However, prior to Oct. 1, 1982, the Department of Commerce will publish a document confirming the amendments under either Alternative A or Alternative B set forth herein depending upon enactment of H.R. 6260 as a Public Law.

For Further Information Contact: As to the patent rules contact R. Franklin Burnett by telephone at (703) 557-3054 or by mail addressed to the Commissioner of Patents and Trademarks, Attention: R. Franklin Burnett, Rm. 3-11A13, Washington, D.C. 20231.

For Further Information Contact: As to the trademark rules contact Miss Maude Williams by telephone at (703) 557-2222 or by mail addressed to the Commissioner of Patents and Trademarks, Attention: Miss Maude Williams, Rm. 3-11C17, Washington, D.C. 20231.

Supplementary Information:

Section I—Revision of Patent Fees

Background

A notice of proposed rulemaking was published in the *Federal Register* on June 28, 1982, at 47 FR 28042-28063 and in the *Official Gazette* on June 29, 1982, at 1019 O.G. 57-120. An oral hearing was held on July 9, 1982. Fourteen written letters and statements were submitted. Five persons testified at the oral hearing. Full consideration has been given to all of the letters, statements, and testimony.

Objectives of Rule Changes

These rule changes are designed primarily to implement the Patent and Trademark Office fees which are provided for by Public Law 96-517, or which would be set in, or provided for by, the Public Law resulting from H.R. 6260.

Public Law 96-517

Public Law 96-517 presently requires that fees be established by the Commissioner for the processing of patent applications from filing through issuance or abandonment, for maintaining a patent in force, and for providing all other services and materials related to patents. Public Law 96-517 requires that by Oct. 1, 1982, fees for the processing of patent applications, other than design patents, be set by the Commissioner to recover in aggregate 25 per centum of the estimated average cost to the Office of such processing. Similarly, fees for processing design patents are to be set to recover in aggregate 50 per centum of the estimated average cost to the Office of such processing. By Oct. 1, 1982, fees for all other services or materials related to patents are to be set to recover the estimated average cost to the Office of performing the service or furnishing the material.

Public Law 96-517 also requires that fees be set for maintaining all patents filed on or after Dec. 12, 1980, other than design patents, in force. It also requires that maintenance fees must recover 25 per centum of the estimated cost to the Office of processing patent applications, other than design patent applications, by the fifteenth fiscal year following Dec. 12, 1980. Under Public Law 96-517, the maintenance fees are due 3 1/2, 7 1/2, and 11 1/2 years after grant of the patent.

Public Law 96-517 is presently effective and this rule change is designed to implement the fee provisions of that law if it remains fully effective on Oct. 1, 1982. The changes which will become effective on Oct. 1, 1982, under Public Law 96-517 (without enactment of H.R. 6260) are (1) the rule changes common to Public Law 96-517 and H.R. 6260, and (2) the rule changes under only Public Law 96-517, which appear in Alternative A.

H.R. 6260

On June 8, 1982, the House of Representatives passed H.R. 6260. H.R. 6260 would establish a number of statutory fees which the Commissioner is required to charge. Among the more significant of these are fees for filing a patent application, issuing, and maintaining a patent in force. The fees for filing a patent application and issuing a patent would be set forth in § 41(a) of Title 35, United States Code, as proposed to be amended by H.R. 6260. Certain other fees, such as appeal fees, the fee for filing a disclaimer, and fees for filing petitions seeking to revive an abandoned application and for extensions of time, would also be set in § 41(a) of Title 35, United States Code. Section 41(b) of Title 35, United States Code, as proposed to be amended by H.R. 6260, would set forth the fees for maintaining a patent in force. These fees would be due 3 1/2, 7 1/2, and 11 1/2 years after grant of the patent or within a grace period of six months thereafter. Section 41(c) of Title 35, United States Code, as proposed to be amended by H.R. 6260, would provide for the acceptance of maintenance fees after the statutory grace period under certain conditions and with certain effects.

H.R. 6260 would also provide for the reduction by 50 per centum in the fees paid under § 41(a) and (b) of Title 35, United States Code, by independent inventors, small business concerns, and nonprofit organizations, who meet the definitions established, and to be established therefor.

Section 41(d) of Title 35, United States Code, as proposed to be amended by H.R. 6260, would also provide that the Commissioner establish fees for all other processing, services, or materials related to patents which are not covered in § 41(a)-(c) of Title 35, United States Code, to recover the estimated average cost to the Office of the processing, services, or materials.

The changes which will become effective on Oct. 1, 1982, upon enactment of H.R. 6260 as a Public Law prior to Oct. 1, 1982, are (1) the rule changes common to Public Law 96-517 and H.R. 6260, and (2) the rule changes under H.R. 6260, which appear in Alternative B. H.R. 6260 includes other provisions which would be the subject of other proposals for rulemaking.

Discussion of Significant Changes

This rulemaking places into the appropriate sections of Title 37, Code of Federal Regulations, the various fees which are due on filing, during the pendency of a patent application, or during the term of a patent. A number of significant changes are made in order to implement either Public Law 96-517 or H.R. 6260.

Under H.R. 6260, and Alternative B of this rule making, fees under § 41(a) and (b) of Title 35, United States Code, would be reduced by 50 per centum for independent inventors, small business concerns, and nonprofit organizations. H.R. 6260 would give the Commissioner authority to establish regulations defining independent inventors and nonprofit organizations. H.R. 6260 defines small business concerns by reference to § 3 of the Small Business Act and regulations established by the Small Business Administration. This rulemaking, in Alternative B, implements the fee system which would be established by H.R. 6260 and lists all applicable fees.

* * * * *

Another significant change relates to fees established under Public Law 96-517 and which would be established by H.R. 6260 for petitions for extensions of time to take actions required by the Commissioner in an application. H.R. 6260 would establish a fee of \$50 for filing a petition for a first one-month extension of time, an additional fee of \$100 for filing a petition for a second one-month extension of time which would expire two months after the end of the time period set for taking action, and an additional fee of \$200 for filing a petition for a third one-month extension of time which would expire three months after the end of the time period set for taking action. A fourth one-month extension with an additional fee of \$200 could be requested if additional time was available under the statute. Under H.R. 6260, the Commissioner would have authority to issue regulations providing when, within any maximum time period permitted by statute, petitions for extensions of time, and the required fee therefor, may be filed. The Commissioner would

also not be precluded by H.R. 6260 from waiving the fee for filing a petition for an extension of time where the Office extends the period due to equity considerations or sufficient cause. This rulemaking implements the extension of time provisions of H.R. 6260 by permitting applicants in the majority of situations to file the petition for an extension of time and the fee at the time of and along with the filing of the response for which a non-statutory or shortened statutory time period has been set. This will reduce the amount of paperwork involved and should significantly reduce the expenses of applicants and the Office since resources now devoted to the separate processing of petitions for extensions of time will no longer be required to be expended thereon. The fees are set to provide a proper control on the number of extensions of time given. The same procedures relating to extensions of time which would be established under Alternative B and H.R. 6260 will also be established under Alternative A and Public Law 96-517. Thus, whether the rules are effective on Oct. 1, 1982, under Public Law 96-517 and Alternative A, or under H.R. 6260 and Alternative B, the same procedures for obtaining extensions of time will be in effect with the only differences being in the amount of the fees.

Another significant change relates to the implementation of the fee for revival of an unintentionally abandoned application which would be authorized under H.R. 6260. H.R. 6260 would establish two different fees for filing petitions with different standards to revive abandoned patent applications. The same two fees would be applicable to petitions to accept the delayed payment of the fee for issuing a patent. Under H.R. 6260, a fee of \$50 is established in § 1.17(1) for filing a petition for revival under §§ 133 or 151 of Title 35, United States Code, in accordance with standards presently in effect where the delay resulting in the abandonment, or the delay in payment of the issue fee, was unavoidable. Under H.R. 6260, a fee of \$500 is established in § 1.17(m) for filing each petition for revival, or for acceptance of the delayed payment of an issue fee, where the abandonment or the failure to pay the issue fee was unintentional. A mere statement that abandonment was unintentional plus the \$500 fee is all that is required in this case for this purpose. Under H.R. 6260 and this rulemaking an applicant would have a choice of which petition and fee to file seeking revival depending on the circumstances involved. The changes discussed in this paragraph cannot be made effective without enactment of H.R. 6260 as a Public Law.

The rulemaking also provides for fees for filing certain petitions which have, in some cases, heretofore, been decided without a charge. These fees are established under Public Law 96-517 and are provided for by the amendment of § 41(d) of Title 35, United States Code, which would be introduced by H.R. 6260. Under § 41 of Title 35, United States Code, as amended by Public Law 96-517 or as it would be amended by H.R. 6260, fees are authorized for the processing of various petitions desiring certain actions to be taken regarding patent applications, for the recording of assignments, for reexamination of patents, and for the processing of international applications under the Patent Cooperation Treaty. In general, fees are not being required for those petitions which are supervisory in nature. For example, where applicants are petitioning from an allegedly improper action of the examiner, it is felt that such petitions should be processed and decided without charge since they are not asking for any special privilege but are attempting to correct an allegedly incorrect Office holding. The changes discussed in this paragraph will be in effect on Oct. 1, 1982, whether the rules become effective under Public Law 96-517 and Alternative A, or under H.R. 6260 and Alternative B.

Many of the fees currently set forth in § 1.21 are being increased to reflect the cost of currently performing that service.

Discussions of Specific Sections Changed

The sections changed are grouped in this proposal under three different categories. Those changes which are common to Public Law 96-517 and H.R. 6260 appear first and are numbered 1-54. Those changes which relate only to Public Law 96-517 appear as Alternative A and are numbered 55-62. Those changes which are dependent upon enactment of H.R. 6260 appear as Alternative B and are numbered 63-71. The changes common to Public Law 96-517 and H.R. 6260 will become effective on

Oct. 1, 1982, whether or not H.R. 6260 is enacted as a Public Law.

* * * * *

Upon enactment of H.R. 6260 as a Public Law prior to Oct. 1, 1982, Alternative B will become effective on Oct. 1, 1982, in which case Alternative A will not become effective.

Rule Changes Common To Public Law 96-517 and H.R. 6260

The following sections are changed, effective Oct. 1, 1982, under either Public Law 96-517 or H.R. 6260:

Section 1.11 is amended to change the reference for the reexamination request fee to § 1.20(c).

Section 1.12 is amended to break the section into four paragraphs. Paragraph (a) maintains current practice but adds specific reference to § 1.19(a)(5) which sets the cost of copies.

Paragraph (b) maintains current wording except for inserting "patent" after "abandoned" and changing "his" to "applicant's". Paragraph (c) includes new language relating to obtaining copies of assignment records not open to the public. Access can be obtained only with the applicant's permission or by petition with fee to the Commissioner for such access in particular situations. No change in the showing required by petition to obtain access is intended by this amendment. Paragraph (d) contains present language except for reference to the specific rule which sets forth the charge for time consumed in making assignment searches.

New paragraph (e) of § 1.14, sets forth the two ways in which access can be obtained to patent applications which are not open to the public. The two ways are (1) by petitioning and paying the petition fee and approval of the Commissioner of such petition and (2) by obtaining written approval from the applicant.

New § 1.19 provides fees for copies of various documents supplied by the Office. The fees have been grouped into 5 paragraphs. New paragraph (a) provides fees for uncertified copies. Subparagraphs (a)(1) and (2) indicate the prices of printed patent copies. Sub-paragraph (a)(3) provides a single fee for a copy of an application, as filed, for each 50 pages, or fraction thereof. This practice should make it much easier to determine the amount of the required fee. Subparagraph (a)(4) sets a single fee for a copy of each 100 pages, or fraction thereof, of a patent file wrapper. Subparagraph (a)(5) provides for a charge of 30 cents per page for copies of Office records other than those covered by subparagraphs (a)(1) through (4). Subparagraph (a)(6) provides a fee for a microfiche copy of a microfiche.

Paragraph (b) of § 1.19 sets fees for certified copies of Office documents. Subparagraph (b)(1) sets a fee for certifying Office records. Subparagraph (b)(2) provides a single fee for searching assignment records, preparing an abstract of the title and certification thereof. Sub-paragraph (b)(3) provides a fee for comparing copies not prepared by the Office prior to certification in order to provide basis for certification. Paragraph 1.19(c) sets the fees for subscribing to all of the patents issued annually in particular subclasses. This charge is in addition to the normal copy charge under § 1.19(a)(1) and (2). Paragraph 1.19(d) sets the fee for providing patent copies to libraries under 35 U.S.C. 13. Paragraph 1.19(e) provides fees for lists of United States patents in particular subclasses.

Section 1.21 is amended to contain those miscellaneous fees which do not relate to the topics covered in §§ 1.16-1.20. All of the fees in § 1.21 are established under the authority given the Commissioner by 35 U.S.C. 41(d) as amended by Public Law 96-517 or as proposed in H.R. 6260. Paragraph 1.21(a) establishes fees for admission to the examination for registration to practice, registration, reinstatement and issuance of certificates of good standing of patent attorneys and agents. Sub-paragraph 1.21(b)(1) sets forth the fee for establishing and reinstating deposit accounts, while subparagraph 1.21(b)(2) sets forth the fee due when the balance at the end of each month is below \$40. Paragraph 1.21(c) sets the fee for filing a disclosure document. Paragraph 1.21(d) sets the fee for renting a delivery box. Paragraph 1.21(e) sets the fee for an international-type search report. Although all national applications now receive what is known as an international-type search, if a report thereof is desired in addition to an Office action, the fee set in § 1.21(e)

(40)

is required. Paragraph 1.21(f) sets a fee for searching Office records for purposes not otherwise specified. Paragraph 1.21(g) sets the fee for tokens for copying machines. Paragraph 1.21(h) sets the fee for recording assignments, agreements, and other documents. Paragraph 1.21(i) sets forth the fee for publishing a notice of availability of a patent for licensing or sale in the *Official Gazette*. Paragraph 1.21(j) sets the fee for the Office providing a duplicate or replacement of a permanent Office user pass. Paragraph 1.21(k) indicates that the Commissioner may specify charges for items and services not otherwise specified at a level to recover the actual cost of providing such an item or service by the Office.

Section 1.24 is revised so that the denomination of coupons sold by the Office will be in more convenient amounts.

Section 1.25 is amended to provide, in paragraph (a), a reference to the fee for establishing a deposit account and a service charge if the end of the month balance is below \$40.00. Paragraph (b) is amended by revising the present sentence to refer to post-issuance fees and by adding a second sentence which would specifically provide in the regulations for the possibility of an applicant giving a general authorization to charge any fee due under §§ 1.16-1.18 in a particular application to a deposit account during the entire pendency of the application.

This general authorization would not apply after the patent issues, e.g., to maintenance fees. The last sentence of paragraph (b) permits fees during reexamination to be charged to a deposit account by filing an authorization with the request for reexamination.

Section 1.26 is amended to provide in paragraph (a) that a withdrawal of a request for an oral hearing will not entitle appellant to a refund. Paragraph 1.26(a) raises the amount which will not be refunded without specific request from fifty cents to one dollar. Paragraph (b) relating to refunds of international search fees during subsequent examination of a national application is deleted since such refunds are now covered by reductions in the appropriate fees paid under § 1.445 rather than solely by direct refunds. Paragraph (c) is amended to bring the spelling of "requester" into conformance with that used in other sections of the regulations.

Section 1.45 is amended to provide in paragraphs (b) and (c) for a petition and petition fee to be filed to correct misjoinder of inventorship situations in pending applications. The fee will cover the additional time required by the Office to process such applications.

Section 1.47 is amended to provide for petitions and fees for filing applications signed by less than all inventors, or a person not the inventor.

Section 1.51 is amended to refer to the filing fees in new § 1.16 and to add a new paragraph (c) indicating that applicants may file authorizations to charge fees required under any of §§ 1.16-1.18 to deposit accounts.

Section 1.52 is amended to add a reference in paragraph (a) to new paragraph (d). New paragraph (d) provides in the rules for filing an application in a language other than English if a verified English translation and fee under § 1.17(k) are timely submitted.

Section 1.55 is amended in paragraph (b) to require a petition and fee for processing priority papers submitted after the issue fee is paid.

Section 1.75 is amended to add a reference to § 1.16 and a sentence referring to the fee for multiple dependent claims set forth in § 1.16(d).

Section 1.85 is amended to delete the sentence relating to mounting of informal drawings.

Section 1.86 is removed to delete the reference to the Office draftsman making drawings since such service is no longer available.

Section 1.102 is amended by revising paragraph (a) and adding new paragraphs (c) and (d). Revised paragraph (a) refers to paragraph (b) and added paragraphs (c) and (d). Paragraph (c) requires a petition but no fee where the basis for the petition to make special is the applicant's age or health or the impact of the invention on improving the environment or conservation of energy. Paragraph (d) requires a petition and the fee set forth in § 1.17(i) for petitions to make special on grounds other than those above.

Section 1.103 is amended in paragraph (a) to provide for filing a petition and the fee set forth in § 1.17(i) for a suspension

of action except that no fee would be required where the reason for the suspension is the fault of the Patent and Trademark Office. Paragraph (b) is amended to clearly indicate that suspensions are directed to actions by the Office and not responses by the applicant.

Section 1.104, paragraph (d) is amended to change the fee reference to correspond to § 1.21(e).

Section 1.134 is added to indicate that unless applicant is notified of any non-statutory or shortened statutory period in an Office action, a maximum period for response of six months is allowed.

Section 1.135 is amended to provide that if no response is filed within the time set in the Office action under § 1.134 or as it may be extended under § 1.136, the application will be abandoned unless an Office action indicates that another consequence, such as disclaimer, will take place. Paragraph (b) is amended to include a reference to paragraph (a). Paragraph (c) is amended to add that applicant's reply must be a bona fide attempt to respond as well as to advance the case to final action in order for applicant to be given an opportunity to supply any omission.

Section 1.136 is amended to revise the title and provide for two distinct procedures to extend the period for action or response in particular situations. The procedure which is available for use in a particular situation will depend upon the circumstances. Paragraph 1.136(a) permits an applicant to file a petition for extension of time and a fee as in § 1.17(a), (b), (c), or (d) up to four months after the end of the time period set to take action except (1) where prohibited by statute, (2) in interference proceedings, or (3) where applicant has been notified otherwise in an Office action. The petition and fee can be filed prior to or with the response. The filing of the petition and fee will extend the time period to take action up to four months dependent on the amount of the fee paid except in those circumstances noted above. Paragraph 1.136(a) will effectively reduce the amount of paperwork required by applicants and the Office since the extension will be effective upon filing of the petition and payment of the appropriate fee and without acknowledgment or action by the Office and since the petition and fee can be filed with the response. Paragraph (b) provides for requests for extensions of time upon a showing of sufficient cause when the procedure of paragraph (a) is not available. Although the petition and fee procedure of § 1.136(a) will normally be available within 4 months after a set period for response has expired, an extension request for cause under § 1.136(b) must be filed during the set period for response. The sentence in paragraph (b) relating to who may grant an extension under paragraph (b) is eliminated thereby providing additional flexibility to designate persons to act on requests under paragraph (b). Extensions of time in interference proceedings are governed by § 1.245.

Section 1.165, paragraph (b) is amended to delete therefrom the last sentence which refers to a fee for mounting copies. Since little or no need has been found for this provision in the rules, it is deleted.

Section 1.171, as amended, adds a reference to § 1.19(b)(2) which sets forth the fee for title reports.

Section 1.177 is amended to require a petition and fee as set forth in § 1.17(i) where it is desired that divisions of a reissue issue on different dates.

Section 1.181 is amended to indicate in paragraph (d) that if a petition to the Commissioner is filed under the provisions of a section which requires a petition fee and the required fee is not paid, the petition will be dismissed. The amendment to paragraph (g) deletes the reference to § 1.183.

Section 1.182 is amended to add a sentence requiring any petition filed under this section to be accompanied by the petition fee set forth in § 1.17(h).

Section 1.183 is amended to specifically refer to the inherent authority of the Commissioner to suspend or waive the rules at the Commissioner's initiative. The amendment also indicates the Commissioner's authority to designate others to act for the Commissioner in appropriate circumstances. The rule language also requires the payment of the petition fee set forth in § 1.17(h) if a petition to suspend or waive the rules is filed.

Section 1.191 is amended to change the fee reference for filing a notice of appeal to § 1.17(e) and delete the word "primary" since some actions which are subject to appeal are not made by a "primary" examiner.

Section 1.192, paragraph (a), is amended to refer to the fee for filing an appeal brief set forth in § 1.17(f). The present language requiring a showing of sufficient cause for extensions of time for filing the brief and an indication that an oral hearing is desired at the time of filing the brief are removed from paragraph 1.192(a). Under the amendment to paragraph 1.192(a), the provisions of § 1.136 will apply to extensions of time for filing the brief. The time for requesting an oral hearing is now set in § 1.194(b).

Section 1.194 is amended to revise paragraphs (b) and (c) to refer to the fee for oral hearing in § 1.17(g) and to indicate in paragraph (b) that any request for an oral hearing must be made within one month after the mailing date of the examiner's answer.

Section 1.197, paragraph (b), is amended to modify the last sentence relating to extensions of time to make the provisions of § 1.136 applicable thereto. Paragraph 1.197(b) is also amended to limit requests for rehearing, reconsideration or modification of a Board decision to one. This will not significantly change present practice since such requests are now required to be filed within thirty days from the date of the original decision.

Section 1.231, paragraph (a)(1), is amended to change the reference to the fee for filing a request for reexamination to § 1.20(c).

Sections 1.245 and 1.246 are amended to indicate that the provisions of § 1.136 do not apply to time periods in interferences.

Section 1.263 is amended to add a reference to the fee for filing a disclaimer contained in § 1.20(d).

New section 1.268 is added to provide a rule relating to the filing of interference settlement agreements. The rule generally follows 35 U.S.C. 135(c) and provides for filing of petitions and fees in paragraphs 1.268(b) and (c).

Section 1.292, paragraph (a), is amended to require the payment of the fee set forth in § 1.17(j) with any petition for the institution of public use proceedings.

Section 1.304, paragraph (a), is amended to provide for extension of the time period for filing an appeal or civil action to be subject to the provisions of § 1.136 and refer to the Court of Appeals for the Federal Circuit rather than to the Court of Customs and Patent Appeals.

Section 1.311 is amended to designate the present section as paragraph (a) and revise it in several ways. Paragraph (a) indicates that the notice of allowance will be sent to the correspondence address as indicated under § 1.33. The issue fee (§ 1.18) is indicated as being due 3 months from the date of mailing of the notice of allowance. Paragraph 1.311(b) permits an authorization to be filed either before or after the mailing of the notice of allowance to charge the issue fee to a deposit account.

Section 1.312 is amended to divide the section into two paragraphs and require a petition and payment of the fee under § 1.17(i) for any amendment filed after payment of the issue fee.

Section 1.313 is amended to provide in paragraph (a) clear basis for the Office withdrawing applications from issue on its own initiative or upon petition by applicant accompanied by the petition fee set forth in § 1.17(i). Any accompanying amendment must comply with the requirements of § 1.312. Paragraph (b) clarifies when an application will be withdrawn from issue after assignment of the issue date and patent number.

Section 1.314 is amended to revise the wording to eliminate reference to a portion of the issue fee and adds reference to the possibility that an application in which the issue fee was paid can be withdrawn from issue under § 1.313 or the issuance thereof deferred pursuant to a petition by the applicant and the payment of the petition fee under § 1.17(i).

Section 1.321 is amended to include references in both paragraphs (a) and (b) to the statutory disclaimer fee in § 1.20(d) and delete the reference to § 1.21.

Section 1.324 is amended to include reference to the fee in § 1.20(b) and change the word "application" to "petition".

Section 1.331, paragraph (a), is amended to add a new sentence which gives the citation of the fee for recording assignments and to indicate that instruments recorded on the Government register under Part 7 of Title 37, Code of Federal Regulations, do not require payment of such fee.

Section 1.332 is amended to refer to the fee in § 1.21(h) for recording an assignment.

Section 1.334 is amended to divide the rule into three paragraphs and also require an address of the assignee so that correspondence can be directed to the assignee if required. New paragraph (c) provides for filing a petition and the fee set in § 1.17(i) seeking to have the patent issue to the assignee where such assignment has not been recorded at the time the issue fee is paid.

Section 1.341, paragraph (h), is amended to refer to the fee set forth in § 1.21(a)(2) for registration of an attorney or agent.

Section 1.347 is amended to add a sentence referring to the fee set forth in § 1.21(a)(3) for reinstatement of an attorney or agent.

Section 1.445 is amended to increase the PCT transmittal fee and search fee to a level needed to cover the cost of performing the required functions. Paragraph 1.445(a)(2) is also amended to provide, in effect, for a reduction in the international search fee due to the United States Patent and Trademark Office as an International Searching Authority where a corresponding United States national application with fee has been filed. In addition, paragraph 1.445(a)(4) is amended to credit the national fee required under § 1.16(a)-(d) where an international search fee has been paid on the corresponding international application to the United States as an International Searching Authority. Where the amount of the credit is in excess of that required for the national fee a request for a refund of the excess under § 1.446(b) may be filed at the time of paying the national fee. The supplemental search fee for inventions in addition to the first, where lack of unity of invention has been found, is reduced since the present fee is more than is required to cover the costs. The national fee amount is the same as the national application filing fees in § 1.16(a)-(d).

Section 1.446(b) is revised to permit a refund of a portion of the search fee to the extent set forth in § 1.445(a)(4), if such refund is requested at the time of paying the national fee.

Section 1.451 is amended in paragraph (b) to revise the citation of the fees for a certified copy.

Section 1.510 is amended to cite the section which sets forth the fee for requesting reexamination. There is no change in the amount of this fee.

Alternative B—Rule Changes Under H.R. 6260

The following sections will become effective on Oct. 1, 1982, upon enactment of H.R. 6260 as a Public Law prior to that date:

Section 1.16 in Alternative B establishes in the regulations those statutory fees which would be charged by the Commissioner for filing patent applications under H.R. 6260. Section 1.16 also includes additional filing fees set in 35 U.S.C. 41(a)(1) to cover the cost of examining complexities presented by certain applications, e.g., applications containing more than a specified number of claims and any application containing a multiple dependent claim. Section 1.16 also provides that fees will be charged when the number of claims is increased above the specified number or when a multiple dependent claim is first presented, whether on filing or at a later point in processing.

Under 35 U.S.C. 41(a) as it would be amended by H.R. 6260, the filing fee for an original patent, except in design or plant cases, is \$300. In addition, on filing or on presentation at any other time, \$30 is due for each claim in independent form which is in excess of three, \$10 is due for each claim (whether independent or dependent) which is in excess of twenty, and \$100 is due for each application containing a multiple dependent claim. The latter fee is a one-time charge per application due the first time a multiple dependent claim is presented for examination. For the purpose of computing fees, a multiple dependent claim as referred to in § 112 of Title 35, United States Code, or any claim depending therefrom, is considered as separate dependent claims in accordance with the number of claims to which reference is made.

The fees in § 1.16 are reduced by 50 per centum for applications filed by small entities, i.e., independent inventors, nonprofit organizations and small business concerns, in accordance with H.R. 6260. Therefore, two fees are listed under each paragraph.

New § 1.16 relates to application filing fees. Paragraph (a) sets a basic filing fee of \$300 which will be required in all original

(40)

patent applications. The term "original" as used in the regulations means "non-reissue". An "original" application can be a first filing, a division, a continuation, or a continuation-in-part application. Paragraph 1.16(b) provides for an additional fee of \$30 for each independent claim in excess of 3 in an original application. New paragraph 1.16(c) provides for an additional fee of \$10 for each claim in excess of 20, whether independent or dependent. A multiple dependent claim is considered to be that number of claims to which direct reference is made. Also, any claim which refers to a multiple dependent claim is considered for fee calculation purposes to be the number of claims to which direct reference is made in the multiple dependent claim. Paragraph 1.16(d) provides for a new fee of \$100 in each application which contains one or more multiple dependent claims. The note following paragraph 1.16(d) is intended to clearly indicate that the applicant, attorney, or agent may pay any additional fees required under paragraphs (b), (c) and (d) of § 1.16, or cancel such claims without payment of such additional fees, either at the time of filing or by the time a response is due to any notice of fee deficiency mailed by the Office. If the fees are not paid or the claims cancelled by the end of the period set for response to the notice of fee deficiency, the application will be held abandoned. New paragraph 1.16(e) establishes the amount of the surcharge for filing the basic filing fee or oath or declaration on a date later than the filing date of the application. This fee is being established at this time, but will only be made effective when the statutory authority for the late filing of the fee or the oath or declaration becomes effective under 35 U.S.C. 111, as it would be amended by H.R. 6260. New paragraph 1.16(f) provides for a filing fee of \$125.00 for a design application.

Paragraphs 1.16(g) and (h) incorporate into the regulations the filing fees for plant and reissue applications.

Paragraphs 1.16(i) and (j) set forth the additional claim fees required in reissue applications based on claims in excess of those in the original patent.

New § 1.17 relates to patent application processing fees which are normally due during the time a patent application is pending. New paragraphs (a), (b), (c) and (d) provide for the payment of an extension fee for obtaining an automatic extension of time upon filing a petition as provided for in § 1.136(a). The extension fee can be paid during the period for which an extension of time to respond is desired, or after the original period for response has expired, provided that any maximum statutory period which may apply has not expired. The fees set forth in § 1.17 are the total fees required under § 1.136(a) for the periods indicated and any extension fee previously paid to extend a particular period is credited toward the total extension fee required. Paragraph (e) sets forth the fee for filing a notice of appeal to the Board of Appeals. Paragraph (f) sets forth the fee for filing an appeal brief for appellant. Paragraph (g) provides for a new fee for requesting an oral hearing before the Board of Appeals. Paragraphs (h) and (i) set forth fees which will be required with petitions to the Commissioner under those sections of the regulations which specifically indicate that such petition fees are required. The amount of the fees are set at two levels based on the degree of complexity of the petitions in order to recover the estimated average cost to the Office of processing the petitions. Paragraph (j) provides for a fee to be paid with any petition for institution of a public use proceeding to cover the estimated average cost of such a proceeding. Paragraph (k) sets forth a new fee for processing an application filed with a non-English language specification. The fee will cover the additional processing costs involved in such applications. New paragraph (l) incorporates into the regulations the fee which will be charged for filing a petition to revive or to accept late payment of the issue fee where the delay was unavoidable. New paragraph (m) incorporates into the regulations the fee which will be established in 35 U.S.C. 41(a)7, as amended by H.R. 6260, to be charged for a petition for the revival of an unintentionally abandoned application for patent or for the unintentionally delayed payment of an issue fee.

Since paragraphs 1.17(h), (i), (j) and (k) are established under the authority given the Commissioner under 35 U.S.C. 41(d) as it would be amended by H.R. 6260, only one level of fee is set. H.R. 6260 only provides for the reduction of fees charged to small entities of those fees established in 35 U.S.C. 41(a) and (b).

New § 1.18 sets the amount of the issue fees specified by H.R. 6260. New paragraph (a) establishes an issue fee of \$500.00 for all original and reissue patents except for designs and plants. New paragraph (b) sets the amount of the issue fee for a design patent. New paragraph (c) sets forth the issue fee for a plant patent. All fees in § 1.18 will be reduced by 50 per centum for small entities.

New § 1.20 sets fees for various post-issuance functions performed by the Office. New paragraph (a) sets forth a fee for providing a certificate of correction of an applicant's mistake. New paragraph (b) sets a fee to accompany a petition to correct inventorship in a patent under § 1.324. New paragraph (c) transfers the \$1,500.00 fee for requesting reexamination from present § 1.21(x) to this new section. New paragraph (d) provides for a fee for filing a disclaimer under § 1.321. Maintenance fees required by Public Law 96-517 and which would be set in H.R. 6260 are placed in this section. Specific maintenance fees, which are required by Public Law 96-517, for those patents resulting from applications filed on and after Dec. 12, 1980 and up to the date of enactment of H.R. 6260 are being established at this time in paragraphs 1.20(e)-(g). New paragraphs 1.20(h)-(j) incorporate into the regulations the maintenance fees which would be provided in 35 U.S.C. 41(b) by H.R. 6260. The fees in paragraphs 1.20(a)-(c) are only set at one level because they are established under 35 U.S.C. 41(d). The fees in paragraphs 1.20(e)-(g) are only set at one level because they are established under Public Law 96-517 and are not subject to reduction for small entities. The details implementing the payment of maintenance fees are not being established at this time.

Section 1.66 is amended to provide for the use of an apostille of a foreign official to attest to oaths or affirmations made in foreign countries in accordance with 35 U.S.C. 115 and 261, as amended by H.R. 6260.

Section 1.137, as amended, designates the existing section as part of paragraph (a), adds a reference to the new fee under § 1.17(1) for a petition for revival where the delay which resulted in abandonment was unavoidable, indicates that the petition must be promptly filed, and states when the showing that the delay was unavoidable must be verified. New paragraph 1.137(b) provides for filing a statement and a fee under § 1.17(m) for revival of an application which was unintentionally abandoned, and also indicates when such petitions can be filed. Paragraph (c) requires that any petition for revival under paragraph (a) of § 1.137 be promptly filed and that a terminal disclaimer, equivalent to the period of abandonment of the application, be filed with any petition under paragraph (a) filed more than six months after the date of abandonment.

Section 1.155 is amended to refer in paragraph (a) to § 1.18(b) which sets forth the issue fee for a design application. Paragraph 1.155(b), as amended, includes a reference to the fee for delayed payment of the issue fee set forth in § 1.17(1) where the delay in payment was unavoidable, indicates that the petition must be promptly filed, and states when showings that the delay was unavoidable must be verified. New paragraph 1.155(c) provides for acceptance of the late payment of the issue fee where the delay was unintentional upon petition and payment of the fee set forth in § 1.17(m). New paragraph 1.155(c) also indicates when such petitions can be filed. Paragraph 1.155(d) is added to require a terminal disclaimer equivalent to the period of abandonment of the application where petition under paragraph (b) of § 1.155 is not filed within six months of the date of abandonment.

Section 1.316 is amended to implement the statutory provisions of 35 U.S.C. 41(a) with regard to petition fees for revival of applications abandoned for failure to pay the issue fee. Paragraph (b) is amended to provide for petitions for revival with the fee in § 1.17(1) where the delay in payment was unavoidable, to indicate that the petition must be promptly filed, and to state when showings that the delay was unavoidable must be verified. Paragraph (c) is added to provide for petitions for revival with the fee in § 1.17(m) where the delay was unintentional. New paragraph (c) also indicates when such petitions can be filed. Paragraph (d) is added to require a terminal disclaimer equivalent to the period of abandonment of the application where a petition under paragraph (b) of § 1.316 is not filed within six months of the date of abandonment.

Section 1.317 is amended to implement the statutory provisions of 35 U.S.C. 41(a) with regard to petition fees for patents lapsed for failure to pay the remaining balance of the issue fee.

Paragraph (a) is amended to show that it applies only to patents in which the issue fee was paid prior to Oct. 1, 1982. Issue fees paid on or after that date will be in accordance with § 1.18. Paragraph (b) is amended to provide for petitions with the fee in § 1.17(1) where the delay in payment was unavoidable, to indicate that the petition must be promptly filed, and to state when showings that the delay was unavoidable must be verified. Paragraph (c) is added to provide for petitions with the fee in § 1.17 (m) where the delay was unintentional. New paragraph (c) also indicates when such petitions can be filed. Paragraph (d) is added to require a terminal disclaimer equivalent to the period of lapse of the patent where a petition under paragraph (b) of § 1.317 is not filed within six months of the date of lapse.

Response to Comments on the Rules

Specific comments were received on a number of the sections. All of the comments, including the written comments and the oral testimony, were considered in adopting the changes set forth herein.

Written comments were received from three patent law groups and eleven individuals. The three patent law groups were (1) the American Patent Law Association whose membership includes several thousand lawyers involved in the practice of law before the U.S. Patent and Trademark Office; (2) the Patent, Trademark and Copyright Section of the Virginia State Bar; and (3) the Patent, Trademark and Copyright Law Section of The Bar Association of the District of Columbia.

Oral comments were presented at the hearing on behalf of two patent law groups and by 3 individuals on their own behalf.

These comments appear below along with responses thereto. Comments received relating to §§ 1.9, 1.27 and 1.28 and the forms of Part 3 are not discussed in substance in this rule change since additional time for submitting written comments is provided until Aug. 13, 1982. All comments presented to these rules will be discussed in a later rule promulgation.

Comment:

One person argued that it is unreasonable to require fees to lengthen a shortened statutory period.

Reply:

A shortened statutory time is provided for by statute. The shortened period helps reduce patent pendency time and speed the disclosure of technology and information about patent rights. Many applicants can reply within the present three month shortened period which has been in effect for over fifteen years. The fee for extending the time provides a positive method for applicants to obtain an extension of time while still expediting the prosecution of their applications.

Comment:

Another person commented that H.R. 6260 should be rejected in that the fee levels are too high.

Reply:

The consideration of the merits of H.R. 6260 is not before the Office in this rule change.

Comment:

Three patent bar groups and two individuals presented comments relating to the effect of the new extension of time fees in § 1.17 and the effect thereof on the current practice of granting an automatic one-month extension of time if a timely first response to a final rejection is filed by the applicant.

Reply:

The Office plans to terminate the automatic one-month extension of time practice on Oct. 1, 1982. It is felt that the extensions of time which are readily available under §§ 1.17 and 1.136 will meet the needs of applicants. The amount of the fees required to obtain an extension will be the same for periods of response before and after final rejection.

Comment:

One suggestion was made to permit the filing of an appeal without the appeal fee where the Office has not acted on a timely response after final rejection by applicant.

Reply:

Such a procedure is not possible under the provisions of H.R. 6260 since it calls for the appeal fee "On filing an appeal" in § 41(a)6.

Comment:

Two comments were received requesting that the rules be changed to make the due date for paying the fee for an oral hearing on appeal after the examiner's answer on appeal.

Reply:

A change in the rules has been made to provide that the fee for an oral hearing is due no later than one month after the date of mailing of the examiner's answer.

Comment:

Two comments were received requesting that no charge for revival of an abandoned application be made where the abandonment resulted from the non-receipt of an Office action by the applicant.

Reply:

It is present Office practice to remail any Office action which is not received at applicant's correspondence address and start anew the response period. This procedure will continue in the future under the revised rules.

Comment:

Three patent bar groups and two individuals indicated that the proposed deletion of the refund provisions due to PCT search reports in § 1.26(b) and § 1.446(b) would make the cost of filing under the Patent Cooperation Treaty prohibitively high and does not recognize the benefit of an earlier search on a corresponding application.

Reply:

In view of these comments, proposed § 1.445(a) (2) and (4) and § 1.446(b) have been amended to provide a credit of \$250 where there is a corresponding application.

Comment:

One individual requested that the multiple dependent claim practice set forth in § 1.75(c) be changed to permit one multiple dependent claim to refer to another multiple dependent claim as permitted under European practice.

Reply:

This suggestion cannot be adopted since it is contrary to 35 U.S.C. 112 and cannot therefore be changed by rule.

Comment:

One suggestion was made to change "official" to "Office" in § 1.135(b).

Reply:

The suggestion has been adopted.

Comment:

One suggestion was made to allow refund of the oral hearing fee if an oral hearing is not held.

Reply:

This suggestion was not adopted since such refund is not appropriate in view of the fact that the fee is stated to be "for requesting an oral hearing" and not the actual conduct thereof.

Comment:

Three patent bar groups raised the question as to whether an applicant would be permitted to revive an unintentionally abandoned application under § 1.137(b) after having been unsuccessful in the unavoidable approach under § 1.137(a) and suggested that this be made clear when the proposed rules are promulgated.

Reply:

Yes, an applicant under certain conditions could use § 1.137(b) after having been unsuccessful in the unavoidable approach under § 1.137(a).

Comment:

Several comments related to the possibility of reviving applications unintentionally abandoned up to 15 years ago.

Reply:

In view of the comments received, § 1.137(b) is being implemented to provide only for the revival of applications which were unintentionally abandoned for a reasonable but limited period of time. This should create no substantial problems in regard to intervening rights situations. It would permit some greater flexibility than that originally proposed but should have no significant effect on the current case backlog, pendency or number of interferences pending.

Comment:

One comment was received pointing out that the availability of an "unintentional abandonment" revival under § 1.137(b) should not result in stricter holdings in "unavoidable abandonment" revival petitions under § 1.137(a).

Reply:

The Office plans to continue to use the current criteria used to decide petitions to revive applications unavoidably abandoned.

Comment:

One written comment questioned whether the Commissioner has statutory authority to revive unintentionally abandoned applications.

Reply:

If Congress did not intend the Commissioner to have such authority there would have been no reason to establish fees in § 41(a)7 in H.R. 6260. The legislative history of H.R. 6260, House Report No. 97-542 (Committee on the Judiciary), also makes the Congressional intent clear. The provisions in H.R. 6260 relating to unintentional abandonment are substantive in addition to setting the fee.

Comment:

One letter questioned what is intended by the statement in § 1.137(b) that the Commissioner may require additional information where there is a question whether the abandonment was unintentional.

Reply:

Additional information would be required only where there is an indication that the abandonment was intentional, for example, where an express abandonment has been filed. The record should be clear how such an express abandonment was unintentional if the petition is to be granted.

Comment:

One comment raised the question as to whether in a petition to revive on grounds that the delay was unavoidable under § 1.137(a), it would be sufficient that a registered attorney's statement be submitted which merely recites facts as related to him or her by another.

Reply:

Statements must be made, where possible, by the person having direct personal knowledge of the facts. No change in the "showing" required or the persons making them is intended in such petitions. The rule merely clarifies that a statement by a registered attorney or agent need not be in the form of an oath or declaration.

Comment:

One comment suggested that § 1.317 be changed to provide for the situation where there was a lapse in a patent due to the unintentional delay in paying a balance of issue fee due.

Reply:

Section 1.317 has now been changed to provide for this lapse situation.

Comment:

Three patent bar groups and one individual indicated that a full credit of the amount equal to the international search fee be made where both a U.S. national and international search are made by the United States Patent and Trademark Office.

Reply:

While a complete credit is not considered proper in view of additional processing work (including searching) required in the second application, a credit of \$250 has been provided in revising § 1.445(a) (2) and (4).

Comment:

One person commented that the term "patent" should be inserted after "abandoned" in § 1.12(b).

Reply:

The suggestion has been adopted.

Discussion of Significant Differences Between Proposed and Final Rules

A number of other changes which have been made as a result of the comments received and further review of the proposed rulemaking are identified below.

Implementation of the changes to § 1.9, new §§ 1.27 and 1.28, and the deletion of Part 3 are being deferred for further comments by Aug. 13, 1982. See the discussion below.

Subparagraph (a) (5) of § 1.19 has been changed from that proposed by referring to subparagraphs (1) through (4) rather than (3) and (4) in order to clarify that copies of patents cannot be ordered at the rate set in subparagraph (a) (5). Instead, copies of patents must be ordered under paragraphs (a) (1) and (2) of § 1.19.

Section 1.24 has been changed from that proposed to provide for the sale of 40-cent coupons. Coupons in this denomination may be useful in view of the charge of forty cents for a printed

copy of a registered mark in § 2.6(m) of Alternative A of the trademark rules.

Sections 1.137, 1.155 and 1.316 have been changed from that proposed in Alternative B to further specify the conditions under which unintentionally abandoned applications can be revived.

Sections 1.192 and 1.194 have been changed from that proposed so as to allow a request for an oral hearing and the payment of the required fee therefor to be made one month after the date of the examiner's answer. Previously, appellant was required to indicate a desire for an oral hearing at the time of filing the brief. The sections will now permit appellant to consider the examiner's answer before deciding whether to request an oral hearing and pay the required fee.

Section 1.317 has been changed in Alternative B to provide for the situation where there was a lapse in a patent due to the unintentional delay in paying a balance of issue fee due.

Section 1.445(a) (2) and (4) have been changed from that proposed to provide for a reduction in the international search fee where there has been a corresponding United States national application and a credit to the national fee where an international search fee has been paid in a corresponding international application and the international search has been made by the United States Patent and Trademark Office.

Section 1.446(b) has been changed from that proposed to permit a refund of a portion of the search fee to the extent set forth in § 1.445(a) (4), if such refund is requested at the time of paying the national fee.

Implementaion of Patent Fee Revisions

The effective date of the patent fee revisions contained in this rulemaking is Oct. 1, 1982.

* * * * *

The changes which will become effective on Oct. 1, 1982, upon enactment of H.R. 6260 as a Public Law prior to Oct. 1, 1982, are (1) the rule changes common to Public Law 96-517 and H.R. 6260, and (2) the rule changes under H.R. 6260, which appear in Alternative B. The rule changes common to Public Law 96-517 and H.R. 6260 will become effective on Oct. 1, 1982, whether or not H.R. 6260 is enacted as a Public Law prior to Oct. 1, 1982.

* * * * *

Upon enactment of H.R. 6260 as a Public Law prior to Oct. 1, 1982, the rule changes in Alternative B will become effective on Oct. 1, 1982, in which case the rule changes in Alternative A will not become effective on Oct. 1, 1982.

Any fee which is due and payable on or after Oct. 1, 1982, must be paid in the amount and in accordance with the procedures contained in this rulemaking. For purposes of determining the amount of the fee to be paid, the date of mailing indicated on a proper Certificate of Mailing under § 1.8 will be considered to be the date of receipt in the Office. In order to ensure clarity in the implementation a discussion of the implementation of specific sections is set forth below:

Implementation of Specific Sections

The various sections will be implemented in the manner set forth below:

§ 1.16 National application filing fees.

Any national patent application filing fees paid on or after Oct. 1, 1982, must be paid in the amounts set forth in this section. Any additional fees which become due under § 1.16 in pending applications on or after Oct. 1, 1982, or which have not been paid prior to Oct. 1, 1982, must be paid in the amounts set forth in this section even though the application was filed prior to Oct. 1, 1982. For example, if an application filed prior to Oct. 1, 1982, is amended on or after Oct. 1, 1982, to include a multiple dependent claim for the first time, the fee set forth in § 1.16(d) must be paid.

The surcharge in § 1.16(e) of Alternative B is being established at this time, but will only be made effective when the

statutory authority for the late filing of the fee or the oath or declaration becomes effective under 35 U.S.C. 111, as it would be amended by H.R. 6260. The statutory authority for the late filing of the fee or the oath or declaration becomes effective six months after enactment of H.R. 6260 as a Public Law.

§ 1.17 Patent application processing fees.

Any patent application processing fees paid on or after Oct. 1, 1982, must be paid in the amounts set forth in this section.

The extension fees which must accompany a petition for an extension of time become effective on Oct. 1, 1982, and apply to any application for which the period for responding, i.e., taking action, expires on Oct. 1, 1982, or thereafter. If a response or action by the applicant was due before Oct. 1, 1982, and was not filed timely or an extension of time until Oct. 1, 1982, or thereafter, was not obtained, then § 1.136(a) cannot be used to obtain an extension. *Any response or action required before Oct. 1, 1982, cannot have its time extended by using § 1.136(a).* If one or more previous extensions have been granted prior to Oct. 1, 1982, extending the time for taking action until Oct. 1, 1982, or thereafter, the fees which are due for additional extensions under § 1.136(a) will be as set forth in § 1.17(a)-(d) under either Alternative A or B.

* * * * *

The previous practice of extending the shortened statutory period an additional month upon the filing of a timely first response to a final rejection is being discontinued effective with any first response to a final rejection filed on or after Oct. 1, 1982. Applicants can obtain additional time for response after that date by paying the appropriate fee for the same. An object of the previous practice, as expressed in § 714.13 of the Manual of Patent Examining Procedure, was to obviate the necessity for appeal or filing a continuing application merely to gain time to consider the examiner's position in reply to a response timely filed after final rejection. Under § 1.136(a) the object of the previous practice can be achieved without continuing the previous practice. Thus, under § 1.136(a) an applicant can file a timely first response to a final rejection within the initial period without having to file an appeal or a continuing application if the examiner's response is not received prior to the expiration of the initial period for response. If the timely first response places the application in condition for allowance no additional response and no extension fee from applicant is required. If the examiner's advisory action indicates the timely first response did not place the application in condition for allowance the applicant may then consider the examiner's position to determine whether further prosecution is desirable. If further prosecution is not desired the application can be abandoned without further response or expense. If further prosecution is desired, the applicant can petition and pay the necessary fee to extend the time to the extent appropriate up to the maximum permitted by statute. The availability of this flexibility under § 1.136(a) eliminates the necessity for the previous practice. Further, under H.R. 6260 extensions of time would be granted in most instances by virtue of the payment of fees rather than without fees as in the previous practice. The elimination of the previous practice after final rejection is thus consistent with the letter and spirit of H.R. 6260.

After an applicant has petitioned and paid the extension fees of \$550 for response within the fourth month pursuant to § 1.136(a), any further extensions which are permitted under the statute must be obtained under § 1.136(b).

A petition for extension of time under § 1.136(a) may incorporate by reference a previously filed response without including an additional copy of the response in circumstances where the response was received late and the petition is filed to extend the time so that the response will be considered timely.

The appeal fees set forth in § 1.17(e)-(g) are due for notices of appeal or briefs filed, or requests for oral hearings filed, on or after Oct. 1, 1982. If more than one appeal occurs in an application, the fees are due for each notice of appeal, each brief, and each request filed for an oral hearing as long as a decision on the merits by the Board of Appeals resulted from the first notice of appeal, brief, and request for an oral hearing. If the examiner reopens prosecution in the application after appeal and prior to the decision by the Board of Appeals then the fee for the notice of appeal, brief, and request for an oral hearing will apply to a

later appeal which does result in a decision by the Board of Appeals. No refund of any appeal fees is permitted since such are due on filing or on requesting an oral hearing. No fee is required for a reply brief.

The fees for petitions set forth in § 1.17(h)-(j) and (1) apply to any such petition filed on or after Oct. 1, 1982. The fee set forth in § 1.17(m) of Alternative B would apply, with enactment of H.R. 6260 prior to Oct. 1, 1982, to petitions (1) for revival of an unintentionally abandoned application or (2) for the unintentionally delayed payment of the fee for issuing a patent. Section 1.137(b) of Alternative B would apply to applications unintentionally abandoned by failure to prosecute, e.g., failure to respond to an Office action. Sections 1.155(c) and 1.316(c) of Alternative B would apply to applications in which the payment of the fee for issuing a patent is unintentionally delayed. These sections would be implemented, with enactment of H.R. 6260 prior to Oct. 1, 1982, by making them effective as to any applications which would be covered by the literal language of the sections. In addition, and for a transition period between Oct. 1, 1982, and Dec. 31, 1982, a petition to revive an unintentionally abandoned application would be granted if (i) the application received a decision on a petition to revive the application on or after Oct. 1, 1981, and before July 30, 1982, or (ii) a petition was filed or renewed on or after Oct. 1, 1981, and before July 30, 1982, provided in the case of both (i) and (ii) that a petition to revive was filed within one year of the date of abandonment. The dates in question were chosen so as to permit this remedial provision to be given as wide an application as possible to benefit applicants whose applications have previously been unintentionally abandoned, but who could not meet the previous requirements for a showing that the delay resulting in the abandonment was unavoidable. The dates were also chosen to prevent an applicant whose application has been abandoned for an unduly long period from attempting to take advantage of this new provision, possibly to the detriment of individuals or companies who had begun to make, use, or sell the subject matter of the application after the date of abandonment of the application. By using these dates the possibility of reviving the application of an applicant who has, in effect, abandoned the invention under 35 U.S.C. 102(c) is minimized. Implementing these sections in the manner set forth would be appropriate and proper in view of the legislative history of H.R. 6260, contained in House Report No. 97-542 (Committee on the Judiciary), which indicates that the Commissioner can establish time limits within which petitions to revive or to accept late payment of issue fees can be filed. Thus, it is entirely proper to limit such petitions in the manner set forth in order to prevent abuses from occurring. To ensure that abuses do not occur, § 1.137(b), 1.155(c), 1.316(c), and 1.317(c) specifically indicate that waivers of the time periods involved will not be considered via petitions under § 1.183.

The fee set forth in § 1.17(k) is required for any application on or after Oct. 1, 1982, with a specification in a non-English language.

§ 1.18 Patent issue fees.

Any patent issue fee paid on or after Oct. 1, 1982, must be paid in the amounts set forth in this section even if the notice of allowance was mailed prior to Oct. 1, 1982, and indicates different amounts due. If the issue fee is paid prior to Oct. 1, 1982, any balance of issue fee due must be paid in accordance with § 1.317.

§ 1.19 Document supply fees.

The document supply fees set forth in this section will apply to all orders and requests received by the Patent and Trademark Office on or after Oct. 1, 1982.

§ 1.20 Post-issuance fees.

The post-issuance fees set forth in § 1.20(a)-(d) apply to any petitions, requests, or actions filed on or after Oct. 1, 1982. The amounts of the maintenance fees are included in § 1.20.

Maintenance fees will be required for any patent actually applied for on or after Dec. 12, 1980, whether or not the patent is entitled to the benefit of an earlier filing date under 35 U.S.C. 120 or a right of priority under 35 U.S.C. 119. For reissue patents, the controlling date would be the filing date of the original patent.

For example, maintenance fees would only be required where the application for the original patent was filed on or after Dec. 12, 1980. As to patents resulting from international applications filed under the Patent Cooperation Treaty, maintenance fees will be required on all patents resulting from international applications having PCT filing dates on or after Dec. 12, 1980.

The details implementing payment of the maintenance fees are not being established at this time since such fees will not be due for some time and additional consideration of the problems thereof is required.

§ 1.21 Miscellaneous fees and charges.

The miscellaneous fees and charges set forth in this section will apply to all orders and requests received by the Patent and Trademark Office on or after Oct. 1, 1982.

§ 1.445 International application filing and processing fees.

Any international application filing and processing fees paid on or after Oct. 1, 1982, must be paid in the amounts set forth in this section.

Implementation Of Certain Sections Deferred For Further Comments

In view of the comments and the recommendations received at the hearing on July 9, 1982, the period for written comments on § 1.9(c), (d), (e), and (f), and on §§ 1.27 and 1.28, has been extended until Aug. 13, 1982 (see 47 FR 32458, July 27, 1982). Comments received at the hearing on July 9, 1982, expressed the view that there is no necessity to publish final rules on § 1.9(c), (d), (e), and (f), and on §§ 1.27 and 1.28, by August 2, 1982, and that further time for consideration and comment was necessary. Persons commenting stated a belief that the pressure of time does not apply to §§ 1.27 and 1.28 as it does apply to the fee rulemaking. Accordingly, the period for written comments on these sections is extended until Aug. 13, 1982. After receiving written comments by Aug. 13, 1982, the changes to § 1.9 and proposed §§ 1.27 and 1.28 will be adopted as final rules with such modifications as are found to be appropriate after review of the comments. These rule changes, with any appropriate modifications thereof, must become effective on Oct. 1, 1982, with enactment of H.R. 6260 prior to Oct. 1, 1982. Accordingly, adoption of the changes to § 1.9 and new §§ 1.27 and 1.28 is being deferred at this time to permit additional written comments by Aug. 13, 1982. However, these rule changes will be adopted, with any appropriate modifications, as soon as possible after receipt of the additional written comments. No additional proposal will be published and no additional hearing will be held prior to adoption of final rules on the changes to § 1.9 and on new §§ 1.27 and 1.28.

As a result of additional comments presented during the hearing on the proposed trademark fees, the period for written comments on the deletion of Part 3 was also extended until Aug. 13, 1982, to provide an additional opportunity for interested persons to comment on this proposed change. Since it is not essential that this deletion be published by Aug. 2, 1982, it is appropriate to extend the period for comments. No additional proposal will be published and no additional hearing will be held prior to a decision on whether or not to delete Part 3 as proposed.

SECTION II—REVISION OF TRADEMARK FEES

Background

A notice of proposed rulemaking was published in the Federal Register on June 28, 1982, at 47 FR 28063-28065 and in the Official Gazette on June 29, 1982, at 1019 TMOG 110-119. An oral hearing was held on July 9, 1982. Three written letters and statements were submitted. Three persons testified at the oral hearing. Full consideration has been given to all of the letters, statements, and testimony.

Objectives of Rule Changes

These amendments establish fees for the filing and processing of an application for the registration of a trademark or other

mark, and for providing all other services and materials relating to trademarks and other marks.

Public Law 96-517

Public Law 96-517 authorizes the Commissioner to establish fees for the filing and processing of an application for the registration of a trademark or other mark, and for providing all other services and materials relating to trademarks and other marks. Public Law 96-517 requires that by Oct. 1, 1982, fees for the filing and processing of an application for the registration of a trademark or other mark be set to recover in the aggregate 50 percent of the estimated average cost to the Office of such processing. Also by Oct. 1, 1982, fees for providing all other services and materials relating to trademarks and other marks are to be set to recover the estimated average cost to the Office of performing the service or furnishing the material.

H.R. 6260

On June 8, 1982, the House of Representatives passed H.R. 6260. This bill would amend the fee provisions to be implemented on Oct. 1, 1982. H.R. 6260 would repeal the provisions in Public Law 96-517 requiring that filing and processing fees be set to recover in the aggregate 50 percent of the estimated average cost of such processing to the Office, and that fees for providing all other services and materials relating to trademarks and other marks be set to recover the estimated average cost to the Office of performing the service or furnishing the material. In passing H.R. 6260, the House of Representatives recommended a fee schedule to the Commissioner for fiscal year 1983. The fees set in Alternative B adopt the House recommendation.

This rule change, therefore, is also designed in the alternative to implement the fee provisions as they would be amended by H.R. 6260. The rule change contains changes which are common to Public Law 96-517 and H.R. 6260, as well as alternative rule changes which are specific to Public Law 96-517 (Alternative A) and to H.R. 6260 (Alternative B).

Discussion of Significant Changes

This rulemaking places into the appropriate sections of Title 37, Code of Federal Regulations, the various fees which are due on filing, during the pendency of a trademark application, or during the life of a registration.

Rule changes for implementing provisions of Public Law 96-517 or H.R. 6260 other than the fee provisions have not been included. Rule changes for implementing provisions other than the fee provisions will be published in a later rulemaking proposal.

Discussion of Specific Sections Changed

The sections changed are grouped in this document under three different categories. Those changes which are common to Public Law 96-517 and H.R. 6260 appear first and are numbered 72-76. The change which relates only to Public Law 96-517 appears as Alternative A and is numbered 77. The change which is dependent upon enactment of H.R. 6260 appears as Alternative B and is numbered 78. The changes common to Public Law 96-517 and H.R. 6260 will become effective on Oct. 1, 1982, whether or not H.R. 6260 is enacted as a Public Law.

* * * * *

Upon enactment of H.R. 6260 as a Public Law prior to Oct. 1, 1982, Alternative B will become effective on Oct. 1, 1982, in which case Alternative A will not become effective.

The specific rules for which changes are made are §§ 2.6, 2.85, 2.101, 2.146, 2.162 and 2.167.

Rule Changes Common to Public Law 96-517 and H.R. 6260

Section 2.85, paragraph (e), is amended to delete reference to late filed fees for oppositions and affidavits. The manner in which such fees shall be handled is described in the pertinent sections for affidavits and oppositions.

Section 2.101, paragraph (c), is amended to delete the reference to a service charge which will no longer be charged for late-filed fees for oppositions.

Section 2.146, paragraph (b), is amended to add a fee for filing a petition to the Commissioner. Paragraph (f) of this section which indicates that no fee is required is deleted.

Section 2.162, paragraph (d), is amended to remove the reference to a service charge for late-filed fees on § 8 affidavits.

Section 2.167, paragraph (g), is added to establish procedures relating to the fee for affidavits under § 15, 15 U.S.C. 1065, and to state the Office's action when no fee or an insufficient fee is filed.

* * * * *

Alternative B— Rule Change Only Under H.R. 6260

Section 2.6 is revised to establish the fees recommended by the House of Representatives under H.R. 6260 for filing and processing applications for the registration of trademarks or other marks and for providing services and materials relating to trademarks or other marks. The \$10 fee recommended by the House for certified copies appears in paragraphs (n) and (o) as a fee of \$6.50 for a copy of a registered mark showing title and/or status and a fee of \$3.50 for certification.

Response to Comments on the Rules

Specific comments were received on several of the sections. All of the comments included in the written submissions and the oral testimony were considered in adopting the changes set forth herein.

Written comments were received from three individuals. Oral comments were presented at the hearing on behalf of a patent and trademark law group, the American Patent Law Association, and an organization of trademark owners and lawyers, the United States Trademark Association. One individual spoke on behalf of a law firm and expanded upon the points raised in his previously submitted written comments.

These comments appear below along with responses thereto, where appropriate.

Comment:

The representative of the trademark association spoke favorably about the proposal presented. The organization opposed 100% recovery of trademark costs from user fees. It was felt that such an approach reflected a misconception that trademarks benefit only their owners and not consumers and the economy as a whole. The speaker solicited the assistance of the Patent and Trademark Office in altering this viewpoint.

Comment:

The representative of the bar group questioned the fairness of the Office in establishing the fees under Alternative B. It appeared that the Office had accepted the USTA proposals only where they were higher. In all cases where the USTA recommendations were lower than those proposed, the difference was split. The filing fee was singled out as the most unfair fee.

Reply:

In Alternative B, the rules adopt the fee levels recommended by the House Committee on the Judiciary in House Report No. 97-542. The Report recognizes that the Office needs to recover a certain amount of fee income over the next three years. The application filing fee is expected to furnish more than 60% of the estimated annual income. It could not be reduced further without endangering operations. The reduction from \$200.00 to \$175.00 per class was covered to a large extent by higher fees for other services.

Comment:

The philosophy of H.R. 6260 is to recover no more than 100%. Final fees should recover this level and no more.

Reply:

Projecting processing costs three years in advance can never be absolutely accurate. The Office must have sufficient funds to process anticipated workloads under the fees set during fiscal years 1983-1985 when costs are expected to be somewhat higher than present costs.

Comment:

One suggestion involved retaining Part 4 of 37 CFR, at least for the present. Occasional users of the registration system find it to be a readily available reference. Certain information in the

forms is available from no other source. The speaker believed the time pressures to implement the fee changes precluded proper consideration of the merits of Part 4.

Reply:

The period for comment on deletion of Part 4 has been extended to August 13, 1982 to allow for additional public comment and internal consideration.

Comment:

The suggestion was made that references to affidavits and oppositions should be eliminated from § 2.85(e) as the handling of late filed fees for these items is already covered directly in §§ 2.101(c), 2.162(d) and 2.167(g).

Reply:

This suggestion was implemented.

Comment:

A suggestion was made that §§ 2.101(c), 2.162(d) and 2.167(g) dealing with oppositions and affidavits under Section 8 and Section 15 be amended to require payment of all late filed fees within the time period specified in the notification by the Office.

Reply:

All of the sections state that the affidavit or opposition "will not be refused if the required fee(s) . . . are filed in the Patent and Trademark Office within the time limit set forth in the notification of this defect by the Office." This language is considered sufficient to require payment of all fees or have the opposition, affidavit or declaration refused.

Comment:

One suggestion was made to either cite § 2.6 in all sections being changed relative to fees or to cite it in none.

Reply:

Citations of § 2.6 have been added to § 2.101(c) and § 2.146(b) to conform to § 2.162(d) and § 2.167(g).

Comment:

It was suggested that the fee for a combined section 8 and 15 affidavit needed to be specified in the rules.

Reply:

Section 2.6 has been changed to provide this combined fee.

Discussion of Significant Differences Between Proposed and Final Rules

A number of changes which were made as a result of the comments received and further review of the proposed rulemaking are identified below.

Deletion of Part 4 has been deferred for further comment by Aug. 13, 1982 (see 47 FR 32458, July 27, 1982). As elimination of Part 4 is not essential to the setting of fees, and does not have to be in place 60 days before implementation, it was decided to ask for further public comment.

Section 2.85(e) has been revised to eliminate the references to oppositions and affidavits. Because the handling of late filed fees for these items is specified elsewhere, these references in § 2.85(e) were redundant and confusing.

Both alternatives of § 2.6 have been revised to add a fee for a combined affidavit under sections 8 and 15 of the Act. In order to prevent possible confusion by users of the Trademark system, it was included separately.

Implementation of Specific Rules Changes

The effective date of the trademark fee revisions contained in this rulemaking is Oct. 1, 1982.

* * * * *

The changes which will become effective on October 1, 1982, upon enactment of H.R. 6260 as a Public Law prior to Oct. 1, 1982, are (1) the rule changes common to Public Law 96-517 and H.R. 6260, and (2) the rule changes under H.R. 6260, which appear in Alternative B. The rule changes common to Public Law 96-517 and H.R. 6260 will become effective on Oct. 1, 1982, whether or not H.R. 6260 is enacted as a Public Law prior to Oct. 1, 1982.

* * * * *

Upon enactment of H.R. 6260 as a Public Law prior to October 1, 1982, the rule changes in Alternative B will become

effective on Oct. 1, 1982, in which case the rule changes in Alternative A will not become effective on Oct. 1, 1982. *Any fee which is due and payable on or after Oct. 1, 1982, must be paid in the amount and in accordance with the procedures contained in this rulemaking. For purposes of determining the amount of the fee to be paid, the date of mailing indicated on a proper Certificate of Mailing under § 1.8 will be considered to be the date of receipt in the Office.* In order to ensure clarity in the implementation a discussion of the implementation of Section 2.6 is set forth below:

Implementation of Section 2.6

Fees set forth in Section 2.6 must be paid in the amounts set forth in this section on or after Oct. 1, 1982. Any additional fees which become due under § 2.6 in pending applications on or after Oct. 1, 1982, or which have not been paid prior to Oct. 1, 1982, must be paid in the amounts set forth in this section even though the application was filed prior to Oct. 1, 1982. For example, if an application filed prior to Oct. 1, 1982, is amended on or after Oct. 1, 1982, to include additional classes, the fee set forth in § 2.6(a) must be paid per class added.

Implementation of Certain Sections Deferred for Further Comments

As a result of additional comments presented during the hearing on the proposed trademark fees, the period for written comments on the deletion of Part 4 has also been extended until Aug. 13, 1982, to provide an additional opportunity for interested persons to comment on this proposed change (see 47 FR 32458, July 27, 1982). Since it is not essential that this deletion be published by Aug. 2, 1982, it is appropriate to extend the period for comments. No additional proposal will be published and no additional hearing will be held prior to a decision on whether or not to delete Part 4 as proposed.

Other Considerations Relating to Patent and Trademark Fee Revisions

Environmental, energy, and other considerations: The rule change will not have a significant impact on the quality of the human environment or the conservation of energy resources.

This rule change is in conformity with the requirements of the Regulatory Flexibility Act (Public Law 96-354), Executive Order 12291, and the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 et. seq.).

The rule change will not have a significant adverse economic impact on a substantial number of small entities (Regulatory Flexibility Act, Pub. L. 96-54) for several reasons. Public Law 96-517 and H.R. 6260 have both taken into consideration the impact they may have on small entities. The fees under Public Law 96-517 are set to recover 50% of patent and trademark processing costs rather than full costs and generally the rate of increase in the fees is less than that of inflation since the last increase in fees in 1965. Further, the rules implementing Public Law 96-517 take into consideration small entities by setting a lower patent filing fee than issue fee to recover the required level of patent processing costs. The lower filing fee permits a small entity to file a patent application for a relatively low cost and not have to pay the higher balance of fees required to achieve Public Law 96-517 recovery levels until examination is complete and it is known that a patent will issue. Under H.R. 6260 and this rulemaking, small entities would be able to pay reduced fees for filing patent applications and for the issuance and maintenance in force of patents. In general, the rule change will also expedite proceedings before the Patent and Trademark Office, changing existing procedures where they can be simplified.

The Patent and Trademark Office has determined that this rule change is not a major rule under Executive Order 12291. The annual effect on the economy will be less than \$100 million. There will be no major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions. There will be no significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

This rule change will not impose a burden under the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 et. seq., since no significant additional record keeping or reporting requirements are placed upon the public. In fact, some paperwork, especially that related to requests for extensions of time, will be reduced.

Amendment of Regulations

For the reasons indicated above and pursuant to the authority given to the Commissioner of Patents and Trademarks by 35 U.S.C. 6, and under Sections 31 and 41 of the Trademark Act of July 5, 1946, 15 U.S.C. §§ 1113, and 1123, Parts 1 and 2 of Title 37, Code of Federal Regulations, are amended as set forth below.

July 14, 1982. GERALD J. MOSSINGHOFF,
Commissioner of Patents
and Trademarks.

* * * * *

[Note: H.R. 6260 became Public Law 97-247 on Aug. 27, 1982. Rules that became effective Oct. 1, 1982 are those rules common to Public Law 96-517 and H.R. 6260 and those set forth in Alternative B. The adopted rules are reproduced in the notice entitled "Revision of Patent and Trademark Fees Confirmation," published at 1022 O.G. 21, which is reprinted immediately following this notice.]

[1021 O.G. 19]

(41)Department of Commerce Patent and Trademark Office 37 CFR Parts 1 and 2 [Docket No. 2714-129]

Revision of Patent and Trademark Fees Confirmation

Agency: Patent and Trademark Office, Commerce.

Action: Confirmation of rules.

Summary: This document confirms certain rule changes for patent and trademark fees and fee-related procedures which take effect on Oct. 1, 1982. These rule changes implement H.R. 6260 which was enacted as Public Law 97-247 on Aug. 27, 1982.

Effective Date: Oct. 1, 1982.

For Further Information Contact: As to the patent rules contact: R. Franklin Burnett, by telephone at (703) 557-3054 or by mail addressed to the Commissioner of Patents and Trademarks, Attention: R. Franklin Burnett, Rm. 3-11A13, Washington, D.C. 20231.

As to the trademark rules contact: Miss Maude Williams, by telephone at (703) 557-2222 or by mail addressed to the Commissioner of Patents and Trademarks, Attention: Miss Maude Williams, Rm. 3-11C17, Washington, D.C. 20231.

Supplementary Information: The Patent and Trademark Office is required by law to publish a notice in the Federal Register of its fees at least 60 days before the effective date thereof (35 U.S.C. 41(g)). Thus, on July 30, 1982 a final rule document was published at 47 FR 33086 setting forth rule changes for patent and trademark fees and procedures which take effect on Oct. 1, 1982. The document was based on the public law in effect at that time, Public Law 96-517, and on H.R. 6260, which was then pending but is now Public Law 97-247. The final rule document published on July 30, 1982, in the Federal Register sets out—

(1) rules that are common to both Pub. L. 96-517 and H.R. 6260 (now Pub. L. 97-247);

(2) Alternative A which contains rule changes implementing Pub. L. 96-517 alone; and

(3) Alternative B which contains rule changes implementing H.R. 6260 (now Pub. L. 97-247).

H.R. 6260 was enacted as Public Law 97-247 on Aug. 27, 1982, and the Patent and Trademark Office hereby confirms that the rule changes common to both Pub. L. 96-517 and H.R. 6260 and Alternative B are those which go into effect on Oct. 1, 1982. The rules under Alternative A are hereby withdrawn. Additional rule changes required by Public Law 97-247 will be made the subject of separate rulemakings.

List of Subjects in 37 CFR Parts 1 and 2

Administrative practice and procedure, Courts, Inventions and patents, Lawyers, Nonprofit organizations, Small businesses, Trademarks.

Amendment of Regulations

For the reasons set out in the preamble, 37 CFR Parts 1 and 2 are confirmed as being amended by the final rule published on July 30, 1982 at 47 FR 33086 as set forth below.

GERALD J. MOSSINGHOFF,
*Commissioner of Patents
and Trademarks.*

Sept. 14, 1982.

1. The rule changes made in Alternative A relating to patents which begin at 47 FR 33107 and in Alternative A relating to trademarks which begin at 47 FR 33112 are hereby withdrawn.
2. Confirmed as effective Oct. 1, 1982 are the rule changes published July 30, 1982 common to Public Law 96-517 and H.R. 6260 (now Public Law 97-247) and Alternatives B. The rule changes relating to patents common to Public Law 96-517 and H.R. 6260 (now Public Law 97-247) were published on July 30, 1982 at 47 FR 33099. The rule changes relating to patents under Alternative B were published at 47 FR 33108. The rule changes relating to trademarks common to Public Law 96-517 and H.R. 6260 (now Public Law 97-247) were published on July 30, 1982 at 47 FR 33111. The rule changes relating to trademarks under Alternative B were published at 47 FR 33112. Corrections to the July 30, 1982 publication were published on Aug. 4 and 5, 1982 at 47 FR 33688 and 33959.

(Text of adopted rules appears in 37 CFR, revised July 1, 1983.)

**Department of Commerce
Patent and Trademark Office
37 CFR Parts 1, 3 and 4
[Docket No. 2827-167]**

Revision of Patent and Trademark Fees

Agency: Patent and Trademark Office, Commerce
Action: Final Rule.

Summary: The Patent and Trademark Office is amending the rules of practice in patent and trademark cases to establish procedures for the payment of fees under § 41 (a) and (b) of Title 35, United States Code, which are reduced by 50 per centum for independent inventors and nonprofit organizations as required by the public law resulting from H.R. 6260. This action is necessary at this time in order that the procedures for paying the reduced fees will be effective on Oct. 1, 1982, the effective date of the changes in the amounts of Patent and Trademark Office fees established by the public law resulting from H.R. 6260. This final rule also deletes Parts 3 and 4 which contain outdated sample forms and corrects a reference to a section which appears in § 1.451.

Effective Date: Oct. 1, 1982.

For Further Information Contact: As to the patent rules contact R. Franklin Burnett by telephone at (703) 557-3054 or by mail addressed to the Commissioner of Patents and Trademarks, Attention: R. Franklin Burnett, Rm. 3-11A13, Washington, D.C. 20231.

As to the trademark rules contact Miss Maude Williams by telephone at (703) 557-2222 or by mail addressed to the Commissioner of Patents and Trademarks, Attention: Miss Maude Williams, Room 3-11C17, Washington, D.C. 20231

Supplementary Information: Notices of proposed rulemaking relating to the revision of patent and trademark fees were

published in the *Federal Register* on June 28, 1982, at 47 FR 28042-28065 and in the *Official Gazette* on June 29, 1982, at 1019 O.G. 57-120. Oral hearings were held on July 9, 1982. Full consideration has been given to all of the letters, statements, and testimony received at the time. A final rule on "Revision of Patent and Trademark Fees" was published on July 30, 1982 at 47 FR 33086-33112 with corrections in the printing thereof being published on Aug. 4, 1982, at 47 FR 33688 and Aug. 5, 1982, at 47 FR 33959. The final rule was also published in the *Official Gazette* on Aug. 10, 1982, at 1021 O.G. 19-94. In view of comments received at the hearings, additional time for comment on the rules covered by this change was given until Aug. 13, 1982. The notice extending the time for comment was published on July 27, 1982 at 47 FR 32458.

This final rule is being adopted as soon as possible after the enactment of the public law resulting from H.R. 6260. The Patent and Trademark Office has determined that the requirement of 5 U.S.C. 553 (d) for publication not less than 30 days before its effective date does not apply to this final rule since it will reduce patent fees for independent inventors and nonprofit organizations.

Objectives of Rule Changes

These rule changes are designed to implement the Patent and Trademark Office fees and procedures which are provided for by the public law resulting from H.R. 6260.

Public Law Resulting From H.R. 6260

The public law resulting from H.R. 6260 provides that funds available under the act "shall be used to reduce by 50 per centum the payment of fees under section 41 (a) and (b) of Title 35, United States Code" by independent inventors, small business concerns, and nonprofit organizations. The public law resulting from H.R. 6260 gives the Commissioner authority to establish regulations defining independent inventors and nonprofit organizations. The public law resulting from H.R. 6260 defines small business concerns by reference to § 3 of the Small Business Act and regulations established by the Small Business Administration. This rulemaking establishes regulations defining independent inventors and nonprofit organizations. The Small Business Administration is establishing the definition of a small business concern for the purpose of paying reduced fees under the public law resulting from H.R. 6260. This rulemaking also establishes the procedures which will be followed by independent inventors and nonprofit organizations when paying the reduced fees. The procedures to be followed by small business concerns when paying the reduced fees will be established in a separate final rule.

Discussion of Specific Sections

The following sections are changed by this final rule, effective Oct. 1, 1982:

Section 1.9, as amended, adds paragraphs (c), (e), and (f) which define "independent inventor" and "nonprofit organizations" as used in Title 37, Code of Federal Regulations, Chapter I. Each of these along with "small business concern" is identified as a "small entity" for purposes of paying fees which are set under § 41 (a) and (b) of Title 35, United States Code, as amended by the public law resulting from H.R. 6260. Paragraph (d) of § 1.9 relates to the definition of small business concern which is being established by the Small Business Administration. Accordingly, proposed paragraph 1.9(d) is not being promulgated at this time.

The public law resulting from H.R. 6260 authorizes the Commissioner to establish regulations defining independent inventors and nonprofit organizations. Section 1.9(c) defines an independent inventor as any inventor who (1) has not assigned, granted, conveyed, or licensed, and (2) is under no obligation under contract or law to assign, grant, convey, or license, any rights in the invention to any person who could not likewise be classified as an independent inventor if that person had made the invention, or to any concern which would not qualify as a small business concern or a nonprofit organization. Once an individual sole inventor, or one of several joint inventors, has assigned, granted, conveyed, or licensed, or comes under an

obligation to assign, grant, convey, or license, any rights to the invention to anyone who could not likewise obtain status as a small entity, the inventor(s) will no longer be entitled to pay fees in the amounts established for an independent inventor (§ 1.9(c)). Section 1.9 (c) will permit an individual inventor to make an assignment, grant, conveyance, or license of partial rights in the invention to another individual or individuals who could qualify as an independent inventor or inventors if they had made the invention. In addition, § 1.9 (c) will permit an individual inventor to make an assignment, grant, conveyance, or license of partial rights in the invention to a small business concern or nonprofit organization. Under the circumstances described in the previous two sentences the individual inventor could still qualify as an independent inventor. However, if the independent inventor assigned, granted, conveyed, or licensed, or came under an obligation to assign, grant, convey, or license, any rights to the invention to any individual or organization which could not qualify as a small entity (§ 1.9 (f)), then the inventor would no longer qualify as an independent inventor.

Proposed section 1.9 (d) relating to the definition of a small business concern is not being promulgated at this time.

Section 1.9(e) defines a nonprofit organization by utilizing and broadening the definition contained in 35 U.S.C. 201 (i). The term "university or other institution of higher education" as used in § 1.9 (e) means an educational institution which (1) admits as regular students only persons having a certificate of graduation from a school providing secondary education, or the recognized equivalent of such a certificate, (2) is legally authorized within the jurisdiction in which it operates to provide a program of education beyond secondary education, (3) provides an educational program for which it awards a bachelor's degree or provides not less than a two-year program which is acceptable for full credit toward such a degree, (4) is a public or other nonprofit institution, and (5) is accredited by a nationally recognized accrediting agency or association. The definition of "university or other institution of higher education" as set forth herein essentially follows the definition of "institution of higher education" contained in 20 U.S.C. 1141(a). Institutions which are strictly research facilities, manufacturing facilities, service organizations, etc., are not intended to be included within the term "other institution of higher education" even though such institutions may perform an educational function or publish the results of their work.

Section 1.9(f) identifies an independent inventor, a small business concern, or a nonprofit organization as a "small entity" for purposes of paying fees set under § 41 (a) and (b) of Title 35, United States Code, as amended by the public law resulting from H.R. 6260. Fees established under § 41 (c) or (d) of Title 35, United States Code, will not be reduced for small entities since such a reduction is not permitted or authorized by the public law resulting from H.R. 6260. Paragraphs (c), (e), and (f) of § 1.9 should be read together with §§ 1.27 and 1.28 which deal with establishing status as a small entity and the effect thereof.

New § 1.27 provides in paragraph (a) that any person seeking to establish as a small entity, as defined in § 1.9(f) for the purpose of paying reduced fees, must file a statement to that small entity. Paragraph 1.27(b) provides specifically for inventors filing statements claiming status as independent inventors. Paragraph 1.27 (c) relating to claiming status as a small business concern is not being promulgated at this time, but will be subject of a separate final rule. Paragraph 1.27 (d) provides for claiming status as a nonprofit organization. Under § 1.27, as long as all of the rights remain in small entities, the fees established for a small entity can be paid. This includes circumstances where the rights were divided between an independent inventor, a small business concern and a nonprofit organization or any combination thereof.

New § 1.28 provides guidance as to the effect of failure to establish, or notify the Office of any change from, small entity status. Paragraph 1.28 (a) provides that once status as a small entity has been established in an application or patent, without the filing of a further verified statement pursuant to § 1.27, unless the Office is notified of a change in status. Under paragraph 1.28(a), status as a small entity in one application or patent does not affect any other application or patent except in applications filed under § 1.60 where a reference is made to a verified statement in a parent application. Paragraph 1.28 (b) requires that notification of any change in status resulting in loss of

entitlement to small entity status be filed in the earliest of the issue fee or any maintenance fee due after the date on which status as a small entity is no longer appropriate. Section 1.28 also provides guidance as to the effect of improperly establishing status as a small entity. The intent of the reduced fees for small entities is to soften the impact of the fee increases under § 41(a) and (b) of Title 35, United States Code, as such sections are amended by the public law resulting from H.R. 6260, upon those who are least able to absorb the increased fees without overall damage to their ability to participate in the patent system through the filing, issuing and maintaining of patents. Accordingly, any attempt to improperly establish status as a small entity will be viewed as a serious matter by the Office and paragraph 1.28(d) indicates that any attempt to fraudulently establish status as a small entity or pay fees as a small entity will be considered as a fraud practiced or attempted on the Office. In addition, improperly and through gross negligence establishing status as a small entity or paying fees as a small entity will be considered as a fraud practiced or attempted on the Office. Normally, the Office will not question a claim to status as a small entity. However, if the Office must resolve such an issue in a question arising before it, the Office will look to the actual or practical status of the individual or organization claiming status as a small entity rather than the professed or apparent status.

Section 1.451, paragraph (b), is amended to correct a reference to another section of the regulations.

Parts 3 and 4 are removed to eliminate all of the patent and trademark forms from the Code of Federal Regulations. The Patent and Trademark Office has prepared a booklet entitled "Patent and Trademark Forms Booklet" which is available for sale to the public from the Superintendent of Documents and which includes full size copies of substantially all the forms in the Code of Federal Regulations in view of the difficulty of keeping such forms is not mandatory.

Discussion of Significant Differences Between Proposed and Final Rules

A number of changes which have been made to §§ 1.9, 1.27 and 1.28 as a result of the comments received and further review of the proposed rulemaking are identified below.

Paragraph (c) of § 1.9 has been changed from that proposed to simplify the definition by removing the words "including (i) the right to make, use, or sell the invention, and (ii) the right to exclude others from making, using, or selling the invention". No change in substance is intended by removing these words since the phrase "any rights in the invention" obviously is inclusive of all rights regardless of how they are, or would be, transferred. The words "or otherwise" have also been removed to simplify the definition without a change in substance.

Paragraph (d) of § 1.9 is not being promulgated by this rule change.

Paragraph (e) of § 1.9 is changed from that proposed by adding the words "located in any country" in item (e) (1) to clarify the fact that a university or other institution of higher education can qualify regardless of location. Paragraph (e) is also changed from that proposed by adding an item (4) to clarify that a nonprofit organization if it could qualify as a nonprofit organization under item (2) or (3) of paragraph (e) "if it were located in this country." Thus, under paragraph (e) of § 1.9 nonprofit organizations will be treated the same for purposes of paying fees regardless of location.

Paragraph (a) of § 1.27 has been changed from that proposed by substituting the words "any fee paid as a small entity". This change is intended to clarify the fact that a verified statement is not required with every fee.

Paragraph (b) of § 1.27 has been changed from that proposed to clarify who is to file the verified statement. The verified statement for a small business concern or nonprofit organization is to be filed by "the owner of the small business concern, or an official of the small business concern or nonprofit organization empowered to act on behalf of the small business concern or nonprofit organization . . ." The term "official" as used in paragraph (b) is intended to include any officer, employee, or part-owner empowered to act on behalf of a small business concern or nonprofit organization. For example, an officer or employee of a corporation empowered to act for the corporation

by its board of directors would be qualified to sign such a verified statement.

Paragraph (c) of § 1.27 relating to claiming status as a small business concern is not being promulgated at this time, but will be the subject of a separate final rule.

Paragraph (d) of § 1.27 has been changed from that proposed in the same manner as paragraph (b) of § 1.27 has also been changed from that proposed by adding a reference to § 1.9 (e)(4).

Paragraph (a) of § 1.28 has been changed from that proposed by adding the words "or patent" in the first and third sentences since the failure to establish status as a small entity could occur in a patent as well as in an application. An exception to the requirement for a verified statement has also been inserted into paragraph (a) of § 1.28 for applications filed under § 1.60 where the status as a small entity has been established in a parent application and is still proper. Under this change in paragraph (a) of proposed § 1.28, the application filed under § 1.60 "must include a reference to a verified statement in a parent application if status as a small entity is still proper and desired."

Paragraph (b) of § 1.28 has been completely rewritten from that proposed to remove the requirement that the notification of a change in status resulting in loss of entitlement to small entity status must be filed prior to paying the next fee due. Instead, paragraph (b) of § 1.28 provides that after establishment of small entity status, "fees as a small entity may thereafter be paid in that application or patent without regard to a change in status until the issue is due or any maintenance fee is due." Paragraph (b) of § 1.28 is also changed from that proposed by removing the sentence stating that payment of any fee as a small entity serves "as a representation that such payment as a small entity is proper at the time the payment is made." This change does not sanction the payment of improper fees, but is no longer necessary in view of another change in paragraph (b) which specifically provides that notification of any change in status resulting in loss of entitlement to small entity status "must be filed in the application or patent prior to paying, or at the time of paying, the earliest of the issue fee or any maintenance fee due after the date on which status as a small entity is no longer appropriate pursuant to § 1.9." The effect of the changes to paragraph (b) of § 1.28 is to permit status to be established and then checked only (1) at the payment of the issue fee and (2) at the time of payment of each maintenance fee. This means that only four checks are required during the pendency and term of a patent after initial establishment of small entity status if such establishment was prior to payment of the issue fee. The last sentence of paragraph (b) has been changed from that proposed by inserting the words "of change in status" after "notification" for clarity.

Paragraph (c) of § 1.28 has been changed from that proposed to require a verified statement explaining how the error in good faith occurred only in situations where the error occurred. This change from paragraph (c) as proposed will reduce paperwork and will provide a three-month grace period to correct errors with no explanations required for correction during that three-month period. The change has also been made to alleviate concerns about paragraph (d) of § 1.28 which is being adopted as proposed.

Response to Comments on the Patent Rules

Specific comments were received on a number of the sections. All of the comments, including the oral testimony and the written comments, were considered in adopting the changes set forth herein.

Written comments on the patent rules and forms affected by this final rule were received from three patent law groups and thirteen individuals. The three patent law groups were (1) the American Patent Law Association; (2) the Patent, Trademark, and Copyright Section of the Virginia State Bar; and (3) the Patent, Trademark and Copyright Law Section of the Bar Association of the District of Columbia.

Oral comments were presented at the hearing on behalf of two patent law groups.

The comments appear below along with replies thereto.

Comment:

One comment suggested that the definition of "independent inventor" be simplified.

Reply:

The definition of "independent inventor" has been simplified without a change in substance by removing the words "including (i) the right to make, use, or sell the invention, and (ii) the right to exclude others from making, using, or selling the invention."

Comment:

One comment suggested that there is no need to include any more than a simplified statement that a "non-profit organization includes a university or other institution of higher education"

Reply:

The suggestion has not been adopted since it is the intent of the rules to delineate as clearly as possible what organizations can qualify as nonprofit organizations without having to expend undue resources deciding each request on a case-by-case basis.

Comment:

One comment suggested that § 1.9(e) discriminates against foreigners and thus violates the principle of national equality set forth in the Stockholm text of the Paris Convention for the Protection of Industrial Property.

Reply:

Section 1.9(e), as promulgated, defines a nonprofit organization in such a way that it is clear that foreigners are not excluded.

Comment:

One comment questioned whether or not government organizations can qualify as nonprofit organizations and more specifically, whether or not a government research facility can qualify under the broad definition of a nonprofit scientific or educational organization. Another comment recommended that § 1.9(e) be expanded to include the U.S. Government in the definition of a "nonprofit organization."

Reply:

Government organizations as such, whether domestic or foreign, cannot qualify as nonprofit organizations as defined in § 1.9(e). Section 1.9(e) was based upon 35 U.S.C. 201(i), as established by Public Law 96-517. The limitation to "an organization of the type described in section 501(c)(3) of the Internal Revenue Code of 1954 (26 U.S.C. 501(c)(3)) and exempt from taxation under section 501(a) of the Internal Revenue Code (26 U.S.C. 501(a))" would by its nature exclude the U.S. government and its agencies and facilities, including research facilities and government corporations. State and foreign governments and governmental agencies and facilities would be similarly excluded. Section 1.9(e) is not intended to include within the definition of a nonprofit organization government organizations of any kind located in any country. A university or other institution of higher education located in any country would qualify, however, as a "nonprofit organization" under § 1.9(e) even though it has some government affiliation since such institutions are specifically included.

Comment:

One comment was directed to, and opposed, Public Law 96-517 and H.R. 6260 rather than the specific provisions of §§ 1.9, 1.27 and 1.28 on the ground that the concept of a self-supporting agency is ill-conceived, shortsighted and wrong.

Reply:

Public Law 96-517 and H.R. 6260 are not issues for consideration in this rule change.

Comment:

One comment asserted that the imposition of different fees depending upon the status of an applicant is unwise, unworkable, and will not "improve the efficiency of the Patent Office", while another comment urged the Office to "disavow the proposal for a two-tier fee system and adopt a different approach to assuring that patent and trademark fees are set so that individual inventors and small businesses can continue to obtain the protection of the patent and trademark system." Another comment supported the two-tier fee system, particularly as related to universities.

Reply:

The imposition of different fees is a legislative mandate imposed by the public law resulting from H.R. 6260 and is not an issue for consideration in this rule change.

Comment:

Four comments expressed concern that small entity status is required to be confirmed each time a fee as a small entity is paid. Alternative procedures which involve (1) confirming status at the time of filing and at the time the issue fee is paid, or (2) allowing a statement of status to hold for a period of time were recommended.

Reply:

The last sentence in § 1.27(a) states that "[s]uch a verified statement need only be filed once in an application or patent and remains in effect until changed." It was not intended that such statements would be required each time a fee is paid. In order to clarify § 1.27(a), the first sentence has been changed to require the statement prior to or with the first fee paid as a small entity. Thereafter, notice is only required where a change in status occurs. In addition, § 1.28(b) has been rewritten to provide that "[o]nce status as a small entity has been established in an application or patent, fees as a small entity may thereafter be paid in that application or patent without regard to a change in status until the issue fee is due or any maintenance fee is due."

Comment:

One comment suggested that a paragraph 1.27(e) be added which would require confirmation of small entity status at the time of paying the patent issue fee and each maintenance fee and that this be done by a statement which designates the applicant's small entity status as of the close of the last fiscal year next preceding the date of the statement.

Reply:

The suggested paragraph has not been added. However, paragraph (b) of § 1.29 has been completely rewritten to permit status to be established and then checked only (1) at the payment of the issue fee and (2) at the time of payment of each maintenance fee. Instead of requiring papers to be filed confirming status as suggested in the comment, the rules as adopted require that "[n]otification of any change in status resulting in loss of entitlement to small entity status must be filed in the application or patent prior to paying, or at the time of paying, the earliest of the issue fee or any maintenance fee due after the date on which status as a small entity is no longer appropriate pursuant to § 1.9." Paragraph (b) of § 1.28, as promulgated, is considered preferable to the suggested paragraph (e) of § 1.27 since it will eliminate the filing of a confirming statement where there has been no change in status as a small entity. This reduces unnecessary paperwork.

Comment:

One comment suggested that verified statements of small entity status need not be filed in Rule 60 applications.

Reply:

The suggestion was adopted and is reflected by the change in § 1.28(a). In such applications, it will be sufficient to include a reference to a verified statement establishing small entity status in a parent application if status as a small entity is still proper and desired.

Comment:

One comment suggested that proposed paragraph 1.28(b) be amended by inserting the words "believed to be" after "small entity is" in the second sentence.

Reply:

Paragraph (b) of § 1.28 as promulgated does not contain the sentence to which the suggestion is directed.

Comment:

One comment suggested that paragraph (c) of § 1.28 be amended by deleting the word "verified" so that a statement explaining how an error in good faith occurred can be made "on the basis of information and belief."

Reply:

The suggestion has not been adopted. However, paragraph (c) of § 1.28 as promulgated permits the correction of errors without a verified statement if the correction is accomplished within three months after the date the error occurred.

Comment:

Three comments expressed concern about the provision dealing with fraud on the Patent and Trademark Office because of some questionable act in connection with paying fees as a small entity and indicated that some persons have raised a question as to the Office's authority to designate the payment of a lesser fee as fraud. The comments suggested that proposed § 1.28 be withdrawn and turned over to an ad hoc group of Patent and Trademark Office officials and practitioners for immediate examination and timely comment.

Reply:

The period for comments was extended until Aug. 13, 1982, as an alternative to, and in response to, the suggestion that § 1.28 be withdrawn and turned over to an ad hoc committee. The extended period for comments has now expired and all com-

ments which have been received have been carefully considered. In response to the statement that some persons have raised a question regarding the Office's authority to designate payment of a lesser fee as fraud, no authority has been cited which would establish or suggest that the Office does not have the authority to adopt this section. Paragraph (d) of § 1.28 has been strictly limited to those situations in which there is an attempt to fraudulently establish entity, or improperly and through gross negligence establish status or pay fees as a small entity. Paragraph (d) of § 1.28 is clearly within the rule-making authority provided to the Commissioner pursuant to 35 U.S.C. 6 to protect the integrity of the system established by the public law resulting from H.R. 6260, whereby fees are reduced for small entities. In order to alleviate the concerns expressed about paragraph (d) of § 1.28, paragraph (c) of § 1.28 has been changed from that proposed to require a verified statement explaining how the error in good faith occurred only in situations where the error is not corrected within three months of the date on which the error occurred. This three-month grace period to correct errors with no explanations required for correction during that three-month period should reduce the concern about paragraph (d) of § 1.28.

Comment:

One comment by an attorney (1) objected to and requested removal of the second sentence of § 1.28(d) because he has to rely on the information provided by the client and does not have the facilities to check the reliability of information the client provides relating to the client's status as a small entity, and (2) raised the question as to how much investigation any attorney or other individual must make in order to avoid being guilty of "gross negligence" under § 1.28(d).

Reply:

The rules do not authorize an attorney to sign a verified statement establishing status as a small entity on behalf of a client. The client has to sign the verified statement. Paragraph (b) of § 1.27 requires that any verified statement filed on behalf of an independent inventor must be signed by the independent inventor except as provided in §§ 1.42, 1.43, or 1.47. Paragraph (d) of § 1.27 requires that any verified statement filed on behalf of a nonprofit organization must be signed by an official of the nonprofit organization empowered to act on behalf of the organization. The intent of paragraphs (b) and (d) of § 1.27 is that the verified statement be signed by the person in the best position to know the facts as to whether or not status as a small entity can be properly established. Insofar as the attorney's irresponsibilities and duty to investigate are concerned, these do not differ from those presently owed the Office under §§ 1.56, 1.346, and 1.555.

Comment:

One comment suggested that paragraph (d) of § 1.28 be replaced by a provision under which a "stiff fine" would be assessed against "a wrongdoer who has not paid fees in good faith."

Reply:

The suggestion has not been adopted. Assessing a fine as the only penalty against "a wrongdoer who has not paid fees in good faith" might tend to encourage the payment of incorrect fees on the theory that it is unlikely that such a matter would be brought to the attention of the Office.

Comment:

Three comments opposed the proposed deletion of Part 3 for the reasons that (1) it is useful to have an up-to-date set of forms and (2) there does not seem to be a pressing need to delete the forms.

Reply:

The Patent and Trademark Office has prepared a booklet entitled "Patent and Trademark Forms Booklet" which includes full size copies of substantially all of the forms in Part 3. Since the forms currently in Part 3 are not "up-to-date" as was suggested in the comment, no present need is seen to maintain Part 3.

Response to Comments on the Trademark Rules

Specific comments were received on the proposed deletions of Part 4. All of the comments included in the written submissions and the oral testimony were considered.

Written comments were received from four individuals. Oral comments restating previously submitted written comments on

Part 4 were presented by one individual on behalf of his law firm.

These comments appear below along with replies thereto.

Comment:

One comment stated that there are rules in Part 4 which are not set forth elsewhere. Such guidelines and information include, among others, the types of commerce on which an application may be based and a requirement for the use of bond paper for typed drawings.

Reply:

Part 4 does not really carry the effect of rules because the forms are not mandatory, but are merely illustrative. The information referred to by this individual can be found elsewhere, such as in the Trademark Manual of Examining Procedure. Furthermore, despite the fact that the forms do not carry the force of rules, any correction or modification to them requires the cumbersome and time-consuming processes that are associated with a rules change.

Comment:

Several comments reflected the opinion that some attorneys, particularly those who do not specialize in trademark matters, may rely on the forms that appear in Part 4. It was believed that these individuals may not have or be aware of the compilation of forms identified as the "Patent and Trademark Office Forms Booklet." In the absence of such forms in Part 4, these individuals may devise their own application formats. Such a practice would result in increased informalities which, in turn, would result in unnecessary correspondence and delayed prosecution. In addition, the commenters believed that the number of written and oral inquiries to the Office of the Director of the Trademark Examining Operation would increase dramatically.

Reply:

The Office of the Director of the Trademark Examining Operation currently has a general information telephone line to answer inquiries and to accept requests for trademark application forms and related literature. While the Office of the Director indicates the availability of the forms booklet to many callers, copies of the appropriate trademark application form are sent to those individuals who request them. It is more likely that an individual who is unaware of the trademark application form would call the Office of the Director to request an application form than create one for the particular purpose.

Comment:

One individual, aware of the Office's plans for automation of the trademark program, saw the present deletion of the forms to be inappropriate. This individual felt that the deletion of the forms at this point would signal to the user community that the Office no longer had any interest in receiving applications in any particular format. To take such a position within a year or two of the introduction of a rigidly standardized application format was, in the opinion of this commenter, unwise. The adoption of a machine-readable application form would require greater, rather than diminished, reliance on a prescribed format.

Reply:

Within the next year or two, the Office will begin experimenting with the use of optical character recognition (OCR) equipment to automate the current data capture processes. Trademark application formats that are compatible with this equipment are likely to require special sizing and printing and, as such, are not acceptable for reduced size printing in the Code of Federal Regulations. If the existing forms were to be maintained in Part 4, they would remain available for use by applicants. As a result, the implementation of the new standardized application formats would be made more difficult.

Comment:

One commenter believed that since the next reprinting of Volume 37 of the Code of Federal Regulations will be in July, 1983, there is no pressing need to eliminate Part 4 at this time. This individual felt that users of the trademark registration system should be given additional opportunity to consider the significance of removing Part 4.

Reply:

Only four comments have been received on the deletion of Part 4. The elimination of Part 4 at this time will guarantee that the forms do not appear in the 1983 reprinting of the CFR. Of course, they will appear in the 1982 version of the CFR booklet and will be available until the new edition is published. In this matter, future access to these forms will be limited and those

requiring help may contact the Office and receive the proper trademark forms.

Implementation of §§1.9, 1.27, and 1.28

Status as a small entity can be established in any application or patent for which a fee is due on or after Oct. 1, 1982, and in which small entity status is available and desired.

Other Considerations Relating to Patent and Trademark Fee Revisions

Environmental, energy, and other considerations: The rule change will not have a significant impact on the quality of the human environment or the conservation of energy resources.

This rule change is in conformity with the requirements of the Regulatory Flexibility Act (Public Law 96-354), Executive Order 12291, and the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 *et. seq.*).

The rule change will not have a significant adverse economic impact on a substantial number of small entities (Regulatory Flexibility Act, Pub. L. 96-354) for several reasons. The public law resulting from H.R. 6260 has taken into consideration the impact the increase in fees may have on small entities. Under the public law resulting from H.R. 6260 and this rulemaking, small entities will be able to pay reduced fees for filing patent applications and for the issuance and maintenance in force of patents. In general, the rule change will also expedite proceedings before the Patent and Trademark Office, changing existing procedures where they can be simplified.

The Patent and Trademark Office has determined that this rule change is not a major rule under Executive Order 12291. The annual effect on the economy will be less than \$100 million. There will be no major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions. There will be no significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

This rule change will not impose a burden under the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 *et. seq.*, since no significant additional record keeping or reporting requirements are placed upon the public.

GERALD J. MOSSINGHOFF,

Aug. 26, 1982. *Commissioner of Patents and Trademarks.*

[1022 OG 29]

(43)

Department of Commerce Patent and Trademark Office 37 CFR Part 1 [Docket No. 2909-187]

Revision of Patent and Trademark Fees

Agency: Patent and Trademark Office, Commerce

Action: Final rule.

Summary: The Patent and Trademark Office is amending the rules of practice in patent and trademark cases to establish a definition and procedures for the payment of fees under section 41(a) and (b) of Title 35, United States Code, by small business concerns as required by Pub. L. 97-247. This action adopts the definition of a "small business concern" for purposes of paying patent fees established by the Small Business Administration and is necessary at this time in order that the procedures for paying reduced fees will be effective on Oct. 1, 1982, the effective date of the changes in the amounts of Patent and Trademark Office fees established by Pub. L. 97-247.

Effective Date: Oct. 1, 1982

For Further Information Contact: R. Franklin Burnett by telephone at (703) 557-3054 or by mail addressed to the Commissioner of Patents and Trademarks, Attention: R. Franklin Burnett, Room 3-11A13, Washington, D.C. 20231.

Supplementary Information: A notice of proposed rulemaking was published in the Federal Register on June 28, 1982, at 47 FR 28042-28063 and in the *Official Gazette* on June 29, 1982, at 1019 O.G. 57-120. Oral hearings were held on July 9, 1982. Full consideration has been given to all of the letters, statements, and testimony received at the time. A final rule on "Revision of Patent and Trademark Fees" was published on July 30, 1982 at 47 FR 33086-33112 with corrections in the printing thereof being published on Aug. 4, 1982, at 47 FR 33688 and on Aug. 5, 1982 at 47 FR 33959. The final rule was also published in the *Official Gazette* on Aug. 10, 1982, at 1021 O.G. 19-94. In view of comments received at the hearings, additional time for comment on certain rules, including those covered by this change, was given until Aug. 13, 1982. The notice extending the time for comment was published on July 27, 1982 at 47 FR 32458. A final rule relating to definitions of "independent inventor" and "nonprofit organizations" was published on Sept. 10, 1982 at 47 FR 40134-40140.

Objectives of Rule Changes

These rule changes are designed to implement the Patent and Trademark Office fees and procedures which are provided for by Pub. L. 97-247.

Public Law 97-247

Pub. L. 97-247, signed Aug. 27, 1982, provides that funds available under the act "shall be used to reduce by 50 per centum the payment of fees under section 41(a) and (b) of title 35, United States Code" by independent inventors, small business concerns, and nonprofit organizations. The Commissioner has established regulations defining independent inventors and nonprofit organizations. Pub. L. 97-247 defines small business concerns by reference to Section 3 of the Small Business Act and regulations established by the Small Business Administration. The Small Business Administration has now established the definition of a small business concern for the purpose of paying reduced fees under Pub. L. 97-247. That definition is hereby incorporated into the patent rules of practice in § 1.9(d). This rulemaking also establishes the procedures which will be followed by small business concerns when paying the reduced fees.

Discussion of Specific Sections

The following sections are changed by this final rule, effective Oct. 1, 1982:

Section 1.9, as amended, adds paragraph (d) which defines small business concern as used in Title 37, Code of Federal Regulations, Chapter I. A small business concern is identified as a "small entity" for purposes of paying fees which are set under section 41(a) and (b) of Title 35, United States Code, as amended by Pub. L. 97-247.

Section 1.9(d) defines a small business concern by reference to and incorporation of § 121.3-18 of Title 13, Code of Federal Regulations. A small business concern is defined therein as any business concern (1) whose number of employees, including those of its affiliates, does not exceed 500 persons and (2) which has not assigned, granted, conveyed, or licensed, and is under no obligation under contract or law to assign, grant, convey, or license, any rights in the invention to any person who could not be classified as an independent inventor if that person had made the invention, or to any concern which would not qualify as a small business concern or a nonprofit organization under this section. The section further defines affiliates of concerns and defines also the terms "employees" and "number of employees." Concerns are affiliates of each other when either, directly or indirectly, one concern controls or has the power to control the other, or a third party or parties controls or has the power to control both. The number of employees a business concern has is determined by counting the number of persons of the concern and its affiliates employed on a full-time, part-

time or temporary basis during the previous fiscal year of the concern and of its affiliates. The number of employees is the average over the fiscal year of the persons employed during each of the pay periods of the fiscal year. Business concerns located in any country which meet the small business definition and which comply with the applicable procedures can qualify as a "small business concern". Under the definition, a small business concern would no longer qualify as a small business concern if any rights were assigned to any individual or concern which could not qualify as a small entity pursuant to § 1.9(f), or if the concern came under an obligation to assign any rights to any individual or concern which could not qualify as a small entity.

Section 1.9(d) also incorporates paragraph (b) of 13 CFR 121.3-18 which provides for appeals to the Small Business Administration from Patent and Trademark Office adverse initial size determinations.

Paragraph 1.27(c) provides for claiming status as a small business concern. Any person seeking to establish status as a small entity, for the purpose of paying reduced fees, must file a statement to that effect prior to or with the payment of the first fee paid as a small entity. Under § 1.27, as long as all of the rights remain in small entities, the fees established for a small entity can be paid. This includes circumstances where the rights were divided between an independent inventor, a small business concern and a nonprofit organization or any combination thereof.

A number of changes which have been made to §§ 1.9 and 1.27 as a result of the comments received and further review of the proposed rulemaking are identified below.

Paragraph (d) of § 1.9 has been changed from that proposed so as to incorporate into § 1.9(d), the definition established by the Small Business Administration in § 121.3-18 of Title 13, Code of Federal Regulations. The definition differs from that proposed in specifying the number of employees constituting a small business concern and specifying that the concern must be one which has not assigned, granted, conveyed, or licensed, and is under no obligation under contract or law to assign, grant, convey or license any rights in the invention to any person or concern which could not be classified as an independent inventor, small business concern, or nonprofit organization.

Paragraph (c) of § 1.27 has been changed from that proposed to clarify who is to file the verified statement. The verified statement for a small business concern is to be signed by "the owner or an official of the small business concern empowered to act on behalf of the concern." The term "official" as used in paragraph (c) is intended to include any officer, employee, or part-owner empowered to act on behalf of a small business concern. For example, an officer or employee of a corporation empowered to act for the corporation by its board of directors would be qualified to sign such a verified statement.

Response to Comments on the Patent Rules

Specific comments were received on a number of the sections. All of the comments, including the oral testimony and the written comments, were considered in adopting the changes set forth herein.

Written comments on the rules affected by this final rule were received from three patent law groups and a number of individuals. The three patent law groups were (1) the American Patent Law Association; (2) the Patent, Trademark, and Copyright Section of the Virginia State Bar; and (3) the Patent, Trademark and Copyright Law Section of the Bar Association of the District of Columbia.

Oral comments were presented at the hearing on behalf of two patent law groups.

The comments appear below along with replies thereto.

Comment:

Two comments urged that in view of the "exceedingly complex" definitions of a "small business" in 13 CFR 121.3, the patent system and those associated with it would be best served by setting forth clear guidelines as to whether or not a business qualifies as a small business without reference to the Small Business Act and without incorporation by reference of "the too many pages of SBA regulatory definition."

Reply:

Pub. L. 97-247 specifically refers to section 3 of the Small Business Act and regulations established by the Small Business Administration for determining whether or not a business con-

cern qualifies as a small business concern. Pub. L. 97-247 therefore does not permit the establishment of guidelines without reference to the Small Business Act and regulations established by the Small Business Administration. Section 1.9(d), however, does incorporate the definition as established in § 121.3-18 of Title 13, Code of Federal Regulations. This will enable persons to utilize § 1.9(d) without also referring to a copy of Title 13, CFR.

Comment:

One comment argued that § 1.27 should be corrected or clarified to indicate that a small business concern would be entitled to the 50 percent fee reduction even though it may grant a non-exclusive or even an exclusive license to some non-small entity.

Reply:

The suggestion has not been adopted. Section 1.27 requires that the concern qualify as a small business concern as defined in § 1.9(d). Section 1.9(d) defines a small business concern by incorporating 13 CFR 121.3-18, which in turn defines a small business concern as one not exceeding a particular size which has not assigned, granted, conveyed, or licensed, and is under no obligation under contract or law to assign, grant, convey or license, any rights in the invention to any person who could not be classified as an independent inventor if that person had made the invention, or to any concern which would not qualify as a small business concern or a nonprofit organization under this section." The intent of both 13 CFR 121.3-18 and 37 CFR 1.9(d) and 1.27(c) is to limit the payment of reduced fees under section 41 (a) and (b) of Title 35, United States Code, to those situations in which all of the rights in the invention are owned by small entities, i.e., independent inventors, small business concerns, or nonprofit organizations. To do otherwise would be clearly contrary to the intended purpose of the legislation which contains no indication that fees are to be reduced in circumstances where rights are owned by non-small entities. Adopting the suggestion might, for example, permit a non-small entity to transfer patent rights to a small business concern which would pay the reduced fees and grant an exclusive license to the non-small entity.

Comment:

One comment suggested that the specific Small Business Administration regulations which are applicable be specified in § 1.9(d).

Reply:

The definition of a small business concern as established by the Small Business Administration is now incorporated into § 1.9(d).

Implementation of §§ 1.9 and 1.27

Status as a small entity can be established in any application or patent for which a fee is due on or after Oct. 1, 1982, and in which the individual inventor, small business concern, or nonprofit organization meets the qualifications established for small entity status.

Other Considerations Relating to Patent and Trademark Fee Revisions

Environmental, energy, and other considerations: The rule change will not have a significant impact on the quality of the human environment or the conservation of energy resources.

This rule change is in conformity with the requirements of the Regulatory Flexibility Act (Pub. L. 96-354), Executive Order 12291, and the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 *et seq.*).

The rule change will not have a significant adverse economic impact on a substantial number of small entities (Regulatory Flexibility Act, Pub. L. 96-354) for several reasons. Pub. L. 97-247 has taken into consideration the impact the increase in fees may have on small entities. Under Pub. L. 97-247 and this rulemaking, small entities will be able to pay reduced fees for filing patent applications and for the issuance and maintenance in force of patents.

The Patent and Trademark Office has determined that this rule change is not a major rule under Executive Order 12291. The annual effect on the economy will be less than \$100 million. There will be no major increase in costs or prices for consumers,

individual industries, Federal, State, or local government agencies, or geographic regions. There will be no significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

This rule change will not impose a burden under the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 *et seq.*, since no significant additional record keeping or reporting requirements are placed upon the public.

List of Subjects in 37 CFR Part 1

Administrative practice and procedure, Inventions and patents, Small businesses.

Amendment of Regulations

For the reasons indicated above and pursuant to the authority given to the Commissioner of Patents and Trademarks by 35 U.S.C. 6, and Pub. L. 97-247, Part 1 of Title 37, Code of Federal Regulations, is amended as set forth below.

PART 1—RULES OF PRACTICE IN PATENT CASES

1. Section 1.9 is amended by adding a new paragraph (d) to read as follows:

§ 1.9 Definitions.

* * * * *

(d) A small business concern as used in this chapter means any business concern as defined by the Small Business Administration in 13 CFR 121.3-18, published on September 30, 1982 at 47 FR 43273. For the convenience of the users of these regulations, that definition states:

§ 121.3-18 Definition of small business for paying reduced patent fees under Title 35, U.S. Code

(a) Pursuant to Pub. L. 97-247, a small business concern for purposes of paying reduced fees under 35 U.S. Code 41 (a) and (b) to the Patent and Trademark Office means any business concern (1) whose number of employees, including those of its affiliates, does not exceed 500 persons and (2) which has not assigned, granted, conveyed, or licensed, and is under no obligation under contract or law to assign, grant, convey or license, any rights in the invention to any person who could not be classified as an independent inventor if that person had made the invention, or to any concern which would not qualify as a small business concern or a nonprofit organization under this section. For the purpose of this section concerns are affiliates of each other when either, directly or indirectly, one concern controls or has the power to control the other, or a third party or parties controls or has the power to control both. The number of employees of the business concern is the average over the fiscal year of the persons employed during each of the pay periods of the fiscal year. Employees are those persons employed on a full-time, part-time or temporary basis during the previous fiscal year of the concern.

(b) If the Patent and Trademark Office determines that a concern is not eligible as a small business concern within this section, the concern shall have a right to appeal that determination to the Small Business Administration. The Patent and Trademark Office shall transmit its written decision and the pertinent size determination file to the SBA in the event of such adverse determination and size appeal. Such appeals by concerns should be submitted to the SBA at 1441 L Street, NW., Washington, D.C. 20416 (Attention: SBA Office of General Counsel). The appeal should state the basis upon which it is claimed that the Patent and Trademark Office initial size determination on the concern was in error; and the facts and arguments supporting the concern's claimed status as a small business concern under this section.

2. Section 1.27 is amended by adding a new paragraph (c) to read as follows:

§ 1.27 Statement of status as small entity.

* * * * *

(c) Any verified statement filed pursuant to paragraph (a) of this section on behalf of a small business concern must (1) be signed by the owner or an official of the small business concern empowered to act on behalf of the concern; (2) aver that the concern qualifies as a small business concern as defined in {g49 1.9(d); and (3) aver that exclusive rights to the invention have been conveyed to and remain with the small business concern, or if the rights are not exclusive, that all other rights belong to small entities as defined in § 1.9. Where the rights of the small business concern as a small entity are not exclusive, a verified statement must also be filed by the other small entities having rights averring to their status as such.

GERALD J. MOSSINGHOFF,
*Commissioner of Patents
and Trademarks.*

BILLING CODE 3610-16- M

SMALL BUSINESS ADMINISTRATION
13 CFR Part 121

**Definition of Small Business for Paying Reduced Patent Fees
Under Title 35, United States Code**

Agency: Small Business Administration.

Action: Final rule.

Summary: The Small Business Administration in conjunction with the Patent and Trademark Office is establishing a definition of small business for the purpose of paying patent fees under section 41 (a) and (b) of Title 35, United States Code, which are reduced by 50 per centum for small business concerns as required by Pub. L. 97-247. The definition would be implemented by the Patent and Trademark Office, which has recently published its regulations on the fee reduction procedures (47 FR 40134, Sept. 10, 1982).

Effective Date: Oct. 1, 1982.

For Further Information Contact: R. Franklin Burnett (703) 557-3054. Harvey Bronstein (202) 653-6373.

Supplementary Information: Pub. L. 97-247 provides that funds available under the Act to the Patent and Trademark Office "shall be used to reduce by 50 per centum the payment of fees under Section 41 (a) and (b) of Title 35, United States Code, by small business concerns as defined in Section 3 of the Small Business Act and by regulations established by the Small Business Administration."

A notice of proposed rulemaking relating to the definition of a small business was published in the *Federal Register* on Aug. 31, 1982 (47 FR 38331). The regulation being issued is the same as that which was proposed. In order to be a small business, the number of employees of the concern, including those of its affiliates, may not exceed 500 persons. Concerns are affiliates of each other when either, directly or indirectly, one concern controls or has the power to control the other, or a third party or parties controls or has the power to control both. The number of employees of a business concern is determined by counting the number of persons of the concern and its affiliates employed on a full-time, part-time or temporary basis during the previous fiscal year of the concern and of its affiliates. The number of employees is the average over the fiscal year of the persons employed during each of the pay periods of the fiscal year.

The definition also requires a small business for this purpose to be one which has not assigned, granted, conveyed, or licensed, and is under no obligation under contract or law to assign, grant, convey, or license, any rights in the invention to any person who could not be classified as an independent inventor if that person had made the invention, or to any concern which would not qualify as a small business concern or a nonprofit organization under this section."

Discussion of Comments

One comment from the American Patent Law Association, whose membership includes several thousand lawyers involved

in the practice of law before the U.S. Patent and Trademark Office, expressed "no comment regarding the definition" and expressed "[t]hanks for all that's been done toward a hopefully workable definition." The remaining comments were from individual patent attorneys rather than comments on behalf of any organization.

Two comments raised questions about the intended scope of the term "license." It was suggested that clarification is needed as to what is included within the scope of the term. One comment suggested that, "[a]t the very least, the record should reflect that the definition is not intended to reach implied licenses to use and resell patented articles purchased from a small business." The comment is correct insofar as it suggests that such "implied licenses" are not intended to be included within the scope of the term. Likewise, an order by the applicant to a firm to build a proto-type machine or product for the applicant's own use is not considered to constitute a license for purposes of the definition.

Another suggestion was that the regulation be reworded to deny small business status where revenue above a certain dollar amount was received from licensing rights under the invention to a concern which could not qualify as a small entity. It was also suggested that the term "exclusive license of any of the rights in the invention" be used instead of the term "license." The latter two suggestions have not been adopted. Adoption of these suggestions would cause the regulation to become more complicated, and does not appear necessary to aid small concerns in accord with the purposes of the legislation. In addition, it could substantially broaden the number of concerns which could qualify with a resulting excessive loss of revenue to the Patent and Trademark Office. It is not seen likely that the restriction on licensing would unduly or adversely affect the ability of the small business concern to participate in the patent system.

Another comment which was made related to a firm which is a subsidiary of a university or other nonprofit organization. The suggestion was made that the number of employees of the university or other nonprofit affiliate be excluded from consideration in determining whether or not the business concern qualifies as a small business concern. The suggestion has not been adopted since the situation raised is already treated under the definition of nonprofit organization established by the Patent and Trademark Office on Sept. 10, 1982, at 47 FR 40134-40140. Under that Patent and Trademark Office regulation, a wholly owned subsidiary of a nonprofit or university is considered a part of the university or nonprofit and thus is already eligible for the fee reduction.

One comment suggested that the regulation contain language specifying that concerns meeting its requirements are also independently owned and operated and not dominant in their field of operation under the Small Business Act. It is not necessary to include this language since this regulation already contains an affiliation test for this purpose; and it is generally unlikely that a small concern would be found to be dominant. The legislative history of the Small Business Act indicates that "The mere fact that a small business makes a particular product or item and is dominant in its field with respect to the particular product or item is not intended to disqualify it from the benefits of this Act * * * (House Report 494, 83rd Congress, 1st Session 1953). SBA Size Appeals Board precedents have consistently stated that dominance under the Act and the SBA regulations is not viewed in narrow industry subdivisions. It, therefore, does not appear that concerns defined as small business under this provision would be dominant within the meaning of the Small Business Act.

Another comment suggested that foreign concerns should not be eligible as small business under this provision. Since this patent legislation was enacted by the Congress with knowledge of the Paris Convention for the Protection of Industrial Property, there is no indication that Congress intended that foreign small business not be eligible for the fee reduction. It is the view of the Patent and Trademark Office that excluding foreign small concerns would violate U.S. treaties in the patent area.

This comment also questioned whether the Patent and Trademark Office should make initial size determinations, or whether they could more appropriately be made by SBA. Since the fee reduction procedure is part of the patent application and of other Patent and Trademark Office actions and may involve Patent law questions, it would be administratively infeasible to have

initial size determinations made by the SBA. The Patent and Trademark Office recently issued regulations (Sept. 10, 1982, 47 FR 40134) which set forth the fee reduction procedures.

Other Considerations Relating to the Rulemaking

Environmental, energy, and other considerations: The rule will not have a significant impact on the quality of the human environment or the conservation of energy resources.

Small business concerns will be benefited by the rule. The proposed rule will not have a significant economic impact on a substantial number of small entities (Regulatory Flexibility Act, Pub. L. 96-354). Public Law 97-247 has taken into consideration the impact it may have on small entities and has reduced the fees, therefore, by 50 per centum.

The Small Business Administration has determined that this rule is not a major rule under Executive Order 12291. The annual effect on the economy will be less than \$100 million. There will be no major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions. There will be no significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

This rule will not impose a burden under the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 et seq., since no significant additional record keeping or reporting requirements are placed upon the public.

List of Subjects in 13 CFR Part 121

Small businesses, Inventions and patents.

PART 121—SMALL BUSINESS SIZE STANDARDS

Accordingly, pursuant to Section 3 of the Small Business Act and Pub. L. 97-247, Part 121 of Title 13 of the Code of Federal Regulations is amended by adding § 121.3-18 to read as follows:

§ 121.3-18 *Definition of small business for paying reduced patent fees under Title 35, U.S. Code.*

(a) Pursuant to Pub. L. 97-247, a small business concern for purposes of paying reduced fees under 35 U.S. Code 41 (a) and (b) to the Patent and Trademark Office means any business concern (1) whose number of employees, including those of its affiliates, does not exceed 500 persons and (2) which has not assigned, granted, conveyed, or licensed, and is under no obligation under contract or law to assign, grant, convey or license, any rights in the invention to any person who could not be classified as an independent inventor if that person had made the invention, or to any concern which would not qualify as a small business concern or a nonprofit organization under this section. For the purpose of this section concerns are affiliates of each other when either, directly or indirectly, one concern controls or has the power to control the other, or a third party or parties controls or has the power to control both. The number of employees of the business concern is the average over the fiscal year of the persons employed during each of the pay periods of the fiscal year. Employees are those persons employed on a full-time, part-time or temporary basis during the previous fiscal year of the concern.

(b) If the Patent and Trademark Office determines that a concern is not eligible as a small business concern within this section, the concern shall have a right to appeal that determination to the Small Business Administration. The Patent and Trademark Office shall transmit its written decision and the pertinent size determination file to the SBA in the event of such adverse determination and size appeal. Such appeals by concerns should be submitted to the SBA at 1441 L Street, NW., Washington, D.C. 20416 (Attention: SBA Office of General Counsel). The appeal should state the basis upon which it is claimed that the Patent and Trademark Office initial size determination on the concern was in error and the facts and

arguments supporting the concern's claimed status as a small business concern under this section.

Sept. 23, 1982. ROBERT B. WEBBER,
Acting Administrator.

Department of Commerce Patent and Trademark Office 37 CFR Part 1 [Docket No. 31-201-229]

Revision of Patent Practice

Agency: Patent and Trademark Office, Commerce

Action: Final Rule.

Summary: The Patent and Trademark Office is amending the rules of practice in patent cases, Part 1 of 37 CFR, to clarify the practice under certain sections of Public Law 97-247 of 1982 and to make certain other changes and clarifications in practice which have been found desirable after some experience. The rulemaking changes the practice under §§ 1.27 and 1.28 with regard to subsequently establishing small entity status and qualifying for a refund of fees paid in full. The changes in other rules clarify and improve the practice in certain areas.

Effective Date: Apr. 1, 1984

For Further Information Contact: R. Franklin Burnett by telephone at (703) 557-3054 or by mail marked to his attention and addressed to the Commissioner of Patents and Trademarks, Washington, D.C. 20231.

Supplementary Information: This rule change is designed primarily to 1) clarify the small entity status of independent inventors, small business concerns and nonprofit organizations having funding agreements with a federal governmental agency as defined in 35 U.S.C. 202(c) (4); 2) rewrite § 1.28 to provide a system for obtaining a refund of a portion of a fee paid in full when small entity status is established within two months of the date of such payment; 3) provide that a separate statement establishing small entity status is not required in an application filed under § 1.62 when such status has been established in the parent application; and 4) modify certain other rules to clarify practice.

New § 1.21(1) establishes a fee for processing and retaining any application which is abandoned for failing to complete the application pursuant to § 1.53(d). This new paragraph, as well as the changes to §§ 1.53 and 1.78, indicate that in order to obtain benefit of a prior U.S. application, either the basic filing fee or the processing and retention fee of § 1.21(1) must be paid. Section 1.53(d) further establishes that the application will be disposed of if the required fee is not paid within a set period. Section 1.56(b) requires submission of copies of foreign patent documents, non-patent publications, or other non-patent items of information disclosed pursuant to the duty to disclose. New § 1.191(d) clarifies that § 1.136 applies in patent applications and that § 1.550(c) applies in reexamination proceedings to all time periods set forth in §§ 1.191-1.194, 1.196 and 1.197.

Discussion of Specific Rules and Significant Differences Between Proposed and Final Rules:

Section 1.5, paragraph (a) is amended to remove a reference to § 1.55, which is no longer appropriate and to clarify how letters to the Office are to be identified.

Section 1.6 is amended as proposed to clarify the manner in which letters and papers, including fees, filed in accordance with § 1.10 by "Express Mail" are date stamped when received in the Patent and Trademark Office. Such letters and papers, which comply with § 1.10, will be stamped with the date of deposit as "Express Mail" with the United States Postal Service unless the date of deposit is a Saturday, Sunday or federal holiday within the District of Columbia, in which case the date stamped will be the next succeeding day which is not a Saturday, Sunday, or a federal holiday within the District of Columbia. No papers

are received in the Patent and Trademark Office on Saturdays, Sundays, or federal holidays within the District of Columbia.

Section 1.10, paragraphs (a) and (c), are amended to clarify that papers deposited as "Express Mail" on a Saturday, Sunday, or a federal holiday within the District of Columbia will be stamped with the date of the next succeeding day which is not a Saturday, Sunday, or a federal holiday within the District of Columbia. A cross reference to § 1.6(a) has also been added to the rule. This change was not contained in the notice of proposed rulemaking but is being made to avoid confusion and to ensure that the Office's practice in date-stamping of papers is clearly understood. The change was suggested by a comment received on the proposed rules.

Section 1.14 is amended as proposed to revise paragraph (b) to clarify that only complete patent applications as defined in § 1.51(a) which become abandoned will be retained for a period of twenty years from the filing date. Incomplete applications will be retained as provided in §§ 1.21 and 1.53.

Section 1.19, paragraph (b)(3), is amended as proposed to clarify that only copies made from Office records, but not prepared by the Office, will be compared with the original prior to certification of the copies. The Office will not compare copies made from some other copy or record with Office records for purposes of certification. The stated charge of ten cents per page would not be sufficient to make a word-by-word comparison. The requirements of the public appear to still be served by limiting the use of the comparison fee to Office records.

Section 1.21 is amended as proposed to revise paragraph (b) (2) and establish a new paragraph (1). The change in paragraph (b) (2) is in accord with the change § 1.25 (a). New paragraph (1) provides a fee for processing and retaining any application which is abandoned pursuant to § 1.53(d). Such applications have received a filing date pursuant to 35 U.S.C. 111 but have been abandoned for failure to complete the application by filing the oath or declaration, filing fee or surcharge § 1.16(e)). The fee covers the handling, filming, processing, data input and storage required to retain an application. The fee is not due in any application in which the basic filing fee was paid.

Section 1.25 is amended as proposed to revise paragraph (a) to set the minimum deposit for a deposit account at \$1000 and to clarify that an amount sufficient to cover all fees as well as services, copies, etc., requested must always be on deposit. This minimum amount is considered necessary and proper in view of the substantial increase in the amounts of fees being charged to deposit accounts and the processing costs of handling overdrawn accounts. Paragraph (b) clarifies that fees may be charged against a deposit account only where sufficient funds are on deposit to cover the entire amount of the fees. Paragraph (b) also clarifies that an authorization to charge a fee to a deposit account will not be considered payment on the date the authorization to charge is effective as to that fee unless sufficient funds are present in the account to cover the fee.

Section 1.27 is amended as proposed to revise paragraphs (b), (c) and (d) to provide clearly that an independent inventor, small business concern, or nonprofit organization, which is otherwise qualified as a small entity for purposes of paying reduced patent fees under 37 CFR 1.9 and 1.27, is not disqualified therefrom because of a license to a federal agency pursuant to 35 U.S.C. 202(c) (4). Section 1.27 is amended to state that such a license does not constitute a license or a conveyance of rights which would preclude qualifying for small entity status. The amendment is necessary for clarification and to avoid frustrating the intent of Public Law 97-247 and Public Law 96-517 when taken together.

The text of Title 35, United States Code, § 202(c) (4) reads as follows:

§ 202. Disposition of rights

(c) Each funding agreement with a small business firm or nonprofit organization shall contain appropriate provisions to effectuate the following:

* * * * *

(4) With respect to any invention in which the contractor elects rights, the Federal agency shall have a nonexclusive, nontransferable, irrevocable, paid-up license to

practice or have practiced for or on behalf of the United States any subject invention throughout the world, and may, if provided in the funding agreement, have additional rights to sublicense any foreign government or international organization pursuant to any existing or future treaty or agreement.

Section 1.28 is amended as proposed to revise paragraph (a) to clarify that a separate verified statement is not required to be filed in a file wrapper continuing application filed pursuant to § 1.62, if status as a small entity has been established in the parent application and is still proper. Section 1.28(a) also permits a refund of a fee timely paid in the full amount if within two months of the date of the full timely payment: (1) small entity status is properly established, and (2) a refund is requested. Under § 1.28(a), no request for a refund filed later than two months after the date on which a full fee has been paid will be entertained even if additional time is sought to file the request. The two-month period referred to in § 1.28(a) is not a period for response under § 1.136 and cannot be extended. Section 1.28(a) provides for, in somewhat modified form, the practice presently in effect pursuant to a waiver of § 1.28 published at 1023 O.G. 77 on Oct. 26, 1982 and extended at 1027 O.G. 115 on Feb. 15, 1983. The revised refund procedures in § 1.28(a) will apply to any fees timely paid in full on or after the effective date of the final rule. The refund procedures set forth in the Patent and Trademark Office *Official Gazette* Notice entitled "Filing of Verified Statements Claiming Small Entity Status" published at 1023 O.G. 77 on October 26, 1982, and the *Official Gazette* Notice entitled "Requirement for Filing Verified Statements Claiming Small Entity Status" published at 1027 O.G. 115 on Feb. 15, 1983, continue in effect until the effective date of the final rule.

Section 1.52(d) is amended as proposed to clarify that the verified English translation of a non-English language application and the fee set forth in § 1.17(k) can be filed with the application or within such time as may be set by the Office.

Section 1.53, paragraphs (b) and (d), are amended to clarify in paragraph (b) that the application for patent must be filed in the name of the actual inventor or inventors by giving all their names as required by § 1.41. Paragraph 1.53(d) states that if a correspondence address is provided, notice will be provided to that address where the appropriate filing fee or oath or declaration does not accompany the application. Paragraph 1.53(d) also provides that if the required filing fee is not paid, or the processing and retention fee is not paid, within one year of the date of mailing of notification pursuant to paragraph 1.53(d) or within one year from the filing date if no correspondence address is included in the application, the application will be disposed of. The paragraph further indicates that no copies will be provided or certified by the Office of an application which has been disposed of or in which neither the basic filing fee nor the processing fee has been paid. Finally, paragraph 1.53(d) specifies that if no correspondence address is included in the application, applicant will have two months from the filing date to file the fee, oath or declaration and to pay the surcharge set forth in § 1.16(e) in order to prevent abandonment of the application.

Section 1.55, paragraph (b), is amended as proposed to correct an error in referring to paragraph (a) of this section.

Section 1.56 is amended as proposed to revise paragraph (b) and add a new paragraph (j). Paragraph 1.56(b) requires that a copy of each foreign patent document, non-patent publication, or other non-patent item of information in written form being disclosed pursuant to § 1.56 accompany such disclosures unless the copy is not in the possession of the person making the disclosure. In such a situation, a statement to that effect is required. Paragraph 1.56(b) also adds "or her" to refer to both genders. New paragraph 1.56(j) states that applicant will be notified if a copy or statement required pursuant to § 1.56(b) is not submitted and that applicant will be given a time period within which to file the copy or a statement that the copy is not in the possession of the person making the disclosure. Such a time period would be extendable under § 1.136. Failure to respond in a proper and timely manner would result in abandonment of the application.

Section 1.59 is amended as proposed to clarify that the Office will furnish copies of papers received in the Office at the usual

cost only if the basic filing fee or the processing and retention fee has been paid.

Section 1.60 is amended to break the section into paragraph (a) and new paragraph (b). Paragraph (a) adds a reference to amended § 1.78(a) to clarify the conditions under which continuation or divisional applications may be filed. New paragraph 1.60(b) provides that the signing of the oath or declaration can be omitted if the prior application was complete as set forth in § 1.51(a). New paragraph 1.60(b) also requires that a true copy of the prior complete application be filed. The final rule also clarifies that the copy of the oath or declaration filed must show the applicant's signature or contain an indication it was signed. Paragraph 1.60(b) also provides that only amendments reducing the number of claims or adding a reference to the prior application will be entered before calculating the filing fee and granting the filing date.

Section 1.62 is amended as proposed to revise paragraphs (a) and (d). Paragraph 1.62(a) provides that the file wrapper continuing procedure is applicable only to prior complete applications under § 1.51(a). Paragraph 1.62(d) clarifies that the filing fee referred to is the basic filing fee.

Section 1.78 is amended as proposed to change the title to more explicitly define the contents of the section. Paragraph 1.78(a) specifies that in order for an application to claim the benefit of a prior filed copending national application, the prior application must be complete as set forth in § 1.51(a) or be entitled to a filing date as set forth in § 1.53(b) and include the basic filing fee set forth in § 1.16, or be entitled to a filing date as set forth in § 1.53(b) and have paid the processing and retention fee set forth in § 1.21(1) within the time period set forth in § 1.53(d).

Section 1.121 is amended as proposed to revise paragraph (e) to specify how amendments to the description and claims are to be made in reissue applications.

Section 1.123 is amended as proposed to clarify that the sketch showing proposed amendments to the drawing with its cover letter should be a separate paper.

Section 1.135 is amended as proposed to remove paragraph (d) since it is not necessary in view of the ability to obtain extensions of time under § 1.136(a) by petition and payment of fee.

Section 1.136 is amended as proposed to clarify in paragraphs (a) and (b) that the extension of time practice under this section does not apply in interference proceedings or in reexamination proceedings. Extension of time practice in interference proceedings, including extension of time for appeal or civil action (§ 1.304), is subject to § 1.245. Extension of time practice in reexamination proceedings, including extension of time for appeal or civil action (§ 1.304), is subject to § 1.550(c).

Section 1.191 is amended as proposed to add a new paragraph (d) to provide that the time periods for appeal and review set forth in §§ 1.191-1.194, 1.196 and 1.197 are subject to the provisions of § 1.136 for patent applications or § 1.550(c) for reexamination proceedings.

Section 1.192 is amended as proposed to revise paragraph (a) to delete the reference to § 1.136 since it is provided for in new § 1.191(d).

Section 1.197 is amended as proposed to revise paragraph (b) to delete the reference to § 1.136 since it is provided for in new § 1.191(d).

Section 1.304 is amended as proposed to clarify that extensions of time periods set forth therein are subject to the provisions of § 1.245 for interferences or § 1.550(c) where reexamination proceedings are involved rather than to § 1.136 which applies in all other cases.

Section 1.550 is amended as proposed to revise paragraph (c) to clarify that the time for taking any action, including appeal, by a patent owner in a reexamination proceeding is governed solely by this section.

Section 1.555 is amended to revise paragraphs (a) and (b). In paragraph 1.555(a) "prior art" statement has been changed to "information disclosure" statement to conform to the language of § 1.98. Paragraph 1.555(b) requires that disclosures pursuant to this paragraph be accompanied by a copy of each foreign patent document or non-patent printed publication which is being disclosed and which is in the possession of the person making the disclosure.

Responses to Comments on the Rules

Specific comments were received on a number of the sections. Thirty-five letters presenting written comments were received. No oral testimony was presented at the public hearing conducted on Oct. 18, 1983. All of the comments were considered in adopting the changes set forth herein. Comments appear below with responses thereto.

Comments from Associations

Comment:

The American Patent Law Association commented that they were in full accord with most of the proposed changes. They submitted comments and suggestions from some members. The Patent, Trademark and Copyright Section of the American Bar Association did not render an official section position on the proposed rule changes but polled its members and found the majority of the member responding either to favor the proposed rule changes or to view them as acceptable. They also submitted comments and suggestions from some members. The United States Trademark Association commented on the proposed rules concerning deposit accounts.

Reply:

The efforts and input of these organizations are appreciated. Specific comments and suggestions from individual members of the organizations are covered below.

Comments from Individuals

Comment:

One comment was received that the proposed amendment to § 1.6 was unnecessary and possibly improper.

Reply:

The amendment to § 1.6 has been adopted as proposed. The amended rule sets out the Patent and Trademark Office practice which has been in effect. No papers are stamped as having arrived in the Office on Saturday, Sunday, or a federal holiday within the District of Columbia no matter how the papers are filed. Article 4, C(3) of the Paris Convention says that the period of priority shall be extended until the first following working day "when the Office is not open for the filing of applications in the country where protection is claimed". To accept papers through use of "Express Mail" or some other way on Saturdays, Sundays or federal holidays within the District of Columbia would raise the possibility that the Office would be viewed as open for the filing of papers on such days and thereby remove the current ability to file a priority claiming application on the first working day if the priority year ended on a non-working day. The final rule avoids this implication.

Comment:

One comment indicated that the change to § 1.6 should not be applied retroactively to papers filed before the clarifying language was placed in the rule.

Reply:

Any such fact situation will be reviewed through the normal petition procedure.

Comment:

One comment suggested that § 1.10 be amended rather than § 1.6 with regard to papers deposited as "Express Mail" on a Saturday, Sunday, or federal holiday within the District of Columbia.

Reply:

This comment has been adopted in that both §§ 1.6 and 1.10 have been amended to avoid any possible confusion.

Comment:

One comment suggested that § 1.19(b) (3) be changed to permit the Office to certify material not copied from the records of the Office when reproduction of Office records is not feasible or possible.

Reply:

This comment has not been adopted. The Office will only certify that material is a copy of an Office record if, in fact, the material was reproduced from the Office record.

Comment:

One person commented that the \$100 processing and retention fee under § 1.21 was excessive and unnecessary.

Reply:

The fee is considered proper and necessary in view of the cost to the Office in handling, filing, processing and storage required to retain an application which has a filing date but in which no basic filing fee has been paid. If this expense is not covered by the applicant, it must be recovered from other sources.

Comment:

Twenty-seven comments were received on the proposal to amend § 1.25 to raise to \$1000 the minimum balance required in a deposit account. The amount is also referred to in § 1.21(b) (2). These comments generally suggested that the \$1000 amount was too high for account holders who did not use their accounts for charges other than small fees such as for patent copies. Several comments received acknowledged that the minimum balance for deposit accounts should be raised and suggested various amounts less than the proposed \$1000. Several comments suggested a separate account category for persons who do not use their accounts for other than small fees. Two comments suggested that the Office accept credit cards for payment of fees.

Reply:

These comments and suggestions have not been adopted. The fees for filing, processing and issuing of patent and trademark applications have increased so as to make the present \$40 minimum balance for deposit accounts totally inadequate. A number of persons objecting to the \$1000 minimum balance acknowledged that they used their deposit accounts as a safeguard against failure to calculate or to submit proper fees by a check. An account with a very low balance obviously cannot be effective as a safeguard when a patent filing fee is \$300 and a patent issue fee is \$500. Dealing with overdrawn accounts causes administrative problems for the Patent and Trademark Office. An authorization to charge an account without sufficient funds to cover a charge will not be effective as payment and may result in loss of rights to an applicant. Also, unnecessary expense will be incurred by an applicant if an insufficient balance in an account results in abandonment of an application and the necessity of filing a petition to revive under 37 CFR 1.137(b) with the requisite \$500 fee. Experience has shown that many single practitioners and small firms have failed to have sufficient funds in their accounts when needed. The increase of the minimum balance in deposit accounts to \$1000 is seen to be necessary and proper. A failure to raise the minimum balance in deposit accounts to \$1000 would serve as an incorrect indication that the Patent and Trademark Office views a minimum balance of less than \$1000 as acceptable. If it is not possible for a small firm or individual to maintain a minimum balance of \$1000, the deposit account could still be retained and used by paying the service charge set forth in § 1.21(b) (2) for any month in which the balance at the end of the month is below \$1000. The use of credit cards is not considered viable since legislation would be required to do so.

Comment:

Two comments were received suggesting that a license to a federal agency in an invention made by a federal employee should not preclude the employee from qualifying as a small entity and that § 1.27 should be amended to cover this situation.

Reply:

These comments have not been adopted. Such an amendment was not proposed and the public has not had an opportunity to comment on it.

Comment:

One comment suggested that the time for filing a verified statement claiming small entity status to obtain a refund of a filing fee pursuant to § 1.28 should run from the date of mailing of the filing receipt due to difficulty in identifying the new application before the filing receipt is received. Three persons suggested that the period for establishing small entity status and requesting a refund should be three months rather than two months as proposed.

Reply:

These comments have not been adopted. An application may be identified before the filing receipt is issued in a number of ways including title, inventor's name, filing date and attorney docket number. Also, a postcard may be included with filing of the application to learn the application serial number. The

two month period for obtaining a refund is seen to be adequate since the small entity practice is no longer new and the public has had time to become familiar with it. It allows sufficient time to have a small entity statement executed and sent to the Patent and Trademark Office.

Comment:

One comment suggested that it should be made clear that an application filed in a foreign language (§ 1.52(d)) without including a signed oath or declaration can receive a filing date under the provisions of § 1.53(b).

Reply:

The regulations permit and this reply makes it clear that an application filed in a language other than English can receive a filing date by complying with § 1.53(b).

Comment:

Three comments were received suggesting that the proposed language not be added to § 1.53(b). One comment alleged that the requirement to name the inventors upon filing a patent application is not required or even authorized by statute.

Reply:

35 U.S.C. 111 says that application for patent "shall be made, or authorized to be made, by the inventor". The rules of practice (§ 1.41(a)) contain the same requirement. The amendment to § 1.53(b) is only clarifying the rules by also placing the requirement in that section. Further, United States patent practice has long required that the inventors be named at the time of filing.

Comment:

One person commented that the language of § 1.53(d) should be changed to reflect that only one of the filing fee or processing and retention fee must be paid to prevent the application being disposed of.

Reply:

The language of the rule is seen to be unambiguous in this regard.

Comment:

One person commented that the language of § 1.53(d) should be changed to establish a time within which the processing and retention fee may be paid to prevent the application being disposed of when no correspondence address has been provided.

Reply:

The suggestion has been adopted.

Comment:

One person suggested that § 1.56(b) which states that copies of disclosed documents must be filed is inconsistent with § 1.56(j) which provides that such copies must be filed unless they are not in the possession of the person making the disclosure.

Reply:

The language of § 1.56(b) has been modified to clarify this point.

Comment:

Three persons commented that the requirement of § 1.56(b) that copies of disclosed documents be supplied was an unnecessary burden. One person commented similarly on the requirement of § 1.555 that copies of disclosed documents be supplied. Another person suggested that the proposed amendment to § 1.56(b) would require submission of a complete document even if only a small portion were relevant.

Reply:

The Office agrees with another person who commented that the "requirement that disclosers in application and reexamination proceedings provide copies of disclosed documents which they have is fair and reasonable and should aid the Examiner in making an informed as possible decision in any given proceeding". The portion of a document required to be submitted under § 1.56(b) is the portion which is material to the examination of the application under § 1.56(a).

Comment:

One person commented that the proposed amendment to § 1.78(a) would appear to require that a petition for correction of inventorship under § 1.48 be filed in a parent application as well as in the continuing application in which the inventorship was corrected.

Reply:

The amendment to § 1.78 does not change the practice regarding the filing of petitions under § 1.48.

Comment:

One person commented that § 1.123 is unclear as amended in not referring to the paper requesting that amendments to the drawing be made.

Reply:

The Patent and Trademark Office no longer makes amendments to the drawings. Applicants must submit new drawings with the changes or use bonded draftsmen to make the amendments. A paper requesting that the Office make the amendments is therefore inappropriate.

Comment:

Four persons commented that § 1.135(d) should not be deleted since they thought it desirable to be able to ratify unsigned papers without paying any fee.

Reply:

The statute and rules now provide for obtaining extensions of time through simple petition and payment of fee and for revival through a simple statement that the abandonment was unintentional and the payment of a fee. Further, a filing date can now be obtained on filing an application without the oath or declaration. The handling of unsigned papers by the Patent and Trademark Office causes administrative problems and expense to the Office and delays the processing of applications. The emergency-type situations involving loss of rights which the previous practice was intended to cover have been substantially eliminated by the changes in the law and rules.

Comment:

One person commented that § 1.191(d) was undecipherable in that it refers to a number of other rules.

Reply:

This section was intended to serve as a point of summarization for the applicable extension of time rules in appeals before the Board of Appeals. The section is seen to adequately serve that purpose.

Comment:

One person commented that the final sentence of § 1.555(b) needs clarification.

Reply:

This sentence was not changed by the proposed rules and is seen to be clear as written.

Comment:

One person commented that proposed § 1.555(b) requires copies and does not make any exceptions or qualifications on this requirement.

Reply:

The language of § 1.555(b) has been clarified to require filing of a copy of each foreign patent document or non-patent printed publication which is being disclosed and which is in the possession of the person making the disclosure.

Environmental, energy, and other considerations: The rule change will not have a significant impact on the quality of the human environment or the conservation of energy resources.

The rule change is in conformity with the requirements of the Regulatory Flexibility Act (Pub. L. 96-354), Executive Order 12291, and the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 *et seq.*

The General Counsel of the Department of Commerce certified to the Small Business Administration that the rule change will not have a significant adverse economic impact on a substantial number of small entities (Regulatory Flexibility Act, Pub. L. 96-354). Public Laws 96-517 and 97-247 have both taken into consideration the impact they may have on small entities.

The Patent and Trademark Office has determined that this rule change is not a major rule under Executive Order 12291. The annual effect on the economy will be less than \$100 million. There will be no major increase in costs or prices for consumers, individual industries, federal, state, or local government agencies, or geographic regions. There will be no significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

This rule change will not impose a burden under the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 *et seq.*, since no significant additional record keeping or reporting requirements are placed upon the public. In fact, some paperwork, especially that related to filing of small entity statements in applications filed under § 1.62 will be reduced.

List of Subjects in 37 CFR Part 1

Administrative practice and procedure, Authority delegations (government agencies), Conflict of interests, Courts, Inventions and patents, Lawyers.

Notice is hereby given that, pursuant to the authority granted to the Commissioner of Patents and Trademarks by 35 U.S.C. 6 and Public Law 97-247, the Patent and Trademark Office is amending Title 37 of the Code of Federal Regulations as set forth below.

37 CFR, Part 1, is amended as follows:

1. Section 1.5 is amended by revising paragraph (a) to read as follows:

§ 1.5 Identification of application, patent or registration.

(a) When a letter concerns an application for patent, it should state the name of the applicant, the title of the invention, the serial number or international application number of the application, the date of filing the same, and, if known, the group art unit or other unit within the Patent and Trademark Office responsible for considering the letter and the name of the examiner or other person to which it has been assigned.

* * * * *

2. Section 1.6 is amended by revising paragraph (a) to read as follows:

§ 1.6 Receipt of letters and papers.

(a) Letters and other papers received in the Patent and Trademark Office are stamped with the date of receipt except where such letters and papers are filed in accordance with § 1.10. Any such letters and papers filed in accordance with § 1.10 will be stamped with the date of deposit as "Express Mail" with the United States Postal Service unless the date of deposit is a Saturday, Sunday, or federal holiday within the District of Columbia in which case the date stamped will be the next succeeding day which is not a Saturday, Sunday, or federal holiday within the District of Columbia. No papers are received in the Patent and Trademark Office on Saturdays, Sundays or federal holidays within the District of Columbia.

* * * * *

3. Section 1.10 is amended by revising paragraphs (a) and (c) to read as follows:

§ 1.10 Filing of papers and fees by "Express Mail" with certificate.

(a) Any paper or fee to be filed in the Patent and Trademark Office can be filed utilizing the "Express Mail Post Office to Addressee" service of the United States Postal Service and be considered as having been filed in the Office on the date the paper or fee is shown to have been deposited as "Express Mail" with the United States Postal Service unless the date of deposit is a Saturday, Sunday, or federal holiday within the District of Columbia. See § 1.6(a).

* * * * *

(c) The Patent and Trademark Office will accept the certificate of mailing by "Express Mail" and accord the paper or fee the certificate date under 35 U.S.C. 21(a) (unless the certificate date is a Saturday, Sunday, or federal holiday within the District of Columbia-see § 1.6(a)) without further proof of the date on which the mailing by "Express Mail" occurred unless a question is present regarding the date of mailing. If more than a reasonable time has elapsed between the certificate date and the Patent and Trademark Office receipt date or if other questions regarding the date of mailing are present, the person mailing the paper or fee may be required to file a copy of the "Express Mail" receipt showing the actual date of mailing and a statement from the person who mailed the paper or fee averring to the fact that the mailing occurred on the date certified. Such statement must be

a verified statement if made by a person not registered to practice before the Patent and Trademark Office.

4. Section 1.14 is amended by revising paragraph (b) to read as follows:

§ 1.14 Patent applications preserved in secrecy.

* * * * *

(b) Except as provided in § 1.11(b) abandoned applications are likewise not open to public inspection, except that if an application referred to in a U.S. patent, or in an application which is open to inspection pursuant to § 1.139, is abandoned and is available, it may be inspected or copies obtained by any person on written request, without notice to the applicant. Complete applications (§ 1.51(a)) which are abandoned may be destroyed after 20 years from their filing date, except those to which particular attention has been called and which have been marked for preservation. Abandoned applications will not be returned.

* * * * *

5. Section 1.19 is amended by revising paragraph (b) (3) to read as follows:

§ 1.19 Document supply fees.

* * * * *

(b) * * *

(3) For comparing copies, made from Patent and Trademark Office records but not prepared by the Patent and Trademark Office, with the original, prior to certification of the copies, per page \$0.10

* * * * *

6. Section 1.21 is amended by revising paragraph (b) (2) and by adding a new paragraph (1) to read as follows:

§ 1.21 Miscellaneous fees and charges.

* * * * *

(b) * * *

(2) Service charge for each month when the balance at the end of the month is below \$1000 \$2.00

* * * * *

(1) For processing and retaining any application abandoned pursuant to § 1.53(d) unless the required basic filing fee has been paid \$100.00.

7. Section 1.25 is revised to read as follows:

§ 1.25 Deposit accounts.

(a) For the convenience of attorneys, agents, and the general public in paying any fees due, in ordering services offered by the Office, copies of records, etc., deposit accounts may be established in the Patent and Trademark Office upon payment of the fee for establishing a deposit account (§ 1.21(b)(1)). A minimum deposit of \$1000 or more, depending on the activity of the individual account, is required. At the close of each month's business, a statement will be rendered. A remittance must be made promptly upon receipt of the statement to cover the value of items or services charged to the account and thus restore the account to its established normal deposit value. An amount sufficient to cover all fees, services, copies, etc., requested must always be on deposit. A service charge (§ 1.21(b)(2)) will be assessed for each month that the balance at the end of the month is below \$1000.

(b) Filing, issue, appeal, international-type search report, international application processing, petition, and post-issuance fees may be charged against these accounts if sufficient funds are on deposit to cover such fees. A general authorization to

charge all fees, or only certain fees, set forth in §§ 1.16 to 1.18 to a deposit account containing sufficient funds may be filed in an individual application, either for the entire pendency of the application or with respect to a particular paper filed. An authorization to charge to a deposit account the fee for a request for reexamination pursuant to § 1.510 and any other fees required in a reexamination proceeding in a patent may also be filed with the request for reexamination. An authorization to charge a fee to a deposit account will not be considered payment of the fee on the date the authorization to charge the fee is effective as to the particular fee to be charged unless sufficient funds are present in the account to cover the fee.

8. Section 1.27 is amended by revising paragraphs (b), (c) and (d) to read as follows:

§ 1.27 Statement of status as small entity.

* * * * *

(b) Any verified statement filed pursuant to paragraph (a) of this section on behalf of an independent inventor must be signed by the independent inventor except as provided in §§ 1.42, 1.43, or 1.47 of this part, and must aver that the inventor qualifies as an independent inventor in accordance with § 1.9(c) of this part. Where there are joint inventors in an application, each inventor must file a verified statement establishing status as an independent inventor in order to qualify as a small entity. Where any rights have been assigned, granted, conveyed, or licensed, or there is an obligation to assign, grant, convey, or license, any rights to a small business concern, a nonprofit organization, or any other individual, a verified statement must be filed by the individual, the owner of the small business concern, or an official of the small business concern or nonprofit organization empowered to act on behalf of the small business concern or nonprofit organization averring to their status. For purposes of a verified statement under this paragraph, a license to a federal agency resulting from a funding agreement with that agency pursuant to U.S.C. 202(c)(4) does not constitute a license as set forth in § 1.9 of this part.

(c) Any verified statement filed pursuant to paragraph (a) of this section on behalf of a small business concern must (1) be signed by the owner or an official of the small business concern empowered to act on behalf of the concern; (2) aver that the concern qualifies as a small business concern as defined in § 1.9(d); and (3) aver that exclusive rights to the invention have been conveyed to and remain with the small business concern, or if the rights are not exclusive, that all other rights belong to small entities as defined in § 1.9. Where the rights of the small business concern as a small entity are not exclusive, a verified statement must also be filed by the other small entities having rights averring to their status as such. For purposes of a verified statement under this paragraph, a license to a federal agency resulting from a funding agreement with that agency pursuant to 35 U.S.C. 202(c)(4) does not constitute a license as set forth in § 1.9 of this part.

(d) Any verified statement filed pursuant to paragraph (a) of this section on behalf of a nonprofit organization must (1) be signed by an official of the nonprofit organization empowered to act on behalf of the organization; (2) aver that the organization qualifies as a nonprofit organization as defined in § 1.9(e) of this part specifying under which one of § 1.9(e)(1), (e)(2), (e)(3), or (e)(4) of this part the organization qualifies; and (3) aver that exclusive rights to the invention have been conveyed to and remain with the organization or if the rights are not exclusive, that all other rights belong to small entities as defined in § 1.9 of this part. Where the rights of the nonprofit organization as a small entity are not exclusive, a verified statement must also be filed by the other small entities having rights averring to their status as such. For purposes of a verified statement under this paragraph, a license to a federal agency resulting from a funding agreement with that agency pursuant to 35 U.S.C. 202(c)(4) does not constitute a conveyance of rights as set forth in this paragraph.

9. Section 1.28 is amended by revising paragraph (a) to read as follows:

\$1.28 Effect on fees of failure to establish status, or change status, as a small entity.

(a) The failure to establish status as a small entity (§§ 1.9(f) and 1.27 of this part) in any application or patent prior to paying, or at the time of paying, any fee precludes payment of the fee in the amount established for small entities. A refund pursuant to § 1.26 of this part, based on establishment of small entity status, of a portion of fees timely paid in full prior to establishing status as a small entity may only be obtained if a verified statement under § 1.27 and a request for a refund of the excess amount are filed within two months of the date of the timely payment of the full fee. The two-month time period is not extendable under § 1.136. Status as a small entity is waived for any fee by the failure to establish the status prior to paying, at the time of paying, or within two months of the date of payment of, the fee. Status as a small entity must be specifically established by a verified statement filed in each application or patent in which the status is available and desired, except those applications filed under § 1.60 or § 1.62 of this part where the status as a small entity has been established in a parent application and is still proper. Once status as a small entity has been established in an application or patent, the status remains in that application or patent without the filing of a further verified statement pursuant to § 1.27 of this part unless the Office is notified of a change in status. Status as a small entity in one application or patent does not affect any other application or patent, including applications or patents which are directly or indirectly dependent upon the application or patent in which the status has been established, except those filed under § 1.60 or § 1.62 of this part. Applications filed under § 1.60 or § 1.62 of this part must include a reference to a verified statement in a parent application if status as a small entity is still proper and desired.

* * * * *

10. Section 1.52 is amended by revising paragraph (d) to read as follows:

\$ 1.52 Language, paper, writing, margins.

* * * * *

(d) An application may be filed in a language other than English. A verified English translation of the non-English language application and the fee set forth in § 1.17(k) are required to be filed with the application or within such time as may be set by the Office.

11. Section 1.53 is amended by revising paragraphs (b) and (d) to read as follows:

\$ 1.53 Serial number, filing date, and completion of application.

* * * * *

(b) The filing date of an application for patent is the date on which (1) a specification containing a description pursuant to § 1.71 and at least one claim pursuant to § 1.75, and (2) any drawing required by § 1.81(a), are filed in the Patent and Trademark Office in the name of the actual inventor or inventors as required by § 1.41. No new matter may be introduced into an application after its filing date (§ 1.118).

* * * * *

(d) If the application which has been accorded a filing date pursuant to paragraph (b) of this section does not include the appropriate filing fee or an oath or declaration by the applicant, applicant will be so notified, if a correspondence address has been provided, and given a period of time within which to file the fee, oath, or declaration and to pay the surcharge as set forth in § 1.16(e) in order to prevent abandonment of the application. If the required filing fee is not timely paid, or if the processing and retention fee set forth in § 1.21(1) is not paid within one year of the date of mailing of the notification required by this paragraph, the application will be disposed of. No copies will be provided or certified by the Office of an application which has been disposed of or in which neither the required basic filing

fee nor the processing and retention fee has been paid. The notification pursuant to this paragraph may be made simultaneously with any notification pursuant to paragraph (c) of this section. If no correspondence address is included in the application, applicant has two months from the filing date to file the fee, oath or declaration and to pay the surcharge as set forth in § 1.16(e) in order to prevent abandonment of the application or one year from the filing date to pay the processing and retention fee set forth in § 1.21(1) to prevent disposal of the application.

* * * * *

12. Section 1.55 is amended by revising paragraph (b) to read as follows:

\$ 1.55 Claim for foreign priority.

* * * * *

(b) An applicant may under certain circumstances claim priority on the basis of an application for an inventor's certificate in a country granting both inventor's certificates and patents. When an applicant wishes to claim the right of priority as to a claim or claims of the application on the basis of an application for an inventor's certificate in such a country under 35 U.S.C. 119, last paragraph (as amended July 28, 1972), the applicant or his or her attorney or agent, when submitting a claim for such right as specified in paragraph (a) of this section, shall include an affidavit or declaration including a specific statement that, upon an investigation, he or she has satisfied himself or herself that to the best of his or her knowledge the applicant, when filing his or her application for the inventor's certificate, had the option to file an application either for a patent or an inventor's certificate as to the subject matter of the identified claim or claims forming the basis for the claim of priority.

13. Section 1.56 is amended by revising paragraph (b) and by adding a new paragraph (j) to read as follows:

\$ 1.56 Duty of disclosure; fraud; striking or rejection of applications.

* * * * *

(b) Disclosures pursuant to this section must be accompanied by a copy of each foreign patent document, non-patent publication, or other non-patent item of information in written form which is being disclosed or by a statement that the copy is not in the possession of the person making the disclosure and may be made to the Office through an attorney or agent having responsibility for the preparation or prosecution of the application or through an inventor who is acting in his or her own behalf. Disclosure to such an attorney, agent or inventor shall satisfy the duty, with respect to the information disclosed, of any other individual. Such an attorney, agent or inventor has no duty to transmit information which is not material to the examination of the application.

* * * * *

(j) If any disclosure pursuant to this section does not include a copy of each foreign patent document, non-patent publication, or other non-patent item of information in written form which is being disclosed or a statement that a copy thereof is not in the possession of the person making the disclosure, applicant will be so notified and given a period of time within which to file the copy or a statement that a copy is not in the possession of the person making the disclosure. The time period set may be extended under § 1.136.

14. Section 1.59 is revised to read as follows:

\$ 1.59 Papers of application with filing date not to be returned.

Papers in an application which has received a filing date pursuant to § 1.53 will not be returned for any purpose whatever. If applicants have not preserved copies of the papers, the Office will furnish copies at the usual cost of any application in which

either the required basic filing fee (§ 1.16) or the processing and retention fee § 1.21(1)) has been paid.

15. Section 1.60 is revised to read as follows:

§ 1.60 Continuation or divisional application for invention disclosed in a prior application.

(a) A continuation or divisional application (filed under the conditions specified in 35 U.S.C. 120 or 121 and § 1.78(a)), which discloses and claims only subject matter disclosed in a prior application may be filed as a separate application before the patenting or abandonment of or termination of proceedings on the prior application.

(b) An applicant may omit signing of the oath or declaration in a continuation or divisional application if (1) the prior application was a complete application as set forth in § 1.51(a) and (2) applicant files a true copy of the prior complete application as filed including the specification (including claims), drawings, oath or declaration showing the applicant's signature or an indication it was signed, and any amendments referred to in the oath or declaration filed to complete the prior application. The copy of the prior application must be accompanied by a statement that the application papers filed are a true copy of the prior application and that no amendments referred to in the oath or declaration filed to complete the prior application introduced new matter therein. Such statement must be by the applicant or applicant's attorney or agent and must be a verified statement if made by a person not registered to practice before the Patent and Trademark Office. Only amendments reducing the number of claims or adding a reference to the prior application (§ 1.78(a)) will be entered before calculating the filing fee and granting the filing date.

16. Section 1.62 is amended by revising paragraphs (a) and (d) to read as follows:

§ 1.62 File wrapper continuing procedure.

(a) A continuation, continuation-in-part, or divisional application, which uses the specification, drawings and oath or declaration from a prior complete application § 1.51(a)) to be abandoned, may be filed before the payment of the issue fee, abandonment of, or termination of proceedings on the prior application. The filing date of an application filed under this section is the date on which a request is filed for an application under this section including identification of the Serial Number, filing date, and applicant's name of the prior complete application.

* * * * *

(d) If an application which has been accorded a filing date pursuant to paragraph (a) of this section does not include the appropriate basic filing fee pursuant to paragraph (b) of this section, or an oath or declaration by the applicant in the case of a continuation-in-part application pursuant to paragraph (c) of this section, applicant will be so notified and given a period of time within which to file the fee, oath, or declaration and to pay the surcharge as set forth in § 1.16(e) in order to prevent abandonment of the application. The notification pursuant to this paragraph may be made simultaneously with any notification of a defect pursuant to paragraph (a) of this section.

* * * * *

17. Section 1.78 is amended by revising the title and paragraph (a) to read as follows:

§ 1.78 Claiming benefit of earlier filing date and cross-references to other applications.

(a) An application may claim an invention disclosed in the same applicant's prior filed copending national application or international application designating the United States of America. In order for an application to claim the benefit of a prior filed copending national application, the prior application must be (1) complete as set forth in § 1.51, or (2) entitled to a filing date as set forth in § 1.53(b) and include the basic filing fee

set forth in § 1.16; or (3) entitled to a filing date as set forth in § 1.53(b) and have paid therein the processing and retention fee set forth in § 1.21(1) within the time period set forth in § 1.53(d). Any application claiming the benefit of a prior filed copending national or international application must contain or be amended to contain in the first sentence of the specification following the title a reference to such prior application, identifying it by serial number and filing date or international application number and international filing date and indicating the relationship of the applications. Cross-references to other related applications may be made when appropriate. (See § 1.14(b)).

* * * * *

18. Section 1.121 is amended by revising paragraph (e) to read as follows:

§ 1.121 Manner of making amendments.

* * * * *

(e) In reissue applications, both the descriptive portion and the claims are to be amended by either (1) submitting a copy of a portion of the description or an entire claim with all matter to be deleted from the patent being placed between brackets and all matter to be added to the patent being underlined, or (2) indicating the exact word or words to be stricken out or inserted and the precise point where the deletion or insertion is to be made. Any word or words to be inserted must be underlined. See § 1.173.

* * * * *

19. Section 1.123 is revised to read as follows:

§ 1.123 Amendments to the drawing.

No change in the drawing may be made except by permission of the Office. Permissible changes in the construction shown in any drawing may be made only by bonded draftsmen, at applicant's expense, or by the submission of substitute drawings by applicant. A sketch in permanent ink showing proposed changes, to become part of the record, must be filed for approval by the examiner and should be a separate paper.

20. Section 1.135 is amended by removing paragraph (d).

21. Section 1.136 is revised to read as follows:

§ 1.136 Filing of timely responses with petition and fee for extension of time and extensions of time for cause.

(a) If an applicant is required to respond within a non-statutory or shortened statutory time period, applicant may respond up to four months after the time period set if a petition for an extension of time and the fee set in § 1.17 are filed prior to or with the response, unless (1) applicant is notified otherwise in an Office action or (2) the application is involved in an interference declared pursuant to § 1.207. The date on which the response, the petition, and the fee have been filed is the date of the response and also the date for purposes of determining the period of extension and the corresponding amount of the fee. The expiration of the time period is determined by the amount of the fee paid. In no case may an applicant respond later than the maximum time period set by statute, or be granted an extension of time under paragraph (b) of this section when the provisions of this paragraph are available. See § 1.245 for extension of time in interference proceedings and § 1.550(c) for extension of time in reexamination proceedings.

(b) When a response with petition and fee for extension of time cannot be filed pursuant to paragraph (a) of this section, the time for response will be extended only for sufficient cause, and for a reasonable time specified. Any request for such extension must be filed on or before the day on which action by the applicant is due, but in no case will the mere filing of the request effect any extension. In no case can any extension carry the date on which response to an Office action is due beyond the maximum time period set by statute or be granted when the provisions of paragraph (a) of this section are available. See § 1.245 for

extension of time in interference proceedings and § 1.550(c) for extension of time in reexamination proceedings.

22. Section 1.191 is amended by adding a new paragraph (d) to read as follows:

§ 1.191 Appeal to Board of Appeals.

(d) The time periods set forth in §§ 1.191 through 1.194, 1.196 and 1.197 are subject to the provisions of § 1.136 for patent applications or § 1.550(c) for reexamination proceedings.

23. Section 1.192 is amended by revising paragraph (a) to read as follows:

§ 1.192 Appellant's brief.

(a) The appellant shall, within 2 months from the date of the notice of appeal under § 1.191 in an application, reissue application, or patent under reexamination, or within the time allowed for response to the action appealed from, if such time is later, file a brief in triplicate. The brief must be accompanied by the requisite fee set forth in § 1.17(f) and must set forth the authorities and arguments on which the appellant will rely to maintain the appeal. The brief must include a concise explanation of the invention which should refer to the drawing by reference characters, and a copy of the claims involved.

24. Section 1.197 is amended by revising paragraph (b) to read as follows:

§ 1.197 Action following decision.

(b) A single request for rehearing or reconsideration, or modification of the decision, may be made if filed within thirty days from the date of the original decision, unless that decision is so modified as to become, in effect, a new decision, and the Board of Appeals so states.

25. Section 1.304 is amended by revising paragraph (a) to read as follows:

§ 1.304 Time for appeal or civil action.

(a) The time for filing the notice and reasons of appeal to the U.S. Court of Appeals for the Federal Circuit (§ 1.302) or for commencing a civil action (§ 1.303) is sixty days from the date of the decision of the Board of Appeals or the Board of Patent Interferences. If a request for rehearing or reconsideration, or modification of the decision, is filed within the time provided pursuant to § 1.197(b) or § 1.256(b), the time for filing an appeal or commencing a civil action shall expire at the end of the sixty-day period or thirty days after action on the request, whichever is later. The time periods set forth herein are subject to the provisions of § 1.136 or § 1.550(c) as to decisions of the Board of Appeals, or § 1.245 as to decisions of the Board of Patent Interferences.

26. Section 1.550 is amended by revising paragraph (c) to read as follows:

§ 1.550 Conduct of reexamination proceedings.

(c) The time for taking any action by a patent owner in a reexamination proceeding will be extended only for sufficient cause, and for a reasonable time specified. Any request for such extension must be filed on or before the day on which action

by the patent owner is due, but in no case will the mere filing of the request effect any extension.

27. Section 1.555 is amended by revising paragraphs (a) and (b) to read as follows:

§ 1.555 Duty of disclosure in reexamination proceedings.

(a) A duty of candor and good faith toward the Patent and Trademark Office rests on the patent owner, on each attorney or agent who represents the patent owner, and on every other individual who is substantively involved on behalf of the patent owner in a reexamination proceeding. All such individuals who are aware, or become aware, of patents or printed publications material to the reexamination which have not been previously made of record in the patent file must bring such patents or printed publications to the attention of the Office. An information disclosure statement, preferably in accordance with § 1.98, should be filed within two months of the date of the order for reexamination, or as soon thereafter as possible in order to bring such patents or printed publications to the attention of the Office.

(b) Disclosures pursuant to this section must be accompanied by a copy of each foreign patent document or non-patent printed publication which is being disclosed or by a statement that the copy is not in the possession of the person making the disclosure and may be made to the Office through an attorney or agent having responsibility on behalf of the patent owner for the reexamination proceeding or through a patent owner acting in his or her own behalf. Disclosure to such an attorney, agent or patent owner shall satisfy the duty of any other individual. Such an attorney, agent or patent owner has no duty to transmit information which is not material to the reexamination.

Nov. 30, 1983.
GERALD J. MOSSINGHOFF,
*Commissioner of Patents
and Trademarks.*

Patent and Trademark Office
37 CFR Part 1
[Docket No. 40442-49092]

Final Rules for Patent Maintenance Fees

Agency: Patent and Trademark Office, Commerce

Action: Notice of final rulemaking

Summary: The Patent and Trademark Office is amending the rules of practice in patent cases, Part I of Title 37, Code of Federal Regulations, to provide rules and procedures for the payment of patent maintenance fees. Public Law 96-517, enacted on Dec. 12, 1980 and Public Law 97-247, enacted on Aug. 27, 1982, provided for the payment of maintenance fees at intervals of 3 1/2, 7 1/2 and 11 1/2 years from the date of grant of the patent for maintaining in force an original patent, a reissue patent of an invention, and under Public Law 96-517, a plant patent and reissues thereof. The changes provide specific rules and procedures which will assist patentees in avoiding the inadvertent expiration of a patent for failure to pay the appropriate maintenance fee.

Effective Date: Nov. 1, 1984

For Further Information Contact: R. Franklin Burnett by telephone at (703) 557-3054 or by mail to his attention and addressed to the Commissioner of Patents and Trademarks, Washington, D.C. 20231.

Supplementary Information: This rule change is designed primarily to 1) establish a set of rules and procedures for the payment of patent maintenance fees; and 2) effect the provisions of Public Laws 96-517 and 97-247 with respect to payment of maintenance fees. The proposed rules were published on Apr. 24, 1984, in Vol. 49 of the *Federal Register*, pages 17692 through 17698; and on May 8, 1984, at Vol. 1042 of the *Official*

Gazette, pages 22 through 38. A public hearing was held on the proposed rule changes on June 26, 1984.

A public briefing on the Office's maintenance fee payment plans was announced at 49 *Federal Register* 2806 on Jan. 23, 1984, and at 1038 *Official Gazette* 293 on Jan. 31, 1984. The public briefing was held on Feb. 22, 1984.

Discussion of Specific Rules

Section 1.1., is amended as proposed to add a new paragraph (d) to provide a "Box M. Fee" in the Patent and Trademark Office to which all maintenance fee correspondence and payments should be directed. Changes in small entity status in patents and changes in the "fee address" under § 1.363, as well as payments of maintenance fees should be directed to "Box M. Fee".

Section 1.9, paragraph (d) is amended as proposed to make a change in citation and title of the rule of the Small Business Administration which relates to the small business size standard for paying reduced patent fees. This change was published in the *Federal Register* as a final rule on Feb. 9, 1984 at 49 Fed. Reg. 5024-5048. The wording of the rule itself was not changed. This change is made to bring the wording of title 37, Code of Federal Regulations into conformance with title 13, Code of Federal Regulations.

Section 1.17, is amended as proposed to establish in paragraph (h) a fee of \$120 for review of a decision refusing to accept and record payment of a maintenance fee filed prior to the expiration of a patent. Paragraph (h) of § 1.17 is also amended to establish a fee of \$120 for reconsideration of a decision on petition refusing to accept the delayed payment of a maintenance fee in an expired patent.

Section 1.19, is amended as proposed to add new paragraphs (f) and (g). New paragraph (f) provides for a \$10.00 fee for a microfiche copy of a patent file wrapper record. Microfiche copies of these patent files have recently become available for patents issued after Jan. 1, 1984. No fee had previously been set by rule for this service. This fee is not directly related to maintenance fees but is set at this time for convenience. New paragraph (g) establishes a \$3.00 fee for providing an uncertified statement indicating either the status of payment of maintenance fees due on a patent or the expiration of a patent. This charge does not apply to any receipt normally provided to the fee addressee as a result of the payment of a maintenance fee, but does apply in any other instance when written evidence of the status of payment of maintenance fees on a patent is requested, whether by the patentee or a member of the public.

Section 1.20, is amended as proposed to add new paragraphs (k), (l) and (m). New paragraph (k) provides for a \$100.00 surcharge for paying a maintenance fee during the 6-month grace period following the expiration of three years and six months, seven years and six months, and eleven years and six months after the date of the original grant of a patent based on an application filed on or after Dec. 12, 1980 and before Aug. 27, 1982. Since Public Law 96-517 did not provide for small entities, the surcharge amount of \$100 applies to all such patents. New paragraph (l) provides for a \$100 surcharge for patentees other than a small entity and a \$50 surcharge for small entity patentees when paying a maintenance fee during the 6-month grace period following the expiration of three years and six months, seven years and six months, and eleven years and six months after the date of the original grant based on an application filed on or after Aug. 27, 1982. This surcharge of \$100 is subject to a 50% reduction for small entities pursuant to Public Law 97-247. New paragraph (m) provides for a \$500 surcharge for accepting payment of a maintenance fee after expiration of a patent for non-timely payment of a maintenance fee. This \$500 surcharge applies only under Public Law 97-247 where the patent is based on an application filed on or after Aug. 27, 1982 and where the delay in payment is shown to the satisfaction of the Commissioner to have been unavoidable. The requirement that the delay be "unavoidable" is the same as that for reviving an abandoned application under 35 U.S.C. 133. However, the amount of evidence required will depend upon when the showing that the delay was "unavoidable" is made. This surcharge does not apply to patents based on applications filed prior to Aug. 27, 1982 since acceptance of a maintenance fee after expiration of a patent for non-timely payment is not possible under Public Law 96-517. Since this surcharge is provided for under 35 U.S.C. 41(c), it is not subject to a 50% reduction for

small entities. The surcharge in paragraph (m) is not in addition to the surcharge in paragraph (l), but is in lieu thereof.

Section 1.33 is amended as proposed to add a new paragraph (d) which allows a "correspondence address" or change thereto to be filed during the enforceable life of the patent. The "correspondence address" will be used in correspondence relating to maintenance fees unless a separate "fee address" has been specified. Paragraph (d) also includes a reference to § 1.363 relating to the "fee address" to be used for maintenance fee purposes.

New § 1.362 is added to provide for times for payment of maintenance fees. New paragraph (a) sets forth the requirement that maintenance fees as set forth in § 1.20(e)-(j) must be paid in order to maintain a patent in force if the application maturing into a patent was filed on or after Dec. 12, 1980 and is subject to the payment of maintenance fees. The maintenance fee amounts set in § 1.20(e)-(g) are subject to adjustment in accordance with the provisions of Public Law 96-517. The maintenance fee amounts set in § 1.20(h)-(j) are subject to adjustment in accordance with the provisions of Public Law 97-247 on Oct. 1, 1985, and every third year thereafter, to reflect fluctuations occurring during the previous three years in the Consumer Price Index, as determined by the Secretary of Labor. Other patent fees are also subject to similar adjustments.

New paragraph (b) of § 1.362 stipulates that no maintenance fees are due for plant patents if the plant patent application was filed on or after Aug. 27, 1982 or for any design patents. Maintenance fees are not required for a reissue patent if the patent being reissued did not require maintenance fees. New paragraph (c) defines the pertinent application filing dates for purposes of determining whether maintenance fees are applicable. Paragraph (c) (1) establishes that for national applications not claiming benefit of an earlier application, the actual United States filing date controls. Paragraph (c) (2) establishes that for national applications claiming benefit of an earlier foreign application under 35 U.S.C. 119, the United States filing date controls. Paragraph (c) (3) provides that for continuing national applications claiming benefit of a prior application under 35 U.S.C. 120, the actual United States filing date of the continuing application is the controlling date. Paragraph (c) (4) provides that for a reissue application, the United States filing date of the application which matured into the original patent upon which the reissue application is based will control. Paragraph (c) (5) establishes that for an international application which has entered the United States as a Designated Office under 35 U.S.C. 371, the international filing date granted under Article 11(1) of the Patent Cooperation Treaty controls. This is consistent with 35 U.S.C. 363.

Paragraph (d) of new § 1.362 sets forth the time periods when maintenance fees can be paid without a surcharge. Those periods, referred to generally as the "window period," are the six-month periods preceding each due date, i.e., 3 years through 3 years and six months, 7 years through 7 years and six months, and 11 years through 11 years and six months after grant of the patent. The "due dates" are defined in 35 U.S.C. 41(b). A maintenance fee paid on the last day of a window period can be paid without surcharge. The last day of a window period can be paid without surcharge. The last day of a window period is the same date (anniversary date) the patent was granted 3 years and six months, 7 years and six months, or 11 years and six months after grant of the patent. Paragraph (d) has been modified from the proposal to add "and" between items (2) and (3) and change the comma at the end of the paragraph to a period.

Paragraph (e) of new § 1.362 sets forth the grace periods during which maintenance fees, under either Public Law 96-517 or Public Law 97-247, may be paid with the surcharge under § 1.20(k) or (l). The grace periods are the six-month periods immediately following each due date, i.e., after 3 years and six months and up to 4 years, after 7 years and six months and up to 8 years, and after 11 years and six months and up to 12 years after grant of the patent. A maintenance fee may be paid with the surcharge on the same date (anniversary date) the patent was granted in the 4th, 8th, or 12th year after grant to prevent the patent from expiring.

Paragraph (f) of new § 1.362 specifies that where the last day for paying a maintenance fee falls on a Saturday, Sunday, or a federal holiday within the District of Columbia, the maintenance fee may be paid on the next succeeding day which is not a Saturday, Sunday, or federal holiday. For example, if the

window period" provided by paragraph (d) for paying a maintenance fee without surcharge ended on a Saturday, Sunday, or a federal holiday within the District of Columbia, the maintenance fee can be paid without surcharge on the next succeeding day which is not a Saturday, Sunday, or federal holiday. Likewise, if the grace period provided by paragraph (e) for paying a maintenance fee with surcharge ended on a Saturday, Sunday, or a federal holiday within the District of Columbia, the maintenance fee could be paid with surcharge on the next succeeding day which is not a Saturday, Sunday, or federal holiday. In the latter situation, the failure to pay the maintenance fee and surcharge on the next succeeding day which is not a Saturday, Sunday, or federal holiday will result in the patent expiring on a date (4, 8, or 12 years after the date of grant) earlier than the last date on which the maintenance fee and surcharge could be paid. This situation results from the provisions of 35 U.S.C. 21, but those provisions do not extend the expiration date of the patent if the maintenance fee and any required surcharge are not paid when required. For example, if the grace period ended on Saturday, the maintenance fee and surcharge could be paid on the next succeeding business day, e.g. Monday, but the patent will have expired at midnight on Saturday if the maintenance fee and surcharge were not paid on the following Monday. Paragraph (f) has been modified from the proposal to explicitly refer to "any necessary surcharge" for clarity since the ability to pay on the next succeeding day which is not a Saturday, Sunday, or federal holiday within the District of Columbia applies to the maintenance fee, including any necessary surcharge.

Paragraph (g) of new § 1.362 establishes that if the proper fees are not received within the time period specified in paragraphs (d), (e), or (f) the patent expires at the end of the grace period set forth in paragraph (e). Paragraph (g) also specifies that a patent which expires for the failure to pay the maintenance fee will expire at the end of the same date (anniversary date) the patent was granted in the 4th, 8th, or 12th year after grant.

New § 1.363 is added as proposed to provide for a "fee address" for maintenance fee purposes. New paragraph (a) specifies that the correspondence address used during prosecution of the application will be used unless 1) a "fee address" is provided for maintenance fee purposes when submitting the issue fee, 2) a correspondence address change for all purposes is filed after payment of the issue fee, or 3) a "fee address" or a change in the "fee address" is filed after payment of the issue fee.

Paragraph (b) of new § 1.363 specifies that an assignment does not result in a change of address for maintenance fee purposes. Due to the possible expiration of a patent for failure to timely pay the appropriate maintenance fee, patentees should ensure that the Patent and Trademark Office is properly notified of the proper "fee address" to which all maintenance fee communications are to be directed. Under both Public Law 96-517 and Public Law 97-247 the burden is on the patentee to timely pay maintenance fees. The Patent and Trademark Office will attempt to assist patentees through appropriate courtesy notices. However, the failure to receive one or more notices will not relieve the patentee of the obligation to timely pay the appropriate maintenance fee to prevent the patent from expiring by operation of law if the maintenance fee is not paid. Section 1.363 does not provide for maintenance fee correspondence to be directed to more than one address.

New § 1.366 is added to establish the guidelines and procedures for submission of maintenance fees, including any necessary surcharges. New paragraph (a) states that the patentee may pay maintenance fees and any necessary surcharges or any person or organization may pay maintenance fees and any necessary surcharges on behalf of the patentee without filing in the Patent and Trademark Office evidence of authorization by the patentee to pay maintenance fees. This will enable patentees to pay the maintenance fees and any necessary surcharges themselves or authorize some person or organization to pay maintenance fees and any necessary surcharges on their behalf. No verification of the authority to pay maintenance fees and any necessary surcharges in a particular patent will be made by the Patent and Trademark Office. While anyone may pay the maintenance fees and any necessary surcharges on a patent, any Patent and Trademark Office notices relating to maintenance fees will be mailed to the "fee address" set forth in § 1.363. Paragraph (a) has been modified from the proposal to

explicitly refer to "any necessary surcharges" for clarity.

Paragraph (b) of new § 1.366 specifies that a maintenance fee and any necessary surcharge for a patent must be submitted in the amount due on the date the maintenance fee and any necessary surcharge are paid, and at the proper time, i.e., within the periods set forth in § 1.362. Paragraph (b) has been modified from the proposal by changing "proper amount" to "amount due on the date the maintenance fee and any necessary surcharge are paid." This change results from adoption of a suggestion that a maintenance fee payment made during the window period should not require adjustment if the maintenance fees are thereafter increased to reflect increases in the Consumer Price Index. Under paragraph (b) as adopted herein, if the amount of the maintenance fee is correct on the date it is paid and credited to the patent, a later change in the maintenance fees to reflect changes in the Consumer Price Index will not require a modification in the amount paid. However, in order for the maintenance fee to be considered paid it must be submitted in accordance with § 1.366. Paragraph (b) has also been modified from the proposal to explicitly refer to § 1.362(f) for purposes of clarity where the last day for paying a maintenance fee with or without a surcharge falls on a Saturday, Sunday, or a federal holiday within the District of Columbia. In such circumstances, the fee with any necessary surcharge may be paid on the next succeeding day which is not a Saturday, Sunday, or federal holiday. The maintenance fee and any necessary surcharge may be paid in the manner set forth in § 1.23, i.e., it should be in United States specie, Treasury notes, national bank notes, post office money orders, or by certified check. As indicated in § 1.23, if the maintenance fee payment is sent in any other form, the Office may delay or cancel the credit until collection is made. For example, a personal or other uncertified check drawn on a United States bank which is not immediately negotiable, e.g., because of lack of signature or insufficient funds, will not constitute payment of a maintenance fee. However, a personal check drawn on a United States bank can be used if it is immediately negotiable. Any remittance from foreign countries must be payable and immediately negotiable in the United States for the full amount of the maintenance fee required.

Paragraph (b) of new § 1.366 also provides that maintenance fees may be paid by an authorization to charge a deposit account established pursuant to § 1.25. The authorization to charge the deposit account must be submitted within the periods set forth in § 1.362 and must be limited to maintenance fees payable on the date of submission. The authorization to charge the deposit account can not, under paragraph (b), be submitted prior to the third, seventh, or eleventh year after the grant of the patent. If an authorization to charge a deposit account were submitted to pay the maintenance fee due at three years and six months after grant, a new authorization to charge a deposit account or other form of payment will have to be submitted at the appropriate time for each of the maintenance fees due at 7 years and six months and 11 years and six months. Paragraph (b) also specifies that any payment or authorization filed at any time other than that set forth in § 1.362(d), (e) or (f) will not serve as a payment of the maintenance fee, except insofar as a delayed payment of the maintenance fee is accepted by the Commissioner pursuant to § 1.378. Paragraph (b) also specifies that a payment of less than the required amount, a payment in a manner other than that set forth in § 1.23, or the filing of an authorization to charge a deposit account having insufficient funds, will not constitute payment of a maintenance fee on a patent. The authorization is required to authorize the immediate charging of the fee to the deposit account. An authorization would be improper if it only authorized the fee to be charged at a later date, e.g., on the last possible day of payment without surcharge. Such an authorization would not serve as payment of the maintenance fee. Any payment which fails to result in the entire proper amount of the maintenance fee being present on the due date will not constitute payment of the maintenance fee. Paragraph (b) also specifies that the certificate of mailing procedures of § 1.8 or the mailing by "Express Mail" provisions of § 1.10 may be utilized in paying maintenance fees. The specific requirements of either § 1.8 or § 1.10 must be fully complied with if either is used.

Paragraph (c) of new § 1.366 establishes the data necessary and desired when submitting maintenance fee payments and any necessary surcharges. New paragraph (c) specifies that maintenance fee payments and any necessary surcharges must in-

clude at least the 1) patent number and 2) United States application serial number. Paragraph (c) has been modified from the proposal to explicitly refer to "any necessary surcharges" for clarity since the identifying information must also be supplied when submitting surcharges. The wording of § 1.366(c) has also been changed from the proposal to clarify that the required application serial number is that of the application upon which the patent issued. This change from the proposal makes clear that the serial number required to be submitted is not that of a prior parent application but rather, the actual application which matured into the patent for which maintenance fees are to be paid. If the maintenance fee is being paid on a reissue patent, the serial number required is that of the reissue application. Since this required information will be used as a cross-check to ensure that the maintenance fee is properly credited, the application serial number must correspond to the patent which issued therefrom. If less than the required information is submitted, the Office will not credit the payment. Additionally, if notice is required that the proper identifying data has not been submitted, it would result in requiring the payment of a surcharge if the necessary data is submitted after the "window period" closes. If the required information is not submitted until after the end of the grace period, the patent would have expired because of the failure to properly identify the patent to which the maintenance fee payment is to be credited prior to the expiration of the grace period. The patentee in such a circumstance could proceed under § 1.378, if appropriate, or could file a petition under § 1.377 within the period set therein seeking to have the maintenance fee accepted as timely even though all of the proper identifying data was not present prior to the expiration of the grace period.

Paragraph (d) of new § 1.366 specifies that the following information should also be submitted for each patent on which a maintenance fee or surcharge is paid: 1) whether it is the 3 1/2, 7 1/2, or 11 1/2 year fee, 2) whether small entity status is being changed or claimed with the payment, 3) the amount of the maintenance fee and any surcharge being submitted, 4) any assigned payor number, 5) patent issue date and 6) United States application filing date. Paragraph (d) has been modified from the proposal to explicitly refer to "any necessary surcharges" for clarity. Paragraph (d) has also been changed from the proposal to emphasize that when the payment is being made on a reissue patent the required patent number and application serial number are those of the reissue patent and reissue application. Where the payment is a maintenance fee and any necessary surcharge on a reissue patent, in addition to the information requested for all payments, paragraph (d) as adopted herein also requests certain identifying data relating to the original patent, i.e., original patent number, original patent issue date, and original United States application filing date. The reason for requesting the original patent number, original patent issue date, and original United States application filing date is that the original filing and issue dates are the dates which control if and when maintenance fees must be paid to prevent the reissue patent from expiring. The reference to a payor number has been added. A payor number will be assigned to each "fee address" in order to facilitate data input and subsequent changes in the location of the "fee address." Details of the "payor number" system will be announced to the public in a future *Official Gazette* notice. Although the submission of the information requested in paragraph (d) is not mandatory, it would expedite the processing of the maintenance fee payments.

The final rule thus requires less mandatory information, i.e., the patent number and U.S. application serial number, than would have been required by the proposed rule. The required information is considered to be the least that is required to make a cross-check and thus assure that the maintenance fee is being credited to the proper patent. The patent issue date and the application filing date, which were included in the proposed rule as mandatory information, are included in the final rule as desirable, but not mandatory, information. The effect of this change is that an error in either the patent issue date or the application filing date, or both, by the person paying the maintenance fee would not result in a refusal to accept the maintenance fee and to credit the payment thereof to the patent, if the patent number and United States application serial number were correct, i.e., in agreement. However, if any error included either the patent number or the United States application serial number such that they were not in agreement the payment would

not be accepted and credited until correction was made. The date of the correction would be the date the maintenance fee payment is credited as being made.

Paragraph (e) of new § 1.366 specifies that maintenance fee payments and any surcharges relating thereto must be submitted separate from any other payments for fees or charges, whether submitted in the manner set forth in § 1.23 or by an authorization to charge a deposit account. Maintenance fee payments and surcharge payments relating thereto which are co-mingled with payments for other fees or charges, e.g., application filing fees, issue fees, petition fees, document supply fees, etc., will not be accepted. The maintenance fees require processing by a separate area of the Office and are not processed in the same manner as other fees and charges. Maintenance fees for a number of patents can be submitted together in one submission and one payment. Paragraph (e) specifies that if maintenance fee payments for more than one patent are submitted together, they should be submitted on as few sheets as possible, listing the patent numbers in increasing patent number order. If the payment submitted, which can be made as a single payment, is insufficient to cover the maintenance fees and any surcharges for all the listed patents, the payment will be applied in the order the patents are listed. In such a circumstance where the fees are insufficient, the maintenance fee and any surcharge for one or more of the last listed patents will not be paid.

Paragraph (f) of new § 1.366 serves as a reminder to patentees of the necessity to check for the loss of small entity status prior to paying each maintenance fee on a patent. This is already a requirement of § 1.28(b). Paragraph (f) provides that notification of any change in status resulting in loss of entitlement to small entity status must be filed in a patent prior to paying, or at the time of paying, the earliest maintenance fee due after the date on which status as a small entity is no longer appropriate. If status as a small entity has been previously established by filing a statement and such status is checked and is found to be proper, no notification is required. It is not necessary to file new verified statements claiming small entity status at this point if the status as a small entity has been established and is still proper even if rights have been transferred to a small entity who has not previously filed a verified statement. The requirement is to notify the Patent and Trademark Office of the loss of entitlement and to pay the maintenance fee in the proper amount for other than a small entity where appropriate. The refund provisions of § 1.28(a) for later submitted small entity statements will apply to maintenance fees.

Paragraph (g) of new § 1.366 provides that maintenance fees and surcharges relating thereto will not be refunded except in accordance with §§ 1.26 and 1.28(a). A patentee cannot obtain a refund of a maintenance fee which was due and payable on the patent. Any duplicate payment will be refunded to the fee address.

New § 1.377 is added as proposed to provide a mechanism for review of a decision refusing to accept and record payment of a maintenance fee filed prior to the expiration of a patent. Paragraph (a) of new § 1.377 specifies that a patentee who is dissatisfied with the refusal of the Patent and Trademark Office to accept and record a maintenance fee which was filed prior to the expiration of the patent may petition the Commissioner to accept and record the maintenance fee. This petition may be used, for example, in situations where an error is present in the identifying data required by § 1.366(c) with the maintenance fee payment, i.e., either the patent number or the application serial number are incorrect. A petition under § 1.377 would not be appropriate where there is a complete failure to include at least one correct mandatory identifier as required by § 1.366(c) for the patent since no evidence would be present as to the patent on which the maintenance fee was intended to be paid. If the maintenance fee payment with an incorrect mandatory identifier was made near the end of the grace period, the patent might expire since the Office would not credit the fee to a patent. For patents based on applications filed between Dec. 12, 1980 and Aug. 27, 1982, there is no provision for acceptance of a maintenance fee after the grace period such as in § 1.378 and so the filing of a petition under § 1.377 would provide an avenue for seeking relief. A petition under § 1.377 would not be appropriate where the patentee paid a maintenance fee on one patent when the patentee intended to pay the maintenance fee on a different patent but through error identified the wrong patent by patent number and application serial number. Likewise, a peti-

tion under § 1.377 would not be appropriate where the entire maintenance fee payment, including any necessary surcharge, was not filed prior to expiration of the patent.

Paragraph (b) of new § 1.377 specifies that any petition under new § 1.377 must be filed within 2 months of the action complained of, or within such other time as may be set in the action complained of. The petition must be accompanied by the petition fee of \$120 provided for in the amendment to § 1.17(h). Paragraph (b) also provides that the petition may include a request that the petition fee be refunded if the refusal to accept and record the maintenance fee is determined to have resulted from an error by the Patent and Trademark Office.

Paragraph (c) of new § 1.377 specifies that any petition filed under the section must comply with the requirements of paragraph (b) of § 1.181 and must be signed by an attorney or agent registered to practice before the Patent and Trademark Office, or by the patentee, the assignee, or other party in interest. A person or organization whose only responsibility insofar as the patent is concerned is the payment of a maintenance fee is not a party in interest for purposes of paragraph (c) of § 1.377. The petition must be in the form of a verified statement if made by a person not registered to practice before the Patent and Trademark Office. If the petition is signed by a person not registered to practice before the Patent and Trademark Office, the petition must include the authority of the person signing the petition as patentee, assignee, or other party in interest.

New § 1.378 is added as proposed to establish the procedure for acceptance of the delayed payment of a maintenance fee in an expired patent in order to reinstate that patent. This procedure is only available under Public Law 97-247 where the application on which the patent is based was filed on or after Aug. 27, 1982. If the maintenance fee is due under Public Law 96-517, i.e., the application on which the patent is based was filed on or after Dec. 12, 1980, and before Aug. 27, 1982, the delayed payment of the maintenance fee is not provided for by statute and cannot be accepted after expiration of the patent, and the patent cannot be reinstated.

Paragraph (a) of new § 1.378 provides that the Commissioner may accept the payment of any maintenance fee due on a patent based on an application filed on or after Aug. 27, 1982, after expiration of the patent if, upon petition, the delay in payment of the maintenance fee is shown to the satisfaction of the Commissioner to have been unavoidable. The surcharge set forth in § 1.20(m) must be paid as a condition of accepting payment of the maintenance fee. No separate petition fee is required for this petition. If the Commissioner accepts payment of the maintenance fee upon petition, the patent shall be considered as not having expired, but will be subject to the intervening rights provisions of 35 U.S.C. 41(c) (2).

Paragraph (b) of new § 1.378 specifies the requirements of a petition for acceptance of the delayed payment of a maintenance fee filed within six months of the expiration of the patent. Under paragraph (b), the petition must include the required maintenance fee set forth in § 1.20(h)-(j); the surcharge set forth in § 1.20(m); and a showing that the delay was unavoidable since reasonable care was taken to ensure that the maintenance fee would be paid timely. The showing must enumerate the steps taken to ensure timely payment of the maintenance fee. In view of the requirement to enumerate the steps taken to ensure timely payment of the maintenance fee, an argument that the patentee was ignorant of the requirement to pay maintenance fees will not constitute a showing of unavoidable delay. Evidence that despite reasonable care on behalf of the patentee and/or the patentee's agents, and reasonable steps to ensure timely payment, the maintenance fee was unavoidably not paid, could be submitted in support of an argument that the delay in payment was unavoidable. For example, an error in a docketing system could possibly result in a finding that a delay in payment was unavoidable if it were shown that reasonable care was exercised in designing and operating the system and if it were shown that the patentee took reasonable steps to ensure that the patent was entered into the system to ensure timely payment of the maintenance fees.

Paragraph (c) of new § 1.378 specifies the requirements of a petition for acceptance of the delayed payment of a maintenance fee filed more than six months after the expiration of a patent. These requirements are much more stringent in view of the heavy burden of proof that the delay was unavoidable. The

legislative history of Public Law 97-247, House Report No. 97-542 (Committee on the Judiciary), indicates that "[a]fter the expiration of a reasonable period of time, the patentee would bear a heavy burden of proof that the delay was unavoidable." The six month period provided for petition under paragraph (b) is considered to be a reasonable period of time within which to seek reinstatement of a patent which expired for failure to pay the maintenance fee. Any petition filed more than six months after expiration must meet the more stringent requirements of paragraph (c). Under paragraph (c), the petition must include the same elements as in paragraph (b) and, in addition, must demonstrate that the failure to pay the maintenance fee was unavoidable due to circumstances outside of the control of the patentee and those acting on behalf of the patentee in paying the maintenance fee. The showing in a petition under paragraph (c) must be sufficient in scope and content to meet the heavy burden of proof required to show that a delay in payment of the maintenance fee of more than six months after expiration of the patent was unavoidable. In contrast to a petition under paragraph (b), a showing in a petition under paragraph (c) of an error in a docketing system will not be sufficient to find that the delay was unavoidable. Instead, a petition filed under paragraph (c) must demonstrate that the circumstances resulting in the delay were entirely outside the control of the patentee and those acting on behalf of the patentee in paying the maintenance fee, e.g., serious efforts without success to raise the funds required to pay the maintenance fee.

Paragraph (d) of new § 1.378 requires that a petition filed under § 1.378 be signed by an attorney or agent registered to practice before the Patent and Trademark Office, or by the patentee, the assignee, or other party in interest. A person or organization whose only responsibility insofar as the patent is concerned is the payment of a maintenance fee is not a party in interest for purposes of paragraph (d) of § 1.378. Under paragraph (d), the petition must be in the form of a verified statement if made by a person not registered to practice before the Patent and Trademark Office. If the petition is signed by a person not registered to practice before the Patent and Trademark Office, the petition must include the authority of the person signing the petition as patentee, assignee, or other party in interest.

Paragraph (e) of new § 1.378 provides a mechanism for obtaining reconsideration of a decision refusing to accept a maintenance fee upon petition filed pursuant to paragraph (a). This mechanism is a petition for reconsideration which may be filed within two months of, or such other time as set in the decision refusing to accept the delayed payment of the maintenance fee. In contrast to petitions filed under paragraph (a), the petition for reconsideration filed under paragraph (e) of new § 1.378 will require the separate petition fee set forth in the amendment to § 1.17(h). Paragraph (e) also provides that after the decision on the petition for reconsideration, no further reconsideration or review of the matter will be undertaken by the Commissioner. Paragraph (e) also provides for refund of the maintenance fee and the surcharge set forth in § 1.20(m) if the delayed payment of the maintenance fee is not accepted. The refund will be made following the decision on the petition for reconsideration, or after the expiration of the time for filing such a petition for reconsideration, if none is filed. Paragraph (e) specifies that the fee for filing the petition for reconsideration will not be refunded unless the refusal to accept and record the maintenance fee is determined to result from an error by the Patent and Trademark Office.

Response to Comments on the Rules

Specific comments were received on a number of the proposed rule changes. Eight letters submitting written comments were received. Oral testimony was presented by two persons (one person testified on behalf of the American Intellectual Property Law Association) at the public hearing conducted on June 26, 1984. All of the written and oral comments were considered in adopting the changes set forth herein. The comments submitted appear below along with responses thereto.

Comment:

One comment suggested that the surcharge set at 37 CFR 1.20(m) for accepting a maintenance fee after expiration of the patent should be reduced from \$500.00 to \$50.00 and that this amount should be reduced by 50 percent for small entities.

Reply:

The suggestion has not been adopted. The surcharge set at 37 CFR 1.20(m) is considered to be appropriate in view of the importance of the relief being obtained. Before a surcharge under 37 CFR 1.20(m) is due the patent will have already expired due to the failure to pay a maintenance fee within a one-year period provided for the payment. Setting a lower amount as the surcharge would tend to denigrate the importance of the relief obtained by the acceptance of a maintenance fee after expiration of a patent. Further, a lower surcharge amount is not justified in view of the ample opportunity for payment of the maintenance fee which is presented by the one-year period in which payment can be made and the fact that the public is now on notice that maintenance fees are due and payable. Further, the Patent and Trademark Office will provide courtesy notices regarding the need to pay maintenance fees at a plurality of points in time before the patent expires. Such a notice now appears on the patent grant and presently plans are to print such a courtesy notice on the Notice of Allowance and the Issue Fee Receipt. Notices will be printed in the *Official Gazette* listing the patent number ranges of patents on which maintenance fees can be paid and a notice will be mailed to the patentee during the grace period if the maintenance fee is not paid. Therefore, relatively few patentees should fail to pay the maintenance fee before expiration of the patent due to unavoidable circumstances. The surcharge set at 37 CFR 1.20(m) is established pursuant to 35 U.S.C. 41(c) and therefore the small entity provisions of Public Law 97-247 do not apply to this fee. Also, Public Law 97-247 provides that the surcharge set at 37 CFR 1.20(m) could be in addition to any surcharge established for payment of the maintenance fee during the grace period as set at 37 CFR 1.20(1). The Patent and Trademark Office has established a separate surcharge set at 37 CFR 1.20(m) not in addition to the surcharge set at 37 CFR 1.20(1), but in lieu thereof. The amount set at 37 CFR 1.20(m) is not seen to be excessive.

Comment:

Two comments suggested that the small entity reduced fee provisions of Public Law 97-247 should have been applied to maintenance fees required under Public Law 96-517.

Reply:

The maintenance fee amounts under Public Law 96-517 set at 37 CFR 1.20(e)-(g) were previously set and are not part of the present rulemaking. It should be noted, however, that Public Law 96-517 did not provide for reduction of fees for small entities. Reductions of fees for small entities were established in Public Law 97-247 only for fees under 35 U.S.C. 41(a) and (b) thereof. The maintenance fee levels in 37 CFR 1.20(e)-(g), however, were established under 35 U.S.C. 41(c) of Public Law 96-517 rather than 35 U.S.C. 41(a) or (b) of Public Law 97-247. Therefore, the fee amounts previously set at 37 CFR 1.20(e)-(g) are not seen to be subject to reduction for small entities.

Comment:

One comment suggested that the Office permit any of the maintenance fees to be paid in advance, either at the time of paying the issue fee or during any of the window periods. Another comment suggested that the Office should accept a fee payment earlier than the window period if the fee has no possibility of being changed due to changes in the Consumer Price Index.

Reply:

These suggestions have not been adopted. The second comment listed above points out the problem with regard to the suggestion in the first comment. Public Law 97-247 provided for adjustments of the maintenance fees every third year to reflect any fluctuations occurring during the previous three years in the Consumer Price Index, as determined by the Secretary of Labor. Allowing maintenance fees to be paid in advance would preclude such adjustments to these maintenance fees unless very burdensome administrative steps were implemented to require adjustments in the fee amount previously paid when the maintenance fees are adjusted at a later time. Requiring maintenance fees to be paid in a consistently time-ordered basis as in § 1.362 will also be helpful administratively and for budgeting purposes. As to the second comment above, it is not seen that there would be substantial benefit to the public since the period would be short during which a maintenance fee could not change due to changes in the Consumer Price Index. Thus, the patentee would only be able to make the maintenance fee

payment a short time before the period during which payment may be made pursuant to § 1.362.

Comment:

Two comments suggested that a maintenance fee payment made during the window period should not require adjustment if the maintenance fees are thereafter increased to reflect increases in the Consumer Price Index.

Reply:

These comments have been adopted by an appropriate change in paragraph (b) of § 1.366. Maintenance fees which are paid during the window period in the amount required on the date of payment will be accepted as proper and full payment. If the maintenance fees change after such a proper payment, no adjustment in the amount will be required or permitted. Thus, if the maintenance fee increases before the close of the window period, the patentee will not be required to make up any deficiency between the amount properly paid during the window period and the new increased fee. Likewise, if the maintenance fee decreases before the close of the window period, no refund will be permitted of part of the maintenance fee properly paid in the amount due when the payment was made. Payments must be made in the amount proper on the date of payment. For example, if payment is made during the grace period, the payment must be made in the amount then required irrespective of the amount of the maintenance fee which would have been due if payment had been made during the window period.

Comment:

Three comments were directed to the proposed requirements in § 1.366(c) for data identifying the patent upon which maintenance fee payments are being made. One comment indicated that many computer annuity systems now existing have a data base designed to accept only two identifying numbers. This comment and one other comment suggested that the patent number and issue date be required to be submitted with the maintenance fee to identify the patent number. Another comment suggested that the required identifying data be the patent number, issue date, name of the inventor and title of the invention.

Reply:

The suggested changes to the proposed rule have been adopted in part. The requirement for identifying data to uniquely identify the patent for which maintenance fees are being paid is an important one. The Patent and Trademark Office and the public must be able to determine with certainty which patents are in force and which patents have expired because the maintenance fees were not paid. The comments seem to recognize that at least two identifiers are necessary so that a cross-check can be made to avoid errors. The suggested use of the issue date with the patent number would not provide a reliable cross-check. In excess of one thousand patents usually issue on each issue date. Therefore a mistake in the last four digits in the patent number supplied with the maintenance fee payment would often not be detected by use of the issue date as a cross-check. The Patent and Trademark Office has determined that the two best identifying data units for use as a cross-check are the patent number and the application serial number. These identifiers are unique since each is specific to one patent or application and are thus required to be provided with a maintenance fee payment by the final rule. The application serial number and the patent number are both listed on the issued patent and in the *Official Gazette* and therefore should be readily available to patentees.

Comment:

One comment suggested that no petition fee should be charged for filing a petition under 37 CFR 1.377 seeking review of a decision refusing to accept and record payment of a maintenance fee filed prior to expiration of a patent. The comment further suggested that, if a fee is charged, the filing of a petition thereunder should be presumed to be a request for a return of the petition fee if it is determined that the refusal to accept and record a maintenance fee payment was due to Patent and Trademark Office error.

Reply:

The suggestion that no petition fee be charged has not been adopted. The petition fee, although required in advance, will be retained by the Patent and Trademark Office only in those instances where the refusal to accept and record the fee resulted from an error on the part of someone other than the Patent and Trademark Office. In those instances where the refusal to accept

and record the fee resulted from a Patent and Trademark Office error the Office intends to refund the petition fee, either based upon the request included in the petition or upon the initiative of the Office. The reason for including a request for a refund, where appropriate, in the petition is to ensure that such request is not inadvertently overlooked. In view of the expense involved, it would be inappropriate to process a petition without a petition fee where the error necessitating the petition was made by the petitioner or someone acting on behalf of the patentee.

Comment:

One comment suggested that the term "unavoidable" should be more specifically defined in 37 CFR 1.378(b) (3) and (c) (3), if possible.

Reply:

As stated in this rulemaking, the requirement that the delay in payment of the maintenance fee be "unavoidable" is the same as that for reviving an abandoned application under 35 U.S.C. 133. This standard has been in effect for many years and should be well understood by the public. The rule is seen to be adequate as written, especially in view of the discussion in this rulemaking which includes several specific examples based on when the petition to accept the delayed payment of a maintenance fee is filed.

Comment:

One comment suggested that Public Law 97-247 should be "liberally interpreted" to permit acceptance of delayed payments of maintenance fees required under Public Law 96-517. Proposed 37 CFR 1.378 was limited to patents issuing on applications filed on or after Aug. 27, 1982, the effective date of Public Law 97-247.

Reply:

The final rule has not been changed from the proposal. The remedy suggested by the comment cannot be provided in view of the language of 35 U.S.C. 41(c) (1) which applies only to maintenance fees required by 35 U.S.C. 41(b) of Public Law 97-247. Section 17(a) of Public Law 97-247 clearly states "the maintenance fees provided for in section 3(b) of this Act shall not apply to patents applied for prior to the date of enactment of this Act."

Comment:

Several of the comments received were directed to proposed statutory changes which were said to be desirable in the area of maintenance fees.

Reply:

These comments were not suggesting that the proposed rules were not in compliance with the present statutes, but rather that the statutes themselves should be changed. These comments are beyond the scope and purpose of this rule change.

Implementation of Maintenance Fee Payment Procedures

The Patent and Trademark Office is presently developing its internal working procedures for processing maintenance fee payments and for notifying the public as to the status of maintenance fee payments on particular patents. The first maintenance fees become due early in 1985. In order to be as helpful as possible in informing the public as to the Patent and Trademark Office's current plans it is useful to outline the basic procedures the Patent and Trademark Office intends to adopt to process maintenance fees so that the interrelationship with the rules is understood. These basic procedures are subject to change as experience and circumstances dictate.

Notices by the Patent and Trademark Office

Under the statutes, the Patent and Trademark Office has no duty to notify patentees when their maintenance fees are due. It is the responsibility of the patentee to assure that the maintenance fees are paid to prevent expiration of the patent. The Patent and Trademark Office will, however, provide some notices as reminders that maintenance fees are due, but the notices, errors in the notices, or the lack of notices, will in no way relieve a patentee from the responsibility to make timely payment of each maintenance fee to prevent the patent from expiring by operation of law. The notices provided by the Patent and Trademark Office will be merely courtesy in nature and intended to

aid patentees. These notices, errors in these notices, or the lack of notices, will in no way shift the burden of monitoring the time for paying maintenance fees on patents from the patentee to the Patent and Trademark Office.

Preprinted Standard Notice Wording

The patent grant currently includes a reminder that maintenance fees may be due. The Notice of Allowance and Issue Fee Receipt are presently planned to be revised to contain reminder notice wording that maintenance fees may be due.

Official Gazette Notice

A notice will appear in each issue of the *Official Gazette* which will indicate which patents have been granted 3, 7 and 11 years earlier, that the window period has opened and that maintenance fee payments will now be accepted for these patents.

Another *Official Gazette* notice published after expiration of the grace period will indicate any patent which has expired due to non-payment of maintenance fees and any patents which have been revived under 35 U.S.C. 41(c). An annual compilation of such expirations and revivals will also be published.

Courtesy Reminder Notice

Since patentees are expected to maintain their own record systems and since most patentees are expected to pay their maintenance fees during the "window period" to prevent payment of a surcharge, the Office will not send any reminder notices to patentees at the fee address until after the grace period has begun. This will reduce and simplify the mailing of notices but still give patentees an opportunity to pay their maintenance fees with surcharge during the grace period before expiration of their patents. Such notices will be mailed to the fee address as set forth in § 1.363.

Action Notices

The Office will issue a receipt for payment of maintenance fees after entry of the maintenance fee payment. Such a receipt will provide an opportunity for the patentee to check if the Office has properly credited the payment. The original document submitted by the patentee when paying the maintenance fee will also be appropriately marked and returned to the fee address. If actual experience indicates that they are not needed, the receipt notices and/or the return of the original document may be discontinued.

The patentee will also be notified by mail at the fee address as set forth in § 1.363 of any expiration or revival of the patent.

Fee Address

The patentee may provide the Patent and Trademark Office with a fee address under § 1.363, which address may be different from the correspondence address under § 1.33, when submitting the issue fee or in a separate later-filed paper. The fee address will be used by the Office for all correspondence directed to the patentee concerning maintenance fees. If no separate fee address is provided by the patentee under § 1.363, the correspondence address under § 1.33 will also be used for maintenance fee purposes.

Payment of Maintenance Fees

Transmittals of maintenance fees may be limited to a single patent or may involve several patents. If a transmittal involves several patents they should be listed in increasing numerical order. The following format is suggested for use when paying maintenance fees and any necessary surcharges. Although only the mandatory identification elements consisting of the patent number and United States application serial number, set forth in § 1.366(c) are required, the items referred to in § 1.366(d) should also be included to expedite processing of maintenance fees and any necessary surcharges. In addition,

February 22, 1987

Commissioner of Patents and Trademarks
Box M. Fee
Washington, D.C. 20231

Dear Sir:

Enclosed is a check drawn for the amount of \$1,500 for the payment of the maintenance fees on the following patents.

Patent Number	Serial Number	Patent Date	Application Filing Date	Payment Year	Small Entity	Amount Paid	Surcharge	Fee Code
P.P.5,188	380,062	Feb. 7, 1984	May 20, 1981	4	\$200.00			170
Re.31,522	481,494	Feb. 14, 1984	April 1, 1983	4	-	\$200.00	\$100.00	170/176
*(4,374,741		(Feb. 22, 1983)	(July 21, 1981)	4	-	\$200.00		170
4,429,419	339,620	Feb. 7, 1984	Jan. 15, 1982	4	No	\$400.00	-	173
4,429,433	412,101	Feb. 7, 1984	Aug. 27, 1982	4	Yes	\$200.00	-	273
4,429,439	458,474	Feb. 7, 1984	Jan. 17, 1983	4		\$200.00		170
**4,432,000	380,681	Feb. 14, 1984	Aug. 26, 1981					
Subtotals						\$1,400.00	\$100.00	
Total Amount Paid						\$1,500.00		

The Commissioner is hereby authorized to charge any deficiency in the required fee or to credit any overpayment to Account No. 12-3456.

Respectfully submitted,

John Doe
(703) 557-3054

*Note: Information from original patent is included in parenthesis for the reissue patent for which payment is being made.

**Note: Application filing Date is the PCT International Filing Date.

The indication of the fee code used by the Patent and Trademark Office would assist in proper financial crediting within the Office. It is also suggested that the telephone number of the person submitting the payment be supplied.

Environmental, energy, and other considerations: The rule change will not have a significant impact on the quality of the human environment or conservation of energy resources.

The rule change is in conformity with the requirements of the Regulatory Flexibility Act (Pub. L. 96-354), Executive Order 12291, and the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 *et seq.*

The General Counsel of the Department of Commerce certified to the Small Business Administration that the rule change will not have a significant adverse economic impact on a substantial number of small entities (Regulatory Flexibility Act, Pub. L. 96-354). Public Law 97-247 has taken into consideration the impact it may have on small entities.

The Patent and Trademark Office has determined that this rule change is not a major rule under Executive Order 12291. The annual effect on the economy will be less than \$100 million. There will be no major increase in costs or prices for consumers, individual industries, federal, state, or local government agencies, or geographic regions. There will be no significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

The maintenance fee payment information collection requirement contained in the final rules has been submitted to OMB for review under Section 3504(h) of the Paperwork Reduction Act. Comments relating to this requirement should be directed to the Office of Information and Regulatory Affairs of OMB, Attention: Desk Officer for Commerce, Patent and Trademark Office.

List of Subjects in 37 CFR Part 1

Administrative practice and procedure, Authority delegations (government agencies), Conflict of interests, Courts, Inventions and patents, Lawyers.

Notice is hereby given that pursuant to the authority granted to the Commissioner of Patents and Trademarks by 35 U.S.C. 6, Pub. L. 96-517 and Pub. L. 97-247, the Patent and Trademark Office is amending Title 37 of the Code of Federal Regulations as set forth below.

Part I [Amended]

37 CFR, Part I, is amended as follows:

1. Section 1.1 is amended by adding a new paragraph (d) to read as follows:

§ 1.1 All communications to be addressed to Commissioner of Patents and Trademarks.

(d) Payments of maintenance fees in patents and other communications relating thereto should be additionally marked "Box M. Fee."

1.9 [Amended]

2. Paragraph (d) of 1.9 is amended by changing the citation "13 CFR 121.3-18, published on Sept. 30, 1982 at 47 FR 43273." to "13 CFR 121.12." and by changing the words "121.3-18 Definition of small business for paying reduced patent fees under Title 35, U.S. Code" to "121.12 Small business for paying reduced patent fees."

3. Section 1.17 is amended by adding to the end of paragraph (h) the following:

1.17 Patent application processing fees.

(h) ***

- 1.377 - for review of decision refusing to accept and record payment of a maintenance fee filed prior to expiration of patent

- 1.378(e) - for reconsideration of decision on petition refusing to accept delayed payment of maintenance fee in expired patent

4. Section 1.19 is amended by adding new paragraphs (f) and (g) to read as follows:

1.19 Document supply fees.

(f) Microfiche copy of patent file record.....\$10.00

(g) Uncertified statement as to status of the payment of maintenance fees due on a patent or expiration of a patent \$3.00

5. Section 1.20 is amended by adding new paragraphs (k), (l), and (m) to read as follows:

1.20 Post-issuance fees.

(k) Surcharge for paying a maintenance fee during the 6-month grace period following the expiration of three years and six months, seven years and six months, and eleven years and six months after the date of the original grant of a patent based on an application filed on or after Dec. 12, 1980 and before Aug. 27, 1982.....\$100.00

(l) Surcharge for paying a maintenance fee during the 6-month grace period following the expiration of three years and six months, seven years and six months, and eleven years and six months after the date of the original grant of a patent based on an application filed on or after Aug. 27, 1982:

By a small entity (§ 1.9(f))\$50.00
By other than a small entity\$100.00

(m) Surcharge for accepting a maintenance fee after expiration of a patent for non-timely payment of a maintenance fee on a patent based on an application filed on or after Aug. 27, 1982, where the delay in payment is shown to the satisfaction of the Commissioner to have been unavoidable\$500.00

6. Section 1.33 is amended by adding a new paragraph (d) to read as follows:

§ 1.33 Correspondence respecting patent applications, reexamination proceedings, and other proceedings.

(d) A "correspondence address" or change thereto may be filed with the Patent and Trademark Office during the enforceable life of the patent. The "correspondence address" will be used in any correspondence relating to maintenance fees unless a separate "fee address" has been specified. See § 1.363 for "fee address" used solely for maintenance fee purposes.

7. A new center heading and § 1.362 is added to Subpart B to read as follows:

Maintenance Fees

§ 1.362 Time for payment of maintenance fees.

(a) Maintenance fees as set forth in § 1.20(e)-(j) are required to be paid in all patents based on applications filed on or after Dec. 12, 1980, except as noted in paragraph (b) of this section, to maintain a patent in force beyond 4, 8 and 12 years after the date of grant.

(b) Maintenance fees are not required for plant patents based on applications filed on or after Aug. 27, 1982 or for any design patents. Maintenance fees are not required for a reissue patent if the patent being reissued did not require maintenance fees.

(c) The application filing dates for purposes of payment of maintenance fees are as follows:

(1) For an application not claiming benefit of an earlier application, the actual United States filing date of the application.

(2) For an application claiming benefit of an earlier foreign application under 35 U.S.C. 119, the United States filing date of the application.

(3) For a continuing (continuation, division, continuation-in-part) application claiming the benefit of a prior patent ap-

plication under 35 U.S.C. 120, the actual United States filing date of the continuing application.

(4) For a reissue application, the United States filing date of the original non-reissue application on which the patent reissued is based.

(5) For an international application which has entered the United States as a Designated Office under 35 U.S.C. 371, the international filing date granted under Article 11(1) of the Patent Cooperation Treaty which is considered to be the United States filing date under 35 U.S.C. 363.

(d) Maintenance fees may be paid in patents without surcharge during the periods extending respectively from:

(1) 3 years through 3 years and 6 months after grant for the first maintenance fee.

(2) 7 years through 7 years and 6 months after grant for the second maintenance fee, and

(3) 11 years through 11 years and 6 months after grant for the third maintenance fee.

(e) Maintenance fees may be paid with the surcharge set forth in § 1.20(k) or (l) during the respective grace periods after:

(1) 3 years and 6 months and through the day of the 4th anniversary of the grant for the first maintenance fee,

(2) 7 years and 6 months and through the day of the 8th anniversary of the grant for the second maintenance fee, and

(3) 11 years and 6 months and through the day of the 12th anniversary of the grant for the third maintenance fee.

(f) If the last day for paying a maintenance fee without surcharge set forth in paragraph (d) of this section, or the last day for paying a maintenance fee with surcharge set forth in paragraph (e) of this section, falls on a Saturday, Sunday, or a federal holiday within the District of Columbia, the maintenance fee and any necessary surcharge may be paid under paragraph (d) or paragraph (e) respectively on the next succeeding day which is not a Saturday, Sunday, or federal holiday.

(g) Unless the maintenance fee and any applicable surcharge is paid within the time periods set forth in paragraphs (d), (e) or (f) of this section, the patent will expire as of the end of the grace period set forth in paragraph (e) of this section. A patent which expires for the failure to pay the maintenance fee will expire at the end of the same date (anniversary date) the patent was granted in the 4th, 8th, or 12th year after grant.

8. A new § 1.363 is added to Subpart B to read as follows:

§ 1.363 Fee address for maintenance fee purposes.

(a) All notices, receipts, refunds, and other communications relating to payment or refund of maintenance fees will be directed to the correspondence address used during prosecution of the application as indicated in § 1.33(a) unless:

(1) a "fee address" for purposes of payment of maintenance fees is set forth when submitting the issue fee, or

(2) a change in the correspondence address for all purposes is filed after payment of the issue fee, or

(3) a "fee address" or a change in the "fee address" is filed for purposes of receiving notices, receipts and other correspondence relating to the payment of maintenance fees after the payment of the issue fee, in which instance, the latest such address will be used.

(b) An assignment of a patent application or patent does not result in a change of the "correspondence address" or "fee address" for maintenance fee purposes.

9. A new § 1.366 is added to Subpart B to read as follows:

§ 1.366 Submission of maintenance fees.

(a) The patentee may pay maintenance fees and any necessary surcharges, or any person or organization may pay maintenance fees and any necessary surcharges on behalf of a patentee. Authorization by the patentee need not be filed in the Patent and Trademark Office to pay maintenance fees and any necessary surcharges on behalf of the patentee.

(b) A maintenance fee and any necessary surcharge submitted for a patent must be submitted in the amount due on the date the maintenance fee and any necessary surcharge are paid and may be paid in the manner set forth in § 1.23 or by an authorization to charge a deposit account established pursuant to § 1.25. Payment of a maintenance fee and any necessary surcharge or the authorization to charge a deposit account must be submitted within the periods set forth in § 1.362(d), (e) or (f). Any payment or authorization of maintenance fees and surcharges filed at any other time will not be accepted and will not serve as a payment of the maintenance fee except insofar as a delayed payment of the maintenance fee is accepted by the Commissioner in an expired patent pursuant to a petition filed under § 1.378. Any authorization to charge a deposit account must authorize the immediate charging of the maintenance fee and any necessary surcharge to the deposit account. Payment of less than the required amount, payment in a manner other than that set forth in § 1.23, or the filing of an authorization to charge a deposit account having insufficient funds will not constitute payment of a maintenance fee or surcharge on a patent. The certificate of mailing procedures of either § 1.8 or § 1.10 may be utilized in paying maintenance fees and any necessary surcharges.

(c) In submitting maintenance fees and any necessary surcharges, identification of the patents for which maintenance fees are being paid must include the following:

- (1) the patent number, and
- (2) the serial number of the United States application for the patent on which the maintenance fee is being paid.

(d) Payments of maintenance fees and any surcharges should identify the fee being paid for each patent as to whether it is the 3 1/2, 7 1/2 or 11 1/2 year fee, whether small entity status is being changed or claimed, the amount of the maintenance fee and any surcharge being paid, any assigned payor number, the patent issue date and the United States application filing date. If the maintenance fee and any necessary surcharge is being paid on a reissue patent, the payment must identify the reissue patent by reissue patent number and reissue application serial number as required by paragraph (c) of this section and should also include the original patent number, the original patent issue date and the original United States application filing date.

(e) Maintenance fee payments and surcharge payments relating thereto must be submitted separate from any other payments for fees or charges, whether submitted in the manner set forth in § 1.23 or by an authorization to charge a deposit account. If maintenance fee and surcharge payments for more than one patent are submitted together, they should be submitted on as few sheets as possible with the patent numbers listed in increasing patent number order. If the payment submitted is insufficient to cover the maintenance fees and surcharges for all the listed patents, the payment will be applied in the order the patents are listed, beginning at the top of the listing.

(f) Notification of any change in status resulting in loss of entitlement to small entity status must be filed in a patent prior to paying, or at the time of paying, the earliest maintenance fee due after the date on which status as a small entity is no longer appropriate. See § 1.28(b).

(g) Maintenance fees and surcharges relating thereto will not be refunded except in accordance with §§ 1.26 and 1.28(a).

10. A new § 1.377 is added to Subpart B to read as follows:

§ 1.377 Review of decision refusing to accept and record payment of a maintenance fee filed prior to expiration of patent.

(a) Any patentee who is dissatisfied with the refusal of the Patent and Trademark Office to accept and record a maintenance fee which was filed prior to the expiration of the patent may petition the Commissioner to accept and record the maintenance fee.

(b) Any petition under this section must be filed within 2 months of the action complained of, or within such other time as may be set in the action complained of, and must be accompanied by the fee set forth in § 1.17(h). The petition may include a request that the petition fee be refunded if the refusal to accept

and record the maintenance fee is determined to result from an error by the Patent and Trademark Office.

(c) Any petition filed under this section must comply with the requirements of paragraph (b) of § 1.181 and must be signed by an attorney or agent registered to practice before the Patent and Trademark Office, or by the patentee, the assignee, or other party in interest. Such petition must be in the form of a verified statement if made by a person not registered to practice before the Patent and Trademark Office.

11. A new § 1.378 is added to Subpart B to read as follows:

§ 1.378 Acceptance of delayed payment of maintenance fee in expired patent to reinstate patent based on application filed on or after Aug. 27, 1982.

(a) The Commissioner may accept the payment of any maintenance fee due on a patent based on an application filed on or after Aug. 27, 1982, after expiration of the patent if, upon petition, the delay in payment of the maintenance fee is shown to the satisfaction of the Commissioner to have been unavoidable and if the surcharge required by § 1.20(m) is paid as a condition of accepting payment of the maintenance fee. If the Commissioner accepts payment of the maintenance fee upon petition, the patent shall be considered as not having expired, but will be subject to the conditions set forth in 35 U.S.C. 41(c)(2).

(b) Any petition to accept the delayed payment of a maintenance fee filed under paragraph (a) of this section within six months of the expiration of the patent must include:

- (1) the required maintenance fee set forth in § 1.20(h)-(j);
- (2) the surcharge set forth in § 1.20(m); and
- (3) a showing that the delay was unavoidable since reasonable care was taken to ensure that the maintenance fee would be paid timely. The showing must enumerate the steps taken to ensure timely payment of the maintenance fee.

(c) Any petition to accept the delayed payment of a maintenance fee filed under paragraph (a) of this section more than six months after the expiration of the patent must include:

- (1) the required maintenance fee set forth in § 1.20(h)-(j);
- (2) the surcharge set forth in § 1.20(m); and
- (3) a showing that the delay was unavoidable since reasonable care was taken to ensure that the maintenance fee would be paid timely and the failure to timely pay the maintenance fee was due entirely to circumstances outside of the control of the patentee. The showing must enumerate the steps taken to ensure timely payment of the maintenance fee and the circumstances which were outside of the control of the patentee and those acting on behalf of the patentee in paying the maintenance fee. The showing must be sufficient in scope and content to meet the heavy burden of proof required to show that a delay in payment of the maintenance fee of more than six months after expiration of the patent was unavoidable.

(d) Any petition under this section must be signed by an attorney or agent registered to practice before the Patent and Trademark Office, or by the patentee, the assignee, or other party in interest. Such petition must be in the form of a verified statement if made by a person not registered to practice before the Patent and Trademark Office.

(e) Reconsideration of a decision refusing to accept a maintenance fee upon petition filed pursuant to paragraph (a) of this section may be obtained by filing a petition for reconsideration within two months of, or such other time as set in, the decision refusing to accept the delayed payment of the maintenance fee. Any such petition for reconsideration must be accompanied by the petition fee set forth in § 1.17(h). After decision on the petition for reconsideration, no further reconsideration or review of the matter will be undertaken by the Commissioner. If the delayed payment of the maintenance fee is not accepted, the maintenance fee and the surcharge set forth in § 1.20(m) will be refunded following the decision on the petition for reconsideration, or after the expiration of the time for filing such a petition for reconsideration, if none is filed. The fee set forth

in § 1.17(h) for filing the petition for reconsideration will not be refunded unless the refusal to accept and record the maintenance fee is determined to result from an error by the Patent and Trademark Office.

July 30, 1984

GERALD J. MOSSINGHOFF,
*Commissioner of Patents
and Trademarks.*

[1046 O.G. 28]

(46) Maintenance Fee Payments

The Patent and Trademark Office (PTO) has received inquiries concerning the PTO'S refusal to accept payment of a maintenance fee in two fact situations.

A. The PTO has refused to accept authorization to charge a maintenance fee and/or surcharge to a Deposit Account unless the paper containing the authorization to charge was timely filed and included an authorizing signature. Upon reconsideration, this requirement for a signature to authorize a maintenance fee and/or surcharge to be charged to a Deposit Account is abolished since papers concerning maintenance fees are not considered to be papers filed in the application under 37 CFR 1.33(a).

Request for refunds due to the above-noted change in practice should be directed to the Refund Section of the Accounting Division of the Office of Finance.

B. The PTO has refused to accept the maintenance fee and surcharge specified in a Maintenance Fee Reminder mailed prior to April 17, 1989, but paid on or after April, 17, 1989. New fees effective April 17, 1989, raised the amount due for maintenance fees and surcharges. However, Maintenance Fee Reminders mailed prior to that date reflected the old fees. Some patentees have submitted the amount requested on the Maintenance Fee Reminder only to have the PTO refuse to accept those fees due as being insufficient. Often, the PTO notice that the amount tendered is insufficient is received after the expiration date of the patent under 37 CFR 1.362(g).

The amount of the maintenance fee required by statute is based upon the date of effective receipt in the PTO. The amount of the surcharge needed for payment during the six month grace period is set by regulation. The PTO will accept the payment submitted under the following conditions:

(1) the total amount submitted for the maintenance fee and surcharge was at least the amount of the maintenance fee required by statute based upon the date of receipt in the PTO and was the total amount requested in the Maintenance Fee Reminder for the patent;

(2) the amount submitted was paid prior to expiration of the patent under 37 CFR 1.362(g);

(3) the insufficiency in payment of the maintenance fee and surcharge is discovered after expiration of the patent under 37 CFR 1.362(g); and

(4) a petition under 37 CFR 1.183 is promptly filed after discovery of the insufficiency in payment of the maintenance fee and surcharge. The petition must request (a) that the amount previously paid be accepted as the maintenance fee required by statute; (b) that the amount submitted above that required for the maintenance fee be accepted as the surcharge; (c) that the holding of expiration be withdrawn; and (d) that no petition fee be required. The petition must state the date the insufficiency in payment of the maintenance fee and surcharge was discovered. The petition must also include a statement that the person who authorized or instructed that the maintenance fee and surcharge be paid was not aware of the fee increase. Such statement must be verified if made by a person not registered to practice before the PTO.

Petition under 37 CFR 1.183 should be directed to the Office of the Deputy Assistant Commissioner for Patents.

October 4, 1989

DONALD J. QUIGG
*Assistant Secretary and Commissioner
of Patents and Trademarks*

[1107 OG 78]

(47) Mailing of Maintenance Fee Statements and Related Notices

On June 23, 1992, the Office published a notice at 1139 OG 123 requesting comments from maintenance fee customers regarding the impact of planned changes in procedures that would enable the Patent Maintenance Division to reach the goal of returning statements within 30 days of initial receipt and mailing all other maintenance fee related notices within 2 weeks. The introduction of automated mailing equipment is a key initiative which would allow the Division to promptly and efficiently process the more than 200,000 mailings this fiscal year.

Continuing to use today's manual mailing procedures will result in a 60 day turnaround time for customers to receive their statements unless an additional 3 staff members are hired at an annual cost of \$60,000. An automatic mailing system can be purchased at a onetime cost of \$15,000 allowing the Office to return statements in 30 calendar days without hiring additional staff.

Three specific changes to current practices are required to ensure that the Office can take full advantage of automated mailing technology to improve the overall level of services to the greatest number of customers.

First, the correspondence submitted to the Office at the time the maintenance fee is paid will no longer be returned with the payment statement. Only the payment statement itself will be returned. Should any questions arise regarding payment, proof of payment could continue to be verified through presentation of the statement, a cancelled check, or by reference to the Patent and Trademark Office deposit account statement. The Office's automated maintenance fee records and financial systems would continue to record and document all maintenance fee payments.

Second, the mailing of maintenance fee reminder notices will be streamlined by eliminating the "Part B" copy. Less than 2% of the patent owners who submit payment after receipt of the reminder notices return the "Part B" copy. Eliminating the mailing of this copy will increase the number of statements which can be mailed daily and eliminate the need to design and purchase specially notched paper for proper collation with the new equipment.

Third, the mailing of patent expiration notices would be streamlined by eliminating the "Part B" copy. Less than 0.5% of these "Part B" copies are returned by owners who wish to communicate with the Office after the receipt of the notice. Eliminating the mailing of this copy will also increase the number of notices which can be mailed daily and eliminate the need for notched paper.

Informal discussions with a cross-section of patent maintenance fee customers confirm that the impact of the three changes would be minimal, especially if the alternative were long delays in receiving statements and/or additional costs to the Office. No negative comments were received in response to the June 23, 1992, notice in the *Official Gazette*.

The above three changes will take effect with the installation of mailing equipment on Sept. 21, 1992.

In addition to the above changes, the Patent Maintenance Division is now accepting maintenance fee payments, when charged to a deposit account, via facsimile. Other services in regards to patent maintenance fee related documents are also available via facsimile. The Patent Maintenance Division fax number is (703) 308-7110.

If you have any question or concerns regarding the changes to patent maintenance processing or facsimile services, please contact:

(48) **Department of Commerce
Patent and Trademark Office
37 CFR Part I
[Docket No. 50725-5025]**

Revision of Patent Fees

Agency: Patent and Trademark Office, Commerce

Action: Final Rule

Summary: The Patent and Trademark office is amending the rules of practice in patent cases, Part I of title 37, Code of Federal Regulations to adjust fee amounts. This action is necessary at this time because operating costs have increased over the past three years and the Commissioner is authorized by § 41(f) of title 35, United States Code, to adjust fees established in § 41(a) and § 41(b) of title 35, United States Code, on Oct. 1, 1985, and every third year thereafter, to reflect any fluctuations occurring during the previous three years in the Consumer Price Index. Fees for other processing, services or materials related to patents as provided by § 41(d) and § 376 of title 35, United States Code, are being adjusted to recover the estimated average cost to the Office of such processing, services or materials.

Effective Date: Oct. 5, 1985.

For Further Information Contact: Frances Michalkewicz by telephone at (703) 557-1610 or by mail marked to her attention and addressed to the Commissioner of Patents and Trademarks, Washington, D.C. 20231.

Supplementary Information: This rule change is designed primarily to adjust patent fees because costs have increased and the Commissioner is authorized to (1) adjust statutory patent fees set forth in § 41(a) and § 41(b) of title 35, United States Code, to reflect fluctuations occurring during the previous three years in the Consumer Price Index (CPI), as authorized by § 41(f) of title 35, United States Code, (2) adjust fees for processing, services, or materials related to patents which have been established by the Commissioner in accordance with § 41(d) of title 35, United States Code, to recover the estimated average cost to the Office of such processing, services or materials, and (3) adjust fees for filing and processing an application under the Patent Cooperation Treaty which have been established by the Commissioner to recover the estimated average cost of such processing in accordance with Section 376 of title 35, United States Code.

Adjustments to fees for filing and processing a trademark application and for other processing, services or materials related to trademarks were not proposed at this time, pending review of trademark automation cost requirements.

A notice of proposed rulemaking was published in the *Federal Register* on June 21, 1985, at 50 FR 25896-25902. Corrections of typographical errors were published on July 1, 1985, at 50 FR 27030, and on July 15, 1985, at 50 FR 28596. The notice also was published in the *Official Gazette* on July 2, 1985, at Vol. 1056, pages 6 through 25. An oral hearing was held on July 18, 1985. Fifteen written letters and statements were submitted. One person testified at the oral hearing. Full consideration has been given to all of these letters, statements, and testimony.

Background Information: Patent and Trademark Office fees are authorized by sections 41 and 376 of title 35, United States Code. Section 41(a) of title 35, United States Code, establishes a number of statutory fees. Among the more significant of these are fees for filing a patent application and issuing a patent. Certain other fees, such as appeal fees, the fee for filing a disclaimer, fees for filing petitions seeking to revive an abandoned application and for extensions of time also are set in § 41(a) of title 35, United States Code. Section 41(b) of title 35, United States Code, sets forth the statutory fees for maintaining a patent in force if the application was filed on or after Aug. 27, 1982.

The provisions of Public Law 96-517 also authorize maintenance fees for applications other than design and plant patent applications filed on or after Dec. 12, 1980 and before Aug. 27, 1982. These maintenance fees are to recover 25 percent of the estimated cost to the Office of processing patent applications.

Section 1 of Public Law 97-247 authorized the reduction by 50 percent in the fees paid under § 41(a) and § 41(b) of title 35, United States Code, by independent inventors, small business concerns, and nonprofit organizations, who meet the definitions established. This authorization will expire on Sept.

30, 1985. Legislation has been introduced to authorize this reduction for an additional three years. If such authority is not continued, the small entity reduction will be rescinded and appropriate amendments to the regulations will be made.

Section 41(f) of title 35, United States Code, provides that fees established in § 41(b) of title 35, United States Code, "may be adjusted by the Commissioner on Oct. 1, 1985, and every third year thereafter, to reflect any fluctuations occurring during the previous three years in the Consumer Price Index, as determined by the Secretary of Labor." Section 41(f) also provides that changes of less than one percent may be ignored.

Policy for applying the Consumer Price Index: The Department of Labor's Consumer Price Index (CPI) is made public approximately twenty-one days after the end of the month being calculated. The time lag between the initiation and the completion of the rulemaking process dictated that the Mar. through Sept. 1985 inflation rate be projected in the original rulemaking proposal. This estimate resulted in a cumulative three-year CPI of 11.7 percent applied to patent fees.

Based upon actual data through June 1985 and projecting the CPI to Sept. 30, 1985, the Administration's revised projected cumulative CPI for the three-year (1982-1985) period is 11.8 percent. The Patent and Trademark Office has used the 11.8 percent projection in adjusting the fees established in § 41(a) and § 41(b) of title 35, United States Code. The revised CPI projection has not caused a change from the proposal in any of the § 41(a) and § 41(b) fees.

After application of the 11.8 percent projected fluctuation in the CPI to fees set forth in § 41(a) and § 41(b), amounts for all non-small entity fees were rounded by applying standard arithmetical rules so that the amounts rounded would be de minimis and convenient to the user. Fees of \$100 or more were rounded to the nearest \$10. Fees below \$100 were rounded to the nearest even number so that all comparable small entity fees would be in whole numbers. Section 41(d) of title 35, United States Code, provides that the "Commissioner will establish fees for all other processing, services, or materials related to patents" which are not covered in § 41(a) and § 41(b) of title 35, United States Code, "to recover the estimated average cost to the Office of such processing, services or materials."

Section 376 of title 35, United States Code, authorizes the Commissioner to set fees for patent applications filed under the Patent Cooperation Treaty. The fees under the Patent Cooperation Treaty are keyed to full cost recovery of the processing costs under the Treaty.

The general guidelines used by the Patent and Trademark Office in determining the non-statutory fees are set forth in OMB Circular A-25. Costs were determined from the best available records and included direct and indirect costs to the Office of carrying out the activity.

Since these non-statutory fees are expected to remain in place for the three year fee cycle 1986-1988, the calculated costs were then adjusted by a mid-cycle inflation rate of 6.21 percent derived from the Administration's inflation projection. After application of the projected mid-cycle inflation rate, amounts were rounded by applying standard arithmetical rules so that the amounts rounded would be de minimis and convenient to the user. Fees of \$100 or more were rounded to the nearest \$10. Fees between \$2 and \$99 were rounded to the nearest whole number. Fees under \$2 were rounded for convenience.

The fees established under § 41(d) and § 376 of title 35, United States Code have been modified from the proposal. For the first fee cycle (1983-1985), fees established under § 41(d) and § 376 were set in the aggregate to recover the estimated average cost to the Office of processing, services and materials as defined in PTO budget documents. Because of the significant increase in fees that was instituted on Oct. 1, 1982, as well as the establishment of new fees, the PTO did not have the necessary experience to accurately predict (nor could it control) fee volumes for the first fee cycle. First cycle fees were thus set at levels sufficient to maintain financial solvency despite possible fluctuations in costs or in workload. Fee amounts in most cases also were set at convenient integers (e.g., \$5 or \$10). For the second fee cycle (1986-1988), the PTO had proposed to set fees established under § 41(d) and § 376 using the same methodology. Several comments to the proposed rules suggested that the PTO should establish § 41(d) and § 376 fees to more precisely recover the estimated average cost to the Office of the processing, service or material. The fees have been

modified to reflect the following: (1) PTO experience over the past two and one-half years in predicting fee volumes, (2) virtual elimination of the reserve income for fluctuations in cost or workload, and (3) greater reliance upon and use of the individual fee costs developed by the PTO's Office of Finance.

It is intended that the amount of any fee due and payable on or after Oct. 5, 1985 is the amount set in this rulemaking. For purposes of determining the amount of the fee to be paid, the date of mailing indicated on a proper Certificate of Mailing, where authorized under § 1.8 of title 37, Code of Federal Regulations, will be considered to be the date of receipt in the Office. A "Certificate of Mailing under § 1.8" is *not* "proper" for items which are specifically excluded from the provisions of § 1.8. Section 1.8 of title 37, Code of Federal Regulations, should be consulted for those items for which a Certificate of Mailing is *not* "proper". Such items include, *inter alia*, the filing of national and international applications for patents and the filing of trademark applications. The provisions of § 1.10 of title 37, Code of Federal Regulations relating to filing of papers and fees by "Express Mail" with certificate, however, do apply to *any paper or fee* (including patent and trademark applications) to be filed in the Office. If an application or fee is filed by "Express Mail" with a certificate of mailing dated on or after Oct. 5, 1985, the amount of the fee to be paid is the fee established herein if a change is being made in the fee.

It is further intended that the amount due and payable for services provided in Fiscal Year 1986 will be the amount set in this rulemaking even if the fee becomes due prior to Oct. 5, 1985. Such fees include, but are not limited to, the annual service charge for subscription services (§ 1.19(c)(1)) and the annual rental for a delivery box (§ 1.21(d)).

In order to ensure clarity in the implementation of the fee proposals, a discussion of specific sections is set forth below:

Discussion of Specific Rules

Section 1.16 National application filing fees

Section 1.16 is amended to adjust patent application filing fees established in § 41(a) of title 35, United States Code and set forth in paragraphs (a)-(d) and (f)-(j) of this section to reflect fluctuations in the Consumer Price Index.

Section 1.16, paragraph (e) is amended to adjust the patent application surcharge fee authorized by § 111 of title 35, United States Code. Paragraph (e) has been modified from the proposal to limit the adjustment to the surcharge fee to changes which occurred during the past three years in the Consumer Price Index.

Section 1.17 Patent application processing fees

Section 1.17 is amended to adjust patent application processing fees established in § 41(a) of title 35, United States Code, and set forth in paragraphs (a)-(g), (l) and (m) of this section to reflect fluctuations in the Consumer Price Index. The wording of paragraph (l) has been broadened to include reference to applications abandoned under § 371(d) of title 35, United States Code.

Section 1.17, paragraphs (h)-(k) are amended to adjust the patent application processing fees authorized by § 41(d) of title 35, United States Code, to recover the estimated average cost to the Office of such processing. Paragraphs (h)-(k) have been modified from the proposal to more precisely recover the estimated average cost to the Office of processing petitions to the Commissioner, public use proceedings, and non-English language specifications.

Section 1.18 Patent issue fees

Section 1.18 is amended to adjust patent issue fees established in § 41(a) of title 35, United States Code and set forth in paragraphs (a)-(c) of this section to reflect fluctuations in the Consumer Price Index.

Section 1.19 Document supply fees

Section 1.19 is amended to adjust the fees authorized by § 41(d) of title 35, United States Code for services and materials as set forth in paragraphs (a)-(c), (e) and (f) of this section to recover the estimated average cost to the Office of the specified

services and materials. Paragraphs (a)-(c) have been modified from the proposal to more precisely recover the estimated average cost to the Office of supplying the documents specified in these paragraphs. Section 1.19 has been modified further to reduce the fees specified in paragraphs (e) and (f), which were not proposed for adjustment to more precisely recover the estimated average cost to the Office of supplying the documents.

Section 1.19, paragraph (a) is amended further to clarify the services and documents provided. It would provide for copies of specific documents at a flat fee. Copies of general Office records would be provided at a per page fee. Paragraph (a)(4) has been modified from the proposal to provide copies of a patent file wrapper and its contents at \$75 for each 200 pages or a fraction thereof.

Section 1.19, paragraph (b) is amended further to delete subparagraph (3). A flat fee for comparing and certifying copies of documents made from Office records is provided in new paragraph (i) of this section.

Section 1.19, paragraph (c) is amended further to provide for ten subclasses with the annual service charge.

Section 1.19 is amended to provide in new paragraph (h) a \$10 per document flat fee for an uncertified copy of a non-United States patent document. This fee would apply to copies of foreign patent applications such as those which are published at 18 months or when allowable for opposition.

Section 1.19 is amended to provide in new paragraph (i) a flat fee for comparison and certification of each copy of a document made from Office records but not prepared by the Office.

Section 1.19 is amended to provide in new paragraph (j) a fee for duplicate filing receipts and corrected filing receipts due to applicant error.

Paragraphs (i) and (j) have been modified from the proposal to more precisely recover the estimated average cost to the Office of supplying the documents specified.

Section 1.20 Post-issuance fees

Section 1.20, paragraphs (a)-(c) are amended to adjust patent post-issuance fees authorized by § 41(d) of title 35, United States Code, to recover the estimated average cost to the Office of such processing. Section 1.20 has been modified from the proposal to more precisely recover the estimated average cost to the Office of the post-issuance fees set forth in paragraphs (b)-(c). Section 1.20 has been modified further to reduce the fee set forth in paragraph (a), which was not proposed for adjustment, to more precisely recover the estimated average cost to the Office of providing a certificate of correction.

Section 1.20, paragraphs (d) and (h)-(j), are amended to adjust patent post-issuance fees established in § 41(a) and § 41(b) of title 35, United States Code, to reflect fluctuations in the Consumer Price Index.

Section 1.20, paragraphs (e)-(g), are amended to adjust post-issuance fees authorized by Section 2 of Public Law 98-622. These fees must be set at a level to eventually recover 25 percent of the estimated cost to the Office of processing patent applications. In order to achieve this level of recovery, these maintenance fees are adjusted to reflect fluctuations in the Consumer Price Index.

Section 1.20, paragraph (k), is amended to adjust the patent maintenance surcharge fee authorized by Section 2 of Public Law 96-517. Paragraph (k) has been modified from the proposal to limit the adjustment to the surcharge fee to changes which occurred during the past three years in the Consumer Price Index.

Section 1.20, paragraph (l), is amended to adjust the post-issuance fee authorized by § 41(b) of title 35, United States Code. Paragraph (l) has been modified from the proposal to limit the adjustment to the surcharge fee to changes which occurred during the past three years in the Consumer Price Index.

Section 1.21 Miscellaneous fees and charges

Section 1.21 is amended to adjust the miscellaneous fees and charges authorized by § 41(d) of title 35, United States Code and set forth in paragraphs (a)-(f), (h) and (i) of this section to recover the estimated average cost to the Office of such processing. Section 1.21 has been modified from the proposal to more precisely recover the estimated average cost to the Office

of the miscellaneous services for which fees were set forth in paragraphs (a)(2)-(a)(6), (b)(1), (d)-(f), (h)(1) and (i). Section 1.21 has been modified further to reduce the fees specified in paragraphs (c) and (h)(2), which were not proposed for adjustment, to more precisely recover the estimated average cost to the Office of those services.

Section 1.21, paragraph (g), is modified from the proposal to change the term "copy machine tokens" to "Copi-Sharecard."

Section 1.21, paragraph (k), is amended to change the word "section" to "part" to clarify that any charge not provided for in these rules would be made at actual cost.

Section 1.21 is amended to provide in new paragraph (m) a \$20 fee for processing checks returned "unpaid" by a bank.

Section 1.24 Coupons

Section 1.24 is amended to adjust the fee for the purchase of coupons for patents to make it comparable to the fee required for the purchase of U.S. patents.

Section 1.24 is amended to delete reference to forty cent coupons which are no longer sold by the Patent and Trademark Office.

Section 1.25 Deposit accounts

Section 1.25 is amended to establish a restricted subscription deposit account to be used exclusively for subscription orders of patent copies as issued. A minimum deposit of \$300 is required to establish and maintain, without payment of a monthly service fee, a restricted subscription deposit account.

Section 1.26 Refunds

Section 1.26 is amended to change paragraph (c) to provide for a refund of \$1,300 if the Commissioner decides not to institute reexamination proceedings. The \$1,300 refund would apply to those instances where the reexamination fee of \$1,770 under § 1.20(c) was paid. The current \$1,200 refund will be made in those cases where the current \$1,500 reexamination fee was paid.

Section 1.53 Serial number, filing date, and completion of application.

Section 1.53 is amended to change paragraph (c) to reduce to \$15 the handling fee charged in the event a specification or drawing is not submitted within the time period set by the Office. Section 1.53 has been modified to more precisely recover the estimated average cost to the Office of handling an application with missing parts.

Section 1.297 Publication of statutory invention registration

Section 1.297, paragraph (b), is amended to modify the statement to be printed on each statutory invention registration. The language of the statement is modified so as to be more easily understood.

Section 1.445 International application filing and processing fees

Section 1.445, paragraphs (a)(1)-(a)(4), are amended to adjust the fees authorized by § 376 of title 35, United States Code, for international application processing to recover the estimated average cost to the Office of such processing. The cost of the international search fee set forth in paragraph 1.445(a)(2)(i) has been reduced and the amount credited by the Office under paragraph 1.445(a)(2)(ii) is not changed. Paragraphs (a)(1) and (a)(3) have been modified from the proposal to more precisely recover the estimated average cost to the Office of processing international applications. However, the amount of the credit under 1.445(a)(4) is somewhat less than at present and is the same as in the proposed rules.

Section 1.445(a)(5) is amended to adjust the surcharge authorized by § 371(d) of title 35, United States Code. Paragraph (a)(5) has been modified from the proposal to limit the adjustment to the surcharge fee to changes which occurred during the past three years in the Consumer Price Index and

to provide for a small and large entity amount to be consistent with § 1.16(e).

Section 1.445(a)(6) is amended to adjust the processing fee for an English translation filed after 20 months from the priority date to recover the estimated average cost to the Office of such processing. Paragraph (a)(6) has been modified from the proposal to more precisely recover the estimated average cost to the Office of processing an English translation and to be consistent with § 1.17(k).

Section 1.446 Refund of international application filing and processing fees.

Section 1.446 is amended to delete paragraph (b). The substance of the deleted material is included in section 1.445, paragraph (a)(4).

Response to Comments on the Rules

Specific comments were received on a number of the proposed rule changes. Fifteen letters submitting written comments and eight questions by telephone were received. Oral testimony was presented by one person at the public hearing conducted on July 18, 1985. All of the written and oral comments were considered in adopting the changes set forth herein. The comments submitted appear below along with responses thereto.

Comment:

PTO fees are already too high and burdensome to the patent community.

Reply:

There has been no indication that PTO fees are burdensome to the patent community. In 1984, we expected to receive 107,000 patent applications and actually received 109,539. In 1985, we are currently receiving applications at an annual rate of approximately 116,000.

The PTO is adjusting patent processing and patent service fees because costs have increased. The Commissioner may adjust patent statutory fees by changes which have occurred during the past three years in the Consumer Price Index (CPI). This authority is provided by 35 U.S.C. 41(f). The intent of the Congress in indexing the statutory patent fees set in 1982 to the CPI was to assure that a precipitous drop in the level of recovery did not occur due to inflation. Indexing of statutory patent fees was not intended to raise additional revenues beyond the rate of inflation.

The Commissioner also is authorized to adjust non-statutory patent fees to recover the estimated average cost to the Office of processing, services and materials. This authority is provided by 35 U.S.C. 41(d). As previously discussed, several of the proposed fees have been modified to more precisely recover the estimated average cost to the Office of processing, materials and services.

Comment:

PTO has failed to abide by the provisions of Public Law 96-517 and the accompanying report (House Report 96-1307). Specifically, the PTO has failed to abide by the 50 percent recovery limitation for patent processing fees and the restrictions on the use of fee income.

Reply:

Public Law 96-517, although enacted into law, was never fully implemented because the Congress passed H.R. 6260 which was enacted as Public Law 97-247 on Aug. 27, 1982. Public Law 97-247 provides for an eventual 100 percent cost recovery through processing and maintenance fees except for the subsidy for certain small entities, and contains no restrictions on the use of income from fee revenues.

This rulemaking adjusts, by the Consumer Price Index (CPI), the patent processing (41(a)) and patent maintenance (41(b)) fees established by Public Law 97-247. The CPI adjustment allows the programs supported by § 41(a) and (b) fees to keep pace with inflation. Any growth in the aggregate rate of recovery of fees versus costs in this second cycle of fees is due primarily to the first time collection of maintenance fee receipts.

The restrictions on the use of income from fee revenues, which were included in House Report 96-1307 accompanying Public Law 96-517, were based upon a 50 percent recovery of patent costs from user fees. Then-Commissioner Mossinghoff testified before the Subcommittee on Courts, Civil Liberties, and Administration of Justice, when Congress was considering H.R.

6260, that the Administration's PTO user fee program was proposed to improve the quality of service at the PTO by reducing patent pendency, trademark pendency and automating patent and trademark operations. The Commissioner went on to say that "The major increases in the three program areas will be paid for by the sharp increase in user fees that we are recommending." The Congressional debate on this proposal indicates that the Subcommittee approved these innovative fee provisions in order to improve the level of patent and trademark services provided to users of the Office.

Comment:

Fees should relate to the actual "costs of processing patent applications" and should not include "overhead" expenses.

Reply:

The fees applicable to patent filing, issuance and maintenance fees were established by the Congress and set forth in 35 U.S.C. § 41(a) and (b). Regardless if Congress included "overhead" expenses when setting these statutory patent fees, these fees may be adjusted only to reflect the fluctuations in the CPI every three years. Fees for other processing, services or materials related to patents are set by the Commissioner pursuant to 35 U.S.C. 41(d) to recover the Office's estimated average cost. The legislative history of Public Law 97-247, including the accompanying House Report, does not provide guidance regarding how "estimated average cost" was to be determined. These fees were determined under the general guidelines of OMB Circular A-25, entitled "User Charges," which established general policies for developing an equitable and uniform system of charges for certain government services and property. Circular A-25 provides that a reasonable charge should be imposed to recover the full cost to the Government of rendering a service to an identifiable recipient, who receives a substantial benefit not accruing to the general public, e.g., receiving a patent. The concept of full cost recovery includes an appropriate overhead charge. Therefore, the inclusion of overhead expenses in calculating the costs of processing patent applications is appropriate.

Comment:

The PTO does not include a description of any cost containment measure.

Reply:

The PTO has taken all possible measures to contain costs. During fiscal year 1985, a zero-based analysis was conducted of all programs and their associated funding. The purpose of the review was to assure that adequate resources were available to meet the PTO's most important priorities while addressing unanticipated costs such as, the full absorption of the fiscal year 1985 pay raise, new pay scale for patent examiners, higher postal and telephone rates, greater use of PTO services, etc. The PTO's annual budget request is thoroughly reviewed by the Department of Commerce, by the Office of Management and Budget, and by the Congressional Appropriations Committees prior to enactment. The PTO is complying with the President's Deficit Reduction Program. The fiscal year 1986 budget request reflects reductions to travel, printing and consultants as required by the Deficit Reduction Act of 1984; administrative cost savings; and grade reductions and pay cuts. The PTO program to reduce patent pendency, once achieved in 1987, will require less resources than are currently expended. The Automation program, too, as it achieves its major milestones, will deliver cost benefits.

Comment:

The PTO has proposed to adjust fees because costs have increased but they did not include an explanation of how costs were calculated.

Reply:

Patent statutory fees, which are set forth in 35 U.S.C. 41(a) and (b), can be adjusted on Oct. 1, 1985 and every three years thereafter to reflect fluctuations which have occurred in the Consumer Price Index (CPI). The costs of processing a patent application from receipt to issue or abandonment were calculated in 1982 at the time the present fees were set by statute. The most significant elements of processing a patent application are compensation costs, space and the costs incurred for printing the *Official Gazette* and patent grants.

As a result of these increases to the major costs incurred in the processing of a patent application, the PTO is adjusting the statutory 41(a) and (b) patent fees by the full CPI of 11.8 percent in order to recover the projected budgeted collections for patent processing for the years 1986-1988.

Non-statutory patent and patent service fees are being set to recover the estimated average cost to the Office over the next three years (1986-1988) of processing, services and materials. Costs for goods and services were determined under the general guidelines set forth in OMB Circular A-25 entitled "User Charges," which establishes general policies for developing an equitable and uniform system of charges for certain Government services and property. The cost of all processing, services and/or materials associated with each non-statutory (§ 41(d)) patent fee was determined. Since these fees are expected to remain in place for three years (1986-1988), each cost was adjusted by a mid-cycle inflation rate of 6.21 percent which was derived from the Administration's 1986-1988 inflation projection.

Comment:

The PTO has proposed to set § 41(d) fees at a level which exceeds the estimated average cost to the Office. PTO's cost calculations do not support the proposed § 41(d) fees.

Reply:

Fees established pursuant to 35 U.S.C. 41(d) and 376, non-statutory patent and patent service fees, are being set to recover the estimated average cost to the Office over the next three years (1986-1988) of processing, services and materials. Costs for goods and services were determined under the general guidelines set forth in OMB Circular A-25 entitled "User Charges," which establishes general policies for developing an equitable and uniform system of charges for certain Government services and property.

The PTO employed cost-finding techniques for determining the costs of all processing, services and/or materials associated with each non-statutory patent fee. These costs were documented by the Director, Office of Finance and reviewed by each responsible Assistant Commissioner. Since the revised fees are expected to remain in place for the next three years (1986-1988), each cost was adjusted by the mid-cycle inflation rate of 6.21 percent. The fee was then set based upon this inflated cost.

For the first fee cycle (1983-1985), fees established under 41(d) and 376 were set in the aggregate to recover the estimated average cost to the Office of processing, services and materials as defined in PTO budget documents. Because of the significant increase in fees that was instituted on Oct. 1, 1982, as well as the establishment of new fees, the PTO did not have the necessary experience to accurately predict (nor could it control) fee volumes for the first fee cycle. First cycle fees were thus set at levels sufficient to maintain financial solvency despite possible fluctuations in costs or in workload. Fee amounts in most cases also were set at convenient integers (e.g., \$5 or \$10). For the second fee cycle (1986-1988), the PTO had proposed to set fees established under 41(d) and 376 using the same methodology. Several comments to the proposed rules suggested that the PTO should establish 41(d) and 376 fees to more precisely recover the estimated average cost to the Office of the processing, service or material. The fees have been modified to reflect the following: (1) PTO experience over the past two and one-half years in predicting fee volumes, (2) virtual elimination of the reserve income for fluctuations in cost or in workload, and (3) greater reliance upon and use of the individual fee costs developed by PTO financial analysts.

In modifying the proposed fees, the PTO used the raw cost data derived for each fee, adjusted that amount by the projected mid-cycle inflation rate of 6.21 percent, and rounded the adjusted cost by applying standard arithmetical rules. Fees of \$100 or more were rounded to the nearest \$10. Fees between \$99 and \$2 were rounded to the nearest whole number. Fees under \$2 were rounded for convenience.

Comment:

The increase in maintenance fees appears to be driven by non-cost considerations. Since they have just begun to be collected, there could be no actual cost histories on which to base the adjustments.

Comment:

The increase in claim fees seem to be proposed without any seemingly real increase in cost specifically attributable to these items.

Reply:

Patent statutory fees such as claim and maintenance fees, which are set forth in 35 U.S.C. 41(a) and (b), may be adjusted every three years to reflect changes which have occurred in the Consumer Price Index (CPI) for the prior three years. The costs

of processing, issuing and maintaining patents were calculated in 1982 at the time the present fees were set by statute. Patent maintenance fees as set forth in both Public Laws 96-517 and 97-247 are one of several sources of income available to the PTO to cover the costs of processing, issuing and maintaining a patent. The most significant elements of processing, issuing and maintaining patents are personnel compensation, benefits, space and printing costs. Since 1982, these costs have risen in an amount equal to and in some cases, in an amount exceeding, the CPI increase for the individual year.

As a result of these cost increases, the PTO is adjusting 41(a) and 41(b) patent fees and the Public Law 96-517 maintenance fees by the full CPI of 11.8 percent.

Comment:

PTO's proposed adjustments to 41(a) and 41(b) fees are higher than the 11.7 percent fluctuation in the Consumer Price Index because of the rounding principles PTO has applied.

Reply:

The intent of the Congress in indexing the statutory patent fees, 35 U.S.C. 41(a) and (b), to the CPI was to assure that a precipitous drop in the level of recovery did not occur due to inflation with regard to the fees set in 1982. Indexing of statutory patent fees was not intended to be a method of raising additional revenues, nor has the PTO used it for that purpose, but rather for administrative ease. Rounding will ease the administration of these fees by permitting the PTO and users to deal in increments of ten when the adjusted fee is \$100 or greater or in even amounts when the fee is below \$99. This will ease implementation of the 50 percent reduction in fees for small businesses, non-profit organizations and individuals. Moreover, any surpluses which may result are for the short-term only. By applying routine techniques, there should be a balancing out of shortfalls and surpluses in the long-run.

Comment:

The fee for a deferred declaration under 34 U.S.C. 111 should be changed so that such a fee would only be required if the declaration were filed later than three months from the actual filing date.

Reply:

The suggestion for permitting the declaration to be filed up to three months after the actual filing date without a surcharge has not been adopted. It would place administrative burdens on the Office since it would encourage the late filing of oaths or declaration.

Comment:

There appears to be no justification for the significant increase to the surcharge fees.

Reply:

In proposing adjustments to penalty surcharge fees, the PTO considered the costs incurred in providing special handling to certain cases, and proposed to set the fee at a level that would recover costs and preclude unnecessary resort to pertinent procedures but not so high as to be burdensome where resort to these procedures is necessary. In response to several comments received on the proposed surcharge fees, the proposal has been modified to limit the adjustments to surcharge fees set forth in 1.16(e), 1.20(k), 1.20(l) and 1.445 (a)(5) to changes which have occurred during the past three years in the Consumer Price Index.

Comment:

Patent Cooperation Treaty (PCT) fee increases far exceed the 11.7 percent average increase applied to national applications. This increase could seriously affect use of PCT system.

Reply:

The PCT fees set under 35 U.S.C. 376 are based on cost recovery and are not adjusted by the Consumer Price Index. The fees under 1.445 are set to reflect estimated average processing costs. A reduction was made in the amount of the international search fee if performed by the U.S. Patent and Trademark Office. While the credit for a prior U.S. search is unchanged and other PCT fees are increased, the overall adjustment level of PCT fees is generally in line with the CPI.

Comment:

The small entity reduction should be adopted for the PCT surcharge.

Reply:

The final rule has been modified from the proposal to provide for small and large entity amounts in 1.445(a)(5). This is to correspond to a similar fee in 1.16(e).

Comment:

The proposed fees for a copy of a patent file wrapper and its contents (1.19(a)(4)) are unfair at the breakpoint. It would be more equitable to charge \$75 for each 200 pages or fraction thereof.

Reply:

In proposing a fee of \$75 for up to 200 pages and \$350 for 201 pages or more for a copy of a patent file wrapper and its contents, the PTO was attempting to move to a flat fee for this service. Since there were objections to the breakpoint, the final rule has been modified from the proposal to reflect a fee of \$75 for each 200 pages or fraction thereof.

Comment:

The proposed increase in 1.20(c) regarding requests for reexamination and the related decrease in 1.26(c) relating to refunds where reexamination is not ordered, appeared to be set from a revenue generating standpoint rather than being cost-driven.

Reply:

While the comment does not suggest what the fees should be, it is noted that the two fees have to be considered together. The notice of proposed rulemaking set a fee of \$1,800 for filing a request for reexamination, which was an increase from the previous fee of \$1,500. This fee has been modified from the proposal and is now set at \$1,770. The refund where reexamination is denied was proposed to be raised from \$1,200, to \$1,300, which raises the refund from the amount previously refunded. The amount refunded has not changed from the proposal. The relative amounts of the initial fee and the refund are set to obtain the necessary recovery of costs from reexamination.

Comment:

A separate schedule of fees should be instituted for interference proceedings, but such fees should apply only to junior parties, since interferences are conducted primarily for their benefit.

Reply:

The rules already provide for certain fees relating to interference proceedings; see § 1.644(e) and (f), and § 1.666(b) and (c). In general, however, the PTO decided in 1982 that the costs of interference proceedings should be factored into the fees charged in connection with the processing and examination of patent applications, because (1) an interference is a proceeding instituted by the PTO, and (2) it would not be administratively feasible to attempt to provide a fee schedule to cover the myriad of different situations which may occur in the course of an interference. Since these reasons are still considered applicable, the suggestion has not been adopted.

Comment:

The proposed fee for admission to the examination (1.21(a)(1)) for registration to practice is too high for students who often sit for the exam and it is inappropriate because administering the exam is not a service to the public but a cost of operating the PTO.

Reply:

The fee for admission to the examination for registration to practice reflects the costs of conducting the examination twice a year nationwide. The significant increase is due to the fact that the fee had been understated in relation to cost during the 1983-1985 fee cycle. Fees established in this rulemaking will more precisely recover the estimated average cost to the Office of administering and grading the examination and are consistent with the cost recovery principles of OMB Circular A-25.

Comment:

The proposed fee for requesting a regrading of an examination (1.21(a)(6)) should be waived if the regrading request was necessitated by a PTO error.

Reply:

Any fee may be refunded if paid by mistake or paid in excess of that required. See 35 U.S.C. 42(d).

Comment:

The PTO should retain the present fee for admission to the examination to practice before the Office (1.21(a)(1)) and increase the fee payable upon registration to practice (1.21(a)(2)).

Reply:

This suggestion has not been adopted in this rulemaking. The fees for admission to the examination and for registration to practice have been set to recover the cost of those services.

Comment:

The proposed fee for reviewing a decision of the Director of Enrollment and Discipline (1.21(a)(5)) appears to be low in

view of the significant amount of time and effort involved in a review.

Reply:

The fee for this service, as modified, recovers the estimated average cost to the Office of providing the service.

Comment:

The fees for processing an application filed with a specification in a non-English language (1.17(k)) and for filing an English translation of an international application later than 20 months after the priority date (1.445(a)(6)) appear to be in excess of cost.

Reply:

The final rules have been modified from the proposed to provide for a fee of \$26, the cost of processing applications filed with non-English language specifications in both domestic and international cases.

Comment:

An extension of time to Aug. 16, 1985 for the submission of comments was requested.

Reply:

The PTO is required by 35 U.S.C. 41(g) to publish a notice of fee increases in the *Federal Register* at least 60 days prior to the effective date of the fee increase. In order to have the proposed fee increases become effective near the start of the fiscal year, the extension of time could not be granted.

Comment:

Why were there no proposals to adjust trademark fees?

Reply:

Adjustments to fees for filing and processing a trademark application and for other processing, services or materials related to trademarks were not proposed at this time, pending review of trademark automation cost requirements.

Comment:

Do we plan to verify the inflation rate before publication of the final rules?

Reply:

The projected inflation rate has been verified. The Administration's latest projected annual cumulative Consumer Price Index for the three year period 1982-1985 is 11.8 percent. Application of this index to § 41(a) and § 41(b) fees result in no change from the proposal.

Other Considerations: The rule change is in conformity with the requirements of the Regulatory Flexibility Act (Public Law 96-354), Executive Order 12291, and the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 et. seq. There are no information collection requirements relating to patent fee rules.

The General Counsel of the Department of Commerce certified to the Small Business Administration that the rule change will not have a significant adverse economic impact on a substantial number of small entities (Regulatory Flexibility Act, Public Law 96-354). The principal impact of the major patent fees has already been taken into account in Public Law 97-247, which provided small entities with a 50 percent reduction in the major patent fees. Although that legislation will expire on Sept. 30, 1985, legislation has been introduced to reauthorize the 50 percent reduction in patent fees for an additional three years. The rule change adjusts fees to reflect the change in the Consumer Price Index and cost of processing services as provided by statute (35 U.S.C. 41(d) and 41(f)).

The Patent and Trademark Office has determined that this rule changed is not a major rule under Executive Order 12291. The annual effect on the economy will be less than \$100 million. There will be no major increase in costs or prices for consumers, individual industries, federal, state or local government agencies, or geographic regions. There will be no significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

List of Subjects in 37 CFR Part 1

Administrative practice and procedure, Authority delegations (government agencies), Conflict of interests, Courts, Inventions and patents, Lawyers.

Notice is hereby given that, pursuant to the authority granted to the Commissioner of Patents and Trademarks by 35 U.S.C. 6, 41, 111, 157, 302 and 376 and Public Laws 96-517, 97-247 and

98-622, the Patent and Trademark Office is amending 37 CFR Part 1 as set forth below.

1. The authority citation for 37 CFR Part 1 continues to read as follows:

Authority: 35 U.S.C. 6, unless otherwise noted.

2. Section 1.16 is revised to read as follows:

§ 1.16 National application filing fees.

(a) Basic fee for filing each application for an original patent, except design or plant cases:

By a small entity (§ 1.9(f))	\$170.00
By other than a small entity	\$340.00

(b) In addition to the basic filing fee in an original application, for filing or later presentation of each independent claim in excess of 3:

By a small entity (§ 1.9(f))	\$17.00
By other than a small entity	\$34.00

(c) In addition to the basic filing fee in an original application, for filing or later presentation of each claim (whether independent or dependent) in excess of 20. (Note that § 1.75(c) indicates how multiple dependent claims are considered for fee calculation purposes):

By a small entity (§ 1.9(f))	\$6.00
By other than a small entity	\$12.00

(d) In addition to the basic filing fee in an original application, if the application contains, or is amended to contain, a multiple dependent claim(s), per application:

By a small entity (§ 1.9(f))	\$55.00
By other than a small entity	\$110.00

(If the additional fees required by paragraphs (b), (c) and (d) are not paid on filing or on later presentation of the claims for which the additional fees are due, they must be paid or the claims cancelled by amendment, prior to the expiration of the time period set for response by the Office in any notice of fee deficiency.)

(e) Surcharge for filing the basic filing fee or oath or declaration on a date later than the filing date of the application:

By a small entity (§ 1.9(f))	\$55.00
By other than a small entity	\$110.00

(f) For filing each design application:

By a small entity (§ 1.9(f))	\$70.00
By other than a small entity	\$140.00

(g) Basic fee for filing each plant application:

By a small entity (§ 1.9(f))	\$110.00
By other than a small entity	\$220.00

(h) Basic fee for filing each reissue application:

By a small entity (§ 1.9(f))	\$170.00
By other than a small entity	\$340.00

(i) In addition to the basic filing fee in a reissue application, for filing or later presentation of each independent claim which is in excess of the number of independent claims in the original patent:

By a small entity (§ 1.9(f))	\$17.00
By other than a small entity	\$34.00

(j) In addition to the basic filing fee in a reissue application; for filing or later presentation of each claim (whether independent or dependent) in excess of the number of independent claims in the original patent:

dent or dependent) in excess of 20 and also in excess of the number of claims in the original patent. (Note that § 1.75(c) indicates how multiple dependent claims are considered for fee purposes):

By a small entity (§ 1.9(f)) \$6.00
By other than a small entity \$12.00
(Note, see § 1.445 for international application filing and processing fees).

(35 U.S.C. 6, 41, 111; Public law 97-247)

3. Section 1.17 is amended by revising paragraphs (a)-(m) to read as follows:

§ 1.17 Patent application processing fees.

(a) Extension fee for response within first month pursuant to § 1.136(a):

By a small entity (§ 1.9(f)) \$28.00
By other than a small entity \$56.00

(b) Extension fee for response within second month pursuant to § 1.136(a):

By a small entity (§ 1.9(f)) \$85.00
By other than a small entity \$170.00

(c) Extension fee for response within third month pursuant to § 1.136(a):

By a small entity (§ 1.9(f)) \$195.00
By other than a small entity \$390.00

(d) Extension fee for response within fourth month pursuant to § 1.136(a):

By a small entity (§ 1.19(f)) \$305.00
By other than a small entity \$610.00

(e) For filing a notice of appeal from the examiner to the Board of Patent Appeals and Interferences:

By a small entity (§ 1.9(f)) \$65.00
By other than a small entity \$130.00

(f) In addition to the fee for filing a notice of appeal, for filing a brief in support of an appeal:

By a small entity (§ 1.9(f)) \$65.00
By other than a small entity \$130.00

(g) For filing a request for an oral hearing before the Board of Patent Appeals and Interferences in appeal under 35 U.S.C. 134:

By a small entity (§ 1.9(f)) \$55.00
By other than a small entity \$110.00

(h) For filing a petition to the Commissioner under a section of this part listed below which refers to this paragraph.....\$140.00

§ 1.47—for filing by other than all the inventors or a person not the inventor.

§ 1.48—for correction of inventorship

§ 1.182—for decision on questions not specifically provided for.

§ 1.183—to suspend the rules

§ 1.295—for review of refusal to publish a statutory invention registration

§ 1.377—for review of decision refusing to accept and record payment of a maintenance fee filed prior to expiration of patent.

§ 1.378(e)—for reconsideration of decision on petition refusing to accept delayed payment of maintenance fee in expired patent.

§ 1.644(e)—for petition in an interference.

§ 1.644(f)—for request for reconsideration of a decision on petition in an interference.

§ 1.666(c)—for late filing of interference settlement agreement.

§§ 5.12, 5.13, & 5.14—for expedited handling of foreign filing license.

§ 5.15—for changing the scope of a license.

§ 5.25—for retroactive license.

(i) For filing a petition to the Commissioner under a section of this part listed below which refers to this paragraph.....\$72.00

§ 1.12—for access to an assignment record.

§ 1.14—for access to an application.

§ 1.55—for entry of late priority papers.

§ 1.102—to make application special.

§ 1.103—to suspend action in application.

§ 1.177—for divisional reissues to issue separately.

§ 1.312—for amendment after payment of issue fee.

(k) For processing an application filed with a specification in a non-English language (1.52(d)) \$26.00

(l) For filing a petition (1) for the revival of an unavoidably abandoned application under 35 U.S.C. 133, or 371 or (2) for delayed payment of the issue fee under 35 U.S.C. 151:

By a small entity (1.9(f)) \$28.00
By other than a small entity \$56.00

(m) For filing a petition (1) for revival of an unintentionally abandoned application or (2) for the unintentionally delayed payment of the fee for issuing a patent:

By a small entity (1.19(f)) \$280.00
By other than a small entity \$560.00

(35 U.S.C. 6, 41, 157, 376; Public Law 97-247)

4. Section 1.18 is revised to read as follows:

1.18 Patent issue fees.

(a) Issue fee for issuing each original or reissue patent, except a design or plant patent:

By a small entity (1.9(f)) \$280.00
By other than a small entity \$560.00

(b) Issue fee for issuing a design patent:

By a small entity (1.9(f)) \$100.00
By other than a small entity \$200.00

(c) Issue fee for issuing a plant patent:

By a small entity (1.9(f)) \$140.00
By other than a small entity \$280.00

(35 U.S.C. 6, 41, Public Law 97-247)

5. Section 1.19 is amended by revising paragraphs (a)-(c), (e) and (f), and by adding new paragraphs (a)(7), and (h)-(j) to read as follows:

1.19 Document supply fees.

The Patent and Trademark Office will supply copies of the following documents upon payment of the fees indicated:

(a) Uncertified copies of Office documents:

(1) Printed copy of a patent, including a design patent, statutory invention registration, or defensive publication document, except color plant patent or color statutory invention registration \$1.50
(2) Printed copy of a plant patent or statutory invention registration in color \$6.00
(3) Copy of patent application as filed \$9.00
(4) Copy of patent file wrapper and contents, per 200 pages or a fraction thereof \$75.00

- (5) Copy of Office records, except as otherwise provided in this section, per page \$.50
 (6) Microfiche copy of microfiche, per microfiche \$.50
 (7) Copy of patent assignment record \$1.50

(b) Certified copies of Office documents:

- (1) For certifying Office records, per certificate \$3.00
 (2) For a search of assignment records, abstract of title and certification, per patent \$12.00

(c) Subscription services:

- (1) Subscription orders for printed copies of patents as issued, annual service charge for entry of order and ten subclasses \$7.00
 (2) For annual subscription to each additional subclass in addition to the ten covered by the fee under paragraph (c)(1) of this section, per subclass \$7.00

(e) List of patents in subclass:

- (1) For list of all United States patents and statutory invention registrations in a subclass, per 100 numbers or fraction thereof \$1.00
 (2) For list of United States patents and statutory invention registrations in a subclass limited by date or number, per 50 numbers or fraction thereof \$1.00

- (f) Microfiche copy of patent file record \$6.00

- (h) Uncertified copy of a non-United States patent document, per document \$10.00

- (i) To compare and certify copies made from Patent and Trademark Office records but not prepared by the Patent and Trademark Office, per copy of document \$5.00

(j) Additional filing receipts:

- Duplicate \$14.00
 Corrected due to applicant error \$14.00

(35 U.S.C. 6, 41, 157)

6. Section 1.20 is amended by revising paragraphs (a)-(l) to read as follows:

1.20 Post-Issuance fees.

- (a) For providing a certificate of correction of applicant's mistake (1.323) \$29.00
 (b) Petition for correction of inventorship in patent (1.324) \$140.00
 (c) For filing a request for reexamination 1.510(a) \$1,770.00
 (d) For filing each statutory disclaimer
 By a small entity (1.9(f)) \$28.00
 By other than a small entity \$56.00
 (e) For maintaining an original or reissue patent, except a design or plant patent, based on an application filed on or after Dec. 12, 1980 and before Aug. 27, 1982, in force beyond 4 years; the fee is due by three years and six months after the original grant \$225.00
 (f) For maintaining an original or reissue patent, except a design or plant patent, based on an application filed on or after Dec. 12, 1980 and before Aug. 27, 1982, in force beyond 8 years, the fee is due by seven years and six months after the original grant \$445.00

- (g) For maintaining an original or reissue patent, except a design or plant patent, based on an application filed on or after Dec. 12, 1980 and before Aug. 27, 1982, in force beyond 12 years; the fee is due by eleven years and six months after the original grant \$650.00

- (h) For maintaining an original or reissue patent, except a design or plant patent, based on an application filed on or after Aug. 27, 1982, in force beyond 4 years; the fee is due by three years and six months after the original grant:

- By a small entity (1.9(f)) \$225.00
 By other than a small entity \$450.00

- (i) For maintaining an original or reissue patent, except a design or plant patent, based on an application filed on or after Aug. 27, 1982, in force beyond 8 years; the fee is due by seven years and six months after the original grant:

- By a small entity (1.9(f)) \$445.00
 By other than a small entity \$890.00

- (j) For maintaining an original or reissue patent, except a design or plant patent, based on an application filed on or after Aug. 27, 1982, in force beyond 12 years; the fee is due by eleven years and six months after the original grant:

- By a small entity (1.9(f)) \$670.00
 By other than a small entity \$1,340.00

- (k) Surcharge for paying a maintenance fee during the 6-month grace period following the expiration of three years and six months, seven years and six months, and eleven years and six months after the date of the original grant of a patent based on an application filed on or after Dec. 12, 1980 and before Aug. 27, 1982 \$110.00

- (l) Surcharge for paying a maintenance fee during the 6-month grace period following the expiration of three years and six months, seven years and six months, and eleven years and six months after the date of the original grant of a patent based on an application filed on or after Aug. 27, 1982:

- By a small entity (1.9(f)) \$55.00
 By other than a small entity \$110.00

(35 U.S.C. 6, 41, 302; Public Laws 96-517, 97-247, 98-622)

7. Section 1.21 is amended by revising paragraphs (a)-(i) and (k), and adding a new paragraph (m) to read as follows:

1.21 Miscellaneous fees and charges.

The Patent and Trademark Office has established the following fees for the services indicated:

(a) Registration of attorneys and agents:

- (1) For admission to examination for registration to practice, fee payable upon application \$250.00
 (2) On registration to practice. \$81.00
 (3) For reinstatement to practice \$9.00
 (4) For certificate of good standing as an attorney or agent \$10.00
 Suitable for framing. \$88.00
 (5) For review of a decision of the Director of Enrollment and Discipline 10.2(c) \$92.00
 (6) For requesting regrading of an examination under 10.7(c) \$92.00

(b) Deposit accounts:

- (1) For establishing or reinstating a deposit account \$8.00
 (2) Service charge for each month when the balance at the end of the month is below \$1,000. \$20.00

(3) Service charge for each month when the balance at the end of the month is below \$300 for restricted subscription deposit accounts used exclusively for subscription order of patent copies as issued. \$20.00
(c) Disclosure document: For filing a disclosure document \$6.00

(d) Delivery box: Local delivery box rental, per annum \$43.00

(e) International-type search reports: For preparing an international-type search report of an international-type search made at the time of the first action on the merits in a national patent application \$28.00

(f) Search of Office records: For searching Patent and Trademark Office records for purposes not otherwise specified, per one-half hour or fraction thereof \$14.00

(g) CopiShare card: Cost per copy \$0.20

(h) Recording of documents:

(1) For recording each assignment, agreement or other paper relating to the property in a patent or application \$7.00
(2) Where a document to be recorded under paragraph (h)(1) of this section refers to more than one patent or application, for each additional patent or application \$2.00

(i) Publication in *Official Gazette*: For publication in the *Official Gazette* of a notice of the availability of an application or a patent for licensing or sale, each application or patent. \$7.00

(k) For items and services, that the Commissioner finds may be supplied, for which fees are not specified by statute or by this part, such charges as may be determined by the Commissioner with respect to each such item or service. actual cost

(m) For processing each check returned "unpaid" by a bank \$20.00

(35 U.S.C. 6, 41)

8. Section 1.24 is proposed to be revised to read as follows:

1.24 Coupons.

Coupons in denominations of one dollar for the purchase of trademark registrations and one dollar and fifty cents for the purchase of patents, designs, defensive publications, and statutory invention registrations are sold by the Patent and Trademark Office for the convenience of the general public; these coupons may not be used for any other purpose. The one dollar coupons are sold individually and in books of 50 with stubs for record for \$50 and the one dollar and fifty cent coupons are sold individually and in books of 50 with stubs for record for \$75. These coupons are good until used; they may be transferred but cannot be redeemed.

(35 U.S.C. 6)

9. Section 1.25, paragraph (a), is revised to read as follows:

1.25 Deposit accounts.

(a) For the convenience of attorneys, and the general public in paying any fees due, in ordering services offered by the Office, copies of records, etc., deposit accounts may be established in the Patent and Trademark Office upon payment of the fee for establishing a deposit account (1.21(b)(1)). A minimum deposit of \$1,000 is required for paying any fees due or in ordering any services offered by the Office. However, a minimum deposit of \$300 may be paid to establish a restricted subscription deposit account used exclusively for subscription order of patent copies as issued. At the end of each month, a deposit account statement

will be rendered. A remittance must be made promptly upon receipt of the statement to cover the value of items or services charged to the account and thus restore the account to its established normal deposit. An amount sufficient to cover all fees, services, copies, etc., requested must always be on deposit. Charges to accounts with insufficient funds will not be accepted. A service charge § 1.12 (b)(2) will be assessed for each month that the balance at the end of the month is below \$1,000 For restricted subscription deposit accounts, a service charge (§ 1.21(b)(3)) will be assessed for each month that the balance at the end of the month is below \$300.

(35 U.S.C. 6)

10. Section 1.26 is amended by revising paragraph (c) to read as follows:

§ 1.26 Refunds

(c) If the Commissioner decides not to institute a reexamination proceeding, a refund of \$1,300 will be made to the requester of the proceeding. Reexamination requesters should indicate whether any refund should be made by check or by credit to a deposit account.

(35 U.S.C. 6, 41)

11. Section 1.53 is amended by revising paragraph (c) to read as follows:

§ 1.53 Serial number, filing date, and completion of application

(c) If any application is filed without the specification or drawing required by paragraph (b) of this section, applicant will be so notified and given a time period with which to submit the omitted specification or drawing in order to obtain a filing date as of the date of filing of such submission. If the omission is not corrected within the time period set, the application will be returned or otherwise disposed of; the fee, if submitted, will be refunded less a \$15.00 handling fee.

12. Section 1.297, paragraph (b), is revised to read as follows:

§ 1.297 Publication of statutory invention registration.

(b) Each statutory invention registration published will include a statement relating to the attributes of a statutory invention registration. The statement will read as follows:

A statutory invention registration is not a patent. It has the defensive attributes of a patent. No article or advertisement or the like may use the term patent, or any term suggestive of a patent, when referring to a statutory invention registration. For more specific information on the rights associated with a statutory invention registration see 35 U.S.C. 157.

(35 U.S.C. 6, 157)

13. Section 1.445 is amended by revising paragraph (a) to read as follows:

§ 1.445 International application filing and processing fees.

(a) The following fees and charges are established by the Patent and Trademark Office under the authority of 35 U.S.C. 37 6:

- (1) A transmittal fee (see 35 U.S.C. 361(d) and Pct Rule 14) \$170.00
 (2) A search fee (see 35 U.S.C. 361(d) and PCT Rule 16) where:

- (i) No corresponding prior United States national application with fee has been filed \$420.00
 (ii) Corresponding prior United States national application with fee has been filed \$250.00

- (3) A supplemental search fee when required (see PCT Art. 17(3)(a) and PCT Rule 40.2), per additional invention \$140.00

(4) The national fee, that is, the amount set forth as the filing fee under § 1.16(a) through (d) credited, if requested at the time of filing, by an amount of \$170.00 where an international search fee as required by paragraph (a)(2)(i) of this section has been paid on the corresponding international application to the United States Patent and Trademark Office as an International Searching Authority. Only one such credit is permitted based on a single international search fee.

- (5) Surcharge for filing the national fee or oath or declaration later than 20 months from the priority date:

By a small entity (§ 1.9(f)) \$55.00
 By other than a small entity \$110.00

(35 U.S.C. 6, 376)

14. Section 1.446 is amended by removing paragraph (b):

§ 1.446 Refund of international application filing and processing fees.

(b) [Reserved]
 (35 U.S.C. 6, 376)

July 31, 1985

DONALD J. QUIGG
*Acting Commissioner
 of Patents and Trademarks*

[1057 OG 24]

(49) **Department of Commerce
 Patent and Trademark Office
 37 CFR Parts 1 and 2
 [Docket No. 81024-9018]**

Revision of Patent and Trademark Fees

Agency: Patent and Trademark Office, Commerce

Action: Final Rule

Summary: The Patent and Trademark Office (PTO) is amending the rules of practice in patent and trademark cases, Parts 1 and 2 of Title 37, Code of Federal Regulations, to adjust patent fee amounts and to reduce certain trademark fee amounts. The Office will be extending the comment period on the proposed amendments of the rules of practice in patent cases which would clarify requirements in the filing of applications and provide for procedures for applicants to cure certain defects in the filing of applications. After comments are received, the PTO will issue a notice of final rulemaking addressing these proposals.

Establishment and adjustment of patent fees is provided for by sections 6 and 41 of Title 35, United States Code, and section 103(b) of Pub. L. 100-703. Establishment and adjustment of trademark fees is provided for by section 31 of the Trademark (Lanham) Act of 1946, as amended (15 U.S.C. 1113) and section 103(c) of Pub. L. 100-703.

Effective Date: Apr. 17, 1989.

For Further Information Contact: Frances Michalkewicz by telephone at (703) 557-1610 or by mail marked to her attention and addressed to the Commissioner of Patents and Trademarks, Washington, D.C. 20231.

Supplementary Information: Patent fees were set on Oct. 1, 1982, in accordance with the provisions of Title 35, United States Code (Pub. L. 97-247). Patent fees were adjusted effective Oct. 5, 1985, in accordance with the provisions of Title 35, United States Code. Trademark fees were set on Oct. 1, 1982, in accordance with the provisions of section 31 of the Trademark (Lanham) Act of 1946, as amended (15 U.S.C. section 1113) and adjusted on Oct. 1, 1986, in accordance with the provisions of that Act and Title 35. On Nov. 6, 1986, legislation modifying the way fee adjustments could be made was enacted as Pub. L. 99-607. The fee adjustment provisions of Pub. L. 99-607, sections 3(a) and 3(b) expired on Sept. 30, 1988. On Nov. 19, 1988, legislation extending section 3(a) and section 3(b) of Pub. L. 99-607 was enacted as Pub. L. 100-703. Therefore, patent and trademark fee adjustments will be guided by the provisions of Title 35, United States Code, and the Trademark (Lanham) Act of 1946, as amended (15 U.S.C. 1113), and by Pub. L. 100-703.

The Patent and Trademark Office is amending 37 CFR 2.6 to reduce the fee for filing an application for trademark registration from \$200 to \$175 per class. The Office also is reducing the fee for recording trademark assignments and agreements or other papers relating to the property in a registration or application from \$100 to \$8 for each mark in the same document.

Effective Oct. 1, 1982, trademark operations within the Office became 100 percent user-fee funded. Experience to date has demonstrated that the fees first established in Oct. 1982, and as later adjusted in Oct. 1986, are more than adequate to meet total trademark function costs. At the end of fiscal year 1988, total trademark function fees exceeded total trademark function costs by approximately \$10 million. Left undisturbed, it is projected that the current trademark fee structure will result in an additional \$12.7 million in excess fees over the course of the next three-year fee cycle. Thus, by the end of fiscal year 1991, total trademark fees are projected to exceed total trademark costs by almost \$23 million if the current fee structure remains in place.

In this light, the Office is proposing to reduce both the trademark application and assignment fees. Reducing the application fee to \$175 would be consistent with the legislative history surrounding passage of Pub. L. 97-247. In its report (H. Rep. No. 97-542, May 17, 1982), the House Committee on the Judiciary stated that, "It is expected that the Commissioner will set the [trademark] fees in a way that the filing fee will be kept as low as possible to foster use of the Federal registration system." The application filing fee from Oct. 1982 to Oct. 1986 was \$175. The filing fee was increased in 1986 to \$200 in an effort to recover a greater percentage of the actual costs incurred in the processing of trademark applications. While the reduction will increase the discrepancy between the application filing fee and our projected unit cost, the size of the current "surplus," as well as the objective of encouraging filings, supports the action.

Reducing the fee for recording trademark assignments to \$8 for each mark makes such fees consistent with those for the recording of patent assignments.

While the fee reductions still will leave a healthy "surplus," prudence suggests that further reductions be held in abeyance pending implementation of "The Trademark Law Revision Act of 1988" (Pub. L. 100-667). The Act, among other things, permits applicants to file applications for Federal trademark registrations based upon a bona fide "intent-to-use" the mark in commerce. Implementation of "intent-to-use" legislation will require the Office to incur additional expenditures, such as increased personnel costs and improved computer capabilities. The Office will review its trademark fee structure approximately 18 months from implementation and propose further fee adjustments if warranted but will not propose to adjust the application and assignment fees.

Even absent "intent-to-use," the Office will probably be required to upgrade its computer capabilities within the near future. Moreover, implementation of an automated trademark assignment system, now scheduled for fiscal year 1990, and other improvements in automated searching, will result in increased demands on trademark resources.

BACKGROUND:

Provisions of Title 35 and Title 15, United States Code, and Pub. L. 100-703 Which Affect This Notice of Final Rulemaking.

Patent and Trademark Office fees are authorized by 35 U.S.C. 41 and 35 U.S.C. 376. Section 41(a) of Title 35, United States Code, establishes a number of statutory fees. Among the more significant of these are fees for filing a patent application and issuing a patent. Certain other fees, such as appeal fees, the fee for filing a disclaimer, fees for filing petitions seeking to revive an abandoned application and for extensions of time also are set in 35 U.S.C. 41(a). Section 41(b) of Title 35, United States Code, sets forth the statutory fees for maintaining a patent in force if the application was filed on or after Aug. 27, 1982.

The provisions of Pub. L. 96-517 also establish maintenance fees for patents other than design and plant patents issued on applications filed on or after Dec. 12, 1980 and before Aug. 27, 1982. These maintenance fees are to recover 25 percent of the estimated cost to the Office of processing patent applications.

Section 1 of Pub. L. 97-247 authorized the reduction by 50 percent in the fees paid under 35 U.S.C. 41(a) and 35 U.S.C. 41(b) by independent inventors, small business concerns, and nonprofit organizations, who meet the definitions established. Section 1(a)(2) of Pub. L. 99-607 makes this provision permanent in 35 U.S.C. 41(h).

Section 41(f) of Title 35, United States Code, provides that fees established in 35 U.S.C. 41(a) and 35 U.S.C. 41(b), "may be adjusted by the Commissioner on Oct. 1, 1985, and every third year thereafter, to reflect any fluctuations occurring during the previous three years in the Consumer Price Index, as determined by the Secretary of Labor." Section 41(f) also provides that changes of less than one percent may be ignored. Pub. L. 100-703 makes no modifications to 35 U.S.C. 41(f).

Section 41(d) of Title 35, United States Code, provides that the "Commissioner will establish fees for all other processing, services, or materials related to patents" which are not covered in 35 U.S.C. 41(a) and 35 U.S.C. 41(b), "to recover the estimated average cost to the Office of such processing, services or materials."

Section 103(b) of Pub. L. 100-703 changes the way fees established under 35 U.S.C. 41(d) can be adjusted. For fiscal years 1989, 1990, and 1991, the Commissioner cannot increase fees established under 41(d) except for the purposes of making adjustments which in the aggregate do not exceed fluctuations during the previous three years in the Consumer Price Index.

Section 103(b) of Pub. L. 100-703 provides that the Commissioner cannot establish additional fees under 35 U.S.C. 41(d) during fiscal years 1989, 1990, and 1991.

Section 376 of Title 35, United States Code, authorizes the Commissioner to set fees for patent applications filed under the Patent Cooperation Treaty. The fees under the Patent Cooperation Treaty are keyed to full cost recovery of the processing costs under the Treaty. Pub. L. 100-703 makes no modifications to 35 U.S.C. 376.

Section 31 of the Trademark (Lanham) Act of 1946, as amended (15 U.S.C. 1113) authorizes the Commissioner to establish fees for the filing and processing of an application for the registration of a trademark or other mark, and for all other services and materials relating to trademarks and other marks. No fee for the filing or processing of an application for the registration of a trademark or other mark or for the renewal or assignment of a trademark or other mark will be adjusted more than once every three years. The House Committee on the Judiciary, in a report that accompanied H.R. 6260, which ultimately was enacted as Pub. L. 97-247, recommended a trademark fee schedule to the Commissioner which was established by a rule published in the *Federal Register* on July 30, 1982 at 47 FR 33086, effective Oct. 1, 1982.

A final rule to increase the trademark application filing fee per class and the fee for copies of trademarks was published in the *Federal Register* on Aug. 4, 1986 at 51 FR 28052. The increased fees became effective on Oct. 1, 1986.

Section 103(a) of Pub. L. 100-703 changes the way fees established under the Trademark (Lanham) Act of 1946, as amended (15 U.S.C. 1113) can be adjusted. For fiscal years 1989, 1990 and 1991, the Commissioner cannot increase fees established under the Act except for the purposes of making adjustments which in the aggregate do not exceed fluctuations during the previous three years in the Consumer Price Index.

Section 103(a) of Pub. L. 100-703 provides that the Commissioner cannot establish additional fees under the Trademark (Lanham) Act of 1946, as amended (15 U.S.C. 1113) during fiscal years 1989, 1990, and 1991.

However, as described above, the Office is only reducing the fee for filing an application, per class, and the fee for recording trademark assignments and agreements or other papers relating to the property in a registration or application.

Final Rule Changes

General Procedures

Cost Calculations : The Office calculated unit costs for all fees based on OMB Circular A-25, "User Fees," and OMB Circular A-130, "Management of Federal Information Resources." Costs were determined from the best available records (for example, the 1987 end of fiscal year financial statements for the Office) and included direct and indirect costs to the Office of carrying out the activity, as directed by OMB Circular A-25. To estimate costs for the three-year fee cycle Apr. 1989-Mar. 1992, the 1987 actual costs were adjusted by the inflation rates from Oct. 1988 through Mar. 1989, and then by a mid-cycle inflation rate for the period Apr. 1989-Mar. 1992. The total inflation rate was 12.644 percent derived from the Administration's inflation projection.

Workload Projections

Determination of future year workloads varies by fee code. Principal workload projection techniques are as follows:

Patent and trademark application workloads were projected from statistical regression models using recent application trends. Associated application workloads, for example, patent claims and extensions of time, grow relative to patent applications. Patent issues are projected from an in-house patent productivity model and reflect examiner production achievements and goals. Patent maintenance fee workloads utilize patents issued 3.5, 7.5 and 11.5 years prior to payment and assume payment rates of 80 percent, 50 percent and 25 percent, respectively. Trademark affidavits and renewals are based on prior year registrations and renewal trends. Service fee workloads follow linear trends from prior year activities. All workload estimates are approved by the manager responsible for the fee program.

Policy for applying the Consumer Price Index: The Office of Management and Budget has determined that the Patent and Trademark Office should use Consumer Price Index-U (CPI) to adjust patent fees. The Department of Labor's Consumer Price Index is made public approximately twenty-one days after the end of the month being calculated. The time lag between the initiation and the completion of the rulemaking process dictates that the Dec. 1988 through Mar. 1989 inflation rate be projected. The Administration's projected cumulative CPI for the three-year period Apr. 1986-Mar. 1989 is 10.311 percent.

The fee amounts being adopted by this rule package were adjusted by the CPI that was projected in 1988, i.e., 10.303 percent. Since this is less than the amount the Office has determined to be the actual projected rate and that applying the updated projection of 10.311 percent would have a negligible effect on the fee amounts, no changes have been made.

Rounding Procedures: After application of the 10.303 percent projected fluctuation in the CPI to fees, amounts were rounded by applying standard arithmetical rules so that the amounts rounded would be de minimis and convenient to the user. Fees of \$100 or more were rounded to the nearest \$10. Fees between \$10 and \$99 were rounded to the nearest even number so that the comparable small entity fee would be a whole number. Fees under \$2 were rounded for convenience.

Since the amounts of the patent fees that went into effect on Oct. 5, 1985 were rounded after application of the Consumer Price Index, a first step in calculating new fee amounts was to eliminate any effects of rounding prior years' fee adjustments. For example, 35 U.S.C. 41(a), sets the patent application filing fee at \$300.00. Applying the 11.8 percent CPI for the period 1983-1985 resulted in an allowable increase to \$335.40. This amount was rounded to \$340.00. For purposes of this fee adjustment process, the base used to adjust fees for the next fee cycle was the "unrounded" fee amount; i.e., the \$335.40 for patent application filing fees. Similarly, the cost for certifying Office records was \$2.70. This amount was rounded to \$3.00.

For the purposes of this fee adjustment process, the base was unrounded amount of \$2.70.

It should be noted that following routine rounding off practices can result in some fee items being adjusted by more or less than CPI. This divergence from the CPI ceiling will only exist in the short term because of the policy of applying the CPI adjustment factor to the unrounded amount from the previous fee cycle.

Proposed Rule Changes Under Title 35 and Title 15, United States Code and Pub. L. 100-703

Statutory patent fees established under 35 U.S.C. 41(a) and 35 U.S.C. 41(b) are adjusted in accordance with 35 U.S.C. 41(f) to reflect any fluctuations occurring during the previous three years in the CPI.

Non-statutory patent fees established under 35 U.S.C. 41(d) are adjusted in accordance with section 103(b) of Pub. L. 100-703 to reflect, in the aggregate, any fluctuations occurring during the previous three years (Apr. 1986-Mar. 1989) in the Consumer Price Index, as determined by the Secretary of Labor.

Fees established under 35 U.S.C. 376 are adjusted to recover the full cost of processing under the Patent Cooperation Treaty. International patent fees under 37 CFR 1.492 are related to patent fees established under 35 U.S.C. 41(a) and are adjusted to reflect fluctuations in the CPI.

For fees established under section 31 of the Trademark (Lanham) Act of 1946, as amended (15 U.S.C. 1113), the Office is reducing the fee for filing an application, per class, and the fee for recording trademark assignments and agreements or other papers relating to the property in a registration or application as fully described above.

Fee Adjustment Methodology

1. PROJECTED ACTUAL COSTS.

The projected actual costs for all fee items were calculated by applying the principles of OMB Circulars A-25 and A-130.

a. Statutory patent fees were derived by: (1) identifying those operational units of the Office involved in, or contributing to, the processing of a patent application through all phases of examination; (2) identifying and certifying actual fiscal year 1987 obligations incurred by the operational units in processing an application; (3) projecting those obligations to the period of Apr. 1989 through Mar. 1992 in accordance with approved budgets and future year budget targets; and (4) increasing the obligations projected for the period of Apr. 1989 through Mar. 1992 by the Administration's estimates for federal pay raise adjustments and projected inflation. Projected actual costs for Apr. 1989-Mar. 1992, \$729,810,051 less projected budget authority of \$265,834,000, are \$463,976,051.

b. For non-statutory patent fees, projected costs for each fee item were established by (1) identifying actual costs for 1987, and (2) projecting actual costs for fiscal years 1988 through Mar. 1992 by applying the Administration's inflation projection of 12.644 percent. This projected actual cost was then multiplied by the projected workload for each fee item. The sum of the projected costs for all fee items is the projected actual cost of operation during the three-year fee cycle. Projected actual costs for Apr. 1989-Mar. 1992 are \$64,661,341.

c. The same methodologies as described in paragraphs (a) and (b) above were applied to Patent Cooperation Treaty fees. Projected actual costs for Apr. 1989-Mar. 1992 are \$16,531,990.

d. The same methodology as described in paragraph (b) above was applied to Trademark fees. Projected actual costs for Apr. 1989-Mar. 1992 are calculated to be \$74,329,783.

2. INCOME PROJECTIONS

a. The maximum amount of statutory fee income that the Office is authorized to recover under 35 U.S.C. 41(f) was calculated as follows.

For each statutory patent fee, the unrounded base (i.e., the 1986 adjusted fee before rounding) was multiplied by the projected CPI fluctuation of 10.303 percent for the three-year period Apr. 1986-Mar. 1989. This amount was then multiplied by the projected workload for Apr. 1989-Mar. 1992 to project the income from that fee item during the Apr. 1989-Mar. 1992 fee cycle. The sum of the projected incomes from all statutory patent fees is the maximum amount that the Office is authorized by 35 U.S.C. 41(f) to recover during the fee cycle and is equal to \$464,676,178.

b. The maximum amount of non-statutory fee income that the Office is authorized to recover under § 103(b) of Pub. L. 100-703 was calculated as follows.

For each non-statutory patent fee, the unrounded base (i.e., the 1986 adjusted fee before rounding) was multiplied by the projected CPI fluctuation of 10.303 percent for the three-year period Apr. 1986-Mar. 1989. This amount was then multiplied by the projected workload for Apr. 1989-Mar. 1992 to project the income from that fee item during the Apr. 1989-Mar. 1992 fee cycle. The sum of the projected incomes from all non-statutory patent fees is the maximum amount that the Office is authorized by section 103(b) of Pub. L. 100-703 to recover during the fee cycle and is equal to \$62,101,874.

c. For Patent Cooperation Treaty fees, the Office is authorized by 35 U.S.C. 376 to recover the full cost of processing under the Treaty. Thus, the projected costs identified in paragraph 1(c) for Patent Cooperation Treaty fees of \$16,531,990 would be the maximum level of recovery.

d. The maximum amount of trademark fee income that the Office is authorized to recover under section 103(a) of Pub. L. 100-703 was calculated as follows.

For each trademark fee, the unrounded base (i.e., the 1986 adjusted fee before rounding) was multiplied by the projected CPI fluctuation of 10.303 percent for the three-year period Apr. 1986-Mar. 1989. This amount was then multiplied by the projected workload for Apr. 1989-Mar. 1992 to project the income from that fee item during the Apr. 1989-Mar. 1992 fee cycle. The sum of the projected incomes from all trademark fees is the maximum amount that the Office is authorized by section 103(a) of Pub. L. 100-703 to recover during the fee cycle and is equal to \$107,704,135.

e. Each statutory patent fee amount identified in paragraph 2(a), and each PCT amount identified in paragraph 2(c) above was rounded according to the de minimis rounding rules described above.

Sections 103(a) and 103(b) of Pub. L. 100-703 allow the Office to set fees "in the aggregate." The fee amounts proposed for non-statutory patent fees and trademark fees will recover the maximum amount of income determined in paragraphs (b) and (d) above.

Each of these fee amounts was multiplied by the projected workload during the fee cycle to project the income from that fee item. The sum of the projected income from all patent fees is \$542,281,082, which is the sum of the projected incomes from statutory patent fees, \$463,626,421, non-statutory patent fees, \$62,047,763, and Patent Cooperation Treaty fees, \$16,606,898.

f. The Office reduced two trademark fees, as described above. Each trademark fee amount was multiplied by the projected workload during the fee cycle to project the income from that fee item. The sum of the projected income from all trademark fees is projected to be \$72,972,690.

Summary:

Fee Category	Projected Cost April 1989- Mar 1992	Maximum Allowable Recovery	Projected Income April 1989 - Mar 1992
Statutory Patent	\$463,976,051	\$464,676,178	\$463,626,421
Non-Statutory Patent	\$64,661,341	\$62,101,874	\$62,047,763
PCT	\$16,531,990	\$16,531,990	\$16,606,898
Total - Patent	\$545,169,382	\$543,310,042	\$542,281,082

Total - Trademarks
Total - All Fees\$74,329,783
\$619,499,165\$107,704,135
\$651,014,177\$72,972,690
\$615,253,772

The unit costs by fee item are summarized in Appendix A. The Office has detailed cost calculation worksheets for each fee item, which are available for public inspection in Suite 904 of Bldg. 2, Crystal Park at 2121 Crystal Dr., Arlington, Va.

It is intended that the amount of any fee due and payable on or after Apr. 17, 1989 is the amount set in this rulemaking. For purposes of determining the amount of the fee to be paid, the date of mailing indicated on a proper Certificate of Mailing, where authorized under 37 CFR 1.8, will be considered to be the date of receipt in the Office. A "Certificate of Mailing under Section 1.8" is not "proper" for items which are specifically excluded from the provisions of § 1.8. Section 1.8 should be consulted for those items for which a Certificate of Mailing is not "proper." Such items include, inter alia, the filing of national and international applications for patents and the filing of trademark applications. The provisions of 37 CFR 1.10, relating to filing of papers and fees by "Express Mail" with certificate, however, do apply to any paper or fee (including patent and trademark applications) to be filed in the Office. If an application or fee is filed by "Express Mail" with a certificate of express mailing dated on and after the effective date of the rules, the amount of the fee to be paid is the fee established herein if a change is being made in the fee. In order to ensure clarity in the implementation of the fee proposals, a discussion of specific sections is set forth below.

DISCUSSION OF SPECIFIC RULES**37 CFR § 1.12 Assignment records open to public inspection.**

Section 1.12, paragraph (a) is amended to refer to the renumbered § 1.19(b)(4). Paragraph (c), is amended to refer to the renumbered § 1.17(i)(1).

37 CFR § 1.14 Patent applications preserved in secrecy.

Section 1.14, paragraph (e) is amended to would refer to the renumbered § 1.17(i)(1).

37 CFR § 1.16 National application filing fee.

Section 1.16 is amended to adjust patent application filing fees established in 35 U.S.C. 41(a) and set forth in 37 CFR 1.16(a)-(b), (d) and (f)-(i) to reflect fluctuations in the CPI.

Section 1.16, paragraph (e) is amended as to adjust the patent application surcharge fee authorized by 35 U.S.C. 111 to reflect fluctuations in the CPI.

37 CFR § 1.17 Patent application processing fees.

Section 1.17 is amended to adjust patent application processing fees established in 35 U.S.C. 41(a) and set forth in 37 CFR 1.17(a)-(g) and (l)-(m) to reflect fluctuations in the CPI.

Section 1.17 is amended to adjust the patent application processing fees authorized by 35 U.S.C. 41(d) and set forth in 37 CFR 1.17(h)-(k) to reflect fluctuations in the CPI.

Section 1.17 is amended to establish one fee amount for filing a petition to the Commissioner under 37 CFR sections 1.12, 1.14, 1.47, 1.48, 1.55, 1.103, 1.177, 1.182, 1.183, 1.295, 1.312, 1.313, 1.314, 1.334, 1.377, 1.378(e), 1.644(e), 1.644(f), 1.666(b), 1.666(c), 5.12, 5.13, 5.14, 5.15, and 5.25. The fee would recover the estimated average cost to the Office of processing all petitions to the Commissioner mentioned above. In addition, the single fee for all petitions is expected to facilitate pre-processing of petition requests.

Section 1.17 is amended to provide in new paragraph (i)(2) and \$80 fee for filing a petition to the Commissioner under 37 CFR 1.102 to make an application special.

37 CFR § 1.18 Patent issue fees

Section 1.18 is amended to adjust patent issue fees established in 35 U.S.C. 41(a) and set forth in 37 CFR 1.18(a)-(c) to reflect fluctuations in the CPI.

37 CFR § 1.19 Document supply fees.

Section 1.19 is revised to adjust the fees authorized by 35 U.S.C. 41(d) for services and materials as set forth in 37 CFR 1.19 to reflect fluctuations in the CPI.

Section 1.19(a)(2) is revised to adjust the fees for copies of plant patents and statutory invention registrations to reflect fluctuations in the CPI.

Section 1.19, is revised to renumber paragraph (a)(5) as (a)(3) and provide for a flat fee for a certified copy of an Office document, for each 30 pages or fraction thereof.

Section 1.19 revises paragraphs (a)(4)-(a)(6) and (b)(4) to set the fees for the purchase of color copies of color drawings identified in utility patents and for expedited service for fulfillment of orders for patent copies and orders for copies of patent applications as filed. The provision for color drawings in utility patent applications is in § 1.84(p). Although color drawings may be permitted in a utility patent application by petition, copies of printed patents will only be provided in black and white. If a copy of the printed patent with copies of the drawings in color is desired, it must be separately ordered and accompanied by the fee proposed in paragraph (a)(4). The fees set forth in paragraphs (a)(5), (a)(6) and (b)(4) are for expedited processing of copy orders.

The Public Service Window (PSW) in the Patent Public Search Room referred to in proposed new paragraph 37 CFR 1.19(a)(5) is located on the lobby level of Crystal Plaza Bldg. 3. The Office rents numbered lock boxes (delivery boxes) to members of the public for copy order delivery purposes. Members of the public may place coupon orders at the PSW and request that the copies be delivered to their boxes at the PSW. PSW staff members receive and process the coupon orders and forward them to the copy fulfillment contractor. Upon receipt of the copies, PSW staff members place them in the appropriate delivery box for pickup by the box holder.

Section 1.19, paragraph (a) is revised to remove the charge for a microfiche copy of a microfiche.

Section 1.19 is revised to renumber paragraph (a)(3) as (b)(1) and provide for one fee for a certified copy of a patent application as filed.

Section 1.19 is revised to renumber paragraph (a)(4) as (b)(2) and provide for a flat fee for a certified copy of a patent file wrapper, and contents, with no limitation on the number of pages.

Section 1.19 is revised to renumber paragraph (a)(7) as (b)(3) and provide for one fee for a certified copy of a patent assignment record.

Section 1.19 is revised to renumber paragraph (b)(1) as (b)(5).

Section 1.19 is revised to renumber paragraph (b)(2) as (b)(6) and adjust the fee for a search of assignment records, abstract of title and certification, per patent to reflect fluctuations in CPI.

Section 1.19 is revised to remove paragraph (c) as the requirement for a special fee for providing subscription services has been eliminated. The Office will provide subscription services at no cost to the subscriber.

Section 1.19 is revised to renumber paragraph (d) as paragraph (c).

Section 1.19 is revised to renumber paragraph (e) to paragraph (d) and provide for a list of all United States patents and statutory invention registrations in a subclass, with no limit to the number at the proposed flat fee.

Section 1.19 is revised to remove paragraph (f).

Section 1.19 is revised to renumber paragraphs (g)-(j) as paragraphs (e)-(h) and adjust the fees to reflect fluctuations in the CPI.

37 CFR § 1.20 Post-issuance fees.

Section 1.20, paragraphs (a)-(c) are amended to adjust patent post-issuance fees authorized by 35 U.S.C. 41(d) to reflect fluctuations in the CPI.

Section 1.20 is amended to clarify the language in paragraph (a) that the fee charged is for a correction of an applicant's mistake.

Section 1.20, paragraphs (d) and (h)-(j) is amended to adjust patent post-issuance fees established in 35 U.S.C. 41(a) and 35 U.S.C. 41(b) to reflect fluctuations in the CPI.

Section 1.20, paragraphs (e)-(g) are amended to adjust post-issuance fees authorized by 2 of Publ. L. 96-517, as modified by 404 of Pub. L. 98-622. These fees must be set at a level to eventually recover 25 percent of the estimated cost to the Office of processing patent applications. In order to achieve this level of recovery, these maintenance fees are adjusted to reflect fluctuations in the CPI.

Section 1.20, paragraph (k) is amended to adjust the patent application surcharge fee authorized by 2 of Pub. L. 96-517.

Section 1.20, paragraph (l) is amended to adjust the post-issuance fee authorized by 35 U.S.C. 41(b).

Section 1.20, paragraph (m) is amended to adjust the post-issuance fee authorized by 35 U.S.C. 41(c)(1).

Section 1.20, paragraph (n) is amended to adjust the post-issuance fee authorized by Pub. L. 98-417 and 35 U.S.C. 156.

37 CFR § 1.21 *Miscellaneous fees and charges.*

Section 1.21 is amended to adjust the miscellaneous fees and charges authorized by 35 U.S.C. 41(d) and set forth in 37 CFR 1.21(a)-(b), (d)-(j) and (l)-(m) to reflect fluctuations in the CPI.

Section 1.21(f) is further amended to establish a flat fee for conducting an inventor search of Office records for a ten-year period.

The CopiShare Card referred to in 37 CFR 1.21(g) relates to the photocopiers and reader/printers for use by members of the public in the Office's search facilities. Each photocopier and reader/printer is connected to an access device which affords access to the equipment through the use of a magnetic card which has been encoded with an amount pre-paid by the customer. The access devices, encoding equipment, and magnetic cards comprise an equipment access system called the CopiShare system. The magnetic CopiShare Cards are purchased by the public and encoded with an amount of funds paid to the Office. The customer places the encoded card in the device connected to the photocopier or reader/printer, and a pre-set amount is deducted for each copy produced.

The Office is planning to authorize the public to use credit cards for the purchase of CopiShare Cards. This will be a pilot program for accepting credit cards for fees, and if feasible, may be extended to other operations of the Office.

Section 1.21(h) is further amended to establish one fee for recording each property in an assignment, agreement or other paper relating to the property in a patent or application. The fee reflects increased costs to enhance the processing of assignments.

37 CFR § 1.26 *Refunds.*

Section 1.26 is amended to change paragraph (c) to provide for a refund of \$1,500 if the Commissioner decides not to institute reexamination proceedings. The \$1,500 refund would apply to those instances where the proposed reexamination fee of \$1,980 under 37 CFR 1.20(c) was paid. The current \$1,300 refund will be made in those cases where the current \$1,770 reexamination fee was paid.

37 CFR § 1.55 *Claim for foreign priority.*

Section 1.55 paragraph (a) is amended to refer to the renumbered § 1.17(i)(1).

37 CFR § 1.102 *Advancement of examination.*

Section 1.102, paragraph (d) is amended to refer to the petition fee set forth in proposed new paragraph 1.17(i)(2).

37 CFR § 1.103 *Suspension of action.*

Section 1.103, paragraph (a) is amended to refer to the renumbered § 1.17(i)(1).

37 CFR § 1.171 *Application for reissue.*

Section 1.171 is amended to refer to the renumbered § 1.17(i)(1).

37 CFR § 1.177 *Reissue in divisions.*

Section 1.177 is amended to refer to the renumbered § 1.17(i)(1).

37 CFR § 1.296 *Withdrawal of request for publication of statutory invention registration.*

Section 1.296 is amended to adjust the handling fee for withdrawal of a statutory invention registration to reflect fluctuations in the CPI.

37 CFR § 1.313 *Withdrawal from issue.*

Section 1.313, paragraph (a) is amended to refer to the renumbered § 1.17(i)(1).

37 CFR § 1.314 *Issuance of patent.*

Section 1.314 is amended to refer to the renumbered § 1.17(i)(1).

37 CFR § 1.334 *Issue of patent to assignee.*

Section 1.334, paragraph (c) is amended to refer to the renumbered § 1.17(i)(1).

37 CFR § 1.445 *International application filing and processing fees.*

Section 1.445 is amended to adjust the fees authorized by 35 U.S.C. 376 for international application processing as set forth in 37 CFR 1.445(a)(2) and (a)(3) to recover the cost to the Office of such processing, as determined by fluctuations in CPI.

37 CFR § 1.451 *The priority claim and priority document in an international application.*

Section 1.451, paragraph (b) is amended to refer to the renumbered § 1.19(b)(1) and § 1.19(b)(6).

37 CFR § 1.482 *International preliminary examination fees.*

Section 1.482 is amended to adjust the fees authorized by 35 U.S.C. 376 for international application processing as set forth in 37 CFR 1.482(a) to recover the estimated average cost to the Office of such processing.

37 CFR § 1.492 *National stage fees.*

Section 1.492 is amended to adjust the fees authorized by 35 U.S.C. 376 for international application processing as set forth in 37 CFR 1.492(a)-(b) and (d)-(f) to recover the estimated average cost to the Office of such processing as determined by fluctuations in the CPI.

37 CFR § 1.666 *Filing of interference settlement agreements.*

Section 1.666, paragraph (b) is amended to refer to the renumbered § 1.17(i)(1).

37 CFR § 2.6 *Trademark fees.*

Section 2.6(a) and (q) are amended to adjust trademark fees established pursuant to the Trademark (Lanham) Act of 1946, as amended (15 U.S.C. 1113).

RESPONSE TO COMMENTS ON THE RULES

A notice of proposed rulemaking to adjust patent and trademark fees was published in the *Federal Register* on Nov. 30, 1988, at 53 FR 48402. Corrections of typographical errors were published in the *Federal Register* on Dec. 8, 1988, at 53 FR 49637. A notice also was published on Dec. 13, 1988 at volume 1097 of the *Official Gazette* of the United States Patent and

Trademark Office, pages 16 through 29. A public hearing was conducted on Jan. 4, 1989. Six letters submitting written comments were received and oral testimony was presented by one person at the public hearing. All of the written and oral comments were considered in adopting the changes set forth herein. The comments submitted, along with responses, appear below.

Comment:

A major patent law association requested an additional sixty (60) days to comment on proposed changes to the following rules that go beyond fees. Several other respondents also commented on the proposed changes to these rules.

37 CFR 1.53 Serial number, filing date, and completion of application.

37 CFR 1.55 Claim for foreign priority.

37 CFR 1.60 Continuation or divisional application for invention disclosed in a prior application.

37 CFR 1.62 File wrapper continuing procedure.

37 CFR 1.96 Submission of computer program listings.

Response:

The Office is not amending 37 CFR 1.53, 1.60, 1.62 and 1.96 and is extending the comment period until Mar. 3, 1989. The Office also is not adding new rule 37 CFR 1.21(n) which refers to 37 CFR 1.53, 1.60 and 1.62. The Office is amending only that portion of 37 CFR 1.55 which clarifies that the already established fee refers to the amount in the new 37 CFR 1.17(i)(1) and not the old § 1.17(i). After the extended comment period closes, the Office will issue a new notice of final rulemaking addressing these proposals.

Comment:

Two respondents requested that the Office provide for a comment period longer than the 30 days accorded in this rule package.

Response:

Office policy is to provide a 60 day comment period whenever possible. For fee-related rules, the comment period generally is limited to 30 days because the final rule must be in place 60 days before the fees are effective. This gives the public at least 90 days notice of a fee change.

In addition, the Office alerts, as far in advance as possible, major patent and trademark associations and organizations, and its advisory committees, that it will be proposing a fee adjustment. Finally, copies of the Nov. 30, 1988, *Federal Register* notice were mailed to 140 organizations, associations and the advisory committees only days after their publication in the *Federal Register*.

Comment:

One respondent asked whether maintenance fees that are paid after the effective date of the fee increase are payable in the increased amount or the amount that was payable when due.

Response:

The amount of any fee payment made on or after the effective date of this rule package is the amount set in the rulemaking.

Comment:

Two respondents, representing major trademark organizations, opposed the proposed reductions to the trademark application and assignment fees. The following major points were made: (1) No reductions should be made until Nov. 1989, when Pub. L. 100-667 (The Trademark Law Revision Act of 1988) is implemented; (2) Leading accounting firms recommend that a one year's operating reserve would be prudent; (3) It was Congressional intent that revenue generated from a \$100 assignment fee be used to subsidize the trademark operation.

The respondents also questioned whether the PTO could make more than one adjustment every three years under the present authorization statute, even when such adjustments would result in a reduction of certain fee amounts.

Response:

After careful consideration of the comments received, the PTO has decided to implement the two fee reductions for the following reasons: (1) Careful analysis has confirmed that projected revenues will be sufficient to implement the Intent-to-

Use legislation (Pub. L. 100-667) and still maintain an operating reserve within PTO's two percent fee policy. We believe it will take about 18 months experience with intent-to-use to be able to propose other changes to trademark fee amounts, and thus a delay in implementation of the proposed fee reductions to Nov. 1989 would not accomplish any useful purpose. (2) A one-year operating reserve for trademark programs is far too large an amount to address unforeseen expenses, would unfairly penalize users, is politically imprudent, especially given the current Federal deficit, and could be construed to constitute an unfair tax on the general user. (3) In the past, PTO has been criticized for charging \$100 for a trademark assignment and \$7.00 for a patent assignment. For example, refer to public comments on the 1986 trademark fee adjustments published in the *Federal Register* on Aug. 4, 1986 at 51 FR 28055. While it is true that the trademark assignment fee was originally designed to help subsidize the trademark application fee, which is set at a level that does not recover actual costs, the PTO believes that the proposed reduction in the assignment fee will not result in subsequent increases in the application fee or jeopardize the financial health of trademark operations. Further, the Office wants to assure respondents that in proposing a reduction in the assignment fee, the costs of cleaning up the trademark assignment data base have been taken into account.

As noted above, the planning of fee adjustments has been such that we do not anticipate two adjustments within a fee cycle. The legislative history to Public Law 99-607 indicates that Congress intended the PTO to reduce fees whenever appropriate.

Comment:

One respondent, a representative of a major patent organization, raised the following points (1) The PTO should conduct an analysis of the impact of patent fees on independent inventors and small businesses; (2) the reduction of fees for individual inventors and small business should continue to be subsidized by taxpayer revenues; (3) the PTO should make every effort to increase its efficiency as a way of holding down the level of fees; (4) the PTO and the Administration should attempt to amend the Gramm-Rudman-Hollings Act as it relates to user fees; and (5) the Office should allow 90 days for the public to comment on proposed rules.

Response:

(1) The PTO continually has monitored the level of filings by small businesses and individual inventors, which has averaged 34 percent for the years 1986-1988. The Office will conduct a study to assess the impact of patent fees on individual inventors and small businesses.

(2) For the 1989-91 fee cycle, the reduction of patent fees individual inventors and small businesses will continue to be subsidized by taxpayer revenues. As the PTO continues to progress to total financing by user fees, two options will be explored: (a) to continue to seek general taxpayer revenue for the subsidy to domestic and foreign users alike; or (b) to establish a two tier fee system for patent statutory fees. While the first option could mean lower overall patent fees, a taxpayer subsidy would be dependent upon Congressional action. If Congress were not to appropriate the necessary funds, the subsidy would not be available, in whole or in part. Full reliance on user fees could provide the PTO with additional flexibilities to meet user needs, especially in responding to growing workloads as the workloads occur.

(3) The PTO continues to scrutinize its operating budgets to identify ways to increase efficiency, to constrain costs, and to continue to provide better services to its users. The current fee package permits patent and patent service fees to be raised only with inflation. Trademark fees are held steady or are reduced. Despite these limited adjustments, user fees in 1989-1991 will allow the PTO to continue to pursue its major goals to improve the quality and timeliness of its goods and services.

(4) The Gramm-Rudman-Hollings sequestration of 1986 did affect PTO user fees. However, the Administration's budgets for 1987, 1988 and 1989 met all deficit reduction targets and did not require automatic sequestrations. We are confident that the Administration will continue to meet all deficit reduction targets prescribed by law and thus will continue to avoid the automatic sequestrations. The PTO is supportive of all efforts to reduce the Federal deficit.

(5) This issue was addressed above.

OTHER CONSIDERATIONS

The rule change is in conformity with the requirements of the Regulatory Flexibility Act (Pub. L. 96-354), Executive Orders 12291 and 12612, and the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 et seq. There are no information collection requirements relating to patent fee rules.

The Office has determined that this notice has no Federalism implications affecting the relationship between the National Government and the States as outlined in Executive Order 12612.

The General Counsel of the Department of Commerce has certified to the Chief Counsel for Advocacy, Small Business Administration, that the rule change will not have a significant adverse economic impact on a substantial number of small entities (Regulatory Flexibility Act, Pub. L. 96-354). The principal impact of the major patent fees has already been taken into account in Pub. L. 99-607, which provided small entities with a 50 percent reduction in the major patent fees. The rule change adjust fees to reflect the change in the CPI and cost of processing services as provided by statute (35 U.S.C. 41(d) and 41(f)).

The Office has determined that this rule change is not a major rule under Executive Order 12291. The annual effect on the economy will be less than \$100 million. There will be no major increase in costs or prices for consumers, individual industries, federal, state, or local government agencies, or geographic regions, because most major fees are being adjusted to reflect changes in the CPI over the past three years. There will be no significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

List of Subjects in 37 CFR Part 1 and Part 2

37 CFR Part 1

Administrative practice and procedure, Courts, Freedom of information, Inventions and patents, Reporting and recordkeeping requirements, Small businesses.

37 CFR Part 2

Administrative practice and procedure, Courts, Lawyers, Trademarks.

For the reasons set forth in the preamble, the Office is amending Title 37 of the Code of Federal Regulations, Chapter 1, as set forth below.

Part 1 Rules of Practice in Patent Cases

1. The authority citation for 37 CFR Part 1 would continue to read as follows:

Authority: 35 U.S.C. 6 unless otherwise noted.

2. Section 1.12 is amended by revising paragraph (a) and (c) to read as follows:

§ 1.12 Assignment records open to public inspection.

(a) The assignment records, relating to original or reissue patents, including digests and indexes, and assignment records relating to pending or abandoned trademark applications and to trademark registrations, are open to public inspection and copies of any instrument recorded may be obtained upon request and payment of the fee set forth in § 1.19(a)(3).

(c) Any request by a member of the public seeking copies of any assignment records of any pending or abandoned patent application preserved in secrecy under § 1.14, or any information with respect thereto, must

(1) Be in the form of a petition accompanied by the petition fee set forth in § 1.17(i)(1), or

(2) Include written authority granting access to the member of the public to the particular assignment records from the applicant or applicant's assignee or attorney or agent of record.

3. Section 1.14 is amended by revising paragraph (e) to read as follows:

§ 1.14 Patent applications preserved in secrecy.

(e) Any request by a member of the public seeking access to, or copies of, any pending or abandoned application preserved in secrecy pursuant to paragraphs (a) and (b) of this section, or any papers relating thereto, must

(1) Be in the form of a petition and be accompanied by the petition fee set forth in § 1.17(i)(1), or

(2) Include written authority granting access to the member of the public in that particular application from the applicant or the applicant's assignee or attorney or agent of record. (Note, see § 1.612(a) for access by an interference party to a pending or abandoned application.)

4. Section 1.16 is amended by revising paragraphs (a)-(b) and (d)-(i) and the note at the end of the section to read as follows:

§ 1.16 National application filing fees.

(a) Basic fee for filing each application for an original patent, except design or plant case:

By a small entity (§ 1.9(f))\$185.00
By other than a small entity\$370.00

(b) In addition to the basic filing fee in an original application, for filing or later presentation of each independent claim in excess of 3:

By a small entity (§ 1.9(f)(sf,1))\$18.00
By other than a small entity\$36.00

(d) In addition to the basic filing fee in an original application, if the application contains, or is amended to contain a multiple dependent claim(s) per application:

By a small entity (§ 1.9(f))\$60.00
By other than a small entity\$120.00

(If the additional fees required by paragraphs (b), (c), and (d) are not paid on filing or on later presentation of the claims for which the additional fees are due, they must be paid or the claims canceled by amendment, prior to the expiration of the time period set for response by the Office in any notice of fee deficiency.)

(e) Surcharge for filing the basic filing fee or oath or declaration on a date later than the filing date of the application:

By a small entity(§ 1.19(f))\$60.00
By other than a small entity\$120.00

(f) For filing each design application:

By a small entity(§ 1.9(f))\$75.00
By other than a small entity\$150.00

(g) Basic fee for filing each plant application:

By a small entity(§ 1.9(f))\$125.00
By other than a small entity\$250.00

(h) Basic fee for filing each reissue application:

By a small entity(§ 1.9(f))\$185.00
By other than a small entity\$370.00

(i) In addition to the basic filing fee in a reissue application, for filing or later presentation of each independent claim which is in excess of the number of independent claims in the original patent:

By a small entity(\$ 1.9(f))	\$18.00
By other than a small entity	\$36.00

* * * * *

(Note, see § 1.445 for international application filing and processing fees.

5. Section 1.17 is amended by revising paragraphs (a)-(h) and (j)-(m), by designating existing paragraph (i) as (i)(1) and revising it, and by adding a new paragraph (i)(2), to read as follows:

§ 1.17 Patent application processing fees.

(a) Extension fee for response within first month pursuant to § 1.136(a):

By a small entity(\$ 1.9(f))	\$31.00
By other than a small entity	\$62.00

(b) Extension fee for response within second month pursuant to § 1.136(a):

By a small entity(\$ 1.9(f))	\$90.00
By other than a small entity	\$180.00

(c) Extension fee for response within third month pursuant to § 1.136(a):

By a small entity(\$ 1.9(f))	\$215.00
By other than a small entity	\$430.00

(d) Extension fee for response within fourth month pursuant to § 1.136(a):

By a small entity(\$ 1.9(f))	\$340.00
By other than a small entity	\$680.00

(e) For filing a notice of appeal from the examiner to the Board of Patent Appeals and Interferences:

By a small entity(\$ 1.9(f))	\$70.00
By other than a small entity	\$140.00

(f) In addition to the fee for filing a notice of appeal, for filing a brief in support of an appeal:

By a small entity(\$ 1.9(f))	\$70.00
By other than a small entity	\$140.00

(g) For filing a request for an oral hearing before the Board of Patent Appeals and Interferences in appeal under 35 U.S.C. 134:

By a small entity(\$ 1.9(f))	\$60.00
By other than a small entity	\$120.00

(h) For filing a petition to the Commissioner under a section of this part listed below which refers to this paragraph

§ 1.47 - for filing by other than all the inventors or a person not the inventor.

§ 1.48 - for correction of inventorship

§ 1.182 - for decision on questions not specifically provided for.

§ 1.183 - to suspend rules.

§ 1.295 - for review of refusal to publish a statutory invention registration.

§ 1.377 - for review of decision refusing to accept and record payment of a maintenance fee filed prior to expiration of patent.

§ 1.378(e) - for reconsideration of decision on petition refusing to accept delayed payment of maintenance fee in expired patent.

§ 1.644(e) - for petition in an interference.

§ 1.644(f) - for request for reconsideration of a decision on petition in an interference.

§ 1.666(c) - for late filing of interference settlement agreement.

§§ 5.12, 5.13, & 5.14 - for expedited handling of foreign filing license.

§ 5.15 - for changing the scope of a license.
§ 5.25 - for retroactive license.

(i) (1) For filing a petition to the Commissioner under a section of this part listed below which refers to this paragraph

§ 1.12 - for access to an assignment record.

§ 1.14 - for access to an application.

§ 1.55 - for entry of late priority papers.

§ 1.103 - to suspend action in application.

§ 1.177 - for divisional reissue to issue separately.

§ 1.312 - for amendment after payment of issue fee.

§ 1.313 - to withdraw an application from issue.

§ 1.314 - to defer issuance of a patent.

§ 1.334 - for patent to issue to assignee, assignment recorded late.

§ 1.666(b) - for access to interference settlement agreement.

(2) For filing a petition to the Commissioner under § 1.102 of this part to make application special

(j) For filing a petition to institute a public use proceeding under § 1.292

(k) For processing an application filed with a specification in a non-English language (§ 1.52(d))

(l) For filing a petition

(1) for the revival of an abandoned application under 35 U.S.C. 133, or 371 or

(2) for delayed payment of the issue fee under 35 U.S.C. 151:

By a small entity(\$1.9(f))	\$31.00
By other than a small entity	\$62.00

(m) For filing a petition

(1) for revival of an unintentionally abandoned application, or
(2) for the unintentionally delayed payment of the fee for issuing a patent:

By a small entity(\$1.9(f))	\$310.00
By other than a small entity	\$620.00

* * * * *

6. Section 1.18 is revised to read as follows:

§1.18 Patent issue fees.

(a) Issue fee for issuing each original or reissue patent, except a design or plant patent:

By a small entity(\$ 1.9(f))	\$310.00
By other than a small entity	\$620.00

(b) Issue fee for issuing a design patent:

By a small entity(\$ 1.9(f))	\$110.00
By other than a small entity	\$220.00

(c) Issue fee for issuing a plant patent:

By a small entity(\$ 1.9(f))	\$155.00
By other than a small entity	\$310.00

7. Section 1.19 is revised to read as follows:

§1.19 Document supply fees.

The Patent and Trademark Office will supply copies of the following documents upon payment of the fees indicated:

(a) Uncertified copies of Offices documents:

(1) Printed copy of a patent, including a design patent, statutory invention registration, or defensive publication document, ex-

cept color plant or color statutory invention registration \$1.50

(2) Printed copy of a plant patent or statutory invention registration in color \$10.00

(3) Copy of Office documents, except as otherwise provided in this section, for each 30 pages or a fraction thereof \$10.00

(4) Copy of a utility patent with drawings in color (see § 1.84(p)) \$20.00

(5) Expedited local service for copy of a patent as in paragraph (a)(1) of this section, fulfilled within one work day for orders delivered to the Public Service Window in the Patent Public Search Room \$3.00

(6) Expedited service for copy of a patent as in paragraph (a)(1) of this section, ordered by electronic ordering service and delivered to the customer within two work days ... \$25.00

(b) Certified copies of Office documents:

(1) Certified copy of patent application as filed. \$10.00

(2) Certified copy of patent file wrapper \$170.00

(3) Certified copy of patent assignment record \$5.00

(4) Expedited service for certified copy of patent application as filed in paragraph (a)(3) of this section, fulfilled within 5 work days, excluding mailing time \$20.00

(5) For certifying Office records, per certificate \$3.00

(6) For a search of assignment records, abstract of title and certification, per patent \$15.00

(c) Library service (35 U.S.C. 13): For providing to libraries copies of all patents issued annually, per annum ... \$50.00

(d) For list of all United States patents and statutory invention registrations in a subclass \$2.00

(e) Uncertified statement as to status of the payment of maintenance fees due on a patent or expiration of a patent \$5.00

(f) Uncertified copy of a non-United States patent document, per document \$10.00

(g) To compare and certify copies made from Patent and Trademark Office records but not prepared by the Patent and Trademark Office, per copy of document \$10.00

(h) Additional filing receipts: duplicate or corrected due to applicant error \$15.00

8. Section 1.20 is amended by revising paragraphs (a)-(n) to read as follows:

§1.20 Post issuance fees.

(a) For providing a certificate of correction for applicant's mistake (§ 1.323) \$60.00

(b) Petition for correction of inventorship in patent (§ 1.324) \$120.00

(c) For filing a request for reexamination (§ 1.510(a)) \$2,000.00

(d) For filing each statutory disclaimer (§1.321):

By a small entity(§1.9(f)) \$31.00
By other than a small entity \$62.00

(e) For maintaining an original or reissue patent, except a design or plant patent, based on an application filed on or after Dec.

12, 1980 and before Aug. 27, 1982, in force beyond four years; the fee is due by three years and six months after the original grant \$245.00

(f) For maintaining an original or reissue patent, except a design or plant patent, based on an application filed on or after Dec. 12, 1980 and before Aug. 27, 1982, in force beyond eight years; the fee is due by seven years and six months after the original grant \$495.00

(g) For maintaining an original or reissue patent, except a design or plant patent, based on an application filed on or after Dec. 12, 1980 and before Aug. 27, 1982, in force beyond twelve years; the fee is due by eleven years and six months after the original grant \$740.00

(h) For maintaining an original or reissue patent, except a design or plant patent, based on an application filed on or after Aug. 27, 1982, in force beyond 4 four years; the fee is due by three years and six months after the original grant:

By a small entity(§ 1.9(f)) \$245.00
By other than a small entity \$490.00

(i) For maintaining an original or reissue patent, except a design or plant patent, based on an application, filed on or after Aug. 27, 1982, in force beyond eight years; the fee is due by seven years and six months after the original grant:

By a small entity(§ 1.9(f)) \$495.00
By other than a small entity \$990.00

(j) For maintaining an original or reissue patent, except a design or plant patent, based on an application filed on or after Aug. 27, 1982, in force beyond twelve years; the fee is due by eleven years and six months after the original grant:

By a small entity(§ 1.9(f)) \$740.00
By other than a small entity \$1,480.00

(k) Surcharge for paying a maintenance fee during the six-month grace period following the expiration of three years and six months, seven years and six months, and eleven years and six months after the date of the original grant of a patent based on an application filed on or after Dec. 12, 1980 and before Aug. 27, 1982 \$120.00

(l) Surcharge for paying a maintenance fee during the six-month grace period following the expiration of three years and six months, seven years and six months and eleven years and six months after the date of the original grant of a patent based on an application filed on or after Aug. 27, 1982:

By a small entity(§ 1.9(f)) \$60.00
By other than a small entity \$120.00

(m) Surcharge for accepting a maintenance fee after expiration of a patent for non-timely payment of a maintenance fee where the delay is shown to the satisfaction of the Commissioner to have been unavoidable \$550.00

(n) For filing an application for extension of the term of a patent (§ 1.740) \$600.00

9. Section 1.21 is amended by revising paragraphs (a), (b)(1), (d)-(j), (l)-(m), and the introductory text of the section and paragraph (b) are republished, to read as follows:

§1.21 Miscellaneous fees and charges.

The Patent and Trademark Office has established the following fees for the services indicated:

(a) Registration of attorneys and agents:

(1) For admission to examination for registration to practice, fee payable upon application \$270.00

(2) On registration to practice \$90.00

- (3) For reinstatement to practice \$10.00
- (4) For certificate of good standing as an attorney or agent \$10.00
Suitable for framing \$100.00
- (5) For review of a decision of the Director of Enrollment and Discipline under § 10.2(c) \$100.00
- (6) For requesting regrading of an examination under 10.7(c) \$100.00

(b) Deposit accounts:

- (1) For establishing or reinstating a deposit account . \$10.00

- (d) Delivery box: Local delivery box rental, per annum \$50.00
- (e) International type search reports: For preparing an international type search report of an international type search made at the time of the first action on the merits in a national patent application \$30.00
- (f) Search of Office records: For conducting an inventor search of Office records for a ten-year period \$10.00
- (g) CopiShare card: Cost per copy \$15
- (h) For recording each assignment, agreement or other paper relating to the property in a patent or application per property \$8.00
- (i) Publication in Official Gazette: For publication in the Official Gazette of a notice of the availability of an application or a patent for licensing or sale, each application or patent \$20.00
- (j) For a duplicate or replacement of a permanent Office user pass (There is no charge for the first permanent user pass) \$10.00
- *****
- (l) For processing and retaining any application abandoned pursuant to section 1.53(d) unless the required basic filing fee has been paid \$120.00
- (m) For processing each check returned "unpaid" by a bank \$50.00

10. Section 1.26 is amended by revising paragraph (c) to read as follows:

§1.26 Refunds.

(c) If the Commissioner decides not to institute a reexamination proceeding, a refund of \$1,500 will be made to the requestor of the proceeding. Reexamination requesters should indicate whether any refund should be made by check or by credit to a deposit account.

11. Section 1.55 is amended by revising paragraph (a) to read as follows:

§1.55 Claim for foreign priority.

(a) An applicant may claim the benefit of the filing date of a prior foreign application under the conditions specified in 35 U.S.C. 119 and 172. The claim to priority need be in no special form and may be made by the attorney or agent if the foreign application is referred to in the oath or declaration as required by § 1.63. The claim for priority and the certified copy of the foreign application specified in the second paragraph of 35 U.S.C. 119 must be filed in the case of interference (§ 1.630); when necessary to overcome the date of a reference relied upon

by the examiner; or when specifically required by the examiner; and in all other cases they must be filed not later than the date the issue fee is paid. If the papers filed are not in the English language, a translation need not be filed except in the three particular instances specified in the preceding sentence, in which event a sworn translation or a translation certified as accurate by a sworn or official translator must be filed. If the priority papers are submitted after the date the issue fee is paid, they must be accompanied by a petition requesting their entry and the fee set forth in § 1.17(i)(1).

12. Section 1.102 is amended by revising paragraph (d) to read as follows:

§1.102 Advancement of examination.

(d) A petition to make an application special on grounds other than those referred to in paragraph (c) of this section must be accompanied by the petition fee set forth in §1.17(i)(2).

13. Section 1.103, paragraph (a) is amended to read as follows:

§1.103 Suspension of action.

(a) Suspension of action by the Office will be granted for good and sufficient cause and for a reasonable time specified upon petition by the applicant and, if such cause is not the fault of the Office, the payment of the fee set forth in 1.17(i)(1). Action will not be suspended when a response by the applicant to an Office action is required.

14. Section 1.171 is amended to read as follows:

§1.171 Application for reissue.

An application for reissue must contain the same parts required for an application for an original patent, complying with all the rules relating thereto except as otherwise provided, and, in addition, must comply with the requirements of the rules relating to reissue applications. The application must be accompanied by a certified copy of an abstract of title or an order for a title report accompanied by the fee set forth in § 1.19(b)(6), to be placed in the file, and by an offer to surrender the original patent (§ 1.178).

15. Section 1.177 is amended to read as follows:

§1.177 Reissue in divisions.

The Commissioner may, in his or her discretion, cause several patents to be issued for distinct and separate parts of the thing patented, upon demand of the applicant, and upon payment of the required fee for each division. Each division of a reissue constitutes the subject of a separate specification descriptive of the part or parts of the invention claimed in such division; and the drawing may represent only such part of parts, subject to the provisions of §§ 1.83 and 1.84. On filing divisional reissue applications, they shall be referred to the Commissioner. Unless otherwise ordered by the Commissioner upon petition and payment of the fee set forth in § 1.17(i)(1) all the divisions of a reissue will issue simultaneously; if there be any controversy as to one division, the others will be withheld from issue until the controversy is ended, unless the Commissioner shall otherwise order.

16. Section 1.296 is amended to read as follows:

§1.296 Withdrawal of request for publication of statutory invention registration.

A request for a statutory invention registration, which has been filed, may be withdrawn prior to the date of the notice of the intent to publish a statutory invention registration issued

pursuant to §1.294(c) by filing a request to withdraw the request for publication of a statutory invention registration. The request to withdraw may also include a request for a refund of any amount paid in excess of the application filing fee and a handling fee of \$120.00 which will be retained. Any request to withdraw the request for publication of a statutory invention registration filed on or after the date of the notice of intent to publish issued pursuant to § 1.294(c) must be in the form of a petition pursuant to 1.183 accompanied by the fee set forth in §1.17(h).

17. Section 1.313, paragraph (a), is amended to read as follows:

§1.313 Withdrawal from issue.

(a) Applications may be withdrawn from issue for further action at the initiative of the Office or upon petition by the applicant. Any such petition by the applicant must include a showing of good and sufficient reasons why withdrawal of the application is necessary and, if the reason for the withdrawal is not the fault of the Office, must be accompanied by the fee set forth in 1.17(i)(1). If the application is withdrawn from issue, a new notice of allowance will be sent if the application is again allowed. Any amendment accompanying a petition to withdraw an application from issue must comply with the requirement of § 1.312.

* * * * *

18. Section 1.314 is amended to read as follows:

§1.314 Issuance of patent.

If payment of the issue fee is timely made, the patent will issue in regular course unless

- (a) the application is withdrawn from issue (§ 1.313)
- (b) issuance of the patent is deferred.

Any petition by the applicant requesting deferral of the issuance of a patent must be accompanied by the fee set forth in § 1.17(i)(1) and must include a showing of good and sufficient reasons why it is necessary to defer issuance of the patent.

19. Section 1.334 is amended by revising to read as follows:

§1.334 Issue of patent to assignee.

* * * * *

(c) If the assignment is recorded after the date of payment of the issue fee, the assignee may petition that the patent issue to the assignee as recorded. Any such petition must be accompanied by the fee set forth in § 1.17(i)(1).

20. Section 1.445 is amended by revising paragraph (a), (2), (3) and, the introductory text of paragraph (a) is republished, to read as follows:

§1.445 International application filing and processing fees.

(a) The following fees and charges are established by the Patent and Trademark Office under the authority of 35 U.S.C. 376:

* * *

(2) A search fee (see 35 U.S.C. 361(d) and PCT Rule 16) where:

- (i) No corresponding prior United States national application with basic filing fee has been filed \$550.00
- (ii) A corresponding prior United States national application with basic filing fee has been filed \$380.00
- (3) A supplemental search fee when required per additional invention \$150.00

* * * * *

21. Section 1.451 is amended by revising paragraph (b) to read as follows:

§1.451 The priority claim and priority document in an international application.

* * * * *

(b) Whenever the priority of an earlier United States national application is claimed in an international application, the applicant may request in a letter of transmittal accompanying the international application upon filing with the United States Receiving Office or in a separate letter filed in the Receiving Office not later than 16 months after the priority date, that the Patent and Trademark Office prepare a certified copy of the national application for transmittal to the International Bureau (PCT Article 8 and PCT Rule 17). The fee for preparing a certified copy is stated in § 1.19 (b)(1)

* * * * *

22. Section 1.482 is amended by revising paragraph (a) to read as follows:

§1.482 International preliminary examination fees.

(a) The following fees and charges for international preliminary examination are established by the Commissioner under the authority of 35 U.S.C. 376:

(1) A preliminary examination fee is due on filing the Demand:

- (i) Where an international search fee as set forth in § 1.445(a)(2) has been paid on the international application to the United States Patent and Trademark Office as an International Searching Authority, a preliminary examination fee of \$400.00

- (ii) Where the International Searching Authority for the international application was an authority other than the United States Patent and Trademark Office, a preliminary examination fee of \$600.00

(2) An additional preliminary examination fee when required, per additional invention:

- (i) Where a supplemental search fee as set forth in § 1.445(a)(3) has been paid on the international application to the United States Patent and Trademark Office as an International Searching Authority \$130.00

- (ii) Where the International Searching Authority for the international application was an authority other than the United States Patent and Trademark Office \$200.00

* * * * *

23. Section 1.492 is amended by revising paragraphs (a)(1)-(3), (b), and (d)-(f), and the introductory text of the section and paragraph (a) are republished to read as follows:

§ 1.492 National stage fees.

The following fees and charges for international applications entering the national stage under 35 U.S.C. 371 are established by the Commissioner under 35 U.S.C. 376:

(a) The basic national fee:

- (1) Where an international preliminary examination fee as set forth in § 1.482 has been paid on the international application to the United States Patent and Trademark Office:

By a small entity(§ 1.9(f)) \$165.00
By other than a small entity \$330.00

- (2) Where no international preliminary examination fee as set forth in § 1.482 has been paid to the United States Patent and Trademark Office, but an international search fee as set forth

in § 1.445(a)(2) has been paid on the international application to the United States Patent and Trademark Office as in International Searching Authority:

By a small entity(§ 1.9(f)) \$185.00
By other than a small entity \$370.00

(3) Where no international preliminary examination fee as set forth in § 1.482 has been paid and no international search fee as set forth in § 1.445(a)(2) has been paid on the international application to the United States Patent and Trademark Office:

By a small entity(§ 1.9(f)) \$250.00
By other than a small entity \$500.00

* * * * *

(b) In addition to the basic national fee, for filing or later presentation of each independent claim in excess of 3:

By a small entity(§ 1.9(f)) \$18.00
By other than a small entity \$6.00

* * * * *

(d) In addition to the basic national fee, if the application contains, or is amended to contain, a multiple dependent claim(s), per application:

By a small entity(§ 1.9(f)) \$60.00
By other than a small entity \$120.00

(If the additional fees required by paragraphs (b),(c), and (d) are not paid on presentation of the claims for which the additional fees are due, they must be paid or the claims canceled by amendment, prior to the expiration of the time period set for response by the Office in any notice of fee deficiency.)

(e) Surcharge for filing the basic national fee or oath or declaration later than 20 months from the priority date pursuant to § 1.494(c) or later than 30 months from the priority date pursuant to § 1.495(c):

By a small entity (§ 1.9(f)) \$60.00
By other than a small entity \$120.00

(f) For filing an English translation of an international application later than 20 months after the priority date (§ 1.494(c)) or filing an English translation of the international application or of any annexes to the international preliminary examination report later than 30 months after the priority date (§ 1.495(c) and (e)): \$30.00

24. Section 1.666 is amended by revising paragraph (b) to read as follows:

§ 1.666 Filing of interference settlement agreements.

* * * * *

(b) If any party filing the agreement or understanding under paragraph (a) of this section so requests, the copy will be kept separate from the file of the interference, and made available only to Government agencies on written request, or to any person upon petition accompanied by the fee set forth in § 1.17(i)(1) and on a showing of good cause.

* * * * *

Part 2 Rules of Practice in Trademark Cases

1. The authority citation for Part 2 continues to read as follows:

Authority : 15 U.S.C. 1123; 35 U.S.C. 6, unless otherwise noted.

2. Section 2.6 is amended by revising paragraphs (a), (q) and the introductory text of the section is republished to read as follows:

§ 2.6 Trademark fees.

The following fees and charges are established by the Patent and Trademark Office for trademark cases:

* * * * *

(a) For filing an application, per class \$175.00

* * * * *

(q) For recording trademark assignments and agreements or other papers relating to the property in a registration or application, per mark \$8.00

* * * * *

DONALD J. QUIGG
*Assistant Secretary and
Commissioner of Patents
and Trademarks*

[1100 TMOG 7]

(50) Department of Commerce Patent and Trademark Office 37 CFR Part 1 Patent Fees

Agency: Patent and Trademark Office, Commerce
Action: Interim Rule

Summary: The Omnibus Budget Reconciliation Act of 1990 imposes a 69% surcharge on fees charged under 35 U.S.C. § 41(a) and (b). The surcharge took effect on November 5, 1990. By this notice, the Patent and Trademark Office (Office) is informing the public of the patent fees affected and the new amounts including the surcharge.

Effective Date: As required by the Omnibus Budget Reconciliation Act, the fees in this interim rule are effective November 5, 1990. Consideration will be given to comments received on or before January 25, 1991.

Addresses: Address written comments to the Commissioner of Patents and Trademarks, Washington, D.C. 20231, Attention: Frances Michalkewicz, Suite 904, Building 2, Crystal Park. Written comments will be available for public inspection in Suite 904 of Building 2, Crystal Park, at 2121 Crystal Drive, Arlington, Virginia.

For Further Information Contact: Frances Michalkewicz by telephone at (703) 557-1610 or by mail to her attention and addressed to the Commissioner of Patents and Trademarks, Washington, D.C. 20231

Supplementary Information

The Patent and Trademark Office is required by the Omnibus Budget Reconciliation Act of 1990 to apply a 69% surcharge to patent fees charged under 35 U.S.C. § 41(a) and (b). By this Act, the 69% surcharge is rounded by standard arithmetic rules. The Office has applied standard arithmetic rules so that the amounts rounded would be *de minimis* and convenient to the user.

For entities other than small entities, amounts of \$100 or more were rounded to the nearest \$10. Amounts between \$10 and \$99 were rounded to the nearest even number so that the comparable small entity fee would be a whole number. For small entities, the Office then reduced the fee by 50% as required by 35 U.S.C. § 41(h).

Any fee under 35 U.S.C. § 41(a) and (b) which is paid on or after November 5, 1990, is subject to the surcharge. For purposes of determining the amount of the fee to be paid, the date of mailing indicated on a proper Certificate of Mailing under 37 CFR § 1.8 or a proper Certificate of Express Mail under 37 CFR § 1.10 will be considered to be the date of receipt in the Office.

Since, by law, this surcharge became effective on November 5, 1990, and the law provided no discretion to the Office, this rule is effective as of that date.

Other Considerations

The rule change is in conformity with the requirements of the Regulatory Flexibility Act (Pub. L. 96-354), Executive Orders 12291 and 12612, and the Paperwork Reduction Act, 44 U.S.C. § 3501 *et seq.* There are no information collection requirements related to patent fee rules.

The Office has determined that this notice has no Federalism implications affecting relations between the National Government and the States as outlined in Executive Order 12612.

The Office has determined that this rule change is not a major rule under Executive Order 12291. The annual effect on the economy will be less than \$100 million because the additional revenue that the surcharge collects will be offset by a reduction in the Office's appropriation from the general revenues of the United States. While there will be an increase in patent fees, they are required by law, and the Office is without discretion to reduce them.

The Office has determined that good cause exists for dispensing with the requirements under 5 U.S.C. § 553 of notice and comment and delayed effective date. These procedures are impracticable because the Omnibus Budget Reconciliation Act of 1990 imposed a surcharge on fees set under 35 U.S.C. § 41(a) and (b) effective November 5, 1990. Therefore, this rule is being issued as an interim final rule effective November 5, 1990. Comments received by January 25, 1991 will be considered in drafting the final rule.

Because a notice of proposed rulemaking is not required by 5 U.S.C. § 553(b)(B) or any other law, a Regulatory Flexibility Analysis is not required and has not been prepared for purposes of the Regulatory Flexibility Act.

Lists of Subjects

37 CFR Part 1

Administrative practice and procedure, Courts, Freedom of Information, Inventions and patents, Reporting and recordkeeping requirements, Small businesses.

For the reasons set out in the preamble, 37 CFR is amended as set forth below.

PART 1-RULES OF PRACTICE IN PATENT CASES

1. The authority citation for 37 CFR Part 1 continues to read as follows:

Authority: 35 U.S.C. § 6 unless otherwise noted.

2. Section 1.16 is amended by revising the section heading and paragraphs (a)-(d) and (f)-(j) and adding the authority citation to read as follows:

§ 1.16 National application filing fees and surcharge.

- (a) Basic fee for filing each application for an original patent, except design or plant cases:
- | | |
|------------------------------|----------|
| By a small entity (§ 1.9(f)) | \$315.00 |
| By other than a small entity | \$630.00 |
- (b) In addition to the basic filing fee in an original application, for filing or later presentation of each independent claim in excess of 3:
- | | |
|------------------------------|---------|
| By a small entity (§ 1.9(f)) | \$30.00 |
| By other than a small entity | \$60.00 |
- (c) In addition to the basic filing fee in an original application, for filing or later presentation of each claim (whether independent or dependent) in excess of 20. (Note that § 1.75(c) indicates how multiple dependent claims are considered for fee calculation purposes):
- | | |
|------------------------------|---------|
| By a small entity (§ 1.9(f)) | \$10.00 |
| By other than a small entity | \$20.00 |
- (d) In addition to the basic filing fee in an original application, if the application contains, or is amended to contain, a multiple dependent claim(s) per application:
- | | |
|------------------------------|----------|
| By a small entity (§ 1.9(f)) | \$100.00 |
|------------------------------|----------|

By other than a small entity.....\$200.00

(If the additional fees required by paragraphs (b), (c), and (d) are not paid on filing or on later presentation of the claims for which the additional fees are due, they must be paid or the claims cancelled by amendment, prior to the expiration of the time period set for response by the Office in any notice of fee deficiency.)

* * * * *

(f) For filing each design application:

By a small entity (§ 1.9(f))	\$125.00
By other than a small entity	\$250.00

(g) Basic fee for filing each plant application:

By a small entity (§ 1.9(f))	\$210.00
By other than a small entity	\$420.00

(h) Basic fee for filing each reissue application:

By a small entity (§ 1.9(f))	\$315.00
By other than a small entity	\$630.00

(i) In addition to the basic filing fee in a reissue application, for filing or later presentation of each independent claim which is in excess of the number of independent claims in the original patent:

By a small entity (§ 1.9(f))	\$30.00
By other than a small entity	\$60.00

(j) In addition to the basic filing fee in a reissue application, for filing or later presentation of each claim (whether independent or dependent) in excess of 20 and also in excess of the number of claims in the original patent. (Note that § 1.75(c) indicates how multiple dependent claims are considered for fee purposes):

By a small entity (§ 1.9(f))	\$10.00
By other than a small entity	\$20.00

(Note: See § 1.445 for international application filing and processing fees.)

(Omnibus Budget Act of 1980, § 10101; 35 U.S.C. 6, 41)

3. Section 1.17 is amended by revising the section heading, paragraphs (a)-(g), (l), and (m), and the authority citation to read as follows:

§ 1.17 Patent application processing fees and surcharge.

- (a) Extension fee for response within first month pursuant to § 1.136(a):
- | | |
|------------------------------|----------|
| By a small entity (§ 1.9(f)) | \$50.00 |
| By other than a small entity | \$100.00 |
- (b) Extension fee for response within second month pursuant to § 1.136(a):
- | | |
|------------------------------|----------|
| By a small entity (§ 1.9(f)) | \$150.00 |
| By other than a small entity | \$300.00 |
- (c) Extension fee for response within third month pursuant to § 1.136(a):
- | | |
|------------------------------|----------|
| By a small entity (§ 1.9(f)) | \$365.00 |
| By other than a small entity | \$730.00 |
- (d) Extension fee for response within fourth month pursuant to § 1.136(a):
- | | |
|------------------------------|------------|
| By a small entity (§ 1.9(f)) | \$575.00 |
| By other than a small entity | \$1,150.00 |
- (e) For filing a notice of appeal from the examiner to the Board of Patent Appeals and Interferences:
- | | |
|------------------------------|----------|
| By a small entity (§ 1.9(f)) | \$120.00 |
| By other than a small entity | \$240.00 |
- (f) In addition to the fee for filing a notice of appeal, for filing a brief in support of an appeal:
- | | |
|------------------------------|----------|
| By a small entity (§ 1.9(f)) | \$120.00 |
| By other than a small entity | \$240.00 |

(g) For filing a request for an oral hearing before the Board of Patent Appeals and Interferences in an appeal under 35 U.S.C. 134:

By a small entity (§ 1.9(f)) \$100.00
By other than a small entity \$200.00

* * * * *

(i) For filing a petition

(1) For the revival of an unavodably abandoned application under 35 U.S.C. sections 133 or 371, or
(2) For delayed payment of the issue fee under 35 U.S.C. § 151:

By a small entity (§ 1.9(f)) \$50.00
By other than a small entity \$100.00

(m) For filing a petition

(1) For revival of an unintentionally abandoned application, or
(2) For the unintentionally delayed payment of the fee for issuing a patent:

By a small entity (§ 1.9(f)) \$525.00
By other than a small entity \$1050.00

(Omnibus Budget Reconciliation Act of 1990), § 10101; Pub. L. 97-247; 15 U.S.C. 1113, 1123, 35 U.S.C. 6, 41, 181-188; Export Administration Act of 1979, as amended; Arms Export Control Act, as amended; Nuclear Non-Proliferation Act of 1978, and the delegations in the regulations under these acts to the Commissioner by regulations (15 CFR 370.10(j); 22 CFR 125.04, and 10 CFR 810.7))

4. Section 1.18 is revised to read as follows:

§ 1.18 Patent issue fees and surcharge.

(a) Issue fee for issuing each original or reissue patent, except a design or plant patent:

By a small entity (§ 1.9(f)) \$525.00
By other than a small entity \$1,050.00

(b) Issue fee for issuing a design patent:

By a small entity (§ 1.9(f)) \$185.00
By other than a small entity \$370.00

(c) Issue fee for issuing a plant patent:

By a small entity (§ 1.9(f)) \$260.00
By other than a small entity \$520.00

(Omnibus Budget Reconciliation Act of 1990, § 10101; 35 U.S.C. 6, 41)

5. Section 1.20 is amended by revising the section heading, paragraphs (d) and (h)-(j), and the authority citation to read as follows:

§ 1.20 Post issuance fees and surcharge.

(d) For filing each statutory disclaimer (§ 1.321):

By a small entity (§ 1.9(f)) \$50.00
By other than a small entity \$100.00

* * * * *

(h) For maintaining an original or reissue patent, except a design or plant patent, based on an application filed on or after August 27, 1982, in force beyond four years; the fee is due by three years and six months after the original grant:

By a small entity (§ 1.9(f)) \$415.00
By other than a small entity \$830.00

(i) For maintaining an original or reissue patent, except a design or plant patent, based on an application filed on or after August 27, 1982, in force beyond eight years; the fee is due by seven years and six months after the original grant:

By a small entity (§ 1.9(f)) \$835.00
By other than a small entity \$1,670.00

(j) For maintaining an original or reissue patent, except a design or plant patent, based on an application filed on or

after August 27, 1982, in force beyond twelve years; the fee is due by eleven years and six months after the original grant:
By a small entity (§ 1.9(f)) \$1,250
By other than a small entity \$2,500.00

(Omnibus Budget Reconciliation Act of 1990, § 10101, 35 U.S.C. 6, 41; 15 U.S.C. 1113, 1123)

and Commissioner
of Patents and Trademarks*

[1121 O.G. 18]

(51) **Notice of Final Rulemaking
Patent and Trademark Fee Revisions**

The Patent and Trademark Office is amending its rules of practice in patent and trademark cases. Parts 1 and 2 of Title 37, Code of Federal Regulations, to adjust patent and trademark fee amounts.

Public Law 102-204, which was enacted on Dec. 10, 1991, waives the normal 30 day notice period and allows fees to become effective in fiscal year 1992 on or after one day after publication of a notice in the *Federal Register*. A notice was published on Friday, Dec. 13, 1991 at 56 FR Part III. The effective date for the new fee amounts is Monday, Dec. 16, 1991.

Any fee amount that is paid on or after Dec. 16, 1991 is subject to the new fee schedule.

Your attention is drawn to the following major changes in the fee schedule:

*The legislation established comparable maintenance fee amounts for all patents based on applications filed on or after Dec. 12, 1980. All first stage maintenance fees are now \$900 for a large entity and \$450 for a small entity; second stage maintenance fees are now \$1,810 for a large entity and \$905 for a small entity; and third stage maintenance fees are now \$2,730 for a large entity, and \$1,365 for a small entity.

*The small entity provision is continued and made applicable to all maintenance fee payments.

*The trademark application filing fee was increased to \$200. Several trademark service fees have been adjusted, but all other trademark processing fees remain unchanged.

If you have any questions or comments, or would like to have a copy of the *Federal Register* notice, please contact the Office of Long-Range Planning and Evaluation by phone at 703-305-8510

BRADFORD R. HUTHER
*Assistant Commissioner
for Finance and Planning*

**U.S. PATENT AND TRADEMARK OFFICE
Effective Dec. 16, 1991**

The U.S. Patent and Trademark Office has amended its rules of practice in patent and trademark cases, Parts 1 and 2 of Title 37, Code of Federal Regulations to adjust patent and trademark fee amounts.

Any fee payment due and paid on or after Dec. 16, 1991, must be paid in the revised amount. The date of mailing indicated on a proper Certificate of Mailing under either 37 CFR 1.8 or 37 CFR 1.10 will be considered to be the date of receipt and payment in the Office.

As this fee sheet is a summary and the content of rules also may be changing, you should refer to the notice published in the *Federal Register* on Dec. 13, 1991 at 56 FR Part III. See also *Official Gazette* of Dec. 17, 1991.

The fees which are subject to reduction for small entities who have established status (37 CFR 1.27) are shown in a separate column.

For additional information, please contact the PTO Public Service Center at (703)305-HELP.

Fee Code	37 CFR	Description	Fee	Small Entity Fee if Applicable
Patent Fees				
Filing Fees				
101/201	1.16(a)	Basic filing fee - utility	690.00	345.00
102/202	1.16(b)	Independent claims in excess of three	72.00	36.00

DEPARTMENT OF COMMERCE
Patent and Trademark Office
37 CFR Parts 1 and 2
Revision of Patent and Trademark Fees

Agency: Patent and Trademark Office, Commerce

Action: Final rule.

Summary: The Patent and Trademark Office (PTO) is amending the rules of practice in patent and trademark cases, Parts 1 and 2 of title 37, Code of Federal Regulations, to adjust certain patent and trademark fee amounts and to amend certain procedures in accordance with the applicable provisions of the Patent and Trademark Office Authorization Act of 1991, which was passed by the House of Representatives on November 25, 1991, and by the Senate on November 27, 1991, as H.R. 3531, and signed into law on December 10, 1991.

H.R. 3531 subsections 5(a)(1) and (2), sets base amounts for fees established by 35 U.S.C. 41(a) and 41(b). Subsections 5(a)(1) and (2) also add certain fees related to national process-

ing of Patent Cooperation Treaty applications and maintenance fees established under Pub. L. 96-517 to 35 U.S.C. 41(a) and

41(b), respectively. The base amounts set by subsections 5(a)(1) and (2) are subject to the surcharge to be set by the Commissioner to recover the deficit reduction target of \$95,000,000 in fiscal year 1992 as required by the Omnibus Budget Reconciliation Act of 1990, Pub. L. 101-508, as amended by subsection 2(a) of H.R. 3531. Subsection 5(a)(3) of H.R. 3531 gives the Commissioner authority to establish fees under 35 U.S.C. 41(d) to recover average costs, and sets the fee amount for three specific services provided by the PTO. The small entity provision, 35 U.S.C. 41(h), is continued. The small entity provision is also made applicable to maintenance fee payments based on applications filed on or after December 12, 1980, but before August 27, 1982, and to certain fees related to the national processing of Patent Cooperation Treaty (PCT) application. H.R. 3531 allows the adjustment of trademark fees to reflect fluctuations in the Consumer Price Index (CPI).

Effective Date: The rules are effective December 16, 1991 except for §§ 1.445(a) and 1.1482(a) which will be effective on December 27, 1991.

For Further Information Contact: Frances Michalkewicz by telephone at (703) 305-8510 or by mail marked to her attention and addressed to the Commissioner of Patents and Trademarks, Washington, D.C. 20231.

Supplementary Information: This rule change is designed to adjust the Patent and Trademark Office fees in accordance with the provisions of H.R. 3531. Patent and trademark fees were set on October 1, 1982, in accordance with the provisions of title 35, United States Code, and the provisions of section 31 of the Trademark (Lanham) Act of 1946, as amended (15 U.S.C. 1113).

On November 5, 1990, the Omnibus Budget Reconciliation Act of 1990 (Pub. L. 101-508) imposed a 69 percent surcharge on all patent fees set under 35 U.S.C. 41(a) and (b). Section 10101 of Pub. L. 101-508 required the Commissioner to make recommendations for any statutory changes necessary to implement new fee proposals. PTO's authorizing legislation (Pub. L. 100-703) was to expire on September 30, 1991. Legislation to authorize appropriations for the Patent and Trademark Office for fiscal years 1992 and 1993 and for other purposes was introduced in the House of Representatives on March 22, 1991, as H.R. 1613, and in the Senate on April 9, 1991, as S. 793.

A notice of proposed rulemaking to adjust patent and trademark fees in accordance with the proposed provisions of H.R. 1613 and S. 793 was published in the Federal Register on May 10, 1991, at 56 FR 21890, and in the Official Gazette on May 21, 1991, at 1126 OG 56. A public hearing on the notice of proposed rulemaking was held on June 12, 1991.

For fiscal year 1992, H.R. 3531 waives requirements for advance publication, notice and comment contained in the patent and trademark laws and the Administrative Procedures Act, and revised fee amounts take effect on or after one day after publication in the Federal Register. To provide continuity, this final rule package modifies the notice of proposed rulemaking that was published in the Federal Register on May 10, 1991, to reflect the provisions of H.R. 3531. Comments received in response to the notice of proposed rulemaking have been addressed, even though certain comments may have been rendered moot by provisions of H.R. 3531.

BACKGROUND:

Statutory Provisions

Patent fees are authorized by 35 U.S.C. 41 and 35 U.S.C. 376. Subsections 41(a) and (b) of title 35, United States Code, establish a number of statutory fees. Among them are fees for filing a patent application, issuing a patent, and maintaining a patent in force. Subsections 5(a)(1) and (2) of H.R. 3531 amend 35 U.S.C. 41(a) and (b) by adjusting the amounts of the patent statutory fees currently established by those subsections, and by specifying certain fees related to the national processing of Patent Cooperation Treaty applications and maintenance fees on patent applications filed on or after December 12, 1980, but before August 27, 1982, in 35 U.S.C. 41(a) and 41(b), respectively.

The Omnibus Budget Reconciliation Act of 1990, Pub. L. 101-508, imposed a 69 percent surcharge on all fees authorized by 35 U.S.C. 41(a) and (b), effective November 5, 1990. Subsection 2(b) of H.R. 3531 amends that Act to require the Commissioner to establish surcharges under section 10101(a) of Pub. L. 101-508 on all fees established under 35 U.S.C. 41(a) and 41(b) to recover \$95,000,000 in fiscal year 1992.

Subsection 41(h) of title 35, United States Code, authorized a 50 percent reduction in the fees paid under 35 U.S.C. 41(a) and 41(b) by independent inventors, small business concerns, and nonprofit organizations who meet the prescribed definitions. This reduction will apply to the fees newly established in subsections 41(a) and 41(b).

Subsections 5(a)(3) of H.R. 3531 amends 35 U.S.C. 41(d) to allow the Commissioner to establish fees for all other processing, services, or materials related to patents and not specified in the amended section 41 to recover the average cost of providing these services or materials. Section 5(a)(3) also establishes the amounts for three services.

Subsection 5(b) of H.R. 3531 amends subsection 41(f) of title 35, United States Code, to provide that fees set under 35 U.S.C. 41(a) and (b) may be adjusted on October 1, 1992, and every year thereafter, to reflect fluctuations in the CPI over the previous 12 months.

Subsection 5(c) amends subsection 41(g) of title 35, United States Code, to allow new fee amounts established by the Commissioner under section 41 to take effect thirty days after notice in the Federal Register and the Patent and Trademark Office Official Gazette. However, sections 2(c), 5(c)(2) and 13 of H.R. 3531 provide that patent fees established for fiscal year 1992 will take effect on or after one day after such fees are published in the Federal Register.

Section 31 of the Trademark (Lanham) Act of 1946, as amended (15 U.S.C. 1113), authorizes the Commissioner to establish fees for the filing and processing of an application for the registration of a trademark or other mark, and for all other services and materials relating to trademarks and other marks.

Subsection 42(c) of title 35, United States Code, provides that trademark fees available to the Commissioner are to be used exclusively for the processing of trademark registrations and for other services and materials related to trademarks. Subsection 5(e) of H.R. 3531 modifies 35 U.S.C. 42(c) so that trademark fees may be used for the processing of trademark registrations and for other activities, services, and materials relating to trademarks and to cover a proportionate share of the administrative costs of the PTO.

Subsection 5(f) amends section 31(a) of the Trademark Act of 1946 (15 U.S.C. 1113(a)) to allow trademark fees to be adjusted once each year to reflect, in the aggregate, any fluctuations during the preceding 12 months in the CPI. However, during fiscal year 1992, trademark fees may be adjusted to reflect fluctuations in the CPI during the preceding three years.

Subsection 5(f) also amends section 31 to allow new fee amounts to take effect thirty days after notice in the Federal Register and the Patent and Trademark Official Gazette. However, fees established for fiscal year 1992 will take effect on or after one day after such fees are published in the Federal Register.

Subsection 5(g) of H.R. 3531 makes conforming amendments to section 376 of title 35, United States Code, that authorizes the establishment of fees related to applications filed under the provisions of the PCT. Under current law, section 376 permits the Commissioner to set certain fees related to these applications. Amendments made in subsection 5(a)(1) of H.R. 3531, however, set some PCT-related fees in the new subsection 41(a).

Revised fee amounts go into effect on the effective date noted above, with the exception of certain PCT fees (1.445(a), and 1.482(a)), which go into effect on December 27, 1991. Under an agreement between the PTO and the World Intellectual Property Organization (WIPO) which establishes PTO as an International Searching and Examining Authority under the PCT, any amendment to certain PCT fees can take effect only after PTO provides 30 days written notice to WIPO. Notice concerning the increase to PCT international fees for international applications filed in the United States Receiving Office is included as Appendix A, and a current schedule of PCT fees, with specific effective dates, is included as Appendix B.

General Procedures

Recovery Level Determinations: Fees have been adjusted for a planned recovery of \$426,000,000 in fiscal year 1992. The fiscal year 1992 PTO budget will be adjusted accordingly.

Amounts for fees established by 35 U.S.C. 41(a) and 41(b) and 371(c)(1) are amended by H.R. 3531. Subsections 41(a) and 41(b) of title 35, United States Code, now include certain fees related to the national processing of PCT applications and maintenance fees on patent applications filed on or after December 12, 1980, but before August 27, 1982. Fee amounts established by subsections 41(a) and 41(b) are subject to the provisions of

the Omnibus Budget Reconciliation Act of 1990, as amended by H.R. 3531. These provisions require that \$95 million be raised in fiscal year 1992 for deficit reduction purposes. As a result, the fees established in subsections 41(a) and 41(b) have been increased by 38 percent to generate this \$95,000,000 in fiscal year 1992. After application of the 38 percent increase to the base fees, amounts were rounded by applying standard arithmetical rules so that the amounts rounded would be de minimis and convenient to the user. Fees of \$100 or more were rounded to the nearest \$10. Fees between \$2 and \$99 were rounded to the nearest even number so that the comparable small entity fee would be a whole number.

Non-Statutory patent service fees and PCT processing fees are adjusted to recover planned costs for 1992. However, three patent service fees are set by statute. These are assignment fees, printed patent copy fees and photocopy charge fees. In response to comments on the proposed level of the non-statutory patent fee amounts and the direction by Congress to reduce costs overall and, hence, associated fees, from the requested 1992 budget of \$462 million to a level of \$426 million, many of the adopted fee amounts are less than the proposed amounts.

Subsection 5(f) (2) of H.R. 3531 allows trademark fees to be adjusted in fiscal year 1992 to reflect changes over the prior three fiscal years in the Consumer Price Index. The Office of Management and Budget has determined that the PTO should use Consumer Price Index-U to adjust trademark fees. The Department of Labor's Consumer Price Index is made public approximately 21 days after the end of the month being calculated. The trademark fees are being adjusted by 13.8 percent.

Workload Projections: Determination of workloads varies by fee code. Principal workload projection techniques are as follows:

Patent and trademark application workloads are projected from statistical regression models using recent application trends. Patent issues are projected from an in-house patent production model and reflect examiner production achievements and goals. Patent maintenance fee workloads utilize patents issues 3.5, 7.5 and 11.5 years prior to payment and assume payment rates of 75 percent, 50 percent and 25 percent, respectively. Trademark affidavit projections are based on filing trends for marks registered five to six years prior. Trademark renewal projections are based on marks registered 20 years prior to 1992. Service fee workloads follow linear trends from prior year activities. Workload estimates are calculated by the PTO's Office of Budget and the office responsible for the fee activity.

A comparison of existing and revised fee amounts is included as Appendix C to this notice. Any fee amount that is paid on or after the *effective date* is subject to the new fee schedule. For purposes of determining the amount of the fee to be paid, the date of mailing indicated on a proper Certificate of Mailing, where authorized under 37 CFR 1.8, will be considered to be the date of receipt in the PTO. A "Certificate of Mailing under section 1.8" is not "proper" for items which are specifically excluded from the provisions of section 1.8. Section 1.8(a)(2) should be consulted for those items for which a Certificate of Mailing is not "proper." Such items include, inter alia, the filing of national and international applications for patents and the filing of trademark applications. The provisions of 37 CFR 1.10 relating to filing papers and fees with an "Express Mail" certificate, however, do apply to any paper or fee (including patent and trademark applications) to be filed in the PTO. If an application or fee is filed by "Express Mail" with a proper certificate dated on or after the effective date of the rules, the amount of the fee to be paid is the fee established herein.

A discussion of specific sections is set forth below.

DISCUSSION OF SPECIFIC RULES

37 CFR 1.12 Assignment records open to public inspection.

Section 1.12, paragraph (a), is amended to change the reference for payment of a fee to section 1.19(b)(3), and add a reference to the fee set in trademark rules at section 2.6(b)(5). Section 1.12, paragraph (d), is amended to change the reference

for payment of a fee to section 1.21(j), and add a reference to the fee set in the trademark rules at section 2.6(b)(10).

37 CFR 1.13 Copies and Certified copies

Section 1.13 is amended to revise paragraph (b) to be consistent with revisions to paragraphs 1.19(b) and 2.6(b).

37 CFR 1.16 National application filing fee.

Section 1.16, paragraphs (a), (b), (d) and (f)-(j), is revised to reflect the amendments made by subsections 2(b) and 5(a)(1) of H.R. 3531 as described above under General Procedures.

Section 1.16, paragraph (e), is revised to adjust the patent application surcharge fee authorized by 35 U.S.C. 41(d) and 111. Paragraph (e) has been modified from the proposal to provide a two-tier fee structure for the payment of the surcharge. The fifty percent reduction for those that have established small entity status is applicable to the surcharge for filing the basic filing fee, oath or declaration on a date later than the filing date of the application. In response to comments on the proposed level of the non-statutory patent fee amounts and Congressional direction to recover a lower level of planned costs overall, the adopted fee amount is less than the amount proposed.

37 CFR 1.17 Patent application processing fees.

Section 1.17, paragraphs (a)-(g), (l) and (m), is revised to reflect the amendments made by subsections 2(b) and 5(a)(1) of H.R. 3531 as described above under General Procedures.

Section 1.17, paragraphs (h)-(k), is revised to adjust fees authorized by 35 U.S.C. 41(d) as amended by subsection 5(a)(3) of H.R. 3531. In response to comments on the proposed level of the non-statutory patent fee amounts and Congressional direction to recover a lower level of planned costs overall, the adopted fee amounts are less than the proposed amounts.

Section 1.17, paragraphs (n) and (o), is revised to adjust fees authorized by 35 U.S.C. 41(d) as amended by subsection 5(a)(3) of H.R. 3531. The fee amounts in 37 CFR 1.17(n) and (o) are higher than proposed because the amount of the application basic filing fee on which these amounts are based was increased by subsections 2(b) and 5(a)(1) of H.R. 3531.

37 CFR 1.18 Patent issue fees.

Section 1.18 is revised to reflect the amendments made by subsections 2(b) and 5(a)(1) of H.R. 3531 as described above under General Procedures.

37 CFR 1.19 Document supply fees.

Section 1.19, paragraphs (a), (b) and (d)-(h), is revised to adjust fees authorized by 35 U.S.C. 41(d) as amended by 5(a)(3) of H.R. 3531. In response to comments on the proposed level of the non-statutory patent fee amounts and Congressional direction to recover a lower level of planned costs overall, the adopted fee amounts in paragraphs (a)(1)(iii), (a)(2), (a)(3), (b)(1), (b)(4), (d), and (f) are less than the proposed amounts.

Section 1.19 is revised further to establish that the Office will sell certified or uncertified copies of documents at the same flat fee. Most requests for documents are for certified copies. Customers who need uncertified copies of documents or copies of portions of documents also are able to make those copies themselves at a self-service copy charge, per page.

Subparagraph (a)(1) also is revised to clarify and set fees for different levels of service available for obtaining copies of patents in black and white. In addition to regular service, the PTO will provide for expedited local service to be fulfilled within one workday for orders delivered to the Public Service Window at double the fee amount set for regular service; and expedited service for copies ordered via electronic ordering service and delivered by overnight delivery service as previously provided by subparagraph (a)(6). There are two Public Service Windows at the PTO: one in the Patent Search Room and another in the

Trademark Search Library. Unless otherwise requested, copies of patents will be delivered to the Public Service Window in the Patent Search Room.

Section 1.19, subparagraph (a)(2), is revised further to delete reference to copies of statutory invention registrations in color, which will be provided by renumbered subparagraph (a)(3).

Section 1.19 is revised to delete existing subparagraph (a)(3). In the future, the PTO only will provide certified or uncertified copies of documents at a flat fee, as set forth in renumbered subparagraph (b)(3).

Section 1.19, renumbered subparagraph (a)(3), is revised further to clarify and set fees for different levels of service available for obtaining copies of utility patents or statutory invention registrations containing color drawings. Subparagraph (a)(3) has been modified from the proposal to delete reference to expedited local service because this service cannot be provided by the PTO contractor.

Section 1.19 is revised further to delete subparagraphs (a)(5) and (a)(6). The service formerly provided under subparagraph (a)(5) will be provided under subparagraphs (a)(1)(ii), and (a)(2)(ii), and the service formerly provided under subparagraph (a)(6) will be provided under (a)(1)(iii).

Section 1.19, subparagraph (b)(1), is revised further to clarify and set fees for different levels of service available for obtaining certified or uncertified copies of patent applications as filed. In addition to regular service, the PTO will provide for expedited service, fulfilled within five work days, excluding mailing time, at double the fee amount set for regular service.

Section 1.19, subparagraph (b)(2), is revised to reduce the fee for providing a certified or uncertified copy of a patent file wrapper and contents.

Section 1.19 is revised further to delete existing subparagraph (b)(3). Certified or uncertified copies of assignment records will be provided under renumbered subparagraph (b)(4).

Section 1.19 is revised further to delete existing subparagraph (b)(4). Certified or uncertified copies of Office records will be provided under renumbered subparagraph (b)(3). Expedited service as currently provided under existing subparagraph (b)(4) will be provided under subparagraph (b)(1)(ii).

Section 1.19 is revised further to renumber subparagraph (b)(5) as (b)(3). Section 1.19, subparagraph (b)(3), is revised to establish that the PTO provides certified or uncertified copies of documents at one flat fee amount.

Section 1.19 is revised further to renumber subparagraph (b)(6) as (b)(4) and to include services formerly provided under subparagraph (b)(3) in addition to certified and uncertified copies of abstracts of title.

Section 1.19 paragraph (g), is modified from the proposal. The PTO will continue to compare and certify copies of documents made from PTO records, but not prepared by PTO staff.

37 CFR 1.20 Post-issuance fees.

Section 1.20, paragraphs (a)-(c), is revised to adjust the fees authorized by 35 U.S.C. 41(d) as amended by subsection 5(a)(3) of H.R. 3531. In response to comments on the proposed level of the non-statutory patent fee amounts and Congressional direction to recover a lower level of planned costs overall, the adopted fee amounts are less than the amounts proposed.

Section 1.20, paragraph (d), is revised to reflect the amendments made by subsections 2(b) and 5(a)(1) of H.R. 3531 as described above under General Procedures.

Section 1.20, paragraphs (e)-(g), is revised to reflect the amendments made by subsections 2(b) and 5(a)(2) of H.R. 3531 as described above under General Procedures, and to provide for the payment of maintenance fees on original and reissue patents,

except design or plant patents, based on all applications filed on or after December 12, 1980. Paragraphs (e)-(g) formerly provided for the payment of maintenance fees on original and reissue patents, except design or plant patents, based on applications filed on or after December 12, 1980, but before August 27, 1982. Paragraphs (h)-(j), which are deleted, provided for the payment of maintenance fees on original and reissue patents, except design or plant patents, based on applications filed on or after August 27, 1982. The distinction in the maintenance fee due based on the application filing date was eliminated by subsection 5(a)(2) of H.R. 3531.

For patents based on applications filed on or after December 12, 1980, but before August 27, 1982, patent owners must establish small entity status according to 37 CFR 1.27 if they have not done so and if they wish to pay the reduced fee amounts.

Section 1.20 is revised to delete paragraphs (h)-(j). The fees for maintaining all original or reissue patents, except design or plant patents, including those based on applications filed on or after August 27, 1982, are set forth in paragraphs (e)-(g). Reissue patentees are reminded that the due dates for payment of maintenance fees are computed from the date of grant of the original (non-reissue) patent.

Section 1.20 is revised to renumber paragraph (k) as paragraph (h), and adjust the fee amount authorized by 35 U.S.C. 41(d) as amended by subsection 5(a)(3) of H.R. 3531. Revised paragraph (h) provides for a surcharge for payment of maintenance fee during the six-month grace period following the expiration of three years and six months, seven years and six months, and eleven years and six months after the date of the original grant of a patent based on an application filed on or after December 12, 1980. Paragraph (k) formerly provided for a surcharge for late payment of maintenance fees or original and reissue patents, except design or plant patents, based on applications filed on or after December 12, 1980, but before August 27, 1982. Paragraph (l), which is deleted, provided for a surcharge for late payment of maintenance fees on original and reissue patents, except design or plant patents, based on applications filed on or after August 27, 1982.

Section 1.20, new paragraph (h), has been modified from the proposal to provide a two-tier fee structure for payment of the maintenance fee surcharge. The fifty percent reduction for those that have established small entity status is applicable to the surcharge for payment of maintenance fees within the six-month grace period. Further, in response to comments and Congressional direction, the adopted fee amount is less than the amount proposed.

Section 1.20 is revised to delete paragraph (l). The fees for the late payment of a maintenance fee for all original or reissue patents, except design or plant patents, based on applications filed on or after December 12, 1980, are set forth in renumbered paragraph (h).

Section 1.20 is revised to renumber paragraphs (m) and (n) as paragraphs (i) and (j), and adjust the fee amounts as authorized by 35 U.S.C. 41(d) as amended by subsection 5(a)(3) of H.R. 3531. Further, in response to comments and Congressional direction, the adopted fee amount in paragraph (i) is less than the amount proposed.

37 CFR 1.21 Miscellaneous fees and charges.

Section 1.21, paragraphs (a), (c), (e), (g), (h), (j), (i) and (n), is revised to adjust fees as authorized by 35 U.S.C. 41(d) as amended by subsection 5(a)(3) of H.R. 3531. In response to comments on the proposed level of the non-statutory patent fee amounts and Congressional direction to recover a lower level of planned costs overall, the adopted fee amounts in subparagraphs (a)(1), (a)(3), (a)(5), (a)(6), (j), (i) and (n) are less than the amounts proposed. The purposed changes to paragraphs (d) and (m) have not been adopted.

Section 1.21, subparagraph (a)(4), is revised further to provide a certificate of good standing for \$10 and a certificate that is suitable for framing at double that fee amount.

Section 1.21, subparagraph (b)(1), is revised to eliminate the fee requirement for reinstating a deposit account. This fee requirement has been found to be unnecessary because the Office no longer suspends accounts when there is no activity.

Section 1.21 is revised to delete paragraph (f), since searching PTO records will be provided under revised paragraph (j). Paragraph (f) is reserved.

Section 1.21, paragraph (g), is revised further to clarify that the .25 fee amount for each photocopy established by subsection (a)(3) of H.R. 3531 is for a self-service copy charge amount, per page. The self-service copy charge will be applied to the per copy amounts on copy access system cards as previously provided by this paragraph.

The same copy charge will be required for each printed page generated from the Automated Patent System, as previously provided by paragraph (q).

Section 1.21, paragraph (h), is revised to establish the fee for recording each assignment in accordance with subsection 5(a)(3) of H.R. 3531.

Section 1.21, paragraph (j), is revised to eliminate the fee for providing duplicate Office user passes. The Office will provide duplicate passes free of charge.

Revised paragraph (j) establishes one fee amount for each hour of service, or fraction thereof, requested from the PTO. Examples of services are searching PTO records, as previously provided by this paragraph; PTO staff assistance to conduct a search using the Automated Patent System, as previously provided in paragraph (p); and other miscellaneous requests for services where PTO staff are providing direct labor support to customers.

Section 1.21, paragraph (k), is revised to require the payment of the actual cost for performing special services provided by the PTO. Generally, services provided by the PTO would be charged at the \$30.00 hourly rate set forth in paragraph (j) of this section. Paragraph (k) is reserved for non-labor charges, such as computer services, special supplies, extra mailing costs, etc., that are authorized by the customer.

37 CFR 1.24 Coupons.

Section 1.24 is revised to adjust the fee for the purchase of coupons for patents and trademarks to make it comparable to the fee required for the purchase of copies of patents and trademarks and to adjust the amount of the coupon books.

37 CFR 1.26 Refunds.

Section 1.26, paragraph (c), is revised to provide for a refund of \$1,635 if the Commissioner decides not to institute reexamination proceedings. The \$1,635 refund would apply to those instances where the proposed reexamination fee of \$2,180 under 37 CFR 1.20(c) was paid. The current \$1,500 refund would be made in those cases where the current \$2,000 reexamination fee was paid.

37 CFR 1.171 Application for reissue.

Section 1.171, paragraph (a), is revised to change the reference for payment of a fee for a title report to section 1.19(b)(4).

37 CFR 1.296 Withdrawal of request for publication of statutory invention registration.

Section 1.296 is revised to adjust the handling fee for withdrawal of a statutory invention registration as authorized by 35 U.S.C. 41(d) as amended by subsection 5(a)(3) of H.R. 3531. In response to comments on the proposed level of the non-statutory patent fee amounts and Congressional direction to recover a lower level of planned costs overall, the adopted fee amount is less than the proposed amount.

37 CFR 1.362 Time for payment of maintenance fees.

Section 1.362 is amended to revise paragraphs (a) and (e) to refer to renumbered paragraphs in section 1.20, and to revise paragraph (b) to clarify that maintenance fees are not required for any plant or design patents.

37 CFR 1.378 Acceptance of delayed payment of maintenance fee in expired patent to reinstate patent.

Section 1.378 is amended to revise paragraphs (a)-(c) and (e) to refer to renumbered paragraphs in section 1.20.

37 CFR 1.445 International application filing, processing, and search fees.

Section 1.445 is revised to adjust the fees authorized by 35 U.S.C. 376 for international application processing as set forth in 37 CFR 1.445(a) in accordance with subsection 5(a)(3) of H.R. 3531. In response to comments on the proposed level of the non-statutory patent fee amounts and Congressional direction to recover a lower level of planned costs overall, the adopted fee amounts are less than the amounts proposed.

37 CFR 1.482 International preliminary examination fees.

Section 1.482 is revised to adjust the fees in paragraph (a) in accordance with subsection 5(a)(3) of H.R. 3531. In response to comments on the proposed level of the non-statutory patent fee amounts and Congressional direction to recover a lower level of planned costs overall, the adopted fee amount is less than the amount proposed.

37 CFR 1.492 National stage fees.

Section 1.492, paragraphs (a)-(d), is revised to reflect the amendments made by subsections 2(b) and 5(a)(1) and 5(g) of H.R. 3531 as described above under General Procedures.

Section 1.492 is revised further to add new subparagraph (a)(5) to set forth a fee upon entering the national stage when a search report on the international application has been prepared by the European Patent Office or the Japanese Patent Office. The proposed fee amount includes a reduction approximately equivalent to the reduction of 20 percent of the cost of conducting a search that is given by the European and Japanese Patent Offices upon entering the national state when a search report in a international application has been prepared by the U.S. Patent and Trademark Office.

Section 1.492, paragraphs (e) and (f), is revised to adjust fees authorized by 35 U.S.C. 41(d) as amended by subsection 5(a)(3) of H.R. 3531. Paragraph (e) has been modified from the proposal to provide a two-tier fee structure for payment of the surcharge. The fifty percent reduction for those who have established small entity status is applicable to the surcharge for late filing of the basic national fee or oath or declaration later than 20 month from the priority date.

37 CFR 1.740 Application for extension of patent term.

Section 1.740, paragraph (a)(14), is revised to change the reference to the rule for extension of a patent term to section 1.20(j).

37 CFR 1.770 Express withdrawal of application for extension of patent term.

Section 1.770 is revised to change the reference to the rule for extension of a patent term to section 1.20(j).

37 CFR 2.6 Trademark fees.

Section 2.6 is revised to be divided into two sections. Revised paragraph (a) includes all trademark processing fees and revised paragraph (b) includes all trademark service fees. Paragraphs (a) and (u) are renumbered as subparagraphs (a)(1) and (a)(2); paragraphs (v), (b), (s), (c)-(l) are renumbered as subparagraph (a)(4)-(a)(16), respectively; and paragraph (m) is renumbered as subparagraph (a)(18). New subparagraphs (a)(3) and (a)(17) are added.

Paragraph (n) is renumbered as subparagraph (b)(1); paragraphs (o), (q), (r), and (w) are renumbered as subparagraphs (b)(5)-(b)(8), respectively; and paragraph (t) is renumbered as subparagraph (b)(11). New subparagraphs (b)(2)-(b)(4), (b)(9) and (b)(10) are added.

Section 2.6, renumbered paragraphs (a)(1) and (b), is revised further to adjust fee amounts in accordance with subsection 5(f) of H.R. 3531. In response to comments on the proposed level of the trademark fee amounts and Congressional direction to limit adjustments to fluctuations in the Consumer Price Index, the adopted fee amounts in subparagraphs (a)(1), (b)(1)(iii), (b)(2), (b)(4), (b)(7), and (b)(10) are less than the proposed amounts. The proposed changes to subparagraphs (a)(6) and (a)(12)-(18) have not been adopted.

Subparagraph (a)(2) is revised further to delete reference to filing a statement of use. New subparagraph (a)(3) is established for filing a statement of use under section 1(d)(1) of the Act, per class. This clarifies that a \$100 fee amount is due for each action requested.

Subparagraph (a)(5) has been modified from the proposal so that the words "an application" are not deleted.

Subparagraph (a)(6) is revised further to clarify the requirement for paying an additional fee for a renewal application made within three months of the expiration of the registration.

Subparagraph (a)(16) is revised further to delete reference to filing a notice of opposition. New subparagraph (a)(17) is established for filing a notice of opposition.

Section 6.6(b) is revised further to establish that the Office will sell certified or uncertified copies of documents at the same flat fee. Most requests for documents are for certified copies. Customers who need uncertified copies of documents or copies of portions of documents also are able to make those copies themselves for a self-service copy charge, per page.

Subparagraph (b)(1) is revised further to delete reference to a copy showing title and/or status. In addition, this subparagraph clarifies the levels of service available for obtaining printed copies of trademarks. In addition to regular service provided by subparagraph (b)(1)(i), the PTO will provide, in new subparagraph (b)(1)(ii), for expedited local service to be fulfilled within one workday for orders delivered to a Public Service Window at double the fee amount for regular service. There are two Public Service Windows at the PTO: one in the Patent Search Room and another in the Trademark Search Library. Unless otherwise requested, all copies of trademarks will be delivered to the Public Service Window in the Trademark Search Library. New subparagraph (b)(1)(iii) establishes a fee for providing expedited service for a copy of a registered mark ordered by electronic ordering service and delivered to the customer within two workdays.

Under new subparagraph (b)(2), the PTO will provide a certified or uncertified copy of a trademark application as filed. In addition to regular service provided under (b)(2)(i), the PTO will provide, in subparagraph (b)(2)(ii), for expedited service fulfilled within five workdays, excluding mailing time, at double the fee amount for regular service.

Under subparagraph (b)(3), the PTO will provide certified or uncertified copies of trademark file wrappers and contents at the same flat fee amount.

Subparagraph (b)(4) is revised further to provide certified copies of registered marks, showing title and/or status, as provided under the current section 2.6(n). In addition to regular service provided by (b)(4)(i) at a fee, the PTO will provide, in subparagraph (b)(4)(ii), for expedited service fulfilled within five workdays from receipt of request in the Trademark Post-Registration Division, excluding mailing time, at double the fee amount for regular service.

Subparagraph (b)(5) is revised further to provide certified or uncertified copies of trademark records, per document, except as

otherwise provided in this section, at a flat fee amount. Further, expedited services now are included as subparagraphs (b)(2)(ii) and (b)(4)(ii).

Section 2.6 is revised to delete existing paragraph (p). A self-service copy charge is provided in subparagraph (b)(9) of this section.

Section 2.6, subparagraph (b)(6), has been modified from the proposal to establish a fee of \$40 for the first property and a fee of \$25 for all subsequent properties.

Subparagraph (b)(7) is revised further to clarify that the fee amount charged will cover a search of assignment records and an abstract of title and certification.

Section 2.6 is revised to delete paragraph (x). This service will be provided under proposed subparagraph (b)(9).

New subparagraph (b)(9) will establish a self-service copy charge, per page, and will be a replacement for the services offered in paragraphs (p) and (x) which are being deleted. The \$.25 self-service copy charge will be applied to the per copy amounts on copy access system cards, and for each printed page generated from the Automated Trademark System, as previously provided by paragraph (x).

New subparagraph (b)(10) establishes one fee amount for each hour of service, or fraction thereof, requested from the PTO. Examples of services would be searching PTO records, as previously provided by this paragraph, and other miscellaneous requests for services where PTO staff are providing direct labor support to customers.

Subparagraph (b)(11) is revised to clarify that the services to be provided would be those that are not specified elsewhere in the statute or rules. Adding this language makes the working of this rule comparable to section 1.21(k). Generally, services provided by the PTO will be charged at the \$30.00 hourly rate set forth in subparagraph (b)(10) of this section. Subparagraph (b)(11) is reserved for non-labor charges, such as computer services, special supplies, extra mailing costs, etc., that are authorized by the customer.

Response to Comments on The Rules

A notice of proposed rulemaking to adjust patent and trademark fees in accordance with the proposed provisions of H.R. 1613 and S. 793 was published in the Federal Register on May 10, 1991, at 56 FR 21890, and in the Official Gazette on May 21, 1991, at 1126 OG 56. A public hearing was held on June 12, 1991.

Although comments were received on a variety of subjects related to patents and trademark examination processes, only those relating directly to this notice are being addressed. Other comments relating to patents have been forwarded to the Advisory Commission on Patent Law Reform for their review and Consideration. Examples of comments that have been referred to the Advisory Commission include:

Comment: One respondent stated that, because some patentees make money off their patents while others "enhance the progress in the useful arts" by disclosing technology, not all inventors should share the same costs. PTO should investigate measures for decreasing costs, increasing efficiencies, and reallocating costs among users.

Comment: Fees should be raised proportionately without eliminating the two-tier system and with only baseline budgets.

Comment: PTO should set maintenance fees based on the use of the patent; for example, similar to a sales tax which would be reported and paid by the owner of the patent.

Comment: An alternative to the two-tiered system would be a system whereby one-half the fees for a small entity would be deferred until five years after the patent is granted.

Comment: PTO should reexamine the post-issuance process as a potential source of new revenues, e.g., raising fees for assignments and establishing filing fees for the recordation of lawsuits. More intensive use of maintenance fees could result in a trust fund to be used for such major projects as automation.

Comment: The patent system might benefit if PTO were established as a Government corporation. As a Government corporation, the PTO would have the financing and management flexibility which has benefitted other Government agencies.

Comment: PTO should redefine a small entity in order to decrease the number of persons receiving the subsidy.

The following comments relate to the proposed rule notice:

Comment: A majority of the comments received protested the PTO's proposal in H.R. 1613 and S. 793 to limit the small entity subsidy to application fees and claims fees paid upon filing.

Response: As enacted, H.R. 3531, did not contain the proposed change. Therefore, the small entity subsidy provided in 35 U.S.C. 41(h) continues to apply to fees set forth in 35 U.S.C. 41(a) and (b) as amended by subsections 5(a)(1) and (2) of H.R. 3531.

Comment: The PTO should publish an additional fee schedule and invite public comments after legislation is approved by Congress.

Response: Due to the delay in the enactment of PTO's authorization legislation, Congress waived normal notice and comment rulemaking procedures. Thus, H.R. 3531 provides that, in fiscal year 1992, the fees will take effect on or after one day after the fees are published in the Federal Register.

Comment: Several respondents indicated that the proposed rules would establish the PTO as a user-funded government agency and, as such, the Office would no longer be subject to Congressional oversight.

Response: The Office became essentially user-fee funded, with the exception of approximately \$1.5 million of taxpayer revenues in fiscal year 1992, upon enactment of the Omnibus Budget Reconciliation Act of 1990 (Public Law 101-508) on November 5, 1990. That Act simply changed the source of funding for the PTO but did not change its character as a Federal agency which is part of the Department of Commerce within the Executive Branch. As a Federal agency, the PTO must prepare and submit its annual budget requests to the Secretary of Commerce and the Office of Management and Budget. The PTO's request is included in the President's annual budget submission to Congress. Congress continues to have oversight for PTO programs, and the annual budget request is subject to the congressional appropriations process. H.R. 3531 also contains a provision whereby the PTO will continue to submit an annual report to the Committees on the Judiciary of the Senate and the House of Representatives which includes fee collections for the prior years; activities during the prior year that were supported by fee expenditures; budget plans for significant programs, projects and activities; and any proposed disposition of surplus fees by the Office. Furthermore, the PTO is governed by reprogramming guidelines specified in the Department of Commerce's annual appropriations act.

Further, subsection 5(d)(3) of H.R. 3531 requires the Commissioner to report to the Congress, with publication in the Federal Register, on the automated search system, and its use by the public.

Comment: Why should present users be forced to support impractical and wasteful PTO programs and policies, such as the automation program and the installation of posh conference room.

Response: While questions had been raised as to the source of funding for the PTO's automation program, several witnesses at oversight hearings supported the need to automate patent and trademark operations.

The automation programs are designed to improve the quality and timeliness of PTO services and products, and to discontinue reliance on outmoded manual processes and paper references. These improvements will benefit not only PTO employees but also PTO users. Decisions by Congress on PTO fees in 1992 have been interpreted as supportive of the automation programs (since fees fund the programs), although less funds for the programs will result in slower implementation.

With respect to the PTO's conference rooms, PTO attempts to provide a favorable work environment for its employees and for its customers while they are doing business at the Office.

Comment: PTO should look for hardware and software that is already completed rather than developmental for its automation program.

Response: In March 1988, an Industry Review Panel was established by the Secretary of Commerce to review the Automated Patent System (APS) program. Their findings regarding the design and architecture of APS were: "At this time, there is no totally off-the-shelf system that can provide the capabilities and performance PTO needs for patent search and retrieval. Even the majority of the individual components are not available off-the-shelf. Currently available products do not provide the performance (e.g., flip rate) nor can they handle the workload (e.g., number of users and data volumes) required if APS is to support the examining corps in its day-to-day operations. For example, even considering the recent advances in workstation technology, a custom workstation is needed for APS image retrieval and manipulation."

In light of several technological forecasts performed since then, the PTO continues to agree with this assessment. However, the report also stated, "the PTO should [plan] to re-procure key systems components [at appropriate times] to take advantage of improvements in technology and dropping prices. Therefore, within the last few years, the PTO has begun to reprocure several major APS components, such as the devices used to store electronic images of patents, the workstations used for searching these images, and the network needed to connect APS."

Comment: PTO should determine whether or not private contractors in industry can accomplish functions of the PTO.

Response: PTO has been following the guidelines of OMB Circular A-76, "Performance of Commercial Activities", since 1981. PTO's A-76 studies identified specific savings that were taken in fiscal years 1983 and 1985 budgets for activities such as file maintenance, facilities management and patent copy fulfillment. The PTO will continue to examine those functions new undertaken by Federal personnel that could be performed by contractor personnel.

Comment: Fee amounts will become unreasonable and unfair if the Commissioner is given the opportunity to increase them every two years.

Response: This provision, Which was proposed in H.R. 1613, is not included in the enacted legislation. H.R. 3531 provides that patent statutory fees (for example, filing, issue and maintenance fees) may be adjusted each year by fluctuations in the Consumer Price Index over the preceding 12 months.

Comment: Congress has given the Commissioner the ability to tax the public by charging fees at amounts greater than the cost of providing the service. In particular, non-statutory fees should be set to recover the actual cost of a service or product and not to recover a percentage of overall operating costs.

Response: H.R. 3531 directs that patent non-statutory fees be established "to recover the estimated average cost to the Office of such processing, services, or materials." Exceptions are assignment, photocopy and printed copy fees which are set by statute. The PTO has complied with Congressional intent on this subject, and many fee amounts have been lowered from the proposal.

Comment: The premises, assumptions and models used in formulating the proposed fees are not provided so that a respondent can determine whether the fee increases are justified.

Response: Since the publication of the notice of proposed rulemaking on May 10, 1991, the PTO's proposals for 1992 fee rates and its budget have undergone significant changes. The proposed rule package would have adjusted fees to recover a 1992 budget of \$462 million. The fee adjustments that have been adopted in this final rule package will recover a 1992 budget of \$462 million, a reduction of \$36 million. This recovery level reflects Congressional views on the amount of change required for each fee and on the content of the 1992 budget request. An explanation of the methodology used in formulating the adopted fee amounts is included under General Procedures.

Comment: There appears to be no added value for the increased fees since there are no significant improvements in services planned.

Response: The proposed rule package which was published in the Federal Register on May 10, 1991, would have adjusted fees to address a 1992 budget of \$462 million. This proposed budget included \$110 million in increases over the 1991 budget. At an aggregated level, the \$110 million increase addressed the following: \$30 million for inflation, cost-of-living salary adjustments and other uncontrolled costs; \$45 million for increased workload; \$18 million for automation initiatives for patents and trademarks; and \$17 million for quality enhancements.

Included in the above are improvements in service such as deployment of the Automated Patent System to the public and to the examiners in 1993; improved search services for biotechnology patent examiners; replacement of the automated search system in Trademarks (T-Search); improved management of the patent and trademark operations; enhanced patent classification services; and maintenance of patent and trademark pendency goals.

The PTO currently is in the process of readjusting its 1992 programs and plans to respond to the proposed \$426 million program level that is the result of H.R. 3531.

While this level is still a significant increase above the 1991 budget, the majority of the increased funds will be used to address inflationary and other uncontrollable costs and workloads. Many of the initiatives proposed under the \$462 million level cannot be undertaken in 1992.

Comment: The divergence in charges for recording assignments within a four-year period appears arbitrary, and brings into question the rationale and assumptions used in creating the increase. If owners were to forego the process of recording assignments, PTO records would be incomplete, registration could not be renewed in the name of the true owner, and the patent and trademark systems would suffer. A more viable approach would be to return to a reasonable base fee and a reduction of the fee for subsequent properties.

Response: Trademark assignment fees previously were set at \$100 for the first property and \$20 for all subsequent properties. The original trademark fee schedule was recommended by Congress, in conjunction with the trademark user community, and was designed to keep the filing fee low and raise certain other fees to recover the costs of the Office. In 1989, the trademark assignment fees were reduced to a flat \$8 per property. Although this was the actual unit cost to the Office for processing assignments at that time, it was based on antiquated systems, lengthy processing times and questionable quality. In response to public comments, particularly those from the Public Advisory Committee for Trademark Affairs, fees of \$40 for the first trademark property and \$25 for all subsequent properties in the same document have been adopted.

A flat \$40 per patent property assignment fee is established by 35 U.S.C. 41(d) as amended by subsection 5(a)(3) of H.R. 3531.

Comment: PCT fees are proposed at disproportionately higher levels than U. S. national fees. This disparity compromises both the spirit of the PCT and its practical effectiveness for users.

Response: Some PCT fees were set by Congress in H.R. 3531. As to the fees for which the Commissioner has been delegated authority to set, these fees have been modified to more accurately reflect the costs of providing the associated services as required by 35 U.S.C. 41(d) as amended by subsection 5(a)(3) or H.R. 3531.

Comment: The omission of small entity reductions for PCT applicants, but not national applicants, discriminates against small entities which use the PCT.

Response: National stage PCT fees have been added to 35 U.S.C. 41(a), therefore making applicants eligible for the small entity reduction.

Comment: The PCT fees for entry into the national stage should be reduced.

Response: PCT fees for entry into the national stage essentially have been set by Congress. The PCT national stage fees are generally at a higher level than U.S. national fees to reflect the increased cost associated with processing national stage applications having multiple inventions which must be processed pursuant to the principle of unity of invention. This difference between national stage fees and national application fees was established at the time of and because of a change in approach to unity of invention issues as a result of the decision in *Caterpillar Tractor Co. v. Commissioner of Patents and Trademarks*, 650 F. Supp. 2108, 231 USPQ 590 (E.D.Va. 1986).

Comment: Fees for PCT applications which include an international advisory search and examination by a foreign patent office effectively penalize rather than recognize the procedural assist.

Response: The content of an international search report or results of a preliminary examination would generally come to the attention of the PTO through an information disclosure statement or through communications from the International Bureau. Where the Japanese Patent Office or European Patent Office provides both the results of the search together with copies of the documents and their pertinence to patentability, these reports have been of assistance to the PTO examiner and are reflected in the new fee.

Comment: As a cost-saving and efficiency measure, the PTO should remove all prescreening of applications and require the examiner to perform any screening needed.

Response: To require patent examiners to perform screening of the formal requirements of the filing of an application would not be efficient or result in cost savings. This screening is performed by clerical personnel in the Application Branch who are paid less than patent examiners and can readily and effectively review and patent application for compliance with formal requirements.

Comment: PTO should remove the statutory change relating to the declaration to avoid the need to staff the Office with trained individuals for reviewing the document. The regulations could be replaced with a mere statement of inventor's name and address provided by the applicant. At the very least, the PTO should allow filing of facsimile copies of declarations at the filing date to avoid the late fee.

Response: The requirement for an oath or declaration is set by statute (35 U.S.C. 115) and is not subject to elimination under the rulemaking authority of the Commissioner. The appropriateness of accepting papers by facsimile has been the subject of a trial program and will be addressed in a future proposal.

Comment: The proposed change which would establish one petition fee amount is reasonable for some petitions and unreasonable for other petitions.

Response: The fee proposed for petitions and other fees are intended to recover the estimated cost of the operations of the PTO. Each petition fee need not, and does not, necessarily recover only the cost of processing and deciding a specific type of petition. Use of one petition fee amount eases the administra-

tive burden on the public and on the PTO of being required to determine the correct fee amount for the particular petition being filed.

Comment: The proposed 50 percent increase in the reexamination fee is too high.

Response: A fee amount of \$2,180, which represents a nine percent increase, has been adopted.

Comment: The progressive schedule for the extension-of-time fees is burdensome on a foreign applicant, particularly a small entity. Processing a three-month extension does not require any more effort from PTO than processing a one-month extension.

Response: Extension of time fees are mandated by statute and any increases reflect changes in the CPI as permitted by 35 U.S.C. 41 (f) as amended by subsection 5(b) of H.R. 3531.

Comment: The proposed increase in the fee to \$300 for late filing of an inventor's oath and/or filing fee might force applicants to delay filing while, for example, obtaining an absent inventor's signature. Public policy to encourage prompt filing—especially important in securing international rights in countries observing strict novelty requirements—suggests the fee be more moderately adjusted.

Response: The adopted fee amount is \$130.00 and the small entity subsidy is applicable to surcharge fees for late filing of the basic filing fee or oath or declaration (37 CFR 1.16(e)), for paying a maintenance fee within the six month grace period (37 CFR 1.20(h)), and for filing the basic national fee or oath or declaration later than 20 months in a PCT application (37 CFR 1.492(e)).

Comment: Two respondents expressed opposition to the proposed elimination of the trademark "fence" which, along with stringent public and Congressional oversight, has generally resulted in a fair and reasonable fee schedule. Trademark operations already are 100 percent user-fee funded, and proportionately contributing to PTO overhead costs does not justify the proposed fee increases.

Response: The enacted legislation, H.R. 3531, maintains the "fence" around the use of trademark fees. Trademark fees, however, can be used to fund activities relating to trademarks and to cover a proportionate share of the administrative costs of the PTO.

Comment: The Assistant Commissioner for Trademarks has stated that the actual cost of examining a new trademark application is approximately \$225, yet the proposed fee is \$250. This could generate a substantial trademark operating surplus which eventually could help underwrite patent operations.

Response: The fee for filing a trademark application has been set at \$200. This amount is consistent with the original trademark fee schedule that was recommended by Congress, in conjunction with the trademark user community, to keep the filing fee low and raise certain other fees to recover the costs of the Office.

Comment: The proposed increase in the trademark application filing fee without a corresponding change in Office needs, activities or costs could create a disincentive to Federal registration.

Response: There has been a change in Office needs, activities and costs which justifies the fee increase to \$200. As a result of implementation of the Trademark Law Revision Act of 1988, the Office has hired a substantial number of new examining attorneys and other personnel and relocated to new, more appropriate office space. Further, the Office will incur costs connected with the replacement of its current automated search system.

Comment: One respondent questioned PTO's statement in the notice of proposed rulemaking that small entities have the option of not registering their marks under the Federal system, but can choose to use their marks under common law. Deterring applicants from using the Federal registration system will have two

additional undesirable consequences. Since fewer trademark owners will apply for registration, the projected revenues may be reduced, thus impairing operations. Second, with declining use of the Federal system, proportionately more trademarks will not be readily available for searching purposes. Potential trademark owners will face higher risks in adopting and using new marks.

Response: The proposal has been modified to adopt a fee of \$200 for filing a trademark application. The referenced statement was made in the section of the proposed rulemaking that addressed the potential impact of the proposed fees on small business. While the PTO does not want to discourage small entities from filing Federal trademark applications, and does not believe that the proposed fee increase will have that effect, the fact remains that trademark rights in the United States are based on actual use of the mark, not on Federal registration. The PTO is cognizant of, and sympathetic to, the concerns expressed in the comment.

Comment: Proposed trademark fees for filing a petition to cancel or a notice of opposition impose an unfair and burdensome penalty on businesses and individuals who wish to protect their rights. Although the base fee of \$400 may cover PTO's costs for handling the proceedings, the corresponding fee of \$400 for each additional class is not reasonable.

Response: The PTO has amended its proposed rule to indicate the fee for filing a petition to cancel or a notice of opposition will remain at \$200 and the charge will still be per class.

Comment: The current practice of charging separate fees for each "opposer" or "petitioner" should be discontinued since it is only one proceeding in the eyes of the PTO with an essential requirement that the opposing/petitioning parties have a unitary interest in the opposition/cancellation proceeding.

Response: This comment is directed at 37 CFR 2.101 and 2.111 which are not the subject of this rulemaking. The PTO will consider this comment the next time it proposes amendments to the Trademark Rules of Practice.

Comment: The proposed increase in the section 8 and 15 affidavit fees could force registrants out of the Federal system. Since section 8 and the section 15 affidavits can be filed on the same document, the fee for a combined affidavit should be less than the fees for filing the documents separately, thereby more closely relating to the cost of processing.

Response: The proposed adjustment to section 8 and 15 affidavit fees have not been adopted. Further, it has been a longstanding policy for the PTO to set the fee for a combined section 8 and 15 affidavit at double the fee for either a section 8 affidavit or a section 15 affidavit alone.

Comment: The proposed \$200 fee for filing a late renewal is an excessive penalty. The resulting \$500 cost of late renewal (\$300 renewal fee plus \$200 penalty) could cause the abandonment of registrations for marks still in use to the detriment of the registration system.

Response: In response to public comments, the fee for filing a late renewal application remains at \$100.

Comment: The proposed fee for obtaining a copy of a trademark file wrapper seems unjustified.

Response: The adopted fee amount of \$50 takes into consideration the costs incurred prior to actually copying a file, such as equipment, supplies and staff time necessary to locate and retrieve a file, as well as the copy charge and cost of certification.

Comment: One respondent asked why the PTO is proposing to change the way certification services are provided.

Response: PTO had proposed the change in the present "compare and certify" procedure in order to increase internal controls over services being provided to customers, and thereby enhance the quality of the product ultimately delivered to the customer. PTO is concerned that it have full responsibility for all phases of

the processing of certified copies. Although it is quicker and less expensive for the PTO to copy the documents and certify them than to properly compare each document to the original and then certify them, in response to public comments, particularly from patent and trademark services firms, the Office will continue to compare and certify copies made from Office records, but not prepared by PTO staff.

Comment: The proposed rule makes no provision for expedited services for copies of patent or trademark file wrappers and contents.

Response: The PTO cannot guarantee that the file will be located within the shortened period of time required for expedited service.

Comment: There does not appear to be a fee listed for a certified copy of an assignment deed, expedited or otherwise. Will this service be provided?

Response: This service will be provided under 37 CFR 1.19(b)(4). The wording of this rule has been changed to read, "For assignment records, abstract of title and certification, per patent" and covers the provision of certified and uncertified copies of assignment documents as well as certified or uncertified copies of abstracts of title. 37 CFR 2.6(b)(7) also has been changed to clarify the services provided.

Comment: Respondents questioned the basis for the proposed \$40 per hour fee for labor. One respondent asked if the \$40 per hour fee would apply while a file was being located, say, over a week's time?

Response: The purpose of this fee, which has been adopted at \$30, is to set a flat amount for special labor services for which there is no specific fee for the service the customer has requested. This flat labor fee is to complement 37 CFR 1.21(k) which reads "For items and services that the Commissioner finds may be supplied, for which fees are not specified by statute or by this part, such charges as may be determined by the Commissioner with respect to each such item or service."

Comment: Several respondents opposed the proposed reduction from 60 to 30 days for the period of time between publication of a final rule and the effective date.

Response: Subsection 5(c)(1) of H.R. 3531 establishes the requirement that the PTO must publish a final notice in the *Federal Register* and the Patent and Trademark Office *Official Gazette* at least 30 days prior to the effective date of new fee amounts, except for fees set in fiscal year 1992, which go into effect the day after they are published in the *Federal Register*.

Comment: For future publication of proposed rule changes, PTO should return to the previous format of brackets and arrows which explicitly identify language that is added to, or deleted from, the text of a rule.

Response: The PTO followed the accepted procedures of the Office of the Federal Register. In the future, PTO will follow the procedures which, in PTO's judgment, best serve to communicate the proposed changes.

Comment: With the proposed revision to the fee for purchase of coupons, will it still be possible to use the old coupons to purchase copies of patents and trademarks?

Response: Coupons purchased prior to the fee increase and new coupon issuance will continue to be accepted as a means to acquire copies of patents or trademarks. However, the redeemable value of the old coupon issue will be only \$1.50. Therefore, for each copy requested, two old coupons or one old coupon plus a \$1.50 check or money order must be tendered. Although cash payment is acceptable, checks or money orders are recommended.

Other Considerations: The rule change is in conformity with the requirements of the Regulatory Flexibility Act (Pub. L. 96-354); Executive Orders 12291 and 12612; and the Paperwork Reduc-

tion Act of 1980, 44 U.S.C. 3501, et seq. There are no information collection requirements relating to patent and trademark fee rules.

The PTO has determined that this notice has no Federalism implications affecting the relationship between the National Government and the States as outlined in Executive Order 12612.

The General Counsel of the Department of Commerce has certified to the Chief Counsel for Advocacy, Small Business Administration, that the rule change would not have a significant adverse impact on a substantial number of small entities (Regulatory Flexibility Act, Pub. L. 96-354). The principal impact of the major patent fees has already been taken into account in H.R. 3531, which provides small entities with a 50 percent reduction in the major patent fees. Further, the rule change implements the fee amounts set by sections 2(b) and 5(a)(1) of H.R. 3531.

The PTO has determined that this rule change is not a major rule under Executive Order 12291. The annual effect on the economy would be less than \$100 million. There would be no major increase in costs or prices for consumers; individual industries; Federal, state, or local government agencies; or geographic regions. There would be no significant adverse effects on competition, employment, investment, productivity, or innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

List of Subjects in 37 CFR

37 CFR Part 1

Administrative practice and procedure, Courts, Freedom of information, Inventions and patents, Reporting and recordkeeping requirements, Small businesses.

37 CFR Part 2

Administrative practice and procedure, Courts, Lawyers, Trademarks.

For the reasons set forth in the preamble, the PTO is amending title 37 of the Code of Federal Regulations, Chapter I, as set forth below.

Part 1-Rules of Practice in Patent Cases

1. The authority citation for 37 CFR Part 1 would continue to read as follows:

Authority: 35 U.S.C. 6, unless otherwise noted.

2. Section 1.12 is amended by revising paragraphs (a) and (d) to read as follows:

§ 1.12 Assignment records open to public inspection.

(a) The assignment records, relating to original or reissue patents, including digests and indexes, and assignment records relating to pending or abandoned trademark applications and to trademark registrations, are open to public inspection, and copies of any instrument recorded may be obtained upon request and payment of the fee set forth in section 1.19(b)(3) and section 2.6(b)(5) of this chapter.

* * * * *

(d) An order for a copy of an assignment should give the identification of the record. If identified only by the name of the patentee and number of the patent, or in the case of a trademark registration by the name of the registrant and number of the registration, or by name of the applicant and serial number or international application number of the application, an extra charge as set forth in section 1.21(j) and section 2.6(b)(10) of this chapter will be made for the time consumed in making a search for such assignment.

3. Section 1.13 is amended by revising paragraph (b) to read as follows:

§ 1.13 Copies and certified copies.

(b) Such copies will be authenticated by the seal of the Patent and Trademark Office and certified by the Commissioner, or in his name attested by an officer of the Patent and Trademark Office authorized by the Commissioner, upon payment of the fee for requesting certified copies of Office documents.

4. Section 1.16 is revised to read as follows:

§ 1.16 National application filing fees.

(a) Basic fee for filing each application for an original patent, except design or plant cases:

By a small entity (§1.9(f)) \$345.00
By other than a small entity \$690.00

(b) In addition to the basic filing fee in a original application, for filing or later presentation of each independent claim in excess of 3:

By a small entity (§ 1.9(f)) \$36.00
By other than a small entity \$72.00

(c) In addition to the basic filing fee in an original application, for filing or later presentation of each claim (whether independent or dependent) in excess of 20. (Note that § 1.75(c) indicates how multiple dependent claims are considered for fee calculation purposes):

By a small entity (§ 1.9(f)) \$10.00
By other than a small entity \$20.00

(d) In addition to the basic filing fee in an original application, if the application contains, or is amended to contain, a multiple dependent claim(s) per application:

By a small entity (§ 1.9(f)) \$110.00
By other than a small entity \$220.00

(If the additional fees required by paragraphs (b), (c), and (d) of this section are not paid on filing or on later presentation of the claims for which the additional fees are due, they must be paid or the claims canceled by amendment prior to the expiration of the time period set for response by the Office, in any notice of fee deficiency.)

(e) Surcharge for filing the basic filing fee or oath or declaration on a date later than the filing date of the application:

By a small entity (§ 1.9(f)) \$65.00
By other than a small entity \$130.00

(f) For filing each design application:

By a small entity (§1.9(f)) \$140.00
By other than a small entity \$280.00

(g) Basic fee for filing each plant application:
By a small entity (§ 1.9(f)) \$230.00
By other than a small entity \$460.00

(h) Basic fee for filing each reissue application:

By a small entity (§ 1.9(f)) \$345.00
By other than a small entity \$690.00

(i) In addition to the basic filing fee in a reissue application, for filing or later presentation of each independent claim which is in excess of the number of independent claims in the original patent:

By a small entity (§ 1.9(f)) \$36.00
By other than a small entity \$72.00

(j) In addition to the basic filing fee in a reissue application, for filing or later presentation of each claim (whether independent or

dependent) in excess of 20 and also in excess of the number of claims in the original patent.

(Note that § 1.75(c) indicates how multiple dependent claims are considered for fee calculation purposes):

By a small entity (§ 1.9(f)) \$10.00
By other than a small entity \$20.00

(Note: See § 1.445, 1.482 and 1.492 for international application filing and processing fees.)

5. Section 1.17 is revised to read as follows:

§ 1.17 Patent application processing fees.

(a) Extension fee for response within first month pursuant to § 1.136(a):

By a small entity (§ 1.9(f)) \$55.00
By other than a small entity \$110.00

(b) Extension fee for response within second month pursuant to § 1.136(a):

By a small entity (§ 1.9(f)) \$175.00
By other than a small entity \$350.00

(c) Extension fee for response within third month pursuant to § 1.136(a):

By a small entity (§ 1.9(f)) \$405.00
By other than a small entity \$810.00

(d) Extension fee for response within fourth month pursuant to § 1.136(a):

By a small entity (§ 1.9(f)) \$640.00
By other than a small entity \$1,280.00

(e) For filing a notice of appeal from the examiner to the Board of Patent Appeals and Inferences:

By a small entity (§ 1.9(f)) \$130.00
By other than a small entity \$260.00

(f) In addition to the fee for filing a notice of appeal, for filing a brief in support of an appeal:

By a small entity (§ 1.9(f)) \$130.00
By other than a small entity \$260.00

(g) For filing a request for an oral hearing before the Board of Patent Appeals and Interferences in appeal under 35 U.S.C. 134:

By a small entity (§ 1.9(f)) \$110.00
By other than a small entity \$220.00

(h) For filing a petition to the Commissioner under a section of this part listed below which refers to this paragraph \$130.00 122 § 1.47 - for filing by other than all the inventors or a person not the inventor.

§ 1.48 - for correction of inventorship.
§ 1.182 - for decision on questions not specifically provided for.

§ 1.183 - to suspend the rules.
§ 1.295 - for review of refusal to publish a statutory invention registration.

§ 1.377 - for review of decision refusing to accept and record payment of a maintenance fee filed prior to expiration of patent.

§ 1.378(e) - for reconsideration of decision on petition refusing to accept delayed payment of maintenance fee in expired patent.

§ 1.644(e) - for petition in an interference.
§ 1.644(f) - for request for reconsideration of a decision on petition in an interference.

§ 1.666(c) - for late filing of interference settlement agreement.
§§ 5.12, 5.13, & 5.14 - for expedited handling of foreign filing license.

§ 5.15 - for changing the scope of a license.

§ 5.25 - for retroactive license.

(i) (1) For filing a petition to the Commissioner under a section of this part listed below which refers to this paragraph

\$130.00

§1.12 - for access to an assignment record.

§1.14 - for access to an application.

§1.53 - to accord a filing date.

§1.55 - for entry of late priority papers.

§1.60 - to accord a filing date.

§1.62 - to accord a filing date.

§1.103 - to suspend action in application.

§1.177 - for divisional reissues to issue separately.

§1.312 - for amendment after payment of issue fee.

§1.313 - to withdraw an application from issue.

§1.314 - to defer issuance of a patent.

§1.334 - for patent to issue to assignee, assignment recorded late.

§1.666(b) - for access to interference settlement agreement.

(2) For filing a petition to the Commissioner under 1.102 of this part to make application special

\$130.00

(j) For filing a petition to institute a public use proceeding under §1.292

\$1,310.00

(k) For processing an application filed with a specification in a non-English language (§1.52(d))

\$130.00

(l) For filing a petition:

(1) For the revival of an unavoidable abandoned application under 35 U.S.C. sections 111, 133, 364, or 371, or

(2) For delayed payment of the issue fee under 35 U.S.C. 151:

By a small entity (§1.9(f))

\$55.00

By other than a small entity

\$110.00

(m) For filing a petition:

(1) For revival of an unintentionally abandoned application, or

(2) For the unintentionally delayed payment of the fee for issuing a patent:

By a small entity (§1.9(f))

\$565.00

By other than a small entity

\$1,130.00

(n) For requesting publication of a statutory invention registration prior to the mailing of the first examiner's action pursuant to §1.104—\$790.00 reduced by the amount of the application basic filing fee paid

(o) For requesting publication of a statutory invention registration after the mailing of the first examiner's action pursuant to §1.104—\$1,580.00 reduced by the amount of the application basic filing fee paid

6. Section 1.18 is revised to read as follows:

§1.18 Patent issue fees.

(a) Issue fee for issuing each original or reissue patent, except a design or plant patent:

By a small entity (§1.9(f))

\$565.00

By other than a small entity

\$1,130.00

(b) Issue fee for issuing a design patent:

By a small entity (§1.9(f))

\$200.00

By other than a small entity

\$400.00

(c) Issue fee for issuing a plant patent:

By a small entity (§1.9(f))

\$285.00

By other than a small entity

\$570.00

7. Section 1.19 is revised to read as follows:

1.19 Document supply fees.

The Patent and Trademark Office will supply copies of the following documents upon payment of the fees indicated:

(a) Uncertified copies of patents:

(1) Printed copy of a patent, including a design patent, statutory invention registration, or defensive publication document, except patent or statutory invention registration containing color drawing:

(i) Regular service

\$3.00

(ii) Expedited local service

\$6.00

(iii) Expedited service for copy ordered by electronic ordering service and delivered to the customer within two work-days

\$25.00

(2) Printed copy of a plant patent in color

\$12.00

(3) Copy of a utility patent or statutory invention registration containing color drawing (see §1.84(p))

\$24.00

(b) Certified and uncertified copies of Office documents:

(1) Certified or uncertified copy of patent application as filed

(i) Regular service

\$12.00

(ii) Expedited local service

\$24.00

(2) Certified or uncertified copy of patent-related file wrapper and contents

\$150.00

(3) Certified or uncertified copies of Office records, per document except as otherwise provided in this section

\$25.00

(4) For assignment records, abstract of title and certification, per patent

\$20.00

(c) Library service (35 U.S.C. 13): For providing to libraries copies of all patents issued annually, per annum

\$50.00

(d) For list of all United States patents and statutory invention registrations in a subclass

\$3.00

(e) Uncertified statement as to status of the payment of maintenance fees due on a patent or expiration of a patent

\$10.00 573

(f) Uncertified copy of a non-United States patent document, per document

\$12.00

(g) To compare and certify copies made from Patent and Trademark Office records, but not prepared by the Patent and Trademark Office, per copy of document

\$25.00

(h) Additional filing receipts; duplicate; or corrected due to applicant error

\$20.00

8. Section 1.20 is revised to read as follows:

§1.20 Post issuance fees.

(a) For providing a certificate of correction for applicant's mistake (§1.323)

\$70.00

(b) Petition for correction of inventorship in patent (§1.324)

\$130.00

(c) For filing a request for reexamination (1.510(a))

\$2,180.00

(d) For filing each statutory disclaimer (1.320):

By a small entity (§1.9(f))

\$55.00

By other than a small entity

\$110.00

(e) For maintaining an original or reissue patent, except a design or plant patent, based on an application filed on or after December 12, 1980, in force beyond four years; the fee is due by three years and six months after the original grant

By a small entity (§1.9(f))

\$450.00

By other than a small entity

\$900.00

(f) For maintaining an original or reissue patent, except a design or plant patent, based on an application filed on or after December 12, 1980, in force beyond eight years; the fee is due by seven years and six months after the original grant

By a small entity (\$1.9(f)) \$905.00
By other than a small entity \$1,810.00

(g) For maintaining an original or reissue patent, except a design or plant patent, based on an application filed on or after December 12, 1980, in force beyond twelve years; the fee is due by eleven years and six months after the original grant

By a small entity (\$1.9(f)) \$1,365.00
By other than a small entity \$2,730.00

(h) Surcharge for paying a maintenance fee during the six-month grace period following the expiration of three years and six months, seven years and six months, and eleven years and six months after the date of the original grant of a patent based on an application filed on or after December 12, 1980

By a small entity (\$1.9(f)) \$65.00
By other than a small entity \$130.00

(i) Surcharge for acceptance a maintenance fee after expiration of a patent for non-timely payment of a maintenance fee where the delay in payment is shown to the satisfaction of the Commissioner to have been unavoidable \$600.00

(j) For filing an application for extension of the term of a patent (\$1.740) \$1,000.00

9. Section 1.21 is revised to read as follows:

§1.21 Miscellaneous fees and charges.

The Patent and Trademark Office has established the following fees for the services indicated:

(a) Registration of attorneys and agents:

(1) For admission to examination for registration to practice, fee payable upon application \$290.00

(2) On registration to practice \$100.00

(3) For reinstatement to practice \$15.00

(4) For certificate of good standing as an attorney or agent \$10.00
Suitable for framing \$20.00

(5) For review of a decision of the Director of Enrollment and Discipline under §10.2(c) \$120.00

(6) For requesting regrading of an examination under §10.7(c) \$120.00

(b) Deposit accounts:

(1) For establishing a deposit account .. \$10.00

(2) Service charge for each month when the balance at the end of the month is below \$1,000 \$20.00

(3) Service charge for each month when the balance at the end of the month is below \$300 for restricted subscription deposit accounts used exclusively for subscription order of patent copies as issued \$ 20.00

(c) Disclosure document: For filing a disclosure document \$10.00

(d) Delivery box: Local delivery box rental, per annum \$50.00

(e) International type search reports: For preparing an international type search report of an international type search made at the time of the first action on the merits in a national patent application \$35.00

(f) [Reserved]

(g) Self-service copy charge, per page ... \$0.25

(h) For recording each assignment, agreement or other paper relating to the property in a patent or application, per property \$40.00

(i) Publication in Official Gazette: For publication in the Official Gazette of a notice of the availability of an application or a patent for licensing or sale, each application or patent \$20.00

(j) Labor charges for services, per hour or fraction thereof \$30.00

(k) For items and services that the Commissioner finds may be supplied, for which fees are not specified by statute or by this part, such charges as may be determined by the Commissioner with respect to each such item or service Actual Cost

(l) For processing and retaining any application abandoned pursuant to section 1.53(d) unless the required basic filing fee has been paid \$130.00

(m) For processing each check returned "unpaid" by a bank \$50.00

(n) For handling an incomplete or improper application under §1.53(c), \$1.60 or \$1.62 \$130.00

(o) Marginal cost, paid in advance, for each hour of terminal serion time, including print time, using Automated Patent System full-text search capabilities, prorated for the actual time used. The Commissioner may waive the payment by an individual for access to the Automated Patent System full-text search capability (APS-Text) upon a showing of need or hardship, and if such waiver is in the public interest \$40.00

10. Section 1.24 is revised to read as follows:

§1.24 Coupons.

Coupons in denominations of three dollars, for the purchase of patents, designs, defensive publications, statutory invention registrations, and trademark registrations are sold by the Patent and Trademark Office for the convenience of the general public; these coupons may not be used for any other purpose. The three-dollar coupons are sold individually and in books of 50 for \$150.00. These coupons are good until used; they may be transferred but cannot be redeemed

11. Section 1.26 is amended by revising paragraph (c) to read as follows:

§1.26 Refunds.

* * * * *

(c) If the Commissioner decides not to institute a reexamination proceeding, a refund of \$1,635 will be made to the requester of the proceeding. Reexamination requesters should indicate whether any refund should be made by check or by credit to a deposit account.

12. Section 1.171 is revised to read as follows:

§1.171 Application for reissue.

An application for reissue must contain the same parts required for an application for an original patent, complying with all the rules relating thereto except as otherwise provided, and, in addition, must comply with the requirements of the rules relating to reissue applications. The application must be accompanied by a certified copy of an abstract of title or an order for a title report accompanied by the fee set forth in 1.19(b)(4) to be placed in the file, and by an offer to surrender to original patent (1.178).

13. Section 1.296 is revised to read as follows:

§1.296 Withdrawal of request for publication of statutory invention registration.

A request for a statutory invention registration, which has been filed, may be withdrawn prior to the date of the notice of the intent to publish a statutory invention registration issue pursuant to §1.294(c) by filing a request to withdraw the request for publication of a statutory invention registration. The request to withdraw may also include a request for a refund of any amount paid in excess of the application filing fee and a handling fee of \$130.00 which will be retained. Any request to withdraw the request for publication of a statutory invention registration filed on or after the date of the notice of intent to publish issued pursuant to §1.294(c) must be in the form of a petition pursuant to §1.183 accompanied by the fee set forth in 1.17(h).

14. Section 1.62 is amended by revising paragraphs (a), (b) and (e) to read as follows:

§1.362 Time for payment of maintenance fees.

(a) Maintenance fees as set forth in §1.20(e) through (g) are required to be paid in all patents based on applications filed on or after December 12, 1980, except as noted in paragraph (b) of this section, to maintain a patent in force beyond 4, 8 and 12 years after the date of grant.

(b) Maintenance fees are not required for any plant patents or for any design patents. Maintenance fees are not required for a reissue patent if the patent being reissued did not require maintenance fees.

(e) Maintenance fees may be paid with the surcharge set forth in 1.20(h) during the respective grace periods after:

(1) 3 years through 3 years and 6 months after grant for the first maintenance fee,

(2) 7 years through 7 years and 6 months after grant for the second maintenance fee, and

(3) 11 years and 11 years and 6 months after grant for the third maintenance fee.

15. Section 1.378 is amended by revising paragraphs (a), (b), (c)(1) and (2), and (e) to read as follows:

§1.378 Acceptance of delayed payment of maintenance fee in expired patent to reinstate patent.

(a) The Commissioner may accept the payment of any maintenance fee due on a patent after expiration of the patent if, upon petition, the delay in payment of the maintenance fee is shown to the satisfaction of the Commissioner to have been unavoidable and if the surcharge required by 1.20(i) is paid as a condition of accepting payment of the maintenance fee. If the Commissioner accepts payment of the maintenance fee upon petition, the patent shall be considered as not have expired, but will be subject to the conditions set forth in 35 U.S.C. 41(c)(2).

(b) Any petition to accept the delayed payment of a maintenance fee filed under paragraph (a) of this section within six months of the expiration of the patent must include:

(1) The required maintenance fee set forth in 1.20(e)-(g);

(2) The surcharge set forth in 1.20(i); and

(3) A showing that the delay was unavoidable since reasonable care was taken to ensure that the maintenance fee would be paid timely. The showing must enumerate the steps taken to ensure timely payment of the maintenance fee.

(c) Any petition to accept the delayed payment of a maintenance fee filed under paragraph (a) of this section more than six months after the expiration of the patent must include:

(1) The required maintenance fee set forth in §1.20(e)-(g),

(2) The surcharge set forth in §1.20(i); and

(e) Reconsideration of a decision refusing to accept a maintenance fee upon petition filed pursuant to paragraph (a) of this

section may be obtained by filing a petition for reconsideration within two months of, or such other time as set in, the decision refusing to accept the delayed payment of the maintenance fee. Any such petition for reconsideration must be accompanied by the petition fee set forth in §1.17(h). After decision on the petition for reconsideration, no further reconsideration or review of the matter will be undertaken by the Commissioner. If the delayed payment of the maintenance fee is not accepted, the maintenance fee and the surcharge set forth in §1.20(i) will be refunded following the decision on the petition for reconsideration, or after the expiration of the time for filing such a petition for reconsideration, if none is filed. The fee set forth in §1.17(h) for filing the petition for reconsideration will not be refunded unless the refusal to accept and record the maintenance fee is determined to result from an error by the Patent and Trademark Office.

16. Section 1.445 is amended by revising paragraph (a) to read as follows:

§1.445 International application filing, processing and search fees.

(a) The following fees and charges for international applications are established by the Commissioner under the authority of 35 U.S.C. 376:

(1) A transmittal fee (see 35 U.S.C. 361(d) and PCT Rule 14) \$190.00

(2) A search fee (see 35 U.S.C. 361(d) and PCT Rule 16) where:

(i) No corresponding prior United States national application with basic filing fee has been filed \$600.00

(ii) A corresponding prior United States national application with basic filing fee has been filed \$400.00

(3) A supplemental search fee when required, per additional invention \$160.00

17. Section 1.482 is amended by revising paragraph (a) to read as follows:

§1.482 International preliminary examination fees.

(a) The following fees and charges for international preliminary examination are established by the Commissioner under the authority of 35 U.S.C. 376:

(1) A preliminary examination fee is due on filing the Demand:

(i) Where an international search fee as set forth in §1.445(a)(2) has been paid on the international application to the United States Patent and Trademark Office as an International Searching Authority, a preliminary examination fee of \$440.00

(ii) Where the International Searching Authority for the international application was an authority other than the United States Patent and Trademark Office, a preliminary examination fee of \$650.00

(2) An additional preliminary examination fee when required, per additional invention:

(i) Where a supplemental search fee as set forth in 1.445(a)(3) has been paid on the international application to the United States Patent and Trademark Office as an International Searching Authority \$140.00

(ii) Where the International Searching Authority for the international application was an authority other than the United States Patent and Trademark Office \$220.00

18. Section 1.492 is revised to read as follows:

§1.492 National state fees.

The following fees and charges for international applications entering the national stage under 35 U.S.C. 371 are established by the Commissioner under 35 U.S.C. 376:

(a) The basic national fee:

(1) Where an international preliminary examination fee as set forth in 1.482 has been paid on the international application to the United States Patent and Trademark Office:

By a small entity (\$1.9(f)) \$310.00
By other than a small entity \$620.00

(2) Where no international preliminary examination fee as set forth in §1.482 has been paid to the United States Patent and Trademark Office, but an international search fee as set forth in §1.445(a)(2) has been paid on the international application to the United States Patent and Trademark Office as an International Searching Authority:

By a small entity (\$1.9(f)) \$345.00
By other than a small entity \$690.00

(3) Where no international preliminary examination fee as set forth in §1.482 has been paid and no international search fee as set forth in §1.445(a)(2) has been paid on the international application to the United States Patent and Trademark Office:

By a small entity (\$1.9(f)) \$460.00
By other than a small entity \$920.00

(4) Where the international preliminary examination fee as set forth in §1.482 has been paid to the United States Patent and Trademark Office and the international preliminary examination report states that the criteria of novelty, inventive step (non-obviousness), and industrial applicability, as defined in PCT Article 33 (1) to (4) have been satisfied for all the claims presented in the application entering the national stage (see §1.496(b)):

By a small entity (\$1.9(f)) \$45.00
By other than a small entity \$90.00

(5) Where a search report on the international application has been prepared by the European Patent Office or the Japanese Patent Office:

By a small entity (\$1.9(f)) \$400.00
By other than a small entity \$800.00

(b) In addition to the basic national fee, for filing or later presentation of each independent claim in excess of 3:

By a small entity (\$1.9(f)) \$36.00
By other than a small entity \$72.00

(c) In addition to the basic national fee, for filing or later presentation of each claim (whether independent or dependent) in excess of 20 (Note that §1.75(c) indicates how multiple dependent claims are considered for fee calculation purposes.):

By a small entity (\$1.9(f)) \$10.00
By other than a small entity \$20.00

(d) In addition to the basic national fee, if the application contains, or is amended to contain, a multiple dependent claim(s), per application:

By a small entity (\$1.9(f)) \$110.00
By other than a small entity \$220.00

(If the additional fees required by paragraphs (b), (c), and (d) are not paid on presentation of the claims for which the additional fees are due, they must be paid or the claims cancelled by amendment prior to the expiration of the time period set for response by the Office in any notice of fee deficiency.)

(e) Surcharge for filing the basic national fee or oath or declaration later than 20 months from the priority date pursuant to §1.494(c) or later than 30 months from the priority date pursuant to §1.495(c):

By a small entity (\$1.9(f)) \$65.00
By other than a small entity \$130.00

(f) For filing an English translation of an international application later than 20 months after the priority date (§1.494(c)) or filing an English translation of the international application or of any annexes to the international preliminary examination report later than 30 months after the priority date (§1.495(c) and (e)) \$130.00

19. Section 1.740 is amended by revising paragraph (a)(14) to read as follows:

§1.740 Application for extension of patent term.

(a) * * * * *

(14) The prescribed fee for receiving and acting upon the application for extension (see §1.20(j)).

* * * * *

20. Section 1.770 is revised to read as follows:

§1.770 Express withdrawal of application for extension of patent term.

An application for extension of patent term may be expressly withdrawn before a determination is made pursuant to 1.750 by filing in the Office, in duplicate, a written declaration of withdrawal signed by the owner of record of the patent or its agent. An application may not be expressly withdrawn after the date permitted for response to the final determination on the application. An express withdrawal pursuant to this section is effective when acknowledged in writing by the Office. The filing of an express withdrawal pursuant to this section and its acceptance by the Office does not entitle applicant to a refund of the filing fee (§1.20(j)) or any portion thereof.

Part 2 - Rules of Practice in Trademark Cases

1. The authority citation for Part 2 continues to read as follows:

Authority: 15 U.S.C. 1123; 35 U.S.C. 6, unless otherwise noted.

2. Section 2.6 is revised to read as follows:

§2.6 Trademark fees.

The following fees and charges are established by the Patent and Trademark Office for trademark cases:

(a) Trademark process fees.

(1) For filing an application, per class \$200.00

(2) For filing an amendment to allege use under section 1(c) of the Act, per class \$100.00

(3) For filing a statement of use under section 1(d)(1) of the Act, per class \$100.00

(4) For filing a request under section 1(d)(2) of the Act for a six-month extension of time for filing a statement of use under section 1(d)(1) of the Act, per class \$100.00

(5) For filing an application for renewal of a registration, per class \$300.00

(6) Additional fee for filing a renewal application made within three months after the expiration of the registration, per class \$100.00

(7) For filing to publish a mark under section 12(c), per class \$100.00

(8) For issuing a new certification of registration upon request of assignee \$100.00

(9) For a certificate of correction of registrant's error \$100.00

- (10) For filing a disclaimer to a registration \$100.00
- (11) For filing an amendment to a registration \$100.00
- (12) For filing an affidavit under §8 of the Act, per class \$100.00
- (13) For filing an affidavit under §15 of the Act, per class \$100.00
- (14) For filing a combined affidavit under §§ 8 and 15 of the Act, per class \$200.00
- (15) For petitions to the Commissioner.. \$100.00
- (16) For filing a petition to cancel, per class \$200.00
- (17) For filing a notice of opposition, per class ... \$200.00
- (18) For ex parte appeal to the Trademark Trial and Appeal Board, per class \$100.00
- (b) Trademark service fees.
- (1) For printed copy of registered mark, copy only
- (i) Regular service \$3.00
- (ii) Expedited local service \$6.00
- (iii) Expedited service for copy ordered by electronic ordering service and delivered to the customer within two work days \$25.00
- (2) Certified or uncertified copy of trademark application as filed:
- (i) Regular service \$12.00
- (ii) Expedited local service \$24.00
- (3) Certified or uncertified copy of a trademark-related file wrapper and contents \$50.00
- (4) Certified copy of a registered mark, showing title and/or status:
- (i) Regular service \$10.00
- (ii) Expedited local service \$20.00
- (5) Certified or uncertified copy of trademark records, per document except as otherwise provided in this section \$25.00
- (6) For recording each trademark assignment, agreement or other paper relating to the property in a registration or application
- (i) First property in a document \$40.00
- (ii) For each additional property in the same document \$25.00

(7) For assignment records, abstract of title and certification, per registration \$20.00

(8) Marginal cost, paid in advance, for each hour of terminal session time, including print time, using T-Search capabilities, prorated for the actual time used. The Commissioner may waive the payment by an individual for access to T-Search upon a showing of need or hardship, and if such waiver is in the public interest \$40.00

(9) Self-service copy charge, per page ... \$0.25

(10) Labor charge for services, per hour or fraction thereof \$30.00

(11) For items and services that the Commissioner finds may be supplied, for which fees are not specified by statute or by this part, such charges as may be determined by the Commissioner with respect to each such item or service Actual Cost

Dec. 10, 1991

Harry F. Manbeck, Jr.
*Assistant Secretary and Commissioner
of Patents and Trademarks*

NOTE - The following appendix will not appear in the Code of Federal Regulations

APPENDIX A Patent Cooperation Treaty Update

The International Bureau of the World Intellectual Property Organization has informed the U.S. Patent and Trademark Office that, due to a decision of the Assembly of the PCT Union taken during its meeting from 23 September 1991 to 02 October 1991, the amount of the international fees for international applications will increase, effective 01 January 1992.

Effective 01 January 1992, the amount of the international fees for international applications filed in the United States Receiving Office will be:

Basic fee (first 30 pages)	\$525.00
Basic Supplemental fee (for each page over 30).....	\$10.00
Designation fee (per country or region up to 10) ...	\$127.00
Handling fee	\$161.00

The fees charged by the U.S. Patent and Trademark Office, including PCT fees other than those listed above, are adjusted on December 16, 1991 except for fees set under 37 CFR 1.445(a) and 1.482(a) which will be effective on December 27, 1991. (Refer to Appendix B for specific effective dates).

Patent Cooperation Treaty (PCT) Information

For information concerning PCT member countries, see the notice appearing in the *Official Gazette* at 1126 O.G. 2, on May 7, 1991.

For use of the European Patent Office as an International Searching Authority for international applications filed in the United States Receiving Office, see the notice appearing in the *Official Gazette* at 1022 O.G. 52, on Sept. 28, 1982.

For use of the European Patent Office as an International Preliminary Examining Authority for international applications filed in the United States Receiving Office, see the notices appearing in the *Official Gazette* at 1080 O.G. 2, on July 7, 1987, and at 1091 O.G. 2, on June 7, 1988. There is no longer a limit on the number of such international applications accepted for international preliminary examination by the European Patent Office; see the notice appearing at 1116 O.G. 32, on July 17, 1990.

The search fee of the European Patent Office was changed on July 1, 1991, due to a difference in the exchange rate of the U.S. dollar in relation to the German mark, and was announced in the *Official Gazette* at 1126 O.G. 76, on May 28, 1991.

International fees will be changed on Jan. 1, 1992, due to a decision of the Assembly of the PCT Union taken during its meeting from 23 September 1991 to 02 October 1991, as described below under "International fees."

Certain domestic PCT fees and charges for International Search and Preliminary Examination have been changed effective [insert one day after publication in the Federal Register], as described below under "U.S. National Stage fees."

The current schedule of PCT fees (in U.S. dollars) is as follows:

	Effective Date	
Transmittal fee	\$190.00	*
Search Fee		
U.S. Patent and Trademark Office (USPTO) as International Searching Authority (ISA) - No corresponding prior U.S. national application filed	\$600.00	12/27/91
- Corresponding prior U.S. national application filed	\$400.00	12/27/91
- Supplemental search fee, per additional invention	\$160.00	12/27/91
- European Patent Office as ISA	\$1320.00	8/1/91
Preliminary examination fee		
USPTO as International Preliminary Examining Authority (IPEA)		

- Search fee paid to USPTO as ISA	\$440.00	12/27/91
- Additional examination fee, per additional invention	\$140.00	12/27/91
- ISA not the USPTO	\$650.00	12/27/91
- Additional examination fee, per additional invention	\$220.00	12/27/91
International fees		
Basic fee	\$525.00	1/1/92
Basic Supplemental fee (for each page over 30)	\$10.00	1/1/92
Designation fee per country or region for the first 10 national or regional offices ..	\$127.00	1/1/92
Designation fee for the 11th and subsequent designations	No Charge	1/1/92
Handling fee	\$161.00	1/1/92

U.S. national Stage fees	Small Entity	Regular	Effective Date
USPTO was IPEA	\$310.00	\$620.00	*
USPTO was ISA but not IPEA	\$345.00	\$690.00	*
USPTO was neither ISA nor IPEA	\$460.00	\$920.00	*
USPTO was IPEA and all claims presented satisfied provisions of PCT Article 33(2) to (4)	\$45.00	\$90.00	*
- For each independent claim in excess of 3	\$36.00	\$72.00	*
- For each claim in excess of 20 ..	\$10.00	\$20.00	*
- For each application containing a multiple dependent claim ...	\$110.00	\$220.00	*
- Surcharge for filing national fee or oath or declaration after the time limit applicable under PCT Article 22 or 39(1)	\$65.00	\$130.00	*
- Processing fee for filing English translation after the time limit applicable under PCT Article 22 or 39(1)	\$130.00	\$130.00	*
- For filing with EPO/JPO search report	\$400.00	\$800.00	*

*The effective date is December 16, 1991.

Comparison of Existing and Final Fee Amounts

37 CFR Section			FEE AMOUNT		
Final	Existing	DESCRIPTION	Apr. 17 1989	Nov. 5 1990	December 1991
1.16(a)	1.16(a)	Basic Filing Fee	\$370	\$630	\$690
1.16(a)	1.16(a)	Basic Filing Fee (Small Entity)	\$185	\$315	\$345

[Docket No. 920401-2194]
RIN 0651-AA54

Revision of Patent and Trademark Fees

Agency: Patent and Trademark Office, Commerce
Action: Final Rule.

Summary: The Patent and Trademark Office (PTO) is amending the rules of practice in patent and trademark cases, Parts 1 and 2 of title 37, Code of Federal Regulations, to adjust certain patent and trademark fee amounts to reflect fluctuations in the Consumer Price Index (CPI) and to recover costs of operation. The PTO is also establishing fees for providing public access to APS-Text in Patent and Trademark Depository Libraries (PTDLs), and for dividing a trademark application. In response to comments received from the Libraries in which they expressed their concerns about the administrative burdens of collecting fees from the public for use of APS-Test, the Commissioner is immediately suspending collection of that fee to provide additional time for the PTO to solicit input from the private sector on alternative collection methods, and other options for accessing patent search and retrieval in the Libraries.

Dates: Effective Date: October 1, 1992. Rule 1.21(p) will take effect on October 1, 1992 but will immediately be suspended by the Commissioner.

Comment Date: The PTO will accept comments on alternative collection methods, and other options for accessing patent search and retrieval in the PTDLs (37 CFR 1.21(p)) until January 4, 1993. The Office will provide written notice in the Federal Register and the Official Gazette of the United States Patent and Trademark Office thirty days before starting to collect fees for accessing APS-Text in the PTDLs.

Addresses: Address written comments to the Commissioner of Patents and Trademarks, Washington, D.C. 20231, Attention: Frances Michalkewicz, Suite 507, Crystal Park 1, or by FAX to (703) 305-8436.

For Further Information Contact: Frances Michalkewicz by telephone at (703) 305-8510 or by mail marked to her attention and addressed to the Commissioner of Patents and Trademarks, Washington, D.C. 20231.

Supplementary Information: This rule change is designed to adjust the Patent and Trademark Office fees in accordance with the applicable provisions of title 35, United States Code, section 31 of the Trademark (Lanham) Act of 1946 (15 U.S.C. 1113), and section 10101 of the Omnibus Budget Reconciliation Act of 1990 (Public Law 101-508), all as amended by the Patent and Trademark Office Authorization Act of 1991 (Public Law 102-204).

Background:

Statutory Provisions: Patent fees are authorized by 35 U.S.C. 41 and 35 U.S.C. 376. A 50 percent reduction in the fees paid under 35 U.S.C. 41(a) and 41(b) by independent inventors, small business concerns, and nonprofit organizations who meet prescribed definitions is authorized by 35 U.S.C. 41(h).

Subsection 41(f) of title 35, United States Code, provides that fees established under 35 U.S.C. 41(a) and (b) may be adjusted on October 1, 1992, and every year thereafter, to reflect fluctuations in the Consumer Price Index (CPI) over the previous 12 months.

Section 10101 of the Omnibus Budget Reconciliation Act of 1990 (Pub. L. 101-508) provides that there shall be a surcharge on all fees established under 35 U.S.C. 41(a) and 41(b) to collect \$99 million in fiscal year 1993.

Subsection 41(d) of title 35, United States Code, authorizes the Commissioner to establish fees for all other processing, services, or materials related to patents to recover the average cost of providing these services or materials, except for the fees for recording a document affecting title, for each photocopy, and for each black and white copy of a patent.

Section 376 of title 35, United States Code, authorizes the Commissioner to set fees for patent applications filed under the Patent Cooperation Treaty.

Subsection 41(g) of title 35, United States Code, provides that new fee amounts established by the Commissioner under section 41 may take effect thirty days after notice in the Federal Register and the Official Gazette of the Patent and Trademark Office.

Subsection 41(i)(3) of title 35, United States Code, authorizes the Commissioner to establish reasonable fees for access to automated search systems of the PTO.

Section 31 of the Trademark (Lanham) Act of 1946, as amended (15 U.S.C. 1113), authorizes the Commissioner to establish fees for the filing and processing of an application for the registration of a trademark or other mark, and for all other services and materials furnished by the PTO relating to trademarks and other marks.

Section 31(a) of the Trademark (Lanham) Act of 1946 (15 U.S.C. 1113(a)), as amended, allows trademark fees to be adjusted once each year to reflect, in the aggregate, any fluctuations during the preceding 12 months in the CPI.

Section 31 also allows new fee amounts to take effect thirty days after notice in the Federal Registration and the Official Gazette of the Patent and Trademark Office.

Recovery Level Determination: Fees have been adjusted for a planned recovery of \$486,000,000 in fiscal year 1993, as proposed in the Administration's budget request to the Congress.

Fees established by 35 U.S.C. 41(a) and 41(b) (patent statutory fees) may be adjusted on October 1, 1992, to reflect any fluctuations occurring during the previous 12 months in the CPI. The Office of Management and Budget (OMB) has determined that the PTO should use Consumer Price Index-U to adjust patent statutory fees. The Department of Labor's Consumer Price Index is made public approximately 21 days after the end of the month being calculated. The patent statutory fees are being adjusted by 3.3 percent, which reflects the Administration's projected Consumer Price Index-U for the 12-month period beginning October 1, 1991.

The patent statutory fees established by rule (56 FR 65142) on December 13, 1991, are being adjusted by the projected changes in the CPI of 3.3 percent. Amounts were rounded by applying standard arithmetic rules so that the amounts rounded would be convenient to the user. Fees of \$100 or more were rounded to the nearest \$10. Fees between \$2 and \$99 were rounded to an even number so that the comparable small entity fee would be a whole number.

Patent statutory fees also are subject to the provisions of the Omnibus Budget Reconciliation Act of 1990, as amended by Public Law 102-204. These provisions require that \$99 million be collected in fiscal year 1993 for deficit reduction purposes in lieu of seeking general taxpayer funds from the U.S. Treasury. The \$99 million is deposited in a special account in the U.S. Treasury, and is reserved exclusively for use by the PTO, and is made available to the PTO through the appropriation process.

In establishing the 1993 patent statutory fees, the PTO applied the projected Consumer Price Index-U rate of 3.3 percent to the 1992 fees. The 1993 fees were rounded as explained above. Of the total amount of section 41(a) and (b) income expected to be collected in 1993, \$99 million must be deposited to the Fee Surcharge Fund.

Non-statutory patent service fees established under section 41(d) of title 35, United States Code, as amended, and PCT processing fees are being adjusted to recover planned costs in 1993, except in the case of three patent service fees set by statute. The three fees are assignment recording fees, printed patent copy fees and photocopy charge fees.

Trademark fees are being adjusted in fiscal year 1993, in the aggregate, to reflect changes over the prior 12 months in the CPI. The OMB has determined that the PTO should use Consumer Price Index-U to adjust trademark fees, which is made public by the Department of Labor approximately 21 days after the end of the month being calculated. The trademark fees are being adjusted, in the aggregate, by 3.3 percent, which reflects the Administration's projected Consumer Price Index-U for the 12 month period beginning October 1, 1991.

The PTO is adjusting only two trademark fees in 1993: for filing an application (37 CFR § 2.6(a)(1)) and for assignment records, abstract of title and certification (37 CFR § 2.6(b)(7)). One new fee is being set for dividing an application (37 CFR § 2.6(a)(19)). No other trademark fees are changing in 1993. The net effect of these changes is to increase trademark fees, in the aggregate, by 3.3 percent, the expected Consumer Price Index-U rate for the prior 12 month period.

Workload Projections: Determination of workloads varies by fee. Principal workload projection techniques are as follows:

Patent and trademark application workloads are projected from statistical regression models using recent application filing trends. Patent issues are projected from an inhouse patent production model and reflect examiner production achievements and goals. Patent maintenance fee workloads utilize patents issued 3.5, 7.5 and 11.5 years prior to payment and assume payment rates of 75 percent, 50 percent and 25 percent, respectively. Trademark affidavit projections are based on filing trends for marks registered five to six years prior to 1993. Trademark renewal projections are based on marks registered 20 years prior to 1993. Service fee workloads follow linear trends from prior year activities.

Public Access to Automated Systems: In April 1989, the PTO began providing access to APS-Text in the Patent Search Room at its facilities in Arlington, Virginia. On February 12, 1990, the PTO began charging a fee for access to APS-Text in the Patent Search Room. In September 1991, the PTO began providing, without charge, APS-Text to 14 Patent and Trademark Depository Libraries (PTDLs) as a pilot test program. APS-Text provides users of the patent search files with a value added search tool that enables them to conduct more comprehensive searches.

Although many PTDLs believe that government information should be available to the public free of charge, the PTO's fiscal year 1993 budget does not include any general taxpayer funds, but requires that all of the expenses of the PTO be recovered through user fees. These expenses include the cost of providing APS-Text to the public, both in the Patent Search Room in Virginia and at the PTDLs. Continuation of this service in the PTDLs, without direct charge to the users of the automated system, would require support from all other customers who pay for products and services from the PTO.

A second issue raised by many PTDLs concerns the method that PTO would use to collect fees from the users of APS-Text in the PTDLs. Users of APS-Text in the Patent Search Room pay for use of the system directly to the PTO. PTDLs have commented that collecting fees would be an administrative burden for many, while some are legally precluded from collecting fees.

The PTO has a strong interest in expanding access to APS-Text to all PTDLs that wish to participate, but considers allocating user fees paid for other products and services to subsidize this effort to be inappropriate. Therefore, PTO concludes that establishment of a fees for access to APS-Text is necessary.

At the same time, PTO wants to limit the administrative burden imposed on the PTDLs to collect user fees. Therefore, PTO intends to enter into an agreement establishing a service bureau arrangement for administering the collection of fees at participating PTDLs. This arrangement provides one alternative for providing administrative services, but PTO is seeking others. Therefore, through this rulemaking notice, the PTO is soliciting alternatives from other organizations, including the libraries themselves, for providing the administrative services associated with APS-Text. Likewise, the Office would like to consider other options for accessing patent search and retrieval in the PTDLs. The PTO will accept comments on alternative collection methods, and other options for accessing patent search and retrieval in the PTDLs until January 4, 1993.

In rule 1.21(p), the PTO is establishing a \$70 per connect hour fee to recover the cost of providing APS-Text services in participating PTDLs, but the Commissioner is immediately suspending collection of that fee until alternative methods of collecting the fee from users of APS-Text in the PTDLs are

identified. Although access to the 14 pilot PTDLs will continue for further evaluation purposes, the PTO will not extend access to additional PTDLs until a fee collection arrangement is established. Section 41(i)(3) of 35 U.S.C. states that if PTO establishes fees for access to the automated search system "a limited amount of free access shall be made available to users of the systems for purposes of education and training."

The \$70 per connect hour fee amount established by this rule is based on a calculation of the costs of PTO services, and preliminary cost estimates that were provided by a potential service bureau contractor. The cost elements for PTO include training; training software for personal computers (to be developed); manuals and documentation; additional main-frame CPU; and additional staff time for client support. The cost elements for services provided by the service bureau include billing, account administration, and user support; telecommunication costs to the network; and the Messenger Software enhancement fee.

After PTO has evaluated other options for a service bureau arrangement, a notice will be published in the Federal Registration and the Official Gazette of the Patent and Trademark Office. At that time, PTO will provide administrative procedures for public use of APS-Text in the PTDLs. Depending on responses to the solicitation for alternatives for providing the administrative services associated with APS-Text, the fee amount could be reduced at that time.

General Procedures: Any fee amount that is paid on or after October 1, 1992, would be subject to the new fees then in effect. For purposes of determining the amount of the fee to be paid, the date of mailing indicated on a proper Certificate of Mailing, where authorized under 37 CFR 1.8, will be considered to be the date of receipt in the PTO. A "Certificate of Mailing under Section 1.8" is not "proper" for items which are specifically excluded from the provisions of § 1.8. Section 1.8 should be consulted for those items for which a Certificate of Mailing is not "proper." Such items include, inter alia, the filing of national and international applications for patents and the filing of trademark applications. However, the provisions of 37 CFR 1.10 relating to filing papers and fees with an "Express Mail" certificate do apply to any paper or fee (including patent and trademark applications) to be filed in the PTO. If an application or fee is filed by "Express Mail" with a proper certificate dated on or after the effective date of the rules, as amended, the amount of the fee to be paid would be the fee established by the amended rules.

A comparison of existing and revised fee amounts is included as an Appendix to this final rule.

In order to ensure clarity in the implementation of the revised fees, a discussion of specific sections is set forth below.

DISCUSSION OF SPECIFIC RULES

37 CFR 1.16 National application filing fees.

Section 1.16, paragraphs (a)-(d) and (f)-(j), is revised to adjust patent application filing fees to reflect fluctuations in the CPI.

37 CFR 1.17 Patent application processing fees.

Section 1.17, paragraphs (b)-(g), and (m), is revised to adjust fees established therein to reflect fluctuations in the CPI.

Section 1.17, paragraphs (j), (n) and (o), is revised to adjust fees established therein to recover costs.

37 CFR 1.18 Patent issue fees.

Section 1.18, paragraphs (a)-(c), is revised to adjust the issue fee for each original or reissue patent to reflect fluctuations in the CPI.

37 CFR 1.19 Document supply fees.

Section 1.19, subparagraph (b)(4) and paragraphs (f) and (h), is revised to adjust fees established therein to recover costs.

37 CFR 1.20 Post-issuance fees.

Section 1.20, paragraphs (a), (c) and (i), is revised to adjust fees established therein to recover costs.

Section 1.20, paragraphs (e)-(g), is revised to adjust fees established therein to reflect fluctuations in the CPI.

37 CFR 1.21 Miscellaneous fees and charges.

Section 1.21, subparagraphs (a)(1), (a)(5), (a)(6), (b)(2), (b)(3), and paragraphs (e) and (i), is revised to adjust fees established therein to recover costs.

Section 1.21, paragraph (p), is added to establish the fee for providing public access to the Automated Patent System full-text search (APS-Text) capability in Patent and Trademark Depository Libraries. The \$70.00 per connect hour fee would recover the marginal cost of providing the service to the public, including the cost for a service bureau to handle billing, account administration, and user support.

37 CFR 1.26 Refunds.

Section 1.26, paragraph (a), is revised to increase the minimum amount of a refund, without a request, from one dollar to twenty-five dollars in accordance with the Treasury Fiscal Manual, Volume One, Part Six, Chapter 3000.

Section 1.26, paragraph (c), is revised to provide for a refund of \$1,690 if the Commissioner decides not to institute reexamination proceedings. The \$1,690 refund would apply to those instances where the reexamination fee of \$2,250 under 37 CFR 1.20(c) was paid. The current \$1,635 refund would be made in those cases where the current \$2,180 reexamination fee was paid.

37 CFR 1.445 International application filing, processing, and search fees.

Section 1.445, is revised to adjust the fees authorized by 35 U.S.C. 376 to recover costs.

37 CFR 1.482 International preliminary examination fees.

Section 1.482, subparagraphs (a)(1), and (a)(2)(ii), is revised to adjust the fees authorized by 35 U.S.C. 376 to recover costs.

37 CFR 1.492 National stage fees.

Section 1.492, subparagraphs (a)(1)-(a)(3), and paragraphs (b)-(d), is revised to adjust fees established therein to reflect fluctuations in the CPI.

Section 1.492, subparagraph (a)(5), is revised to adjust the fee authorized by 35 U.S.C. 376 to recover costs.

37 CFR 2.6 Trademark fees.

Section 2.6, subparagraphs (a)(1) and (b)(7), is revised to adjust the fees authorized by the Trademark (Lanham) Act of 1946 to reflect fluctuations in the CPI.

New section 2.6(a)(19), is added to establish a fee for dividing a trademark application in accordance with 37 CFR 2.87. Section 2.6(a)(19) is revised from the proposal by adding the words "file wrapper" to clarify that the fee amount is due for each new file wrapper created.

37 CFR 2.87 Dividing an Application.

Section 2.87, is revised to establish a fee for dividing an application into two or more applications. Currently, no fee is charged for the physical act of dividing an application. Experience to date reveals that the creation of so-called "divisional" applications is labor intensive. For that reason, and because the creation of a divisional application is a significant benefit to an applicant, the PTO will charge a fee for dividing an application. The fee will be due for each new file wrapper created.

Section 2.87, is revised to divide paragraph (a) into paragraphs (a) and (b), and renumber paragraphs (b) and (c) as (c) and (d).

Response to Comments on the Rules: A notice of proposed rulemaking to adjust patent and trademark fees in accordance with the proposed provisions of Public Law 102-204 was published in the Federal Register on May 20, 1992, at 57 FR 21536, and in the Official Gazette on May 26, 1992, at 1138 OG 58. Corrections were published in the Federal Register on June 2, 1992, at 57 FR 23257.

A public hearing was held on June 24, 1992. A total of 28 comments were received: 27 respondents submitted written comments and three people presented oral testimony (two of whom also submitted written comments) at the public hearing. Over half of the comments received represented the views of libraries. All of the written and oral comments were considered in adopting the rules set forth herein.

Comment: Two people claimed that the proposed fees for filing an application under the Patent Cooperation Treaty (PCT) is discriminatory against applicants who file under the PCT route.

Response: The PTO is undertaking a thorough analysis of all PCT fees. The results of this analysis, and the recommendations concerning PTO's fee structure to be made to the Secretary of Commerce by the Advisory Commission on Patent Law Reform, will be taken into consideration when PTO proposes the fiscal year 1994 fee adjustments.

Comment: One respondent, although not objecting to the proposed 3.3 percent fee increase, suggested that the PTO may be understating its projected income from maintenance fees which could be used to offset inflationary increases and possibly reduce PCT fees.

Response: When maintenance fees first were imposed, the Office looked at historical payment trends experienced by other offices, such as the European Patent Office. The PTO conservatively projected the number of maintenance fees to be paid for two reasons. First, there is not a long history of maintenance fee payments on which to base income projections; for example, second stage maintenance fees only recently have started to come due, and third stage maintenance fees will not become due for many patent owners until 1995. Second, the percentage of patent owners paying second stage maintenance fees in recent months has declined from the renewal rate that was experienced during the first year that second stage maintenance fees were paid. Therefore, PTO is properly conservative in its maintenance fee payment projections. We will conduct a comprehensive analysis of projected maintenance fee payments prior to proposing the fiscal year 1994 fee adjustment.

Comment: Eighteen respondents opposed establishment of fees for the public to access APS-Text at the Patent and Trademark Depository Libraries, primarily because the public has a right to free access to patent information. One person asked about administrative procedures for providing APS-Text in the PTDLS, and suggested that CD-ROM products continue to be made available free of charge and access fees for APS-Text be kept as low as possible.

Response: As a fully fee-funded agency, the costs to the PTO of providing access to APS-Text in the 74 Patent and Trademark Depository Libraries (PTDLs) would have to be borne either by the individual users of the system, or by all users of the patent system (e.g., patent applicants). In June 1988, the PTO published in 53 Federal Register 23677 the results of comments solicited on alternatives for funding access to the PTO's automated systems. In response, the PTO received 21 comments, 12 of which advocated the use of taxpayer revenues, and seven supported at least some reliance on user fees. The latter based their decisions on the reality of budget deficit problems; the inequity of providing taxpayer funds to subsidize on-line searchers who charge fees for their services; and the need to have an equitable fee structure that applies throughout the United States.

The PTO has a strong interest in expanding access to APS-Text to all PTDLs that wish to participate, with the least amount of administrative burden to the PTDLs, but considers allocating user fees paid for other products and services to subsidize this effort to be inappropriate. Therefore, the PTO is establishing a fee of \$70 per connect hour for accessing APS-Text in the PTDLs, which includes the cost of having a service bureau provide billing, account administrative, and user support. However, the Commissioner is immediately suspending collection of that fee to provide additional time to solicit comments through this rulemaking for providing the administrative ser-

vices associated with APS-Text. Likewise, the Office would like to consider other options for accessing patent search and retrieval in the PTDs. The Office will publish a notice in the Federal Register and the Official Gazette of the Patent Trademark Office thirty days before it begins collecting a fee for public access to APS-Text in the PTDs.

Comment: One respondent claimed that proposed 37 CFR 1.21(p) is not in accord with the rulemaking provision of 5 U.S.C. 553(b) which requires that the issues involved be described in the notice of proposed rulemaking.

Response: The Notice of Proposed Rulemaking 57 FR 21536, referenced 35 U.S.C. § 41(i)(3) which authorizes the Commissioner to establish reasonable fees for access to automated search systems of the PTO. Further in the notice at 57 FR 21537, under the discussion of the proposed revision to 37 CFR § 1.21, it was stated that the proposed \$40.00 fee would recover the PTO's estimated marginal cost of providing the service to the PTDs. The notice also indicated the PTO was investigating the use of a contract service bureau to provide access in which case the fee would be approximately \$70.00. This fully described the issue involved in the proposed rule change.

Comment: Two respondents commented on the administrative burden caused by a change to the fee structure at this time, particularly in light of prior fee changes and the small amount of the adjustment.

Response: The PTO proposed to adjust its fees because operating costs have increased over the past year. The Commissioner is authorized to adjust patent and trademark fees on October 1, 1992 and every year thereafter to reflect fluctuations in the Consumer Price Index over the prior twelve months. Future charges are expected to occur annually on October 1st. The fee increases that will be implemented on October 1, 1992, are expected to generate \$15.1 million. Without this revenue, PTO would be forced to make cuts in patent and trademark operations that would affect the quality of examination.

Comment: One person expressed concern about the quality and timeliness of services for which new or increased fees are proposed, complaining specifically of the delay in receiving an official filing receipt when a trademark application is divided and in the recording of assignments.

Response: A major objective of the Office is to assure continuous quality improvements throughout all operations. The Office has taken steps to address the areas of concern identified.

Comment: One organization and one person objected to the PTO's sole reliance on fee income, particularly for funding automation development costs.

Response: The Omnibus Budget Reconciliation Act of 1990 requires that a user fee surcharge on certain patent fees replace taxpayer funds for the five year period 1991-1995. Whether PTO should receive funds from other sources in future fiscal years is beyond the scope of the rule package.

The automation programs, which are funded from user fees, are designed to improve the quality and timeliness of PTO services and products, and to discontinue reliance on manual processes and paper references.

Comment: One person said that small entities do not benefit from the 50 percent reduction to certain patent fees, because many small companies, particularly those in high technology areas, must license their patent rights and thus pay large entity status fees.

Response: The purpose of the small entity subsidy is to ensure that individual inventors, small businesses and non-profit organizations are not barred from using the patent system because of the PTO's fee structure. Once a small entity assigns the rights to a patent application or a patent to a large entity, presumably receiving compensation from the large entity, the reduced fee amounts no longer apply.

Comment: One organization said that trademark fees appear to be justified but PTO must ensure that trademark functions are being discharged in the most efficient and economical manner. For example, the organization questioned whether it is efficient for the Office to continue to maintain a paper search file and to continue to pay the General Services Administration (GSA) for building services.

Response: The Office is committed to ensuring that its trademark functions are being discharged effectively and, as part of its quality improvement program, is currently reviewing various work-related processes. No decision has yet been made as to when the paper search file will be eliminated and no such

decision will be made until the public has been given an opportunity to comment. The Office has asked GSA to review the level of charges assessed in light of current market conditions.

Other Considerations: The rule change is in conformity with the requirements of the Regulatory Flexibility Act (Pub. L. 96-354); Executive Orders 12291 and 12612; and the Paperwork Reduction Act of 1980, 44 U.S.C. 3501, et seq. There are no information collection requirements relating to patent and trademark fee rules.

The PTO has determined that this notice has no Federalism implications affecting the relationship between the National Government and the States as outlined in Executive Order 12612.

The General Counsel of the Department of Commerce has certified to the Chief Counsel for Advocacy, Small Business Administration, that the rule change would not have a significant adverse impact on a substantial number of small entities (Regulatory Flexibility Act, Pub. L. 96-354). The rule change increases fees by changes in the CPI as authorized by 35 U.S.C. 41(f). Further, the principal impact of the major patent fees has already been taken into account in 35 U.S.C. 41(h), which provides small entities with a 50-percent reduction in the major patent fees.

The PTO has determined that this rule change is not a major rule under Executive Order 12291. The annual effect on the economy would be less than \$100 million. There would be no major increase in costs or prices for consumers; individual industries; Federal, state, or local government agencies; or geographic regions. There would be no significant adverse effects on competition, employment, investment, productivity, or innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

List of Subjects

37 CFR Part 1

Administrative practice and procedure, Courts, Freedom of information, Inventions and patents, Reporting and record keeping requirements, Small businesses.

37 CFR Part 2

Administrative practice and procedure, Courts, Lawyers, Trademarks.

For the reasons set forth in the preamble, the PTO is amending title 37 of the Code of Federal Regulations, Chapter I, as set forth below.

Part 1-Rules of Practice in Patent Cases

1. The authority citation for 37 CFR Part 1 would continue to read as follows:

Authority: 35 U.S.C. 6, unless otherwise noted.

2. Section 1.16 is amended by revising paragraphs (a)-(d), the parenthetical following paragraph (d), paragraphs (f)-(j), and the note at the end of the section to read as follows:

§ 1.16 National application filing fees.

(a) Basic fee for filing each application for an original patent, except design or plant cases:
By a small entity (§1.19(f)) \$355.00
By other than a small entity \$710.00

(b) In addition to the basic filing fee in an original application, for filing or later presentation of each independent claim in excess of 3:
By a small entity (§ 1.9(f)) \$37.00
By other than a small entity \$74.00

(c) In addition to the basic filing fee in an original application, for filing or later presentation of each claim (whether independent or dependent) in excess of 20.

(Note that § 1.75(c) indicates how multiple dependent claims are considered for fee calculation purposes):

By a small entity (§ 1.9(f)) \$11.00
By other than a small entity \$22.00

(d) In addition to the basic filing fee in an original application, if the application contains, or is amended to contain, a multiple dependent claim(s) per application:

By a small entity (§ 1.9(f)) \$115.00
By other than a small entity \$230.00

(If the additional fees required by paragraphs (b), (c), and (d) of this section are not paid on filing or on later presentation of the claims for which the additional fees are due, they must be paid or the claims canceled by amendment prior to the expiration of the time period set for response by the Office in any notice of fee deficiency.)

(f) For filing each design application:

By a small entity (§ 1.9(f)) \$145.00
By other than a small entity \$290.00

(g) Basic fee for filing each plant application:

By a small entity (§ 1.9(f)) \$240.00
By other than a small entity \$480.00

(h) Basic fee for filing each reissue application:

By a small entity (§ 1.9(f)) \$355.00
By other than a small entity \$710.00

(i) In addition to the basic filing fee in a reissue application, for filing or later presentation of each independent claim which is in excess of the number of independent claims in the original patent:

By a small entity (§ 1.9(f)) \$37.00
By other than a small entity \$74.00

(j) In addition to the basic filing fee in a reissue application, for filing or later presentation of each claim (whether independent or dependent) in excess of 20 and also in excess of the number of claims in the original patent.

(Note that § 1.75(c) indicates how multiple dependent claims are considered for fee calculation purposes):

By a small entity (§ 1.9(f)) \$11.00
By other than a small entity \$22.00

(Note: See §§ 1.445, 1.482 and 1.492 for international application filing and processing fees.)

3. Section 1.17 is amended by revising paragraphs (b)-(g), (j), (m)-(o) to read as follows:

§ 1.17 Patent application processing fees.

(b) Extension fee for response within second month pursuant to § 1.136(a):

By a small entity (§ 1.9(f)) \$180.00
By other than a small entity \$360.00

(c) Extension fee for response within third month pursuant to § 1.136(a):

By a small entity (§ 1.9(f)) \$420.00
By other than a small entity \$840.00

(d) Extension fee for response within fourth month pursuant to § 1.136(a):

By a small entity (§ 1.9(f)) \$660.00
By other than a small entity \$1,320.00

(e) For filing a notice of appeal from the examiner to the Board of Patent Appeals and Interferences:

By a small entity (§ 1.9(f)) \$135.00
By other than a small entity \$270.00

(f) In addition to the fee for filing a notice of appeal, for filing a brief in support of an appeal:

By a small entity (§ 1.9(f)) \$135.00
By other than a small entity \$270.00

(g) For filing a request for an oral hearing before the Board of Patent Appeals and Interferences in appeal under 35 U.S.C. 134:

By a small entity (§ 1.9(f)) \$115.00
By other than a small entity \$230.00

(j) For filing a petition to institute a public use proceeding under § 1.292 \$1,350.00

(m) For filing a petition:

(1) For revival of an unintentionally abandoned application, or

(2) For the unintentionally delayed payment of the fee for issuing a patent:

By a small entity (§ 1.9(f)) \$585.00
By other than a small entity \$1,170.00

(n) For requesting publication of a statutory invention registration prior to the mailing of the first examiner's action pursuant to § 1.104—\$820.00 reduced by the amount of the application basic filing fee paid

(o) For requesting publication of a statutory invention registration after the mailing of the first examiner's action pursuant to § 1.104—\$1,640.00 reduced by the amount of the application basic filing fee paid

4. Section 1.18 is amended by revising paragraphs (a)-(c) to read as follows:

§ 1.18 Patent issue fees.

(a) Issue fee for issuing each original or reissue patent, except a design or plant patent:

By a small entity (§ 1.9(f)) \$585.00
By other than a small entity \$1,170.00

(b) Issue fee for issuing a design patent:

By a small entity (§ 1.9(f)) \$205.00
By other than a small entity \$410.00

(c) Issue fee for issuing a plant patent:

By a small entity (§ 1.9(f)) \$295.00
By other than a small entity \$590.00

5. Section 1.19 is amended by revising paragraph (b)(4) and paragraphs (f) and (h) to read as follows:

§ 1.19 Document supply fees:

(b)***

(4) For assignment records, abstract of title and certification, per patent \$25.00

(f) Uncertified copy of a non-United States patent document, per document \$25.00

(h) Additional filing receipts; duplicate; or corrected due to applicant error \$25.00

6. Section 1.20 is amended by revising paragraphs (a), (c), (e)-(g) and (i) to read as follows:

§ 1.20 Post issuance fees.

(a) For providing a certificate of correction for applicant's mistake (§ 1.323) \$100.00

(c) For filing a request for reexamination (§1.510(a)) \$2,250.00

(e) For maintaining an original or reissue patent, except a design or plant patent, based on an application filed on or after December 12, 1980, in force beyond four years; the fee is due by three years and six months after the original grant.
By a small entity (§ 1.9(f)) \$465.00
By other than a small entity \$930.00

(f) For maintaining an original or reissue patent, except a design or plant patent, based on an application filed on or after December 12, 1980, in force beyond eight years; the fee is due by seven years and six months after the original grant.
By a small entity (§ 1.9(f)) \$935.00
By other than a small entity \$1,870.00

(g) For maintaining an original or reissue patent, except a design or plant patent, based on an application filed on or after December 12, 1980, in force beyond twelve years; the fee is due by eleven years and six months after the original grant.
By a small entity (§ 1.9(f)) \$1,410.00
By other than a small entity \$2,820.00

(i) Surcharge for accepting a maintenance fee after expiration of a patent for non-timely payment of a maintenance fee where the delay in payment is shown to the satisfaction of the Commissioner to have been unavoidable \$620.00

7. Section 1.21 is amended by revising paragraphs (a)(1), (a)(5), (a)(6), (b)(2), (b)(3), (e), and (i) and adding paragraph (p) to read as follows:

§ 1.21 Miscellaneous fees and charges.

(a) ***

(1) For admission to examination for registration to practice, fee payable upon application \$300.00

(5) For review of a decision of the Director of Enrollment and Discipline under § 10.2(c) \$130.00

(6) For requesting regrading of an examination under §10.7(c) \$130.00

(b) ***

(2) Service charge for each month when the balance at the end of the month is below \$1,000 \$25.00

(3) Service charge for each month when the balance at the end of the month is below \$300.00 for restricted subscription deposit accounts used exclusively for subscription order of patent copies as issued \$25.00

(e) International type search reports: For preparing an international type search report of an international type search made at the time of the first action on the merits in a national patent application \$40.00

(i) Publication in Official Gazette: For publication in the Official Gazette of a notice of the availability of an application or a patent for licensing or sale, each application or patent \$25.00

(p) Library service: marginal cost for providing to a Patent and Trademark Depository Library access to Automated Patent System (APS) full-text search capability, per hour of terminal session time, including print time \$70.00

8. Section 1.26 is amended by revising paragraphs (a) and (c) to read as follows:

§ 1.26 Refunds.

(a) Money paid in excess will be refunded, but a mere change of purpose after the payment of money, as when a party desires to withdraw an application, an appeal, or a request for oral hearing, will not entitle a party to demand such a return. Amounts of twenty-five dollars or less will not be returned unless specifically requested within a reasonable time, nor will the payer be notified of such amount; amounts over twenty-five dollars may be returned by check, or if requested, by credit to a deposit account.

(c) If the Commissioner decides not to institute a reexamination proceeding, a refund of \$1,690 will be made to the requester of the proceeding. Reexamination requesters should indicate whether any refund should be made by check or by credit to a deposit account.

9. Section 1.445 is amended by revising paragraph (a) to read as follows:

§ 1.445 International application filing, processing and search fees.

(a) The following fees and charges for international applications are established by the Commissioner under the authority of 35 U.S.C. 376:

(1) A transmittal fee (see 35 U.S.C. 361(d) and PCT Rule 14) \$200.00

(2) A search fee (see 35 U.S.C. 361(d) and PCT Rule 16) where:

(i) No corresponding prior United States national application with basic filing fee has been filed \$620.00

(ii) A corresponding prior United States national application with basic filing fee has been filed \$410.00

(3) A supplemental search fee when required, per additional invention \$170.00

10. Section 1.482 is amended by revising paragraphs (a) introductory text, (a)(1), and (a)(2)(ii) to read as follows:

§ 1.482 International preliminary examination fees.

(a) The following fees and charges for international preliminary examination are established by the Commissioner under the authority of 35 U.S.C. 376:

(1) A preliminary examination fee is due on filing the Demand:

(i) Where an international search fee as set forth in § 1.455(a)(2) has been paid on the international application to the United States Patent and Trademark Office as an International Searching Authority, a preliminary examination fee of \$450.00

(ii) Where the International Searching Authority for the international application was an authority other than the United States Patent and Trademark Office, a preliminary examination fee of \$670.00

(2)***

(ii) Where the International Searching Authority for the international application was an authority other than the United States Patent and Trademark Office \$230.00

11. Section 1.492 is amended by revising paragraphs (a)(1)-(a)(3), (a)(5), paragraphs (b)-(d), and the parenthetical following paragraph (d) to read as follows:

§ 1.492 *National stage fees.*

(a)***

(1) Where an international preliminary examination fee as set forth in § 1.482 has been paid on the international application to the United States Patent and Trademark Office:

By a small entity (§ 1.9(f)) \$320.00
By other than a small entity \$640.00

(2) Where no international preliminary examination fee as set forth in § 1.482 has been paid to the United States Patent and Trademark Office, but an international search fee as set forth in § 1.445(a)(2) has been paid on the international application to the United States Patent and Trademark Office as an International Searching Authority:

By a small entity (§ 1.9(f)) \$355.00
By other than a small entity \$710.00

(3) Where no international preliminary examination fee as set forth in § 1.482 has been paid and no international search fee as set forth in § 1.445(a)(2) has been paid on the international application to the United States Patent and Trademark Office:

By a small entity (§ 1.9(f)) \$475.00
By other than a small entity \$950.00

(5) Where a search report on the international application has been prepared by the European Patent Office or the Japanese Patent Office:

By a small entity (§ 1.9(f)) \$415.00
By other than a small entity \$830.00

(b) In addition to the basic national fee, for filing or later presentation of each independent claim in excess of 3:

By a small entity (§ 1.9(f)) \$37.00
By other than a small entity \$74.00

(c) In addition to the basic national fee, for filing or later presentation of each claim (whether independent or dependent) in excess of 20 (Note that § 1.75(c) indicates how multiple dependent claims are considered for fee calculation purposes.):

By a small entity (§ 1.9(f)) \$11.00
By other than a small entity \$22.00

(d) In addition to the basic national fee, if the application contains, or is amended to contain, a multiple dependent claim(s), per application:

By a small entity (§ 1.9(f)) \$115.00
By other than a small entity \$230.00

(If the additional fees required by paragraphs (b), (c) and (d) are not paid on presentation of the claims for which the additional fees are due, they must be paid or the claims cancelled by amendment prior to the expiration of the time period set for response by the Office in any notice of fee deficiency.)

Part 2 - Rules of Practice in Trademark Cases

1. The authority citation for Part 2 continues to read as follows:

Authority: 15 U.S.C. 1123; 35 U.S.C. 6, unless otherwise noted.

2. Section 2.6 is amended by revising paragraphs (a)(1) and (b)(7) and adding paragraph (a)(19) to read as follows:

§ 2.6 *Trademark fees.*

(a) Trademark process fees.

(1) For filing an application, per class \$210.00

(19) Dividing an application, per new application (file wrapper) created \$100.00

(b) Trademark service fees.

(7) For assignment records, abstract of title and certification, per registration \$25.00

3. Section 2.87 is revised to read as follows:

Section 2.87 Dividing an Application

(a) An application may be physically divided into two or more separate applications upon the payment of a fee for each new application created and submission by the applicant of a request in accordance with paragraph (d) of this section.

(b) In the case of a request to divide out one or more entire classes from an application, only the fee under paragraph (a) of this section will be required. However, in the case of a request to divide out some, but not all, of the goods or services in a class, an application filing fee for each new separate application to be created by the division must be submitted, together with the fee under paragraph (a) of this section. Any outstanding time period for action by the applicant in the original application at the time of the division will be applicable to each new separate application created by the division.

(c) A request to divide an application may be filed at any time between the filing of the application and the date the Trademark Examining Attorney approves the mark for publication or the date of expiration of the six-month response period after issuance of a final action; or during an opposition, upon motion granted by the Trademark Trial and Appeal Board. Additionally, a request to divide an application under section 1(b) of the Act may be filed with a statement of use under § 2.88 or at any time between the filing of a statement of use and the date the Trademark Examining Attorney approves the mark for registration or the date of expiration of the six-month response period after issuance of a final action.

(d) A request to divide an application should be made in a separate paper from any other amendment or response in the application. The title "Request to divide application." should appear at the top of the first page of the paper.

Aug. 17, 1992

DOUGLAS B. COMER
Acting Assistant Secretary
and Acting Commissioner
of Patents and Trademarks

Note.- The following appendix will not appear in the Code of Federal Regulations

Appendix A - Comparison of Existing and Revised Fee Amounts

[Docket No. 90363-9221]
RIN: 0651-AA40

Patent and Trademark Automated Search System Fees

Agency: Patent and Trademark Office, Commerce
 Action: Final Rule

Summary: The Patent and Trademark Office (Office) is amending the rules of practice in patent and trademark cases, Parts 1 and 2 of Title 37, Code of Federal Regulations, to set forth fees for public access to the text data bases resident on the Automated Patent System (APS) and the automated trademark search system (T-Search). Pub. L. 100-703, enacted on November 19, 1988, allows the Commissioner to establish reasonable fees for on-line access to the automated search systems.

The Office will provide on-line access to its USPAT data base (full text of U.S. patents issued after 1974), the U.S.

classification data from 1790 to the present, and to English abstracts of Japanese and Chinese patents (to the extent they are available), hereinafter referred to as APS-Text, in its Patent Search Room and to T-Search in its Trademark Search Library, located in Arlington, Virginia. Except for a series of pilot experiments which may occur over the next one or two years, the Office does not plan to provide routine remote on-line access to these data bases at any other facilities at the present time. A separate rulemaking process will be followed when the Office determines to provide such remote on-line access.

Both search systems have been made available to the public free of charge since April 3, 1989, for the purposes of education and training (familiarization).

The paper and/or microfilm collections of U.S. patents, foreign patents documents and U.S. trademark registrations continue to be available to the public free of charge, as provided by section 104(b) of Pub. L. 100-703. The Office reaffirms its commitment to hold a public hearing prior to making any decision concerning the elimination of the paper files.

This final rule establishes fees for use of the on-line automated search systems. In addition, procedures for public use of the automated search systems, including training and charging of fees, are presented.

In response to the notice of proposed rulemaking published in the *Federal Register* on May 3, 1989 (54 FR 18907), and at a public hearing held on June 30, 1989, the Office received many comments regarding problems encountered by the public in the use of T-Search. The Office believes that T-Search has proven effective for searches performed by Trademark examining attorneys in connection with their examination of applications for the registration of marks. Although the Office is establishing a fee for accessing the T-Search system, the Commissioner is immediately suspending collection of that fee to provide additional time for the public to familiarize themselves with T-Search. The Office will provide the public with sixty days notice before starting to collect the fee.

Effective Date: February 12, 1990. Rule 2.6(w) will take effect February 12, 1990 but immediately be suspended by the Commissioner. The Office will provide written notice in the *Federal Register* sixty days before starting to collect fees for accessing T-Search.

For Further Information: Frances Michalkewicz by telephone at (703) 557-1610 or by mail marked to her attention and addressed to the Commissioner of Patents and Trademarks, Washington, D.C. 20231.

Supplementary Information: The purpose of this final rule is to establish new fees for the on-line use by the public of APS-Text, and T-Search that are to be provided in the Office's facilities in Arlington, Virginia. This final rule is consistent with the Office's Electronic Data Dissemination Policies and Guidelines, which were published in final form in the *Federal Register* on May 3, 1989, at 54 FR 18920. Establishment and adjustment of patent fees is provided for by section 6 and section 41 of Title 35, United States Code, and section 103(b) of Pub. L. 100-703. Establishment and adjustment of trademark fees is authorized by section 31 of the Trademark (Lanham) Act 1946, as amended (15 U.S.C. 1113), and section 103(a) of Pub. L. 100-703. Information on the procedures for public use of the automated systems, including training, waivers, and the charging of fees, also is presented.

Background: In response to Pub. L. 96-517, the 1980 legislation which amended patent and trademark laws, the Office prepared and submitted a plan for the automation of its operations to Congress on December 13, 1982. The plan centered on two basic concepts: the creation of electronic data bases that (1) would eventually replace the Office's all-paper patent and trademark files, and thereby improve the integrity and quality of Office records; and (2) would support searches, examinations, Office actions and other Office functions through electronic workstations which would provide text and image retrieval capabilities and perform other automation functions.

Over 700,000 active Federal trademark registrations have been converted to an electronic data base of textual and digital image data. A computer system has been installed to enable trademark examining attorneys to search the data base for registered and pending trademarks and associated textual data, including marks containing designs, and to retrieve, display and print all information as a substitute for paper file searches. Trademark examining attorneys have been using T-Search exclusively since January 1988 via a network of approximately 40 terminals. After a six-month experimental T-Search evaluation program conducted between June and December 1988, the capability was deployed for public use in the Trademark Search Library on April 3, 1989.

The T-Search "dead data base", trademarks cancelled, expired or abandoned since March 1984, also is available to the public, but approximately 17,000 images are missing and an additional 184,000 registrations and applications have not been quality checked. Trademark examining attorneys do not search this data base in connection with examining activities.

An Automated Patent System (APS) was installed for test and evaluation purposes, using one patent examining group as an operational testbed. Major operational components of APS, that is, large scale computers with conventional magnetic storage devices, a high-speed local data communications network, and electronic workstations equipped with two high resolution graphic

displays and laser printers were interconnected on July 1, 1986, to enable system test and evaluation to begin in the testbed group.

On-line access to the full-text of all U.S. patents granted after 1974 and then to English language abstracts of Japanese patents was deployed to the patent examining staff beginning in 1986. On-line access to APS-Text permits examiners to search the text of approximately one million U.S. patents containing more than five billion words. Today, all examiners have been trained in the use of the full-text searching tool, and it has become a routine part of the patent examination process for many examiners. Searches are conducted from approximately 71 single screen text terminals located throughout the Office. The APS-Text capability was deployed to the public in the Patent Search Room on April 3, 1989.

The Office intends to enter the text of virtually all U.S. patents issued after 1970. In addition, selected tubular data and chemical and mathematical equations will be added to the current full text file. Ultimately, approximately 1.2 million U.S. patents will be available to both patent examiners and the public for search in full text form.

Public evaluation of the APS full-text search capability was conducted between January 11 and April 15, 1988. Forty-two (42) public users were trained an APS-Text during January 1988, and allowed first-come/first-serve access to several terminals. Reactions of public users to APS-Text were positive. Public users found APS-Text useful for pre-application and state-of-the-art searches.

A total of 38 public users were trained on T-Search during a public evaluation period conducted between June and December 1988. Preliminary review indicated that public users considered T-Search to be useful both as a source for registrability searching and for verifying paper searches. In addition, T-Search was found to facilitate searches by class and ownership.

Pub. L. 100-703, enacted on November 19, 1988, allows the Commissioner to establish reasonable fees for public access to the automated search systems while it continues the requirements that no more than 30 percent of automation resources may be from user fees and that the Office may not enter into exchange agreements relating to automatic data processing resources.

Section 104(c) of Pub. L. 100-703 allows the Commissioner to waive the payment by an individual of fees for accessing the automated search systems upon a showing of need or hardship, and if such waiver is in the public interest.

The information contained in the automated data bases, which will be available to the public at the Patent and Trademark Office in Arlington, Virginia, is available free of charge at that location in paper form, and is substantially available through commercial vendors. The Office believes it to be in the public interest to waive the fee for public access to its text data bases in situations where access to the data base is needed for a personal, educational purpose by an individual or member of an educational or non-profit organization, or where payment of the fee would pose a genuine financial hardship to the user.

A personal, educational purpose is one in which the person using the data base is attempting to satisfy a personal need, and is not conducting a search or otherwise using the data base for compensation in any form. Examples of appropriate waiver situations would include students or teachers doing a term paper, a university professor collecting background information for the preparation of an application for a research grant. An example of a situation where a waiver would not be appropriate would include an individual doing work for remuneration — e.g., a law student doing a pre-examination or infringement search for a law firm.

The Commissioner will further consider a fee waiver based on a genuine financial hardship. The person requesting a waiver will be required to provide information that would demonstrate a clear inability to pay the fee.

A waiver for the payment of fees is intended to be granted sparingly, and generally only when terminals are available. It is not anticipated that fees will be waived for any one individual more than once or twice each year. The Commissioner reserves the authority to control access to the data bases and deny a waiver to any individual.

The waiver policy would apply only to use of the automated system, and not to the printing or sale of copies. Any abuse of the waiver policy could lead to a ban on the use of any public search facility for that individual.

Cost Calculations: The Office calculated unit costs for all fees based on OMB Circular A-25 "User Fees", and OMB Circular A-130, "Management of Federal Information Resources." Costs were determined from the best available records (for example, financial statements for the Office) and included direct and indirect costs to the Office of carrying out the activity, as directed by OMB Circular A-25. User charges for both APS-Text and T-Search were based on the marginal costs of providing these services to the public.

In calculating the costs of providing access to T-Search and APS-Text to the public, the Office followed Congressional direction that fees be reasonable by reflecting the marginal cost for providing the new service and not include the costs of designing or installing the automated system for use by Office examiners, or the development of the new systems.

Prior to preparation of this final rule, all of the cost assumptions and cost calculations were reviewed and modified to ensure that they included the Office's best estimates and projections.

APS-Text

The Office is establishing the \$40.00 fee for each hour of terminal session time on APS-Text. The marginal costs for one hour terminal session time on APS-Text include a portion of the lease cost of a new computer mainframe which originally was to be acquired in fiscal year 1990 for use by Office patent examiners. To meet public search requirements, the mainframe is being leased earlier than originally planned. That portion of lease costs for the three (3) month period March 1990 through May 1990 over and above the lease costs for a mainframe sized to meet only examiner needs is being passed on to the user. After May 1990, the mainframe was intended to be procured and installed to support APS. Therefore, no costs are being passed on to the public user after that time. When public usage reaches the level where a mainframe dedicated for public use is required, fee adjustments will be proposed to pass all of the costs of that mainframe on to the public.

The level of public use will affect the amount of main memory needed to support the additional search sessions. It is projected that an additional increment of main memory will be required in fiscal years 1991 and 1992. This increment would not be required to support the examiner workload alone.

The fee calculations for public access also include the costs for equipment: network interface units, text terminals, printer noise dampeners and text terminal printers.

Other costs include a portion of the license fees that must be paid to Chemical Abstracts Service for its proprietary text and structure search software; additional personnel for the Patent Search Room, and the Office of Information Systems; computer installation costs; supplies and equipment dedicated to public use; and general and administrative overhead.

The Office is providing free access time during training on the automated search systems in accordance with ? 104(c) of Public Law 100-703 which reads: "...a limited amount of free access shall be made available to all users of the systems for purposes of education and training."

The usage rate estimates are based on the three-month public user study performed from January through March 1988. For this study, 42 frequent Patent Search Room users were selected to be trained in the use of APS-Text. Three text terminals were made available to the trained public users at no charge. During the three-month study period, use of the three terminals averaged approximately 50 percent. While it is impossible to accurately predict future use by a more diverse group of public users, the cost calculations attempted to take into account the following factors and assumptions:

1. Future public users, on average, would use APS-Text less frequently than the 42 frequent users selected for the 1988 study, many of whom routinely used commercially available automated text search tools.

2. Collection of a fee for use (as opposed to the absence of any charge during the study) would reduce demand for text search services when compared with usage data obtained during the study period.

3. The potential universe of public users is expected to average no more than 300 per day.

4. The average length of a public user search session is projected to be approximately 22 minutes — the average length of a search session during the 1988 test of public use.

5. Based on the preceding assumptions, if all 300 potential public users conducted a single search session during a workday, a total of 110 hours of access would be required. Twenty-five text terminals available five days a week, twelve hours a day, would provide a maximum potential of 300 hours of available text search time. Under these assumptions, the number of text terminals appeared to be adequate for the foreseeable future.

6. For purposes of actual use of available text terminals, the following estimates were used:

(a) In fiscal year 1990, between four (4) and six (6) terminals would be available during the first quarter. An estimate of 45 percent utilization of available text terminal time was projected. By increasing the number of text terminals to 10 in January 1990 and 20 in April 1990, an estimate of 40 percent utilization of available text terminal time was projected. By increasing the number of text terminals to 25 in July 1990, an estimate of 35 percent utilization of available text terminal time was projected.

(b) During fiscal year 1991 and beyond, stable levels of usage were projected to be achieved, yielding an estimated 35 percent average utilization of the 25 available terminals. This utilization rate equates to 105 session hours per day, or an average of 4.2 session hours per terminal per day. At an average of 22 minutes per session, a total of 286 search sessions per day. Although usage rates since the system was made available to the public in April 1989 have been higher than projected, the Office believes these projections are valid for the three-year fee cycle.

A summary of the fee calculations is as follows:

APS-Text Marginal Cost of One-Hour of Terminal Session Time (December 1989-November 1992)

<u>Cost Element</u>	<u>Public Share (Marginal Cost)</u>
Personnel: Compensation and Benefits	\$ 918,196
Hardware & Maintenance	\$ 691,289
Software (license fees)	\$ 295,676
Site Preparation	\$ 38,118
Non-capital Furniture	\$ 8,750
Supplies & Forms	\$ 3,500
Sub-Total	\$ 1,955,529
General & Administrative Overhead	\$ 361,773
TOTAL COST	\$ 2,317,302
Estimated Use (hours)	65,946
UNIT COST (per hour)	\$ 35.14

The marginal cost for one hour of Office staff search assistance on APS-text includes the costs of personnel compensation and benefits.

A summary of the fee calculation is as follows:

APS-Text Marginal Cost of One-Hour of Office Staff Search Assistance (December 1989-November 1992)

<u>Cost Element</u>	<u>Public Share (Marginal Cost)</u>
Personnel:	
Annual Compensation and Benefits	
TOTAL COST	\$ 45,659
Work Hours (per annum)	1,776
UNIT COST (per hour)	\$ 25.71

The marginal cost for a printed copy generated from APS-Text includes costs for compensation and benefits, printers, furniture for the printers, supplies and forms, and general and administrative overhead. A summary is as follows:

APS-Text
Marginal Cost of
Each Printed Page
 (December 1989-November 1992)

<u>Cost Element</u>	<u>Public Share</u> <u>(Marginal Cost)</u>
Personnel: Compensation and Benefits	\$ 173,472
Hardware & Maintenance	\$ 13,483
Non-capital Furniture	\$ 5,000
Supplies & Forms	\$ 35,882
Sub-Total	\$ 227,837
General & Administrative Overhead	\$ 42,150
TOTAL COST	\$ 269,987
Estimated Use (pages)	4,496,325
UNIT COST (per page)	\$0.060

T-Search

The marginal cost for one hour of terminal session time on T-Search includes the costs of personnel in the Trademark Search Library, maintenance of the T-Search terminals, routine site preparation, supplies and forms, and general and administrative overhead. The Office is establishing the \$40.00 fee for each hour of terminal session time on T-Search, but is immediately suspending collection of that fee in order to provide public users additional time to familiarize themselves with the system.

The comments submitted in response to the proposed rule-making indicate that the public users have not adequately adjusted to the T-Search system. During the period collection of the fee is suspended, the public will have an opportunity to better learn the system so as to perform more effective searches than they may be experiencing now. The Office will publish a notice in the *Federal Register* sixty days before it begins collecting a fee for public access to T-Search.

Usage rates for T-Search during fiscal years 1990-1992 were projected to be 28 percent of the hours the system would be available to the public. This rate was extrapolated from actual usage rates during the T-Search public user pilot program which was conducted from June through December 1988. A total of 38 members of the public were trained on T-Search, and about 24 to 28 public users were active on T-Search each month. The overall usage rate of these active users was 14 percent of the hours the system was available to the public. In projecting usage rates on which to base a fee amount, it was anticipated that the overall number of users and the usage rate would double once T-Search was made available in the Trademark Search Library to all users of that search facility and training was provided on a routine basis. Although usage rates since the system was made available to the public in April 1989 have been higher projected, the Office believes these projections are valid for the three-year fee cycle.

A summary of the fee calculations are as follows:

T-Search
Marginal Cost of One-Hour of
Terminal Session Time
 (December 1989-November 1992)

<u>Cost Element</u>	<u>Public Share</u> <u>(Marginal Cost)</u>
Personnel: Compensation and Benefits	\$ 154,451
Hardware & Maintenance	\$ 28,809
Site Preparation	\$ 1,000
Supplies & Forms	\$ 3,298
Sub-Total	\$ 187,558
General & Administrative Overhead	\$ 34,698
TOTAL COST	\$ 222,256
Estimated Use (hours)	5,985
UNIT COST (per hour)	\$ 37.14

The marginal cost for a printed copy generated from T-Search includes costs for compensation, and supplies and forms.

A summary of the costs is as follows:

T-Search
Marginal Cost of
Each Printed Page
 (December 1989-November 1992)

<u>Cost Element</u>	<u>Public Share</u> <u>(Marginal Cost)</u>
Personnel: Compensation and Benefits	\$ 27,862
Hardware & Maintenance	\$ 5,274
Supplies & Forms	\$ 3,579
Sub-Total	\$ 36,715
General & Administrative Overhead	\$ 6,792
TOTAL COST	\$ 43,507
Estimated Use (pages)	448,875
UNIT COST (per page)	\$ 0.097

The proposed fee of \$25.00 for each hour of Office staff search assistance to conduct a search using T-Search has been withdrawn. The T-Search system can be used by the public with routine assistance provided by the regular staff of the Trademark Search Library. This is similar to assistance on how to use the paper files now provided free of charge by the Trademark Search Library staff. Office employees will neither work one-on-one with members of the public in conducting searches, nor conducted searches for members of the public.

Rounding Procedures: Fee amounts were rounded so that the amount rounded would be de minimis and convenient to the user. This procedure is consistent with section 103(b) of Pub. L. 100-703 which allows the Office to adjust patent fees in the aggregate, and with section 103(a) of Pub. L. 100-703 which allows the Office to adjust trademark fees in the aggregate.

The Office has detailed cost calculation worksheets for each fee item, which are available for public inspection in Suite 904 of Building 2, Crystal Park at 2121 Crystal Drive, Arlington, Virginia.

PROCEDURES FOR PUBLIC USE OF
APS-TEXT AND T-SEARCH

Patent Search Room Configuration

Initially four (4) text search terminals will be installed and available for public use in the Patent Search Room. A printer will be associated with each text search terminal. An additional terminal will be located in Patent Search Room employee office space for control and administrative activities. Up to twenty-one (21) more terminals and printers are planned to be added for public use during fiscal year 1990, if necessary.

Trademark Search Library Configuration

Initially three (3) T-Search terminals with associated printers all be installed and available for public use in the Trademark Search Library. The terminals will be clustered in one area of the Trademark Search Library. An additional terminal will be located in Trademark Search Library employee office space for control and administration activities. Additional terminals and printers will be added as demand warrants and space permits.

Training

To enable prospective public users to become effective on APS-Text, approximately fourteen (14) hours of free basic training is being offered. For those familiar with automated search systems, a shorter course of six (6) hours is provided. Ten (10) members of the public can be trained during each class. Training is being held at the Office's Arlington, Va. complex during normal work hours.

Four (4) hours of basic training is being offered on the use of T-Search. For those familiar with automated search systems, a shorter course of one (1) hour is available. T-Search training is being held in the Office's Arlington, Va. complex during morning, evening and weekend hours.

Enrollment in all training classes initially was on a lottery basis. Public users who wished to be trained on APS-Text or T-Search were required to submit an application form. The Office is now accepting requests for training and adding the names to the list. As of August 31, 1989, 696 people or 70 percent of all those requesting training have been trained.

System Use and Fee Procedures

To ensure equity of public access to the automated systems, as well as efficient operations, rules for use will be posted at the terminals. Users of the systems will be expected to comply with the rules and with all other regulations regarding the use of facilities.

Users are strongly encouraged to register in advance for system use. Each week, the next week's schedule will be available in the Patent Search room and the Trademark Search Library. Should requests for blocks of terminal time exceed the availability of terminals, limits on the amount of reserved time may be instituted. Up to three (3) of the initial four (4) terminals in the Patent Search Room and up to two (2) of the initial three (3) terminals in the Trademark Search Library will be allocated to public users with advance reserved times. The remaining terminal in the Patent Search Room will be available for walk-up users and for assisted searches for infrequent users. The remaining terminal in the Trademark Search Library will be available for walk-up users. The terminal time reservation system and the number of terminals available for walk-up public use and for assisted searches (in the Patent Search Room) is subject to change based upon operational experience.

All public use of APS-Text and T-Search, with the exception of scheduled training classes, is on a pre-payment basis. In pre-paying for use of the systems, the public may use a blank signed check, major credit card or charge to a deposit account. At the end of the search or the pre-paid amount of time, users will receive an accounting from Patent Search Room or Trademark Search Library staff for terminal time used and prints produced. The user must then finalize payment.

Discussion of Specific Rules

37 CFR 1.21 Miscellaneous fees and charges.

Section 1.21 is amended to add new paragraph (o) to set the fees for access to the Automated Patent System full-text search capability (APS-Text) and to provide for the waiver of fees under certain circumstances.

Section 1.21 is amended to add new paragraph (p) to set the fees for APS-Text search assistance by Office staff.

Section 1.21 is amended to add new paragraph (q) to set the fee for a printed copy from APS-Text.

37 CFR 2.6 Trademark fees

Section 2.6 is amended to add new paragraph (w) to set the fees for access to the automated trademark search system (T-Search) and to provide for the waiver of fees under certain circumstances.

Section 2.6 is amended to add new paragraph (x) to set the fee for a printed copy from T-Search.

A final rule package establishing two new fees under the provisions of Pub. L. 100-667, the Trademark Law Revision Act of 1988, has been published which added paragraphs (u) and (v) to section 2.6. Therefore, the rule has been modified from the proposal to add paragraphs (w) and (x) instead of paragraphs (u), (v) and (w).

Response to Comments on the Rules

A notice of proposed rulemaking to establish a basis for the charges for use of the on-line automated search systems in the Patent Search Room and Trademark Search Library located at the Patent and Trademark Office in Arlington, Virginia was published in the *Federal Register* on May 3, 1989, at 54 FR 18907. Corrections were published in the *Federal Register* on May 12, 1989, at 54 FR 20670. A notice also was published on May 30, 1989, in volume 1102 of the *Official Gazette* of the United States Patent and Trademark Office, pages 94 through 98 for patents, and pages 96 through 100 for trademarks.

A public hearing was conducted on June 30, 1989. A total of 25 comments were received: 24 respondents submitted written comments and five people presented oral testimony (four of whom also submitted written comments) at the public hearing. On the 25 comments, twelve (12) were from individuals, seven (7) from libraries, five (5) from organizations and one (1) from business. All of the written and oral comments were considered in adopting the rules set forth herein.

Many of the comments from the representatives of the Patent Depository Libraries raised questions or commented on the proposed rules from the perspective of their impact on Patent Depository Libraries. The proposed rules and policies set forth in the *Federal Register* Notice of May 3, 1989 are applicable only to the automated search systems provided in PTO's facilities located in Arlington, Virginia. When the Office is prepared to offer the automated search systems at the Patent Depository Libraries, a proposed notice will be published for public comment. Therefore, any comments relating to procedures for accessing the automated search systems in the Patent Depository Libraries will not be addressed at this time.

Comment: Overall, nine respondents acknowledged the usefulness of the automated search systems, particularly APS-Text. Although seven respondents alleged that T-Search is not adequate to meet the needs of the public, that its response time is too slow, and that it is not sufficiently accurate to meet the specific needs of the commentator, most of these respondents acknowledged that T-Search had the potential for being a useful tool. Documentation of specific problems, for example, those associated with conducting a phonetic search, were provided. Two respondents said that T-Search is flawed and the decision to require examiners to use the system on an exclusive basis was ill-advised and regrettable.

Response: Trademark examining attorneys have been using T-Search for word mark searches since August 1987, and for word mark and design searches since January 1988. The public has been using the system since April 3, 1989.

The minutes to the September 27, 1988, meeting of the Public Advisory Committee for Trademark Affairs, express the view that: "...T-Search searches are more thorough than manual searches." The transcript to that meeting contains the following comments: "I don't think there is any question, but a T-Search [sic] properly done gives an excellent result" and "...from the corporate point of view, ... I am pleased to say that I like what I see. I like the very fast action we're getting on the first action." From the transcript to the February 23, 1988 meeting: "I'd like to start with a glowing report. I think that the registration process is working very well. From my own personal experience in terms of what the examiners are doing, they get an A plus. They're really doing a good job."

The consensus of the management of the Trademark Examining Operation is that the T-Search system meets the needs of the Office at this time. There is no indication in any records or activities in the PTO which would indicate that the use of T-Search has caused a deterioration in the quality of searches conducted by Trademark examining attorneys.

The difference between the perceptions of the Trademark examining attorneys and the public may be attributed to several factors; Trademark examining attorneys use the system on a daily basis; they know what the system can do and what it cannot do and avoid the latter; and they know how to utilize the system's functionalities to perform the best search possible. Further, Trademark examining attorneys do different types of searches, and have different needs, than the public. T-Search use statistics for the period April 1989 through August 1989 demonstrate that the public is making extensive use of the system. Following is a summary of those statistics:

Month	Available Hours	Hours Used By Public	Rate of Usage	Average Session Time
April	513	108	21%	13.02 min.
May	513	126	24%	12.25 min.
June	627	183	29%	10.84 min.
July	570	186	33%	12.51 min.
August	656	217	33%	9.66 min.

This usage rate compares favorably to the projected usage rate of 28 percent.

Comment: Seven respondents claimed that the paper Trademark files have been allowed to deteriorate and, therefore, are not reliable for use by the public.

Response: The Office contracts for file maintenance services in both the Trademark Search Library and the Patent Search Room. Among the tasks performed by the contractor in the Trademark Search Library are maintaining the pending files, filing newly registered Trademarks, pulling erroneous registrations from the file, etc. The contract for the Trademark Search Library includes a monitoring system based on MIL-STD 105, which is a sampling plan that provides a 97 percent accuracy level. Once the contractor completes a task, Office staff check the required sample levels to ensure that filing was performed accurately. The Office is constantly monitoring the status of the paper files, but notes that maintenance of paper file integrity is subject to inherent limitations.

Comment: In view of the above comments about the inadequacy of the Trademark paper search files and T-Search, six respondents advocated the need for T-Search, at no charge to the user, as an adjunct or back-up to the paper files. One respondent suggested a similar arrangement in the Patent Search Room.

Response: The Office has adopted the \$40.00 fee amount for one hour of terminal session time on both APS-Text and T-Search. In order to give the public more time to become familiar with the T-Search system, the Commissioner is immediately suspending collection of that fee. This will enable users to learn the system so as to perform more effective searches. The Office will publish a notice in the *Federal Register* announcing its decision regarding the imposition of the fee at least 60 days before starting to collect the fee amount. At that time, the Office also will publish validated cost estimates based on usage rates and actual costs documented from the present time to the time the decision to collect a fee is made.

Comment: Two respondents claimed that the objective of automation necessarily contemplated a free search system to give meaning to the constructive notice provisions of the Trademark Act.

Response: Registration of a trademark constitutes constructive notice and records of all active trademark registrations and pending applications are available for searching free of charge in the paper file and on TRAM (Trademark Reporting and Monitoring System) data base.

Comment: One respondent claimed that PTO is required to provide access to disclosed patent information as the information is made public; four respondents were opposed to the Office charging fees for accessing the automated search systems; two other respondents commented that the Office should not charge fees for using systems designed to be the sole searching source of the public records which the Office is charged by law to provide; and one respondent commented that the proposal to limit access to the automated data bases only to those who can pay a fee is deplorable policy at a time when there is concern about industrial competitiveness with Japan.

Response: The Office will continue to make the paper and/or microfilm collections of U.S. patents, foreign patent documents and U.S. trademark registrations available for public access free of charge. The Office also has adopted a policy whereby the hourly terminal session fee for access to the data base can be waived when it is needed for a personal, educational purpose by an individual or member of an educational or non-profit organization, or where payment of the fee would pose a genuine financial hardship to the user. In this way, the Office will continue to provide public access to all available information free of charge.

Comment: One respondent commented that user fees for electronic data is a form of dual taxation when information was gathered, organized and produced at taxpayers expense; and two respondents claimed that users of information have contributed up to 30 percent of the \$120 million for development of the APS system to date — in other words, the public already has paid for APS.

Response: In calculating the proposed fees, the Office is consistent with the Office of Management and Budget's proposed policy on user charges for Government information products, as clarified in the June 15, 1989 *Federal Register* notice entitled "Second Advance Notice of Further Policy Development on Dissemination of Information." In that notice, OMB's stated policy is that user charges for Government Information

products should be no higher than a level sufficient to recover the costs of disseminating, not collecting, the information.

The costs associated with the fees for accessing APS-Text and T-Search are directly related to the public's use of the systems; for example, the costs associated with the acquisition of the APS-Text terminals that are being used by the public. No costs associated with designing or installing the automated system for use by Office examiners, or the development of the new systems have been included. Neither have costs been included for gathering, organizing or producing information.

The *Federal Register* notice of June 15, 1989 (54 FR 25554, 25558) dealing with policy development on dissemination of information states that: "As to double taxation, OMB notes that user charges policy has a basis in statute (31 U.S.C. 9701), and the Congress has not viewed user charges as double taxation because they are applied when the recipient receives special benefits."

Comment: Two respondents stated that Government information is the same, whether it is provided in printed or electronic form.

Response: Charging fees for access to the automated search systems is consistent with PTO's fee policy. For example, fees are charged for manual search services (e.g., for a search of Office records or for a search of assignment records), and for printed copies of patents and trademarks and for copies of Office documents.

Comment: The Japanese system is available at four locations at no cost, and includes U.S. information made available at U.S. taxpayer expense.

Response: The Japanese automated search system, like the automated search systems in the PTO's search facilities, is being made available free of charge at the present time. The costs of such use, however, are being paid from general fee revenues collected by the Japanese Patent Office. Additionally, the APS-Text system currently includes Japanese English language abstracts and the Office is in the process of acquiring Japanese patent information in digital facsimile form.

Comment: One respondent commented that PTO has no responsibility to provide an expensive, complex, internal Government on-line value-added computer service, that this is far beyond the requirements of public access to patent files; and another respondent commented that it is in the public interest to have the same system that is being used by the examiners also available to the public.

Response: The Office agrees that it is in the public interest to provide the same search system capability to the public that is being used by the examiners.

Comment: One respondent stated that providing free access is not competing with the private sector, and that there always is a place for the private sector to provide value-added information.

Response: The user charges adopted for public access to the APS-Text and T-Search systems are consistent with OMB Circulars A-25 "User Charges" and A-130 "Management of Federal Information Resources", and with the PTO's Electronic Data Dissemination Policies and Guidelines. The PTO's user's fees are designed to recover the marginal costs associated with providing access to the automated search systems to the public.

Comment: Five respondents stated that the proposed fees are not "reasonable" and the Office does not have documented cost estimates and usage rates to support the proposed fee amounts.

Response: The Office is meeting Congressional direction to establish "reasonable" fees by recovering only the marginal costs associated with providing public access to the automated search systems. Costs and projected usage rates were determined from the best available records, for example, financial statements for the Office and the results of the public evaluations of the APS-Text and T-Search systems. A summary of the costs used in the fee calculations is included above under "Cost Calculations." Full details of these cost calculations are available for public inspection at the Patent and Trademark Office in Suite 904 of Building 2, Crystal Park, at 2121 Crystal Drive, Arlington, Virginia.

Comment: Two respondents questioned the proposed fees for search assistance. If the search assistance is similar to that which is provided free now, there should be no fee. If the search assistance entails doing searches, the Office should not be getting into that business.

Response: The PTO is withdrawing the proposed fee for staff search assistance to conduct a search using T-Search capabilities. The fee for staff search assistance to conduct a search using APS-Text capabilities is being adopted, because an untrained user cannot conduct a search without significant help from Office staff. Users of course, have the option of obtaining free training on the system.

Comment: One respondent commented that user fees cannot be justified under the theory that electronic search provides a new service or offers an enhancement to the public's ability to search the patent data base, and that the public has an option of paying the fee or using the paper files. Another respondent commented that APS-Text and T-Search represent enhancements to services already provided.

Response: The fees are specifically authorized under \$ 104 (c) of Pub. L. 100-703 and are calculated to allow recovery of only the marginal cost for providing the system to the public.

Comment: Two respondents claimed that the Office should ask Congress for funding to offer free access here and at the PDLs.

Response: It continues to be PTO policy, consistent with OMB Circular A-130, that costs for access to the automated search systems be borne by those who actually use the automated search systems.

Comment: One respondent claimed that the accuracy of the trademark data base is suspect.

Response: All of the backfile data base elements (registrations issued prior to September 9, 1980) have been corrected except owner information. As originally planned, the owner field will be cleaned up the active registrations issued prior to September 9, 1980. It is projected that this owner field will be cleaned up by the third quarter of fiscal year 1991.

Comment: Three respondents claimed that the public requires access to the dead data base.

Response: The Office will consider this proposal further. The dead data base is now available in electronic format for all applications and registrations that were active on January 1, 1983 and are now inactive. However, many of these records are of poor quality. Costs for cleaning up these records would be significant, and those costs would likely be reflected in the T-Search user fee.

Comment: Four respondents addressed the fee waiver policy. The proposal to waive fee appears inconsistent with PTO's position that the free paper search files provide an equal and viable resource to anyone not wanting to pay for the automated files. If paper records are inferior, then anyone seeking access to T-Search should be able to qualify for the fee waiver. If the paper records are adequate, then there should be no need to waive the access fee for anyone.

Response: The waiver policy authorized by Pub. L. 100-703 is designed for those individuals who, for some reason in the public interest, such as an educational purpose, need the capabilities of the automated system, for example, to manipulate the data.

Comment: One respondent commented that the procedure to enroll people in training classes by the use of a lottery was unfair and that everyone who wants to be trained should be enrolled.

Response: The lottery was a method for establishing the initial schedules to provide training. Everyone who requests training will be trained. As of August 31, 1989, 449 out of 623 people requesting training on APS-Text, and 247 out of 376 people requesting training on T-Search have been trained.

Comment: One respondent commented that advance registration is an unrealistic approach for many searchers.

Response: At least one terminal in the Patent Search Room and one in the Trademark Search Library will be available for walk-up users. The other terminals will be available first for users with a reservation and then, if needed, for walk-up users. The system is designed to ensure equity of public access to the automated systems.

Comment: Two respondents asked for information justifying that this is not a "Major Rule" as defined by Executive Order 12291, and that the rule will not have a significant adverse impact on small entities.

Response: The no "major rule" determination and no significant adverse impact on small entities was based on the fact that the automated systems are being offered only at the Patent and Trademark Office's public search facilities located in Arlington,

Virginia. The total number of users of these facilities averages less than 400 a day, and many of these users are members of law firms or commercial search services. The annual effect on the economy is expected to be about \$1 million, far less than the \$100 million annual threshold specified in the Executive Order. The fees for accessing the automated search systems are reasonable and should not burden small entities and, at the same time, the Office is continuing to maintain the paper search files which are available to the public free of charge. Finally, there should be no significant adverse effects on competition, because the systems are being offered only at one location, the Patent and Trademark Office in Arlington, Virginia, and the public may continue to use paper files without payment of any fee.

Comment: Five respondent commented that user fees burden small entities and run counter to a fundamental objective of the patent system which is to advance technology through dissemination of the technical information contained in patents.

Response: The Office does not believe that the fee amounts adopted will burden small entities or negatively impact the dissemination of technical information. The Office also will continue to maintain the paper search files using taxpayer funds, and provide access to the public free of charge. Further, the Office has adopted a fee waiver policy whereby the fee amount can be waived where access to the data base is needed for a personal, educational purpose by an individual or member of an educational or non-profit organization, or where payment of the fee would pose a genuine financial hardship to the user. Full details are included above under "Background".

Comment: One respondent commented that the Office needs a policy to ensure that no user of the patent and trademark information is disenfranchised due to an inability to pay for the services necessary to its access.

Response: The Commissioner will consider a fee waiver for users with a genuine financial hardship.

Other Considerations:

The rule change is in conformity with the requirements of the Regulatory Flexibility Act (Pub. L. 96-354), Executive Orders 12291 and 12612, and the Paperwork Reduction Act of 1980, 44 U.S.C. 3501, et seq. There are no information collection requirements relating to patent and trademark fee rules.

The Office has determined that this notice has no Federalism implications affecting the relationship between the National Government and the States as outlined in Executive Order 12612.

The General Counsel of the Department of Commerce has certified to the Chief Counsel for Advocacy, Small Business Administration, that the rule change will not have a significant adverse economic impact on a substantial number of small entities (Regulatory Flexibility Act, Pub. L. 96-354). The rules make the Office's on-line, automated patent full-text search and trademark search systems available to the public at rates significantly less than commercial systems.

The Office has determined that this rule change is not a major rule under Executive Order 12291. The annual effect on the economy will be less than \$100 million. There will be no major increase in costs or prices for consumers, individual industries, Federal, State or local government agencies, or geographic regions. There will be no significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

List of Subjects in 37 CFR Parts 1 and 2

37 CFR Part 1

Administrative practice and procedure, Courts, Inventions and patents, Lawyers, Reporting and record keeping requirements, Small businesses.

37 CFR Part 2

Administrative practice and procedure, Courts, Lawyers, Trademarks.

For the reasons set forth in the preamble, the Office is proposing to amend Title 37 of the code of Federal Regulations, Chapter 1, as set forth below.

PART 1-RULES OF PRACTICE IN PATENT CASES.

1. The authority citation for 37 CFR Part 1 continues to read as follows:

Authority: 35 U.S.C. 6, unless otherwise noted.

2. Section 1.21 is amended by adding new paragraphs (o)-(q).

\$1.21 Miscellaneous fees and charges.

* * * * *

(o) Marginal cost, paid in advance, for each hour of terminal session time, including print time, using Automated Patent System full-text search capabilities, prorated for the actual time used. The Commissioner may waive the payment by an individual for access to the Automated Patent System full-text search capability (APS-Text) upon a showing of need or hardship, and if such waiver is in the public interest \$40.00

(p) Marginal cost, paid advance, for each hour of Office staff search assistance to conduct a search using Automated Patent System full-text search capabilities (APS-Text), prorated for the actual time used \$25.00

(q) Marginal cost, for each printed page generated from the Automated Patent System text terminal \$0.10

PART 2- RULES OF PRACTICE IN TRADEMARK CASES

1. The authority citation for Part 2 continues to read as follows:

Authority: 15 U.S.C. 1123; 35 U.S.C. 6, unless otherwise noted.

2. Section 2.6 is amended by adding new paragraphs (w)-(x).

\$2.6 Trademark fees

* * * * *

(w) Marginal cost, paid in advance, for each hour of terminal session time, including print time, using T-Search capabilities, prorated for the actual time used. The Commissioner may waive the payment by an individual for access to T-Search upon a showing of need or hardship, and if such waiver is in the public interest \$40.00

(x) Marginal cost, for each printed page generated from the T-Search terminal \$0.10

Dec. 4, 1989

JEFFREY M. SAMUELS
*Acting Commissioner of Patents
and Trademarks*

[1110 O.G. 601]

(54) **DEPARTMENT OF COMMERCE
Patent and Trademark Office
37 CFR Part 2**

Patent and Trademark Automated Search System Fees

Agency: Patent and Trademark Office, Commerce

Action: Listing of suspension of final rule

Summary: The Patent and Trademark Office (Office), on December 11, 1989, amended the rules of practice in patent and trademark cases, Parts 1 and 2 of Title 37, Code of Federal Regulations, setting forth the fees for public access to the Office's text data bases: the Automated Patent System (APS) and the automated trademark search system (T-Search). 54 FR 50942. That final rule became effective on February 12, 1990. On that date, 37 CFR 2.6(w), dealing with T-Search fees, took effect, but was immediately suspended by the Commissioner.

The collection of the fee was initially suspended to permit users to become familiar with the T-Search system. The T-Search system has been available to the public since April 1989, a sufficient time for users to become familiar with the system. Therefore, as provided in the final rule, the Office now gives notice that the suspension is lifted. The Office will begin to collect the fees set forth in 37 CFR 2.6(w) sixty (60) days from the date of this notice. Cost estimates based on usage and actual costs are available for inspection in the Office of Long-Range Planning and Evaluation, Room 507, Crystal Park 1, Crystal Drive, Arlington, Virginia.

Dates: The suspension of 37 CFR 2.6(w) is lifted as of Nov. 13, 1990. The collection of fees under 37 CFR 2.6(w) will begin on November 13, 1990

For Further Information Contact: Frances Michalkewicz by telephone at (703) 557-1610 or by mail to her attention and addressed to the Commissioner of Patents and Trademarks, Washington, D.C. 20231.

September 4, 1990

**Public Law 96-517
96th Congress
An Act**

*Patent and
trademark laws,
amendment.*

To amend the patent and trademark laws.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assemble That title 35 of the United States Code, entitled "Patents", is amended by adding after chapter 29 the following new chapter 30:

**"CHAPTER 30-PRIOR ART CITATIONS TO OFFICE AND
REEXAMINATION OF PATENTS**

"Sec.

"301. Citation of prior art.

302. Request for reexamination.

303. Determination of issue by Commissioner.

304. Reexamination order by Commissioner.

305. Conduct of reexamination proceedings.

306. Appeal.

307. Certificate of patentability, unpatentability,
and claim cancellation.

35 USC 301.

"\$301. Citation of prior art

Any person at any time may cite to the Office in writing prior art consisting of patents or printed publications which that person believes to have a bearing on the patentability of any claim of a particular patent. If the person explains in writing the pertinency and manner

of applying such prior art to at least one claim of the patent, the citation of such prior art and the explanation thereof will become a part of the official file of the patent. At the written request of the person citing the prior art, his or her identity will be excluded from the patent file and kept confidential.

“§ 302. Request for reexamination

35 USC 302.

“Any person at any time may file a request for reexamination by the Office of any claim of a patent on the basis of any prior art cited under the provisions of section 301 of this title. The request must be in writing and must be accompanied by payment of a reexamination fee established by the Commissioner of Patents pursuant to the provisions of section 41 of this title. The request must set forth the pertinency and manner of applying cited prior art to every claim for which reexamination is requested. Unless the requesting person is the owner of the patent, the Commissioner promptly will send a copy of the request to the owner of record of the patent.

Fee

“§ 303. Determination of issue by Commissioner

35 USC 303.

“(a) Within three months following the filing of a request for reexamination under provisions of section 302 of this title, the Commissioner will determine whether a substantial new question of patentability affecting any claim of the patent concerned is raised by the request, with or without consideration of other patents or printed publications. On his own initiative, and any time, the Commissioner may determine whether a substantial new question of patentability is raised by patents and publications discovered by him or cited under the provisions of section 301 of this title.

“(b) A record of the Commissioner’s determination under subsection (a) of this section will be placed in the official file of the patent and a copy promptly will be given or mailed to the owner of record of the patent and to the person requesting reexamination, if any.

Record.

“(c) A determination by the Commissioner pursuant to subsection (a) of this section that no substantial new question of patentability has been raised will be final and non-appealable. Upon such a determination, the Commissioner may refund a portion of the reexamination fee required under section 302 of this title.

Refund

“§ 304. Reexamination order by Commissioner

35 USC 304.

“If, in a determination made under the provisions of subsection 303(a) of this title, the Commissioner finds that a substantial new question of patentability affecting any claim of a patent is raised, the determination will include an order for reexamination of the patent for resolution of the question. The patent owner will be given a reasonable period, not less than two months from the date a copy of the determination is given or mailed to him, within which he may file a statement on such question, including any amendment to his patent and new claim or claims he may wish to propose, for consideration in the reexamination. If the patent owner files such a statement, he promptly will serve a copy of it on the person who has requested reexamination under the provisions of section 302 of this title. Within a period of two months from the date of service, that person may file and have considered in the reexamination a reply to any statement filed by the patent owner. That person promptly will serve on the patent owner a copy of any reply filed.

Filing period

“§ 305. Conduct of reexamination proceedings

35 USC 305.

“After the times for filing the statement and reply provided for by section 304 of this title have expired, reexamination will be conducted according to the procedures established for initial examination under the provisions of sections 132 and 133 of this title. In any reexamination proceeding under this chapter, the patent owner will be permitted to propose any amendment to his patent and a new claim or claims thereto, in order to distinguish the invention as claimed from the prior art cited under the provisions of section 301 of this title, or in response to a decision adverse to the patentability of a claim of a patent. No proposed amended or new claim enlarging the scope of a claim of the patent will be permitted in a reexamination proceeding under this chapter. All reexamination proceedings under this section, including any appeal to the Board of Appeals, will be conducted with special dispatch within the Office.

35 USC 132,133.

“§ 306. Appeal

35 USC 306.

“The patent owner involved in a reexamination proceeding under this chapter may appeal under the provisions of section 134 of this title, and may seek court review under the provisions of sections 141 to 145 of this title, with respect to any decision adverse to the patentability of any original or proposed amended or new claim of the patent.

35 USC 134.
35 USC141-145.

“§ 307. Certificate of patentability, unpatentability, and claim cancellation

35 USC 307.

“(a) In a reexamination proceeding under this chapter, when the time for appeal has expired or any appeal proceeding has terminated, the Commissioner will issue and publish a certificate canceling any claim of the patent finally determined to be unpatentable, confirming any claim of the patent determined to be patentable, and incorporating in the patent any proposed amended or new claim determined to be patentable.

“(b) Any proposed amended or new claim determined to be patentable and incorporated into a patent following a reexamination proceeding will have the same effect as that specified in section 252 of this title for reissued patents on the right of any person who made,

35 USC 252.

purchased, or used anything patented by such proposed amended or new claim, or who made substantial preparation for the same, prior to issuance of a certificate under the provisions of subsection (a) of this section.”

SEC. 2. Section 41 of title 35, United States Code, is amended to read as follows:

35 USC 41.

§ 41. Patent fees

“(a) The Commissioner of Patents will establish fees for the processing of an application for a patent, from filing through disposition by issuance or abandonment, for maintaining a patent in force, and for providing all other services and materials related to patents. No fee will be established for maintaining a design patent in force.

“(b) By the first day of the first fiscal year beginning on or after one calendar year after enactment of this Act, fees for the actual processing of an application for a patent, other than for a design patent, from filing through disposition by issuance or abandonment, will recover in aggregate 25 per centum of the estimated average cost to the Office of such processing. By the first day of the first fiscal year beginning on or after one calendar year after enactment, fees for the processing of an application for a design patent, from filing through disposition by issuance or abandonment, will recover in aggregate 50 per centum of the estimated average cost to the Office of such processing.

“(c) By the fifteenth fiscal year following the date of enactment of this Act, fees for maintaining patents in force will recover 25 per centum of the estimated cost to the Office, for the year in which such maintenance fees are received, of the actual processing all applications for patents, other than for design patents, from filing through disposition by issuance or abandonment. Fees for maintaining a patent in force will be due three years and six months, seven years and six months, and eleven years and six months after the grant of the patent. Unless payment of the applicable maintenance fee is received in the Patent and Trademark Office on or before the date the fee is due or within a grace period of six months thereafter, the patent will expire as of the end of such grace period. The Commissioner may require the payment of a surcharge as a condition of accepting within such six-month grace period the late payment of an applicable maintenance fee.

35 USC 13.

“(d) By the first day of the first fiscal year beginning on or after one calendar year after enactment, fees for all other services or materials related to patents will recover the estimated average cost to the Office of performing the service or furnishing the material. The yearly fee for providing a library specified in section 13 of this title with uncertified printed copies of the specifications and drawings for all patents issued in that year will be \$50.

Waiver.

“(e) The Commissioner may waive the payment of any fee for any service or material related to patents in connection with an occasional or incidental request made by a department or agency of the Government, or any officer thereof. The Commissioner may provide any applicant issued a notice under section 132 of this title with a copy of the specifications and drawings for all patents referred to in that notice without charge.

35 USC 132.

Notice.

“(f) Fees will be adjusted by the Commissioner to achieve the levels of recovery specified in this section; however, no patent application processing fee or fee for maintaining a patent in force will be adjusted more than once every three years.

“(g) No fee established by the Commissioner under this section will take effect prior to sixty days following notice in the Federal Register.”

35 USC 42

SEC. 3. Section 42 of title 35, United States Code, is amended to read as follows:

§ 42. Patent and Trademark Office funding

“(a) All fees for services performed by or materials furnished by the Patent and Trademark Office will be payable to the Commissioner.

“(b) All fees paid to the Commissioner and all appropriations for defraying the costs of the activities of the Patent and Trademark Office will be credited to the Patent and Trademark Office Appropriation Account in the Treasury of the United States, the provisions of section 725e of title 31, United States Code, notwithstanding.

“(c) Revenues from fees will be available to the Commissioner of Patents to carry out, to the extent provided for in appropriation Acts, the activities of the Patent and Trademark Office.

“(d) The Commissioner may refund any fee paid by mistake or any amount paid in excess of that required.”

Refund.Notice.

SEC. 4. Section 154 of title 35, United States Code, is amended by deleting the word “issue”.

SEC. 5. Section 31 of the Trademark Act of 1946, as amended (15 U.S.C. 1113), is amended to read as follows:

“§ 31. Fees

“(a) The Commissioner of Patents will establish fees for the filing and processing of an application for the registration of a trademark or other mark and for all other services performed by and materials furnished by the Patent and Trademark Office related to trademarks and other marks. Fees will be set and adjusted by the Commissioner to recover in aggregate 50 per centum of the estimated average cost to the Office of such processing. Fees for all other services or materials related to trademarks and other marks will recover the estimated average cost to the Office of performing the service or furnishing the material. However, no fee for the filing or processing of an application for the registration of a trademark or other mark or for the renewal or assignment of a trademark or other mark will be adjusted more than once every three years. No fee established under this section will take effect prior to sixty days following notice in the Federal Register.

Waiver.

"(b) The Commissioner may waive the payment of any fee for any service or material related to trademarks or other marks in connection with any occasional request made by a department or agency of the Government, or any officer thereof. The Indian Arts and Crafts Board will not be charged any fee to register Government trademarks of genuineness and quality for Indian products or for products of particular Indian tribes and groups."

Indian Products,
exception.

SEC. 6. (a) Title 35 of the United States Code, entitled "Patents", is amended by adding after chapter 37 the following new chapter 38:

"CHAPTER 38-PATENT RIGHTS IN INVENTIONS MADE WITH FEDERAL ASSISTANCE

- "Sec.
- "200. Policy and objective.
- "201. Definitions.
- "202. Disposition of rights.
- "203. March-in rights.
- "204. Preference for United States industry.
- "205. Confidentiality.
- "206. Uniform clauses and regulations.
- "207. Domestic and foreign protection of federally owned inventions.
- "208. Regulations governing Federal licensing.
- "209. Restrictions on licensing of federally owned inventions.
- "210. Precedence of chapter.
- "211. Relationship to antitrust laws.

"§ 200. Policy and objective.

35 USC 200.

"It is the policy and objective of the Congress to use the patent system to promote the utilization of inventions arising from federally supported research or development; to encourage maximum participation of small business firms in federally supported research and development efforts; to promote collaboration between commercial concerns and nonprofit organizations, including universities; to ensure that inventions made by nonprofit organizations and small business firms are used in a manner to promote free competition and enterprise; to promote the commercialization and public availability of inventions made in the United States by United States industry and labor; to ensure that the Government obtains sufficient rights in federally supported inventions to meet the needs of the Government and protect the public against nonuse or unreasonable use of inventions; and to minimize the costs of administering policies in this area.

"§ 201. Definitions

35 USC 201.

"As used in this chapter—

"(a) The term 'Federal agency' means any executive agency as defined in section 105 of title 5, United States Code, and the military departments as defined by section 102 of title 5, United States Code.

"(b) The term 'funding agreement' means any contract, grant, or cooperative agreement entered into between any Federal agency, other than the Tennessee Valley Authority, and any contractor for the performance of experimental, developmental, or research work funded in whole or in part by the Federal Government. Such term includes any assignment, substitution of parties, or subcontract of any type entered into for the performance of experimental, developmental, or research work under a funding agreement as herein defined.

"(c) The term 'contractor' means any person, small business firm, or nonprofit organization that is a party to a funding agreement.

"(d) The term 'invention' means any invention or discovery which is or may be patentable or otherwise protectable under this title.

"(e) The term 'subject invention' means any invention of the contractor conceived or first actually reduced to practice in the performance of work under a funding agreement.

"(f) The term 'practical application' means to manufacture in the case of a composition or product, to practice in the case of a process or method, or to operate in the case of a machine or system; and, in each case, under such conditions as to establish that the invention is being utilized and that its benefits are to the extent permitted by law or Government regulations available to the public on reasonable terms.

"(g) The term 'made' when used in relation to any invention means the conception or first actual reduction to practice of such invention.

"(h) The term 'small business firm' means a small business concern as defined at section 2 of Public Law 85-536 (15 U.S.C. 632) and implementing regulations of the Administrator of the Small Business Administration.

"(i) The term 'nonprofit organization' means universities and other institutions of higher education or an organization of the type described in section 501(c)(3) of the Internal Revenue Code of 1954 (26 U.S.C. 501(c)) and exempt from taxation under section 501(a) of the Internal Revenue Code (26 U.S.C. 501(a)) or any nonprofit scientific or educational organization qualified under a State nonprofit organization statute.

5 USC 202.

"§ 202. Disposition of rights

"(a) Each nonprofit organization or small business firm may, within a reasonable time after disclosure as required by paragraph (c)(1) of this section, elect to retain title to any subject invention: Provided, however, That a funding agreement may provide otherwise (i) when the funding agreement is for the operation of Government-owned research or production facility, (ii) in exceptional circumstances when it is determined by the agency that restriction or elimination of the right to

Funding
agreement

retain title to any subject invention will better promote the policy and objectives of this chapter or (iii) when it is determined by a Government authority which is authorized by statute or Executive order to conduct foreign intelligence or counterintelligence activities that the restriction or elimination of the right to retain title to any subject invention is necessary to protect the security of such activities. The rights of the nonprofit organization or small business firm shall be subject to the provisions of paragraph (c) of this section and the other provisions of this chapter.

“(b)(1) Any determination under (ii) of paragraph (a) of this section shall be in writing and accompanied by a written statement of facts justifying the determination. A copy of each such determination and justification shall be sent to the Comptroller General of the United States within thirty days after the award of the applicable funding agreement. In the case of determinations applicable to funding agreements with small business firms copies shall also be sent to the Chief Counsel for Advocacy of the Small Business Administration.

Written
determination.

“(2) If the Comptroller General believes that any pattern of determinations by a Federal agency is contrary to the policy and objectives of this chapter or that an agency's policies or practices are otherwise not in conformance with this chapter, the Comptroller General shall so advise the head of the agency. The head of the agency shall advise the Comptroller General in writing within one hundred and twenty days of what action, if any, the agency has taken or plans to take with respect to the matters raised by the Comptroller General.

Copy to
Comptroller
General.

Copy to SBA.

“(3) At least once each year, the Comptroller General shall transmit a report to the Committees on the Judiciary of the Senate and House of Representatives on the manner in which this chapter is being implemented by the agencies and on such other aspects of Government patent policies and practices with respect to federally funded inventions as the Comptroller General believes appropriate.

“(c) Each funding agreement with a small business firm or nonprofit organization shall contain appropriate provisions to effectuate the following:

“(1) A requirement that the contractor disclose each subject invention to the Federal agency within a reasonable time after it is made and that the Federal Government may receive title to any subject invention not reported to it within such time.

“(2) A requirement that the contractor make an election to retain title to any subject invention within a reasonable time after disclosure and that the Federal Government may receive title to any subject invention in which the contractor does not elect to retain rights or fails to elect rights within such time.

“(3) A requirement that a contractor electing rights file patent applications within reasonable times and that the Federal Government may receive title to any subject inventions in the United States or other countries in which the contractor has not filed patent applications on the subject invention within such times.

“(4) With respect to any invention in which the contractor elects rights, the Federal agency shall have a nonexclusive, nontransferable, irrevocable, paid-up license to practice or have practiced for or on behalf of the United States any subject invention throughout the world, and may, if provided in the funding agreement, have additional rights to sublicense any foreign government or international organization pursuant to any existing or future treaty or agreement.

Contrary agency
determinations.

“(5) The right of the Federal agency to require periodic reporting on the utilization or efforts at obtaining utilization that are being made by the contractor or his licensees or assignees: Provided, That any such information may be treated by the Federal agency as commercial and financial information obtained from a person and privileged and confidential and not subject to disclosure under section 552 of title 5 of the United States Code.

Report to
congressional
committees.

“(6) An obligation on the part of the contractor, in the event a United States patent application is filed by or on its behalf or by any assignee of the contractor, to include within the specification of such application and any patent issuing thereon, a statement specifying that the invention was made with Government support and that the Government has certain rights in the invention.

funding
agreement
requirements.

“(7) In the case of a nonprofit organization, (A) a prohibition upon the assignment of rights to a subject invention in the United States without the approval of the Federal agency, except where such assignment is made to an organization which has as one of its primary functions the management of inventions and which is not, itself, engaged in or does not hold a substantial interest in other organizations engaged in the manufacture or sale of products or the use of processes that might utilize the invention or be in competition with embodiments of the invention (provided that such assignee shall be subject to the same provisions as the contractor); (B) a prohibition against the granting of exclusive licenses under United States Patents or Patent Applications in a subject invention by the contractor to persons other than small business firms for a period in excess of the earlier of five years from first commercial sale or use of the invention or eight years from the date of the exclusive license excepting that time before regulatory agencies necessary to obtain premarket clearance unless, on a case-by-case basis, the Federal agency approves a longer exclusive license. If exclusive field of use licenses are granted, commercial sale or use in one field of use shall not be deemed commercial sale or use as to other fields of use, and a first commercial sale or use with respect to a product of the invention shall not be deemed to end the exclusive period to different subsequent products covered by the invention; (C) a requirement that the contractor share royalties with the inventor; and (D) a requirement that the balance of any royalties or income earned by the contractor with respect to subject inventions, after payment of expenses (including payments to inventors) incidental to the administration of subject inventions, be utilized for the support of scientific research or education.

Rights,
retention.

Rights, transfer
or assignment.

Third-party

licensing,
prohibition.

“(8) The requirements of sections 203 and 204 of this chapter.

“(d) If a contractor does not elect to retain title to a subject invention in cases subject to this section, the Federal agency may consider and after consultation with the contractor grant requests for retention of rights by the inventor subject to the provisions of this Act and regulations promulgated hereunder.

“(e) In any case when a Federal employee is a coinventor of any invention made under a funding agreement with a nonprofit organization or small business firm, the Federal agency employing such

coinventor is authorized to transfer or assign whatever rights it may acquire in the subject invention from its employee to the contractor subject to the conditions set forth in this chapter.

“(f) (1) No funding agreement with a small business firm or nonprofit organization shall contain a provision allowing a Federal agency to require the licensing to third parties of inventions owned by the contractor that are not subject inventions unless such provision has been approved by the head of the agency and a written justification has been signed by the head of the agency. Any such provision shall clearly state whether the licensing may be required in connection with the practice of a subject invention, a specifically identified work object, or both. The head of the agency may not delegate the authority to approve provisions or sign justifications required by this paragraph.

“(2) A Federal agency shall not require the licensing of third parties under any such provision unless the head of the agency determines that the use of the invention by others is necessary for the practice of a subject invention or for the use of a work object of the funding agreement and that such action is necessary to achieve the practical application of the subject invention or work object. Any such determination shall be on the record after an opportunity for an agency hearing. Any action commenced for judicial review of such determination shall be brought within sixty days after notification of such determination.

“§ 203. March-in rights

35 USC 203.

“With respect to any subject invention in which a small business firm or nonprofit organization has acquired title under this chapter, the Federal agency under whose funding agreement the subject invention was made shall have the right, in accordance with such procedures as are provided in regulations promulgated hereunder to require the contractor, an assignee or exclusive licensee of a subject invention to grant a nonexclusive, partially exclusive, or exclusive license in any field of use to a responsible applicant or applicants, upon terms that are reasonable under the circumstances, and if the contractor, assignee, or exclusive licensee refuses such request, to grant such a license itself, if the Federal agency determines that such—

“(a) action is necessary because the contractor or assignee has not taken, or is not expected to take within a reasonable time, effective steps to achieve practical application of the subject invention in such field of use;

“(b) action is necessary to alleviate health or safety needs which are not reasonably satisfied by the contractor, assignee, or their licensees;

“(c) action is necessary to meet requirements for public use specified by Federal regulations and such requirements are not reasonably satisfied by the contractor, assignee, or licensees; or

“(d) action is necessary because the agreement required by section 204 has not been obtained or waived or because a licensee of the exclusive right to use or sell any subject invention in the United States is in breach of its agreement obtained pursuant to section 204.

“§ 204. Preference for United States industry

35 USC 204.

“Notwithstanding any other provision of this chapter, no small business firm or nonprofit organization which receives title to any subject invention and no assignee of any such small business firm or nonprofit organization shall grant to any person the exclusive right to use or sell any subject invention in the United States unless such person agrees that any products embodying the subject invention or produced through the use of the subject invention will be manufactured substantially in the United States. However, in individual cases, the requirement for such an agreement may be waived by the Federal agency under whose funding agreement the invention was made upon a showing by the small business firm, nonprofit organization, or assignee that reasonable but unsuccessful efforts have been made to grant licenses on similar terms to potential licensees that would be likely to manufacture substantially in the United States or that under the circumstances domestic manufacture is not commercially feasible.

Waiver.

“§ 205. Confidentiality

35v USC 205.

“Federal agencies are authorized to withhold from disclosure to the public information disclosing any invention in which the Federal Government owns or may own a right, title, or interest (including a nonexclusive license) for a reasonable time in order for a patent application to be filed. Furthermore, Federal agencies shall not be required to release copies of any document which is part of an application for patent filed with the United States Patent and Trademark Office or with any foreign patent office.

“§ 206. Uniform clauses and regulations

35 USC 206.

“The Office of Federal Procurement Policy, after receiving recommendations of the Office of Science and Technology Policy, may issue regulations which may be made applicable to Federal agencies implementing the provisions of sections 202 through 204 of this chapter and the Office of Federal Procurement Policy shall establish standard funding agreement provisions required under this chapter.

“§ 207. Domestic and foreign protection of federally owned inventions

35 USC 207.

“Each Federal agency is authorized to—

“(1) apply for, obtain, and maintain patents or other forms of protection in the United States and in foreign countries on inventions in which the Federal Government owns a right, title, or interest;

“(2) grant nonexclusive, exclusive, or partially exclusive licenses under federally owned patent applications, patents, or other forms of protection obtained, royalty-free or for royalties or other consideration, and on such terms and conditions, including the grant to the licensee of the right of enforcement pursuant to the provisions of chapter 29 of this title as determined appropriate in the public interest;

35 USC 281 et seq.

“(3) undertake all other suitable and necessary steps to protect and administer rights to federally owned inventions on behalf of the Federal Government either directly or through contract; and
“(4) transfer custody and administration, in whole or in part, to another Federal agency, of the right, title, or interest in any federally owned invention.

“§ 208. Regulations governing Federal licensing

35 USC 208.

“The Administrator of General Services is authorized to promulgate regulations specifying the terms and conditions upon which any federally owned invention, other than inventions owned by the Tennessee Valley Authority, may be licensed on a nonexclusive, partially exclusive, or exclusive basis.

“§ 209. Restrictions on licensing of federally owned inventions

“(a) No Federal agency shall grant any license under a patent or patent application on a federally owned invention unless the person requesting the license has supplied the agency with a plan for development and/or marketing of the invention, except that any such plan may be treated by the Federal agency as commercial and financial information obtained from a person and privileged and confidential and not subject to disclosure under section 552 of title 5 of the United States Code.

“(b) A Federal agency shall normally grant the right to use or sell any federally owned invention in the United States only to a licensee that agrees that any products embodying the invention or produced through the use of the invention will be manufactured substantially in the United States.

35 USC 209.

“(c)(1) Each Federal agency may grant exclusive or partially exclusive licenses in any invention covered by a federally owned domestic patent or patent application only if, after public notice and opportunity for filing written objections, it is determined that—

Development or
marketing plan

“(A) the interests of the Federal Government and the public will best be served by the proposed license, in view of the applicant’s intentions, plans, and ability to bring the invention to practical application or otherwise promote the invention’s utilization by the public;

“(B) the desired practical application has not been achieved, or is not likely expeditiously to be achieved, under any nonexclusive license which has been granted, or which may be granted, on the invention,

Manufacture in
U. S.

“(C) exclusive or partially exclusive licensing is a reasonable and necessary incentive to call forth the investment of risk capital and expenditures to bring the invention to practical application or otherwise promote the invention’s utilization by the public; and

“(D) the proposed terms and scope of exclusivity are not greater than reasonably necessary to provide the incentive for bringing the invention to practical application or otherwise promote the invention’s utilization by the public.

“(2) A Federal agency shall not grant such exclusive or partially exclusive license under paragraph (1) of this subsection if it determines that the grant of such license will tend substantially to lessen competition or result in undue concentration in any section of the country in any line of commerce to which the technology to be licensed relates, or to create or maintain other situations inconsistent with the antitrust laws.

“(3) First preference in the exclusive or partially exclusive licensing of federally owned inventions shall go to small business firms submitting plans that are determined by the agency to be within the capabilities of the firms and equally likely, if executed, to bring the invention to practical application as any plans submitted by applicants that are not small business firms.

“(d) After consideration of whether the interests of the Federal Government or United States industry in foreign commerce will be enhanced, any Federal agency may grant exclusive or partially exclusive licenses in any invention covered by a foreign patent application or patent, after public notice and opportunity for filing written objections, except that a Federal agency shall not grant such exclusive or partially exclusive license if it determines that the grant of such license will tend substantially to lessen competition or result in undue concentration in any section of the United States in any line of commerce to which the technology to be licensed relates, or to create or maintain other situations inconsistent with antitrust laws.

Anti trust
factors.

“(e) The Federal agency shall maintain a record of determinations to grant exclusive or partially exclusive licenses.

Small business
preference.

“(f) Any grant of a license shall contain such terms and conditions as the Federal agency determines appropriate for the protection of the interests of the Federal Government and the public, including provisions for the following:

Antitrust
factors.

“(1) periodic reporting on the utilization or efforts at obtaining utilization that are being made by the licensee with particular reference to the plan submitted: Provided, That any such information may be treated by the Federal agency as commercial and financial information obtained from a person and privileged and confidential and not subject to disclosure under section 552 of title 5 of the United States Code;

Record.

“(2) the right of the Federal agency to terminate such license in whole or in part if it determines that the licensee is not executing the plan submitted with its request for a license and the licensee cannot otherwise demonstrate to the satisfaction of the Federal agency that it has taken or can be expected to take within a reasonable time, effective steps to achieve practical application of the invention;

Terms and conditions.

“(3) the right of the Federal agency to terminate such license in whole or in part if the licensee is in breach of an agreement obtained pursuant to paragraph (b) of this section; and

“(4) the right of the Federal agency to terminate the license in whole or in part if the agency determines that such action is necessary to meet requirements for public use specified by Federal regulations issued after the date of the license and such requirements are not reasonably satisfied by the licensee.

“§ 210. Precedence of chapter

35 USC 210

“(a) This chapter shall take precedence over any other Act which would require a disposition of rights in subject inventions of small business firms or nonprofit organizations contractors in

- a manner that is inconsistent with this chapter, including but not necessarily limited to the following:
- “(1) section 10(a) of the Act of June 29, 1935, as added by title I of the Act of Aug. 14, 1946 (7 U.S.C. 427i(a); 60 Stat. 1085);
 - “(2) section 205(a) of the Act of Aug. 14, 1946 (7 U.S.C. 1624(a); 60 Stat. 1090);
 - “(3) section 501(c) of the Federal Mine Safety and Health Act of 1977 (30 U.S.C. 951(c); 83 Stat. 742);
 - “(4) section 106(c) of the National Traffic and Motor Vehicle Safety Act of 1966 (15 U.S.C. 1395(c); 80 Stat. 721);
 - “(5) section 12 of the National Science Foundation Act of 1950 (42 U.S.C. 1871(a); 82 Stat. 360);
 - “(6) section 152 of the Atomic Energy Act of 1954 (42 U.S.C. 2182; 68 Stat. 943);
 - “(7) section 305 of the National Aeronautics and Space Act of 1958 (42 U.S.C. 2457);
 - “(8) section 6 of the Coal Research Development Act of 1960 (30 U.S.C. 666; 74 Stat. 337);
 - “(9) section 4 of the Helium Act Amendments of 1960 (50 U.S.C. 167b; 74 Stat. 920);
 - “(10) section 32 of the Arms Control and Disarmament Act of 1961 (22 U.S.C. 2572; 75 Stat. 634);
 - “(11) subsection (e) of section 302 of the Appalachian Regional Development Act of 1965 (40 U.S.C. App. 302(e); 79 Stat. 5);
 - “(12) section 9 of the Federal Nonnuclear Energy Research and Development Act of 1974 (42 U.S.C. 5901); 88 Stat. 1878);
 - “(13) section 5(d) of the Consumer Product Safety Act (15 U.S.C. 2054(d); 86 Stat. 1211);
 - “(14) section 3 of the Act of April 5, 1944 (30 U.S.C. 323; 58 Stat. 191);
 - “(15) section 8001(c)(3) of the Solid Waste Disposal Act (42 U.S.C. 6981(c); 90 Stat. 2829);
 - “(16) section 219 of the Foreign Assistance Act of 1961 (22 U.S.C. 2179; 83 Stat. 806);
 - “(17) section 427(b) of the Federal Mine Health and Safety Act of 1977 (30 U.S.C. 937(b); 86 Stat. 155);
 - “(18) section 306(d) of the Surface Mining and Reclamation Act of 1977 (30 U.S.C. 1226(d); 91 Stat. 455);
 - “(19) section 21(d) of the Federal Fire Prevention and Control Act of 1974 (15 U.S.C. 2218(d); 88 Stat. 1548);
 - “(20) section 6(b) of the Solar Photovoltaic Energy Research Development and Demonstration Act of 1978 (42 U.S.C. 5585(b); 92 Stat. 2516);
 - “(21) section 12 of the Native Latex Commercialization and Economic Development Act of 1978 (7 U.S.C. 178(j); 92 Stat. 2533); and
 - “(22) section 408 of the Water Resources and Development Act of 1978 (42 U.S.C. 7879; 92 Stat. 1360).
- The Act creating this chapter shall be construed to take precedence over any future Act unless that Act specifically cites this Act and provides that it shall take precedence over this Act.
- “(b) Nothing in this chapter is intended to alter the effect of the laws cited in paragraph (a) of this section or any other laws with respect to the disposition of rights in inventions made in the performance of funding agreements with persons other than nonprofit organizations or small business firms.
 - “(c) Nothing in this chapter is intended to limit the authority of agencies to agree to the disposition of rights in inventions made in the performance of work under funding agreements with persons other than nonprofit organizations or small business firms in accordance with the Statement of Government Patent Policy issued on Aug. 23, 1971 (36 Fed. Reg. 16887), agency regulations, or other applicable regulations or to otherwise limit the authority of agencies to allow such persons to retain ownership of inventions. Any disposition of rights in inventions made in accordance with the Statement or implementing regulations, including any disposition occurring before enactment of this section, are hereby authorized.
 - “(d) Nothing in this chapter shall be construed to require the disclosure of intelligence sources or methods or to otherwise affect the authority granted to the Director of Central Intelligence by statute or Executive order for the protection of intelligence sources or methods.

Rights,
disposition

“§ 211. Relationship to antitrust laws

- “Nothing in this chapter shall be deemed to convey to any person immunity from civil or criminal liability, or to create any defenses to actions, under any antitrust law.”
- (b) The table of chapters for title 35, United States Code, is amended by adding immediately after the item relating to chapter 37 the following:
- “38. Patent rights in inventions made with Federal assistance.”
- SEC. 7. AMENDMENTS TO OTHER ACTS.—The following Acts are amended as follows:
- (a) Section 156 of the Atomic Energy Act of 1954 (42 U.S.C. 2186; 68 Stat. 947) is amended by deleting the words “held by the Commission or”.
 - (b) The National Aeronautics and Space Act of 1958 is amended by repealing paragraph (g) of section 305 (42 U.S.C. 2457(g); 72 Stat. 436).
 - (c) The Federal Nonnuclear Energy Research and Development Act of 1974 is amended by repealing paragraphs (g), (h), and (i) of section 9 (42 U.S.C. 5908 (g), (h), and (i); 88 Stat. 1889-1891).
- SEC. 8. (a) Sections 2, 4, and 5 of this Act will take effect upon enactment.
- (b) Section 1 of this Act will take effect on the first day of the seventh month beginning after its enactment and will apply to patents in force as of that date or issued thereafter.
 - (c) Section 3 of this Act will take effect on the first day of the first fiscal year beginning on or after one calendar year after enactment. However, until section 3 takes effect, the Commissioner may credit the Patent and Trademark Office appropriation account in the Treasury of the United States with the revenues from collected reexamination fees, which will be available to pay the costs to the Office of reexamination proceedings.

Disclosure.

35 USC 211.

(d) Any fee in effect as of the date of enactment of this Act will remain in effect until a corresponding fee established under section 41 of title 35, United States Code, or section 1113 of title 15, United States Code, takes effect.

Effective dates.

(e) Fees for maintaining a patent in force will not be applicable to patents applied for prior to the date of enactment of this Act.

35 USC 41 note.

(f) Sections 6 and 7 of this Act will take effect on the first day of the seventh month beginning after its enactment. Implementing regulations may be issued earlier.

(g) Sections 8 and 9 will take effect on the date of enactment of this Act.

SEC. 9. The Commissioner of Patents and Trademarks shall report to Congress, within two years after the effective date of this Act, a plan to identify, and if necessary develop or have developed, computerized data and retrieval systems equivalent to the latest state of the art which can be applied to all aspects of the operation of the Patent and Trademark Office, and particularly to the patent search file, the patent classification system, and the trademark search file. The report shall specify the cost of implementing the plan, how rapidly the plan can be implemented by the Patent and Trademark Office, without regard to funding which is or which may be available for this purpose in the future.

Computerized
data and
retrieval
system, report to

SEC. 10. (a) Section 101 of title 17 of the United States Code is amended to add at the end thereof the following new language:

"A 'computer program' is a set of statements or instructions to be used directly or indirectly in a computer in order to bring about a certain result."

Congress
35 USC 14 note.

(b) Section 117 of title 17 of the United States Code is amended to read as follows:

"§ 117. Limitations on exclusive rights: Computer programs

"Notwithstanding the provisions of section 106, it is not an infringement for the owner of a copy of a computer program to make or authorize the making of another copy or adaptation of that computer program provided:

"Computer
program."

17 USC 117.

17 USC 106

"(1) that such a new copy or adaptation is created as an essential step in the utilization of the computer program in conjunction with a machine and that it is used in no other manner,

or

"(2) that such new copy or adaptation is for archival purposes only and that all archival copies are destroyed in the event that continued possession of the computer program should cease to be rightful.

"Any exact copies prepared in accordance with the provisions of this section may be leased, sold, or otherwise transferred, along with the copy from which such copies were prepared, only as part of the lease, sale, or other transfer of all rights in the program. Adaptations so prepared may be transferred only with the authorization of the copyright owner."

(56)

**Public Law 97-247
97th Congress
An Act**

To authorize appropriations to the Patent and Trademark Office in the Department of Commerce, and for other purposes.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled. That there is authorized to be appropriated for the payment of salaries and necessary expenses of the Patent and Trademark Office to become available for fiscal year 1983, \$76,000,000, and in fiscal years 1984 and 1985 such sums as may be necessary as well as such additional or supplemental amounts as may be necessary, for increases in salary, pay, retirement, or other employee benefits authorized by law. Funds available under this section shall be used to reduce by 50 per centum the payment of fees under section 41 (a) and (b) of title 35, United States Code, by independent inventors and nonprofit organizations as defined in regulations established by the Commissioner of Patents and Trademarks, and by small business concerns as defined in section 3 of the Small Business Act and by regulations established by the Small Business Administration. When so specified and the the extent provided in an appropriation Act, any amount appropriated pursuant to this section and, in addition, such fees as shall be collected pursuant to title 35, United States Code, and the Trademark Act of 1946, as amended (15 U.S.C. 1051 et seq.), may remain available without fiscal year limitation.

15 USC 632.

SEC. 2. Notwithstanding any other provision of law, there is authorized to be appropriated for the payment of salaries and expenses of the Patent and Trademark Office, \$121,461,000 for the fiscal year ending September 30, 1982, and such additional or supplemental amounts as may be necessary for increases in salary, pay, retirement, or other employee benefits authorized by law.

SEC. 3. (a) Section 41(a) of title 35, United States Code, is amended to read as follows:

"(a) The Commissioner shall charge the following fees:

"1. On filing each application for an original patent, except in design or plant cases, \$300; in addition, on filing or on presentation at any other time, \$30 for each claim in independent form which is in excess of three, \$10 for each claim (whether independent or dependent) which is in

excess of twenty, and \$100 for each application containing a multiple dependent claim. For the purpose of computing fees, a multiple dependent claim as referred to in section 112 of this title or any claim depending therefrom shall be considered as separate dependent claims in accordance with the number of claims to which reference is made. Errors in payment of the additional fees may be rectified in accordance with regulations of the Commissioner.

Fees.

"2. For issuing each original or reissue patent, except in design or plant cases, \$500.

"3. In design and plant cases:

"a. On filing each design application, \$125.

"b. On filing each plant application, \$200.

"c. On issuing each design patent, \$175.

"d. On issuing each plant patent, \$250.

35 USC 112.

"4. On filing each application for the reissue of a patent, \$300; in addition, on filing or on presentation at any other time, \$30. for each claim in independent form which is in excess of the number of independent claims of the original patent, and \$10 for each claim (whether independent or dependent) which is in excess of twenty and also in excess of the number of claims of the original patent. Errors in payment of the additional fees may be rectified in accordance with regulations of the Commissioner.

"5. On filing each disclaimer, \$50.

"6. On filing an appeal from the examiner to the Board of Appeals, \$115; in addition, on filing a brief in support of the appeal, \$115, and on requesting an oral hearing before the Board of Appeals, \$100.

"7. On filing each petition for the revival of an unintentionally abandoned application for a patent or for the unintentionally delayed payment of the fee for issuing each patent, \$500, unless the petition is filed under sections 133 or 151 of this title, in which case the fee shall be \$50.

"8. For petitions for one-month extensions of time to take actions required by the Commissioner in an application:

"a. On filing a first petition, \$50.

"b. On filing a second petition, \$100.

"c. On filing a third or subsequent petition, \$200."

35 USC 133, 151.

(b) Section 41(b) of title 35, United States Code, is amended to read as follows:

"(b) The Commissioner shall charge the following fees for maintaining a patent in force:

"1. Three years and six months after grant, \$400.

"2. Seven years and six months after grant, \$800.

"3. Eleven years and six months after grant, \$1,200.

Unless payment of the applicable maintenance fee is received in the Patent and Trademark Office on or before the date the fee is due or within a grace period of six months thereafter, the patent will expire as of the end of such grace period. The Commissioner may require the payment of a surcharge as a condition of accepting within such six-month grace period the late payment of an application maintenance fee. No fee will be established for maintaining a design or plant patent in force."

Maintenance fees.

(c) Section 41(c) of title 35, United States Code, is amended to read as follows:

"(c)(1) The Commissioner may accept the payment of any maintenance fee required by subsection (b) of this section after the six-month grace period if the delay is shown to the satisfaction of the Commissioner to have been unavoidable. The Commissioner may require the payment of a surcharge as a condition of accepting payment of any maintenance fee after the six-month grace period. If the Commissioner accepts payment of a maintenance fee after the six-month grace period, the patent shall be considered as not having expired at the end of the grace period.

Expiration.

Surcharge.

"(2) No patent, the term of which has been maintained as a result of the acceptance of a payment of a maintenance fee under this subsection, shall abridge or affect the right of any person or his successors in business who made, purchased or used after the six-month grace period but prior to the acceptance of a maintenance fee under this subsection anything protected by the patent, to continue the use of, or to sell to others to be used or sold, the specific thing so made, purchased, or used. The court before which such matter is in question may provide for the continued manufacture, use or sale of the made, purchased, or used as specified, or for the manufacture, use or sale of which substantial preparation was made after the six-month grace period but before the acceptance of a maintenance fee under this subsection, and it may also provide for the continued practice of any process, practiced, or for the practice of which substantial preparation was made, after the six-month grace period but prior to the acceptance of a maintenance fee under this subsection, to the extent and under such terms as the court deems equitable for the protection of investments made or business commenced after the six-month grace period but before the acceptance of a maintenance fee under the subsection."

Maintenance fee, delayed payment.
Surcharge.

(d) Section 41(d) of title 35, United States Code, is amended to read as follows:

"(d) The Commissioner will establish fees for all other processing, services, or materials related to patents not specified above to recover the estimated average cost to the Office of such processing, services, or materials. The yearly fee for providing a library specified in section 113 of this title with uncertified printed copies of the specifications and drawings for all patents issued in that year will be \$50."

(e) Section 41(f) of title 35, United States Code, is amended to read as follows:

"(f) The fees established in subsections (a) and (b) of this section may be adjusted by the Commissioner on October 1, 1985, and every third year thereafter, to reflect any fluctuations occurring during the previous three years in the Consumer Price Index, as determined by the Secretary of Labor. Changes of less than 1 per centum may be ignored."

Fees.

(f) Subsection (a) of section 31 of the Trademark Act of 1946, as amended (15 U.S.C. 1113), is amended by deleting "Fees will be set and adjusted by the Commissioner to recover the aggregate 50 per centum of the estimated average cost to the Office of such processing. Fees for all other services or materials related to trademarks and other marks will recover the estimated average cost to the Office of performing the service or furnished the material."

(g) Section 42(c) of the title 35, United States Code, is amended by adding the following sentence at the end thereof: "Fees available to the Commissioner under section 31 of the Trademark Act

of 1946, as amended (15 U.S.C. 1113), shall be used exclusively for the processing of trademark registrations and for other services and materials related to trademarks.”

SEC. 4. Section 3(a) of title 35, United States Code is amended (1) by deleting the phrase “not more than fifteen”; and (2) by inserting the phrase “appointed under section 7 of this title” immediately after the phrase “examiners-in-chief”.

SEC. 5. Section 111 of title 35, United States Code, is amended to read as follows:

“SEC. 111. Application for patent shall be made, or authorized to be made, by the inventor, except as otherwise provided in this title, in writing to the Commissioner. Such application shall include (1) a specification as prescribed by section 112 of this title; (2) a drawing as prescribed by section 113 of this title; and (3) an oath by the applicant as prescribed by section 115 of this title. The application must be accompanied by the fee required by law. The fee and oath may be submitted after the specification and any required drawing are submitted, within such period and under such conditions, including the payment of a surcharge, as may be prescribed by the Commissioner. Upon failure to submit the fee and oath within such prescribed period, the application shall be regarded as abandoned, unless it is shown to the satisfaction of the Commissioner that the delay in submitting the fee and oath was unavoidable. The filing date of an application shall be the date on which the specification and any required drawing are received in the Patent and Trademark Office.”

35 USC 13.

Adjusted fees.

SEC.6. (a) Section 116 of title 35, United States Code, is amended (1) by deleting the phrase “Joint inventors” from the title and inserting in its place “Inventors”; and (2) in the third paragraph, by deleting the phrase “a person is joined in an application for patent as joint inventor through error, or a joint inventor is not included in an application through error” and inserting in its place the phrase “through error a person is named in an application for patent as the inventor, or through error an inventor is not named in an application”.

Applications.

(b) Section 256 of title 35, United States Code, is amended to read as follows:

“§ 256. Correction of named inventor

35 USC 112.

35 USC 113.

35 USC 115.

“Whenever through error a person is named in an issued patent as the inventor, or through error an inventor is not named in an issued patent and such error arose without any deceptive intention on his part, the Commissioner may, on application of all the parties and assignees, with proof of the facts and such other requirements as may be imposed, issue a certificate correcting such error.

“The error of omitting inventors or naming persons who are not inventors shall not invalidate the patent in which such error occurred if it can be corrected as provided in this section. The court before which such matter is called in question may order correction of the patent on notice and hearing of all parties concerned and the Commissioner shall issue a certificate accordingly.”

Filing date.

SEC. 7. Section 6 of the title 35, United States Code, is amended by deleting paragraph (d) thereof.

SEC. 8. (a) Section 8(a) of the Trademark Act of 1946, as amended (15 U.S.C. 1058(a)), is amended (a) by deleting the word “still”; and (2) by inserting the phrase “in commerce” immediately after the word “use”.

(b) Section 8(b) of the Trademark Act of 1946, as amended (15 U.S.C. 1058(b)), is amended (1) by deleting the word “stille”; and (2) by inserting the phrase “in commerce” immediately after the word “use”.

SEC. 9. (a) Section 13 of the Trademark Act of 1946, as amended (15 U.S.C. 1063), is amended (1) by deleting the phrase “a verified” and inserting in its place the word “an”; (2) by adding the phrase “when requested prior to the expiration of an extension” immediately after the word “cause”; and (3) by deleting the fourth sentence.

(b) Section 14 of the Trademark Act of 1946, as amended (15 U.S.C. 1064), is amended by deleting the word “verified”.

SEC. 10. Section 15 of the Trademark Act of 1946, as amended (15 U.S.C. 1065), is amended by deleting the phrase “the publication” and inserting in its place the word “registration”.

SEC. 11. The first sentence of section 16 of the Trademark Act of 1946, as amended (15 U.S.C. 1066), is amended to read as follows: “Upon petition showing extraordinary circumstances, the Commissioner may declare that an interference exists when application is made for the registration of a mark which so resembles a mark previously registered by another, or for the registration of which another has previously made application, as to be likely when applied to the goods or when used in connection with the services of the applicant to cause confusion or mistake or to deceive.”

SEC. 12. Section 21 of title 35, United States Code, is amended—

(1) by deleting the phrase “Day for taking action falling on Saturday, Sunday, or holiday” from the title and inserting in its place the phrase “Filing date and day for taking action”;

(2) by inserting the following as subsection (a):

“(a) The Commissioner may by rule prescribe that any paper or fee required to be filed in the Patent and Trademark Office will be considered filed in the Office on the date on which it was deposited with the United States Postal Service or would have been deposited with the United States Postal Service but for postal service interruptions or emergencies designated by the Commissioner.”;

(3) by designating the existing paragraph as subsection (b); and

(4) by inserting the word “federal” in subsection (b), as designated above, immediately after the word “a”.

SEC. 13. Section 6(a) of title 35, United States Code, is amended (1) by deleting the word “and”, third occurrence, and inserting in its place a comma; (2) by inserting the phrase “, or exchanges of items or services” immediately after the word “programs”; and (3) by inserting the phrase “or the administration of the Patent and Trademark Office” immediately after the word “law”, second occurrence.

SEC. 14. (a) Section 115 of title 35, United States Code, is amended by (1) deleting the phrase “shall be” and inserting in its place the word “is”; and (2) inserting the following immediately after the phrase “United States”, third occurrence: “, or apostille of an official designated by a foreign country which, by treaty or convention, accords like effect to apostilles of designated officials in the United States”.

Filing Date

(b) Section 261 of title 35, United States Code, is amended, in the third paragraph, by inserting the following immediately after the phrase "United States", third occurrence: " or apostille of an official designated by a foreign country which, by treaty or convention, accords like effect to apostilles of designated officials in the United States".

(c) Section 11 of the Trademark Act of 1946, as amended (15 U.S.C. 1061), is amended by (1) deleting the phrase "shall be", first occurrence, and inserting in its place the word "is"; and (2) inserting the following immediately after the phrase "United States", third occurrence: " or apostille of an official designated by a foreign country which, by treaty or convention, accords like effect to apostilles of designated officials in the United States".

Effective dates.

SEC. 15. Section 13 of title 35, United States Code, is amended by deleting "(a)" and inserting in its place "(d)".

SEC. 16. Section 173 of title 35, United States Code, is amended to read as follows: "Patents for designs shall be granted for the term of fourteen years."

SEC. 17. (a) Sections 1, 2, 4, 7, and 13 through 15 of this Act shall take effect on the date of enactment of this Act. Sections 3 and 16 of this Act shall take effect on Oct. 1, 1982. The maintenance fees provided for in section 3(b) of this Act shall not apply to patents applied for prior to the date of enactment of this Act. Each patent applied for on or after the date of enactment of this Act shall be subject to the maintenance fees established pursuant to section 3(b) of this Act or to maintenance fees hereafter established by law, as to the amounts paid and the number and timing of the payments.

35 USC 41 note.

(b)(1) Title 35, United States Code, is amended by inserting after section 293 the following new section of chapter 29:

"§ 294. Voluntary arbitration

"(a) A contract involving a patent or any right under a patent may contain a provision requiring arbitration of any dispute relating to patent validity or infringement arising under the contract. In the absence of such a provision, the parties to an existing patent validity or infringement dispute may agree in writing to settle such dispute by arbitration. Any such provision or agreement shall be valid, irrevocable, and enforceable, except for any grounds that exist at law or in equity for revocation of a contract.

"(b) Arbitration of such disputes, awards by arbitrators and confirmation of awards shall be governed by title 9, United States Code, to the extent such title is not inconsistent with this section. In any such arbitration proceeding, the defenses provided for under section 282 of this title shall be considered by the arbitrator if raised by any party to the proceeding.

"(c) An award by an arbitrator shall be final and binding between the parties to the arbitration but shall have no force or effect on any other person. The parties to an arbitration may agree that in the event a patent which is the subject matter of an award is subsequently determined to be invalid or unenforceable in a judgment rendered by a court to competent jurisdiction from which no appeal can or has been taken, such award may be modified by any court of competent jurisdiction upon application by any party to the arbitration. Any such modification shall govern the rights and obligations between such parties from the date of such modification.

"(d) When an award is made by an arbitrator, the patentee, his assignee or licensee shall give notice thereof in writing to the Commissioner. There shall be a separate notice prepared for each patent involved in such proceeding. Such notice shall set forth the names and addresses of the parties, the name of the inventor, and the name of the patent owner, shall designate the number of the patent, and shall contain a copy of the award. If an award is modified by a court, the party requesting such modification shall give notice of such modification to the Commissioner. The Commissioner shall, upon receipt of either notice, enter the same in the record of the prosecution of such patent. If the required notice is not filed with the Commissioner, any party to the proceeding may provide such notice to the Commissioner.

Awards.
9 USC 1 *et seq.*
35 USC 282.

"(e) The award shall be unenforceable until the notice required by subsection (d) is received by the Commissioner."

Modification.

(2) The analysis for chapter 29 of title 35 of the United States Code is amended by adding at the end the following:

"294. Voluntary arbitration."

(c) Sections 5, 6, 8 through 12, and 17(b) of this Act shall take effect six months after enactment.

Approved Aug. 27, 1982.

Notices.
Modification.

LEGISLATIVE HISTORY—H.R. 6260

HOUSE REPORT No. 97-542 (Comm. on the Judiciary).
CONGRESSIONAL RECORD, Vol. 128 (1982):

June 8, considered and passed House.
Aug. 12, considered and passed Senate.

WEEKLY COMPILATION OF PRESIDENTIAL DOCUMENTS, Vol. 18, No. 36 (1982):
Aug. 28, Presidential statement.

PATENT AND TRADEMARK OFFICE AUTHORIZATION

May 17, 1982.—Committed to the Committee of the Whole House on the State of the Union and ordered to be printed

Mr. KASTENMEIER, from the Committee on the Judiciary, submitted the following
REPORT

[To accompany H.R. 6260]

[Including cost estimate of the Congressional Budget Office]

The Committee on the Judiciary, to whom was referred the bill (H.R. 6260) to authorize appropriations to the Patent and Trademark Office in the Department of Commerce, and for other purposes, having considered the same, report favorably thereon with an amendment and recommend that the bill as amended do pass.

The amendment strikes out all after the enacting clause of the bill and inserts a new text which appears in italic type in the reported bill.

PURPOSE OF THE BILL

The purpose of H.R. 6260 is to authorize appropriations for the Patent and Trademark Office for fiscal years 1983 through 1985.

STATEMENT

The Subcommittee on Courts, Civil Liberties and the Administration of Justice previously held two days of hearings on the legislation, receiving testimony from a representative group of witnesses including the Commissioner of Patents and Trademarks, the American Bar Association Section of Patent, Trademark and Copyright Law, the American Patent Law Association, the Patent, Trademark and Copyright Section of the State Bar of Virginia, the United States Trademark Association and the General Patent Counsel of the General Electric Corporation.

H.R. 6260 reflects the recommendation of the Administration with three modifications as follows. First, the Administration proposal authorized the Commissioner of Patents and Trademarks to establish fees administratively. The subcommittee approved an amendment to set forth specific fees in the statute and limited the Commissioner's authority to raise fees. Second, the Administration recommended that user fees recover 100% of the costs of actual processing of patents and trademarks. The subcommittee amended the bill to reduce by 50% patent filing and maintenance fees for individual inventors, small businesses and not for profit institutions. The effect of the amendment is to increase by \$8 million the authorized appropriation which would have been provided under the original Administration request. Third, the subcommittee adopted a recommendation of the Commissioner of Patents and Trademarks, the American Bar Association and a coalition of corporate patent counsel permitting arbitration of patent disputes.

H.R. 6260 was considered by the Full Committee on the Judiciary on May 11, 1982 and was approved as reported by the subcommittee with an amendment offered by Mr. Frank described below.

SYNOPSIS OF H.R. 6260

SECTIONS 1—3

Authorizes the Patent and Trademark Office for fiscal year 1983 at an appropriations level of \$76,000,000 and for fiscal years 1984 and 1985 such sums as may be necessary. This would be augmented by additional fee income under the bill of approximately \$79 million for a total budget of \$155 million. In fiscal year 1982 the Patent and Trademark Office was authorized at a level of \$118,961,000 of which \$29,600,000 was provided through fee income. Fiscal year 1983 will be the first year in which fee income under P.L. 96-517 will be credited to the Patent and Trademark Office without being counted as part of its authorized appropriation. Had this new accounting procedure been applied to fiscal year 1982 the authorization and appropriation for the Patent and Trademark Office would have been \$89 million. This constitutes the actual level of taxpayer support of the Office. Thus, H.R. 6260 authorizes the expenditure of tax revenue in fiscal 1983 to support the Patent and Trademark Office at a level \$21 million lower than for fiscal 1982. H.R. 6260 proposes to double current fees as the means of making up for the difference between a lower level of taxpayer support and an increased total budget. Further, maintenance fees which were first authorized in P.L. 96-517 and which will not begin to be collected until fiscal year 1986 (Oct. 1, 1985) will also be doubled over the amounts provided for under P.L. 96-517.

The overall objective of H.R. 6260 is to provide for increased user support for the Patent and Trademark Office costs associated with the actual processing of patent applications by fiscal year 1996. The fee schedule is designed to return to the government 100% of actual costs. However, an amendment to the original Administration proposal adopted by the subcommittee would reduce by half the fees for individuals, small businesses and nonprofit inventors. At the present time less than 25% of the actual costs of processing patent applications are supported by fee revenue and under P.L. 96-517, which becomes effective on Oct. 1, 1982, this amount will gradually begin to rise but will only reach 50% of actual costs in 1996.

The amendment offered by Mr. Frank and approved by the Committee modifies that portion of Section 3 of H.R. 6260 dealing with Trademark fees. Public Law 96-517 (35 United States Code, section 31(a)) provides, "Fees will be set and adjusted by the Commissioner to recover in aggregate 50 per centum of the estimated average cost to the Office of such processing. Fees for all other services or materials related to trademarks and other marks will recover the estimated average cost . . . of performing the service or furnishing the material."

The Administration requested that the figure, "50 per centum", be changed to "100 per centum", thus mandating full recovery to the Treasury of all costs associated with processing trademarks. An amendment offered during subcommittee consideration of the legislation proposed to reduce fee generated revenue supporting processing of trademarks to less than the 100 per centum recovery level. The amendment was not agreed to. The author of the amendment, Mr. Frank, then proposed

to amend the law to provide a statutory fee schedule which would return revenue to the Patent and Trademark Office at a level designed to recover 100 per centum of costs. However, following consultations with interested parties, Mr. Frank modified his amendment simply to repeal those portions of P.L. 96-517 which mandate a specified level of cost recovery for the processing of trademark registrations. Thus, the level of cost recovery for processing of trademark registrations will be within the discretion of the Commissioner. The Committee is aware of the concerns of users of the Trademark registration system, however, and intends to exercise vigorous oversight with respect to the Commissioner to ensure that fees remain at a reasonable level and that trademark registrations are processed in an efficient and cost effective manner. As part of this oversight, the Committee recommends the following fee structure to the Commissioner for Fiscal Year 1983.

Type of fee:	Proposed fee
Application filing fee per class	\$175
Renewal fee	300
Late renewal	100
Section 12(c) claim	100
New certificate	100
Certificate of correction	100
Disclaimer to registration	100
Amendment to registration	100
Per class combines section 8 and 15 affidavit	200
Per class section 8 affidavit alone	100
Per class section 15 affidavit alone	100
All petitions to Commissioner	100
Cancellation opposition per class	200
TTAB appeal	100
Certified copies	10
Copies of trademarks	1
Assignments	(¹)

¹100 plus for each mark in addition to 1.

Section 3(d) also permits the Commissioner of Patents to accept late payment of maintenance fees where it is established that the delay in payment was unavoidable.

Section 4 permits the Commissioner of Patents and Trademarks to appoint temporary examiners in chief for the Board of Patent Appeals to deal more flexibly with workload.

Section 5 permits late filing of the oath and fee accompanying submission of specifications and drawings which accompany patent claims.

Section 6 permits greater flexibility in correcting mistakes in the naming of inventors on a patent application.

Section 7 allocates funds from the Patent and Trademark Office to the Department of State to pay the financial obligations of administering the patent Cooperation Treaty.

Section 8 clarifies the Trademark law with respect to what constitutes use of a mark "in commerce".

Section 9 deletes the burdensome technical requirement that trademark oppositions be verified.

Section 10 makes the date of registration rather than the date of publication the crucial date for purposes of establishing the incontestability of a trademark. This eliminates an ambiguity in the present law.

Section 11 limits the declaration of interferences under the trademark law to situations where extraordinary circumstances exist.

Section 12 authorizes the Commissioner of the Patent and Trademark Office the flexibility to deal with problems of delay in filing due to postal service breakdowns.

Section 13 permits the Commissioner of Patents to enter into cooperative studies, programs, exchanges and similar ventures associated with the administration of the Patent Office.

Section 14 conforms U.S. Patent and Trademark Law to a recent international treaty governing diplomatic or consular legalization of documents.

Section 15 corrects a mistaken citation in P.L. 96-517.

Section 16 creates a uniform term for design patents.

Section 17 establishes the effective dates for provisions of the Act. Increased filing fees would apply to all applications made on or after the date of enactment of H.R. 6260.

Section 18 permits voluntary arbitration of patent disputes.

SECTION-BY -SECTION ANALYSIS

SECTION 1

This section authorizes appropriations for the Patent and Trademark Office for the payment of salaries and necessary expenses of the Office. For Fiscal Year 1983, this section authorizes appropriations of \$76,000,000, and in fiscal years 1984 and 1985 such sums as may be necessary, as well as such additional and supplemental amounts as may be necessary to cover any increases in salary, pay, retirement, or employee benefits which may be authorized by law. Funds made available by these appropriations are to be used to reduce by 50 per centum the amount of the fees to be paid under title 35, United States Code, section 41(a) and (b) by independent inventors and nonprofit organizations as defined in regulations established by the Commissioner of Patents and Trademarks, and by small business concerns as defined in section 3 of the Small Business Act and by regulations established by the Small Business Administration.

In addition, fees collected pursuant to title 35, United States Code, and the Trademark Act of 1946, as amended (15 U.S.C. 1051 et seq.), will augment the authorized appropriation to provide the resources needed to conduct the operations of the Office for fiscal year 1983. The total resources for the Office in fiscal year 1983, that is, the amount appropriated pursuant to this section plus fees collected pursuant to the patent and trademark laws, which will be available to the Office,

are estimated to be \$154,934,000. The corresponding levels for fiscal year 1984 and fiscal year 1985 are estimated in the President's Budget to be \$167 million and \$176 million, respectively. Any additional amounts to cover increases in salary, pay, retirement, or other employee benefits which may be authorized by law will be in addition to, and will therefore increase, those program levels. Finally, any funds appropriated pursuant to this section and all fees collected, when specified in an appropriation act, will remain available without any fiscal year limitation.

SECTION 2

This section provides that, notwithstanding any other provision of law, there is authorized to be appropriated to the Patent and Trademark Office for fiscal year 1982, \$121,461,000 and such additional or supplemental amounts as may be necessary for increases in salary, pay, retirement, or other employee benefits authorized by law. This section increases the amount authorized for the Patent and Trademark Office by 2.5 million over that authorized in Public law 97-35. The President is recommending a supplemental appropriation of \$2,500,000 for the Patent and Trademark Office for fiscal year 1982 in order to carry out the program recommendations included in his fiscal year 1983 Budget.

SECTION 3

This section establishes certain statutory fees which are to be charged by the Commissioner and authorizes the Commissioner to establish other fees whose amounts are not specifically set. Thus, the major routine fees which are applicable to patents and patent application processing are established (e.g., filing, issuance, and maintenance fees). The Commissioner is authorized to establish fees for all other processing, services, or materials related to patents which are not specifically established by statute. The processing and service fees, which would be established at a level to recover the estimated average costs to the Office. A more specific discussion of the various provisions of this section is set forth below.

Section 3(a) amends section 41(a) of title 35 to provide the amounts of the fees for filing and issuance of patent applications. In addition, the section includes provisions for increasing the filing fees due to increased complexities presented by certain applications, e.g., applications containing more than a specified number of claims and any application containing a multiple dependent claim. The section also provides that fees will be charged when the number of claims is increased above the specified number or when a multiple dependent claim is first presented, whether on filing or at a later point in processing.

Under section 41(a)1, the filing fee for an original patent, except in design or plant cases, is \$300. In addition, on filing or on presentation at any other time, \$30 is due for each claim in independent form which is in excess of three, \$10 is due for each claim (whether independent or dependent) which is in excess of twenty, and \$100 is due for each application containing a multiple dependent claim. The latter fee is a one-time charge per application due the first time a multiple dependent claim is presented for examination. For the purpose of computing fees, a multiple dependent claim as referred to in section 112 of title 35, United States Code, or any claim depending therefrom, will be considered as separate dependent claims in accordance with the number of claims to which reference is made. Under the section, errors in payment of the additional fees may be rectified in accordance with regulations of the Commissioner. This will enable the Commissioner to establish regulations whereby patent applications may correct, without prejudice, errors in payment of the additional fees, i.e., those in addition to the basic fees established.

Under section 41(a)2, the fee for issuing all original and reissue patents, except in design or plant cases, would be a uniform amount of \$500. No supplemental issue fees are required.

Section 41(a)3 establishes fixed fees for filing applications for, and issuance of design and plant patents. For design patent cases, the filing fee would be \$200 and the issue fee \$250.

Section 41(a)4 relates to fees in reissue cases and establishes a fee of \$300 for filing each application for the reissue of a patent. In addition, on filing or on presentation at any other time, \$30 is due for each claim in independent form which is in excess of the number of independent claims of the original patent, and \$10 is due for each claim (whether independent or dependent) which is in excess of twenty and also in excess of the number of claims of the original patent. Errors in payment of the additional fees may be rectified in accordance with regulations of the Commissioner.

Under section 41(a)5, a fee of \$50 would be established for filing each disclaimer in a patent or patent application.

Section 41(a)6 establishes a fee due on filing an appeal from the examiner to the Board of Appeals of \$115. In addition, a fee of \$115 is due on filing a brief in support of the appeal, and a fee of \$100 is due for requesting an oral hearing before the Board of Appeals.

Section 41(a)7 establishes two different fees for filing petitions with different standards to revive abandoned patent applications. The same two fees are applicable to petitions to accept the delayed payment of the fee for issuing a patent. The fees set forth in this section are due on filing the petition. Since the section provides for two alternative fees with different standards, the section would permit the applicant seeking revival or acceptance of a delayed payment of the fee for issuing a patent to choose one or the other of the fees and standards under such regulations as the Commissioner may establish. Under the section the Commissioner could establish time limits within which petitions under each of the different fees and standards can be filed. The section establishes a fee of \$500 for filing each petition for revival or for acceptance of the delayed payment of an issue fee where the abandonment or the failure to pay the issue fee is unintentional. In order to prevent abuse and injury to the public the Commissioner could require a terminal disclaimer equivalent to the period of abandonment and could require applicants to act promptly after becoming aware of the abandonment. The

section establishes a fee of \$50 for filing a petition under sections 133 or 151 of title 35 in accordance with standards presently in effect requiring that the delay resulting in the abandonment, or the delay in payment of the issue fee, be unavoidable. Under this section a petition accompanied by either a fee of \$500 or a fee of \$50 would not be granted where the abandonment or the failure to pay the fee for issuing the patent was intentional as opposed to being unintentional or unavoidable. This section would permit the Commissioner to have more discretion than present law to revive abandoned applications and accept late payment of the fee for issuing a patent in appropriate circumstances.

Section 41(a)8 establishes fees for filing of petitions for extensions of time. Various time periods are set by the Office for taking actions on matters relating to patent applications. These time periods are set pursuant to statute or by regulations established by the Commissioner under the authority granted to the Commissioner by statute. This section would provide for fees for filing petitions to extend the time periods set pursuant to statute or by regulations for taking action within any limitations set by statute.

A fee of \$50 is established for filing a request for a first one month extension of time, an additional fee of \$100 for filing a request for a second one month extension of time which would expire two months after the end of the time period set for taking action, and an additional fee of \$200 for filing a request for a third one month extension of time which would expire three months after the end of the time period set for taking action. A subsequent or fourth extension could be requested if additional time was available under the statute. In no case could a period be extended beyond the maximum time set by statute.

The Commissioner may issue regulations providing when, within any maximum period permitted by statute, petitions for extensions of time, and the required fee therefor, may be filed. This section does preclude the Commissioner from waiving the fee for filing a petition for an extension of time where the Office extends the period due to equity considerations or sufficient cause.

Section 41(b) provides that the Commissioner charge the following fees for maintaining a patent other than a design or plant patent, in force: at three years and six months after grant, \$400; at seven years and six months after grant, \$800; and at eleven years and six months after grant, \$1,200. Unless payment of the applicable maintenance fee is received in the Patent and Trademark Office on or before the date the fee is due or within a grace period of six months thereafter, the patent will expire as of the end of such grace period. The Commissioner may require the payment of a surcharge as a condition of accepting within such six-month grace period the late payment of a maintenance fee.

In order to avoid an inequitable loss of patent rights, the Commissioner is given the authority to accept payment of any maintenance fee after the six-month grace period if it is established that the delay in payment was unavoidable. It is intended that the Commissioner will issue regulations establishing guidelines for acceptance of late payment. After the expiration of a reasonable period of time, the patentee would bear a heavy burden of proof that the delay was unavoidable. A surcharge may be imposed by the Commissioner as a precondition to acceptance of a late fee. This surcharge may be in addition to any surcharge imposed for payment during the grace period.

A provision is included to protect the rights of one who began using or who took steps to begin use of a patent which expired for failure to pay a maintenance fee and which was subsequently reestablished by acceptance of the late payment. The intervening rights provision in section 41(c)(2) is similar to the intervening rights provision in 35 U.S.C. 252 concerning reissued patents.

Section 41(d) provides that the Commissioner establish fees for all other processing services, or materials related to patents not specified in section 41 at an amount calculated to recover the estimated average cost to the Office of such processing, services, or materials. Such processing and other services includes, but is not limited to, the processing of various petitions desiring certain actions to be taken regarding patent applications, recording of assignments, reexamination of patents and the processing of international applications. Fees for materials include the price of patent copies, certifications and other copying services. The yearly fee for providing a library specified in section 13 of title 35 with uncertified copies of the specifications and drawings for all patents issued in that year is set at \$50.

Section 41(f) provides that the fees established in subsections (a) and (b) of section 41 may be adjusted by the Commissioner on Oct. 1, 1985, and every third year thereafter, to reflect any fluctuations occurring during the previous three years in the Consumer Price Index, as determined by the Secretary of Labor. Changes of less than one per centum may be ignored by the Commissioner in making such adjustments.

Subsection (a) of section 31 of the Trademark Act of 1946, as amended (15 U.S.C. 1113), is being changed to grant the Commissioner discretion to establish the level of recovery of office costs related to trademarks. It is expected that the Commissioner will set the fees in a way that the filing fee will be kept as low as possible to foster use of the Federal registration system. This may require that other fees for services or materials related to trademarks recover more than their actual estimated cost in order that the Commissioner achieve in the aggregate adequate cost recovery for the entire trademark operation.

A provision is inserted in section 42(c) of title 35 in order to ensure that the trademark fees collected are used to fund trademark operations only and not the processing of patent applications.

SECTION 4

Section 3 of title 35 is amended by deleting specific reference to the number of examiners-in-chief in the first sentence. Elimination of the upper limit on the number of permanent members of the Board of Appeals would provide greater flexibility in filling most of its personnel needs, thereby avoiding an excess of examiner details. The authority to appoint acting examiners-in-chief, however, is maintained in order that temporary fluctuations in the workload of the Board may be accommodated.

SECTION 5

Under revised section 111 of title 35, the filing date of an application would be that on which the specification and any required drawings are received by the Patent and Trademark Office. The oath or declaration and filing fee could be submitted at such later time as established by the Commissioner, without any loss of the original filing date. Under the amendment, an applicant could either file the oath or declaration (including the applicant's signature) and fee together with an application or submit them at a later time as determined by the Commissioner.

The section would also authorize the imposition of a surcharge as a condition for accepting filing of the oath of payment of the filing fee after the filing date of the application. Since an application filed without the oath or declaration would not be signed or "made" by the applicant, the amendment permits a patent attorney or agent, authorized by the applicant, to submit the specification and drawings for the purpose of obtaining a filing date. Should the applicant, however, fail to file the oath or declaration, or pay the filing fee within the time limits set by the Commissioner, the application would be regarded as having been abandoned.

SECTION 6

The third paragraph of section 116 of title 35 is amended to enlarge the possibilities for correcting misnamed inventive entities. As a consequence, correction would be permitted also in cases where the person originally named as inventor was in fact not the inventor of the subject matter contained in the application. If such error occurred without any deceptive intention on the part of the true inventor, the Commissioner would have the authority to substitute the true inventor for the erroneously named person. Although probably rarer, instances such as changes from a mistakenly identified sole inventor to a different, but actual, joint inventors, conversions from erroneously identified joint inventors to different but actual, joint inventors, and conversions from erroneously identified joint inventors to a different, but actual, sole inventor would also be permitted. In each instance, however, the Commissioner must be assured of the presence of innocent error, without deceptive intention on the part of the true inventor or inventors, before permitting a substitution of a true inventor's name.

The ability to receive a filing date based on a specification and drawings without signature as set forth in revised section 111 of title 35, and to file the oath or declaration and pay the filing fee within such period as determined by the Commissioner is also available to joint inventors.

Section 256 of title 35, which is a companion to section 116, would be amended to similarly enlarge the possibilities for correction of misnamed inventors in issued patents.

SECTION 7

Section 6(d) of title 35, which provides for the allocation of appropriated Patent and Trademark Office funds to the Department of State for payment of United States financial obligations under the Patent Cooperation Treaty, is deleted. The Department of State has traditionally assumed responsibility for financial obligations for international agreements to which the United States adheres.

SECTION 8

Section 8(a) of the Trademark Act is amended to clarify that the continued use required to be shown in the sixth year be use "in commerce". Although it is believed by some that omission of the words "in commerce" may have been inadvertent in the 1946 Act, this section has been interpreted so that use in a foreign country, or use in intrastate commerce, is sufficient. Such interpretation is fundamentally in conflict with other requirements of the Act.

Section 8(b) of the Act is also amended to clarify that the continued use required to be shown in the sixth year be use "in commerce". Although it is believed by some that omission of the words "in commerce" may have been inadvertent in the 1946 Act, this section has been interpreted so that use in a foreign country, or use in intrastate commerce, is sufficient. Such interpretation is fundamentally in conflict with other requirements of the Act.

Section 8(b) of the Act is also amended to clarify that the continued use required to be shown in the sixth year be use "in commerce" for registrations published under section 12(c) of the Act. (This pertains to registrations issued under the Act of Mar. 3, 1881 and the Act of Feb. 20, 1905).

The word "still" has been deleted from section 8(a) and 8(b). Thus, the owner of a registration issued on the basis of a foreign registration under the provisions of section 44(e) of the Act will have to submit an affidavit to the effect that the mark is in use in commerce. Since the mark need not be used in commerce when it is registered, the requirement cannot be required to state that it is "still" in such use.

SECTION 9

Section 13 of the Trademark Act is amended to delete the requirement that an opposition be verified. The sentence which allowed an unverified application to be verified at a later date has been deleted. In addition, a phrase has been added to make it clear that any subsequent extension of time to file an opposition, beyond the first extension, must be requested before the end of the preceding extension.

Section 14 of the Trademark Act would also be amended to delete the requirement that a petition to cancel a registration be verified.

SECTION 10

Section 15 of the Trademark Act is amended to change the term "the publication" to "registration" in the first sentence. This change makes the date of registration rather than the date of publication

the crucial date for purposes of incontestability. It will also make section 15 consistent with sections 22 and 33 of the Act.

SECTION 11

Section 16 of the Trademark Act is amended to limit the declaration of interferences to those situations where a petition to the Commissioner shows that extraordinary circumstances exist, the rights of the parties can be determined adequately by the existing opposition and cancellation procedures. Additionally, if an interference is declared between an application and a registration and the applicant wins, a cancellation must still be initiated against the registration.

SECTION 12

A new subsection (a) has been added to section 21 of title 35 to authorize, but not to require, the Commissioner of Patents and Trademarks to give as the filing date of any paper or fee which is required to be filed in the Patent and Trademark Office the date on which the paper or fee was deposited with the United States Postal Service. The Commissioner may also give as the filing date of any paper or fee which was required to be filed in the Patent and Trademark Office the date it would have been deposited with the United States Postal Service but for postal service interruptions or emergencies which the Commissioner designates. The requirements governing whether any given paper or fee may be given the filing date of the day on which it was, or would have been deposited with the United States Postal Service will be set forth in regulations established by the Commissioner.

Section 21(b) of title 35 is identical to existing section 21 with two minor amendments. The word "federal" has been inserted before the phrase "holiday within the District of Columbia" to clarify the nature of the holiday.

SECTION 13

This section clarifies the authority of the Commissioner in section 6(a) of title 35 to enter into a wide range of cooperative agreements concerning the patent and trademark laws or the administration of the Patent and Trademark Office. These agreements are in addition to the exchange of publications authorized in 35 U.S.C. 11(b) and 12. These cooperative agreements may take the form of studies, programs, exchanges, and other similar ventures. Thus, the Patent and Trademark Office could, for example, exchange patent copies, non-patent literature, tapes or services in return for goods or services of value to the Patent and Trademark Office.

SECTION 14

The amendments of 35 U.S.C. 115 and Section 11 of the Trademark Act of 1946 recognize the Hague "Convention Abolishing the Requirement of Legalization for Foreign Public Documents" which entered into force in the United States on Oct. 15, 1981. The Convention abolishes the requirement of diplomatic or consular legalization for foreign public documents which are sworn to or acknowledged by a notary public in any of the countries adhering to the Convention. For documents executed by a notary public of all other foreign countries, diplomatic or consular legalization will still be required.

The amendment of 35 U.S.C. 261 is intended to give affirmative effect to acknowledgments executed pursuant to the Hague Convention.

SECTION 15

This section corrects an incorrect citation. Public Law 96-517 amended section 41 of title 35, United States Code, in a way which eliminated 35 U.S.C. § 41(a)(9). Unfortunately, section 13 of title 35, United States Code, was not amended accordingly by Public Law 96-517. This section corrects that oversight.

SECTION 16

This section sets a uniform term of fourteen years for all design patents.

SECTION 17

Sections 17(a) and (c) specify the effective dates of the Act. Section 17(a) also specifies that the maintenance fees provided for in section 3(b) of this Act will only apply to patents in which the application was filed on and after the date of enactment or to maintenance fees later established by law.

Section 17(b) adds a section to title 35 providing for the voluntary arbitration of patent disputes by the parties to the dispute. The section requires that the Commissioner be notified in writing of an award made by an arbitrator or modified by a court. Such notification will be entered in the record of the prosecution of the patent.

At present, agreements to arbitrate some aspects of disputes arising under patent licenses are enforceable by the courts; however, there have been court decisions that have disapproved arbitration of disputes concerning patent validity or infringement. In this regard, see, for example, *Zip Mfg. Co. v. Pep Mfg. Co.* 44 F.2d 184, 7 U.S.P.Q. 62 (D. Del. 1930) and *Beckman Instruments, Inc. v. Technical Developments Corp.* 433 F.2d 55, 167 U.S.P.Q. 10 (7th Cir. 1965).

Partly as a reaction to those decisions, during the 93rd Congress both the Department of Commerce and the Department of Justice endorsed a provision specifically authorizing arbitration of validity and infringement disputes. This provision, included in an omnibus patent law revision bill, S. 2504, was never enacted due to the many controversial aspects of that legislation.

In the view of the Committee, a statutory authorization of voluntary agreements to arbitrate validity and infringement disputes would benefit both the parties to these disputes and the public.

Statutory endorsement of arbitration agreements would assure the parties that they could avail themselves of the numerous advantages of arbitration without the possibility of having to reargue the dispute in court. The advantages of arbitration are many: it is usually cheaper and faster than litigation; it can have simpler procedural and evidentiary rules; it normally minimizes hostility and is less disruptive of ongoing and future business dealings among the parties; it is often more flexible in regard to scheduling of times and places of hearings and discovery devices; and, arbitrators are frequently better versed than judges and juries in the area of trade customs and the technologies involved in these disputes.

The enforcement of voluntary arbitration provisions would serve the public in two ways. First, the availability of arbitration with its numerous advantages will enhance the patent system and thus will encourage innovation. This view is supported by the Committee for Economic Development in their Jan. 1980 statement entitled "Stimulating Technological Progress." Secondly, arbitration could relieve some of the burdens on the overworked Federal courts. Chief Justice Burger in his speech to the American Bar Association on Jan. 24, 1982, generally endorsed the use of arbitration to reduce the judicial backlog. Also, I think it is important to note that the American Bar Association's Section on Patent, Trademark and Copyright Law has endorsed court enforcement of arbitration agreements calling for arbitration of validity and infringement.

The recommendations of the Secretary of Commerce to increase substantially patent and trademark user fees were made on the promise that such increases "will lay the groundwork for revitalizing the patent and trademark systems." The Secretary committed to three major goals: (1) to reach an average patent application pendency time of 18 months by FY 1987, (2) to issue an examiner's first action on trademark registrability in three months and disposal of an application within 13 months, and (3) to move realistically toward a fully automated Office by the 1990's. In accepting the Administration's recommendations on user fees, the Committee fully expects the Administration to live up to its end of the bargain to bring about a first-class Patent and Trademark Office. To provide an opportunity for timely and effective Committee oversight of progress toward improving the Patent and Trademark Office, the Committee directs that the Secretary of Commerce report annually to the Committee on progress toward achieving the three major goals of the Patent and Trademark Office, as outlined above, and, in addition, promptly inform the Committee at any time it appears that any of the goals, for any reason, is viewed as not attainable.

OVERSIGHT STATEMENT

The Committee on the Judiciary has oversight responsibility over the Patent and Trademark Office in the Department of Commerce. In addition to its ongoing oversight, the Committee's Subcommittee on Courts, Civil Liberties and the Administration of Justice held an oversight hearing with respect to the Patent and Trademark Office on Mar. 4, 1981, published as Oversight Hearings Before the Subcommittee on Courts, Civil Liberties and the Administration of Justice of the Committee on the Judiciary, House of Representatives, Ninety-Seventh Congress, First Session on the Copyright Office, The U.S. Patent and Trademark Office, and the Copyright Royalty Tribunal. Serial No. 17.

The Committee expects to continue its oversight activities in this area.

STATEMENT OF THE BUDGET COMMITTEE

No statement has been received on H.R. 6260 from the House Committee on the Budget.

STATEMENT OF THE CONGRESSIONAL BUDGET OFFICE

Pursuant to clause 7, rule XIII of the Rules of the House of Representatives and section 403 of the Congressional Budget Act of 1974, the following is the cost estimate of H.R. 6260, as amended, prepared by the Congressional Budget Office.

U.S. CONGRESS
CONGRESSIONAL BUDGET OFFICE,
Washington, D.C., May 13, 1982.

Hon. PETER W. RODINO, Jr.,

Chairman, Committee on the Judiciary, House of Representatives, Washington, D.C.

DEAR MR. CHAIRMAN: Pursuant to Section 403 of the Congressional Budget Act of 1974, the Congressional Budget Office has prepared the attached cost estimate for H.R. 6260, a bill to authorize appropriations to the Patent and Trademark Office in the Department of Commerce, and for other purposes.

Should the Committee so desire, we would be pleased to provide further details on this estimate.

Sincerely

Alice M. Rivlin,
Director.

CONGRESSIONAL BUDGET OFFICE COST ESTIMATE

1. Bill number: H.R. 6260.
2. Bill title: A bill to authorize appropriations to the Patent and Trademark Office in the Department of Commerce, and for other purposes.
3. Bill status: As ordered reported by the House Committee on the Judiciary, May 11, 1982.
Bill purpose: H.R. 6260 would authorize 1982 appropriations at a level \$2.5 million above the amount already appropriated, and would provide a \$76 million authorization level in 1983 to carry out the activities of the Patent and Trademark Office (PTO). In addition, such sums as may be necessary are authorized for fiscal years 1984 and 1985, plus such additional or supplemental amounts

as may be necessary for increases in salary, pay, retirement, or other benefits authorized by law for each fiscal year 1983 through 1985. PTO would also have available for obligation offsetting fee collections as provided for in Public Law 96-517, plus the additional fees as specified in H.R. 6260.

Assuming enactment of H.R. 6260, total PTO collections over time would result in recovery of approximately 100 percent of patent and trademark processing costs. Individuals, small businesses, and non-profit institutions would be exempt from the proposed additional fees, however, but would continue to follow the fee schedule outlined in P.L. 96-517, which assumes the ultimate recovery of approximately 50 percent of all processing costs.

The President's 1982 budget includes a request for a \$2.5 million supplemental for the PTO. The Administration has recommended increasing user fees to ultimately recover 100 percent of processing costs beginning in 1983, but does not provide for any exemptions to the proposed fee increases relative to current law. The effect of exemptions is to increase by approximately \$8 million the authorized level of appropriations relative to the Administration's request.

In addition, the bill would make a number of other changes that are not expected to have a cost impact.

5. Cost estimate:
[By fiscal years, in millions of dollars]

	1982	1983	1984	1985	1986
Authorization level:					
Specified	2.5	76.0			
Estimated		6.8	86.4	86.8	
Subtotal	2.5	82.8	86.4	86.8	
Total estimated outlays	2.4	61.8	82.4	82.8	5.5

Including outlays from appropriations to date for PTO, total 1982 outlays are estimated to be \$121.5 million, and total 1983 outlays are estimated to be \$79.8.

The costs of this bill fall within budget subfunction 376.
6. Basis of estimate: The authorization levels for PTO for 1982 and 1983 are those specified in the bill. The estimate authorization levels for 1984 and 1985 assume a level of funding sufficient to maintain a program level of \$167 million and \$176 million, respectively, including offsetting collections. In addition, authorization for increases in pay and other benefits of approximately \$6.8 million, \$7.4 million, and \$7.8 million for fiscal years 1983 through 1985, respectively, were estimated based on CBO's current inflators. Outlays are based on historical spending patterns.

The estimated collections to PTO as a result of fees charged to cover the costs of processing trademarks and patents were provided by the agency, and assume the fee structure outlined in the bill. The estimated collections, under current law and under H.R. 6260, are shown in the table below.

[By fiscal years, in millions of dollars]

	1982	1983	1984	1985	1986
Estimated offsetting collections:					
Current law		47.8	52.7	57.7	
Added by H.R. 6260		31.2	35.3	39.3	
Total—H.R. 6260		79.0	88.0	97.0	

- 7. Estimate comparison: None.
- 8. Previous CBO estimate: None.
- 9. Estimate prepared by: Mary B. Maginniss.
- 10. Estimate approved by: C. G. Nuckols (James L. Blum, Assistant Director for Budget Analysis).

COMMITTEE VOTE

The Committee on the Judiciary ordered H.R. 6260 as amended reported by a voice vote, without objection being heard, with a quorum of Members being present.

CHANGES IN EXISTING LAW MADE BY THE BILL, AS REPORTED

In compliance with clause 3 of Rule XIII of the Rules of the House of Representatives, changes in existing law made by the bill, as reported, are shown as follows (existing law proposed to be omitted is enclosed in black brackets, new matter is printed in italics, existing law in which no change is proposed is shown in roman):

TITLE 35, UNITED STATES CODE
PART 1—PATENT AND TRADEMARK OFFICE

CHAPTER 1—ESTABLISHMENT, OFFICERS, FUNCTIONS

§ 3. Officers and employees.

(a) There shall be in the Patent and Trademark Office a Commissioner of Patents and Trademarks, a Deputy Commissioner, two Assistant Commissioners, and [not more than fifteen] examiners-in-chief *appointed under section 7 of this title*. The Deputy Commissioner, or, in the event of a vacancy in that office, the Assistant Commissioner senior in date of appointment shall fill the office of Commissioner during a vacancy in that office until the Commissioner is appointed and takes office. The Commissioner of Patents and Trademarks, the Deputy Commissioner, and the Assistant Commissioners shall be appointed by the President, by and with the advice and consent of the Senate. The Secretary of Commerce, upon the nomination of the Commissioner, in accordance with law shall appoint all other officers and employees.

* * * * *

§ 6. Duties of Commissioner.

(a) The Commissioner, under the direction of the Secretary of Commerce, shall superintend or perform all duties required by law respecting the granting and issuing of patents and the registration of trademarks; shall have the authority to carry on studies [and] programs, *or exchanges of items or services* regarding domestic and international patent and trademark law *or the administration of the Patent and Trademark Office*, and shall have charge of property belonging to the Patent and Trademark Office. He may, subject to the approval of the Secretary of Commerce, establish regulations, not inconsistent with law, for the conduct of proceedings in the Patent and Trademark Office.

(b) The Commissioner, under the direction of the Secretary of Commerce, may, in coordination with the Department of State, carry on programs and studies cooperatively with foreign patent offices and international intergovernmental organizations, or may authorize such programs and studies to be carried on, in connection with the performance of duties stated in subsection (a) of this section.

(c) The Commissioner, under the direction of the Secretary of Commerce, may, with the concurrence of the Secretary of State, transfer funds appropriated to the Patent and Trademark Office, not to exceed \$100,000 in any year, to the Department of State for the purpose of making special payments to international intergovernmental organizations for studies and programs for advancing international cooperation concerning patents, trademarks, and related matters. These special payments may be in addition to any other payments or contributions to the international organization and shall not be subject to any limitations imposed by law on the amounts of such other payments or contributions by the Government of the United States.

[(d) The Commissioner, under the direction of the Secretary of Commerce, may, with the concurrence of the Secretary of State, allocate funds appropriated to the Patent Office, to the Department of State for the purpose of payment of the share on the part of the United States to the working capital fund established under the Patent Cooperation Treaty. Contributions to cover the share on the part of the United States of any operating deficits of the International Bureau under the Patent Cooperation Treaty shall be included in the annual budget of the Patent Office and may be transferred by the Commissioner, under the direction of the Secretary of Commerce, to the Department of State for the purpose of making payments thereof to the International Bureau.]

* * * * *

§ 13. Copies of patents for public libraries.

The Commissioner may supply printed copies of specifications and drawings of patents to public libraries in the United States which shall maintain such copies for the use of the public, at the rate for each year's issue established for this purpose in section 41 [(a)9] (d) of this title.

* * * * *

CHAPTER 2—PROCEEDINGS IN THE PATENT AND TRADEMARK OFFICE

* * * * *

§ 21. [Day for taking action falling on Saturday, Sunday, or holiday] Filing date and day for taking action.

(a) *The Commissioner may by rule prescribe that any paper or fee required to be filed in the Patent and Trademark Office will be considered filed in the Office on the date on which it was deposited with the United States Postal Service or would have been deposited with the United States Postal Service but for postal service interruptions or emergencies designated by the Commissioner.*

(b) When the day, or the last day, for taking any action or paying any fee in the United States Patent and Trademark Office falls on Saturday, Sunday, or a *Federal* holiday within the District of Columbia, the action may be taken, or the fee paid, on the next succeeding secular or business day.

* * * * *

CHAPTER 4—PATENT FEES

* * * * *

§ 41. Patent fees

[(a) The Commissioner of Patents will establish fees for the processing of an application for a patent, from filing through disposition by issuance or abandonment, for maintaining a patent in force, and for providing all other services and materials related to patents. No fee will be established for maintaining a design patent in force.

[(b) By the first day of the first fiscal year beginning on or after one calendar year after enactment of this Act, fees for the actual processing of an application for a patent, other than for a design patent, from filing through disposition by issuance or abandonment, will recover in aggregate 25 per centum of the estimated average cost to the Office of such processing. By the first day of the first fiscal year beginning on or after one calendar year after enactment, fees for the processing of an application for a design patent, from filing through disposition by issuance or abandonment, will recover in aggregate 50 per centum of the estimated average cost to the Office of such processing.

[(c) By the fifteenth fiscal year following the date of enactment of this Act, fees for maintaining patents in force will recover 25 per centum of the estimated cost to the Office, for the year in which such maintenance fees are received, of the actual processing all applications for patents, other than for design patents, from filing through disposition by issuance or abandonment. Fees for maintaining a patent in force will be due three years and six months, seven years and six months, and eleven years and six months after the grant of the patent. Unless payment of the applicable maintenance fee is received in the Patent and Trademark Office on or before the date the fee is due or within a grace period of six months thereafter, the patent will expire as the end of such grace period. The Commissioner may require the payment of a surcharge as a condition of accepting within such six-month grace period the late payment of an applicable maintenance fee.

[(d) By the first day of the first fiscal year beginning on or after one calendar year after enactment, fees for all other services or materials related to patents will recover the estimated average cost to the Office of performing the service or furnishing the material. The yearly fee for providing a library specified in section 13 of this title with uncertified printed copies of the specifications and drawings for all patents issued in that year will be \$50.]

(a) The Commissioner shall charge the following fees:

1. On filing each application for an original patent, except in design or plant cases, \$300; in addition, on filing or on presentation at any other time, \$30 for each claim in independent form which is in excess of three, \$10 for each claim (whether independent or dependent) which is in excess of twenty, and \$100 for each application containing a multiple dependent claim. For the purpose of computing fees, a multiple dependent claim as referred to in section 112 of this title or any claim depending therefrom shall be considered as separate dependent claims in accordance with the number of claims to which reference is made. Errors in payment of the additional fees may be rectified in accordance with regulations of the Commissioner.

2. For issuing each original or reissue patent, except in design or plant cases, \$500.

3. In design and plant cases:

- a. On filing each design application, \$125.
- b. On filing each plant application, \$200.
- c. On issuing each design patent, \$175.
- d. On issuing each plant patent, \$250.

4. On filing each application for the reissue of a patent, \$300; in addition, on filing or on presentation at any other time, \$30 for each claim in independent form which is in excess of the number of independent claims of the original patent, and \$10 for each claim (whether independent or dependent) which is in excess of twenty and also in excess of the number of claims of the original patent. Errors in payment of the additional fees may be rectified in accordance with regulations of the Commissioner.

5. On filing each disclaimer, \$50.

6. On filing an appeal from the examiner to the Board of Appeals, \$115; in addition, on filing a brief in support of the appeal, \$115, and on requesting an oral hearing before the Board of Appeals, \$100.

7. On filing each petition for the revival of an unintentionally abandoned application for a patent or for the unintentionally delayed payment of the fee for issuing each patent, \$500, unless the petition is filed under sections 133 or 151 of this title, in which case the fee shall be \$50.

8. For petitions for one-month extensions of time to take actions required by the Commissioner in an application:

- a. On filing a first petition, \$50.
 - b. On filing a second petition, \$100.
 - c. On filing a third or subsequent petition, \$200.
- (b) The Commissioner shall charge the following fees for maintaining a patent in force:
1. Three years and six months after grant, \$400.
 2. Seven years and six months after grant, \$800.
 3. Eleven years and six months after grant, \$1,200.

Unless payment of the applicable maintenance fee is received in the Patent and Trademark Office on or before the date the fee is due or within a grace period of six months thereafter, the patent will expire as of the end of such grace period. The Commissioner may require the payment of a surcharge as a condition of accepting within such six-month grace period the late payment of an applicable maintenance fee. No fee will be established for maintaining a design or plant patent in force.

(c)(1) The Commissioner may accept the payment of any maintenance fee required by subsection (b) of this section after the six-month grace period if the delay is shown to the satisfaction of the Commissioner to have been unavoidable. The Commissioner may require the payment of a surcharge as a condition of accepting payment of any maintenance fee after the six-month grace period. If the Commissioner accepts payment of a maintenance fee after the six-month grace period, the patent shall be considered as not having expired at the end of the grace period.

(2) No patent, the term of which has been maintained as a result of the acceptance of a payment of a maintenance fee under this subsection, shall abridge or affect the right of any person or his

successors in business who made, purchased or used after the six-month grace period but prior to the acceptance of a maintenance fee under this subsection anything protected by the patent, to continue the use of, or to sell to others to be used or sold, the specific thing so made, purchased, or used. The court before which such matter is in question may provide for the continued manufacture, use or sale of the thing made, purchased, or used as specified, or for the manufacture, use or sale of which substantial preparation was made after the six-month grace period but before the acceptance of a maintenance fee under this subsection, and it may also provide for the continued practice of any process, practiced, or for the practice of which substantial preparation was made, after the six-month grace period but prior to the acceptance of a maintenance fee under this subsection, to the extent and under such terms as the court deems equitable for the protection of investments made or business commenced after the six-month grace period but before the acceptance of a maintenance fee under the subsection.

(d) The Commissioner will establish fees for all other processing, services, or materials related to patents not specified above to recover the estimated average cost to the Office of such processing, services, or materials. The yearly fee for providing a library specified in section 13 of this title with uncertified printed copies of the specifications and drawings for all patents issued in that year will be \$50.

(3) The Commissioner may waive the payment of any fee for any service or material related to patents in connection with an occasional or incidental request made by a department or agency of the Government, or any officer thereof. The Commissioner may provide any applicant issued a notice under section 132 of this title with a copy of the specifications and drawings for all patents referred to in that notice without charge.

[(f) Fees will be adjusted by the Commissioner to achieve the levels of recovery specified in this section; however, no patent application processing fee or fee for maintaining a patent in force will be adjusted more than once every three times.

(f) The fees established in subsection (a) and (b) of this section may be adjusted by the Commissioner on Oct. 1, 1985, and every third year thereafter, to reflect any fluctuations occurring during the previous three years in the Consumer Price Index, as determined by the Secretary of Labor. Changes of less than 1 per centum may be ignored.

(g) No fee established by the Commissioner under this section will take effect prior to sixty days following notice in the Federal Register.

§ 42. Patent and Trademark Office funding.

(a) All fees for services performed by or materials furnished by the Patent and Trademark Office will be payable to the Commissioner.

(b) All fees paid to the Commissioner and all appropriations for defraying the costs of the activities of the Patent and Trademark Office will be credited to the Patent and Trademark Office Appropriation Account in the Treasury of the United States, the provisions of section 725e of title 31, United States Code, notwithstanding.

(c) Revenues from fees will be available to the Commissioner of Patents to carry out, to the extent provided for in appropriation Acts, the activities of the Patent and Trademark Office. *Fees available to the Commissioner under section 31 of the Trademark Act of 1946, as amended (15 U.S.C. 1113), shall be used exclusively for the processing of trademark registrations and for other services and materials related to trademarks.*

(d) The Commissioner may refund any fee paid by mistake or any amount paid in excess of that required.

PART II—PATENTABILITY OF INVENTIONS AND GRANT OF PATENTS

* * * * *

CHAPTER 11—APPLICATION FOR PATENT

* * * * *

§ 111. Application for patent

[Application for patent shall be made by the inventor, except as otherwise provided in this title, in writing to the Commissioner. Such application shall include: (1) a specification as prescribed by section 112 of this title; (2) a drawing as prescribed by section 113 of this title; and (3) an oath by the applicant as prescribed by section 115 of this title. The application must be signed by the applicant and accompanied by the fee required by law.]

SEC. 111. *Application for patent shall be made, or authorized to be made, by the inventor, except as otherwise provided in this title, in writing to the Commissioner. Such application shall include (1) a specification as prescribed by section 112 of this title; (2) a drawing as prescribed by section 113 of this title; and (3) an oath by the applicant as prescribed by section 115 of this title. The application must be accompanied by the fee required by law. The fee and oath may be submitted after the specification and any required drawing are submitted, within such period and under such conditions, including the payment of a surcharge, as may be prescribed by the Commissioner. Upon failure to submit the fee and oath within such prescribed period, the application shall be regarded as abandoned, unless it is shown to the satisfaction of the Commissioner that the delay in submitting the fee and oath was unavoidable. The filing date of an application shall be the date on which the specification and any required drawing are received in the Patent and Trademark Office.*

* * * * *

§ 115. Oath of applicant

The applicant shall make oath that he believes himself to be the original and first inventor of the process, machine, manufacture, or composition of matter, or improvement thereof, for which

he solicits a patent; and shall state of what country he is a citizen. Such oath may be made before any person within the United States authorized by law to administer oaths, or when, made in a foreign country, before any diplomatic or consular office of the United States authorized to administer oaths, or before any officer having an official seal and authorized to administer oaths in the foreign country in which the applicant may be, whose authority [shall be] is proved by certificate of a diplomatic or consular officer of the United States, or *apostille of an official designated by a foreign country which, by treaty or convention, accords like effect to apostilles of designated officials in the United States* and such oath shall be valid if it complies with the laws of the state or country where made. When the application is made as provided in this title by a person other than the inventor, the oath may be so varied in form that it can be made by him.

§ 116. [Joint inventors] *Inventors.*

When an invention is made by two or more persons jointly, they shall apply for patent jointly and each sign the application and make the required oath, except as otherwise provided in this title.

If a joint inventor refuses to join in an application for patent or cannot be found or reached after diligent effort, the application may be made by the other inventor on behalf of himself and the omitted inventor. The Commissioner, on proof of the pertinent facts and after such notice to the omitted inventor as he prescribes, may grant a patent to the inventor making the application, subject to the same rights which the omitted inventor would have had if he had been joined. The omitted inventor may subsequently join in the application.

Whenever [a person is joined in an application for patent as joint inventor through error, or a joint inventor is not included in an application through error] *through error a person is named in an application for patent as the inventor, or through error an inventor is not named in an application*, and such error arose without any deceptive intention on his part, the Commissioner may permit the application to be amended accordingly, under such terms as he prescribes.

* * * * *

CHAPTER 16—DESIGNS

* * * * *

§ 173. Term of design patent.

[Patents for designs may be granted for the term of three years and six months, or for seven years, or for fourteen years, as the applicant, in his application, elects.]

Patents for designs shall be granted for the term of fourteen years.

* * * * *

PART III—PATENTS AND PROTECTION OF PATENT RIGHTS

* * * * *

CHAPTER 25—AMENDMENT AND CORRECTION OF PATENTS

* * * * *

§ 256. Misjoinder of inventor.

[Whenever a patent is issued on the application of persons as joint inventors and it appears that one of such persons was not in fact a joint inventor, and that he was included as a joint inventor by error and without any deceptive intention, the Commissioner may, on application of all the parties and assignees, with proof of the facts and such other requirements as may be imposed, issue a certificate deleting the name of the erroneously joined person from the patent.]

[Whenever a patent is issued and it appears that a person was a joint inventor, but was omitted by error and without deceptive intention on his part, the Commissioner may, on application of all the parties and assignees, with proof of the facts and such other requirements as may be imposed, issue a certificate adding his name to the patent as a joint inventor.]

[The misjoinder or nonjoinder of joint inventors shall not invalidate a patent, if such error can be corrected as provided in this section. The court before which such matter is called in question may order correction of the patent on notice and hearing of all parties concerned and the Commissioner shall issue a certificate accordingly.]

§ 256. Correction of named inventor.

Whenever through error a person is named in an issued patent as the inventor, or through error an inventor is not named in an issued patent and such error arose without any deceptive intention on his part, the Commissioner may, on application of all the parties and assignees, with proof of the facts and such other requirements as may be imposed, issue a certificate correcting such error.

The error of omitting inventors or naming persons who are not inventors shall not invalidate the patent in which such error occurred if it can be corrected as provided in this section. The court before which such matter is called in question may order correction of the patent on notice and hearing of all parties concerned and the Commissioner shall issue a certificate accordingly.

CHAPTER 16—OWNERSHIP AND ASSIGNMENT

* * * * *

§ 261. Ownership; assignment.

Subject to the provisions of this title, patents shall have the attributes of personal property.

Applications for patent, patents, or any interest therein, shall be assignable in law by an instrument in writing. The applicant, patentee, or his assigns or legal representatives may in like manner grant and convey an exclusive right under his application for patent, or patents, to the whole or any specified part of the United States.

A certificate of acknowledgment under the hand and official seal of a person authorized to administer oaths within the United States, or, in a foreign country, of a diplomatic or consular officer of the United States or an officer authorized to administer oaths whose authority is proved by a certificate of a diplomatic or consular officer of the United States, or *apostille of an official designated by a foreign country which, by treaty or convention, accords like effect to apostilles of designated officials in the United States*, shall be prima facie evidence of the execution of an assignment, grant or conveyance of a patent or application for patent.

An assignment, grant or conveyance shall be void as against any subsequent purchaser or mortgagee for a valuable consideration, without notice, unless it is recorded in the Patent and Trademark Office within three months from its date or prior to the date of such subsequent purchase or mortgage.

**CHAPTER 29—REMEDIES FOR INFRINGEMENT OF PATENT,
AND OTHER ACTIONS**

Sec.

281. Remedy for infringement of patent.

* * * * *

294. Voluntary arbitration.

* * * * *

§ 294. Voluntary arbitration.

(a) *A contract involving a patent or any right under a patent may contain a provision requiring arbitration of any dispute relating to patent validity or infringement arising under the contract. In the absence of such a provision, the parties to an existing patent validity or infringement dispute may agree in writing to settle such dispute by arbitration. Any such provision or agreement shall be valid, irrevocable, and enforceable, except for any grounds that exist at law or in equity for revocation of a contract.*

(b) *Arbitration of such disputes, awards by arbitrators and confirmation of awards shall be governed by title 9, United States Code, to the extent such title is not inconsistent with this section. In any such arbitration proceeding, the defenses provided for under section 282 of this title shall be considered by the arbitrator if raised by any party to the proceeding.*

(c) *An award by an arbitrator shall be final and binding between the parties to the arbitration but shall have no force or effect on any other person. The parties to an arbitration may agree that in the event a patent which is the subject matter of an award is subsequently determined to be invalid or unenforceable in a judgment rendered by a court to competent jurisdiction from which no appeal can or has been taken, such award may be modified by any court of competent jurisdiction upon application by any party to the arbitration. Any such modification shall govern the rights and obligations between such parties from the date of such modification.*

(d) *When an award is made by an arbitrator, the patentee, his assignee or licensee shall give notice thereof in writing to the Commissioner. There shall be a separate notice prepared for each patent involved in such proceeding. Such notice shall set forth the names and addresses of the parties, the name of the inventor, and the name of the patent owner, shall designate the number of the patent, and shall contain a copy of the award. If an award is modified by a court, the party requesting such modification shall give notice of such modification to the Commissioner. The Commissioner shall upon receipt of either notice, enter the same in the record of the prosecution of such patent. If the required notice is not filed with the Commissioner, any party to the proceeding may provide such notice to the Commissioner.*

(e) *The award shall be unenforceable until the notice required by subsection (d) is received by the Commissioner.*

* * * * *

TRADEMARK ACT OF 1946

* * * * *

**Sec. 8 (a). Duration of registration—Cancellation at end of 6 years
unless affidavit of use filed.**

Each certificate of registration shall remain in force for 20 years: *Provided*, That the registration of any mark under the provisions of this Act shall be canceled by the Commissioner at the end of 6 years following its date, unless within 1 year next preceding the expiration of such 6 years the registrant shall file in the Patent and Trademark Office an affidavit showing that said mark is [still] in use *in commerce* or showing that its nonuse is due to special circumstances which excuse such nonuse and is not due to any intention to abandon the mark. Special notice of the requirement for such affidavit shall be attached to each certificate of registration.

Sec. 8(b). Cancellation of republished prior registrations unless affidavit of use filed.

Any registration published under the provisions of subsection (c) of section 12 of this Act shall be canceled by the Commissioner at the end of 6 years after the date of such publication unless within 1 year next preceding the expiration of such 6 years and registrant shall file in the Patent and Trademark Office an affidavit showing that said marks is [still] in use *in commerce* or showing that its nonuse is due to special circumstances which excuse such nonuse and is not due to any intention to abandon the mark.

* * * * *

Sec. II. Acknowledgments and verifications.

Acknowledgments and verifications required hereunder may be made before any person within the United States authorized by law to administer oaths, or, when made in a foreign country, before any diplomatic or consular officer of the United States or before any official authorized to administer oaths in the foreign country concerned whose authority [shall] is proved by a certificate of a diplomatic or consular officer of the United States or *apostille of an official designated by a foreign country which, by treaty or convention, accords like effect to apostilles of designated officials in the United States*, and shall be valid if they comply with the laws of the state or country where made.

* * * * *

Sec. 13. Opposition to registration of marks on the Principal Register.

Any person who believes that he would be damaged by the registration of a mark upon the principal register may upon payment of the required fee, file [a verified] *an* opposition in the Patent and Trademark Office, stating the grounds therefor, within thirty days after the publication under subsection (a) of section 12 of this Act of the mark sought to be registered. Upon written request prior to the expiration of the thirty-day period, the time for filing opposition shall be extended for an additional thirty days, and further extensions of time for filing opposition may be granted by the Commissioner for good cause *when requested prior to the expiration of an extension*. The Commissioner shall notify the applicant 86 of each extension of the time for filing opposition. [An unverified opposition may be filed by a duly authorized attorney, but such opposition shall be null and void unless verified by the opposer within a reasonable time after such filing to be fixed by the Commissioner.] An opposition may be amended under such conditions as maybe prescribed by the Commissioner.

SEC. 14. A [verified] petition to cancel a registration of a mark, stating the grounds relied upon, may, upon payment of the prescribed fee, be filed by any person who believes that he is or will be damaged by the registration of a mark on the principal register established by this Act, or under the Act of Mar. 3, 1881, or the Act of Feb. 20, 1905—

- (a) within five years from the date of the registration of the mark under this Act; or
- (b) within five years from the date of publication under section 12(c) hereof of a mark registered under the Act of Mar. 3, 1881, or the Act of Feb. 20, 1905; or
- (c) at any time if the registered mark becomes the common descriptive name of an article or substance, or has been abandoned, or its registration was obtained fraudulently or contrary to the provisions of section 4 or of subsections (a), (b), or (c) of section 2 of this Act for a registration hereunder, or contrary to similar prohibitory provisions of said prior Acts for a registration thereunder, or if the registered mark is being used by, or with the permission of, the registrant so as to misrepresent the source of the goods or services in connection with which the mark is used; or
- (d) at any time if the mark is registered under the Act of Mar. 3, 1881, or the Act of Feb. 20, 1905, and has not been published under the provisions of subsection (c) of section 12 of this Act;

or

- (e) at any time in the case of a certification mark on the ground that the registrant (1) does not control, or is not able legitimately to exercise control over, the use of such mark, or (2) engages in the production or marketing of any goods or services to which the certification mark is applied, or (3) permits the use of the certification mark for purposes other than to certify, or (4) discriminately refuses to certify or to continue to certify the goods or services of any person who maintains the standards or conditions which such mark certifies:

Provided, That the Federal Trade Commission may apply to cancel on the grounds specified in subsections (c) and (e) of this section any mark registered on the principal register established by this Act, and the prescribed fee shall not be required.

Sec. 15. Incontestability under certain conditions of right to use mark.

Except on a ground for which application to cancel may be filed at any time under subsections (c) and (e) of section 14 of this Act, and except to the extent, if any, to which the use of a mark registered on the principal register infringes a valid right acquired under the law of any State or Territory by use of a mark or trade name continuing from a date prior to the date of [the publication] *registration* under this Act of such registered mark, the right of the registrant to use such registered mark in commerce for the goods or services on or in connection with which such registered mark has been in continuous use for 5 consecutive years subsequent to the date of such registration and is still in use in commerce, shall be incontestable: *Provided*, That—

- (1) there has been no final decision adverse to registrant's claim of ownership of such mark for such goods or services, or to registrant's right to register the same or to keep the same on the register; and
- (2) there is no proceeding involving said rights pending in the Patent Office or in a court and not finally disposed of; and

(3) an affidavit is filed with the Commissioner within 1 year after the expiration of any such 5-year period setting forth those goods or services stated in the registration on or in connection with which such mark has been in continuous use for such 5 consecutive years and is still in use in commerce, and the other matters specified in subsections (1) and (2) hereof; and

(4) no incontestable right shall be acquired in a mark which is the common descriptive name of any article or substance, patented or otherwise.

Subject to the conditions above specified in this section, the incontestable right with reference to a mark registered under this Act shall apply to a mark registered under the Act of Mar. 3, 1881, or the Act of Feb. 20, 1905, upon the filing of the required affidavit with the Commissioner within 1 year after the expiration of any period of 5 consecutive years after the date of publication of a mark under the provisions of subsection (c) of section 12 of this Act.

The Commissioner shall notify any registrant who files the above-prescribed affidavit of the filing thereof.

Sec. 16. Interference.

[Whenever application is made for the registration of a mark which so resembles a mark previously registered by another, or for the registration of which another has previously made application, as to be likely when applied to the goods or when used in connection with the services of the applicant to cause confusion or mistake or to deceive, the Commissioner may declare that an interference exists.] Upon petition showing extraordinary circumstances, the Commissioner may declare that an interference exists when application is made for the registration of a mark which so resembles a mark previously registered by another, or for the registration of which another has previously made application, as to be likely when applied to the goods or when used in connection with the services of the applicant to cause confusion or mistake or to deceive. No interference shall be declared between an application and the registration of a mark the right to the use of which has become incontestable.

* * * * *

§ 31. Fees

(a) The Commissioner of Patents will establish fees for the filing and processing of an application for the registration of a trademark or other mark and for all other services performed by and materials furnished by the Patent and Trademark Office related to trademarks and other marks. [Fees will be set and adjusted by the Commissioner to recover in aggregate 50 per centum of the estimated average cost to the Office of such processing. Fees for all other services or materials related to trademarks and other marks will recover the estimated average cost to the Office of performing the service or furnishing the material.] However, no fee for the filing or processing of an application for the registration of a trademark or other mark or for the renewal or assignment of a trademark or other mark will be adjusted more than once every three years. No fee established under this section will take effect prior to sixty days following notice in the Federal Register.

(b) The Commissioner may waive the payment of any fee for any service or material related to trademarks or other marks in connection with an occasional request made by a department or agency of the Government, or any officer thereof. The Indian Arts and Crafts Board will not be charged any fee to register Government trademarks of genuineness and quality for Indian products or for products of particular Indian tribes and groups.

Rules of Practice in Patent Cases; Reexamination Proceedings

Agency: Patent and Trademark Office, Commerce.

Action: Final rule.

Summary: The Patent and Trademark Office is amending its rules of practice in patent cases to provide procedures for the reexamination of patents. Public Law 96-517 amended the patent act to authorize reexamination proceedings as a means for improving the quality of United States patents. The Patent and Trademark Office intends, through this amendment of its rules, to provide patent owners and the public with guidance on the procedures the Office will follow in conducting reexamination proceedings.

Effective date: July 1, 1981.

For Further Information Contact: Mr. R. Franklin Burnett by telephone at [703]557-3054 or by mail marked to his attention and addressed to the Commissioner of Patents and Trademarks, Washington, D.C. 20231.

Supplementary Information: This rule change relates to a procedure for reexamination of patents as provided for in Public Law 96-517, section 1 of which relates to reexamination and becomes effective on July 1, 1981.

Background:

A notice of proposed rulemaking was published in the Federal Register on Jan. 13, 1981 at 46 FR 3162-3175 and in the Official Gazette on Feb. 17, 1981 at 1003 O.G. 36-47.

The proposed rulemaking set forth two somewhat distinct procedures directed towards determining and improving the quality and reliability of United States patents. The procedures were (1) provisions for reexamination of patents as provided for in Pub. L. 96-517, section 1 of which relates to reexamination and becomes effective on July 1, 1981, and (2) provisions for inter partes protest proceedings in a patent application between the patent applicant and a member (or members) of the public who has (have) access to the application file.

An oral hearing was held on Apr. 16, 1981. Fifty-nine written letters and statements were submitted. Nineteen persons testified at the oral hearing which resulted in 107 pages of testimony.

Discussion of General Issues Involved

After careful consideration of the comments which have been received, the part of the proposed rulemaking relating to reexamination of patents as set forth in new Chapter 30 which Pub. L. 96-517 added to Title 35 of the United States Code [35 U.S.C. 301-307] is being adopted with certain changes. The remainder of the proposal relating to inter partes protest proceedings is not being adopted.

The comments relating to the proposed rules for inter partes protest proceedings were generally mixed, with a majority of persons and associations submitting comments either opposed to these proposed rules or indicating that adoption of the proposed rules should be delayed or deferred for further study and consideration.

A number of comments were received requesting some further changes to the rules be made. The thrust of some of the suggested changes would be to remove public access to reissue applications and to limit public participation in the examination of reissue applications. The changes suggested included restoring the rules in these areas to essentially their pre-1977 form. In particular, it was suggested that § 1.175 be amended to eliminate paragraph (a)(4). These changes were not a part of the published proposal and are not being adopted at this time. Their consideration and adoption would require a new notice of proposed rulemaking.

Further, since the subject matter of reissue applications is already known to the public the necessity for maintaining them in confidence is not compelling. The elimination of paragraph (a)(4) of § 1.175 would not have a significant effect since less than one-fourth of the currently filed reissue applications are based solely upon the 1977 change to § 1.175. Under the present circumstances, it is more appropriate to defer any consideration of such changes until this issue has been reviewed further and possibly until some experience is gained under the rules adopted herein relating to reexamination. Such experience may indicate the desirability of either retaining the 1977 change to § 1.175, deleting the 1977 change, or making different changes in the rules.

The comments relating to reexamination were generally favorable with most of the comments indicating general approval of the proposed rules. Among the more often mentioned specific comments were suggestions relating to public notice of reexamination requests and/or orders. A number of comments also related to requester and/or third party participation in the reexamination proceeding and also to the scope of the proceeding.

After careful review of the comments and suggestions it has been decided to adopt the suggestions relating to the publication in the *Official Gazette* of requests for reexamination for which the fee has been paid. In addition, any reexaminations ordered at the initiative of the Commissioner will also be announced in the *Official Gazette*. The announcement will include at least the date of the request or any Commissioner initiated order, a reexamination request or order control number, the patent number, title, class and subclass, name of the inventor, name of the patent owner of record, and the examining group to which the reexamination is assigned.

The suggestions and comments relating to more participation in the reexamination proceeding by the requester and third parties have been adopted only to a limited degree. The requester will in general have only that participation provided by the rules as proposed. However, any citations under § 1.501 by any person will be entered in the patent file up until the date of an order to reexamine. The essentially ex parte nature of the proceeding is believed to be in keeping with the spirit and intent of the statute

even though the statute does not require ex parte proceedings. Ex parte proceedings will minimize the costs and other effects of reexamination requests on patentees, especially individuals and small businesses.

The scope of the reexamination proceeding which was originally proposed has been essentially adopted in the final rules. The suggestions that the rules be broadened to include other issues have not been adopted since the other issues would unduly complicate the proceedings, raise the expense of the proceedings and raise questions whether such issues can be considered under Pub. L. 96-517.

Discussion of the Major Specific Issues Involved

The rules relating to reexamination proceedings are directed to the procedures set forth in new Chapter 30 of Title 35 of the United States Code (35 U.S.C. 301-307). This Chapter provides for the citation of prior art in patents, filing of requests for reexamination, decisions on such requests, reexamination and appeal from reexamination decisions, and the issuance of a certificate at the termination of the reexamination proceedings. Present §§ 1.1, 1.5, 1.11, 1.33, 1.34, 1.36, 1.104, 1.107, 1.109, 1.111, 1.112, 1.113, 1.115, 1.116, 1.121, 1.191, 1.192, 1.196, 1.197, 1.231, 1.248, 1.301, and 1.303 are amended to provide for reexamination procedures. A new "Subpart D-Reexamination of Patents" includes new §§ 1.501, 1.510, 1.515, 1.520, 1.525, 1.530, 1.535, 1.540, 1.550, 1.552, 1.555, 1.560, 1.565, and 1.570. Paragraph (b) of § 1.291, relating to prior art citations in patents, is deleted, since provisions therefor appear in § 1.501.

Section 1.1, as amended, provides for communications relating to reexamination proceedings to be marked "Box Reexam" to speed internal Office mail processing. No comments were received concerning this section. The proposal has been modified to indicate that only requests should be marked "Box Reexam".

Section 1.5, as amended, provides for all letters relating to a reexamination proceeding to be identified by patent number and a reexamination request control number. No comments were received concerning this section. Section 1.5 has been modified to also include reference to the Group Art Unit and the examiner, if known.

Section 1.11, as amended, provides for all papers made of record in reexamination proceedings to be open to inspection and copying by the public. Eighteen comments were received relating to publication of a notice in the *Official Gazette*. A new paragraph (c) has been added which provides for the publication of requests with sufficient fees paid and orders initiated by the Commissioner. Proposed paragraph "c" has been adopted as paragraph "d".

Section 1.33, as amended, has a new paragraph (c) relating to which address communications for the patent owner will be sent and who may sign papers filed. Four comments were received on this section relating to whom the mail should be addressed. One proposal, which suggested use of the current address of the attorney or agent of record, was adopted.

Section 1.34, as amended, provides for the appointment of an attorney or agent in a reexamination proceeding. Only one comment was received on this section which proposed a rule specifically allowing attorneys to file requests without identifying their clients. Since any person may request reexamination, such a rule is not felt necessary.

Section 1.36, as amended, provides for the revocation and withdrawal of powers of attorney in a reexamination proceeding. No comment was received. Section 1.36 is adopted as proposed with an additional change which added "or her" near the end.

Section 1.104, as amended, broadens the present section to also include reexamination. Three comments were received on § 1.104. All comments indicated that the examiner should not make a prior art search. Although no complete new search by the examiner is required, the use of patents and printed publications in addition to those submitted by the requester is clearly indicated in 35 U.S.C. 303(a). According, § 1.104 is adopted as proposed.

Section 1.107, as amended, provides for the citation of prior art by the examiner in a reexamination proceeding. The amended rule also refers to foreign published applications, as well as patents. No comments were received on this section. It is adopted as proposed.

Section 1.109, as amended, provides for the examiner to supply reasons for allowance in a reexamination proceeding if the examiner believes that the record does not make clear the reasons for allowing a claim or claims. No comments were received on this section. Except for a clarifying change in language, it is adopted as proposed.

Section 1.111, as amended, provides for replies by the patent owner in a reexamination proceeding. One comment was received which suggested a clarification. The suggestion was adopted. Other non-substantive changes have been made in the proposed section to shorten the sentences for clarity.

Section 1.112, as amended, provides for reexamination and reconsideration of the patent under reexamination after responses by the patent owner. Three comments were received on this section.

The wording has been changed as suggested to avoid any confusion between "reexamination" and "reexamine". The sentences have also been shortened for clarity.

Section 1.113, as amended, provides for a final rejection or action in a reexamination proceeding. One comment was received which pointed out a possible conflict between the amendment rights of section 305 and the final rejection of section 1.113. No problem is seen in this regard because of the provision of section 305 which states that "reexamination will be conducted according to the procedures established for initial examination." The section is adopted as proposed with the last sentence being divided into two sentences for clarity.

Section 1.115, as amended, provides for amendments by the patent owner in a reexamination proceeding. No comments were received concerning this section. The section is adopted as proposed with minor changes for clarity.

Section 1.116, as amended, provides for amendments after final action in reexamination proceedings. One comment was received which was the same as that mentioned and responded to in Section 1.113 above. The sentences have been shortened for clarity.

Section 1.121, as amended, contains a new paragraph (f) which requires a complete copy of any new or amended claim when presented during reexamination proceedings. Two persons commented on this section. One proposed side-by-side presentation of amended and original claims. The other proposed that exactly the same procedure be used as is now in effect for amending reissue claims. Neither suggestion was adopted since neither lends itself to printing only the amended claims in a certificate as easily as the procedure set forth in § 1.121(f). The proposed section was revised to also provide for the amendment of the description. In addition, the last three sentences of § 1.510(e) have been inserted as the last three sentences of § 1.121(f) in order to provide a more complete description therein of the manner of making amendments, including the numbering of claims, the restriction on scope of the claims and the prohibition against the introduction of new matter.

Section 1.191, as amended, provides for appeal to the Board of Appeals by the patent owner from any decision adverse to patentability, in accordance with 35 U.S.C. 306. One comment was received on proposed § 1.191 which urged that the requester should also be entitled to appeal. This proposal was not adopted because it is not provided for in the law and could result in harassment if permitted. The section is adopted as proposed except that "primary" contained in the existing rule is retained.

Section 1.192, as amended, provides two months from the date of the Notice of Appeal for the patent owner to file an appeal brief in a reexamination proceeding. Five comments were received relating to § 1.192 which proposed that the period for filing an appeal brief in a reexamination appeal be two months as in other appeals. The proposed rule has been adopted with the suggested two month period. The sentences have been shortened for clarity.

Section 1.196 and § 1.197 are being amended to refer to "appellants", which is a term which includes both applicants and patent owners.

These two sections were not published for comment, however, the issues involved were presented in proposed §§ 1.191 and 1.192. Paragraph (c) of § 1.197 has also been rewritten for clarity.

Section 1.231(a)(1), as amended, provides for a motion that a patent claim is unpatentable in an interference proceeding where reexamination thereof has also been requested.

Three comments were received concerning § 1.231. All comments related to when interference or reexamination proceedings would be suspended. Section 1.565 provides basis for such suspensions. Decisions will be made on a case by case basis, depending on the particular fact situation. The sentences in § 1.231(a)(1) have been shortened and rearranged for clarity.

An amendment was proposed to delete the last two sentences of § 1.247 relating to proof of service. No comments were received concerning this section but, on reconsideration, no need for such deletion is felt necessary and no change is being adopted.

Section 1.248, as amended, includes a new paragraph (b) relating to methods of serving papers and proof of service. No comments were received concerning this section. The section is adopted as proposed with minor changes for clarity and to conform to the Federal Rules of Civil Procedure.

Section 1.291, as amended, deletes paragraph (b). Former paragraph (b) dealt with the citation of prior art provisions. It was deleted since the provisions are now covered by § 1.501. Five persons commented on § 1.291. One comment relating to filing protests in reexamination proceedings was not adopted since such proceedings are ex parte in nature and are limited to consideration of prior art patents and printed publications cited by the public prior to the order. Two persons mentioned providing a procedure for citation of prior art by patentees. Citation of prior art by patentees is included in § 1.501. The two other comments related to the content of protest proceedings, which are not part of this final rule. Section 1.291 is adopted as proposed except that the paragraph designation of (c) is not being changed.

Section 1.301, as amended, provides for appeal by the owner of a patent in reexamination proceedings to the U.S. Court of Customs and Patent Appeals. Four comments were received relating to § 1.301. One person suggested the insertion of "any" as the fourth word in the section. This suggestion was adopted. The other three comments related to appeals in inter partes protest proceedings which are not a part of this promulgation. Section 1.301 is adopted as proposed with only the above mentioned change.

Section 1.303, as amended, provides for remedy by civil action under 35 U.S.C. 145 for the owner of a patent in reexamination proceedings. No comments were received concerning this section. The changes from the proposal are the insertion of "any" as the fourth word in the section as suggested in § 1.301 and the addition of, "306" to the title.

New § 1.501 provides a system for citation of patents and printed publications to the Patent and Trademark Office for placement in the patent file by any person during the period of enforceability of the patent in accordance with 35 U.S.C. 301. Seventeen persons commented on § 1.501. Nine comments indicated that citations should be limited to patents or printed publications. Six comments indicated that persons citing art should be required to apply it to at least one claim. Three persons held the opposite view. The final rule wording provides for citations limited to patents and printed publications where the person making the citation states the pertinency and applicability of the citation to the patent and the bearing the citation has on the patentability of at least one claim of the patent. The final rule provides that a citation made by the patent owner may include an explanation of how the claims differ from the prior art cited. Any citations which include items other than patents and printed publications will not be entered in the patent file. This does not, of course, limit in any manner the kinds and types of information which can be relied upon in protests against pending patent applications, whether such be original applications or reissue applications. Four persons stated that a separate letter requesting confidentiality should be required in cases desiring confidentiality. This provision was not considered to be necessary. One comment requested clarification of the term "period of enforceability of a patent." The meaning of this term appears to be clear since it includes any period for which recovery can be had for infringement. Under usual circumstances, this would be the term of the patent plus the six years provided by 35 U.S.C. 286. Five comments were received relating the paragraph (c) concerning service of citations on the patent owner. The wording has been clarified. A suggestion was made that prior art copies and translations of non-English documents be required. This suggestion was not adopted since such documents are not absolutely essential until a request for

reexamination has been filed. However, if the person citing the patents or printed publications desires that they be considered in any subsequent reexamination proceedings, copies and any necessary English translation should be included with the citation. A proposal was also made to charge a fee to prevent harassment. This proposal was not adopted since the mere citation of prior art is not considered to constitute harassment. A suggestion was made to change the title of the section. This suggestion was adopted in slightly modified form.

New § 1.510 sets forth procedures for any person to request reexamination in accordance with 35 U.S.C. 302. Paragraph (a) of new § 1.510 limits the period for such request to the period of enforceability of the patent for which the request is filed and requires payment of the fee for requesting reexamination. Paragraph (b) of new § 1.510 indicates what each request for reexamination must include. Paragraph (c) of new § 1.510 indicates under which conditions a request for reexamination will be considered. Paragraph (d) of new § 1.510 indicates the date on which the entire fee is received will be considered to be the date of the request for reexamination. Upon reconsideration of the paragraph as proposed, it was considered more appropriate to base the filing date of the request for reexamination on the receipt of the fee for requesting reexamination rather than include other matters. Proposed paragraph (d) has been amended accordingly and is adopted. Paragraph (e) of new § 1.510 covers amendments which a patent owner can propose. Such amendments can accompany a request for reexamination by the patent owner. The paragraph, with changes in wording for clarity, is adopted as proposed. A new paragraph (f) was added to clarify that requests for reexamination may be filed by attorneys or agents on behalf of a requester. Nineteen persons commented on § 1.510. One person inquired as to whether confidential requests would be accepted. In response thereto, § 1.510 provides that any person may file a request for reexamination. That person's name will not be maintained in confidence. One suggestion was made to permit comment and rebuttal before the decision under § 1.515. No need for such a procedure is seen since the only question to be considered is whether or not a substantial new question of patentability has been raised. An opportunity for comment and rebuttal is provided after the issuance of the order. One comment was received which desired provision for supplemental requests at a reduced fee. This proposal was not adopted since it is felt that all requesters should share equally in the cost. One comment was received which proposed that duplicate copies of the request be filed in the Office so that one copy would be available for public inspection at all times. This proposal was not adopted since it would appear to create more problems than it would solve. One comment was received that only "readily available" translations should be required. It is felt that if a document is considered to be sufficiently pertinent to request reexamination, that an English translation should be provided to insure complete and proper consideration. A suggestion was made relating to paragraph (b)(5) that direct service be limited to registered patent attorneys. No need for such a restriction is seen. Various other comments relating to procedures were considered but were not adopted.

New § 1.515 relates to a determination as to whether the request has presented a substantial new question of patentability under 35 U.S.C. 303. Paragraph (a) of new § 1.515 requires that the determination be made within 3 months of the filing date of the request. Paragraph (b) of new § 1.515 refers to the refund provisions. Paragraph (c) of new § 1.515 provides for review by petition to the Commissioner of any decision refusing reexamination. Seven persons commented on § 1.515. Several comments were received suggesting that the term "reexamination" should be dropped before "examiner". This proposal was adopted. Several persons requested that all art cited in the patent file at the time of the order under § 1.525 be considered when deciding whether a substantial new question of patentability is presented in the request. This is possible under the provision of § 1.515(a) which permits "consideration of other patents or printed publications", but is not required insofar as prior art not relied upon in the request is concerned. One person suggested that "is" be changed to "affirms" in paragraph (c). This proposal has been adopted. One commentator questioned whether a right to review was available under paragraph (c) if reexamination was ordered. No right to review exists in such a case because all claims will be reviewed in view of all prior art during the reexamination under § 1.550.

New § 1.520 provides for reexamination at the initiative of the Commissioner under the provisions of the last sentence of paragraph (a) of 35 U.S.C. 303. Six persons commented on § 1.520. One comment was received that indicated that the section did not include a reference to patents "discovered by the Commissioner" which is contained in 35 U.S.C. 303(a). This phrase has been added to the rule. A request was made that the sentence "Normally requests from outside will not be considered." be deleted from the rule. The sentence is being retained since the rule wording provides an easy reference for Office policy. Two comments were received that indicated a desire to have any decisions not to reexamine in Commissioner initiated situations be made part of the patent file. This proposal was not adopted since the basis for not reexamining may involve many policy issues in addition to whether a substantial new question of patentability exists in the case. If all papers in such a case would be made part of a file, it may lead to conclusions that there are no new questions of patentability when this question may not have been addressed because the reexamination was not ordered for other reasons such as little or no interest in a patent about to expire. One comment stated that the section safeguards the rights of the patentee. The language referring to the designation and delegation of authority to appropriate Patent and Trademark Office officials is deleted as unnecessary since the Commissioner's authority to designate and delegate is implicit and understood.

New § 1.525 provides for ordering reexamination where a substantial new question of patentability has been found pursuant to §§ 1.515 or 1.520. Six comments were received relating to § 1.525. One comment was made that the attorney should be able to return notices to the sender if he is unable to contact the patent owner. This topic has not been added to the rules but will be handled on a case by case basis. One comment requested that the patent owner have the option to request that the reexamination be performed by an examiner (1) other than the original examiner, or (2) other than the examiner who issued the order. Comments were also received on both sides of the question as to whether the original examiner should conduct the reexamination. In response, it would appear to be inappropriate to allow an interested party to select the examiner. Under the section, the only limitation placed on the selection of the examiner by the Office is that the same examiner whose decision was reversed on petition ordinarily will not conduct the reexamination. Paragraph (b) has been changed to provide that the notices published in the *Official Gazette* will be considered to be constructive notice.

New § 1.530 relates to the statement and proposed amendments provided for in the second sentence of 35 U.S.C. 304. Amendments submitted by the patent owner cannot enlarge the scope of a claim in the patent. Amendments will not be effectively entered into the patent until the certificate under § 1.570 and 35 U.S.C. 307 is issued. Nine comments were received on § 1.530. Several persons felt that the patent owner should be allowed to comment before the decision under § 1.515 is made. Providing for such a comment would delay the decision under § 1.515 which must be made within three months following the filing date of the request. Further, no need is seen for a statement relating to whether a new question of patentability is present since the patent owner has the opportunity to address any issues of patentability only after the first Office action. One comment questioned whether paragraph (d) also related to the description. This paragraph has been amended to clarify the matter. One person questioned whether an amendment could be filed with a statement. Paragraph (b) clearly answers this question in the affirmative. Several comments requested more time than two months for the patent owner to file a statement. In reply, the law in section 304 indicates that a reasonable period of not less than two months be provided for the patent owner's statement. If the period is too short in particular situations, extensions of time can be requested. It is felt that two months should be retained in the rule in view of the "Special Dispatch" required in reexamination cases. The proposed second sentence of paragraph (b) has not been adopted since § 1.525(b) now provides for the publication of notices of the filing of all requests which are accompanied by the proper fee.

New § 1.535 provides for reply by the reexamination requester to the statement under § 1.530 of the patent owner and for service on the patent owner of any such reply. The last sentence of proposed § 1.540 has been added as the last sentence

of § 1.535. Five persons commented on § 1.535. Four persons indicated that the requester should be given additional opportunity to comment. The reasons for the limited participation are that it is all that is required under the law, it prevents to a great degree, harassment of a patent owner, it results in a less expensive proceeding for all parties, and it results in an earlier conclusion of the proceedings.

New § 1.540 relates to the consideration of statements under § 1.530 and replies under § 1.535. One comment was received that the phrase "may result in their being refused" was worded too loosely. In the absence of any specific suggestion, the proposed wording is considered to be adequate and is adopted as proposed. In addition, it is appropriate that the Office retain discretion as to consideration in such cases.

New § 1.550 covers the basic items relating to the conduct of reexamination proceedings. These proceedings basically follow the same procedures used for examining patent applications. The patent owner will be required to serve the reexamination requester with any response by the patent owner to the Office, in order to remove the necessity of the requester having to continuously monitor the file wrapper. Fourteen persons commented on § 1.550.

Several persons commented that they felt that at least some input by third parties should be permitted. Paragraph (e) has been revised to permit third party input up until the time of the order. Several comments were received that the periods for response should be extended to be similar to those in regular application Office actions. Although problems may arise in certain cases and extensions of time may be granted, it is felt that relatively short response times are necessary in order to process reexaminations with "special dispatch." A question was raised as to the effect of failure to respond to an Office action. Paragraph (d) has been amended to clarify this matter.

New § 1.552 covers the scope of reexamination in a reexamination proceeding. While it is not intended that the examiners will routinely complete a new search when conducting reexamination, the examiners will be free to, and will, very likely, conduct additional searches and cite and apply additional prior patents and publications when they consider it is appropriate and beneficial to do so. Insofar as the actual reexamination is concerned, the examination as to original patent claims is only on the basis of patents or printed publications. However, narrowed amended claims or new claims limited to the original disclosure will also be examined for compliance with other sections of the statute (35 U.S.C. 112 and 132) which are necessary in order to ensure that any amended or new claims are supported, valid, and do not introduce new matter. New § 1.552 also provides that questions relating to matters other than those identified in paragraphs (a) and (b) of the section would merely be noted by the examiner as being an open question in the record. Patent owners could then file a reissue application if they wish such questions to be resolved. Ten persons commented on § 1.552. Several persons commented that the question of fraud should be considered in reexamination proceedings. Comments were also received that the proceedings should be limited to patents and printed publications. The rules have been written to follow the statute which speaks only to reexamination based on patents and printed publications. Mixed comments were also received concerning the retention of the second sentence of paragraph (c). The paragraph is being adopted as proposed with the addition of a reference to the fact that the examiner will note the existence of unresolved questions in an Office action. In addition, the phrase "raised or" has been deleted from paragraph (c) as unnecessary.

New § 1.555 covers the duty of disclosure by a patent owner in a reexamination proceeding involving the owner's patent. Nine persons commented on § 1.555. Four persons supported placing a duty of disclosure on the patent owner. One comment was received that an oath or declaration be required of the patent owner in a reexamination so as to minimize the appearance and occurrence of any fraudulent acts and to emphasize the patentee's obligation of candor. While the suggestion for an oath or declaration has not been adopted, § 1.555 does place an obligation of candor on the patent owner insofar as bringing patents or printed publications to the attention of the Office is concerned. The necessity for an oath or declaration in addition to the obligation placed on the patent owner by § 1.555 is not apparent at this time. Accordingly, the suggestion has not been adopted. Two persons felt the duty of disclosure should apply

to both the patent owner and requester. This proposal was not adopted since no sanction could be easily applied against the requester who violated such a rule. One person suggested broadening the duty requirements to include information in addition to patents and printed publications. Although such a practice may be desirable, no need is seen to require information under the reexamination rules which cannot be used during the reexamination. One person felt that there should be no duty of disclosure requirement in reexamination proceedings since the Office will be considering specific prior art and the presence or absence of other prior art does not seem terribly relevant. This suggestion was not adopted since the issue of patentability is not limited to the specific prior art presented and the duty to disclose is consistent with current practice under § 1.56. The section is adopted as proposed except for the indication that prior art statements should be filed in accordance with § 1.98. Also, the section has been divided into two sentences for clarity.

New § 1.560 relates to the conduct of interviews in reexamination proceedings. Seven comments were received directed to § 1.560. One comment requested elimination of interviews. This suggestion was not adopted since interviews have been found to be very helpful in resolving issues. Five comments were received which indicated that the requester should be permitted to attend all interviews. This suggestion was not adopted because of the otherwise ex parte nature of the examination. Two comments were received which indicated that interviews should be permitted before the first Office action. This suggestion was not adopted since such interviews would be held at a time when the Office has not yet taken a position on the allowability of the claims under reexamination. Section 1.560 is adopted as proposed.

New § 1.565 provides for the Commissioner to determine which, if any, proceedings should be stayed, consolidated, or suspended, if concurrent proceedings involving the patent under reexamination are instituted or in progress. Four comments were received concerning § 1.565. One comment pointed out the desirability of combining pending reexamination proceedings. This concept has been accepted and a new paragraph (c) has been added to cover this matter. Two comments voiced concern over the possibility of delay resulting from stayed, suspended or combined cases. Although some delay may result, it is felt that a resolution of all issues should occur at an earlier date. Decisions as to whether to delay or combine cases will be made on a case by case basis to minimize delays and to protect the interests of all parties concerned. One comment was made to allow the patent owner to comment prior to any decision to stay proceedings by the Commissioner. The desirability of such comment will be decided on a case by case basis and is not considered desirable for placement in the rules. The addition of paragraph (c) and the insertion of "is or" before "becomes" in the first sentence of paragraph (b) are the only changes from the proposed rule.

New § 1.570 concerns the issuance of the reexamination certificate under 35 U.S.C. 307 after conclusion of reexamination proceedings. The certificate will cancel any patent claims determined to be unpatentable, confirm any patent claims determined to be patentable, and incorporate into the patent any amended or new claim determined to be patentable. Three commentors mentioned § 1.570. Two persons questioned the statutory authority for paragraph (d). In response to the concern for statutory authority, it is the position of the Office that once all of the claims have been canceled from the patent, the patent ceases to be enforceable for any purpose. Accordingly, any pending reissue or other Office proceeding relating to a patent in which such a certificate has been issued will be terminated. This provides a degree of assurance to the public that patents with all the claims canceled via reexamination proceedings will not again be asserted. One commentor indicated that copies of the certificate should be part of subsequently sold copies of the patent. Such a practice is intended but is not being made part of the regulations.

Environmental, energy, and other consideration: The rule change will not have a significant impact on the quality of the human environment or the conservation of energy resources.

The rule change will not have a significant adverse economic impact on a substantial number of small entities (Regulatory Flexibility Act, Pub. L. 96-354).

The Patent and Trademark Office has determined that this rule change is not a major rule under Executive Order 12291.

[Text of adopted rules appears in 37 CFR, revised July 1, 1982.]

**Department of Commerce
Patent and Trademark Office
37 CFR Parts 1 & 5
[Docket No. 21223-259]**

Revision of Patent Procedure

Agency: Patent and Trademark Office, Commerce
Action: Final Rule.

Summary: The Patent and Trademark Office is amending the rules of practice in patent cases, Part 1 of 37 CFR, to implement the sections of Public Law 97-247 of 1982 which become effective on Feb. 27, 1983, and to make other miscellaneous changes. The other miscellaneous changes are being made to clarify and improve the rules where appropriate. The rulemaking also is amending Part 5 of 37 CFR to establish procedures for expediting the granting of a license under 35 U.S.C. 184 permitting the filing of a patent application in a foreign country.
Effective Date: Feb. 27, 1983.

For Further Information Contact: R. Franklin Burnett by telephone at (703) 557-3054 or by mail marked to his attention and addressed to the Commissioner of Patents and Trademarks, Washington, D.C. 20231.

Supplementary Information: This rule change is designed primarily to 1) implement the changes in practice in the Patent and Trademark Office provided for in Public Law 97-247 enacted on Aug. 27, 1982; 2) clarify or rewrite certain rules; and 3) expedite the granting of licenses under 35 U.S.C. 184.

This rule change contains a number of changes in practice designed to benefit both the Patent and Trademark Office in its handling of its mission and the public the Office serves. Certain of the changes are housekeeping in nature.

A number of final rules have already been issued to implement Public Law 97-247. A final rule on "Revision of Patent and Trademark Fees" was published on July 30, 1982 at 47 FR 33086-33112 with corrections in the printing thereof being published on Aug. 4, 1982, at 47 FR 33688 and on Aug. 5, 1982, at 47 FR 33959. The final rule was also published in the *Official Gazette* on Aug. 10, 1982, at 1021 O.G. 19-94. A final rule relating to definitions of "independent inventor" and "nonprofit organizations" was published on Sept. 10, 1982 at 47 FR 40134-40140 and on Sept. 21, 1982 at 1022 O.G. 29-46. A "Revision of Patent and Trademark Fees Confirmation" was published on Sept. 17, 1982 at 47 FR 41272-41283 and on Sept. 28, 1982 at 1022 O.G. 61-97. A final rule relating to the definition of "small business concern" was published on Sept. 30, 1982 at 47 FR 43272-43276 and on Oct. 19, 1982 at 1023 O.G. 23-29.

**Discussion of Specific Rules and Significant Differences
Between Proposed and Final Rules:**

Section 1.4

Section 1.4 is amended as proposed to add a reference to Subpart D relating to citation of prior art and reexamination.

Section 1.6

Section 1.6 is amended as proposed to insert "federal" before "holidays" in paragraphs 1.6(a)-(c) in accordance with § 21(b) of Title 35, United States Code, as amended by Public Law 97-247. New paragraph 1.6(d) will establish in the regulations a

procedure under which papers and fees which could not be filed on a particular date because of an interruption or emergency in the United States Postal Service which is so designated by the Commissioner, may be promptly filed after the ending of such a designated interruption or emergency and be considered as having been filed on that particular date. Authority for such a practice is found in § 21(a) of Title 35, United States Code, as amended by Public Law 97-247.

Section 1.7

Section 1.7 is amended as proposed to insert "federal" before "holiday" in accordance with 35 U.S.C. 21(b), as amended by Public Law 97-247.

Section 1.8

Section 1.8 is amended to remove in paragraph 1.8(a) the references to §§ 3.55 and 4.23, which sections were removed from the rules by the rulemaking entitled "Revision of Patent and Trademark Fees" published in the Federal Register on September 10, 1982 at 47 Fed. Reg. 40134-40140. The change in paragraph 1.8(a)(i) results from the change made in § 111 of Title 35, United States Code, by Public Law 97-247. Under the revised rule, the certificate of mailing procedure would be available for filing patent oaths or declarations and filing fees. However, the certificate of mailing procedure could not be used for filing patent specifications and drawings to obtain a filing date. Such papers can be filed under new § 1.10. The final rule clarifies that each paper or fee filed under § 1.8 must include its own certificate of mailing. The proposed amendment to § 1.8(a)(viii) referring to the Court of Appeals for the Federal Circuit rather than to the Court of Customs and Patent Appeals, has been adopted as a final rule as published on Oct. 26, 1982 at 47 FR 47380-47382 and therefore is not republished here.

Section 1.10

Section 1.10 is amended as proposed to provide a procedure for assigning the date on which any paper or fee is deposited as "Express Mail" with the United States Postal Service as the filing date of the paper or fee in the Patent and Trademark Office. Authority for the Commissioner to establish such a procedure is provided in § 21(a) of Title 35, United States Code, as amended by Public Law 97-247 for any paper or fee required to be filed in the Patent and Trademark Office. This procedure covers the filing of all documents, including patent and trademark applications, and fees since they are required to be filed in the Patent and Trademark Office for processing. Questions were raised during the public hearing and in the written comments regarding the authority of the Commissioner to promulgate § 1.10 insofar as it would provide for the use of "Express Mail" to file patent and trademark applications. The argument advanced was that the amendment of 35 U.S.C. 21(a) by Public Law 97-247 did not permit the Commissioner to adopt rules whereby "Express Mail" could be used to file patent and trademark applications since such applications are not papers or fees "required to be filed in the Patent and Trademark Office." It was urged that this language of 35 U.S.C. 21(a), in conjunction with amended 35 U.S.C. 111 which states that the "filing date of an application shall be the date on which the specification and any required drawing are received in the Patent and Trademark Office," prevents adoption of proposed § 1.10.

The arguments presented are not supported by the legislative history or by the literal language of the statute. Section 111 of Title 35, United States Code, before and after Public Law 97-247, requires patent applications to be made "in writing to the Commissioner." This is apparent from the first sentence of 35 U.S.C. 111 which provides that [a]pplication for patent shall be made. . . in writing to the Commissioner." Thus, one seeking a patent is "required" to make application for the same "in writing to the Commissioner." The written application clearly constitutes a "paper or fee required to be filed in the Patent and Trademark Office." Section 21(a) of Title 35, United States Code, authorizes the Commissioner to adopt rules whereby "any paper or fee required to be filed in the Patent and Trademark Office will be considered filed in the Office on the date on which it was deposited with the United States Postal Service." The authority provided by section 21(a) extends to "any paper or

fee" to which the Commissioner, by an appropriate rulemaking, so extends it. The Commissioner can, therefore, by rule, establish that "any paper or fee," including a patent or trademark application, is "filed" or "received in the Patent and Trademark Office" when it is deposited with the United States Postal Service. The terms "filed" and "received" as used in 35 U.S.C. 21(a) and 111 can therefore be given the same meaning by an appropriate rulemaking by the Commissioner.

The legislative history, H.R. Rep. No. 542, 97th Cong., 2nd Sess. 8A (1982), clearly supports the interpretation set forth herein. In discussing new subsection (a) which has been added to section 21 of Title 35, United States Code, the Report emphasizes that the authority extends to "any paper or fee which is required to be filed" in the Patent and Trademark Office. The Report specifically states that the "requirements governing whether any given paper or fee may be given the filing date of the day on which it was . . . deposited with the United States Postal Service will be set forth in regulations established by the Commissioner." Clearly no restrictions were placed by the statute or the legislative history on the types of papers or fees which the Commissioner can consider as having been filed in the Patent and Trademark Office on the date of deposit with the United States Postal Service.

The new procedure, in paragraph 1.10(a), requires the use of the "Express Mail Post Office to Addressee" service of the United States Postal Service. This service provides for the use of a mailing label on which the Post Office clearly indicates the date on which it was deposited. Paragraph 1.10(b) requires (1) that the number of the "Express Mail" mailing label be placed on each paper or fee and (2) that a certificate of mailing by "Express Mail", signed by the person mailing the paper or fee, be included on each paper or fee and state the date of deposit as "Express Mail" in the United States Postal Service. The requirement that each paper or fee have the number of the "Express Mail" mailing label and the certificate of mailing by "Express Mail" included thereon is necessary so that the Patent and Trademark Office can verify when each paper or fee was filed if questions relating thereto arise. The number and certificate must be placed on each separate paper and each fee transmittal either directly on the document or by a separate paper firmly and securely attached thereto. It is not necessary that the number and certificate be placed on each page of a particular paper or fee transmittal. Merely placing the number and certificate in one prominent location on each separate paper or fee transmittal will be sufficient.

Under new paragraph 1.10(c), the Office will accord the paper or fee the date of deposit as "Express Mail" as the filing date without further proof unless a question is present regarding the date of mailing. If, however, more than a reasonable time has elapsed between the certificate date and the Patent and Trademark Office receipt date, or if other questions regarding the date of mailing are present, new paragraph 1.10(c) provides that the person mailing the paper or fee may be required to file (1) a copy of the "Express Mail" receipt showing the actual date of mailing and (2) a statement from the person who mailed the paper or fee averring to the fact that the mailing occurred on the date certified. Such statement must be a verified statement (oath or declaration) unless made by a person registered to practice before the Patent and Trademark Office.

The certificate of mailing procedure of § 1.8(a) continues to be available in addition to the proposed procedure under § 1.10. The final rule (§ 1.10) has been changed from that proposed to allow for a reasonable time between mailing and delivery rather than only for one day since actual delivery in one day is not always provided from all areas of the country. The final rule clarifies that each paper or fee must include its own certificate of mailing by "Express Mail." This rule is being promulgated at this time so that individuals who desire to use the service may do so after the effective date.

The "Express Mail" service is seen to be preferable to other types of postal services because a readily legible mailing date is provided to both the applicant and the Patent and Trademark Office on the "Express Mail" label. Also, the labels are of uniform size and can therefore be kept on file relatively easily by the Office, if such is determined to be necessary or desirable. Registered mail and certified mail, on the other hand, provide only a postmark for the mailing date when such mail arrives

in the Patent and Trademark Office and such postmarks are often illegible. Also, such mail arrives in various size envelopes which do not easily lend themselves to being filed so that the postmark may be retained. Administrative burdens including lack of certainty of mailing date and storage are considered greater for registered or certified mail than for "Express Mail." The Patent and Trademark Office will monitor closely the use of "Express Mail" by the public and may reconsider permitting the use of other forms of service provided by the United States Postal Service.

Section 1.17

Section 1.17, paragraph (h), is amended as proposed to remove the reference to § 1.45 and add a reference to new § 1.48 relating to the correction of inventorship in patent applications.

Section 1.22

Section 1.22 is amended to recognize that filing dates may be assigned without payment of the basic filing fee as authorized by § 111 of Title 35, United States Code, as amended by Public Law 97-247. New paragraph 1.22(b) indicates that fees paid to the Office should be itemized in such a manner that the purpose for which the payment is submitted can be clearly determined by Office personnel for proper processing. The final rule includes clarification that it refers to patent and trademark fees and charges.

Section 1.24

Section 1.24 is amended as proposed to remove the reference to coupons in denominations of forty cents since coupons in this denomination are no longer necessary.

Section 1.41

Section 1.41 is amended as proposed to require in paragraph 1.14(a) that a patent be applied for in the name of the actual inventor or inventors and that the full names of the inventors be stated. Paragraph 1.41(b), as amended, clarifies the definition of the word "applicant". New paragraph 1.41(c) permits any person authorized by the applicant to file an application for patent in order to receive a filing date on behalf of the inventor or inventors, but the oath or declaration for the application must be made by all of the actual inventors in accordance with §§ 1.63 and 1.64. Under new paragraph 1.41(d), a showing may be required from the person initially filing an application that the filing was authorized.

Sections 1.42 and 1.43

Sections 1.42 and 1.43 are amended as proposed to remove the requirement that the legal representative sign the application papers in view of the changes in 35 U.S.C. 111, as amended by Public Law 97-247. The oath or declaration must still be signed. Several occurrences of the masculine gender in § 1.42 have been removed.

Section 1.45

Section 1.45 is amended as proposed to remove present paragraphs 1.45(b) and (c) in view of new § 1.48 and remove the requirement that joint inventors sign the application papers. The joint inventors are, however, still required to make the oath or declaration in accordance with new §§ 1.63 and 1.64.

Section 1.46

Section 1.46 is amended as proposed, with two commas being added for clarity, to permit anyone to file the application if authorized by the inventor or inventors or one of the persons mentioned in §§ 1.42, 1.43, or 1.47.

Section 1.47

Section 1.47 is amended as proposed to change the reference for the rule on oaths or declarations from § 1.65 to § 1.63.

Section 1.48

Section 1.48 adds a new section relating to correction of inventorship as authorized by § 116 of Title 35, United States Code, as amended by Public Law 97-247. Under § 1.48, if the correct inventor or inventors are not named in an application for patent, the application could be amended to name only the actual inventor or inventors so long as the error in the naming of the inventor or inventors occurred without any deceptive intention on the part of the actual inventor or inventors. Section 1.48 requires that the amendment be diligently made and be accompanied by (1) a petition including a statement of facts verified by the original named inventor or inventors establishing when the error without deceptive intention was discovered and how it occurred; (2) an oath or declaration by each actual inventor or inventors as required by § 1.63; (3) the fee set forth in § 1.17(h); and (4) the written consent of any assignee. Correction will be permitted, if diligently requested, in cases where the person originally named as inventor was in fact not the inventor of the subject matter contained in the application. If such error occurred without any deceptive intention on the part of the true inventor, the Office has the authority to substitute the true inventor for the erroneously named person. If deceptive intention was present on the part of other individuals substantively involved in the preparation or prosecution of the application their conduct will be considered and appropriate action taken under 37 CFR 1.56. Although probably rarer, instances such as changes from a mistakenly identified sole inventor to different, but actual, joint inventors; conversions from erroneously identified joint inventors to different but actual, joint inventors; and conversions from erroneously identified joint inventors to a different, but actual, sole inventor will also be permitted. In each instance, however, the Office will have to be assured of the presence of innocent error, without deceptive intention on the part of the true inventor or inventors, before permitting a substitution of a true inventor's name. The final rule language has been modified from that proposed to follow more precisely the language of the statute and the legislative history by permitting correction where the error occurred without any deceptive intention on the part of the actual inventor or inventors.

Section 1.51

Section 1.51 is amended to change the reference in paragraph (a)(2) to new § 1.63 for the requirements of an oath or declaration and to change paragraph (b) with regard to the required time for filing information disclosure statements. The final rule has been modified from that proposed by eliminating the word "material" before the "information disclosure statement" and the title has been changed to substitute "a complete" for "an" to be more precise.

Section 1.52

Section 1.52 is amended as proposed to revise paragraph 1.52(c) relating to interlineations, erasures, cancellations or other alterations in application papers to specify that such changes must be made before the signing of any accompanying oath or declaration and should be dated and initialed or signed by the applicant on the same sheet of paper. Paragraph 1.52(c), as amended, prohibits making alterations in the application papers after the signing of an oath or declaration referring to such application papers. Under paragraph 1.52(c), as amended, amendments to application papers made after the signing of an oath or declaration referring to the application papers can only be made in the manner provided by §§ 1.121 and 1.123-1.125.

Section 1.53

Section 1.53 is amended to revise the title to indicate that the section, as amended, relates to application serial numbers, filing dates and completion of applications. Paragraph 1.53(a) indicates that a serial number is assigned to any filed application for identification purposes, even if the application is incomplete or informal. Paragraph 1.53(b) provides that a filing date is assigned to an application as of the date a specification containing a description and claim and any required drawing are

filed in the Patent and Trademark Office. Although the filing fee and oath or declaration can be submitted later, no amendments can be made to the specification or drawings which will introduce new matter. This practice is authorized by 35 U.S.C. 111 as amended by Public Law 97-247. New paragraph 1.53(c) provides for notifying applicant of any application incomplete because the specification or drawing is missing and giving the applicant a time period to correct any omission. If the omission is not corrected within the time period given, the application will be returned or otherwise disposed of and a handling fee of \$50.00 will be retained from any refund of a filing fee. New paragraph 1.53(d) provides that, where a filing date has been assigned to a filed specification and drawing, the applicant will be notified and be given a period of time in which to file the missing fee, oath or declaration and to pay the surcharge due. The time period the Office plans to set is one month from the date of notification by the Patent and Trademark Office, but in no case less than two months after the date of filing of the application. New paragraph 1.53(e) indicates that a patent application will not be forwarded for examination on the merits until all required parts have been received. New paragraph 1.53(f) indicates that international applications filed under the Patent Cooperation Treaty which designate the United States of America are considered to have a United States filing date under PCT Article 11(3), except as provided in 35 U.S.C. 102(e), on the date the requirements of PCT Article 11(1)(i) to (iii) are met. Paragraphs 1.53(b) and (c) have been modified from those proposed by changing the word "received" to the word "filed." The word "receipt" in paragraph 1.53(c) has also been changed to "filing". These changes have been made to ensure that the language of § 1.53 cannot be considered to conflict with the use of "Express Mail" to file patent applications and obtain a filing date as of the date of deposit as "Express Mail" with the United States Postal Service.

Section 1.54

Section 1.54 is amended as proposed to designate the existing section as paragraph (a) and add a reference to § 1.53. Paragraph 1.54(b) is added to indicate that applicant will be informed of the serial number and filing date of the application.

Section 1.55

Section 1.55 is amended to limit the section to claims for foreign priority by removing paragraphs (a) and (d) and redesignating paragraphs (b) and (c) as paragraphs (a) and (b). Paragraph 1.55(a) is amended to change the reference from § 1.65 to new § 1.63. The final rule language includes a reference to 35 U.S.C. 172 which modifies 35 U.S.C. 119 for design patents.

Section 1.56

Section 1.56 is amended to revise paragraph (c) to remove reference to signing of the application but to add reference to signing of the oath or declaration pursuant to new § 1.63. Paragraph 1.56(c) has also been modified from that proposed to break it down into four items as suggested by a comment. Under paragraph 1.56(c), an application may be stricken from the files if an oath or declaration pursuant to § 1.63 is signed in blank, is signed without review of the oath or declaration by the person making the oath or declaration, or is signed without the review of the specification, including the claims, as required by § 1.63(b). Paragraph 1.56(c) also provides for an application to be stricken from the files if application papers filed in the Office are altered after the signing of an oath or declaration pursuant to § 1.63 referring to those application papers.

Section 1.57

Section 1.57 is removed as proposed since the requirements relating to applicant's signature to the oath or declaration of the application are adequately covered in other sections.

Section 1.59

Section 1.59 is rewritten as proposed to refer to and conform with the changes proposed in § 1.53.

Section 1.60

Section 1.60 is amended to require the applicant to supply a copy of the originally signed application in all cases where the § 1.60 filing procedure is used. The Office will no longer prepare copies. The Office, by a separate final rule, published at 47 F.R. 47242 on Oct. 25, 1982, has adopted a new § 1.62 to provide for the filing of a file wrapper continuing application which greatly lessens the need for the Office to continue to prepare copies under § 1.60. The final rule language makes clear that the statement accompanying a true copy of the parent application must be a verified statement unless made by a person registered to practice before the Office.

Section 1.62

Section 1.62 is amended to avoid inconsistency with 35 U.S.C. 111 which becomes effective on Feb. 27, 1983. 35 U.S.C. 111 as of that date permits filing dates to be granted to patent applications without receipt of the basic filing fee, or oath or declaration. Section 1.62 is therefore being amended to permit the granting of a filing date in accordance with § 111. This amendment of § 1.62 is necessary to ensure compliance with 35 U.S.C. 111. The Patent and Trademark Office finds that it would be impractical not to amend § 1.62 so as to grant a filing date in accordance with 35 U.S.C. 111 and not doing so might also be construed to prevent applicants from taking advantage of the provisions of 35 U.S.C. 111 authorizing the delay in the filing of the fee and oath or declaration. If § 1.62 is not amended in the manner set forth in this final rule, questions may be raised as to compliance with 35 U.S.C. 111 as it will exist effective Feb. 27, 1983. Revised paragraph 1.62(a) indicates the minimum requirements for granting of a filing date. Paragraphs 1.62(b) and (c) cover the filing fee and oath or declaration requirements, respectively. Paragraph 1.62(d) relates to later filing of the filing fee or oath or declaration as provided for in 35 U.S.C. 111. Paragraphs 1.62(e)-(i) are identical to former paragraphs 1.62(b)-(f).

Section 1.63

Section 1.63 is added to replace 1.65 relating to the required content and execution of an oath or declaration filed as a part of a patent application and is intended to state the minimum contents thereof. An applicant may, if desired, choose to include one or more additional averments in the oath or declaration such as, for example, stating that the patent is not barred under the provisions of 35 U.S.C. 102. Paragraph 1.63(a) provides that the oath or declaration, (1) be executed in accordance with § 1.66 or § 1.68, (2) identify the specification to which it is directed in some definite manner such as giving the title of the invention or serial number of the application, if previously filed, (3) identify each inventor and his or her residence and country of citizenship, and (4) state whether the inventor is a sole or joint inventor of the claimed invention.

Paragraph 1.63(b) further requires the oath or declaration to state that the person signing the oath or declaration (1) has reviewed and understands the contents of the identified specification, (2) believes the named inventor is the original and the first inventor, and (3) acknowledges the duty to disclose information which is material. While paragraph 1.63(b) requires the person signing the oath or declaration to review and understand the specification including the claims, it is not intended to require that such person be skilled in patent law so as to grasp the legal implications of claim language and drafting. The person must recognize, however, that what is being claimed is the subject matter which that person regards as his or her invention pursuant to 35 U.S.C. 112.

Paragraph 1.63(c) requires that any application in which a claim for foreign priority is made identify in the oath or declaration the foreign application for patent or inventor's certificate on which priority is claimed, and any foreign application having a filing date before that of the application on which priority is claimed.

Paragraph 1.63(d) requires that the oath or declaration in a continuation-in-part application, which discloses and claims subject matter in addition to that disclosed in the prior copending application, state that the person making the oath or declaration acknowledges the duty to disclose material information as de-

fined in § 1.56(a) which occurred between the filing date of the parent application and the national or PCT international filing date of the continuation-in-part application. This latter requirement is not new, but is included to serve as a reminder to the person making the oath or declaration of this duty to disclose material information such as foreign patenting, publication, or public use or sale in the United States which occurred more than one year prior to the filing date of the continuation-in-part application. For example, in circumstances where the claims of the continuation-in-part application are not fully supported by the disclosure of the parent application so as to be entitled to an earlier effective filing date under 35 U.S.C. 120, the duty to disclose extends to any material information, as defined in § 1.56(a) measured from the filing date of the continuation-in-part application. This would include the first foreign patenting, and any foreign patenting subsequent to the first which materially differs therefrom, of the subject matter of the parent application which occurred more than one year prior to the national or PCT international filing date of the continuation-in-part application. Any publication of the parent application, other than foreign patenting, or any public use or sale in the United States of the subject matter of the prior application, which occurred more than one year prior to the national or PCT international filing date of the continuation-in-part application, would also come within § 1.56(a) in such circumstances. See *In re Ruscetta and Jenny*, 118 U.S.P.Q. 101 (C.C.P.A. 1958); *In re van Langenhoven*, 458 F. 2d 132, 173 U.S.P.Q. 426 (C.C.P.A. 1972), and *Chromalloy American Corp. v. Alloy Surfaces, Co., Inc.*, 339 F. Supp. 859, 173 U.S.P.Q. 295 (Del. 1972).

Section 1.64

Section 1.64 is added as proposed to clearly indicate who must sign the oath or declaration of a patent application.

Section 1.65

Section 1.65 is removed as proposed because the oath or declaration requirements set forth therein are covered by new § 1.63.

Section 1.67

Section 1.67 is amended as proposed to remove all of paragraphs (a) and (b) and substitute therefor new wording. Paragraph 1.67(a) indicates that a supplemental oath or declaration meeting the requirements of new § 1.63 may be required to correct deficiencies or inaccuracies present in an earlier oath or declaration. Paragraph 1.67(b) requires a supplemental oath or declaration to be filed (1) when a claim is presented embracing material not originally claimed and (2) when a subsequently filed oath or declaration under § 1.53(d) refers to an amendment which includes improper new matter. Paragraph 1.67(b) also clearly states the prohibition against entry of new matter after the filing date of the application.

Section 1.69

Section 1.69, paragraph (b), is amended as proposed to change the time at which a translation of a non-English language oath or declaration which has not been supplied by the Office must be filed. The time period for filing the translation is changed to two months after notification that a translation is required. The reference to § 1.65 in paragraph 1.69(b) is changed to § 1.63.

Section 1.70

Section 1.70 is amended to refer to § 1.63 for the requirements to be met when an oath or declaration is filed under 35 U.S.C. 371(c)(4). The wording of the title in the final rule is changed to reflect more clearly the subject matter of the rule.

Section 1.77

Section 1.77 is amended as proposed to change paragraphs (h) and (i) to refer to the abstract of the disclosure and signed oath or declaration, respectively.

Section 1.97

Section 1.97 is amended to change the title from "prior art statement" to "information disclosure statement". This change is appropriate since the designation "information disclosure statement" more accurately characterizes the nature and content of the information which may be included in such a statement. Information which is required to be submitted pursuant to § 1.56 may ultimately be determined not to be "prior art," but nevertheless may be "material" pursuant to § 1.56. Section 1.97 has also been modified from that proposed by eliminating the word "material" since information submitted pursuant to § 1.97 may be considered to be of questionable materiality or may be determined, upon examination, not to be "material". Section 1.97 now provides that an information disclosure statement should be filed with the application or within the later of three months after the filing date of the application or two months after applicant receives the filing receipt. Paragraph 1.97(b) has been amended in recognition that applicant may choose to furnish other material information in another manner or statement. Paragraph 1.97(b) now also refers to section 1.56(a) for the definition of "material information". The amendments to paragraph 1.97(b) do not in any manner reduce the obligation to submit material information as defined in § 1.56(a).

Section 1.98

Section 1.98 indicates that information disclosure statements should list prior art with all of the information which is required to print such citations on the front page of a patent. The final rule states clearly that the publication date indicated on the document should be submitted. This will not serve to preclude a showing of a different, actual publication date. Another purpose of the citation requirements in this section is to permit ready reference to the document from its citation.

Section 1.99

Section 1.99 is amended to change the title to be consistent with the amendment to § 1.97.

Section 1.101

Section 1.101 is amended to indicate specifically that applications which are to have their examination advanced pursuant to § 1.102 will be taken up for examination out of order by the examiner. The final rule is also modified to set out when international applications which have complied with the requirements of 35 U.S.C. 371(c) are taken up for action.

Section 1.118

Section 1.118 is amended as proposed to designate the previous section as new paragraph (a) and amend it to clearly state that no new matter may be introduced into an application and to make specific reference to §§ 1.53, 1.63 and 1.67. New paragraph 1.118(b) indicates how improper amendments which introduce new matter in the specification or claims will be handled by the examiner.

Section 1.123

Section 1.123 is amended to require all corrections to drawings to be made by bonded draftsmen at applicant's expense since the Office does not have sufficient draftsmen to make such corrections. Sketches of any desired corrections will, however, still require approval of the examiner. The final rule makes clear that changes in the drawing may be made by submission of substitute drawings.

Section 1.125

Section 1.125 is amended to relax the prohibition against substitute specifications which are not required by the examiner. The section, however, adds the requirement that any substitute specification filed must be accompanied by a statement that the substitute specification includes no new matter. Under the section the statement must be a verified statement if made by a person not registered to practice before the Office. The final

rule specifies that a substitute specification may not be accepted unless it is clear to the examiner that processing of the application would be facilitated thereby.

Section 1.131

Section 1.131 is amended as proposed to refer to the use of affidavits or declarations under the section during reexamination of a patent as long as the patent upon which the rejection is based does not claim the rejected invention. Section 1.131 cannot be used to overcome a rejection based upon a United States patent claiming the rejected invention. This is true regardless of whether the rejected claims are contained in an application being examined or a patent being reexamined. Section 1.131 is inapplicable if the same invention is being claimed by the United States patent upon which the rejection is based. Under the section as amended, the same person or persons who would make the affidavit or declaration in an application will be required to make the affidavit or declaration on behalf of the owner of the patent under reexamination.

Section 1.132

Section 1.132 is amended as proposed to refer to the use of affidavits or declarations under the section during reexamination of a patent.

Section 1.137

Section 1.137 is amended as proposed to except from the provisions of paragraph (b) those applications abandoned pursuant to § 1.53(d) because the fee, oath, or declaration and the surcharge were not submitted. Section 111 of Title 35, United States Code, as amended by Public Law 97-247, requires that any delay in submission of the fee and oath be shown to be unavoidable. Thus, paragraph (b) of § 1.137 permitting revival where abandonment was unintentional is inapplicable to the revival of applications which become abandoned pursuant to § 1.53(d).

Section 1.141

The proposed amendments to § 1.141 are withdrawn *infra* to permit the public to study the issues involved and make any further recommendations considered appropriate.

Section 1.153

Section 1.153 is amended to change the reference for oath and declaration requirements from § 1.65 to § 1.63 and to conform the language of the rule to be consistent therewith.

Section 1.154

Section 1.154 is amended as proposed to revise paragraph (e) to refer to the signed oath or declaration requirements of § 1.153(b).

Section 1.162

Section 1.162 is amended as proposed to change the reference from § 1.65 to § 1.63.

Section 1.163

Section 1.163 is amended as proposed to change the wording of the section to clearly indicate that a signed oath or declaration is required rather than a signed specification.

Section 1.172

Section 1.172 is amended to indicate clearly that the reissue oath is signed and sworn to rather than the reissue application. The final rule has been modified from that proposed by referring to a "reissue oath" rather than to "reissue oaths".

Section 1.174

Section 1.174 is amended as proposed to remove the requirement that photoprints of original drawings be securely mounted

or pasted on sheets of drawing board because paper drawings are acceptable.

Section 1.175

Section 1.175 is amended as proposed to change the reference to the oath or declaration from § 1.65 to § 1.63.

Sections 1.301, 1.302 and 1.303

The proposed amendments to sections 1.301, 1.302 and 1.303, referring to the Court of Appeals for the Federal Circuit rather than to the Court of Customs and Patent Appeals, have been adopted as final rules as published on Oct. 26, 1982 at 47 FR 47380-47382 and corrected on Nov. 5, 1982 at 47 FR 50142 and therefore are not republished here.

Section 1.324

Section 1.324 is amended to include wording similar to that in § 1.48 for correction of inventorship in applications.

Section 1.325

Section 1.325 is amended as proposed to include reference to the reexamination procedure.

Section 1.335

Section 1.335 is added as proposed to provide a new section relating to the filing in the Patent and Trademark Office of notices of arbitration awards. Such filing is required under § 294 of Title 35, United States Code, as added by Public Law 97-247. The final rule has also been modified in response to a comment to indicate that the notices of arbitration awards are intended to be placed in the patent files.

Section 1.565

The proposed amendments to § 1.565 are withdrawn *infra* to permit the public to study the issues involved and make any further recommendations considered appropriate.

Section 5.12

Section 5.12 is amended as proposed to separate the section into two paragraphs. Paragraph (a) provides that the filing of an application for an invention made in the United States is considered to include a petition for a license for foreign filing. If a license is granted, it will be indicated on the filing receipt. If it is not granted, no indication of the denial will appear. Failure to grant a license should be considered a denial of a first petition for a license. A subsequent petition may be filed under § 5.12(b). Section 5.12(b) is essentially the text of § 5.12 in its previous form. No rights to file a petition for license are being removed.

Withdrawal of Proposed Amendments To Sections 1.141 and 1.565.

A number of the speakers at the public hearing held on Dec. 16, 1982, urged that the amendments to §§ 1.141 and 1.565 be deferred or dropped pending further study. Those urging that the proposed amendments to § 1.141 not be adopted at this time included speakers from the American Patent Law Association, from Committee 103 of the American Bar Associations's Patent, Trademark & Copyright Section, and from the Bar Association of the District of Columbia. The Boston Patent Law Association urged that the amendment to § 1.565 be removed or held in abeyance. The American Patent Law Association indicated that more time was needed for its committees to analyze the issues in the proposed amendments to §§ 1.141 and 1.565.

In response to the recommendations received at the public hearing, the proposed amendments to §§ 1.141 and 1.565 are being withdrawn at this time to permit the public to study the issues involved and make any further recommendations considered appropriate. Pending the further study referred to by the speakers at the hearing and consideration of any recommendations resulting therefrom, the Office will continue to operate under present §§ 1.141 and 1.565 as interpreted by the Manual

of Patent Examining Procedure and relevant Patent and Trademark Office and judicial precedents.

Responses to Comments on the Rules

Specific comments were received on a number of the sections. All of the comments, including the written comments and the oral testimony, were considered in adopting the changes set forth herein.

Forty-eight letters presenting written comments were received and seven persons testified at the public hearing on Dec. 16, 1982.

Comments appear below along with responses thereto.

Comment:

One comment objected to inadequate notice regarding these proposed rule changes.

Reply:

The proposed rules notice was published in the *Federal Register* on Oct. 27, 1982. This is more than seven weeks prior to the date of the hearing and four months prior to the effective date of the final rules. Such periods are considered to be reasonable in view of the fact that the legislation requiring the rule changes was only enacted on Aug. 27, 1982 and that other rule changes were required to be implemented by Oct. 1, 1982.

Comment:

One comment proposed that "Patent and Trademark Office" should be used in the rules rather than merely "Office".

Reply:

The proposal has been adopted in the final rules in those locations where confusion may otherwise result.

Comment:

Five comments requested that promulgation of §§ 1.10, 1.63, 1.97, 1.141 and 1.565(e) be delayed and the period for comment extended until Mar. 30, 1983.

Reply:

Amendments to §§ 1.141 and 1.565 are not being promulgated at this time to provide time for further consideration and study as requested. If after study, a rule change is felt desirable, a new proposal will be issued. New § 1.10 is being promulgated to make it available to applicants as it was intended in the statute. New § 1.63 is being added and § 1.65 deleted to reduce the formal statements required. If desired, the old oath and declaration forms may continue to be used if the statement is included that applicant "has reviewed and understands the contents of the specification, including the claims". For continuation-in-part applications, it is necessary to also include language in conformance with § 1.63(d). Section 1.97 is being promulgated to remove problems relating to the time period in the current wording and to clarify the section in general.

Comment:

One person questioned why Sunday was not mentioned in § 1.6(b) or (c).

Reply:

Section 1.6(b) and (c) are limited to weekdays which by definition excludes Sunday.

Comment:

Two comments were received which proposed that only a certificate of mailing procedure as in § 1.8(a) be used for determining the date of deposit under 35 U.S.C. 21

Reply:

The filing date of an application is considered to be much more critical than the filing dates of papers accepted under § 1.8. The application filing date is often critical for determining if a statutory bar exists, whether foreign priority can be claimed and who is the senior party in an interference. Therefore, papers filed for purposes of receiving an application filing date should have some clear indication of the date of receipt by the United States Postal Service. Such a practice would also probably require storing all of the envelopes in the file wrapper for record purposes.

Comment:

Three comments were received which stated that private courier services should also be provided for in § 1.10.

Reply:

Section 21(a) as amended by Public Law 97-247 provides for filing dates being given only when "deposited with the United States Postal Service." Although private courier services may be used to deliver papers to the Patent and Trademark Office, the actual date of receipt by the Patent and

Trademark Office will be considered to be the filing date.

Comment:

A comment was received which argued that the Post Office date stamp should be stamped on the mailing label instead of having to enter the label number on each document.

Reply:

Stamping the mailing label would not add anything since the postal clerk receiving the "Express Mail" must already indicate the date and time of deposit and initial the label. A purpose of placing the label number on each paper is to permit several papers to be placed in a single envelope. The mailing labels may be retained in the Patent and Trademark Office for later verification.

Comment:

Seven comments were received that the requirement that the item be received the following day (§ 1.10(b)) was unnecessarily restrictive.

Reply:

Section 1.10 does not require that the item be received the next day in the Patent and Trademark Office in order to receive the date of deposit as the mailing date. The one day reference has been deleted. Further proof of mailing may be required where an unreasonable period of time is involved and supporting evidence is not otherwise available to the Patent and Trademark Office. Documents deposited with the United States Postal Service will be given a filing date which corresponds to the date of receipt indicated by the postal clerk on the "Express Mail" mailing label.

Comment:

Four comments indicated that § 1.10 does not assist in placing applicants and attorneys outside the Washington area on the same footing as those in Washington.

Reply:

The main purpose of § 1.10 is to implement 35 U.S.C. 21(a) in a manner which would provide for granting filing dates for papers and fees as of the date of their deposit with the United States Postal Service. Certainly these provisions using "Express Mail," together with the certificate of mailing procedure available under § 1.8, will go a long way in reducing last minute deliveries to the Patent and Trademark Office by persons outside the Washington area.

Comment:

Two comments stated that the comments accompanying § 1.10(c) should be clarified to explain the meaning of "more than one day."

Reply:

The final rule has been clarified.

Comment:

It was proposed by one person that the "affidavit or declaration" under § 1.10(c) be waived if the statement is made by a registered attorney or agent.

Reply:

The suggestion has been adopted.

Comment:

It was indicated by one person that certified mail provides proof of mailing date under § 1.10 by virtue of the Post Office stamp on the certified mail receipt card.

Reply:

The information on the certified mail receipt card is of no benefit to the Patent and Trademark Office since it is immediately returned to the sender. The Patent and Trademark Office would not be able to retain any information which gives proof of the date of mailing.

Comment:

Three comments raised questions as to the need to make the acceptance of the "Express Mail" contingent upon the performance of the Post Office in § 1.10(c).

Reply:

The acceptance of the "Express Mail" is not contingent upon "next day delivery". The reference in § 1.10(c) to proof of mailing merely provides a basis for the Office requiring proof of mailing where an explanation appears to be necessary to clarify the record. Such information is expected to be required only in a few instances. The rule has also been revised to clarify this matter.

Comment:

Five persons suggested the use of registered or certified U.S. mail for obtaining filing dates under 35 U.S.C. 21.

Reply:

Registered mail does not provide any information or evidence to the Patent and Trademark Office as to the date of mailing other than the postmark, which is often unreadable. Storage of envelopes containing such postmarks is also burdensome. The deficiency of certified mail has already been discussed.

Comment:

One person questioned what treatment will be accorded a paper placed in an "Express Mail" box receptacle after the box has been cleared for the last time on a given day.

Reply:

The paper will be considered to be deposited as of the date of receipt indicated on the "Express Mail" mailing label by the Postal Service clerk.

Comment:

One person commented that he found the idea of using a declaration or affidavit to establish a date of deposit unacceptable because it exposes the integrity of the assignment of filing dates to the risk of deception.

Reply:

The use of declarations or affidavits is usually intended to help explain activities which can be supported by exhibits. For example, if the Office copy of the mailing label was not entirely readable, applicant's copy of the "Express Mail" mailing label could accompany a declaration and serve as the basis for granting a filing date.

Comment:

Three persons objected to permitting only the individual who places the correspondence in an "Express Mail" facility to execute the certificate of express mailing under § 1.10(c).

Reply:

The wording of § 1.10(c) differs from § 1.8 because the documents which are expected to be filed under § 1.10 are patent and trademark applications. The filing dates of such documents are very important and should therefore be based on personal knowledge.

Comment:

One comment was received which suggested that § 1.10 be adopted with an effective date retroactive to a year earlier.

Reply:

Such an earlier date is not possible since the statutory authority for § 1.10 does not come into effect until Feb. 27, 1983.

Comment:

One comment proposed designating the Patent and Trademark Office as an "Express Mail" Post Office to make lower rates available.

Reply:

Such a designation is not possible.

Comment:

One person requested that the Patent and Trademark Office publish a form of certificate of mailing by "Express Mail" suitable for purposes of § 1.10(b).

Reply:

A suggested form is included in the preamble of this rule change.

Comment:

One comment proposed that § 1.10(c) clearly state what evidence will be necessary and sufficient to prove a filing date by mailing.

Reply:

A specific answer cannot be given since it is dependent upon the particular fact situation and what evidence is actually available.

Comment:

Two comments questioned whether P.L. 97-247 authorized a rule such as § 1.10 granting filing dates as of the mailing date.

Reply:

The question raised by this comment has been treated in the discussion of § 1.10 supra.

Comment:

One comment proposed that § 1.10 be corrected to read- Any paper or fee required be filed- to more closely conform with 35 U.S.C. 21(a).

Reply:

No need is seen to change § 1.10 as suggested since, if a patent is desired, it is "required" that each paper relating to an application be filed in the Patent and Trademark Office.

Comment:

One comment indicated that the requirement to place the "Express Mail" label number on each paper and fee is not realistic.

Reply:

The placement of the label number on each paper or fee allows later verification of the mailing dates of all different papers mailed in one envelope and is not seen to be overly burdensome.

Comment:

A question was raised as to whether the "Express Mail" label number should be placed on every page.

Reply:

The label number need not be placed on each page. It should, however, be placed on the first page of each separate document, such as, a new application, amendment, assignment, and transmittal letter for a fee, along with the certificate of mailing by Express Mail". Although the label number may be on checks, such a practice is not required.

Comment:

A question was raised by one party as to the location within the Patent and Trademark Office of the mailing labels where papers to different applications are placed in the same envelope.

Reply:

The mailing labels from all "Express Mail" packages are expected to be removed and initially retained centrally in the Mail Room of the Patent and Trademark Office. The number on each document will allow direct access to the appropriate mailing label if any questions should arise.

Comment:

One comment suggested that § 1.22(b) be amended to exclude itemization of all fees where a general authorization to charge a deposit account has been given.

Reply:

Even where fees are charged to a deposit account, it is desirable to know specifically which fees are to be paid. Therefore, the suggestion has not been adopted.

Comment:

One comment was received which suggested adding a sentence to § 1.41(d) indicating that the filing of an oath or declaration executed by the applicant would constitute proof of authority to file the application.

Reply:

Such an additional sentence is not considered to be necessary since the Patent and Trademark Office does not intend to utilize the provisions of § 1.41(d) unless a controversy arises.

Comment:

One comment was received which suggested the addition to the end of § 1.42 of the words "except for patents granted to the assignee either of the inventor or of the legal representative of the inventor."

Reply:

No change is considered to be necessary since few, if any, problems have arisen without such additional wording in the past. The existing rule wording "upon proper intervention" also provides protection for assignees.

Comment:

One comment was received which indicated that § 1.46 does not clearly authorize an assignee of a part interest to cause an application to be placed on file.

Reply:

Although § 1.46 may not make this point clear, it is clear from § 1.41(c).

Comment:

One comment recommended that the requirement to show diligence in correcting inventorship under § 1.48 be deleted.

Reply:

It is felt that corrections of inventorship should be diligently made in patent applications. The naming of correct inventorship is necessary for the Patent and Trademark Office to make decisions on topics such as double patenting, priority claims and first inventorship.

Comment:

It was recommended in one comment that the verified statement of facts required by § 1.48 "by the original named inventor or inventors" be replaced by a requirement that he or they merely assent to the statement of the facts since others may be better able to provide the best evidence.

Reply:

Since it is the original inventorship that is being changed, it is believed that all of the previously named inventors should positively indicate their agreement with the facts in the case. Affidavits by other individuals may also be supplied where such persons have direct personal knowledge of certain aspects of the case.

Comment:

One comment indicated that "it seems a reasonable presumption that if ownership is unaffected, deceptive intent is absent" in a § 1.48 correction of inventorship situation and that such a presumption could be written into the rules.

Reply:

Even if applications are commonly owned, the wrong inventorship could be deceptively named to obtain rights which are only available to the same inventive entities. The report on Public Law 97-247 also states that "the commissioner must be assured of the presence of innocent error, without deceptive intention . . ." before permitting a substitution of a true inventor's name.

Comment:

One person suggested that the deceptive intent in § 1.48 refer to the acts of the actual inventors rather than to both the alleged and actual inventor or inventors.

Reply:

This suggestion has been adopted in both §§ 1.48 and 1.324, but deceptive intention on the part of other parties is subject to review under § 1.56.

Comment:

One person suggested that in § 1.48, line 3 "may" be changed to must.

Reply:

The suggestion has not been adopted. Corrections may only be made if the conditions set forth in § 1.48 are satisfied.

Comment:

Two comments objected to the insertion of "material" in § 1.51(b).

Reply:

This word has been removed and does not appear in the final rule.

Comment:

One comment suggested changing "an" to a complete-in the title of § 1.51.

Reply:

This suggestion has been adopted.

Comment:

One comment indicated that §§ 1.52(c) and 1.56(c) seemed overly inflexible and harsh when considering minor grammatical changes.

Reply:

Although § 1.56 indicates that applications "may" be stricken, rather than "must" be stricken, it is still considered important to maintain a clear line in the regulations against changes in the original applications made after the execution of the application oath or declaration. The line between grammatical changes and changes relating to the merits is frequently unclear.

Comment:

Three comments noted an apparent inconsistency between proposed §§ 1.10 and 1.53 as to whether § 1.10 relates to the filing of patent applications.

Reply:

Section 1.10 does relate to the filing of patent applications. In order to clarify the wording, "received" in § 1.53(b) has been changed to "filed".

Comment:

One comment was received suggesting that a sentence be added to § 1.53(d) to indicate that PCT applicants cannot submit late filing fees, oaths or declarations under 35 U.S.C. 371.

Reply:

Such a reference in § 1.53 does not appear appropriate because this section relates to "filing dates". In the PCT situation, the filing date was already granted at the time of filing the PCT international application.

Comment:

One comment was received which suggested that § 1.53(a) be rewritten to indicate all applications are assigned serial numbers but not accorded filing dates.

Reply:

The proposal was not adopted since it is considered unnecessary.

Comment:

One person suggested that § 1.53(b) be amended to specify that only "a specification *purporting* to contain a description and at least one claim . . ." is needed to obtain a filing date.

Reply:

No change is being made since a determination must be initially made as to whether or not a specification has been filed. In any case, sufficiency of the specification must later be checked by the examiner.

Comment:

One person indicated that the time period for filing a correction to a defect in an application is left entirely within the discretion of the Commissioner and that any setting of periods of time would be tantamount to an exercise of rulemaking authority. Section 1.53(d) should be provided with an explicit time limitation.

Reply:

No specific time period is considered to be necessary in the regulations. The Commissioner has full authority and discretion under the statute in 35 U.S.C. 111 to set periods of time. The statute does not require the Commissioner to use the rulemaking process to set time periods for response to an action or requirement by the Patent and Trademark Office in a patent application.

Comment:

Two comments were received objecting to the use of the words "or otherwise disposed of" in § 1.53(c).

Reply:

This wording has existed in § 1.53(b) in the past without objection. No need is seen to depart from this wording at this time.

Comment:

One person questioned whether the change in § 1.54(b) would result in return post cards not being stamped with the application serial number.

Reply:

No change is intended in the existing return post card practice.

Comment:

One comment proposed adding another sentence to § 1.154(b) indicating that foreign priority claims will be acknowledged on the filing receipt.

Reply:

This proposal is not being adopted since the examiner must determine whether the statutory requirements of 35 U.S.C. 119 have been met before an acknowledgment can be sent.

Comment:

One comment suggested that the Patent and Trademark Office indicate on the filing receipt both the filing date under 1.10 and the actual date of receipt.

Reply:

The actual date of receipt can be obtained by requesting a receipt from the Postal Service. The actual date of receipt cannot be placed on the filing receipt because of current computer limitations. The suggestion is therefore not being adopted at this time.

Comment:

One comment was received indicating that it is not clear whether or not an application based on a specification and drawing, but containing no oath or declaration or filing fee, could serve as the basis for a priority claim under 35 U.S.C. 120.

Reply:

If the filed specification and drawings fully disclose the invention as required by 35 U.S.C. 112, the application may serve as a basis for a priority claim under § 120 even if no oath or declaration, or no fee has been filed, as long as the continuing application is filed prior to the abandonment of the first application under § 1.53(d).

Comment:

One comment suggested that § 1.55(b) be removed since the requirements of the statute are fully set forth in 35 U.S.C. 119.

Reply:

Although the statutory requirements set forth basic requirements, it is felt that the more specific details of § 1.55(b) provide needed guidance for applicants.

Comment:

Two persons questioned the meaning of "inspection and review" in § 1.56(c) and suggested certain amendments.

Reply:

The words "inspection and" are being removed to eliminate any redundancy. The paragraph has also been broken down into four items as proposed by a comment.

Comment:

One suggestion was made that applicant be allowed to order a copy of the parent patent, with payment of fee, when filing a § 1.60 application.

Reply:

Such a practice is contrary to the intent of the rule change. The problems the Patent and Trademark Office is attempting to solve by the change, which are caused by poor copies and delays in processing, would remain with such a practice.

Comment:

Two persons suggested that § 1.60 be amended to drop "and claimed" from the title.

Reply:

The suggestion has been adopted.

Comment:

One person suggested that § 1.60 be modified to drop the requirement for verification by affidavit when the statement is made by a registered patent attorney or agent.

Reply:

The suggestion has been adopted.

Comment:

One comment noted that there is no specific requirement in §§ 1.56, 1.63 or 1.98 to identify foreign applications filed more than one year prior to the U.S. filing date.

Reply:

Section 1.63(b)(3) broadly requires applicant to acknowledge the duty to disclose information material to the examination of the application. This information includes foreign patents based on applications filed more than a year prior to the filing date of the United States application and which issue before the filing date of the United States application.

Comment:

One person felt that § 1.63(b)(1) will be a disaster for the patent system since the inventor may not be physically able to review and understand the invention or because the legal language format used in claims may not be understood by the inventor. Five persons argued that adoption of § 1.63 would result in raising the defense that the inventor did not understand the claims in each patent infringement suit.

Reply:

The inventor is not expected to understand all the legal interpretations or limitations in a claim. The inventor is expected to recognize that what is being claimed is the subject matter which the inventor regards as his or her invention pursuant to 35 U.S.C. 112. The physical factors have to some extent existed in past practice and have been handled on a case-by-case basis where necessary. The situation outlined would exist in any signing of a legal document. The wording of § 1.63 has been explained in the preamble to minimize occurrences of problems.

Comment:

One comment noted that many inventors do not know whether additional subject matter is claimed in a continuation-in-part application under § 1.63(d).

Reply:

The wording in § 1.63(d) is considered to be appropriate and in accordance with case law. If uncertainty exists the attorney or agent, if any, should clarify the matter and § 1.63(d) should be followed.

Comment:

One person proposed that § 1.63(d) be modified to explicitly require the disclosure of foreign patents granted before the filing of the continuation-in-part application.

Reply:

Section 1.63(d) has been amended to clearly indicate that material information pursuant to § 1.56(a) between the filing date of the parent application and the filing date of the continuation-in-part application must be disclosed. The discussion of new § 1.63 refers to material foreign patents published during this time interval.

Comment:

Two comments indicated concern with the parenthetical language in proposed § 1.63(d) in that it would create severe problems.

Reply:

Paragraph (d) of § 1.63 has been amended to remove such problems.

Comment:

One comment suggested adding he or she is aware of after information in § 1.63(b)(3) and (d).

Reply:

This suggestion is not adopted since such wording is already present in § 1.56(a).

Comment:

One comment suggested that § 1.63(c) clarify what is intended by "the first filed foreign application," particularly in view of 35 U.S.C. 119, third paragraph.

Reply:

The rule has been amended to clarify the matter.

Comment:

One comment was received suggesting changes be made in the title and that paragraph (b) of § 1.70 refer to § 1.63 instead of "this section."

Reply:

The change suggested to the title has been made. The suggestion to paragraph (b) has not been made since it is considered unnecessary.

Comment:

Three comments were received which indicated that the wording of § 1.97(a) would require an immediate filing of disclosure information if the filing receipt is received just before three months after filing.

Reply:

The wording of § 1.97(a) has been changed to remove this problem.

Comment:

One comment was received which urged that the title of § 1.97 and contents of § 1.97(b) not be changed, since the proposed wording would not require filing of the closest prior art.

Reply:

The proposed changes are not intended to make any changes in the type of information which is to be submitted to the Office. The proposal has been adopted in modified form.

Comment:

One person indicated preference for the use of "prior art" in §§ 1.51(b), 1.97, 1.98, and 1.99 since it does not create an inferred admission that the information submitted is material. Five comments favored the removal of "prior art" from § 1.97 but objected to the addition of "material".

Reply:

The rule change was proposed to answer arguments that the use of the term "prior art" implied that the information was a reference against applicant's invention. Since the majority of the comments supported modifying the rule, the use of the terms "prior art" as well as "material" are being dropped.

Comment:

Two comments were received concerning § 1.98(a) suggesting that the "place of publication" be clarified or removed.

Reply:

This suggestion has not been adopted since the "place of publication" is not mandatory. It is intended to mean the city and country of publication. Also the citation of the "place of publication" is consistent with the § 1.107(a) requirements.

Comment:

It was suggested by one person that § 1.101 be amended to clarify when PCT international applications which have entered the national stage should be taken up for examination.

Reply:

An amendment has been made to § 1.101 as suggested to clarify that they are taken up in order based on the date they have entered the national stage by compliance with the requirements of 35 U.S.C. 371(c).

Comment:

One comment was presented suggesting that the words "which are not examined on the merits" in § 1.101 be removed.

Reply:

The suggestion has been adopted.

Comment:

One comment urged returning to the use of the Office draftsmen for minor corrections to reduce the burden under proposed § 1.123.

Reply:

Some minor corrections may be made by the Office draftsmen on a time-available basis. However, since the Office currently has only a few draftsmen who are responsible for reviewing and approving all drawings, very little time is presently available for making corrections.

Comment:

Four suggestions were made to amend § 1.123 to specifically provide for the filing of substitute drawings if corrections are required.

Reply:

These suggestions have been adopted.

Comment:

One comment was received indicating that § 1.125 should indicate to whom it should be clear that acceptance of a substitute specification would facilitate processing.

Reply:

An amendment has been made to clarify that it should be clear to the examiner.

Comment:

One comment suggested removal of the last sentence of § 1.137(b) to permit § 1.183 petitions to be filed to waive time periods for requesting revival of unintentionally abandoned applications.

Reply:

No change in § 1.137(b) is considered to be appropriate at this time since § 1.137(b) only became effective on Oct. 1, 1982. (Since changes to § 1.141 are not being promulgated in this rule change, comments and replies to this section are not included.)

Comment:

One comment pointed out that the reference to a "period of twelve months" in § 1.153 was indefinite.

Reply:

Section 1.153 has been amended to remove the indefiniteness.

Comment:

One comment was presented which suggested that § 1.172 refer to a "reissue oath" rather than to "reissue oaths."

Reply:

This suggestion has been adopted.

Comment:

One comment suggested the insertion of "the filing of" before "each patent" in § 1.335(a) and (b).

Reply:

The suggestion has been adopted.

(Since the proposed addition of a new paragraph (e) to § 1.565 is not being adopted in this rule change, comments and replies to this section are not included.)

Comment:

One suggestion was made that a procedure be designed in which foreign filing licenses could be granted by return post card without losing the time required to send the filing receipts.

Reply:

It is felt that the procedure under § 5.12 should be adopted at this time and be placed into operation. If after some experience additional modifications are found desirable, further changes could be made. To introduce several alternative procedures at this time is considered to be too complex and may endanger the success of the proposed procedure.

Comment:

One comment requested that the Office grant a prospective foreign filing license under § 5.12 for all data and amendatory material to be filed abroad.

Reply:

Such petitions are not part of this proposed change but this concept is being considered in a separate rule change proposal.

Comment:

One comment suggested that the Filing Receipt specifically indicate whether or not a license has been denied under § 5.12.

Reply:

The proposed practice under § 5.12 would indicate on the Filing Receipt when a license is granted. On other cases in which a license is not granted further review is required. A license may still be granted at a later date.

Comment:

One comment stated that it should be possible to petition at any early date for a foreign filing license as well as obtain one on the filing receipt.

Reply:

It will still be possible to petition earlier for a license under revised § 5.12.

Implementation Of Patent Procedure Revisions

The effective date of the patent procedure revisions contained in this rulemaking is Feb. 27, 1983. The various sections will be implemented in the manner set forth below:

§ 1.10 Filing of papers and fees by "Express Mail" with certificate.

The "Guidelines under § 1.10" set forth below provide guidance in implementing § 1.10:

Guidelines under § 1.10

A) The certification under § 1.10 requires a signature of the person depositing the paper with the United States Postal Service as "Express Mail". Specifically, if the certification under § 1.10 appears on a paper that requires a signature, two signatures are required, one for the paper and one for the certification under § 1.10.

B) When possible, the certification under § 1.10 should appear on an upper portion of the first page of the paper being submitted. However, if there is insufficient space to make the certification on the same paper, such as in the case of the patent issue fee transmittal form PTO 85, the certification should be on a separate sheet securely attached to the paper.

C) When the certification is presented on a separate sheet, that sheet must (1) be signed and (2) fully identify and be securely attached to the paper or fee it accompanies. The required identification should include the serial number and filing date of the application as well as the type of paper being filed, e.g., complete application, specification and drawings, responses to rejection or refusal, notice of appeal, etc. If the serial number of the application is not known, the identification should include at least the name of the inventor(s) and the title of the invention. An unsigned certification will not be considered acceptable.

Moreover, without the proper identifying data, a certification presented on a separate sheet will not be considered acceptable if there is any question or doubt concerning the connection between the sheet and the paper filed.

D) In situations wherein the correspondence includes papers for more than one application e.g., a single envelope containing separate applications or papers for various parts of the Patent and Trademark Office, each paper must have its own certification and the "Express Mail" label number as part thereof or attached thereto.

E) In situations wherein the correspondence includes several papers directed to the same application (e.g., a proposed response under 37 CFR 1.116 and a notice of appeal), each paper should also have its own certification as a part thereof or attached thereto.

F) Practitioners may place the certification language on the first page of a paper with an inked stamp. Such a practice is encouraged because the certification is not only readily visible but also forms an integral part of the paper. An example of a preferred stamp is:

"Express Mail" mailing label number

Date of Deposit

I hereby certify that this paper or fee is being deposited with the United States Postal Service "Express Mail Post Office to Addressee" service under 37 CFR 1.10 on the date indicated above and is addressed to the Commissioner of Patents and Trademarks, Washington, D.C. 20231.

(Typed or printed name of person mailing paper or fee)

(Signature of person mailing paper or fee)

§ 1.48 Correction of inventorship.

Any patent application pending on or after Feb. 27, 1983, is subject to the provisions of this section.

§ 1.53 Serial number, filing date, and completion of application.

The provisions of this section apply to any patent application filed on or after Feb. 27, 1983.

§ 1.63 Oath or declaration.

The provisions of § 1.63 will become effective on Feb. 27, 1983, and will apply to any oath or declaration filed on or after that date. However, in order to provide a smooth transition from the old oath or declaration requirements to the new, the Office will continue to accept between Feb. 27, 1983, and June 30, 1983, any oath or declaration in compliance with § 1.65 as it existed immediately prior to Feb. 27, 1983, so long as that oath or declaration is attached to and was executed as a part of an application to be filed in the Patent and Trademark Office.

Effective July 1, 1983, all oaths or declarations filed under § 1.51(a)(2) as a part of a patent application must fully comply with § 1.63.

A suggested format for a declaration is set forth below:

Declaration For Patent Application

As a below named inventor, I hereby declare that:

My residence, post office address and citizenship are as stated below next to my name,

I believe I am the original, first and sole inventor (if only one name is listed below) or an original, first and joint inventor (if plural names are listed below) of the subject matter which is claimed and for which a patent is sought on the invention entitled

the specification of which

(check one)	is attached hereto.	
	was filed on	as
	Application Serial No.	
	and was amended on	
	(if applicable)	

I hereby state that I have reviewed and understand the contents of the above identified specification, including the claims, as amended by any amendment referred to above.

I acknowledge the duty to disclose information which is material to the examination of this application in accordance with Title 37, Code of Federal Regulations § 1.56(a).

I hereby claim foreign priority benefits under Title 35, United States Code, § 119 of any foreign application(s) for patent or inventor's certificate listed below and have also identified below any foreign application for patent or inventor's certificate having a filing date before that of the application on which priority is claimed:

Prior Foreign Application(s)			Priority Claimed	
(Number)	(Country)	(Day/Month/Year Filed)	Yes	No
(Number)	(Country)	(Day/Month/Year Filed)	Yes	No
(Number)	(Country)	(Day/Month/Year Filed)	Yes	No

I hereby claim the benefit under Title 35, United States Code, § 120 of any United States application(s) listed below and, insofar as the subject matter of each of the claims of this application is not disclosed in the prior United States application in the manner provided by the first paragraph of Title 35, United States Code, § 112, I acknowledge the duty to disclose material

information as defined in Title 37, Code of Federal Regulations, § 1.56(a) which occurred between the filing date of the prior application and the national or PCT international filing date of this application:

(Application Serial No.)	(Filing Date)	(Status)
		(patented, pending, abandoned)

(Application Serial No.)	(Filing Date)	(Status)
		(patented, pending, abandoned)

I hereby declare that all statements made herein of my own knowledge are true and that all statements made on information and belief are believed to be true; and further that these statements were made with the knowledge that willful false statements and the like so made are punishable by fine or imprisonment, or both, under Section 1001 of Title 18 of the United States Code and that such willful false statements may jeopardize the validity of the application or any patent issued thereon.

Full name of sole or first inventor
Inventor's signature
Date
Residence
Citizenship
Post Office Address
Full name of second joint inventor, if any
Second Inventor's signature
Date
Residence
Citizenship
Post Office Address

(Supply similar information and signature for third and subsequent joint inventors.)

The declaration form set forth above is specifically designed for use where the specification is attached to the form and the specification and declaration are filed at one time, and also where the declaration form is filed after the specification and drawings in accordance with § 1.53. The form can be used where foreign priority is claimed under 35 U.S.C. 119 and where the benefit of one or more United States applications is claimed under 35 U.S.C. 120. Appropriate modifications can be made in the form so long as compliance with the rules is maintained. For example, if the form is being used as a supplemental declaration form which is being submitted after numerous amendments the form might appropriately be modified by changing the words "was amended on" to "with amendments through."

§ 1.335 Filing of notice of arbitration awards.

The written notices required by this section should be directed to the attention of the Office of the Solicitor, which Office will be responsible for processing of such notices.

Other Considerations

Environmental, energy, and other considerations: The rule change will not have a significant impact on the quality of the human environment or the conservation of energy resources.

The rule change is in conformity with the requirements of the Regulatory Flexibility Act. (Pub. L. 96-354), Executive Order 12291, and the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 *et seq.*

The rule change will not have a significant adverse economic impact on a substantial number of small entities (Regulatory Flexibility Act. Pub. L. 96-354) for several reasons. Public Law 97-247 has taken into consideration the impact it may have on small entities. In general, the rule change will also expedite proceedings before the Patent and Trademark Office, changing existing procedures where they can be simplified.

The Patent and Trademark Office has determined that this rule change is not a major rule under Executive Order 12291. The annual effect on the economy will be less than \$100 million. There will be no major increase in costs or prices for consumers, individual industries, federal, state, or local government agencies, or geographic regions. There will be no significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

This rule change will not impose a burden under the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 *et seq.*, since no significant additional record keeping or reporting requirements are placed upon the public. In fact, some paperwork, especially that related to foreign filing license petitions, will be reduced.

List of Subjects in 37 CFR Parts 1 and 5

Administrative practice and procedure, Courts, Inventions and patents.

Notice is hereby given that, pursuant to the authority granted to the Commissioner of Patents and Trademarks by 35 U.S.C. 6 and Public Law 97-247, the Patent and Trademark Office is amending Title 37 of the Code of Federal Regulations as set forth below.

37 CFR, Parts 1 and 5, are amended as follows:

1. Section 1.4 is amended by revising paragraph (a) to read as follows:

§ 1.4 Nature of correspondence.

(a) Correspondence with the Patent and Trademark Office comprises: (1) correspondence relating to services and facilities of the Office, such as general inquiries, requests for publications supplied by the Office, orders for printed copies of patents or trademark registrations, orders for copies of records, transmission of assignments for recording, and the like, and (2) correspondence in and relating to a particular application or other proceeding in the Office. See particularly the rules relating to the filing, processing, or other proceedings of national applications in Subpart B, §§ 1.31 to 1.352; of international applications in Subpart C, §§ 1.401 to 1.482; of reexamination of patents in Subpart D, §§ 1.501 to 1.570; and of trademark applications, §§ 2.11 to 2.189.

* * * * *

2. Section 1.6 is revised to read as follows:

§ 1.6 Receipt of letters and papers.

(a) Letters and other papers received in the Patent and Trademark Office are stamped with the date of receipt. No papers are received in the Patent and Trademark Office on Saturdays, Sundays or federal holidays within the District of Columbia.

(b) Mail placed in the Patent and Trademark Office pouch up to midnight on weekdays, excepting Saturdays and federal holidays, by the post office at Washington, D. C., serving the Patent and Trademark Office, is considered as having been received in the Patent and Trademark Office on the day it was so placed in the pouch.

(c) In addition to being mailed or delivered by hand during office hours, letters and other papers may be deposited up to midnight in a box provided at the guard's desk at the lobby of building 3 of the Patent and Trademark Office at Crystal Plaza, Arlington, Virginia and at the main entrance (14th Street) of the Department of Commerce Building, Washington, D. C., on weekdays except Saturdays and federal holidays, and all papers deposited therein are considered as received in the Patent and Trademark Office on the day of deposit.

(d) If interruptions or emergencies in the United States Postal Service which have been so designated by the Commissioner occur, the Patent and Trademark Office will consider as filed on a particular date in the Office any paper or fee which is (1) promptly filed after the ending of the designated interruption or emergency and (2) accompanied by a statement indicating that such paper or fee would have been filed on that particular date if it were not for the designated interruption or emergency

in the United States Postal Service. Such statement must be a verified statement if made by a person not registered to practice before the Patent and Trademark Office.

3. Section 1.7 is revised to read as follows:

§ 1.7 Times for taking action: Expiration on Saturday, Sunday or federal holiday.

Whenever periods of time are specified in this part in days, calendar days are intended. When the day, or the last day fixed by statute or by or under this part for taking any action or paying any fee in the Patent and Trademark Office falls on Saturday, Sunday, or on a federal holiday within the District of Columbia, the action may be taken, or the fee paid, on the next succeeding day which is not a Saturday, Sunday, or a federal holiday. See § 1.304 for time for appeal or for commencing civil action.

4. Section 1.8 is amended by revising the introductory text of paragraph (a) and paragraph (a)(1), (a)(2) introductory text, and (a)(2)(i) to read as follows:

§ 1.8 Certificate of mailing.

(a) Except in the cases enumerated below, papers and fees required to be filed in the Patent and Trademark Office within a set period of time will be considered as being timely filed if: (1) they are addressed to the Commissioner of Patents and Trademarks, Washington, D. C. 20231, and deposited with the U.S. Postal Service with sufficient postage as first class mail prior to expiration of the set period, and (2) they also include a certificate for each paper or fee stating the date of deposit. The person signing the certificate should have reasonable basis to expect that the correspondence would be mailed on or before the date indicated. The actual date of receipt of the paper or fee will be used for all other purposes. This procedure does not apply to the following:

(i) The filing of a national patent application specification and drawing or other papers for the purpose of obtaining an application filing date;

* * * * *

5. A new section 1.10 is added to read as follows:

§ 1.10 Filing of papers and fees by "Express Mail" with certificate.

(a) Any paper or fee to be filed in the Patent and Trademark Office can be filed utilizing the "Express Mail Post Office to Addressee" service of the United States Postal Service and be considered as having been filed in the Office on the date the paper or fee is shown to have been deposited as "Express Mail" with the United States Postal Service.

(b) Any paper or fee filed by "Express Mail" must have the number of the "Express Mail" mailing label placed thereon prior to mailing, be addressed to the Commissioner of Patents and Trademarks, Washington, D.C. 20231, and any such paper or fee must also include a certificate of mailing by "Express Mail" which states the date of mailing by "Express Mail" and is signed by the person mailing the paper or fee.

(c) The Patent and Trademark Office will accept the certificate of mailing by "Express Mail" and accord the paper or fee the certificate date under 35 U.S.C. 21(a) without further proof of the date on which the mailing by "Express Mail" occurred unless a question is present regarding the date of mailing. If more than a reasonable time has elapsed between the certificate date and the Patent and Trademark Office receipt date or if other questions regarding the date of mailing are present, the person mailing the paper or fee may be required to file a copy of the "Express Mail" receipt showing the actual date of mailing and a statement from the person who mailed the paper or fee averring to the fact that the mailing occurred on the date certified. Such statement must be a verified statement if made by a person not registered to practice before the Patent and Trademark Office.

6. Section 1.17 is amended by revising paragraph (h) to read as follows:

§ 1.17 Patent application processing fees.

* * * * *

(h) For filing a petition to the Commissioner under a section of this part listed below which refers to this paragraph—\$120.00

—§ 1.47 for filing by other than all the inventors or a person not the inventor

—§ 1.48 for correction of inventorship

—§ 1.182 for decision on questions not specifically provided for

—§ 1.183 to suspend the rules

—§ 1.268 for late filing of interference settlement agreement

* * * * *

7. Section 1.22 is revised to read as follows:

§ 1.22 Fees payable in advance.

(a) Patent and trademark fees and charges payable to the Patent and Trademark Office are required to be paid in advance, that is, at the time of requesting any action by the Office for which a fee or charge is payable with the exception that under § 1.53 applications for patent may be assigned a filing date without payment of the basic filing fee.

(b) All patent and trademark fees paid to the Patent and Trademark Office should be itemized in each individual application, patent or other proceeding in such a manner that it is clear for which purpose the fees are paid.

8. Section 1.24 is revised to read as follows:

§ 1.24 Coupons.

Coupons in denominations of one dollar are sold by the Patent and Trademark Office for the convenience of regular purchasers of U.S. patents and trademark registrations; these coupons may not be used for any other purpose. The one dollar coupons are sold individually and in books of 50 with stubs for record for \$50. These coupons are good until used; they may be transferred but cannot be redeemed.

9. Section 1.41 is revised to read as follows:

§ 1.41 Applicant for patent.

(a) A patent must be applied for in the name of the actual inventor or inventors. Full names must be stated, including the family name and at least one given name without abbreviation together with any other given name or initial.

(b) Unless the contrary is indicated the word "applicant" when used in these sections refers to the inventor or joint inventors who are applying for a patent, or to the person mentioned in § 1.42, 1.43, or 1.47 who is applying for a patent in place of the inventor.

(c) Any person authorized by the applicant may file an application for patent on behalf of the inventor or inventors, but an oath or declaration for the application (§ 1.63) can only be made in accordance with § 1.64

(d) A showing may be required from the person filing the application that the filing was authorized where such authorization comes into question.

10. Section 1.42 is revised to read as follows:

§ 1.42 When the inventor is dead.

In case of the death of the inventor, the legal representative (executor, administrator, etc.) of the deceased inventor may make the necessary oath or declaration, and apply for and obtain the patent. Where the inventor dies during the time intervening between the filing of the application and the granting of a patent thereon, the letters patent may be issued to the legal representative upon proper intervention.

11. Section 1.43 is revised to read as follows:

§ 1.43 When the inventor is insane or legally incapacitated.

In case an inventor is insane or otherwise legally incapacitated, the legal representative (guardian, conservator, etc.) of such inventor may make the necessary oath or declaration, and apply for and obtain the patent.

12. Section 1.45 is amended by removing paragraphs (b) and (c) and the designation (a) to the first paragraph and by revising the text to read as follows:

§ 1.45 Joint inventors.

Joint inventors must apply for a patent jointly and each must make the required oath or declaration: neither of them alone, nor less than the entire number, can apply for a patent for an invention invented by them jointly, except as provided in § 1.47.

13. Section 1.46 is revised to read as follows:

§ 1.46 Assigned inventions and patents.

In case the whole or a part interest in the invention or in the patent to be issued is assigned, the application must still be made or authorized to be made, and an oath or declaration signed, by the inventor or one of the persons mentioned in §§ 1.42, 1.43, or 1.47. However, the patent may be issued to the assignee or jointly to the inventor and the assignee as provided in § 1.334.

14. Sections 1.47 is revised to read as follows:

§ 1.47 Filing when an inventor refuses to sign or cannot be reached.

(a) If a joint inventor refuses to join in an application for patent or cannot be found or reached after diligent effort, the application may be made by the other inventor on behalf of himself or herself and the omitted inventor. The oath or declaration in such an application must be accompanied by a petition including proof of the pertinent facts and by the required fee (§ 1.17(h)) and must state the last known address of the omitted inventor. The Patent and Trademark Office shall forward notice of the filing of the application to the omitted inventor at said address. Should such notice be returned to the Office undelivered, or should the address of the omitted inventor be unknown, notice of the filing of the application shall be published in the *Official Gazette*. The omitted inventor may subsequently join in the application on filing an oath or declaration of the character required by § 1.63. A patent may be granted to the inventor making the application, upon a showing satisfactory to the Commissioner, subject to the same rights which the omitted inventor would have had if he or she had been joined.

(b) Whenever an inventor refuses to execute an application for patent, or cannot be found or reached after diligent effort, a person to whom the inventor has assigned or agreed in writing to assign the invention or who otherwise shows sufficient proprietary interest in the matter justifying such action may make application for patent on behalf of and as agent for the inventor. The oath or declaration in such an application must be accompanied by a petition including proof of the pertinent facts and a showing that such action is necessary to preserve the rights of the parties or to prevent irreparable damage, and by the required fee § 1.17(h)) and must state the last known address of the inventor. The assignment, written agreement to assign or other evidence of proprietary interest, or a verified copy thereof, must be filed in the Patent and Trademark Office. The Office shall forward notice of the filing of the application to the inventor at the address stated in the application. Should such notice be returned to the Office undelivered, or should the address of the inventor be unknown, notice of the filing of the application shall be published in the *Official Gazette*. The inventor may subsequently join in the application on filing an oath or declaration of the character required by § 1.63. A patent may be granted to the inventor upon a showing satisfactory to the Commissioner.

15. A new section 1.48 is added to read as follows:

§ 1.48 Correction of inventorship.

If the correct inventor or inventors are not named in an application for patent through error without any deceptive intention on the part of the actual inventor or inventors, the application may be amended to name only the actual inventor or inventors. Such amendment must be diligently made and must be accompanied by (1) a petition including a statement of facts verified by the original named inventor or inventors establishing when the error without deceptive intention was discovered and how it occurred; (2) an oath or declaration by each actual inventor or inventors as required by § 1.63. (3) the fee set forth in § 1.17(h); and (4) the written consent of any assignee.

16. Section 1.51 is amended by revising paragraphs 1.51(a)(2) and (b) to read as follows:

§ 1.51 General requisites of a complete application.

(a) * * * * *

(2) An oath or declaration, see §§ 1.63 and 1.68.

* * * * *

(b) Applicants are encouraged to file an information disclosure statement. See §§ 1.97 through 1.99.

17. Section 1.52 is amended by revising paragraph (c) to read as follows:

§ 1.52 Language, paper, writing, margins.

* * * * *

(c) Any interlineation, erasure, cancellation or other alteration of the application papers filed must be made before the signing of any accompanying oath or declaration pursuant to § 1.63 referring to those application papers and should be dated and initialed or signed by the applicant on the same sheet of paper. No such alterations in the application papers are permissible after the signing of an oath or declaration referring to those application papers (§ 1.56(c)). After the signing of the oath or declaration referring to the application papers, amendments may only be made in the manner provided by §§ 1.121 and 1.123-1.125.

* * * * *

18. Section 1.53 is revised to read as follows:

§ 1.53 Serial number, filing date, and completion of application.

(a) Any application for a patent received in the Patent and Trademark Office will be assigned a serial number for identification purposes.

(b) The filing date of an application for patent is the date on which (1) a specification containing a description pursuant to § 1.71 and at least one claim pursuant to § 1.75, and (2) any drawing required by § 1.81(a), are filed in the Patent and Trademark Office. No new matter may be introduced into an application after its filing date (§ 1.118).

(c) If any application is filed without the specification or drawing required by paragraph (b) of this section, applicant will be so notified and given a time period within which to submit the omitted specification or drawing in order to obtain a filing date as of the date of filing of such submission. If the omission is not corrected within the time period set, the application will be returned or otherwise disposed of; the fee, if submitted, will be refunded less a \$50.00 handling fee.

(d) If an application which has been accorded a filing date pursuant to paragraph (b) of this section does not include the appropriate filing fee or an oath or declaration by the applicant, applicant will be so notified and given a period of time within which to file the fee, oath, or declaration and to pay the surcharge as set forth in § 1.16(e) in order to prevent abandonment of the application. The notification pursuant to this paragraph may be

made simultaneously with any notification pursuant to paragraph (c) of this section.

(e) An application for a patent will not be placed upon the files for examination until all its required parts, complying with the rules relating thereto, are received, except that certain minor informalities may be waived subject to subsequent correction whenever required.

(f) The filing date of an international application designating the United States of America shall be treated as the filing date in the United States of America under PCT Article 11(3), except as provided in 35 U.S.C. 102(e).

19. Section 1.54 is revised to read as follows:

§ 1.54 Parts of application to be filed together; filing receipt.

(a) It is desirable that all parts of the complete application be deposited in the Office together; otherwise a letter must accompany each part, accurately and clearly connecting it with the other parts of the application. See § 1.53 with regard to completion of an application.

(b) Applicant will be informed of the application serial number and filing date by a filing receipt.

20. Section 1.55 is revised to read as follows:

§ 1.55 Claim for foreign priority.

(a) An applicant may claim the benefit of the filing date of a prior foreign application under the conditions specified in 35 U.S.C. 119 and 172. The claim to priority need be in no special form and may be made by the attorney or agent if the foreign application is referred to in the oath or declaration as required by § 1.63. The claim for priority and the certified copy of the foreign application specified in the second paragraph of 35 U.S.C. 119 must be filed in the case of interference (§ 1.224); when necessary to overcome the date of a reference relied upon by the examiner; or when specifically required by the examiner; and in all other cases they must be filed not later than the date the issue fee is paid. If the papers filed are not in the English language, a translation need not be filed except in the three particular instances specified in the preceding sentence, in which event a sworn translation or a translation certified as accurate by a sworn or official translator must be filed. If the priority papers are submitted after the date the issue fee is paid, they must be accompanied by a petition requesting their entry and the fee set forth in § 1.17(i).

(b) An applicant may under certain circumstances claim priority on the basis of an application for an inventor's certificate in a country granting both inventor's certificates and patents. When an applicant wishes to claim the right of priority as to a claim or claims of the application on the basis of an application for an inventor's certificate in such a country under 35 U.S.C. 119, last paragraph (as amended July 28, 1972), the applicant or his attorney or agent, when submitting a claim for such right as specified in paragraph (b) of this section, shall include an affidavit or declaration including a specific statement that, upon an investigation, he or she has satisfied himself or herself that to the best of his or her knowledge the applicant, when filing his or her application for the inventor's certificate, had the option to file an application either for a patent or an inventor's certificate as to the subject matter of the identified claim or claims forming the basis for the claim of priority.

21. Section 1.56 is amended by revising paragraph (c) to read as follows:

§ 1.56 Duty of disclosure; fraud; striking or rejection of applications.

* * * * *

(c) Any application may be stricken from the files if:

(1) An oath or declaration pursuant to § 1.63 is signed in blank;

(2) An oath or declaration pursuant to § 1.63 is signed without review thereof by the person making the oath or declaration;

(3) An oath or declaration pursuant to § 1.63 is signed without review of the specification, including the claims, as required by § 1.63(b); or

(4) The application papers filed in the Office are altered after the signing of an oath or declaration pursuant to § 1.63 referring to those application papers.

* * * * *

§ 1.57 [Removed]

22. Section 1.57 is removed.

23. Section 1.59 is revised to read as follows:

§ 1.59 Papers of application with filing date not to be returned.

Papers in an application which has received a filing date pursuant to § 1.53 will not be returned for any purpose whatever. If applicants have not preserved copies of the papers, the Office will furnish copies at the usual cost.

24. Section 49 § 1.60 is revised to read as follows:

§ 1.60 Continuation or divisional application for invention disclosed in a prior application.

A continuation or divisional application (filed under the conditions specified in 35 U.S.C. 120 or 121), which discloses and claims only subject matter disclosed in a prior application may be filed as a separate application before the patenting or abandonment of or termination of proceedings on the prior application. Signing and execution of the application papers by the applicant may be omitted provided the copy is supplied by and accompanied by a statement by, the applicant or his or her attorney or agent that the application papers comprise a true copy of the prior application as filed. Such statement must be a verified statement if made by a person not registered to practice before the Patent and Trademark Office. Only amendments reducing the number of claims or adding a reference to the prior application (§ 1.78(a)) will be entered before calculating the filing fee and granting the filing date.

25. Section § 1.62 is revised to read as follows:

§ 1.62 File wrapper continuing procedure.

(a) A continuation, continuation-in-part, or divisional application, which uses the specification and drawings from a prior application to be abandoned, may be filed before the payment of the issue fee, abandonment of, or termination of proceedings on a prior application. The filing date of an application filed under this section is the date on which a request is filed for an application under this section including identification of the Serial Number, filing date, and applicant's name of the prior application.

(b) The filing fee for a continuation, continuation-in-part, or divisional application under this section is based on the number of claims remaining in the application after entry of any preliminary amendment and entry of any amendments under § 1.116 unentered in the prior application which applicant has requested to be entered in the continuing application.

(c) In the case of a continuation-in-part application which adds and claims additional disclosure by amendment, an oath or declaration as required by § 1.63 must also be filed. In a continuation or divisional application which discloses and claims only subject matter disclosed in a prior application, no additional oath or declaration is required.

(d) If an application which has been accorded a filing date pursuant to paragraph (a) of this section does not include the appropriate filing fee pursuant to paragraph (b) of this section, or an oath or declaration by the applicant in the case of a continuation-in-part application pursuant to paragraph (c) of this section, applicant will be so notified and given a period of time within which to file the fee, oath, or declaration and to pay the surcharge as set forth in § 1.16(e) in order to prevent abandonment of the application. The notification pursuant to this para-

graph may be made simultaneously with any notification of a defect pursuant to paragraph (a) of this section.

(e) An application filed under this section will utilize the file wrapper and contents of the prior application to constitute the new continuation, continuation-in-part, or divisional application but will be assigned a new application serial number.

(f) The filing of an application under this section will be construed to include a waiver of secrecy by the applicant under 35 U.S.C. 122 to the extent that any member of the public who is entitled under the provisions of 37 CFR 1.14 to access to, or information concerning either the prior application or any continuing application filed under the provisions of this section may be given similar access to, or similar information concerning, the other application(s) in the file wrapper.

(g) The filing of a request for a continuing application under this section will be considered to be a request to expressly abandon the prior application as of the filing date granted the continuing application.

(h) The applicant is urged to furnish the following information relating to the prior application to the best of his or her ability:

- (1) Title as originally filed and as last amended;
- (2) Name of applicant as originally filed and as last amended;
- (3) Current correspondence address of applicant;
- (4) Identification of prior foreign application and any priority claim under 35 U.S.C. 119.

(i) Envelopes containing only application papers and fees for filing under this section should be marked "Box FWC".

26. A new section 1.63 is added to read as follows:

§ 1.63 Oath or declaration.

(a) An oath or declaration filed under § 1.51(a)(2) as a part of an application must:

- (1) Be executed in accordance with either § 1.66 or § 1.68;
- (2) Identify the specification to which it is directed;
- (3) Identify each inventor and the residence and country of citizenship of each inventor; and
- (4) State whether the inventor is a sole or joint inventor of the invention claimed.

(b) In addition to meeting the requirements of paragraph (a), the oath or declaration must state that the person making the oath or declaration:

- (1) Has reviewed and understands the contents of the specification, including the claims, as amended by any amendment specifically referred to in the oath or declaration;
- (2) Believes the named inventor or inventors to be the original and first inventor or inventors of the subject matter which is claimed and for which a patent is sought; and
- (3) Acknowledges the duty to disclose information which is material to the examination of the application in accordance with § 1.56(a).

(c) In addition to meeting the requirements of paragraphs (a) and (b) of this section, the oath or declaration in any application in which a claim for foreign priority is made pursuant to § 1.55 must identify the foreign application for patent or inventor's certificate on which priority is claimed, and any foreign application having a filing date before that of the application on which priority is claimed, by specifying the application number, country, day, month and year of its filing.

(d) In any continuation-in-part application filed under the conditions specified in 35 U.S.C. 120 which discloses and claims subject matter in addition to that disclosed in the prior copending application, the oath or declaration must also state that the person making the oath or declaration acknowledges the duty to disclose material information as defined in § 1.56(a) which occurred between the filing date of the prior application and the national or PCT international filing date of the continuation-in-part application.

27. A new section 1.64 is added to read as follows:

§ 1.64 Person making oath or declaration.

(a) The oath or declaration must be made by all of the actual inventors except as provided for in §§ 1.42, 1.43, or 1.47.

(b) If the person making the oath or declaration is not the inventor (§§ 1.42, 1.43, or 1.47), the oath or declaration shall state the relationship of the person to the inventor and, upon information and belief, the facts which the inventor is required to state.

§ 1.65 [Removed]

28. Section 1.65 is removed.

29. Section 1.67 is revised to read as follows:

§ 1.67 Supplemental oath or declaration.

(a) A supplemental oath or declaration meeting the requirements of § 1.63 may be required to be filed to correct any deficiencies or inaccuracies present in an earlier filed oath or declaration.

(b) A supplemental oath or declaration meeting the requirements of § 1.63 must be filed (1) when a claim is presented for matter originally shown or described but not substantially embraced in the statement of invention or claims originally presented, and (2) when an oath or declaration submitted in accordance with § 1.53(d) after the filing of the specification and any required drawings specifically and improperly refers to an amendment which includes new matter. No new matter may be introduced into an application after its filing date even if a supplemental oath or declaration is filed (§ 1.53(b); § 1.118). In proper cases the oath or declaration here required may be made on information and belief by an applicant other than inventor.

30. Section 1.69 is amended by revising paragraph (b) to read as follows:

§ 1.69 Foreign language oaths and declarations.

* * * * *

(b) Unless the text of any oath or declaration in a language other than English is a form provided or approved by the Patent and Trademark Office, it must be accompanied by a verified English translation, except that in the case of an oath or declaration filed under § 1.63 the translation may be filed in the Office no later than two months from the date applicant is notified to file the translation.

31. Section 1.70 is amended by revising the title and paragraph (a) to read as follows:

§ 1.70 Oath or declaration under 35 U.S.C. 371(c)(4).

(a) When an applicant of an international application, if the inventor, desires to enter the national stage under 35 U.S.C. 371, he or she must file an oath or declaration in accordance with § 1.63.

* * * * *

32. Section 1.77 is amended by revising paragraphs (h) and (i) to read as follows:

§ 1.77 Arrangement of application elements.

* * * * *

- (h) Abstract of the disclosure.
- (i) Signed oath or declaration.

* * * * *

33. The center heading preceding § 1.97 and section 1.97 are revised to read as follows:

INFORMATION DISCLOSURE STATEMENT

§ 1.97 Filing of information disclosure statement.

(a) As a means of complying with the duty of disclosure set forth in § 1.56, applicants are encouraged to file an information disclosure statement at the time of filing the application or within the later of three months after the filing date of the application or two months after applicant receives the filing receipt. If filed separately, the disclosure statement should, in addition to the identification of the application, include the Group Art Unit to which the application is assigned as indicated on the filing receipt. The disclosure statement may either be separate from the specification or may be incorporated therein.

(b) A disclosure statement filed in accordance with paragraph (a) of this section shall not be construed as a representation that a search has been made or that no other material information as defined in § 1.56(a) exists.

34. Section 1.98 is amended by revising the title and paragraph (a) to read as follows:

§ 1.98 Content of information disclosure statement.

(a) Any disclosure statement filed under § 1.97 or § 1.99 shall include: (1) A listing of patents, publications or other information and (2) a concise explanation of the relevance of each listed item. The disclosure statement shall be accompanied by a copy of each listed patent or publication or other item of information in written form or of at least the portions thereof considered by the person filing the disclosure statement to be pertinent. All United States patents listed should be identified by their patent numbers, patent dates and names of the patentees. Each foreign published application or patent should be cited by identifying the country or office which issued it, the document number and publication date indicated on the document. Each printed publication should be identified by author (if any), title of the publication, pages, date and place of publication.

* * * * *

35. Section 1.9 is revised to read as follows:

§ 1.99 Updating of information disclosure statement.

If prior to issuance of a patent an applicant, pursuant to his or her duty of disclosure under § 1.56 wishes to bring to the attention of the Office additional patents, publications or other information not previously submitted, the additional information should be submitted to the Office with reasonable promptness. It may be included in a supplemental information disclosure statement or may be incorporated into other communications to be considered by the examiner. Any transmittal of additional information shall be accompanied by explanations of relevance and by copies in accordance with the requirements of § 1.98.

36. Section 1.101 is amended by revising paragraph (a) to read as follows:

§ 1.101 Order of examination.

(a) Applications filed in the Patent and Trademark Office and accepted as complete applications are assigned for examination to the respective examining groups having the classes of inventions to which the applications relate. Applications shall be taken up for examination by the examiner to whom they have been assigned in the order in which they have been filed except for those applications in which examination has been advanced pursuant to § 1.102 and those applications in which the Office has accepted a request for waiver of patent rights filed under § 1.139. International applications which have complied with the requirements of 35 U.S.C. 371(c) will be taken up for action based on the date on which such requirements were met. However, unless a request has been filed under 35 U.S.C. 371(f) no action may be taken prior to 21 months from the priority date.

* * * * *

37. Section 1.118 is revised to read as follows:

§ 1.118 Amendment of disclosure.

(a) No amendment shall introduce new matter into the disclosure of an application after the filing date of the application § 1.53(b)). All amendments to the specification, including the claims, and the drawings filed after the filing date of the application must conform to at least one of them as it was at the time of the filing of the application. Matter not found in either, involving a departure from or an addition to the original disclosure, cannot be added to the application after its filing date even though supported by an oath or declaration in accordance with § 1.63 or § 1.67 filed after the filing date of the application.

(b) If it is determined that an amendment filed after the filing date of the application introduces new matter, claims containing new matter will be rejected and deletion of the new matter in the specification and drawings will be required even if the amendment is accompanied by an oath or declaration in accordance with § 1.63 or § 1.67.

38. Section 1.123 is revised to read as follows:

§ 1.123 Amendments to the drawing.

No change in the drawing may be made except by permission of the Office. Permissible changes in the construction shown in any drawing may be made only by bonded draftsmen, at applicant's expense, or by the submission of substitute drawings by applicant. A sketch in permanent ink showing proposed changes, to become part of the record, must be filed for approval by the examiner. The paper requesting amendments to the drawing should be separate from other papers.

39. Section 1.125 is revised to read as follows:

§ 1.125 Substitute specification.

If the number or nature of the amendments shall render it difficult to consider the case, or to arrange the papers for printing or copying, the examiner may require the entire specification, including the claims, or any part thereof, to be rewritten. A substitute specification may not be accepted unless it has been required by the examiner or unless it is clear to the examiner that acceptance of a substitute specification would facilitate processing of the application. Any substitute specification filed must be accompanied by a statement that the substitute specification includes no new matter. Such statement must be a verified statement if made by a person not registered to practice before the Office.

40. Section 1.131 is amended by revising paragraph (a) to read as follows:

§ 1.131 Affidavit or declaration of prior invention to overcome cited patent or publication.

(a) When any claim of an application or a patent under reexamination is rejected on reference to a domestic patent which substantially shows or describes but does not claim the rejected invention, or on reference to a foreign patent or to a printed publication, and the applicant or the owner of the patent under reexamination shall make oath or declaration as to facts showing a completion of the invention in this country before the filing date of the application on which the domestic patent issued, or before the date of the foreign patent, or before the date of the printed publication, then the patent or publication cited shall not bar the grant of a patent to the applicant or the confirmation of the patentability of the claims of the patent, unless the date of such patent or printed publication is more than one year prior to the date on which the applicant's or patent owner's application was filed in this country.

* * * * *

41. Section 1.132 is revised to read as follows:

§ 1.132 Affidavits or declarations traversing grounds of rejection.

When any claim of an application or a patent under reexamination is rejected on reference to a domestic patent which substantially shows or describes but does not claim the invention, or on reference to a foreign patent, or to a printed publication, or to facts within the personal knowledge of an employee of the Office, or when rejected upon a mode or capability of operation attributed to a reference, or because the alleged invention is held to be inoperative or lacking in utility, or frivolous or injurious to public health or morals, affidavits or declarations traversing these references or objections may be received.

42. Section 1.137 is amended by revising paragraph (b) to read as follows:

§ 1.137 Revival of abandoned application.

* * * * *

(b) An application unintentionally abandoned for failure to prosecute, except pursuant to § 1.53(d), may be revived as a pending application if the delay was unintentional. A petition to revive an unintentionally abandoned application must be filed within one year of the date on which the application became abandoned or be filed within three months of the date of the first decision on a petition to revive under paragraph (a) of this section which was filed within one year of the date of abandonment of the application. A petition to revive an unintentionally abandoned application must be accompanied by (1) a statement that the abandonment was unintentional, (2) a proposed response unless it has been previously filed, and (3) a petition fee as set forth in § 1.17(m). Such statement must be a verified statement if made by a person not registered to practice before the Patent and Trademark Office. The Commissioner may require additional information where there is a question whether the abandonment was unintentional. The three month period set forth in this paragraph may be extended under the provisions of § 1.136(a), but no further extensions under § 1.136(b) will be granted. Petitions to the Commissioner under § 1.83 to waive any time periods for requesting revival of an unintentionally abandoned application will not be considered, but will be returned to the applicant.

* * * * *

43. Section 1.153 is amended by revising paragraph (b) to read as follows:

§ 1.153 Title, description and claim, oath or declaration.

* * * * *

(b) The oath or declaration required of the applicant must comply with § 1.63.

44. Section 1.154 is amended by revising paragraph (e) to read as follows:

§ 1.154 Arrangement of specification.

* * * * *

(e) Signed oath or declaration (See § 1.153(b)).

45. Section 1.162 is revised to read as follows:

§ 1.162 Applicant, oath or declaration.

The applicant for a plant patent must be the person who has invented or discovered and asexually reproduced the new and distinct variety of plant for which a patent is sought (or as provided in §§ 1.42, 1.43, and 1.47). The oath or declaration required of the applicant in addition to the averments required by § 1.63, must state that he or she has asexually reproduced the plant. Where the plant is a newly found plant the oath or declaration must also state that it was found in a cultivated area.

46. Section 1.163 is amended by revising paragraph (b) to read as follows:

§ 1.163 Specification.

* * * * *

(b) Two copies of the specification (including the claim) must be submitted, but only one signed oath or declaration is required. The second copy of the specification may be a legible carbon copy of the original.

47. Section 1.172 is amended by revising paragraph (a) to read as follows:

§ 1.172 Applicants, assignees.

(a) A reissue oath must be signed and sworn to or declaration made by the inventor or inventors except as otherwise provided (see §§ 1.42, 1.43, 1.47), and must be accompanied by the written assent of all assignees, if any, owning an undivided interest in the patent, but a reissue oath may be made and sworn to or declaration made by the assignee of the entire interest if the application does not seek to enlarge the scope of the claims of the original patent.

* * * * *

48. Section 1.174 is amended by revising paragraph (a) to read as follows:

§ 1.174 Drawings.

(a) The drawings upon which the original patent was issued may be used in reissue applications if no changes whatsoever are to be made in the drawings. In such cases, when the reissue application is filed, the applicant must submit a temporary drawing which may consist of a copy of the printed drawings of the patent or a photoprint of the original drawings of the size required for original drawing.

* * * * *

49. Section 1.175 is amended by revising the introductory text of paragraph (a) to read as follows:

§ 1.175 Reissue oath or declaration.

(a) Applicants for reissue, in addition to complying with the requirements of § 1.63 must also file with their applications a statement under oath or declaration as follows:

* * * * *

50. Section 1.324 is revised to read as follows:

§ 1.324 Correction of inventorship in patent.

Whenever a patent is issued and it appears that the correct inventor or inventors were not named through error without deceptive intention on the part of the actual inventor or inventors, the Commissioner may, on petition of all the parties and the assignees and satisfactory proof of the facts and payment of the fee set forth in § 1.20(b), or on order of a court before which such matter is called in question, issue a certificate naming only the actual inventor or inventors.

51. Section 1.325 is revised to read as follows:

§ 1.325 Other mistakes not corrected.

Mistakes other than those provided for in §§ 1.322, 1.323, 1.324, and not affording legal grounds for reissue or for reexamination, will not be corrected after the date of the patent.

52. A new § 1.335 is added to read as follows:

§ 1.335 Filing of notice of arbitration awards.

(a) Written notice of any award by an arbitrator pursuant to 35 U.S.C. 294 must be filed in the Patent and Trademark Office by the patentee, or the patentee's assignee or licensee. If the

award involves more than one patent a separate notice must be filed for placement in the file of each patent. The notice must set forth the patent number, the names of the inventor and patent owner, and the names and addresses of the parties to the arbitration. The notice must also include a copy of the award.

(b) If an award by an arbitrator pursuant to 35 U.S.C. 294 is modified by a court, the party requesting the modification must file in the Patent and Trademark Office, a notice of the modification for placement in the file of each patent to which the modification applies. The notice must set forth the patent number, the names of the inventor and patent owner, and the names and addresses of the parties to the arbitration. The notice must also include a copy of the court's order modifying the award.

(c) Any award by an arbitrator pursuant to 35 U.S.C. 294 shall be unenforceable until any notices required by paragraph (a) or (b) of this section are filed in the Patent and Trademark Office. If any required notice is not filed by the party designated in paragraph (a) or (b) of this section, any party to the arbitration proceeding may file such a notice.

53. Section 5.12 is revised to read as follows:

§ 5.12 Petition for license.

(a) Filing of an application for patent for inventions made in the United States will be considered to include a petition for license under 35 U.S.C. 184 for the subject matter of the application. The filing receipt will indicate if a license is granted. If the initial automatic petition is not granted, a subsequent petition may be filed under paragraph (b) of this section.

(b) Petitions for license under 35 U.S.C. 184 should be presented in letter form and should include petitioner's address, and full instructions for delivery of the requested license when it is to be delivered to other than the petitioner.

GERALD J. MOSSINGHOFF,
*Commissioner of
Patents and Trademarks*

Dec. 23, 1982.

[1027 OG 9]

(60) Deposit Accounts—Statutory Fee Charges

Beginning on May 1, 1966, and until further notice, statutory fees, including filing fees for patent, design, and trademark applications, issue fees, appeal fees and opposition, cancellation and petition fees may be charged against the deposit accounts provided for by Rule 25(a) of the Rules of Practice in patent cases. During this period the prohibition of Rule 25(b) against such charges will be suspended.

In view of the facts that these fees are indispensable parts of the actions to which they relate and that the charging of a fee against an account which does not contain sufficient funds to cover it cannot be regarded as a payment of the fee, it is evident that the overdrawing of a deposit account may result in the loss of a vital date and may also impose a substantial burden on the Patent Office in making appropriate correction of its records. It is, therefore, necessary that effective steps be taken to avoid such overdrafts, as follows:

Checks of all accounts will be made periodically, and if any account is found to have been overdrawn, it will be immediately removed from the active accounts and no further drafts on it will be honored. Prompt payment of the outstanding balance will be required and the depositor or his attorney may be called on for an itemized statement identifying all statutory fees charged against the account during the period in question in order that it may be ascertained whether any previously granted date should be withdrawn.

It is emphasized that the success of the procedure outlined above depends upon the maintenance of a sufficient balance in deposit accounts at all times to meet any charges made against them. The Office must, therefore, strictly refuse to permit any depositor who has once overdrawn his account to maintain such an account in the future and in the event that any substantial number of overdrafts occurs it may be necessary to reestablish the prohibition of Rule 25(b) against charging statutory fees against deposit accounts.

Accordingly, effective May 1, 1966, the requirement of Rule 25(a) that an amount sufficient to cover all charges made against an account must always be on deposit will be strictly enforced, regardless of whether any fee is included in such charges and where this requirement is not complied with the account involved will be removed from the active accounts.

EDWARD J. BRENNER,
Commissioner.

Feb. 23, 1966.

[824 O.G. 1200]

(61) Request for Refunds

In order to expedite the processing of refunds for payment of fees by actual mistake or in excess of the designated fees, attorneys and applicants requesting refunds should direct their correspondence to the attention of the "Refund Section, Accounting Division, Office of Finance." This procedure should be followed whether the request is for a refund check or for a credit to the deposit account. The problems of misrouting the request for a refund in the Patent and Trademark Office would be alleviated and the payment of refunds accelerated.

BRADFORD R. HUTHER,
*Assistant Commissioner
for Finance & Planning.*

[1024 O.G. 59 (11-23-82)]

(62) Deposit Account Authorizations

The rules of practice were amended effective Oct. 1, 1982, at 37 CFR 1.25(b) to state that: "A general authorization to charge all fees, or only certain fees, set forth in §§ 1.16 to 1.18 to a deposit account may be filed in an individual application, either for the entire pendency of the application or with respect to a particular paper filed." A general authorization would not apply to document supply fees under § 1.19, such as those required for certified copies; to post-issuance fees under § 1.20 such as those required for maintenance fees; or to miscellaneous fees and charges under § 1.21, such as assignment recording fees.

Many applications filed prior to Oct. 1, 1982, contain broad language authorizing any additional fees which might have been due to be charged to a deposit account. The Patent and Trademark Office does not interpret such broad authorizations, filed prior to Oct. 1, 1982, to include authorization to charge to a deposit account the issue fee or other fees in sections 1.16, 1.17 and 1.18 except those associated with the paper containing the broad authorization. However, such a broad authorization filed in an application on or after Oct. 1, 1982, will be interpreted as authorization to charge the issue fee; as well as any other fee set forth in §§ 1.16, 1.17 or 1.18. Fees under sections 1.19, 1.20 and 1.21 will not be charged as a result of a general authorization under section 1.25.

It is recommended that authorizations to charge fees to deposit accounts include reference to the particular fees or fee sections of the rules which applicant intends to authorize. For example, if filing and processing fees under §§ 1.16 and 1.17 only are intended to be included in the authorization, and not the issue fee under § 1.18, the authorization could read: "The Commissioner is hereby authorized to charge any fees under 37 CFR 1.16 and 1.17 which may be required during the entire pendency of the application to Deposit Account No. . . ." Such an authorization would clearly exclude issue fees under 37 CFR 1.18 while including all the filing and processing fees listed in 37 CFR 1.16 and 1.17. Similarly, if it were intended to authorize the charging of fees relating only to a specific paper, the authorization could read "The Commissioner is hereby authorized to charge any fees under 37 CFR 1.16 and 1.17 which may be required by this paper to Deposit Account No. . . ." Such authorizations would cover situations in which a check to cover a filing and processing fee under 37 CFR 1.16 and 1.17 was omitted or was for an amount less than the amount required.

It is extremely important that the authorization be clear and unambiguous. If applicants file authorizations which are ambiguous and which deviate from the usual forms of authorizations, the Office may not interpret the authorizations in the manner applicants intend. In such cases applicants could be subject to further expenses, petitions, etc. in order to correct fees which were not charged as intended due to an ambiguous authorization.

July 1, 1983.

GERALD J. MOSSINGHOFF,
*Commissioner of Patents
and Trademarks.*

[1032 OG 32]

(63) Deposit Account Authorization to Charge Issue Fee

This notice supplements the Official Gazette notice, dated July 1, 1983, published at 1032 O.G. 33 on July 26, 1983.

The rules of practice were amended effective Oct. 1, 1982, at 37 CFR 1.25(b) to state that: "A general authorization to charge all fees, or only certain fees, set forth in 37 CFR 1.16 to 1.18 to a deposit account may be filed in an individual application, either for the entire pendency of the application or with respect to a particular paper filed."

The Patent and Trademark Office will treat broad language to "charge any additional fees which may be required at any time during the prosecution of the application" as authorization to charge the issue fee on applications filed on or after Oct. 1, 1982.

Sept. 30, 1988

RENE D. TEGTMEYER,
*Assistant Commissioner
for Patents*

[1095 OG 44]

(64) Notice to All Deposit Account Holders

Beginning Oct. 7, 1983, please *mail deposit account remittances only to:*

Patent and Trademark Office
P.O. Box 70541
Chicago, Ill 60673

To expedite credit to your deposit account and the treasury, and arrangement has been made between the Patent and Trademark Office, Treasury Department, and the First National Bank of Chicago utilizing a special "lockbox" depository to receive deposit account remittances.

Checks should continue to be made payable to the Commissioner of Patents and Trademarks and be accompanied by it *the top portion of your deposit account statement.* Submit only remittances for deposit accounts to this new address. All other correspondence should continue to be addressed to the Commissioner of Patents and Trademarks, Washington, D.C. 20231.

LEONARD L. NAHME,
Director Office of Finance.

[1035 OG 27]

(65) Use of Restricted Deposit Account for Electronic Ordering of Patent and Trademark Copies

Effective July 1, 1986, the restricted deposit account will be made available to those members of the public who wish to use it for electronic ordering of patent and trademark copies. The restricted deposit account requires maintenance of a minimum balance of \$300.00 at the end of each month, as compared to the unrestricted account which requires a minimum balance of \$1,000.00.

In FY 1986, the Office established the restricted deposit

account for use in charging subscriptions for copies of newly issued patents by subject matter classification. Establishment of a PTO deposit account is a prerequisite for subscription service.

Recently, the Office established an electronic ordering service (EOS), a method of ordering copies of patents and trademarks through the use of a computer terminal and modem. EOS is available only to PTO deposit account holders.

Many people who are interested in using EOS to order copies of patents and trademarks and who do not have PTO deposit accounts find the \$1,000.00 balance required for the unrestricted account prohibitive. Therefore, the use of restricted account is being expanded to incorporate EOS ordering. Subscription and EOS ordering are the only two services for which restricted accounts may be used. If you have any questions on subscriptions or EOS, please call Mary Brown on (703) 557 3236. If you have questions on deposit accounts, please call Delores Riley on (703) 557 3227.

THERESA A. BRELSFORD,
*Assistant Commissioner,
for Administration.*

June 23, 1986.

[1068 OG 37]

(66) Telephone Changes for Deposit Account Status Line

Effective Nov. 18, 1991, new telephone exchange numbers will be made for the Deposit Account Status Line. On that date, Deposit Account Balance information can be obtained by calling (703) 305-8735 or (703) 305-8746 from 6:30 a.m. until mid-night, Eastern time, Monday thru Friday, except for Federal holidays.

Questions that may arise pertaining to the information received through use of the status line may be referred to the Deposit Account Division at (703) 308-0902. Calls will be received on the answering machine 24 hours a day, seven days a week.

Oct. 31, 1991

BRADFORD HUTHER
*Assistant Commissioner for
Finance and Planning*

[1132 OG 48]

(67) Unpaid Fee Checks

Beginning Dec. 1, 1987, the Office will change the procedure for handling fee checks of attorneys and agents that are returned to the Office unpaid. Presently, when a check submitted as payment for an application, a processing, an issue or any other fee is returned to the Office unpaid, the Office of Finance sends a letter to the attorney or agent who represents the applicant, or to the applicant if unrepresented by an attorney or agent, enclosing the check and calling attention to the fact that the check was returned unpaid. Beginning Dec. 1, 1987, the Office of Finance will send a copy of its letter to the applicant if the letter is addressed to an attorney or agent. The prohibition of 37 CFR §§ 1.33 and 2.18 against double correspondence is waived in view of the submission of a check that is returned unpaid to the Office.

A registered patent attorney or agent who repeatedly submits checks that are returned unpaid through no fault of the bank may expect to have the matter referred to the Office of Enrollment and Discipline.

Oct. 5, 1987.

DONALD W. PETERSON,
Deputy Commissioner

[1083 TMOG 44]

(68) Posting of Filing Fee Codes

We are making a minor change in the recording of fees so that we can speed up the processing of mail.

First, a brief explanation of the problem. Incoming mail to the PTO has soared. The number of envelopes received in the Mail Room in the first four months of this fiscal year is almost 30% higher than for the same period last year. This sudden increase has taxed existing resources and a backlog has developed. It takes a new employee over one year to become proficient in recognizing the hundreds of different types of documents entering the Office, the appropriate fee codes to apply, and the appropriate destination.

One of the most time-consuming functions of the Mail Room initial review clerks is the determination of how many independent and dependent claims there are in a patent application so that the appropriate amounts can be coded for the basic application fee, the extra independent claim fee, the extra total claim fee, and the multiple dependent claim fee. This can involve a substantial amount of time in complicated cases, particularly when there are preliminary amendments. With over 30,000 individual documents patent applications and all other mail to be processed and routed each day, such time-consuming delays have a severe adverse impact in moving all the work.

So, effective immediately, we are making a change which will move the mail more quickly. Rather than go through the time-consuming computation in the Mail Room to determine the amount to charge to each specific claim fee code, the total amount received will be recorded in one filing code. The detailed calculations will continue to be done later in the process where, in conjunction with the formality review of the application, the analysis takes place as to whether or not the fee submitted was correct. The individual charges remain the same and the information on claims contained in the application will continue to be reported on the application filing receipt without change. Here's what would be seen on deposit account charges and checks:

- 101 - Includes amount for basic filing fee, extra independent claims, extra total claims, and multiple dependent claims, previously recorded as 101, 102, 103, and 104, respectively.
- 201 - Includes same items as above for small entity applications, previously recorded as 201, 202, 203, and 204.
- 108 - Includes same items as above for reissue applications, previously recorded as 108, 109, and 110.
- 208 - Includes same items as above for small entity reissue applications, previously recorded as 208, 209, and 210.

This revised procedure allows us to be more efficient.

(69) **Use of Metric System of Measurements
in Patent Applications**

The ability of the United States to compete in world trade and improve our trade balance is becoming more important and more difficult each day as our competitors get stronger. Presently, the United States is the only industrial country which has not adopted the metric system of weights and measures. The lack of U.S. goods being produced and packaged under metric standards results in our country being at a competitive disadvantage in world markets.

To improve our competitiveness, in the 1988 trade bill, Congress established metric as the Nation's "preferred system of units for United States trade and commerce," and set a 1992 date for Federal agencies to complete their transition to metric uses in "procurement, grants and other business related activities".

To implement the congressional designation of the metric system of measurement for U.S. trade and commerce, the President on July 25, 1991, issued an Executive Order (Metric Usage in Federal Government Programs) for the Federal Government to lead the way in metric usage. The Department of Commerce has been designated as the lead agency responsible for coordinating usage by the Federal Government.

The Patent and Trademark Office (PTO) does not currently

require weights and measures in patent applications to be stated in the metric system. However, in Section 608.01 of the Manual of Patent Examining Procedure, all patent applicants are strongly encouraged to use either (1) only metric units or (2) inch-pound units together with their metric equivalents, when describing their inventions in the specifications of patent applications.

In the spirit of the Executive Order, the PTO reiterates and emphasizes strong encouragement for patent applicants to use the metric system of weights and measurements in patent applications. At some future time when there has been a sufficient conversion to metric usage by U.S. research and development industries, the PTO will consider making it a requirement that patent applicants use metric units in patent applications.

**[Docket No. 920671-2171]
RIN 0651-AA55**

**Changes in Signature and Filing Requirements for
Correspondence Filed in the Patent and Trademark Office**

Agency: Patent and Trademark Office, Commerce
Action: Notice of Proposed Rulemaking

Summary: The Patent and Trademark Office (Office) is proposing to amend the rules of practice in patent and trademark cases to: specify the types of correspondence which would no longer require original signatures; provide for facsimile transmission of certain correspondence to the Office; discontinue use of the drop box at Crystal Plaza Building 3 and at the Department of Commerce Building in Washington, D. C.; and clarify other provisions with respect to practice before the Office.

Dates: Written comments must be received on or before Oct. 13, 1992 to ensure consideration. An oral hearing will not be conducted.

Addresses: Address written comments to the Office of the Assistant Commissioner for Patents, Box DAC, Washington, D.C. 20231, marked to the attention of Abraham Hershkovitz. Comments may be sent by facsimile to the attention of Abraham Hershkovitz at (703) 305-8825.

For Further Information Contact: Abraham Hershkovitz by telephone at (703) 305-9282 or by mail marked to his attention and addressed to Office of the Assistant Commissioner for Patents, Box DAC, Washington, D.C. 20231.

Supplementary Information: The specific revisions proposed are discussed below:

(1) Types of correspondence no longer requiring original signatures (§ 1.4)

The phrase "correspondence" is proposed to be utilized since the terms "papers", "letters" and "fees" all fall within the generic definition of "correspondence". Prosecution of some applications has been significantly delayed in the past by the Office requirement that all responses be personally signed. That requirement for a personal signature would prevent the Office from accepting the filing of certain correspondence by facsimile transmission as explained in the discussion of proposed § 1.6(d).

It is therefore proposed that § 1.4(d) be added to specify the types of correspondence which require personal signatures and the manner in which correspondence should be signed. The Office will accept copies of correspondence which do not require an original handwritten signature, including photocopies or facsimile transmissions. For example, a photocopy or facsimile transmission of an amendment signed by the attorney may be submitted to the Office. However, a photocopy or any other reproduction of a signature may not be affixed, by anyone other than the person whose signature is being reproduced, to correspondence requiring a signature. Correspondence submitted to

the Office with original signatures should be submitted with signatures in a color of ink different from the printing on the paper so that the Office may easily recognize that the correspondence has been personally signed. Correspondence bearing an original signature, if not submitted to the Office, should be retained by applicants as evidence of proper execution in the event that questions arise as to the authenticity of the photocopy or facsimile-transmitted correspondence. If a question of authenticity arises, the Office may require submission of the correspondence bearing the original signature.

Correspondence submitted in an application filed under the Patent Cooperation Treaty often require an original handwritten signature either by the treaty or the regulations under the treaty. Other examples where original signatures will continue to be required are in patent interference proceedings, enrollment and disciplinary investigations and disciplinary proceedings. Proposed § 1.4(e) identifies the types of correspondence which will continue to require original signatures. Copies, including photocopies or facsimile transmissions, of correspondence which require an original handwritten signature will not be accorded a filing date and may be disposed of. (See § 10.18 for signature requirements of a practitioner). Furthermore, when certified documents must be filed, such as a certified copy of a foreign patent application, pursuant to 35 U.S.C. 119; a certified copy of a foreign trademark registration, pursuant to 15 U.S.C. 1126(e); a certified copy of a final court order, pursuant to 15 U.S.C. 1119; or a certified copy of a U.S. trademark registration, only the original certification is acceptable for filing in the Office. However, this requirement for an original certification of documents does not apply to certifications such as required under §§ 1.8, 1.10 and 1.97(e). The phrase "personal signature" and "personally signed" as used in this section refers to an original handwritten signature.

(2) Identification of applications (§ 1.5)

Section 1.5(a) is proposed to be amended to make reference to the certificate procedure under § 1.8 consistent with the newly proposed title for § 1.8.

(3) Receipt of correspondence (§ 1.6)

A descriptive heading is proposed to be added to each paragraph of § 1.6 to identify the content of that paragraph.

The phrase "correspondence" is proposed to be utilized since the term "papers", "letters" and "fees" all fall within the generic definition of "correspondence".

Section 1.6(a) is proposed to be amended to clarify that correspondence transmitted by facsimile on weekends and Federal holidays within the District of Columbia, will be accorded the next business day as a receipt date.

Sections 1.6(b) and (c) are proposed to be amended to clarify that weekdays refer to any day except a Saturday, Sunday, or Federal holiday within the District of Columbia.

Section 1.6(c) is proposed to be amended to delete reference to the box locations in the lobby of Crystal Plaza Building 3, Arlington, Virginia and at the Department of Commerce Building in Washington, D.C. The use of the drop boxes was discontinued on April 21, 1992 and the hours of operation for the attorney's window were extended to midnight, the same hours the drop boxes were available. The public can now deposit correspondence with the Office and receive a receipt after normal business hours. See "Changes in How Papers May be Filed in the Patent and Trademark Office", 1137 *Off. Gaz. Pat. Office* 7 (April 7, 1992). Use of the drop boxes at Crystal Plaza Building 3 and Department of Commerce Building locations had caused problems for both the public and the Office. It occasionally had been difficult to determine the dates of actual deposit of correspondence in the boxes. On occasion, Office employees and/or members of the public had been denied access to the drop box at the Department of Commerce by building security guards due to a special event taking place at the Department. Additionally, there were instances of correspondence being found outside of the drop boxes (e.g., on the floor of the main lobby of the Department of Commerce Building, on the guard's desk, on a nearby table, etc.). As a result, on occasion, the Office lacked confidence in assigning correct dates of receipt to correspondence deposited in the boxes at Crystal Plaza Building 3 and at the Department of Commerce Building. Given these difficulties,

and the fact that the necessity for these boxes is greatly diminished as a result of the facsimile transmission and certificate of transfer (formerly mailing) procedures, § 1.6(c) is proposed to be permanently amended by deleting reference to the drop boxes at Crystal Plaza Building 3 and the Department of Commerce Building. While this procedural change has already been implemented, the Office welcomes comments regarding the boxes before the procedure is finalized.

A new section 1.6(d) is proposed to be added to specify the types of correspondence which may be transmitted by facsimile and current § 1.6(d) is proposed to be redesignated as § 1.6(e). The widespread use of facsimile transmission and the resulting time saved in correspondence between applicants and the Office prompted the Office to establish a trial program to accept facsimile transmission of certain correspondence. The policy on "Filing of Certain Papers and Authorizations to Charge Deposit Accounts by Facsimile Transmissions" was published at 1096 *Off. Gaz. Pat. Office* 30 (Nov. 15, 1988) and was supplemented in the notice "Filing of Certain Papers with the Board of Patent Appeals and Interferences by Facsimile Transmission" published at 1108 *Off. Gaz. Pat. Office* 15 (Nov. 14, 1989). A comparable policy for trademarks was announced at 1123 *Off. Gaz. Pat. Office* 18 (Feb. 12, 1991). In light of the success of the trial program, a policy on acceptance of facsimile transmission is proposed to be incorporated into § 1.6(d). The exceptions to the use of facsimile-transmitted correspondence have been reduced and are identified in proposed § 1.6(d)(1)-(8). The exceptions cover situations where the correspondence being transmitted are original documents or correspondence requiring original signatures as specified in proposed § 1.4 and situations where accepting a facsimile transmission would be unduly burdensome to the Office. As a courtesy, the Office will attempt to notify senders whenever a facsimile transmission received falls within one of these exceptions. Senders are cautioned against submitting such excepted correspondence by facsimile transmission since such correspondence will not receive a filing date or date of receipt in the Office, and are subject to disposal.

Drawings and other correspondence filed for the purpose of obtaining an application filing date will not be accorded a date of receipt if transmitted by facsimile. Formal drawings may not be filed by facsimile in patent applications because the quality of the drawings received by facsimile transmission is not of a quality sufficient to comply with the drawing requirements set forth in § 1.84. Applicants are therefore encouraged to submit by facsimile only informal drawings or proposed drawing corrections.

As to specimens and drawings in trademark cases, the proposed rule relaxes the requirements set out in the notice entitled "Filing of Certain Trademark Papers and Authorizations to Charge Deposit Accounts by Facsimile Transmission", 1123 *Off. Gaz. Pat. Office* 18 (Feb. 12, 1991). The proposed rule continues to prohibit the transmission by facsimile of the original application, the section 8 or section 9 affidavit, the statement of use or the amendment to allege use. However, the proposed rule permits the facsimile transmission of drawings or specimens in response to an Office action. The same standards of drawing clarity and size apply to drawings received via facsimile. In a like manner, facsimile-transmitted specimens must be legible in order to be accepted and examined as specimens.

The date of receipt accorded to any correspondence permitted to be sent by facsimile transmission is the date the complete transmission is received by an Office facsimile unit, unless the transmission is completed on a Saturday, Sunday or Federal holiday within the District of Columbia. Correspondence for which transmission was completed on a Saturday, Sunday or Federal holiday within the District of Columbia, will be accorded a receipt date of the next succeeding day which is not a Saturday, Sunday or Federal holiday in the District of Columbia. As an example, correspondence sent by facsimile from California on a Friday at 8:45 p.m. is completely transmitted at 9:05 p.m. Pacific time. The complete transmission would be received in the Office around 12:05 a.m. Eastern time on Saturday. The receipt date accorded to the correspondence is the date of the following business day, which in this case, would be Monday.

(4) Certificate of Transfer procedure (§ 1.8)

The title of § 1.8 is proposed to be changed from Certificate of Mailing to the more generic Certificate of Transfer so as to include facsimile transmissions.

Section 1.8(a) presently prescribes procedures for the use of a certificate of mailing to file papers or fees in the Office by first class mail. The phrase "papers or fees" in § 1.8(a) is proposed to be changed to "correspondence" since both "papers" and "fees" fall within the generic definition of "correspondence". Paragraphs (a) and (b) of § 1.8 are proposed to be amended to include correspondence transmitted by facsimile. In the event that correspondence is filed by facsimile transmission, it is recommended that the sending facsimile machine generate a report confirming transmission for each transmission session. This report should be retained by the sender, along with the correspondence used as the original, as evidence of content and date of transfer. Paragraph (a)(2) of § 1.8 is proposed to be amended to include separate headings for correspondence which relate to patents, trademarks and disciplinary proceedings. The sequence of some of the paragraphs found in § 1.8 (a)(2) has been changed in order to have those paragraphs listed under the appropriate heading. The ability to use the Certificate of Transfer procedures has been expanded to the filing of an affidavit under section 15, subsection (3) of the Trademark Act, 15 U.S.C. 1065(3), the filing of a notice of election to proceed by civil action in an *inter partes* proceeding under 35 U.S.C. 141 or section 21(a)(1) of the Trademark Act, 15 U.S.C. 1071(a)(1), in response to another party's appeal to the Court of Appeals for the Federal Circuit, the filing of a notice and reasons of appeal under 35 U.S.C. 142 or a notice of appeal under section 21(a)(2) of the Trademark Act, 15 U.S.C. 1071 (a)(2), and the filing of a statement under 42 U.S.C. 2182 or 42 U.S.C. 2457(c).

Paragraph (a)(2)(vi) of § 1.8 is proposed to be redesignated as paragraph (a)(2)(viii) and amended to refer to section 14(1) or 14 (2) of the Trademark Act, 15 U.S.C. 1064, to conform with the numbering of the Trademark Law Revision Act of 1988. Other sections of paragraph (a)(2) of § 1.8 are proposed to be amended to identify the types of correspondence which will not receive the benefit of a certificate of transfer.

Paragraph (b) of § 1.8 outlines procedures to be followed to document the timely filing of correspondence in accordance with § 1.8(a) where such correspondence is not received by the Office. The phrase "correspondence or fees" in § 1.8(b) is proposed to be changed to "correspondence" since "fees" falls within the generic definition of "correspondence". One of the requirements of § 1.8(b) is that the party forwarding the correspondence or fee include a declaration, under §§ 1.68 or 2.20 of this chapter, attesting to the timely transfer. In order to be consistent with other sections in Parts 1 and 2 of this chapter, the practice under § 1.8(b) is proposed to be amended to permit a practitioner, as defined in § 10.1(r), to submit a statement rather than an oath or declaration under §§ 1.68 or 2.20 of this chapter.

New paragraph (c) of § 1.8 is proposed to be added to explicitly provide for additional evidence relating to the transfer of correspondence in accordance with paragraph (a) of this section. The Office may invoke this requirement where it is deemed appropriate to establish an actual date of mailing or transmission. See, e.g., *In re Klein*, 6 USPQ2d 1547 (Comm'r Pat. 1987), *aff'd sub nom. Klein v. Peterson*, 696 F. Supp. 695, 8 USPQ2d 1434 (D.D.C. 1988), *aff'd* 866 F.2d 412, 9 USPQ2d 1558 (Fed. Cir.) *cert. denied*, 490 U.S. 1091 (1989).

(5) Time for appeal or civil action (§ 1.304)

In section 1.304, paragraphs (a) and (c) are proposed to be amended to delete a statement that use of the certificate procedure under § 1.8 is prohibited so as to be consistent with proposed changes to § 1.8. It is also proposed to clarify a cross-reference to § 1.658 in paragraph (a).

(6) Submission of maintenance fees (§ 1.366)

Section 1.366(b) is proposed to be amended by deleting the words "of mailing" due to the proposed new title for § 1.8.

(7) Filing date of application for extension of patent term (§ 1.741)

Section 1.741(a) is proposed to be amended to refer to the proposed new title for the certificate procedure under § 1.8.

(8) Signature and certificate of practitioner (§ 10.18)

Section 10.18 is proposed to be modified to clarify signature requirements for correspondence signed by practitioners. The reference to § 1.4 of this chapter would make it apparent that copies, including photocopies or facsimile transmissions, of correspondence signed by practitioners will be accepted under appropriate circumstances.

(9) Misconduct (§ 10.23(c))

Section 10.23(c) is proposed to be amended to refer to the proposed new title for the certificate procedure under § 1.8 of this chapter.

Other Considerations

The proposed rule change is in conformity with the requirements of the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*), Executive Orders 12291 and 12612 and the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 *et seq.*

The General Counsel of the Department of Commerce has certified to the Chief Counsel for Advocacy, Small Business Administration, that these proposed rule changes will not have a significant adverse economic impact on a substantial number of small entities (Regulatory Flexibility Act, 5 U.S.C. 605(b)). The principal impact of these proposed changes is to incorporate existing Office policy into the regulations, permit the filing of certain correspondence without an original signature and permit the filing of certain correspondence by facsimile transmission.

The Office has determined that this proposed rule change is not a major rule under Executive Order 12291. The annual effect on the economy will be less than \$100 million. There will be no major increase in costs or prices for consumers, individuals, industries, Federal, state or local government agencies, or geographic regions because most of the proposed changes reduce procedural burdens. There will be no significant adverse effects on competition, employment, investment, productivity, innovation, or the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

The Office has also determined that this notice has no Federalism implications affecting the relationship between the National Government and the States as outlined in Executive Order 12612.

These proposed rule changes contain collection-of-information requirements subject to the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 *et seq.*, which have previously been approved by the Office of Management and Budget under Control Nos. 0651-0009 and 0651-0011.

List of Subjects

37 CFR Part 1

Administrative practice and procedure, Freedom of information, Inventions and patents, Reporting and record keeping requirements.

37 CFR Part 10

Administrative practice and procedure, Conflicts of interest, Courts, Inventions and patents, Lawyers.

For the reasons set out in the preamble, and pursuant to the authority contained in 35 U.S.C. 6, the Office proposes to amend 37 CFR Parts 1 and 10 as follows, wherein deletions are indicated by brackets ([]) and additions by arrows (▶▶▶▶▶):

Part 1 - Rules of Practice in Patent Cases

1. The authority citation for 37 CFR Part 1 would continue to read as follows:
Authority: 35 U.S.C. 6, unless otherwise noted.

2. In Section 1.4, the title is proposed to be revised and paragraphs (d)-(f) are proposed to be added to read as follows:

§ 1.4 Nature of correspondence ▶▶ and signature requirements◀◀

►(d) Each piece of correspondence prepared to be filed in a patent or trademark application, reexamination proceeding, patent file or trademark registration file, which requires a person's signature, must be personally signed in permanent ink by that person. The personally signed correspondence containing the original, handwritten signature, or a copy, such as a photocopy or facsimile transmission (§ 1.6(d)), of the personally signed correspondence may be filed in the Patent and Trademark Office, except as provided in paragraphs (e) and (f) of this section. If the personally signed correspondence is filed, the color of ink used for the signature should be different from the printing on the paper. In the event that a copy of the personally signed correspondence is filed, the personally signed correspondence should be retained as evidence of authenticity. If a question of authenticity arises, the Patent and Trademark Office may require submission of the personally signed correspondence. The phrase "personally signed" as used in this section means an original, handwritten signature.

(e) Correspondence requiring a signature and which relates to patent interference proceedings, enrollment and disciplinary investigations, disciplinary proceedings or international patent applications must be submitted with a personally signed, permanent ink signature.

(f) When a certified document must be filed, a copy, including a photocopy or facsimile transmission, of the certification is not acceptable. ◀

3. Section 1.5(a) is proposed to be revised to read as follows:

§ 1.5 Identification of application, patent or registration.

(a) No correspondence relating to an application should be filed prior to when notification of the application number is received from the Patent and Trademark Office. When a letter directed to the Patent and Trademark Office concerns a previously filed application for a patent, it must identify on the top page in a conspicuous location, the application number (consisting of the series code and the serial number, e.g., 07/123,456), or the serial number and filing date assigned to that application by the Patent and Trademark Office, or the international application number of the international application. Any correspondence not containing such identification will be returned to the sender where a return address is available. The returned correspondence will be accompanied with a cover letter which will indicate to the sender that if the returned correspondence is resubmitted to the Patent and Trademark Office within two weeks of the mail date on the cover letter, the original date of receipt of the correspondence will be considered by the Patent and Trademark Office as the date of receipt of the correspondence. Applicants may use either the [certificate of mailing] ►Certificate of Transfer◀ procedure under § 1.8 or the Express Mail procedure under § 1.10 for resubmissions of returned correspondence if they desire to have the benefit of the date of deposit on the United States Postal Service. If the returned correspondence is not resubmitted within the two-week period, the date of receipt of resubmission will be considered to be the date of receipt of the correspondence. The two-week period to resubmit the returned correspondence will not be extended. If for some reason returned correspondence is resubmitted with proper identification later than two weeks after the return mailing by the Patent and Trademark Office, the resubmitted correspondence will be accepted but given its date of receipt. In addition to the application number, all letters directed to the Patent and Trademark Office concerning applications for patent should also state "PATENT APPLICATION," the name of the applicant, the title of the invention, the date of filing the same, and if known, the group art unit or other unit within the Patent and Trademark Office responsible for considering the letter and the name of the examiner or other person to which it has been assigned.

4. In section 1.6, the title is proposed to be revised, each paragraph is proposed to be defined by a separate heading, paragraphs (a)-(c) are proposed to be revised, paragraph (d) is proposed to be redesignated as paragraph (e) and revised and new paragraph (d) is proposed to be added to read as follows:

§ 1.6 Receipt of [letters and papers] ►correspondence◀

(a) ►Date of receipt and Express Mail date of deposit.

Correspondence◀ [Letter and other papers] received in the Patent and Trademark Office [are] is◀ stamped with the date of receipt except where such [letters and papers are] ►correspondence is◀ filed in accordance with § 1.10 ►or transmitted by facsimile in accordance with paragraph (d) of this section. No correspondence is received in the Patent and Trademark Office on Saturdays, Sundays or Federal holidays within the District of Columbia. Correspondence◀ [Any such letters and papers] filed in accordance with § 1.10 will be stamped with the date of deposit as "Express Mail" with the United States Postal Service unless the date of deposit is a Saturday, Sunday or Federal holiday within the District of Columbia in which case the date stamped will be the next succeeding day which is not a Saturday, Sunday or Federal holiday within the District of Columbia. [No papers are received in the Patent and Trademark Office on Saturdays, Sundays, or Federal holiday within the District of Columbia.] ►Correspondence transmitted by facsimile to the Patent and Trademark Office on a Saturday, Sunday or Federal holiday within the District of Columbia will be stamped with the next succeeding day which is not a Saturday, Sunday or Federal holiday within the District of Columbia, as the date of receipt.◀

(b) ►Patent and Trademark Office Post Office pouch.◀

Mail placed in the Patent and Trademark Office pouch up to midnight on [weekdays, excepting] ►any day, except◀ Saturdays, Sundays◀ and◀ Federal◀ [federal] holidays◀ within the District of Columbia◀, by the post office at Washington, D.C., serving the Patent and Trademark Office, is considered as having been received in the Patent and Trademark Office on the day it was placed in the pouch ►by the U.S. Postal Service◀.

(c) ►Correspondence delivered by hand.◀

In addition to being mailed, ►, correspondence may be◀ [or] delivered by hand during [office] hours ►the Office is open to receive correspondence◀ [, letters and other papers may be deposited up to midnight in a box provided at the guard's desk at the lobby of building 3 of the Patent and Trademark Office at Crystal Plaza, Arlington, Virginia and at the main entrance (14th Street) of the Department of Commerce Building, Washington, D.C., on weekdays except Saturdays and Federal holidays, and all papers deposited therein are considered as received in the Patent and Trademark Office on the day of deposit].

(d) ►Facsimile transmission.

Except in the cases enumerated below, correspondence, including authorizations to charge a deposit account, may be transmitted by facsimile. The filing date accorded to the correspondence will be the date on which the complete transmission is received in the Patent and Trademark Office, unless that date is a Saturday, Sunday, or Federal holiday within the District of Columbia. See § 1.6(a). To facilitate proper processing, each transmission session should be limited to correspondence to be filed in a single national application or other proceeding before the Patent and Trademark Office. The application number of a patent or trademark application, the control number of a reexamination proceeding, the patent number of a patent, or the registration number of a trademark should be entered as a part of the sender's identification on a facsimile cover sheet. Facsimile transmissions are not permitted and if submitted, may be disposed of, in the following situations:

- (1) Correspondence which must be filed with a personally signed permanent ink signature as specified in § 1.4(e);
- (2) Certified documents as specified in § 1.4(f);
- (3) Correspondence which cannot receive the benefit of the certificate of transfer as specified in § 1.8(a)(2)(i)-(xi);
- (4) Drawings submitted under §§ 1.81, 1.83-1.85, 1.152, 1.165 or 1.174;
- (5) A request for reexamination under § 1.510;
- (6) Correspondence to be filed in a patent application subject to a secrecy order under §§ 5.1-5.8 of this chapter and directly related to the secrecy order content of the application;
- (7) Requests for cancellation or amendment of a registration under section 7(e) of the Trademark Act, 15 U.S.C. 1057(e); and

certificates of registration surrendered for cancellation or amendment under section 7(e) of the Trademark Act, 15 U.S.C. 1057(e);

(8) Correspondence to be filed with the Trademark Trial and Appeal Board, except the notice of ex parte appeal.

(e) Interruptions in the U.S. Postal Service.◀

If interruptions or emergencies in the United States Postal Service which have been so designated by the Commissioner occur, the Patent and Trademark Office will consider as filed on a particular date in the Office any [paper or fee] ▶correspondence◀ which is:

(1) Promptly filed after the ending of the designated interruption or emergency; and

(2) Accompanied by a statement indicating that such [paper or fee] ▶correspondence◀ would have been filed on that particular date if it were not for the designated interruption or emergency in the United States Postal Service. Such statement must be a verified statement if made by a person not registered to practice before the Patent and Trademark Office.

5. Section 1.8 is proposed to be amended by revising the title and paragraphs (a) and (b) and by adding new paragraph (c) to read as follows:

§ 1.8 Certificate of [mailing] ▶transfer◀.

(a) Except in the cases enumerated below, [papers and fees] ▶correspondence◀ required to be filed in the Patent and Trademark Office within a set period of time will be considered as being timely filed if:

(1) [They are] ▶it is transferred prior to expiration of the set period of time by being:

(i) deposited with the U.S. Postal Service with sufficient postage as first class mail◀ addressed to the Commissioner of Patents and Trademarks, Washington, D.C. 20231 [, and deposited with the U.S. Postal Service with sufficient postage as first class mail] ▶; and

(ii) transmitted by facsimile as set forth in § 1.6(d) to the Patent and Trademark Office◀ [prior to expiration of the set period:]; and

(2) [They] ▶It◀ also [include] ▶includes◀ a certificate for each [paper or fee] ▶piece of correspondence◀ stating the date of [deposit] ▶transfer◀. The person signing the certificate should have reasonable basis to expect that the correspondence would be [mailed] ▶transferred◀ on or before the date indicated. The actual date of receipt of the [paper or fee] ▶correspondence◀ will be used for all other purposes. This procedure does not apply to ▶, and the benefit of the date of transfer on the certificate will not be extended to,◀ the following:

▶Relative to Patents◀

(i) The filing of a national patent application specification and drawing or other [papers] ▶correspondence◀ for the purpose of obtaining an application filing date;

[(ii) The filing of trademark applications;]

▶(ii) The filing of correspondence in an interference which an examiner-in-chief orders to be filed by hand or "Express Mail";◀

(iii) the filing of agreements between parties to an interference under 35 U.S.C. 135(c);

▶(iv) the filing of international applications for patent and all correspondence in international applications filed under chapter I and chapter II including the filing of documents and fees for entry in to the national stage, see § 1.491;

Relative to Trademarks

(v) The filing of trademark applications;◀

[(iv)▶(vi)◀ The filing of an affidavit showing that a mark is still in use or containing an excuse for nonuse under section 8 (a) or (b) or section 12(c) of the Trademark Act, 15 U.S.C. 1058(a), 1058(b), 1062(c);

[(v)▶(vii)◀ The filing of an application for renewal of a [mark] registration under section 9 of the Trademark Act, 15 U.S.C. 1059;

[(vi)▶(viii)◀ The filing of a petition to cancel a registration of a mark under section 14 [(a)▶, subsection (1)◀ or

[(b)▶(2)◀ of the Trademark Act, 15 U.S.C. 1064 [(a), 1064(b)];

[(vii) The filing of an affidavit under section 15, subsection (3) of the Trademark Act, 15 U.S.C. 1065;

(viii) The filing of a notice of election to proceed by civil action in an inter partes proceeding under 35 U.S.C. 141 or section 21(a)(1) of the Trademark Act, 15 U.S.C. 1071(a)(1), in response to another party's appeal to the Court of Appeals for the Federal Circuit;

(ix) The filing of a notice and reasons of appeal under 35 U.S.C. 142 or a notice of appeal under section 21(a)(2) of the Trademark Act, 15 U.S.C. 1071(a)(2);

(x) The filing of a statement under 42 U.S.C. 2182 or 42 U.S.C. 2457(c);

(xi) The filing of international applications for patent and all papers and fees relating thereto;

(xii) The filing of a paper in an interference which an examiner-in-chief orders to be filed by hand or "Express Mail"; and

(xiii) Papers filed in connection with a disciplinary proceeding under Part 10 of this subchapter.

(xiv) In an application under section 1(b) of the Trademark Act (15 U.S.C. 1051(b)), the filing of a statement of use under § 2.88 (15 U.S.C. 1051(d)).

(xv) In an application under section 1(b) of the Trademark Act (15 U.S.C. 1051(b)), the filing of a request under § 2.89 (15 U.S.C. 1051(d)), for an extension of time to file a statement of use under § 2.88 (15 U.S.C. 1051(d)).

(xvi) In an application under section 1(b) of the Trademark Act (15 U.S.C. 1051(b)), the filing of an amendment to allege use in commerce under § 2.76 (15 U.S.C. 1051(c)).]

▶(ix) In an application under section 1(b) of the Trademark Act, 15 U.S.C. 1051(b), the filing of an amendment to allege use in commerce under section 1(c) of the Trademark Act, 15 U.S.C. 1051(c); or the filing of a statement of use under section 1(d)(1) of the Trademark Act, 15 U.S.C. 1051(d)(1);

(x) In an application under section 1(b) of the Trademark Act, 15 U.S.C. 1051(b), the filing of a request under section 1(d)(2) of the Trademark Act, 15 U.S.C. 1051(d)(2), for an extension of time to file a statement of use under section 1(d)(1) of the Trademark Act, 15 U.S.C. 1051(d)(1); and

Relative to Disciplinary Proceedings

(xi) Correspondence filed in connection with a disciplinary proceeding under Part 10 of this subchapter.◀

(b) In the event that correspondence [or fees are] ▶is considered◀ timely filed ▶by being transferred◀ in accordance with paragraph (a) of this section, but not received in the Patent and Trademark Office, and the application is held to be abandoned or the proceeding dismissed, terminated, or decided with prejudice, the correspondence [or fee] will be considered timely if the party who forwarded such correspondence [or fee]:

(1) informs the Office of the previous [mailing] ▶transfer◀ of the correspondence [or fee] promptly after becoming aware [of] ▶that◀ the Office [action] ▶has no evidence of receipt of the correspondence◀;

(2) supplies an additional copy of the previously [mailed] ▶transferred◀ correspondence [or fee] and certificate, and

(3) includes a [declaration under § 1.68 or § 2.20] ▶statement◀ which attests on a personal knowledge basis or to the satisfaction of the Commissioner to the previous timely [mailing] ▶transfer. Such statement must be a verified statement if made by a person other than a practitioner as defined in § 10.1(r) of this chapter. If the transfer was by facsimile transmission, a copy of the sending unit's report confirming transmission may be used to support this statement.

(c) The Office may require additional evidence to determine if the correspondence was timely filed.◀

6. Section 1.304, paragraphs (a) and (c), are proposed to be revised as follows:

§ 1.304 Time for appeal or civil action.

(a) The time for filing the notice of appeal to the U.S. Court of Appeals for the Federal Circuit (§ 1.302) or for commencing a civil action (§ 1.303) is two months from the date of the decision of the Board of Patent Appeals and Interferences. If a request for

reconsideration or modification of the decision is filed within the time period provided under § 1.197(b) or § 1.658 (b), the time for filing an appeal or commencing a civil action shall expire two months after action on the request. In interferences, the time for filing a cross-appeal or cross-action expires:

(1) 14 days after service of the notice of appeal or the summons and complaint or

(2) two months after the date of decision of the Board of Patent Appeal and Interferences, whichever is later. The time periods set forth in this section are not subject to the provisions of §§ 1.136, 1.550(c) or § 1.645(a) or (b). The Commissioner may extend the time for filing an appeal or commencing a civil action

[(3)] for good cause shown if requested in writing before the expiration of the period for filing an appeal or commencing a civil action, or

[(4)] upon written request after the expiration of the period for filing an appeal or commencing a civil action upon a showing that the failure to act was the result of excusable neglect. [The certificate of mailing practice of § 1.8 is not available for filing a notice of appeal or cross-appeal. See § 1.8(a)(2)(ix).]

(c) If a defeated party to an interference has taken an appeal to the U.S. Court of Appeals for the Federal Circuit and an adverse party has filed notice under 35 U.S.C. 141 electing to have all further proceedings conducted under 35 U.S.C. 146 (§ 1.303(C)), the time for filing a civil action thereafter is specified in 35 U.S.C. 141. The time for filing a cross-action expires 14 days after service of the summons and complaint. [The certificate of mailing practice of § 1.8 is not available for filing a notice of appeal or cross appeal. See § 1.8(a)(2)(viii).]

7. Section 1.366(b) is proposed to be revised to read as follows:

§ 1.366 Submission of maintenance fees.

(b) A maintenance fee and any necessary surcharge submitted for a patent must be submitted in the amount due on the date the maintenance fee and any necessary surcharge are paid and may be paid in the manner set forth in § 1.23 or by an authorization to charge a deposit account established pursuant to § 1.25. Payment of a maintenance fee and any necessary surcharge or the authorization to charge a deposit account must be submitted within the periods set forth in § 1.362(d), (e) or (f). Any payment or authorization of maintenance fees and surcharges filed at any other time will not be accepted and will not serve as a payment of the maintenance fee except insofar as a delayed payment of the maintenance fee is accepted by the Commissioner in an expired patent pursuant to a petition filed under § 1.378. Any authorization to charge a deposit account must authorize the immediate charging of the maintenance fee and any necessary surcharge to the deposit account. Payment of less than the required amount, payment in a manner other than that set forth in § 1.23, or the filing of an authorization to charge a deposit account having insufficient funds will not constitute payment of a maintenance fee or surcharge on a patent. The certificate [of mailing] procedures of either § 1.8 or § 1.10 may be utilized in paying maintenance fees and any necessary surcharges.

8. Section 1.741, paragraph (a), is proposed to be revised to read as follows:

§ 1.741 Filing date of application

(a) The filing date of an application for extension of patent term is the date on which a complete application is received in the Patent and Trademark Office or filed pursuant to the "Certificate of [Mailing] Transfer" provisions of 37 CFR 1.8 or "Express Mail" provisions of 37 CFR 1.10

Part 10-Representation of others before the Patent and Trademark Office

9. The authority citation for 37 CFR Part 10 would continue to read as follows:

Authority: 5 U.S.C. 500; 15 U.S.C. 1123; 35 U.S.C. 6, 31, 32, 41.

10. Section 10.18, is proposed to be revised to read as follows:

§ 10.18 Signature and certificate of practitioner.

(a) [Every paper] Except where a copy, including a photocopy or facsimile transmission, of a personally signed piece of correspondence is permitted to be filed pursuant to § 1.4 of this chapter, every piece of correspondence filed by a practitioner on behalf of himself or herself or representing an applicant or a party to a proceeding in the Patent and Trademark Office must bear the signature of, and be personally signed by, such practitioner except for correspondence [those papers] which [are] is required to be signed by the applicant or party. The signature of a practitioner [to] on correspondence [a paper] filed by him or her, regardless of whether the correspondence has an original, handwritten signature or is a copy, including a photocopy or facsimile transmission, of the personally signed correspondence, constitutes a certificate that:

(1) The [paper] correspondence has been read by the practitioner;

(2) The [paper's] filing of the correspondence is authorized;

(3) To the best of his or her knowledge, information, and belief, there is good ground to support the [paper] correspondence, including any allegations of improper conduct contained or alleged therein; and

(4) It is not interposed for delay.

(b) Any practitioner knowingly violating the provisions of this section is subject to disciplinary action. See § 10.23(c)(15).

11. Section 10.23, paragraph (c)(9), is proposed to be revised to read as follows:

§ 10.23 Misconduct

(c) *

(9) Knowingly misusing a certificate of [mailing] transfer under § 1.8 of this [subchapter] chapter or a certificate of "Express Mail" under § 1.10 of this [subchapter] chapter.

(71) Information in Oath/Declaration Necessary to Identify the Specification in Accordance with 37 CFR 1.63

Section 1.63 of 37 CFR requires that an oath or declaration "identify the specification to which it is directed." Since filing dates are now granted on applications with the oath or declaration being filed later with a surcharge, the question has arisen as to what information must be supplied in the oath or declaration to identify the specification to which it is directed and to comply with the rule.

The declaration form suggested by the Office includes spaces for filling in the names of the inventors, title of invention, application serial number, filing date, foreign priority application information and United States priority application infor-

mation. While this information should be provided, it is not essential that all of these spaces be filled in order to adequately identify the specification in compliance with 37 CFR 1.63.

The following combinations of information supplied in an oath or declaration are acceptable as minimums for identifying a specification:

- (1) name of inventor and application serial number;
- (2) name of inventor, attorney docket number which was on the application as filed, and filing date of the application;
- (3) name of inventor, title of invention and filing date;
- (4) name of inventor, title of invention and reference to a specification which is attached to the oath or declaration at the time of execution and filed with the oath or declaration;
- (5) name of inventor, title of invention and a statement by a registered attorney or agent that the application filed in the PTO is the application which the inventor executed by signing the oath or declaration.

If the oath or declaration is filed with an "attached" specification as indicated in item (4) above, it must be accompanied by a statement that the "attached" specification is a copy of the specification and any amendments thereto which were filed in the Office in order to obtain a filing date for the application. Such statement must be a verified statement if made by a person not registered to practice before the Office.

Oaths or declarations which do not meet the requirements set forth above will not be accepted as complying with 37 CFR 1.63 for completing an application. Any variance from the above guidelines will only be considered upon the filing of a petition for waiver of the rules under 37 CFR 1.183 accompanied by a petition fee (37 CFR 1.17(h)). Supplemental oaths or declarations in accordance with 37 CFR 1.67 will be required in applications in which the oaths or declarations are not completely filled in but contain sufficient information to identify the specifications to which they apply as detailed above.

GERALD J. MOSSINGHOFF,
*Commissioner of Patents
and Trademarks.*

Sept. 12, 1983.

[1035 OG 3]

(72) Graphical Illustrations in the Specification

For convenience many applicants have been including graphs or other types of graphical illustrations in the text portion of the specification. These illustrations do not come within the purview of 37 C.F.R. 1.58 which permits tables and chemical and mathematical formulas in the specification in lieu of formal drawings. Frequently, these graphical illustrations do not have satisfactory reproduction characteristics. Moreover, these reproductions are generally less than satisfactory due to the fact that the illustrations are usually reduced in size in order to fit a column of the printed patent page. Accordingly, effective immediately, graphs and graphical type illustrations in the specification will be objected to under 37 C.F.R. 1.58(a) and drawings pursuant to 37 C.F.R. 1.81 will be required.

WILLIAM FELDMAN,
*Deputy Assistant Commissioner
for Patents.*

Jan. 12, 1978.

[967 O.G. 2]

(73) Inclusion of Copyright or Mask Work Notices in Patents

Under current intellectual property laws, it is possible to obtain copyright protection or mask work protection as well as patent protection for certain designs and technologies. On occasion, an author/inventor considers it desirable to include a notice of copyright or mask work in a design or utility patent

which discloses material on which copyright or mask work protection has previously been established.

The inclusion of a copyright or mask work notice in a patent that discloses material on which copyright or mask work protection has previously been established, would serve to publicize and thereby protect the various intellectual property rights of the author/inventor. Further, this publication would tend to protect the public by militating against an unintentional encroachment into these rights. The presence of an unrestricted copyright or mask work notice in a patent could have an inhibiting effect on public dissemination of the patent disclosure to the extent it discourages the facsimile reproduction of the patent. This possible effect would be contrary to the mission of the Patent and Trademark Office to disseminate knowledge and information publicly by way of patent issuance, publication, and distribution. To avoid this effect, it is considered necessary to include an appropriate authorization of the author/inventor with any copyright or mask work notice appearing in a patent.

In light of these considerations, the Patent and Trademark Office will permit the inclusion of a copyright or mask work notice in a design or utility patent application, and thereby any patent issuing therefrom, which discloses material on which copyright or mask work protection has previously been established, under the following conditions:

- (1) The copyright or mask work notice must be placed adjacent to the copyright or mask work material. Therefore, the notice may appear at any appropriate portion of the patent application disclosure, including the drawing. However, if appearing on the drawing, the notice must be limited in print size from inch to inch and must be placed within the "sight" of the drawing immediately below the figure representing the copyright or mask work material. If placed on a drawing in conformance with these provisions, the notice will not be objected to as extraneous matter under 37 CFR 1.84.
- (2) The content of the notice must be limited to only those elements required by law. For example, "©1983 John Doe" (17 U.S.C. 401) and "*M* John Doe" (17 U.S.C. 909) would be properly limited, and under current statutes, legally sufficient notices of copyright and mask work respectively.
- (3) Inclusion of a copyright or mask work notice will be permitted only if the following authorization is included at the beginning (preferably as the first paragraph) of the specification to be printed for the patent:
A portion of the disclosure of this patent document contains material which is subject to copyright or mask work. The copyright or mask work owner has no objection to the facsimile reproduction by anyone of the patent document or the patent disclosure, as it appears in the Patent and Trademark Office patent file or records, but otherwise reserves all copyright or mask work rights whatsoever.
- (4) Inclusion of a copyright or mask work notice after a Notice of Allowance has been mailed will be permitted only if the criteria of 37 CFR 1.312 have been satisfied.

The inclusion of a copyright or mask work notice in a design or utility patent application, and thereby any patent issuing therefrom, under the conditions set forth above will serve to protect the rights of the author/inventor, as well as the public, and will serve to promote the mission and goals of the Patent and Trademark Office. Therefore, the inclusion of a copyright or mask work notice which complies with these conditions will be permitted. However, any departure from these conditions may result in a refusal to permit the desired inclusion. If the authorization required under condition (3) above does not include the specific language "(t)he [copyright or mask work] owner has no objection to the facsimile reproduction by anyone of the patent document or the patent disclosure, as it appears in the Patent and Trademark Office patent file or records, . . .", the notice will be objected to as improper by the examiner of the application. If the examiner maintains the objection upon re-

consideration, a petition may be filed in accordance with 37 CFR 1.181.

Mar. 20, 1987. **RENE D. TEGTMEYER,**
*Assistant Commissioner
for Patents.*

[1077 OG 22]

(74) **Department of Commerce
Patent and Trademark Office
37 CFR Part 1
[Docket Number 80108-8200]**

Miscellaneous Changes in Patent Practice

Agency: Patent and Trademark Office, Commerce
Action: Final Rule

Summary: The Patent and Trademark Office is amending its regulations to (1) correct certain rules to conform to previous changes in other rules, (2) require all correspondence directed to the Patent and Trademark Office concerning a patent application to include the series code and serial number or serial number and filing date, (3) provide for the indication of copyright and mask work protection in patent applications, (4) require that any necessary corrections to drawings be made only by submission of new or replacement drawings, (5) provide in limited situations for the use of color drawings in utility patent applications, (6) prohibit the use of broken lines in design patent application drawings to show hidden planes and surfaces, and (7) provide for a refund of a portion of the preliminary examination fee where the Demand is withdrawn. The change pertaining to the drawings would remove any need for patent applicants or their representatives to borrow drawings filed in patent applications from the Office after the effective date of the rule change for purposes of making corrections.

Effective Date: Jan. 1, 1989. The non-return of drawings provision of § 1.85(b) will apply to drawings in patent applications filed after Jan. 1, 1989.

For Further Information Contact: Louis O. Maassel by telephone at (703) 557-3070 or by mail marked to his attention and addressed to the Commissioner of Patents and Trademarks, Washington, D.C. 20231.

Supplemental Information: Proposed rulemaking requesting comment was published on May 9, 1988 in the *Federal Register* at 53 FR 16522 - 16527 and on May 24, 1988 in the *Official Gazette* at 1090 O.G. 57 - 62.

An oral hearing was conducted on July 21, 1988 to receive comments.

Written comments were received from 5 patent law groups, 2 patent law firms and 6 individuals. One person also presented oral testimony.

No comments were received relating to the proposed amendment of §§ 1.4, 1.5(b), 1.53(d), 1.56, 1.81, 1.84(j) & (l), 1.152, 1.378, 1.421 and 1.480.

The comments received relating to amendments to particular sections and replies thereto are listed below.

Comments relating to § 1.5(a).

Comment:

Six comments indicated that they considered the punishment of returning papers with improper identification as too harsh a penalty, since such return could result in the necessity of paying extension of time fees or revival of an abandoned application.

Reply: The return of papers with improper identification is not intended to serve as punishment or a penalty, but as a solution to a major problem. In fact, most of the improperly identified papers are not ones for which a time period is running, e.g., priority papers, information disclosure statements, status inquiries, etc. The Patent and Trademark Office's (PTO) goal is to match papers with the appropriate application as quickly as possible. The practice of the PTO has been to attempt to match papers with the correct application by using the Patent Application Locating and Monitoring (PALM) System to conduct a search by applicant's name. Such a search is very slow and merely lists all application numbers under the name of the

inventor. These application numbers must then be individually checked to attempt to match any other identifying information found on the paper. If this process is unsuccessful, attempts are made to reach the sender by telephone. Telephone calls usually require further followup since the paper cannot usually be identified immediately. Frequently, the serial number is not even available to the sender since application-related papers are being sent to the PTO before notification of serial number has been received. For papers not successfully matched after these attempts, the process of using PALM and making telephone calls is repeated days and weeks later. Despite the considerable effort and resources applied to matching papers, there are still thousands of unmatched papers. Undoubtedly, many were followed up by status inquiries or complaint letters from the senders, subsequent PTO searches for missing papers, and resubmissions by senders, some with petitions or extension of time fees. This waste of resources by both the PTO and the applicants is a major concern. Since the goal is to match papers as quickly and efficiently as possible, and not to institute a harsh penalty, the final rule was modified. Papers which are not properly identified will be returned, but if they are resubmitted to the PTO within two weeks of the date they are returned by the PTO, the original date of receipt will be retained without the need for paying fees for extension of time or revival of an abandoned application. Where no return address is available, the papers will be retained for a reasonable period of time to await any followup correspondence. If no followup correspondence is received within a reasonable period of time, the papers will be destroyed.

Comment:

Three comments included the proposal that the filing date and serial number be accepted as meeting the requirements of § 1.5(a).

Reply:

This proposal has been adopted in the final rule.

Comment:

One comment proposed that implementation of the proposal be delayed for one year to provide sufficient time to allow applicants to adapt to the requirements.

Reply:

The requirements are believed to be quite simple and are already met by almost all papers filed in the PTO. Therefore, an extended period of time to adapt is not seen to be necessary or appropriate.

Comment:

Two comments suggested that a procedure be developed under which an applicant could resubmit a corrected return paper with fee in a timely manner, and receive the benefit of the date of the original submission as its filing date.

Reply:

The substance of this suggestion has been adopted in final § 1.5(a), but without the charge of a fee. The final rule provides resubmission of a returned paper with proper identification within two weeks of the PTO mailing date of the letter returning the paper to the sender to resubmit the paper and retain the benefit of the filing date of the original submission. If desired, the resubmission could be mailed under the certificate of mailing procedure of § 1.8 or the "Express Mail" procedure of § 1.10.

Comment:

Three comments suggested that a form or notice be sent, with a time limit set for return of appropriate identification with minimal fee or subcharge.

Reply:

The proposal would require the PTO to retain the unmatched papers in some kind of order, probably alphabetically by inventor name and or by receipt date, so that responses could be matched. A double matching of all papers would be necessary. The responses with the appropriate identification would have to be matched to the original papers submitted, then these would have to be matched with the applications. If responses with appropriate identification did not reference the fact that a notice had been sent, they may not be associated with the original, again resulting in more unmatched papers. Accordingly, the proposal was not adopted.

Comment:

One comment indicated that including the word "must" with respect to providing the serial number and series code is too severe a requirement.

Reply:

The current rules in 37 CFR 1.5 state such identification "should" be on application-related papers. This term has apparently been too permissive and has contributed to the problem. The use of "must" is believed to be sufficiently strong to aid in resolving the problem.

Comment:

One comment included the proposal that a wrong serial number be considered as a defective execution under 35 U.S.C. 26 which could be corrected without loss of filing date.

Reply:

The legislative history of 35 U.S.C. 26 is quite clear that the intent of the section was to remedy problems only in the execution of oaths and declarations.

Comment:

Two comments questioned the meaning of "series code."

Reply:

The series code is the two digit number preceding the serial number on the application filing receipt. A new series code is assigned each time a new series of six digit serial numbers is begun. The current series code is "07". It appears before the serial number, for example 07/123,456. An illustrative example is also included in the final rule.

Comment:

One comment included the proposal that a more appropriate name for the combination of series code and serial number would be "application number."

Reply:

This proposal has been adopted in the final rule.

Comment:

One comment raised the question as to whether correspondence relating to a patent application should contain both the heading "PATENT" as suggested in the helpful hints and "PATENT APPLICATION" as called for in 1.5(a).

Reply:

"PATENT APPLICATION" should be used on patent application correspondence. This should be placed in an obvious location on the top page.

Comment:

One comment noted that the return post card only contains the serial number and not the series code.

Reply:

The PTO plans to begin identifying an eight-digit application number on return post cards. The series code will be the first two digits, followed by a slant "/" and the six digit serial number. Although the series code has not been stamped along with the serial number on the return post card used by many applicants, the series code changes only once about every 7 or 8 years when a new set of serial numbers is begun with 000,001. Therefore, until the eight-digit application number is stamped on return post cards, the current series code "07" can be used along with the serial number currently stamped on the post card.

Comment:

Three comments suggested that the rules provide that a paper without proper identification be returned only if the PTO found it impossible to match the paper to a particular application file.

Reply:

Attempts to match improperly identified papers with a particular application file is very time consuming and experience has shown that the benefits of such time consuming effort are not worth the effort expended.

Comment:

One comment questioned the meaning of "such information" in the second sentence of § 1.5(a).

Reply:

"Such information" means the items referred to in the first sentence, namely, the series code and serial number, serial number and filing date, or international application number.

Comment:

One comment indicated that the PTO may not return a paper in a timely manner.

Reply:

Although no assurance can be given as to the prompt return of all improperly identified papers, such papers will be returned in most instances from the PTO Mail Room within one day of the opening of the envelopes containing the papers and discovery of incomplete identification. Also, the time for resubmission of a returned paper is calculated from the PTO mailing date so that no injury would result from a prompt resubmission.

Comment:

One comment indicated that if the filing receipt is delayed or lost, it would preclude timely status inquiries or cause delays in preliminary matters such as a request for a foreign filing license.

Reply:

A self-addressed return post card, with proper postage, can be used to obtain early notification of the application number.

Comments relating to § 1.53.**Comment:**

One comment pointed out inconsistent wording between proposed § 1.53 and the explanatory comments in the notice of proposed rulemaking.

Reply:

The apparent inconsistency has been corrected.

Comments relating to § 1.71 and § 1.84(o).**Comment:**

One comment raised a question whether the PTO should make a comment as to the legal sufficiency of a copyright notice mentioned in § 1.71 since the PTO does not administer the copyright law.

Reply:

An indication of what is considered to be legally sufficient copyright notice was included to assist applicants who may not be familiar with the copyright law.

Comments relating to § 1.84(a).**Comment:**

Five comments were received objecting to the prohibition of photolithographs as drawings.

Reply:

The final rule does not prohibit photolithographs as drawings.

Comments relating to § 1.84(b).**Comment:**

Three comments were received relating to drawing sheet sizes. One comment favored using only the A4 size and the other two comments favored using letter size (8 1/2 by 11 inches).

Reply:

Since applicants have three different size sheets which may be used as they choose, no need is currently seen to make a single size mandatory. The use of letter size drawing sheets requires further study and if acceptable, will be proposed for public comment in the future.

Comments relating to § 1.84(i).**Comment:**

One comment included the suggestion that clarifying language changes be made in § 1.84(i).

Reply:

The comment relating to the wording of the last sentence of § 1.84(i) has been adopted.

Comments relating to § 1.84(n).**Comment:**

One comment supported the change to § 1.84(n).

Comments relating to § 1.84(p).**Comment:**

Two comments relating to color drawings in utility applications were received. One comment proposed that the applicant be permitted to file color drawings at his or her choice but that the patent be printed in black and white only with copies of the color drawings being available at extra cost. The other comment related to the patent examiner having the discretion to accept color drawings rather than requiring a petition to be filed.

Reply:

In the past only a very few applications have shown a need to include drawings in color. Until more experience is gained, it is considered best to allow color drawings in limited situations and approval to remain in a central location by petition.

Comment:

One comment stated that it is not proper to charge a higher fee where color drawings are required.

Reply:

Color drawings are considered to be beyond the normal requirements set forth in the rules and therefore require waiver of the rules for acceptance.

Comments relating to § 1.85(a).

Comment:

One comment was received suggesting that "may" be changed to "shall" in § 1.85(a).

Reply:

The PTO is currently very liberal in accepting informal drawings and no need is seen for making the proposed change.

Comments relating to § 1.85(b) & (c).

Comment:

One comment proposed allowing drawings filed in the PTO to be withdrawn to make minor changes.

Reply:

The problems relating to charging out drawings would remain if drawings are allowed to be removed from the PTO for any reason. A major purpose of the rule change is to remove the necessity to have a drawing charge-out system in the PTO in the future.

Comment:

One comment asked whether § 1.85(b) would be construed to deny access to a PTO drawing for making a copy.

Reply:

Applicants and their representatives will continue to have access to their files and obtain copies of drawings.

Comment:

One comment proposed adding another sentence to § 1.85(c) to clarify that an extension of time is available under § 1.136 for filing of formal drawings but not for payment of the issue fee.

Reply:

This proposal has been adopted with somewhat different wording.

Comment:

One comment indicated that the three month period for submitting corrections should be measured from the "notice of allowability" rather than the "notice of allowance."

Reply:

This proposal has been adopted in the final rule.

Discussion of specific rules

Section 1.4, as amended, corrects the listing of rules in paragraph (a)(2).

Section 1.5, as amended, provides that all correspondence related to a U.S. national patent application already filed with the Patent and Trademark Office must include the identification of the application number which comprises both the series code and the serial number assigned to that application by the Patent and Trademark Office, (e.g., 07/123,456) or the serial number and filing date. Any correspondence not containing such identification will be returned to the sender where a return address is available. The final rule has been revised to provide that if the correspondence is remailed to the PTO within two weeks of the mailing date of the PTO's cover letter returning the correspondence, the PTO will grant the benefit of the original date of receipt of the returned correspondence. The two-week period will not be extended under § 1.136. Applicants may use either § 1.8 or § 1.10 mailing procedures for resubmissions of returned correspondence. No correspondence relating to an application should be filed prior to when notification of the application number is received from the PTO. If for some reason returned correspondence is resubmitted later than two weeks after the return mailing by the PTO, the resubmitted correspondence will be accepted but given its date of receipt with proper identification. If the original date of receipt is desired, applicants may petition under § 1.183 for waiver of the rules. Given there are over 30,000 documents to be routed each day, this requirement greatly facilitates the matching of correspondence received with the relevant patent application file. Without proper number identification, documents are either significantly delayed during processing or are never matched with the relevant application file. The amendments to paragraph (b) draw attention to the different requirements for identification in correspondence relating to the payment of maintenance fees.

Section 1.53(c) and (d), as amended, state that a copy of the "Notice of Incomplete Application" or "Notice to File Missing Part" form sent to the applicant by the Office should accompany any response submitted to the Office in order for the response to be accepted. This will prevent the inadvertent assignment of

a new application number to correspondence sent in response to such notices or the misrouting of the correspondence.

Section 1.56(e), as amended, corrects the reference to the "Board of Appeals" to read "Board of Patent Appeals and Interferences."

Section 1.71, as amended, contains new paragraphs (d) and (e) relating to the inclusion of copyright and mask work notices in patent applications. The provisions proposed are similar to those set forth in the *Official Gazette* notice dated Mar. 20, 1987 titled "Inclusion of Copyright or Mask Work Notice in Patents" appearing on Apr. 21, 1987 at 1077 O.G. 22. Under current intellectual property laws, it is possible to obtain copyright protection or mask work protection as well as patent protection for certain designs and technologies. On occasion, an author or inventor considers it desirable to include a notice of copyright or mask work in a design or utility patent which discloses material on which copyright or mask work protection previously has been established.

The inclusion of a copyright or mask work notice in a patent that discloses material on which copyright or mask work protection previously has been established, will serve to publicize and thereby protect the various intellectual property rights of the author or inventor. Further, this publication would tend to protect the public by militating against an unintentional encroachment of the rights. The presence of an unrestricted copyright or mask work notice in a patent could have an inhibiting effect on public dissemination of the patent disclosure to the extent it discourages the facsimile reproduction of the patent. The possible effect would be contrary to the mission of the Patent and Trademark Office to disseminate knowledge and information publicly by way of patent issuance, publication, and distribution. To avoid this effect, it is considered necessary to include an appropriate authorization by the author or inventor for copying of the patent itself with any copyright or mask work notice appearing in the patent. Inclusion of a copyright or mask work notice after a Notice of Allowance has been mailed will be permitted only if the criteria of 37 CFR 1.312 have been fulfilled. If the authorization required by amended § 1.71(e) is not included, the notice will be objected to as improper by the examiner. If the examiner maintains the objection upon reconsideration, further review must be by way of a petition filed in accordance with 37 CFR 1.181.

Section 1.81, as amended, clarifies that high quality copies of drawings should be submitted in patent applications. Since corrections are the responsibility of the applicant, the original drawing(s) should be retained by the applicant for future correction, if necessary.

Section 1.84(a), as amended, eliminates reference to two-ply or three-ply bristol board. Amended paragraph (a) also adds a reference to paragraph 1.84(p) relating to color drawings in utility patent applications.

Only one copy of the drawing is required or desired. The Office had attempted to encourage the submission of three copies, but compliance was very low. It was determined that it is more efficient for the Office to rely on consistency and only one copy. Accordingly, hereafter only one copy of the drawings should be submitted.

The Patent and Trademark Office will no longer release to applicants, bonded drafting companies, or others, drawings from patent applications filed after the effective date of these rule changes. See amended § 1.85(b). If corrections to the drawings are necessary, new corrected drawings must be prepared by the applicant and filed in the Patent and Trademark Office. Therefore, the applicant, attorney or agent should retain the original drawing so that a corrected original drawing or corrected copy may be later submitted if necessary.

The Office will continue to allow applicants to borrow drawings for correction which have been filed prior to the effective date of these rule changes.

Section 1.84(b), as amended, provides for applicants using drawing sheets which are 8 1/2 by 13 inches in size.

Section 1.84(i), as amended, contains grammatical corrections in the test of the rules and clarifies Office drawing requirements as to exploded views, enlarged views and views which require several sheets.

Section 1.84(j), as amended, clarifies how views should be arranged when they are placed sideways on the drawing sheet.

Section 1.84(l) as amended, indicates that drawings may be identified by lightly writing identifying information in the top margin on the drawings. For identification by application number, the Office prefers that the information be placed on the front of the drawing. When the applicant forwards drawings separate from the original application papers, a cover letter identifying the application by application number should accompany the drawings. The application number should also be placed on drawings filed after the application number has been indicated in correspondence to the applicant, in accordance with § 1.84(l).

Section 1.84(n) is added and permits numbering of the drawing sheets. However, such numbering would not appear on the drawings of the printed patent.

Section 1.84(o) is added and provides for the indication of copyright or mask work protection notice on patent application drawings. This procedure is the same as that established by the *Official Gazette* notice dated Mar. 20, 1987 published on Apr. 21, 1987 at 1077 O.G. 22.

Section 1.84(p) is added and provides in the rules for the filing of color drawings in a very limited number of utility patent applications. An *Official Gazette* notice relating to this topic dated Aug. 6, 1986, titled "Use of Color Drawings in Utility Patents" was published on Sept. 15, 1987 at 1082 O.G. 25. In light of the substantial administrative and economic burden associated with printing a utility patent with color drawings, the letters patent and the patent copies which are printed at the issuance of the patent will be only in black and white. However, copies of the patent with the color drawings may be purchased separately from the Patent and Trademark Office upon special request and payment of the fee.

It is anticipated that color drawings will only be permitted when color drawings are the only practical method in a utility patent application in which to disclose the subject matter sought to be patented. In order to avoid issues of lack of description or enablement under 35 U.S.C. 112 or new matter under 35 U.S.C. 132, applicants are advised to file the desired color drawings as part of the original application papers. The petition should be directed to the attention of the Deputy Assistant Commissioner for Patents.

Section 1.85, as amended, indicates that drawings not complying with § 1.84 will be accepted in some instances for purposes of examination and that drawings which do comply with all the rules relating to drawings will be required later, and that no corrections will be permitted to drawings filed in the Patent and Trademark Office after the effective date of the rule change.

When corrected drawings are required to be submitted at the time of allowance, the applicant is required to submit *acceptable* drawings within three months from the mailing of the "Notice of Allowability." Within that three-month period, two weeks should be allowed for review of the drawings by the Drafting Branch. If the Office finds that further correction is necessary, the applicant must submit a new corrected drawing to the Office within the original three-month period to avoid the necessity of obtaining an extension of time and paying the extension fee. Therefore, the applicant should file corrected drawings as soon as possible following the receipt of the Notice of Allowability.

Section 85(b) provides that the Patent and Trademark Office will not release drawings filed in applications having a filing date after Jan. 1, 1989 for purposes of correction. Also, in order to give sufficient notice to applicants, allow most patent applications currently on file to be processed, and set a time at which the PTO need no longer provide a system for borrowing of any drawings, § 1.85(b) provides that after Jan. 1, 1991 no drawings may be borrowed from the PTO for the purpose of making drawing corrections.

Section 1.152, as amended, permits broken lines on drawings to show visible environmental structure but not hidden planes and surfaces in design patent application drawings.

Section 1.378, as amended, conforms with section 404 of Public Law 98-622 which states:

"(a) Notwithstanding section 41(c) of title 35, United States Code, as in effect before the enactment of Public Law 97-247 (96 Stat. 317), the Commissioner of Patents and Trademarks may accept after the six-month grace period referred to in such section 41(c), the payment of any maintenance fee due on any patent based on an application filed in the Patent and Trademark Office on or after Dec. 12, 1980, and

before Aug. 27, 1982, to the same extent as in the case of patents based on applications filed in the Patent and Trademark Office on or after Aug. 27, 1982."

The amended rule wording includes reference to maintenance fees due on patents based on applications filed in the Patent and Trademark Office on or after Dec. 12, 1980 and before Aug. 27, 1982.

Section 1.421(f), as amended, deletes reference to a cancelled PCT Rule and adds reference to the current PCT Rule provision.

Section 1.480(d), as amended, provides for a refund of a portion of the international preliminary examination fee where the applicant withdraws the demand before the examiner has begun the international preliminary examination. An amount equal to the transmittal fee would be retained by the Patent and Trademark Office to cover the administrative cost involved.

Environmental, Energy, and Other Considerations

The rule change does not have a significant impact on the quality of the human environment or conservation of energy resources.

The rule change is in conformity with the requirements of the Regulatory Flexibility Act (Pub. L. 96-354), Executive Orders 12291 and 12612, and the Paperwork Reduction Act of 1980, 44 U.S.C. *et seq.*

The General Counsel of the Department of Commerce has certified to the Chief Counsel for Advocacy, Small Business Administration that the rule change will not have a significant adverse economic impact on a substantial number of small entities (Regulatory Flexibility Act, Pub. L. 96-354) because the rule change corrects some rules so that they correspond to earlier changes, relate to identification of applications on correspondence, allow greater flexibility in patent drawing content and handling, and provide for a refund where a proper demand for international preliminary examination has been filed but withdrawn later.

The Patent and Trademark Office has determined that this rule change is not a major rule under Executive Order 12291. The annual effect on the economy will be less than \$100 million. There will be no major increase in costs or prices for consumers, individual industries, federal, state or local government agencies, or geographic regions. There will be no significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

The Patent and Trademark Office has also determined that this notice has no Federalism implications affecting the relationship between the National Government and the States as outlined in Executive Order 12612.

The rule change involves collection of information requirements subject to the Paperwork Reduction Act of 1980, 40 U.S.C. 3501 *et seq.*, and are cleared under OMB Control No. 0651-0011.

List of Subjects in 37 CFR Part 1.

Administrative practice and procedure, Authority delegations (Government agencies), Courts, Inventions and patents, Lawyers.

Notice is hereby given that pursuant to the authority granted to the Commissioner of Patents and Trademarks by 35 U.S.C. 6 and 41, the Patent and Trademark Office is amending Title 37 of the Code of Federal Regulations as set forth below.

37 CFR, Part 1, is amended as follows:

PART 1— RULES OF PRACTICE IN PATENT CASES

1. The authority citation for 37 CFR Part 1 would continue to read as follows:

AUTHORITY: 35 U.S.C. 6 unless otherwise noted.

2. Section 1.4 is amended by revising paragraph (a)(2) to read as follows:

§1.4 *Nature of correspondence.*

(a)

(2) Correspondence in and relating to a particular application or other proceeding in the Office. See particularly the rules relating to the filing, processing, or other proceedings of national applications in Subpart B, §§ 1.31 to 1.378; of international applications in Subpart C, §§ 1.401 to 1.499; of reexamination of patents in Subpart D, §§ 1.501 to 1.570; of interferences in Subpart E, §§ 1.601 to 1.690; of extension of patent term in Subpart F, §§ 1.710 to 1.785; and of trademark applications §§ 2.11 to 2.189.

* * * * *

3. Section 1.5 is amended by revising paragraphs (a) and (b) to read as follows:

§ 1.5 Identification of application, patent or registration.

(a) No correspondence relating to an application should be filed prior to when notification of the application number is received from the Patent and Trademark Office. When a letter directed to the Patent and Trademark Office concerns a previously filed application for a patent, it must identify on the top page in a conspicuous location, the application number (consisting of the series code and the serial number, e.g., 07/123,456), or the serial number and filing date assigned to that application by the Patent and Trademark Office, or the international application number of the international application. Any correspondence not containing such identification will be returned to the sender where a return address is available. The returned correspondence will be accompanied with a cover letter which will indicate to the sender that if the returned correspondence is resubmitted to the Patent and Trademark Office within two weeks of the mail date on the cover letter, the original date of receipt of the correspondence will be considered by the Patent and Trademark Office as the date of receipt of the correspondence. Applicants may use either the certificate of mailing procedure under § 1.8 or the Express Mail procedure under § 1.10 for resubmissions of returned correspondence if they desire to have the benefit of the date of deposit in the United States Postal Service. If the returned correspondence is not resubmitted within the two-week period, the date of receipt of the resubmission will be considered to be the date of receipt of the correspondence. The two-week period to resubmit the returned correspondence will not be extended. If for some reason returned correspondence is resubmitted with proper identification later than two weeks after the return mailing by the Patent and Trademark Office, the resubmitted correspondence will be accepted but given its date of receipt. In addition to the application number, all letters directed to the Patent and Trademark Office concerning applications for patent should also state "PATENT APPLICATION," the name of the applicant, the title of the invention, the date of filing the same, and if known, the group art unit or other unit within the Patent and Trademark Office responsible for considering the letter and the name of the examiner or other person to which it has been assigned.

(b) When the letter concerns a patent other than for purposes of paying a maintenance fee, it should state the number and date of issue of the patent, the name of the patentee, and the title of the invention. For letters concerning payment of a maintenance fee in a patent, see the provisions of § 1.366(c).

* * * * *

4. Section 1.53 is amended by revising paragraphs (c) and (d) to read as follows:

§ 1.53 Serial number, filing date, and completion of application.

* * * * *

(c) If any application is filed without the specification or drawing required by paragraph (b) of this section, applicant will be so notified and given a time period within which to submit the omitted specification or drawing in order to obtain a filing date as of the date of filing of such submission. A copy of the "Notice of Incomplete Application" form notifying the applicant should accompany any response thereto submitted to the Office. If the omission is not corrected within the time period set, the application will be returned or otherwise disposed of; the fee, if submitted, will be refunded less a \$15.00 handling fee.

(d) If an application which has been accorded a filing date pursuant to paragraph (b) of this section does not include the appropriate filing fee or an oath or declaration by the applicant, applicant will be so notified, if a correspondence address has been provided and given a period of time within which to file the fee, oath, or declaration and to pay the surcharge as set forth in § 1.16(e) in order to prevent abandonment of the application. A copy of the "Notice to File Missing Parts" formed mailed to applicant should accompany any response thereto submitted to the Office. If the required fee is not timely paid, or if the processing and retention fee set forth in § 1.21(l) is not paid within one year of the date of mailing of the notification required by this paragraph, the application will be disposed of. No copies will be provided or certified by the Office of an application which has been disposed of or in which neither the required basic filing fee nor the processing and retention fee has been paid. The notification pursuant to this paragraph may be made simultaneously with any notification pursuant to paragraph (c) of this section. If no correspondence address is included in the application, applicant has two months from the filing date to file the basic filing fee, oath or declaration and to pay the surcharge as set forth in § 1.16(e) in order to prevent abandonment of the application; or, if no basic filing fee has been paid, one year from the filing date to pay the processing and retention fee set forth in § 1.21(l) to prevent disposal of the application.

5. Section 1.56 is amended by revising paragraph (e) to read as follows:

§ 1.56 Duty of disclosure; fraud; striking or rejection of applications.

* * * * *

(e) The examination of an application for compliance with paragraph (d) of this section will normally be delayed until such time as (1) all other matters are resolved, or (2) appellant's reply brief pursuant to § 1.193(b) has been received and the application is otherwise prepared for consideration by the Board of Patent Appeals and Interferences, at which time the appeal will be suspended for examination pursuant to paragraph (d) of this section. The prosecution of the application will be reopened to the extent necessary to conduct the examination pursuant to paragraph (d) of this section including any appeal pursuant to § 1.191. If an appeal has already been filed based on a rejection on other grounds, any further rejection under this section shall be treated in accordance with § 1.193(c).

* * * * *

6. Section 1.71 is amended by adding new paragraphs (d) and (e) to read as follows:

§ 1.71 Detailed description and specification of the invention.

* * * * *

(d) A copyright or mask work notice may be placed in a design or utility patent application adjacent to copyright and mask work material contained therein. The notice may appear at any appropriate portion of the patent application disclosure. For notices in drawings, see § 1.84(o). The content of the notice must be limited to only those elements required by law. For example, "1983 John Doe" (17 U.S.C. 401) and "© John Doe" (17 U.S.C. 909) would be properly limited and, under current statutes, legally sufficient notices of copyright and mask work, respectively. Inclusion of a copyright or mask work notice will be permitted only if the authorization language set forth in paragraph (e) of this section is included at the beginning (preferably as the first paragraph) of the specification.

(e) The authorization shall read as follows:

A portion of the disclosure of this patent document contains material which is subject to 'copyright or mask work,' protection. The 'copyright or mask work' owner has no objection to the facsimile reproduction by anyone of the patent document or the patent disclosure, as it appears in the Patent and Trademark Office patent file or records, but otherwise reserves all 'copyright or mask work' rights whatsoever.

7. Section 1.81 is amended by revising the title and paragraph (a) to read as follows:

§ 1.81 Drawings required in patent application.

(a) The applicant for a patent is required to furnish a drawing of his or her invention where necessary for the understanding of the subject matter sought to be patented; this drawing, or a high quality copy thereof, must be filed with the application. Since corrections are the responsibility of the applicant, the original drawing(s) should be retained by the applicant for any necessary future correction.

* * * * *

8. Section 1.84 is amended by revising paragraphs (a), (b), (i), (j) and (l) and by adding new paragraphs (n), (o), and (p), to read as follows:

§ 1.84. Standards for drawings.

(a) *Paper and Ink.* Drawings or high quality copies thereof which are submitted to the Office must be made upon paper which is flexible, strong, white, smooth, non-shiny and durable. India ink, or its equivalent in quality, is preferred for pen drawings to secure perfectly black solid lines. The use of white pigment to cover lines is not normally acceptable. See paragraph (p) of this section for use of color drawings in utility patent applications.

(b) *Size of sheet and margins.* The size of the sheets on which drawings are made may be exactly 8 1/2 by 14 inches (21.6 by 35.6 cm.), exactly 8 1/2 by 13 inches (21.6 by 33.1 cm.), or exactly 21.0 by 29.7 cm. (DIN size A4). All drawing sheets in a particular application must be the same size. One of the shorter sides of the sheet is regarded as its top.

* * * * *

(2) On 8 1/2 by 13 inch drawing sheets, the drawing must include a top margin of 1 inch (2.5 cm.) and bottom and side margins of 1/4 inch (6.4 mm.) from the edges, thereby leaving a "sight" precisely 8 by 11 3/4 inches (20.3 by 29.8 cm.). Margin border lines are not permitted. All work must be included within the "sight." The sheets may be provided with two 1/4 { inch (6.4 mm.) diameter holes having their centerlines spaced 11/16 inch (17.5 mm.) below the top edge and 2 3/4 inches (7.0 cm.) apart, said holes being equally spaced from the respective side edges.

(3) On 21.0 by 29.7 cm. drawing sheets, the drawing must include a top margin of at least 2.5 cm., a left side margin of 2.5 cm., a right side margin of 1.5 cm., and a bottom margin of 1.0 cm. Margin border lines are not permitted. All work must be contained within a sight size not to exceed 17 by 26.2 cm.

* * * * *

(i) *Views.* The drawing must contain as many figures as may be necessary to show the invention; the figures should be consecutively numbered if possible in the order in which they appear. The figures may be plan, elevation, section, or perspective views, and detail views of portions or elements, on a larger scale if necessary, may also be used. Exploded views, with the separated parts of the same figure embraced by a bracket, to show the relationship or order of assembly of various parts are permissible. When an exploded view is shown in a figure which is on the same sheet as another figure, the exploded view should be placed in brackets. When necessary, a view of a large machine or device in its entirety may be broken and extended over several sheets if there is no loss in facility of understanding the view. Where figures on two or more sheets form in effect a single complete figure, the figures on the several sheets should be so arranged that the complete figure can be understood by laying the drawing sheets adjacent to one another. The figures, even through on separate sheets, should be labeled as separate figures, for example as Fig. 1a, Fig. 1b, etc., so that it would be apparent that the views actually comprise one figure. The arrangement should be such that no part of any of the figures appearing on the various sheets is concealed and that the complete figure can be understood even though spaces will occur in the complete

figure because of the margins on the drawing sheets. The plane upon which a sectional view is taken should be indicated on the general view by a broken line, the ends of which should be designated by numerals corresponding to the figure number of the sectional view and have arrows applied to indicate the direction in which the view is taken. A moved position may be shown by a broken line superimposed upon a suitable figure if this can be done without crowding, otherwise a separate figure must be used for this purpose. Modified forms of construction can only be shown in separate figures. Views should not be connected by projection lines nor should centerlines be used. When a portion of a figure is enlarged for magnification purposes, the figure and the enlarged figure must be labeled as a separate figures.

(j) *Arrangement of Views.* All views on the same sheet should stand in the same direction and, if possible, stand so that they can be read with the sheet held in an upright position. If views longer than the width of the sheet are necessary for the clearest illustration of the invention, the sheet may be turned on its side so that the top of the sheet with the appropriate top margin to be used as the heading space is on the right-hand side. One figure must not be placed upon another or within the outline of another.

* * * * *

(l) *Identification of drawings.* Identifying indicia (such as the application number, group art unit, title of the invention, attorney's docket number, inventor's name, number of sheets, etc.) not to exceed 2 3/4 inches (7.0 cm.) in width may be placed in a centered location between the side edges within three-fourths inch (19.1 mm.) of the top edge. Either this marking technique on the front of the drawing or the placement, although not preferred, of this information and the title of the invention on the back of the drawings is acceptable. Authorized security markings may be placed on the drawings provided they are outside the illustrations and are removed when the material is declassified. Other extraneous matter will not be permitted upon the face of a drawing.

* * * * *

(n) *Numbering of drawing sheets.* The drawing sheets may be numbered in consecutive arabic numbers at the top of the sheets, in the middle, but not in the margin. Such numbering will be deleted for printing purposes since page numbers are added at the time of printing the patent by the Office.

(o) *Copyright or Mask Work Notice.* A copyright or mask work notice may appear in the drawing but must be placed with the "sight" of the drawing immediately below the figure representing the copyright or mask work material and be limited to letters having a print size of 1/8 to 1/4 inches (3.2 to 6.4 mm) high. The content of the notice must be limited to only those elements required by law. For example, "© 1983 John Doe" (17 U.S.C. 401) and "© John Doe" (17 U.S.C. 909) would be properly limited and, under current statutes, legally sufficient notices of copyright and mask work, respectively. Inclusion of a copyright or mask work notice will be permitted only if the authorization language set forth in 1.71(e) is included at the beginning (preferably as the first paragraph) of the specification.

(p) *Limited use of color drawings in utility patent applications.* Paragraph (a) of this section requires that drawings in utility patent applications must be in black on white paper. However, on rare occasion, color drawings may be necessary as the only practical medium by which to disclose the subject matter sought to be patented in a utility patent application. The Patent and Trademark Office will accept color drawings in utility patent applications only after granting of a petition by the applicant under § 1.183 of this part which requests waiver of the requirements of paragraph (a) of this section. Any such petition should be directed to the Office of the Deputy Assistant Commissioner for Patents and must include the following:

(1) The appropriate fee set forth in § 1.17(h).

(2) Five (5) sets of color drawings on DIN size A4 (21.0 by 29.7 cm.) sheets.

(3) A proposed amendment to insert in the specification the following language as the first paragraph in the portion of the specification relating to the brief description of the drawing:

"The file of this patent contains at least one drawing executed in color. Copies of this patent with color drawing(s) will be provided by the Patent and Trademark Office upon request and payment of the necessary fee."

9. Section 1.85 is revised to read as follows:

§ 1.85 Corrections to drawings.

(a) The requirements of § 1.84 relating to drawings will be strictly enforced. A drawing not executed in conformity thereto, if suitable for reproduction, may be admitted for examination but in such case a new drawing must be furnished.

(b) The Patent and Trademark Office will not release drawings in applications having a filing date after Jan. 1, 1989, or any drawings from any applications after Jan. 1, 1991, for purposes of correction. If corrections are necessary, new corrected drawings must be submitted within the time set by the Office.

(c) When corrected drawings are required to be submitted at the time of allowance, the applicant is required to submit acceptable drawings within three months from the mailing of the "Notice of Allowability." Within that three-month period, two weeks should be allowed for review of the drawings by the Drafting Branch. If the Office finds that correction is necessary, the applicant must submit a new corrected drawing to the Office within the original three-month period to avoid the necessity of obtaining an extension of time and paying the extension fee. Therefore, the applicant should file corrected drawings as soon as possible following the receipt of the Notice of Allowability. The provisions with respect to obtaining an extension of time relates only to the late filing of corrected drawings. The time limit for payment of the issue fee is a fixed three-month period which cannot be extended as set forth in 35 U.S.C. 151.

10. Section 1.152 is revised to read as follows:

§ 1.152 Drawing.

The design must be represented by a drawing made in conformity with the rules laid down for drawings of mechanical inventions and must contain a sufficient number of views to constitute a complete disclosure of the appearance of the article. Appropriate surface shading must be used to show the character or contour of the surfaces represented. Broken lines may be used to show visible environmental structure, but may not be used to show hidden planes and surfaces which cannot be seen through opaque materials.

11. Section 1.478 is amended by revising paragraphs (b)(1) and (c)(1) to read as follows:

§ 1.378 Acceptance of delayed payment of maintenance fee in expired patent to reinstate patent.

* * * * *

(b) * * *

(1) The required maintenance fee set forth in § 1.20 (e) - (j),

* * *

(c) * * *

(1) The required maintenance fee set forth in § 1.20 (e) - (j),

* * *

12. Section 1.421 is amended by revising paragraph (f) and adding a new paragraph (g) to read as follows:

§ 1.421 Applicant for international application.

* * * * *

(f) Changes in the person, name, or address of the applicant of an international application shall be made in accordance with PCT Rule 92bis.

(g) The wording of PCT Rule 92bis is as follows:

PCT Rule 92bis - Recording of Changes in Certain Indications in the Request or the Demand *92bis Recording of Changes by the International Bureau*

(a) The International Bureau shall, on the request of the applicant or the receiving Office, record changes in the following indications appearing in the request or demand:

(i) person name, residence, nationality or address of the applicant,

(ii) person, name or address of the agent, the common representative or the inventor.

(b) The International Bureau shall not record the requested change if the request for recording is received by it after the expiration:

(i) of the time referred to in Article 22(1), where Article 39(1) is not applicable with respect to any Contracting State;

(ii) of the time limit referred to in Article 39(1)(a), where Article 39(1) is applicable with respect to at least one Contracting State.

13. Section 1.480 is amended by revising paragraph (d) to read as follows:

§ 1.480 Demand for international preliminary examination.

* * * * *

(d) Withdrawal of a proper Demand prior to the start of the international preliminary examination will entitle applicant to a refund of the preliminary examination fee minus the amount of the transmittal fee set forth in § 1.445(a)(1).

Revision of Patent Application Filing Practices

Agency: Patent And Trademark Office, Commerce
Action: Final Rule

Summary: The Patent and Trademark Office (Office) is amending the rules of practice in patent cases, Part I of Title 37, Code of Federal Regulations, to clarify requirements in the filing of patent applications and to provide for procedures to cure certain defects in the filing of applications.

Effective Date: Jan. 16, 1990.

For Further Information Contact: J. Michael Thesz by telephone at (703) 557-8384 or by mail marked to his attention and addressed to the Commissioner of Patents and Trademarks, Washington, D.C. 20231.

Supplementary Information: Proposed rulemaking requesting comments was published on Nov. 30, 1988 in the *Federal Register* at 53 FR 48402-48421 and on Dec. 13, 1988, in the *Official Gazette* at 1097 O.G. 16-35 regarding adjusting patent and trademark fee amounts and including proposed changes to the rules involved in this rulemaking. The period for receiving comments on the rules involved in this rulemaking was extended by a notice published on Feb. 15, 1989 in the *Federal Register* at 54 FR 6936. The final rules adjusting patent and trademark fee amounts were published Feb. 15, 1989 in the *Federal Register* at 54 FR 6893-6910 and on March 7, 1989 in the *Official Gazette* at 1100 O.G. 7-25.

Comments on the rules involved in this rulemaking were received from two patent law associations and from three individuals. The comments received relating to particular sections and replies thereto are listed below.

Comments Related to Section 1.53

Comment: One comment suggested that it would be helpful to new practitioners, in particular, if section 1.53 was amended to specify that continuation and divisional applications may be filed under section 1.53.

Reply: The suggestion in the comment has been adopted. Language has been added to paragraph (b) of section 1.53 to specify what types of applications may be filed under sections 1.53, 1.60 and 1.62. Also, the information about filing continuation and divisional applications from paragraph (a) of section 1.60 has been placed in paragraph (b) of that section to clarify that the information applies only to applications filed under section 1.60.

Comment: One comment stated support for the proposed petition for correcting a failure to name the inventors of an application on filing but suggested that the rule should be "liberalized to indicate that the inventors do not need to be named at the time the application is filed, but may be named later when filing the declaration or oath." Another comment expressed no opposition for requiring a petition and fee for late submission of the names of the inventors but argued that a filing date should be granted regardless thereof since 35 U.S.C. 111 provides for a filing date upon submission of a specification and drawing.

Reply: This suggested modification to the rule has not been adopted. The suggested modification was not proposed for comment. Further, United States patent practice has long required naming all the inventors on filing. The petition procedure of the rule as amended provides adequate relief where the inventors are not named on filing through administrative oversight, for example. It is not appropriate, however, to adopt a procedure where applications could routinely be filed without naming the inventors since this would delay the processing of the applications and since the name of the inventor is often required to provide a unique identifier for an application. The name of the inventor is not only used by attorneys to identify an application but is used to locate an application within the Office, for example, when the serial number is unknown. To delay the date when the inventors are named would unduly add to the administrative burden of the Office.

Comment: One comment stated that the proposed requirement for satisfactorily explaining the delay in supplying the inventors' names was improper since 35 U.S.C. 111 uses the language "within such period and under such conditions" as may be prescribed by the Commissioner. The comment stated that "satisfactorily" implies other and unknown standards, which are not specified conditions although requiring the petitioner to explain the delay is a condition.

Reply: The comment has been adopted in that the language of the final rule does not use "satisfactorily". The final rule requires that the petition set forth the reasons the delay in supplying the names of the inventors should be excused. It is appropriate to require reasons since there may be reasons when such a petition would not be granted, e.g., where the sole reason given that the names of the inventors were not supplied was to purposely delay the processing of the application.

Comments Related to Section 1.60

Comment: One comment questioned whether under section 1.60 there is need for a petition satisfactorily explaining the delays in filing the true copy of the application or a statement that it is a true copy or whether these items should be permitted to be filed without explanation as in the case of an oath submitted after the filing date of an application under section 1.53.

Reply: The filing of an oath later than the filing date of an application, with the payment of a surcharge, under section 1.53 is expressly permitted by 35 U.S.C. 111. No such provision exists for applications filed under section 1.60. Further, it is not appropriate to encourage, in any way, the delay in processing and examining applications filed under section 1.60. The requirement for a petition with a satisfactory explanation of the delay, e.g., that the copy was omitted through inadvertence rather than for purposes of delaying the application, is considered to be appropriate.

Comment Related to Section 1.60 and 1.62

Comment: One comment supported the provisions of proposed sections 1.60 and 1.62 for excusing 1) the failure to file

a true copy of the prior application or the statement that the papers are a true copy (in section 1.60) or 2) the error of filing a copy of the prior application or a new specification (in section 1.62). The comment, however, stated a belief that applicants should have the option of proceeding under either of these proposed rules or under section 1.53 to obtain as the filing date the original date of receipt of the continuing application papers, if desired.

Reply: It is already possible for an applicant to petition under 37 CFR 1.182 to have an application filed under sections 1.60 and 1.62 converted to an application under section 1.53. These different types of applications have different requirements, are reviewed by different personnel within the Office, and are processed in different manners. Conversion from a section 1.60 or 1.62 application to a section 1.53 application involves an administrative burden to the Office. Sections 1.60 and 1.62 as amended provide specific procedures so that applicants can correct the mentioned errors. These procedures should provide the remedy desired by applicants in all but very unusual situations. It is not necessary or appropriate to try to address these very unusual situations in this rulemaking.

Comments Related to Section 1.62

Comment: One comment suggested that Section 1.62(e) should refer to an amendment to the prior application as it exists "at the time of filing of the application under this section" rather than the time of filing the prior application.

Reply: The language suggested in the comment has been adopted.

Comment: One comment questioned whether a petition and fee or denial of filing date were necessary where a copy of a specification from the prior application or a new specification is improperly filed with an application under section 1.62. The comment suggested that a clerk could simply disregard the copy or the specification and place it somewhere in the file with some sort of notation that it is not accepted.

Reply: Changes to the prior application when filing under section 1.62 must be made by amendment to the prior application as it exists at the time of filing the section 1.62 application since the papers from the prior application including the specification are used to constitute the file wrapper continuing application under 37 CFR 1.62. Experience has shown that, when a copy of a specification or a new specification is filed with a section 1.62 application, a different type of application may have actually been desired. For example, a continuing application under section 1.60 may have been desired with the prior application not being expressly abandoned as occurs under section 1.62(g). Also, in the case of a continuation-in-part application, presumably the new disclosure would be contained in the specification erroneously filed with the section 1.62 application. Thus, it is not appropriate to just disregard the copy or the new specification filed with the section 1.62 application. To do so in the first example would result in an unwanted express abandonment. To do so in the second example would disregard the new invention disclosed in the erroneously filed specification. This would raise the possibility of a statutory bar under 35 U.S.C. 102(b) arising if, for example, the new invention was placed on sale in expectation that a filing date would be accorded to the application including the new disclosure. The course of action adopted is to stop the processing of the application as soon as the error is detected, to notify applicant of the error and to give applicant an opportunity to correct the error in whatever way was intended through the filing of a petition and fee.

Comment: One comment questioned whether an amendment, and not a petition, cancelling an improperly submitted copy of a specification filed with a request for a section 1.62 application would be appropriate to obtain a filing date as of the original date of filing the continuing application papers.

Reply: Paragraph (j) of section 1.62 does provide for correction of the filing error, e.g., by amendment cancelling the copy of the prior application, without the filing of a petition and fee provided the correction is made before the payment of the issue fee, abandonment of or termination of proceedings on the prior application. In such a case, the filing date will be the date of receipt of the correction. However, if the date of deposit is necessary or desired as the filing date, a petition and fee are required. This is appropriate in view of the extra Office handling

and processing which is necessitated by applicant's error on filing.

Comment: One comment stated that proposed paragraphs (e) and (j) of section 1.62, when read together, seemed to indicate that a filing date would be granted as of the date the filing error was corrected and not as of the date of deposit of the application. It was suggested that paragraph (e) should expressly state that once the specification is cancelled, the application will be accorded a filing date as of the date of filing of the request for the section 1.62 application.

Reply: The suggestion in the comment has been adopted. Language has been added to section 1.62(e) to state that a filing date "as of the date of deposit of the request for an application under this section" may be granted if an appropriate petition is filed.

Discussion of Specific Rules

Section 1.17, paragraph (i)(1), is amended to include reference to the petitions set forth in sections 1.53, 1.60 and 1.62 by this rulemaking.

Section 1.21, as amended, adds a new paragraph (n) setting forth the fee for handling incomplete or improper applications under sections 1.53(c), 1.60 and 1.62.

Section 1.53, paragraph (b), is amended to establish a procedure whereby the failure to name all the inventors on filing an application, which results in a filing date not being accorded to the application, can be excused upon the filing of a petition which sets forth reasons sufficient to show that the delay in supplying the names should be excused. If the petition is granted, the application would be accorded a filing date as of the date the original papers were deposited. No specific provision allowing this relief was previously in the rules. Paragraph (b) is also amended to specify that a continuation or divisional application (filed under the conditions specified in 35 U.S.C. 120 or 121 and section 1.78(a)) may be filed under sections 1.53, 1.60 and 1.62, that a continuation-in-part application may be filed under sections 1.53 or 1.62 and that the requirements for obtaining a filing date set forth in paragraph (b) apply to applications filed under section 1.53. Paragraph (c), as amended, sets forth the procedure which the Office uses to notify an applicant that the names of the inventors have been omitted and refers to the handling fee set in section 1.21(n), rather than including the fee amount in the rule. This practice is consistent with the other rules which refer to fees.

Section 1.55, paragraph (a), is amended to clarify the language of the rule by adding "an" before "interference".

Section 1.60 is amended to remove and reserve paragraph (a) and to amend paragraph (b) to include the information presently in paragraph (a) so as to clarify that the information applies only to applications filed under this section. Paragraph (b) is also amended to require that an applicant, who desires to file an application under the rule, indicate that the application is being filed pursuant to the rule. Applications which are not specifically designated as being filed under section 1.60 are considered as having been filed under section 1.53, which does not require an originally executed declaration before a filing date is given. The amendment also establishes a procedure whereby the failure to file a true copy of the prior application or the statement that the papers are a true copy, which results in a filing date not being accorded the application, can be excused upon the filing of a petition satisfactorily explaining the delay in filing these items. If the petition is granted, the application would be accorded a filing date as of the date of deposit of the request for a section 1.60 application. No specific provision allowing this relief was previously in the rules. Paragraph (c) is added to set forth the procedure which the Office uses to notify an applicant that an application filed under paragraph (b) is incomplete and the handling fee which is deducted from the amount refunded if an application is not completed after notice to do so has been given.

Section 1.62, paragraph (e), is amended to specifically state that changes to the prior application must be made by an amendment to the prior application filed in the application under section 1.62. An application which includes a copy of the prior application or a new specification is improper under the rule and is not accorded the date of deposit as the filing date unless a petition is filed and granted. This specific statement will hopefully eliminate errors by applicants. The paragraph establishes a

procedure whereby such an error can be excused upon the filing of a petition with instructions to cancel the copy or specification. If the petition is granted, the application will be accorded a filing date as of the date of deposit of the request for a section 1.62 application. Paragraph (j) sets forth the procedure which the Office uses to notify the applicant that an application filed under the section is improper and the handling fee which is deducted from the amount refunded if an application is not corrected after notice to do so has been given.

Section 1.96 is amended to indicate that a copy of the microfiche appendix with computer program listings in an application is a part of the file wrapper and contents available for purchase after a patent based on the application is granted or the application is otherwise made publicly available.

Other Considerations

The rule change is in conformity with the requirements of the Regulatory Flexibility Act (Pub. L. 96-354), Executive Orders 12291 and 12612, and the Paperwork Reduction Act of 1980, 44 U.S.C. Sections 3501 et seq. This rule involves information collection requirements subject to the Paperwork Reduction Act and approved by the Office of Management and Budget under Control No. 0651-0011.

The Office has determined that this notice has no Federalism implications affecting the relationship between the National Government and the States as outlined in Executive Order 12612.

The General Counsel of the Department of Commerce has certified to the Chief Counsel for Advocacy, Small Business Administration, that the rule change will not have a significant adverse economic impact on a substantial number of small entities (Regulatory Flexibility Act, Pub. L. 96-354).

The Office has determined that this rule change is not a major rule under Executive Order 12291. The annual effect on the economy will be less than \$100 million. There will be no major increase in costs or prices for consumers, individual industries, federal, state, or local government agencies, or geographic regions. There will be no significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

List of Subjects in 37 CFR Part I

Administrative practice and procedure, Courts, Freedom of Information, Inventions and patents, Reporting and recordkeeping requirements, Small businesses.

For the reasons given in the preamble and pursuant to the authority granted to the Commissioner of Patents and Trademarks by 35 U.S.C. 6 and 41, and Public Law 97-247, the Office is amending Title 37 of Code of Federal Regulations as set forth below.

Part I Rules of Practice in Patent Cases

1. The authority citation for 37 CFR Part 1 would continue to read as follows:

Authority: 35 U.S.C. 6 unless otherwise noted.

2. Section 1.17 is amended by revising paragraph (i)(1) to read as follows:

§ 1.17 Patent application processing fees.

* * * * *

(i)(1) For filing a petition to the Commissioner under a section of this part listed below which refers to this paragraph....\$120.00

- 1.12-for access to an assignment record.
- 1.14-for access to an application.
- 1.53-to accord a filing date.
- 1.55-for entry of late priority papers.
- 1.60-to accord a filing date.
- 1.62-to accord a filing date.
- 1.103-to suspend action in application.

- 1.177-for divisional reissues to issue separately.
- 1.312-for amendment after payment of issue fee.
- 1.313-to withdraw an application from issue
- 1.314-to defer issuance of a patent.
- 1.334-for patent to issue to assignee, assignment recorded late.
- 1.666(b)-for access to interference settlement agreement.

3. Section 1.21 is amended by adding paragraph (n) to read as follows:

§1.21 Miscellaneous fees and charges.

(n) For handling an incomplete or improper application under 1.53(c), 1.60 or 1.62 \$20.00.

4. Section 1.53 is amended by revising paragraphs (b) and (c) to read as follows:

1.53 Serial number, filing date and completion of application.

(b) The filing date of an application for patent filed under this section is the date on which: (1) a specification containing a description pursuant to 1.71 and at least one claim pursuant to 1.75; and (2) any drawing required by 1.81(a), are filed in the Patent and Trademark Office in the name of the actual inventor or inventors as required by 1.41. No new matter may be introduced into an application after its filing date (1.118). If all the names of the actual inventor or inventors are not supplied when the specification and any required drawing are filed, the application will not be given a filing date earlier than the date upon which the names are supplied unless a petition with the fee set forth in 1.17(i)(1) is filed which sets forth the reasons the delay in supplying the names should be excused. A continuation or divisional application (filed under the conditions specified in 35 U.S.C. 120 or 121 and 1.78(a)) may be filed pursuant to this section, 1.60 or 1.62. A continuation-in-part application may be filed pursuant of this section or 1.62.

(c) If any application is filed without the specification, drawing or name, or names, of the actual inventor or inventors required by paragraph (b) of this section, applicant will be so notified and given a time period within which to submit the omitted specification, drawing, name, or names, of the actual inventor, or inventors, in order to obtain a filing date as of the date of filing of such submission. A copy of the "Notice of Incomplete Application" form notifying the applicant should accompany any response thereto submitted to the Office. If the omission is not corrected within the time period set, the application will be returned or otherwise disposed of; the fee, if submitted, will be refunded less the handling fee set forth in 1.21(n).

5. Section 1.55 is amended by revising paragraph (a) to read as follows:

§ 1.55 Claim for foreign priority.

(a) An applicant may claim the benefit of the filing date of a prior foreign application under the conditions specified in 35 U.S.C. 119 and 172. The claim to priority need be in no special form and may be made by the attorney or agent if the foreign application is referred to in the oath or declaration as required by 1.63. The claim for priority and the certified copy of the foreign application specified in the second paragraph of 35 U.S.C. 119 must be filed in the case of an interference (1.630); when necessary to overcome the date of a reference relied upon by the examiner; or when specifically required by the examiner; and in all other cases they must be filed not later than the date the issue fee is paid. If the papers filed are not in the English language, a translation need not be filed except in the three particular instances specified in the preceding sentence, in which event a sworn translation or a translation certified as accurate by a sworn or official translator

must be filed. If the priority papers are submitted after the date the issue fee is paid, they must be accompanied by a petition requesting their entry and the fee set forth in 1.17(i)(1).

6. Section 1.60 is amended by removing and reserving paragraph (a) and revising paragraph (b) and adding new paragraph (c) to read as follows:

§ 1.60 Continuation or divisional application for invention disclosed in a prior application.

(a) [RESERVED]

(b) An applicant may omit signing of the oath or declaration in a continuation or divisional application (filed under the conditions specified in 35 U.S.C. 120 or 121 and 1.78(a)) if (1) the prior application was a complete application as set forth in 1.51(a), (2)applicant indicates that the application is being filed pursuant to this section and files a true copy of the prior complete application as filed including the specification (including claims), drawings, oath or declaration showing the signature or an indication it was signed, and any amendments referred to in the oath or declaration filed to complete the prior application, (3) the inventors named in the continuation or divisional application are the same or less than all the inventors named in the prior application, and (4) the application is filed before the patenting or abandonment of or termination of proceedings on the prior application. The copy of the prior application must be accompanied by a statement that the application papers filed are a true copy of the prior application and that no amendments referred to in the oath or declaration filed to complete the prior application introduced new matter therein. Such statement must be by the applicant or applicant's attorney or agent and must be a verified statement if made by a person not registered to practice before the Patent and Trademark Office. Only amendments reducing the number of claims or adding a reference to the prior application (1.78(a)) will be entered before calculating the filing fee and granting the filing date. If the continuation or divisional application is filed by less than all the inventors named in the prior application, a statement must accompany the application when filed requesting deletion of the names of the person or persons who are not inventors of the invention being claimed in the continuation or divisional application. If a true copy of the prior application as filed is not filed with the application or if the statement that the application papers are a true copy is omitted, the application will not be given a filing date earlier than the date upon which the copy and statement are filed, unless a petition with the fee set forth in 1.17(i)(1) is filed which satisfactorily explains the delay in filing these items.

(c) If an application filed pursuant to paragraph (b) of this section is incomplete, applicant will be notified and given a time period within which to complete the application in order to obtain a filing date as of the date of filing the omitted item provided the omitted item is filed before the patenting or abandonment of or termination of proceedings on the prior application. If the omission is not corrected within the time period set, the application will be returned or otherwise disposed of; the fee, if submitted, will be refunded less the handling fee set forth in 1.21(n).

7. Section 1.62 is amended by revising paragraph (e) and by adding a new paragraph (j) to read as follows:

§1.62 File wrapper continuing procedure.

(e) An application filed under this section will utilize the file wrapper and contents of the prior application to constitute the new continuation, continuation-in-part, or divisional application but will be assigned a new application serial number. Changes to the prior application must be made in the form of an amendment to the prior application as it exists at the time of filing the application under this section. No copy of the prior application or new specification is required. The filing of such a copy or specification will be considered improper, and a filing date as of the date of deposit of the request for an application under this section will not be granted to the application unless a petition with the fee set forth in § 1.17(i)(1) is filed with instructions to cancel the copy or specification.

* * * * *

(j) If any application filed under this section is found to be improper, the applicant will be notified and given a time period within which to correct the filing error in order to obtain a filing date as of the date the filing error is corrected provided the correction is made before the payment of the issue fee, abandonment of, or termination of proceedings on the prior application. If the filing error is not corrected within the time period set, the application will be returned or otherwise disposed of; the fee, if submitted, will be refunded less the handling fee set forth in § 1.21(n).

8. Section 1.96 is amended by revising paragraph (b)(1) to read as follows:

§ 1.96 Submission of computer program listings.

* * * * *

(b) * * *

(1) *Availability of appendix.* Such computer program listings on microfiche will be available to the public for inspection, and microfiche copies thereof will be available for purchase with the file wrapper and contents, after a patent based on such application is granted or the application is otherwise made publicly available.

Patent and Trademark Office
37 CFR Part 1
[Docket No. 920666-2275]
RIN 0651-AA59

Changes in Practice Relating to Filing Patent Applications

Agency: Patent and Trademark Office, Commerce.

Action: Final Rule.

Summary: The Patent and Trademark Office (Office) is amending the rules of practice in patent cases to provide a uniform practice with respect to filing an oath or declaration and filing fees in continuing applications.

Effective Date: Jan. 4, 1993. These rules will be applicable to all papers and applications filed with the Office on or after the effective date.

For Further Information Contact: Jeffrey V. Nase by telephone at (703) 305-9282 or by mail marked to his attention and addressed to Office of the Assistant Commissioner for Patents, Box DAC, Washington, D.C. 20231.

Supplementary Information: In a Notice of Proposed Rulemaking published in the *Federal Register* (57 FR 31344) on July 15, 1992, and in the Patent and Trademark Office *Official Gazette* (1141 Off. Gaz. Pat. Office 9) on Aug. 4, 1992, the Office proposed to amend § 1.60. The due date for submitting written comments was extended to Sept. 10, 1992, in an Extension of Comment Period published in the *Federal Register* (57 FR 38640) on Aug. 26, 1992.

One comment was received. The comment favored adoption of the proposed rule changes.

A continuation or divisional application filed under § 1.60 did not receive a filing date until a complete copy of the prior application was filed, including a true copy of the oath or declaration. Since the Office is in possession of the oath or declaration of the prior application, § 1.60 is being modified to be consistent with §§ 1.53 and 1.62 by permitting filing of a true copy of the oath or declaration within a time specified in a notice of missing parts mailed by the Office.

The specific revisions are discussed below:

(1) Correction of inventorship (§ 1.48)

Section 1.48(a) is amended to replace the designation by letter of various requirements therein with numbered designations so as to avoid confusion when making reference to this section.

(2) Procedures for completing applications filed under § 1.60

Section 1.60 outlines one of the procedures that may be followed by applicants to file a continuation or divisional application. One of the requirements under this section is that applicants file a true copy of the complete parent application as filed, including the oath or declaration. Paragraph (c) of this section had specified that a filing date would not be granted if applicant failed to file a complete application under this section. When the missing item was filed, a filing date was granted as of the date of receipt of the missing item. Practice under § 1.60 is being modified to be similar to the procedures for filing continuing applications under § 1.53(d) and continuation-in-part applications under § 1.62. More specifically, a new paragraph (d) is added in § 1.60 to indicate that if an application filed pursuant to § 1.60(b) is otherwise complete, but does not include the appropriate filing fee or a true copy of the oath or declaration from the prior complete application, a filing date will be granted. The copy of the oath or declaration, as well as payment of the appropriate filing fee must be submitted within a time period specified in a notice of missing parts mailed by the Office. In a manner similar to the practice under §§ 1.53(d) and 1.62(d), the appropriate oath or declaration and/or filing fee as well as the surcharge set forth in § 1.16(e) must be filed within the time period specified in the notice of missing parts in order to avoid abandonment of the application. Paragraphs (b) and (c) of this section are amended to make reference to the exception specified in paragraph (d) discussed above.

OTHER CONSIDERATIONS

The rule change is in conformity with the requirements of the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*), Executive Orders 12291 and 12612 and the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 *et seq.*

The General Counsel of the Department of Commerce has certified to the Chief Counsel for Advocacy, Small Business Administration, that these rule changes will not have a significant economic impact on a substantial number of small entities (Regulatory Flexibility Act, 5 U.S.C. 605(b)). The principal impact of these changes is to accord a filing date to certain continuing applications which, through oversight, fail to include certain papers which can be submitted after the filing date.

The Office has determined that this rule change is not a major rule under Executive Order 12291. The annual effect on the economy will be less than \$100 million. There will be no major increase in costs or prices for consumers; individuals; industries; Federal, state or local government agencies; or geographic regions most of the changes reduce procedural burdens. There will be no significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of the United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

The Office has also determined that this notice has no Federalism implications affecting the relationship between the National Government and the States as outlined in Executive Order 12612.

The rule change will not impose a burden under the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 *et seq.*, since no record keeping or reporting requirements within the coverage of the Act are placed upon the public.

List of Subjects 37 CFR Part 1

Administrative practice and procedure, Freedom of information, Inventions and patents, Reporting and record keeping requirements.

For the reasons set out in the preamble, and pursuant to the authority contained in 35 U.S.C. 6, part 1 of title 37 of the Code of Federal Regulations is amended as set forth below.

PART 1 - RULES OF PRACTICE IN PATENT CASES

1. The authority citation for 37 CFR Part 1 would continue to read as follows:

Authority: 35 U.S.C. 6, unless otherwise noted.

2. Section 1.48, paragraph (a) is revised to read as follows:

§ 1.48 Correction of inventorship

(a) if the correct inventor or inventors are not named in an application for patent through error without any deceptive intention on the part of the actual inventor or inventors, the application may be amended to name only the actual inventor or inventors. Such amendment must be diligently made and must be accompanied by:

(1) a petition including a statement of facts verified by the original named inventor or inventors establishing when the error without deceptive intention was discovered and how it occurred;

(2) an oath or declaration by each actual inventor or inventors as required by § 1.63;

(3) the fee set forth in § 1.17(h); and

(4) the written consent of any assignee.

When the application is involved in an interference, the petition shall comply with the requirements of this section and shall be accompanied by a motion under § 1.634.

3. In Section 1.60, paragraphs (b) and (c) are revised and paragraph (d) is added to read as follows:

§ 1.60 Continuation or divisional application for invention disclosed in a prior application.

(b) An applicant may omit signing of the oath or declaration in a continuation or divisional application (filed under the conditions specified in 35 U.S.C. 120 and 121 and § 1.78(a)) if:

(1) the prior application was a complete application as set forth in § 1.51(a),

(2) applicant indicates that the application is being filed pursuant to this section and files a true copy of the prior complete application as filed including the specification (with claims), drawings, oath or declaration showing the signature or an indication it was signed, and any amendments referred to in the oath or declaration filed to complete the prior application,

(3) the inventors named in the continuation or divisional application are the same or less than all the inventors named in the prior application, and

(4) the application is filed before the patenting or abandonment of or termination of proceedings on the prior application. The copy of the prior application must be accompanied by a statement that the application papers filed are a true copy of the prior application and that no amendments referred to in the oath or declaration filed to complete the prior application introduced new matter therein. Such statement must be by the applicant or applicant's attorney or agent and must be a verified statement if made by a person not registered to practice before the Patent and Trademark Office. Only amendments reducing the number of claims or adding a reference to the prior application (2 1.78(a)) will be entered before calculating the filing fee and granted the filing date. If the continuation or divisional application is filed by less than all the inventors named in the prior application, a statement must accompany the application when filed requesting deletion of the names of the person or persons who are not inventors of the invention being claimed in the continuation or divisional application. Except as provided in paragraph (d) of this section, if a true copy of the prior application as filed is not filed with the application or if the statement that the application papers are a true copy is omitted, the application will not be given a filing date earlier than the date upon which the copy and statement are filed, unless a petition with the fee set forth in § 1.17(i)(1) is filed which satisfactorily explains the delay in filing these items.

(c) if an application filed pursuant to paragraph (b) of this section is incomplete for reasons other than those specified in paragraph (d) of this section, applicant will be notified and given a time period within which to complete the application in order to obtain a filing date as of the date of filing the omitted item

provided the omitted item is filed before the patenting or abandonment of or termination or proceedings on the prior application. If the omission is not corrected within the time period set, the application will be returned or otherwise disposed of; the fee, if submitted, will be refunded less the handling fee set forth in § 1.21(n)

(d) If an application filed pursuant to paragraph (b) of this section is otherwise complete, but does not include the appropriate filing fee or a true copy of the oath or declaration from the prior complete application, showing the signature or an indication it was signed, a filing date will be granted and applicant will be so notified and given a period of time within which to file the fee, or the true copy of the oath or declaration and to pay the surcharge as set forth in § 1.16(e) in order to prevent abandonment of the application. The notification pursuant to this paragraph may be made simultaneously with any notification pursuant to paragraph (c) of this section.

Dec. 2, 1992

DOUGLAS B. COMER

*Acting Assistant Secretary and Acting
Commissioner of Patents and Trademarks*

[1145 OG 377]

(77) Use of Color Drawings in Utility Patents

This notice supersedes the *Official Gazette* notice, dated Aug. 6, 1986, published at 1070 O.G. 10 on Sept. 9, 1986.

Under 37 CFR 1.84, the drawings of a utility patent application must be in black and white. However, on occasion, color drawings may be appropriate. In this circumstance, the Patent and Trademark Office will entertain a petition under 37 CFR 1.183 to waive the requirements of § 1.84 to the extent that color drawings on DIN size A4 sheets (21.0 by 29.7 cm.) will be accepted for the purposes and under the conditions set forth below.

The petition must be accompanied by five (5) sets of color drawings on DIN size A4 sheets (21.0 by 29.7 cm.) for examination, copying and archival purposes.

In light of the substantial administrative and economic burden associated with printing a utility patent with color drawings, the patent copies which are printed at issuance of the application will depict the drawings in black and white only. However, a set of color drawings will be attached to the Letters Patent. Moreover, copies of the patent with color drawings attached thereto will be provided by the Patent and Trademark Office upon special request and payment of the fee necessary to recover the actual costs associated therewith.

Accordingly, the petition must also be accompanied by a proposed amendment to insert the following language as the first paragraph in the portion of the specification containing a brief description of the drawings:

The file of this patent contains at least one drawing executed in color. Copies of this patent with color drawing(s) will be provided by the Patent and Trademark Office upon request and payment of the necessary fee.

It is anticipated that such a petition will be granted only when the Patent and Trademark Office has determined that a color drawing is the only practical medium by which to disclose in a printed utility patent the subject matter sought to be patented.

It is emphasized that a decision to grant the petition should not be regarded as an indication that color drawings are necessary to comply with a statutory requirement. In this latter respect, clearly it is desirable to file any desired color drawings as part of the original application papers in order to avoid issues concerning statutory defects (e.g., lack of enablement under 35 USC 112 or new matter under 35 USC 132). The filing of the petition, however, may be deferred until acceptable drawings are required by the examiner.

The petition should be directed to the attention of the Office of the Deputy Assistant Commissioner for Patents.

RENE D. TEGTMEYER,

July 24, 1987.

Assistant Commissioner for Patents

[1082 OG 25]

(78)

Notice

Drawings. Rule 37 CFR 1.84(j), Arrangement of views, is being strictly enforced. The rule states:

“(j) **Arrangement of views.** All views on the same sheet should stand in the same direction and, if possible, stand so that they can be read with the sheet held in an upright position. If views longer than the width of the sheet are necessary for the clearest illustration of the invention, the sheet may be turned on its side so that the top of the sheet with the appropriate top margin to be used as the heading space is on the right-hand side. One figure must not be placed upon another or within the outline of another.”

Words must appear in a horizontal, left-to-right fashion when the page is either upright or turned clockwise 90° with the top on the right side. Example A below is improper because the words “Y-AXIS” do not meet the rule’s requirement. Example B below demonstrates the proper procedure. The words “heading space” are included for demonstration purposes.

Example A. Improper

Example B. Proper

Nov. 29, 1990

THERESA A. BRESFORD
Assistant Commissioner
for Administration

[1121 OG 54]

(79)

Drawings

The following supplements the notice published at 1121 *Official Gazette* 54 (Dec. 25, 1990) concerning drawings.

37 CFR 1.84(j), states:

“(j) **Arrangement of views.** All views on the same sheet should stand in the same direction and, if possible, stand so that they can be read with the sheet held in an upright position. If views longer than the width of the sheet are necessary for the clearest illustration of the invention, the sheet may be turned on its side so that the top of the sheet with the appropriate top margin to be used as the heading space is on the right-hand side. One figure must not be placed upon another or within the outline of another.”

Words must appear in a horizontal, left-to-right fashion when the page is either upright or turned so that the top becomes the right side. This will allow for drawings to be viewed on a monitor in an automated search system so that words/numbers appear in either an upright position or when rotated 90° to the right.

The previous notice stated that Example A was improper because the words “Y-AXIS” do not meet the rule’s requirement. Example B was used to demonstrate one way to meet the rule’s requirement. Examples A and B are reprinted below for your convenience.

Example A-Improper
(Proper under Scientific Convention)
TOP

Example B-Proper
TOP

New examples that meet the rule's requirement are provided in Examples C, D, and E, below. The words "heading space" are included for orientation purposes.

Example C-Proper
TOP

Example D-Proper
TOP

Example E-Proper
TOP

It has been brought to the Office's attention that Example B does not conform to scientific convention, but Example A does conform to scientific convention.

The Office has reconsidered its interpretation of that rule as it applies to graphs. Accordingly, the Office will waive the requirements of 37 CFR 1.84(j) and accept graphs conforming to scientific convention (e.g., Example A).

The Office will continue to object to all other types of drawings that do not meet the requirements of the rule (e.g., flow charts, etc. See Example F, which is objectionable). Example G depicts the proper orientation of an acceptable flow chart.

Example F. Improper**Example G. Proper**

HARRY F. MANBECK, Jr.
Assistant Secretary and Commissioner
of Patents and Trademarks

[1129 OG 22]

(80) **DEPARTMENT OF COMMERCE**
Patent and Trademark Office
37 CFR part 1
[Docket No. 920775 - 2175]
RIN 0651-AA44
Changes in Patent Drawing Standards

Agency: Patent and Trademark Office, Commerce

Action: Notice of Proposed Rulemaking

Summary: The Patent and Trademark Office (Office) is proposing to amend the rules of practice regarding patent drawings to adopt international standards and to eliminate unnecessary requirements.

The Office proposes to amend the rules to: (1) revise § 1.84 to provide clarification and adopt international standards; (2) delete § 1.88; (3) delete in § 1.123 the reference to changes by bonded draftsmen since the Office will no longer release drawings from patent applications; (4) revise § 1.152 for design drawings to include the option of submitting black and white photographs in lieu of black ink drawings; and (5) revise § 1.165 for plant patent drawings to eliminate the acceptability of mounted photographs.

Dates: Written comments must be received on or before Oct. 16, 1992 to ensure consideration. An oral hearing will not be conducted.

Address: Address written comments to Office of the Assistant Commissioner for Public Services and Administration, Commissioner of Patents and Trademarks, Washington, D.C. 20231, marked to the attention of Richard A. Bawcombe. Comments may also be sent by facsimile transmission to the attention of Richard A. Bawcombe at (703) 305-8294.

For Further Information Contact: Richard A. Bawcombe by telephone at (703) 305-8594 or by mail marked to his attention and addressed to Commissioner of Patents and Trademarks, Washington, D.C. 20231.

Supplementary Information: Drawings acceptable for patent applications filed outside of the United States are not always

acceptable when filed in a patent application filed in the United States. Therefore, the rules relating to drawing requirements are proposed to be amended to enable the Office, when appropriate, to accept drawings that are capable of clear reproduction for the printing of any resulting patent. Drawings in compliance with the present § 1.84 will be in compliance with proposed § 1.84.

Discussion of Specific Sections to be Changed or Added:

Section 1.17(h) is proposed to be amended to include the appropriate processing fee for accepting color drawings or photographs in utility patent applications as set forth in § 1.84.

Section 1.19(a)(3) is proposed to be amended to change the citation of § 1.84(p) to § 1.84(a)(2) so that § 1.19(a)(4), which sets the fee for colored drawings refers to the proper paragraph of § 1.84 that discusses color drawings.

Section 1.71(d) is proposed to be amended to change the citation of § 1.84(o) to § 1.84(s) because § 1.84(s) specifies how mask work notices should be placed on the drawings.

Section 1.84 is proposed to be revised as follows:

(a) Drawings. This paragraph is proposed to classify drawings into two categories, i.e., black ink and color and delete the limitation that the use of white pigment to cover lines is not normally acceptable. The black ink drawing requirements are proposed to be amended to allow computer-generated drawings to be accepted subject to the same standards applied to pen and ink drawings. Color drawing requirements would be moved from § 1.84(p) to proposed § 1.84(a). Color drawings may be acceptable upon the granting of a petition filed under this paragraph explaining why the color drawings are necessary. A petition is required because the special handling necessary for color drawings is time consuming and the Office cannot permit such a special procedure except in exceptional circumstances.

Since utility patents are not printed in color, 5 sets of color drawings are necessary for proper distribution within the Office. One set will be attached to the Letters Patent for routing to the applicant. The remaining four sets will be attached to patent copies for routing to (1) the patent file, (2) the Office of Administrative Services for archival storage at Boyers, Pennsylvania, (3) the plant patent search room for archival storage at the Office, and (4) the Office of Patent and Trademark Information Services for copying purposes.

(b) Photographs. This paragraph is proposed to permit the acceptance of photographs (limited to a single photograph per sheet), upon granting of an applicant's petition. The Office proposes to accept black and white and color photographs or photomicrographs (not photolithographs or other reproductions of photographs made by using screens) developed on double weight photographic paper in lieu of ink drawings. Mounted photographs would not be acceptable. The photographs must be of sufficient quality so that all details in the drawing are reproducible in the printed patent.

(c) Identification of drawings. This paragraph is proposed to be changed and broadened to permit an applicant to provide proper identification information on the reverse side of each sheet of drawings. The identification information allows the Office to match drawing sheets with the proper application. The identification information should include the application number, if known, or the title of the invention, inventor's name, docket number (if any), and name and telephone number of the person to call if the drawings cannot be matched to the proper patent application. The Office will not object if identifying information is not present; however, if the drawings become separated, the Office will not be able to match those drawings to the application. This paragraph is restructured from current § 1.84(1) and revised to state that the preferred placement of the information is on the back side of the drawing sheets.

(d) Graphic forms and drawings. This paragraph is proposed to set standards for chemical and mathematical formulae to align Office standards for formulae, tables, and waveforms with international standards.

(e) Type of paper. This paragraph is proposed as a revision of current § 1.84(a) to set forth the requirement for the type of paper to be used for drawings, including the type of paper for photographs.

(f) Size of paper. This paragraph is proposed to clarify Office requirements set forth in current § 1.84(b) and to provide that color drawings and photographs must be 21.0 cm. by 29.7 cm. (DIN size A4). Other drawings may be any of 3 sizes: 21.0 cm. by 29.7 cm. (DIN size A4), 21.6 cm. by 33.1 cm. (8 1/2 by 13 inches), or 21.6 cm. by 35.6 cm. (8 1/2 by 14 inches).

(g) Margins. This paragraph is restructured from current § 1.84(b) to indicate how the size of the paper changes the margin requirements. The Office will accept 3 sizes of paper, however, the sight (i.e. the usable surface) is the same for 2 of the paper sizes, i.e., 21.6 cm. by 33.1 cm. (8 1/2 by 13 inches), or 21.6 cm. by 35.6 cm. (8 1/2 by 14 inches).

(h) Views. This paragraph is proposed to reformat current § 1.84(i) to provide a logical arrangement of the different views provided in the rules, to revise the standards for purposes of clarification, to include the standard for waveforms to show the relative timing, to provide clearer language relative to hatching shown on drawings, to set forth the standard for depicting hatching in sectional views as one view for the purpose of achieving the necessary clarity as subliminary views maybe added giving a larger-scale of cross-hatching strokes, and to include requirements pertaining to alternate positions. In addition, both Roman and Arabic numerals would be acceptable to designate the section being illustrated.

(i) Arrangement of views. This paragraph is proposed to be relocated from current § 1.84(j) and to be revised to incorporate international standards. In addition, this paragraph is proposed to be changed and broadened to provide placement of words on drawings, as set forth in proposed § 1.84(i). One view is not to be superimposed within the outline of another. The changes expand the possibilities for presenting graphs to conform to standard scientific conventions, while using a format which is compatible with automated patent searching displays. See 1121 Off. Gaz. Pat. Office 54 (Dec. 25, 1990) and 1129 Off. Gaz. Pat. Office 22 (Aug. 13, 1991).

(j) View for Official Gazette. This paragraph is proposed to be relocated from current § 1.84(k).

(k) Scale. This paragraph is proposed to be relocated from current § 1.84(e) and § 1.84(i) and to be revised to indicate that the words "actual size" or "scale 1/2" on the drawings are not permitted since the meaning is lost in reduction/enlargement; and to provide that elements of the same view must be in proportion to each other, unless a difference in proportion is indispensable for the clarity of the view. As a preferred alternative to a difference in proportion within regularly parallel oblique strokes which precludes use illustration of an element from the initial view. When a supplementary view is included, it is recommended that the enlarged element shown in the second view be surrounded by a finely drawn or "dot-dash" circle in the first view pinpointing its location, without obscuring the view.

(l) Character of lines, numbers, and letters. This paragraph is proposed to be relocated from current § 1.84(c) and to be revised to show that lines and strokes of different thicknesses may be used in the same drawing where different thicknesses have different meanings. In addition, this paragraph is proposed to be changed and broadened to indicate that all drawings must be made by a process which will give them satisfactory reproduction characteristics.

(m) Shading. This paragraph is proposed to be changed and broadened to expand definitions for shading and to delete the limitation that drawings transmitted to the Office should be sent flat, protected by a sheet of heavy binder's board, or may be rolled for transmission in a suitable mailing tube. This proposed change would provide the individual practitioner with greater discretion on how to send drawings. In addition, this paragraph is proposed to be relocated from current § 1.84(d) to separate shading requirements from hatching requirements by stating that shading may be used to indicate the surface or shape of spherical, cylindrical, and conical elements of an object, and that spaced lines are preferred for shading purposes. Solid black areas are not permitted, except when used to represent bar graphs or color.

(n) Symbols. This paragraph is proposed to be relocated from current § 1.84(g) to separate symbols requirements from legends requirements and to enlarge the number of acceptable symbols. Known devices should be illustrated by symbols which have a universally-recognized meaning, and which are generally accepted in the art, provided no further detail is essential for understanding the subject matter of the claimed invention. All symbols must be approved by the examiner. Other symbols may be used if they are not likely to be confused with existing conventional symbols and if they are readily identifiable.

(o) Legends. This paragraph is proposed to be relocated from current § 1.84(g) to separate legends requirements from symbols requirements and to be revised to integrate international standards. Where text matter is deemed indispensable for understanding the drawing, a minimum of words should be used. Words should not be used to describe the figure itself, such as "this is a bar graph." All text legends must be approved by the examiner.

(p) Numbers, letters, and reference characters. This paragraph is proposed to be relocated from current § 1.84(f) and to be revised to include numbers and letters in the heading formerly designated "reference characters." This section has been reformatted into five subsections and revised to integrate international standards, where possible. Although the Latin alphabet is used in the international standard, the Office takes the view that the English alphabet is more universally acceptable for letters, except where another alphabet is customarily used, such as the Greek alphabet to indicate angles, wavelengths, and mathematical formulas. In addition, the characters used must be oriented in the same direction as the view so as to avoid having to rotate the sheet. Reference characters should be so arranged to follow the profile of the object depicted.

(q) Lead lines. This paragraph is proposed to integrate international standards, to incorporate brief language which appears in current § 1.84(f), and to change and expand the definition for lead lines. Lead lines are those lines between the reference characters and the details referred to, and they must be executed in the same way as other lines in the drawing.

(r) Arrows. This paragraph is proposed to be relocated from current § 1.84(g) and to be revised to indicate the meaning of the use of arrows, and to show that they may be used at the end of lead lines only if their meaning is clear.

(s) Copyright or mask work notice. This paragraph is proposed to be relocated from current § 1.84(o).

(t) Numbering of sheets of drawings. This paragraph is proposed to be relocated from current § 1.84(n) and to be changed and broadened to allow for the placement of sheet numbers within the sight of the drawing. It is preferable that the sheets be numbered with two Arabic numerals placed on either side of an oblique line, with the first number being the sheet number and the second the total number of sheets of drawings.

(u) Numbering of views. This paragraph is proposed to be relocated from current § 1.84(i) and, for clarity, to be separately identified in this new section. Use of the abbreviation "FIG." must precede all view numbers.

(v) Security markings. This paragraph is proposed to be relocated from current § 1.84(1) to provide that security markings may be placed on the drawings if they are outside the sight and preferably centered in the top margin.

(w) Corrections. This paragraph is proposed to provide that any corrections made on drawings submitted to the Office must be durable and permanent. The language is revised from current § 1.84(a) which prohibits the use of white pigment to cover lines.

(x) Holes. This paragraph is proposed to be relocated from current § 1.84(b) to permit two holes to be punched in the top margin of the drawings with their centerlines spaced 7.0 cm. (2 3/4 inches) apart.

Section 1.88 is proposed to be removed and reserved since the changes effective January 1, 1991, in § 1.85(b) make the regulation regarding the transfer of drawings unnecessary. Since the Office no longer releases drawings from patent applications, generally applicants are retaining the master copy of the drawings. Accordingly, applicants can easily file a copy of drawings in an application and therefore eliminate the need for the office to transfer drawings. Any situations which prevent a hardship to applicants may be accommodated by the filing of a petition under § 1.182 requesting the transfer of the drawings.

Section 1.123 prescribes procedures for amending drawings. With the adoption of new rules for amending drawings effective January 1, 1989, the Office no longer requires the submission of formal drawings upon filing a patent application. See 1097 *Off. Gaz. Pat. Office* 36 (Dec. 13, 1988). Since corrections are the responsibility of the applicant, the original drawing(s) should be retained by the applicant for future correction, if necessary.

As a result of adoption of the new rules in 1989 relating to drawings, the Office will no longer release to applicants, bonded drafting companies or others, drawings from patent applications. Effective January 1, 1991, § 1.85(b) prohibits release of drawings from all patent applications. Accordingly, it is proposed that the reference to changes by bonded draftsmen be deleted from § 1.123.

Section 1.152 is proposed to be revised to provide that photographs and ink drawings must not be combined in one design application. The reason for this requirement is to avoid inconsistencies between the photograph and the drawing, and further eliminate views that may distort the proportionate relationship between the corresponding elements on the drawing and the photograph. It is also proposed that all design photographs be limited to the design claimed and not include environmental structure. It is proposed that color drawings and color photographs not be permissible in design patent applications. Solid black surface shading is inappropriate on a design drawing, but is acceptable when used to represent color contrast.

Section 1.165 is proposed to be revised to provide that plant patent drawings must comply with the requirements of § 1.84. It is proposed that the current exception that plant patent drawings do not automatically require view numbers and reference characters be maintained. It is also proposed that mounted color photographs would not be acceptable in plant patent applications.

Other Considerations:

The proposed rule change is in conformity with the requirements of the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*), Executive Orders 12291 and 12612, and the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 *et seq.*

The General Counsel of the Department of Commerce has certified to the Chief Counsel for Advocacy, Small Business Administration, that these proposed rule changes will not have a significant adverse economic impact on a substantial number of small entities (Regulatory Flexibility Act, 5 U.S.C. 605(b)). The

principal impact of these proposed changes is to revise and reformat the drawing standards to adopt international standards, to the extent possible, and to facilitate access to sections through inclusion of pertinent subsection headings, which should be helpful to small entities.

The Office has determined that this proposed rule change is not a major rule under Executive Order 12291. The annual effect on the economy will be less than \$100 million. There will be no major increase in costs or prices for consumers, individuals, industries, Federal, state or local government agencies, or geographic regions because most of the proposed changes reduce procedural burdens. There will be no adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

The Office has also determined that this notice has no Federalism implications affecting the relationship between the National Government and the States as outlined in Executive Order 12612.

These proposed rule changes contain a collection of information requirements subject to the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 *et seq.*, which has previously been approved by the Office of Management and Budget under Control No. 0651-0011.

List of Subjects. 37 CFR Part 1

Administrative practice and procedure, Authority delegation (Government agencies), Courts, Freedom of Information, Inventions and patents, Lawyers, Small businesses.

For the reasons set out in the preamble, and pursuant to the authority contained in 35 U.S.C. § 6, the Office proposes to amend 37 CFR Part 1 as follows, wherein deletions are indicated by brackets ([]), and additions are indicated by arrows (► ◄), except for § 1.84 where the entire section has been revised:

Part 1 - Rules of Practice in Patent Cases

1. The authority citation for 37 CFR Part 1 would continue to read as follows:

Authority: 35 U.S.C. 6, unless otherwise noted.

2. Section 1.17(h) is proposed to be revised to read as follows:

§ 1.17 Patent application processing fees.

(h) For filing a petition to the Commissioner under a section of this part listed below which refers to this paragraph\$130.00

§ 1.47—for filing by other than all the inventors or a person not the inventor.

§ 1.48—for correction of inventorship. ► § 1.84—for accepting color drawings or photographs. ◄

§ 1.182—for decision on questions not specifically provided for.

§ 1.183—to suspend the rules.

§ 1.295—for review of refusal to publish a statutory invention registration.

§ 1.377—for review of decision refusing to accept and record payment of a maintenance fee filed prior to expiration of patent.

§ 1.378(e)—for reconsideration of decision on petition refusing to accept delayed payment of maintenance fee in expired patent.

§ 1.644(e)—for petition in an interference.

§ 1.644(f)—for request for reconsideration of a decision on petition in an interference.

§ 1.666(c)—for late filing of interference settlement agreement.

§§ 5.12, 5.13, & 5.14—for expedited handling of a foreign filing license.

§ 5.15—for changing the scope of a license.

§ 5.25—for retroactive license.

3. Section 1.19(a)(3) is proposed to be revised to read as follows:

§ 1.19 Document supply fees.

(a) Uncertified copies of patents:

(3) Copy of a utility patent or statutory invention registration containing color drawing (see § 1.84(p)►a)(2)◄)
\$24.00

4. Section 1.71(d) is proposed to be revised to read as follows:

§ 1.71 Detailed description and specification of the invention.

(d) A copyright or mask work notice may be placed in a design or utility patent application adjacent to copyright and mask work material contained therein. The notice may appear at any appropriate portion of the patent application disclosure. For notices in drawings, see § 1.84([o]►s◄). The content of the notice must be limited to only those elements ►provided for◄ [required] by law. For example, "©1983 John Doe" (17 U.S.C. 401) and "©M* John Doe" (17 U.S.C. 909) would be properly limited and, under current statutes, legally sufficient notices of copyright and mask work, respectively. Inclusion of a copyright or mask work notice will be permitted only if the authorization language set forth in paragraph (e) of this section is included at the beginning (preferably as the first paragraph) of the specification.

5. Section 1.84 is proposed to be revised to read as follows:

§ 1.84. Standards for drawings.

►(a) *Drawings.* There are two acceptable categories for presenting drawings in utility patent applications:

(1) *Black ink.* Black and white drawings are normally required. India ink, or its equivalent in quality, must be used for drawings to secure black solid lines.

(2) *Color.* On rare occasions, color drawings may be necessary as the only practical medium by which to disclose the subject matter sought to be patented in utility patent applications or to be the subject matter of a Statutory Invention Registration (SIR). The Patent and Trademark Office will accept color drawings in utility patent applications and SIR's only after granting a petition filed under this paragraph explaining why the color drawings are necessary. Any such petition must include the following:

(i) The appropriate fee set forth in § 1.17(h);

(ii) Five (5) sets of color drawings on 21.0 by 29.7 cm. (DIN size A4) sheets; and

(iii) If the specification does not address color drawings, the following language is to be inserted as the first paragraph in that portion of the specification relating to the brief description of the drawing:

The file of this patent contains at least one drawing executed in color. Copies of this patent with color drawing(s) will be provided by the Patent and Trademark Office upon request and payment of the necessary fee.

If the above language is not in the specification, a proposed amendment to insert the language must accompany the petition.

(b) *Photographs.*

(1) *Black and white.* Photographs are not ordinarily permitted in utility and design patent applications. However, the Office

will accept photographs in utility and design patent applications only after granting a petition, filed under this paragraph which requests that photographs be accepted. Any such petition must include the following:

(i) The appropriate fee set forth in § 1.17(h); and

(ii) Five (5) sets of photographs on 21.0 by 29.7 cm. (DIN size A4) sheets. Photographs must be developed on double weight photographic paper. Mounted photographs are not acceptable. No more than one photograph per sheet will be permitted. The photographs must be of sufficient quality so that all details in the drawing are reproducible in the printed patent.

(2) *Color.* Color photographs will be accepted in utility patent applications if the conditions for accepting color drawings have been satisfied. See paragraph (a)(2) of this section.

(c) *Identification of drawings.* Identifying indicia, if provided, should include the application number or the title of the invention, inventor's name, docket number (if any), and the name and telephone number of a person to call. This information should be placed on the back of each sheet of drawings a minimum distance of 1.5 cm. (5/8 inch) down from the top of the page.

(d) *Graphic forms in drawings.* Chemical or mathematical formulae, tables, and waveforms may be submitted as drawings, and are subject to the same requirements as drawings. Each chemical or mathematical formula must be labeled as a separate figure, using brackets when necessary, to show that information is properly integrated. Each group of waveforms must be presented as a single figure, using a common vertical axis with time extending along the horizontal axis. Each individual waveform discussed in the specification must be identified with a separate letter designation adjacent to the vertical axis.

(e) *Type of paper.* Drawings submitted to the Office must be made upon paper which is flexible, strong, white, smooth, non-shiny, and durable. All sheets must be free from cracks, creases, and folds. Only one side of the sheet shall be used for the drawing. Each sheet must be reasonably free from erasures and must be free from alterations, overwritings, and interlineations. Photographs must be on double weight photographic paper. See paragraph (b) of this section for other requirements for photographs.

(f) *Size of paper.* All drawing sheets in an application must be the same size, except that color drawings or photographs which are required to be DIN size A4 may differ in size from the other sheets. One of the shorter sides of the sheet is regarded as its top. The size of the sheets on which drawings are made must be:

(1) 21.6 cm. by 35.6 cm. (8 1/2 by 14 inches),

(2) 21.6 cm. by 33.1 cm. (8 1/2 by 13 inches), or

(3) 21.0 cm. by 29.7 cm. (DIN size A4).

(g) *Margins.* The sheets must not contain frames around the sight, i.e., the usable surface.

(1) On 21.6 cm. by 35.6 cm. (8 1/2 by 14 inch) drawing sheets, each sheet must include a top margin of 5.1 cm. (2 inches), and bottom and side margins of 6.4 mm. (1/4 inch) from the edges, thereby leaving a sight precisely 20.3 cm. by 29.8 cm. (8 by 11 3/4 inches).

(2) On 21.6 cm. by 33.1 cm. (8 1/2 by 13 inch) drawing sheets, each sheet must include a top margin of 2.5 cm. (1 inch) and bottom and side margins of 6.4 mm. (1/4 inch) from the edges, thereby leaving a sight precisely 20.3 cm. by 29.8 cm. (8 by 11 3/4 inches).

(3) On 21.0 cm. by 29.7 cm. (DIN size A4) drawing sheets, each sheet must include a top margin of at least 2.5 cm., a left side margin of 2.5 cm., a right side margin of 1.5 cm., and a bottom margin of 1.0 cm., thereby leaving a sight precisely 17.0 cm. by 26.2 cm.

(h) *Views.* The drawing must contain as many views as necessary to show the invention. The views may be plan, elevation, section, or perspective views; and detail views of portions of elements, on a larger scale, if necessary, may also be used. All views of the drawing must be grouped together and arranged on the sheet(s) without wasting space, preferably in an upright position, clearly separated from one another, and must not be included in the sheets containing the specifications, claims, or abstract. Views must not be connected by projection lines and must not contain center lines. Waveforms of electrical signals may be connected by dashed lines to show the relative timing of the waveforms.

(1) *Exploded views.* Exploded views, with the separated parts of the same view embraced by a bracket, to show the relationship or order of assembly of various parts are permissible. When an exploded view is shown in a figure which is on the same sheet as another figure, the exploded view should be placed in brackets.

(2) *Partial views.* When necessary, a view of a large machine or device in its entirety may be broken into partial views on a single sheet, or extended over several sheets if there is no loss in facility of understanding the view. Partial views drawn on separate sheets must always be capable of being linked edge to edge so that no partial view contains parts of another partial view. A smaller scale view should be included showing the whole formed by the partial views and indicating the positions of the parts shown. When a portion of a view is enlarged for magnification purposes, the view and the enlarged view must each be labeled as separate views.

(i) Where views on two or more sheets form in effect a single complete view, the views on the several sheets must be so arranged that the complete figure can be assembled without concealing any part of any of the views appearing on the various sheets.

(ii) A very long view may be divided into several parts placed one above the other on a single sheet. However, the relationship between the different parts must be clear and unambiguous.

(3) *Sectional views.* The plane upon which a sectional view is taken should be indicated on the view from which the section is cut by a broken line, the ends of which should be designated by Arabic or Roman numerals corresponding to the view number of the sectional view, and have arrows applied to indicate the direction of sight. Hatching must be used to indicate section portions of an object, and must be made by regularly spaced oblique parallel lines spaced sufficiently apart to enable the lines to be distinguished without difficulty. Hatching should not impede the clear reading of the reference characters and lead lines. If it is not possible to place reference characters outside the hatched area, the hatching may be broken off wherever reference characters are inserted. Hatching must be at a substantial angle to the surrounding axes or principal lines, preferably 45°. A cross-section must be set out and drawn to show all of the materials as they are shown in the view from which the cross-section was taken. The parts in cross-section must show proper material(s) by hatching with regularly spaced parallel oblique strokes, the space between strokes being chosen on the basis of the total area to be hatched. The various parts of a cross-section of the same item should be hatched in the same manner and should accurately and graphically indicate the nature of the material(s) that is illustrated in cross section. The hatching of juxtaposed different elements must be angled in a different way. In the case of large areas, hatching may be confined to an edging drawn around the inside of the outline of the area to be hatched. Different types of hatching should have different conventional meanings as regards the nature of a material seen in cross-section.

(4) *Alternate position.* A moved position may be shown by a broken line superimposed upon a suitable view if this can be done without crowding; otherwise, a separate view must be used for this purpose.

(5) *Modified forms.* Modified forms of construction must be shown in separate views.

(i) *Arrangement of views.* One view must not be placed upon another or within the outline of another. All views on the same sheet should stand in the same direction and, if possible, stand so that they can be read with the sheet held in an upright position. If views longer than the width of the sheet are necessary for the clearest illustration of the invention, the sheet may be turned on its side so that the top of the sheet, with the appropriate top margin to be used as the heading space, is on the right-hand side. Words must appear in a horizontal, left-to-right fashion when the page is either upright or turned so that the top becomes the right side, except for graphs utilizing standard scientific convention to denote the axis of abscissas (of X) and the axis of ordinates (of Y).

(j) *View for Official Gazette.* One of the views should be suitable for publication in the *Official Gazette* as the illustration of the invention.

(k) *Scale.*

(l) The scale to which a drawing is made must be large enough to show the mechanism without crowding when the

drawing is reduced in size to two-thirds in reproduction. Views of portions of the mechanism on a larger scale should be used when necessary to show details clearly. Two or more sheets may be used if one does not give sufficient room. The number of sheets should be kept to a minimum.

(2) When approved by the examiner, the scale of the drawing may be graphically represented. Indications such as "actual size" or "scale 1/2" on the drawings, are not permitted, since these lose their meaning with reproduction in a different format.

(3) Elements of the same view must be in proportion to each other, unless a difference in proportion is indispensable for the clarity of the view. Instead of showing elements in different proportion, a supplementary view may be added giving a larger-scale illustration of the element of the initial view. It is recommended that the enlarged element shown in the second view be surrounded by a finely drawn or "dot-dash" circle in the first view pinpointing its location without obscuring the view.

(l) *Character of lines, numbers, and letters.* All drawings must be made by a process which will give them satisfactory reproduction characteristics. Every line, number, and letter must be durable, clean, sharp, black (except for color drawings), sufficiently dense and dark, and uniformly thick and well-defined. The weight of all lines and letters must be heavy enough to permit adequate reproduction. This direction applies to all lines however fine, to shading, and to lines representing cut surfaces in sectional views. Lines and strokes of different thicknesses may be used in the same drawing where different thicknesses have a different meaning.

(m) *Shading.* The use of shading in views is encouraged if it aids in understanding the invention and if it does not reduce legibility. Shading is used to indicate the surface or shape of spherical, cylindrical, and conical elements of an object. Flat parts may also be lightly shaded. Such shading is preferred in the case of parts shown in perspective, but not for cross-sections. Spaced lines for shading are preferred. These lines must be thin, as few in number as practicable, and they must contrast with the rest of the drawings. As a substitute for shading, heavy lines on the shade side of objects can be used except where they superimpose on each other or obscure reference characters. Light should come from the upper left corner at an angle of 45°. Surface delineations should preferably be shown by proper shading. Solid black shading areas are not permitted, except when used to represent bar graphs or color.

(n) *Symbols.* Graphical drawing symbols may be used for conventional elements when appropriate, subject to approval by the Office. The elements for which such symbols and labeled representations are used must be adequately identified in the specification. Known devices should be illustrated by symbols which have a universally-recognized conventional meaning and are generally accepted in the art provided no further detail is essential for understanding the subject matter of the claimed invention. Other symbols may be used if they are not likely to be confused with existing conventional symbols, and if they are readily identifiable.

(o) *Legends.* Suitable descriptive legends may be used, subject to approval by the Office. They should contain as few words as possible.

(p) *Numbers, letters, and reference characters.*

(1) Reference characters (numerals are preferred), sheet numbers, and view numbers must be plain and legible, and must not be used in association with brackets, inverted commas, or enclosed within outlines, e.g., encircled. They must be oriented in the same direction as the view so as to avoid having to rotate the sheet. Reference characters should be arranged to follow the profile of the object depicted.

(2) The English alphabet must be used for letters, except where another alphabet is customarily used, such as the Greek alphabet to indicate angles, wavelengths, and mathematical formulas.

(3) Numbers, letters, and reference characters must measure at least 3.2 mm. (1/8 inch) in height. They should not be placed in the drawing so as to interfere with its comprehension. Therefore, they should not cross or mingle with the lines. They should not be placed upon hatched or shaded surfaces. When necessary, a blank space may be left in the hatching or shading where the character occurs so that it appears perfectly distinct.

(4) The same part of an invention appearing in more than one view of the drawing must always be designated by the same reference character, and the same reference character must never be used to designate different parts.

(5) Reference characters not mentioned in the description shall not appear in the drawings. Reference characters mentioned in the description must appear in the drawings.

(q) *Lead lines.* Lead lines are those lines between the reference characters and the details referred to. Such lines may be straight or curved and should be as short as possible. They must originate in the immediate proximity of the reference character and extend to the feature indicated. Lead lines must not cross each other. Lead lines are required for each reference character except for those which indicate the surface or cross-section on which they are placed. Such a reference character must be underlined to make it clear that a lead line has not been left out by mistake. Lead lines must be executed in the same way as lines in the drawing.

(r) *Arrows.* Arrows may be used at the ends of lines, provided that their meaning is clear, as follows:

(1) On a lead line, a freestanding arrow to indicate the entire section towards which it points;

(2) On a lead line, an arrow touching a line to indicate the surface shown by the line looking along the direction of the arrow; or

(3) To show the direction of movement.

(s) *Copyright or Mask Work Notice.* A copyright or mask work notice may appear in the drawing, but must be placed within the sight of the drawing immediately below the figure representing the copyright or mask work material and be limited to letters having a print size of 3.2 mm. to 6.4 mm. (1/8 to 1/4 inches) high. The content of the notice must be limited to only those elements provided for by law. For example, "©1983 John Doe" (17 U.S.C. 401) and "©M* John Doe" (17 U.S.C. 909) would be properly limited and, under current statutes, legally sufficient notices of copyright and mask work, respectively. Inclusion of a copyright or mask work notice will be permitted only if the authorization language set forth in § 1.71(e) is included at the beginning (preferably as the first paragraph) of the specification.

(t) *Numbering of sheets of drawings.* The sheets of drawings should be numbered in consecutive Arabic numerals within the sight as defined in paragraph (g) of this section. These numbers, if present, must be placed in the middle of the top of the sheet, but not in the margin. The numbers can be placed on the right-hand side if the drawing extends too close to the middle of the top edge of the usable surface. The drawing sheet numbering must be clear and larger than the numbers used as reference characters to avoid confusion. Sheets of drawings must be paginated from 1 onward. The number of each sheet should be shown by 2 Arabic numerals placed on either side of an oblique line, with the first being the sheet number, and the second being the total number of sheets of drawings, with no other marking.

(u) *Numbering of views.*

(1) The different views must be numbered in Arabic numerals consecutively, starting with 1, independent of the numbering of the sheets and, if possible, in the order in which they appear on the drawing sheet(s). Partial views intended to form one complete view, on one or several sheets, must be identified by the same number followed by a capital letter. View numbers must be preceded by the abbreviation "FIG." Where a single view is used to illustrate the claimed invention, it must not be numbered and the abbreviation "FIG." must not appear.

(2) Numbers and letters identifying the views must be simple and clear and must not be used in association with brackets, circles, or inverted commas. The view numbers must be larger than the numbers used for reference characters.

(v) *Security markings.* Authorized security markings may be placed on the drawings provided they are outside the sight, preferably centered in the top margin.

(w) *Corrections.* Any corrections on drawings submitted to the Office must be durable and permanent.

(x) *Holes.* The drawing sheets may be provided with 2 holes in the top margin. The holes should be equally spaced from the respective side edges, and their centerlines should be spaced 7.0 cm. (2 3/4 inches) apart. (See § 1.152 for design drawings, § 1.165 for plant drawings, and § 1.174 for reissue drawings.)

6. Section 1.88 is proposed to be removed and reserved as follows:

§ 1.88 [Reserved] [Use of old drawings.]

[If the drawings of a new application are to be identical with the drawings of a previous application of the applicant on file in the Office, or with part of such drawings, the old drawings or any sheets thereof may be used if the prior application is, or is about to be, abandoned, or if the sheets to be used are cancelled in the prior application. The new application must be accompanied by a letter requesting the transfer of the drawings, which should be completely identified.]

7. Section 1.123 is proposed to be revised to read as follows:

§ 1.123 Amendments to the drawing.

No change in the drawing may be made except by permission of the Office. Permissible changes in the construction shown in any drawing may be made only by [bonded draftsmen, at applicants expense, or by] the submission of [a substitute [drawings] drawing] by applicant. A sketch in permanent ink showing proposed changes, to become part of the record, must be filed for approval by the examiner and should be a separate paper.

8. Section 1.152 is proposed to be revised to read as follows:

§ 1.152 Design Drawing.

The design must be represented by a drawing that complies [made in conformity] with the requirements of § 1.84 [rules laid down for drawings of mechanical inventions], and must contain a sufficient number of views to constitute a complete disclosure of the appearance of the article. Appropriate surface shading must be used to show the character or contour of the surfaces represented. Solid black surface shading is not permitted except when used to represent color contrast. Broken lines may be used to show visible environmental structure, but may not be used to show hidden planes and surfaces which cannot be seen through opaque materials. Alternate positions of a design component, illustrated by full and broken lines in the same view are not permitted in a design drawing. Photographs and ink drawings must not be combined in one application. Photographs submitted in lieu of ink drawings in design patent applications must comply with § 1.84(b) and must not disclose environmental structure but must be limited to the design claimed. Color drawings and color photographs are not permitted in design patent applications.

9. Section 1.165 is proposed to be revised to read as follows:

§ 1.165 Plant Drawings.

(a) Plant patent drawings [are not mechanical drawings and] should be artistically and competently executed. [Figure] and must comply with the requirements of § 1.84. View numbers and reference characters need not be employed unless required by the examiner. The drawing must disclose all the distinctive characteristics of the plant capable of visual representation.

(b) The drawing may be in color and when color is a distinguishing characteristic of the new variety, the drawing must be in color. Two copies of color drawings or color photographs must be submitted. [Color drawings may be made either in permanent water color or oil, or in lieu thereof may be photographs made by color photography or properly colored on sensitized paper. Permanently mounted color photographs are acceptable. The paper in any case must correspond in size, weight and quality to the paper required for other drawings. See § 1.84.]

Sept. 9, 1992

DOUGLAS B. COMER
Acting Assistant Secretary and
Acting Commissioner
of Patents and Trademarks

(81) Use of Symbol "Ø" in Patent Applications

The Greek letter Phi has long been used as a symbol in equations in all technical disciplines. It further has special uses which include the indication of an electrical phase or clocking signal as well as an angular measurement. The recognized symbols for the upper and lower case Greek Phi characters, however, do not appear on most typewriters. This apparently has led to the use of a symbol composed by first striking a zero key and then backspacing and striking the "cancel" or "slash" key to result in "Ø" which is an approximation of accepted symbols for the Greek character Phi. In other instances the symbol is composed using the upper or lower case letter "O" with the "cancel" or "slash" superimposed thereon by backspacing or is simply handwritten in a variety of styles. These expedients result in confusion because of the variety of type sizes and styles available on modern typewriters.

In recent years, the growth of data processing has seen the increasing use of this symbol ("Ø") as the standard representation of zero. The "slashed" or "cancelled zero" is used to indicate zero and avoid confusion with the upper case letter "O" in both text and drawings.

Thus, when the symbol "Ø" in one of its many variations, as discussed above, appears in patent applications being prepared for printing, confusion as to the intended meaning of the symbol arises. Those (such as examiners, attorneys, and applicants) working in the art can usually determine the intended meaning of this symbol because of their knowledge of the subject matter involved, but editors preparing these applications for printing have no such specialized knowledge and confusion arises as to which symbol to print. The result, at the very least, is delay until the intended meaning of the symbol can be ascertained.

Since the Office does not have the resources to conduct a technical editorial review of each application before printing, and in order to eliminate the problem of printing delays associated with the usage of these symbols, any questions about the intended symbol will be resolved by the editorial staff of the Office of Publications by printing the symbol "Ø" whenever that symbol is used by the applicant. Any Certificate of Correction necessitated by the above practice will be at the patentee's expense (37 CFR 1.323) because the intended symbol was not accurately presented by the Greek upper or lower case Phi letters (Î, Ø) in the patent application.

RICHARD J. SHAKMAN,
*Assistant Commissioner
for Administration.*

Dec. 20, 1978.

**(82) U.S. Accession to Hague Convention
Abolishing the Requirement of Legalization
for Foreign Public Documents**

On Oct. 15, 1981, the Hague "Convention Abolishing the Requirement of Legalization for Foreign Public Documents" entered into force between the United States and twenty-eight foreign countries that are parties to the Convention. The Convention applies to any document submitted to the United States Patent and Trademark Office for filing or recording, which is sworn to or acknowledged by a notary public in any one of the member countries. The Convention abolishes the certification of the authority of the notary public in a member country by a diplomatic or consular officer of the United States and substitutes certification by a special certificate, or apostille, executed by an officer of the member country. Accordingly, the Office will accept for filing or recording a document sworn to or acknowledged before a notary public in a member country if the document bears, or has appended to it, an apostille certifying the notary's authority. The requirement for a diplomatic or consular certificate, specified in 37 CFR 1.66 and note 1 of 37 CFR 3.45, will not apply to a document sworn to or acknowledged before a notary public in a member country if an apostille is used.

The member countries that are parties to the Convention are:

Austria	Italy	Spain
Bahamas	Japan	Suriname

Belgium	Lesotho	Swaziland
Botswana	Liechtenstein	Switzerland
Cyprus	Luxembourg	Tonga
Fiji	Malawi	U.K. of Great
France	Malta	Britain and
Germany	Mauritius	N. Ireland
Fed. Rep. of	Netherlands	United States
Hungary	Portugal	Yugoslavia
Israel	Seychelles	

The Convention prescribes the following form for the apostille:

Model of certificate

The certificate will be in the form of a square with sides at least 9 centimetres long

APOSTILLE
(Convention de La Haye du Oct. 5, 1961)

*Commissioner of Patents
and Trademarks.*

[1013 O.G. 3]

(83) Simulated or Predicted Tests or Examples

In order to provide for uniform practice before the Patent and Trademark Office, the following clarification of current Office practice relating to simulated or predicted tests or examples is being set forth. This notice specifies the Office policy which is currently in effect and is considered to have been in effect in the past in this area. The wording of the MPEP provisions prior to this amendment went further than was intended. The amended sections below spell out more clearly the Office's position from the start.

The following wording will be substituted in revision number 8 for that presently in paragraph D of section 608.01(p) of the Manual of Patent Examining Procedure.

MPEP § 608.01(p)

**"D. Simulated or Predicted Test Results
or Prophetic Examples**

Simulated or predicted test results and prophetic examples (paper examples) are permitted in patent applications. Working examples correspond to work actually performed and may describe tests which have actually been conducted and results that were achieved. Paper examples describe the manner and process of making an embodiment of the invention which has not actually been conducted. Paper examples should not be represented as work actually done. No results should be represented as actual results unless they have actually been achieved. Paper examples should not be described using the past tense.

The first and last paragraphs of MPEP section 707.07(1) are being deleted.

DONALD J. QUIGG,
*Deputy Commissioner
of Patents and Trademarks*

Apr. 15, 1982.

[1018 O.G. 27]

(84)

**Department of Commerce
Patent and Trademark Office
37 CFR Part 1 [Docket No. 71008-7208]**

**Variety Denomination Requirements
for Plant Patent Applications**

Agency: Patent and Trademark Office, Commerce.

Action: Notice of proposed rulemaking.

Summary: The Patent and Trademark Office proposes to amend certain of the rules of practice applicable to the patenting of plants. Under the proposed rules of practice, an applicant for such a patent would, in addition to any requirements for obtaining a patent, also be required to record an identifying variety denomination for the plant. These proposed rules fulfill an obligation imposed by the Convention of the International Union for the Protection of New Plant Varieties (the UPOV Convention), to which the United States adheres.

Dates: Comments on the proposed rules must be submitted by Jan. 8, 1988, to assure their consideration in formulating the rules put into effect. A public hearing will be held on Jan. 15, 1988, beginning at 9:30 A.M., in the Commissioner's Conference Room, Crystal Plz. 3, the Patent and Trademark Office.

Addresses: Address comments to the Commissioner of Patents and Trademarks, Box 4, Washington, D.C. 20231. All comments received will be publicly available in the Patent and Trademark Office, Crystal Plz. 3, Arlington, Va., Rm. 11C28.

For Further Information Contact: Mr. Stanley D. Schlosser, Office of Legislation and International Affairs, by telephone at (703) 557-3065 or by mail addressed to the Commissioner of Patents and Trademarks, Box 4, Washington, D.C. 20231.

Supplementary Information: The UPOV Convention became applicable to the United States on Nov. 8, 1981, as a consequence of the President's exercise of authority to adhere to this international agreement. Under Articles 6 and 13 of the UPOV Convention, each plant variety for which protection is sought must be given a variety denomination and that denomination recorded ("registered" in the language of the Convention) at least by the time the patent is granted. It is left to each of the UPOV member states to determine how recordation is effected. For the United States, the issuance of a patent which includes the denomination of the variety would constitute recordation and registration for the purposes of compliance with UPOV Convention. The patent examining process would include consideration of the suitability for recordation of the proposed variety denomination.

Attention is called to two earlier Commissioner's Notices on this subject. The Notice of Oct. 20, 1981 (46 FR 51426) stated that appropriate rules for the registration of variety denominations, as required by the UPOV Convention, would be issued. The Commissioner's Notice, published in the Federal Register on Aug. 16, 1985, 50 FR 33062, proposed amendments to the Patent and Trademark Office's rules of practice to carry out this requirement. In light of public comments received, the earlier proposed rules are being withdrawn from consideration and replaced by these revised proposed rules. These would apply to plants patented under either 35 U.S.C. 101 or 161, but would not apply to any protection sought under the Plant Variety Protection Act (7 U.S.C. 2321 et seq.), administered by the United States Department of Agriculture.

These proposed rules, in accordance with the patent law requirements for providing a descriptive title for a patent application, would require the variety denomination proposed for recordation to be included in the title of the application. The denomination would be judged for recordability by the examiner assigned the application for examination, who would consult with appropriate trademark examination officials to determine if there exists a possibly conflicting trademark registration or application for registration.

The recordation of a variety denomination for purposes of compliance with UPOV Convention Article 13 is not to be understood as conveying any legal rights in that denomination. Recordation does no more than establish a prima facie case that can be asserted as evidence of the possible generic nature of the variety denomination, if genericness is not already established by its usage in the commercial market, advertising or publication.

Under the proposed rules, the Patent and Trademark Office in examining the recordability of variety denominations will,

in addition to its trademark records, utilize the Office's compilation of denominations obtained from horticultural, agricultural, floral and other professional societies, national breeders' rights offices, the UPOV Union's Secretariat, standard references and other available sources. Article 13 of the UPOV Convention requires that the variety denomination must enable the plant variety to be identified, that the denomination not consist solely of numbers except if this is shown to be an established practice for designating plant varieties, and that the denomination not be liable to mislead or cause confusion concerning the characteristics, value or identity of the variety or the identity of the breeder. No specific naming system is required by the Article. While a portion of the consuming public and others might prefer plant variety names conforming to the International Code of Nomenclature for Cultivated Plants or the UPOV Guidelines, common usage, code systems or other ways of identifying plants cannot be ignored.

The Patent and Trademark Office would accept for recordation a variety denomination complying with the requirements of the UPOV Convention's Articles 13(2) and 13(4). A number of variety denomination systems currently in use, such as the system described in the 1980 revision of the International Code of Nomenclature for Cultivated Plants, the UPOV Guidelines and various code systems may also meet these requirements. Sexually reproduced varieties could be named in compliance with the requirements of the Federal Seed Act.

In the event the examiner does not approve a proposed variety denomination for recordation, the applicant could petition the Commissioner for approval. Thus, the examination and approval of variety denominations will be handled in the same way as other procedural and administrative requirements not relating to the merits of the invention, such as the requirement to provide an abstract of the disclosure or the requirement to provide a title. A final refusal by the Commissioner on petition would require submission of another proposed denomination for recordation.

The petition to the Commissioner will be subject to a fee and the other requirements relating to petitions. The Commissioner may in appropriate cases delegate to the Assistant Commissioner for Trademarks or other appropriate trademark officials the decision of such petitions, under 37 C.F.R. 1.181(g).

The UPOV Convention requires the applicant to identify the patented variety by the same variety denomination (or a translation thereof) in all UPOV member states. A different denomination may be recorded in a particular member state, however, in cases where the denomination registered in another member state is unsuitable for business or other reasons. An applicant may during the course of examination be required to inform the Office of any other denomination by which the variety is known.

While these rules provide for the recordation of variety denominations, they recognize at the same time that, in cases of conflict, previously established proprietary rights are paramount. Recordation is in legal effect, therefore, no more than publication of a denomination which is or may become the generic name of a plant variety.

Trademark owners, owners of other proprietary rights and patent applicants share a common interest in knowing as early as possible if a variety denomination proposed for recordation possibly conflicts with a trademark or other proprietary rights. Accordingly, each denomination proposed for recordation, along with the genus and species to which the variety belongs, shall be published in the *Official Gazette* as soon as reasonably possible after receipt of the application in the Office. The Commissioner has determined that publication of such information constitutes special circumstances under 35 U.S.C. 122.

The public may provide information to the Office concerning the recordability of a proposed denomination. Such information would be entered in the official file wrapper of the application and be available to the examiner. Such information shall be called to the attention of the applicant by the Office.

Also, the *Official Gazette* would list newly recorded denominations in United States patents in order for trademark owners to assert their rights in appropriate cases through private negotiations or judicially, as they may now do in trademark cases. Proceedings in the Office in regard to the registration of variety denominations, however, will be conducted ex parte.

Under the proposed rules, each applicant would be required to specify in an application for protection of a plant variety the date of first use of the denomination if used prior to filing of

the patent application, or later to provide information about the date of first commercial use during pendency of the application. In cases of conflict between a trademark and a proposed variety denomination, the variety denomination will not be accepted for recordation unless its first commercial use clearly antedates another's established rights.

If a patentee learns of a conflict between a trademark and the recorded variety denomination after issuance of the patent, the patentee in order to resolve the conflict will be permitted to record a different denomination by means of the Certificate of Correction procedure. Also, a variety denomination found after issuance of a patent to be commercially unsuitable or ill-advised could be changed in a similar manner.

The Office now permits plants and plant varieties to be patented both specifically and broadly under patent 35 U.S.C. 101. In some cases, however, claims in an application will not be limited to a specific variety. These proposed rules would apply only to applications where a specific variety or varieties are claimed. Only these need be identified by a variety denomination, except where the number of varieties involved makes this impractical. In such a case, each claim directed to a specific variety would include its variety denomination, but these variety denominations could be omitted from the title of the patent. Variety denominations would not be required for microorganisms or microscopic plant parts.

Other Considerations: The proposed rule change is in conformity with the requirements of the Regulatory Flexibility Act (Pub. L. 96-354), Executive Order 12291 and the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 et seq. This rule contains a collection of information requirement subject to the Paperwork Reduction Act. This collection of information requirement has been cleared by OMB under control No. 0651-0011.

The General Counsel of the Department Commerce has certified to the Small Business Administration that the proposed rule changes will not have a significant adverse economic impact on a substantial number of small entities (Regulatory Flexibility Act, Pub. L. 96-354). The variety denomination requirement will not impose extra work on patent applicants (whether small or large businesses or individuals). The rules will help avoid burdensome and expensive litigation over trademark rights.

The Patent and Trademark Office has determined that this proposed rule change is not a major rule under Executive Order 12291. The annual effect on the economy will be less than \$100 million. There will be no major increase in costs or prices for consumers, individual industries, federal, state, or local government agencies, or geographic regions. There will be no significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

List of Subjects in 37 CFR Part 1

Administrative practice and procedure, Courts, Inventions and patents.

For the reasons set out in the preamble, 37 CFR Part I is proposed to be amended by revising §§ 1.72, and 1.17 and adding a new § 1.168 as set forth below. All proposed additions are printed between arrows.

PART I—RULES OF PRACTICE IN PATENT CASES

1. The authority citation for 37 CFR Part 1 would continue to read as follows:

AUTHORITY: 35 U.S.C. 6 unless otherwise noted.

2. Section 1.17 is proposed to be amended by adding the following items in numerical order to the list in paragraph (h) to read as follows:

§ 1.17 Patent application processing fees.

(h) ***

▶§1.168(d) For petitioning the Commissioner to record a plant variety denomination . . .

§ 1.168(g) For petitioning the Commissioner to record a substitute plant variety denomination . . . ◀

3. Section 1.72 is proposed to be amended by adding the following paragraph:

§ 1.72 Title and abstract.

▶(c) In the case of an application for the patenting of a plant variety under the provisions of 35 U.S.C. 101 or 161, the title of the application must include a variety denomination for the specific new variety claimed, except as provided for in § 1.168(b). The granting of the patent will be deemed the recordation of the variety denomination for purposes of compliance with Article 13 of the International Convention for the Protection of New Varieties of Plants, as revised on Oct. 23, 1978.

4. A new § 1.168 is proposed to be added, to read as follows:

▶§ 1.168 Variety denomination, submission to the Office, examination.

(a) The variety denomination submitted by the patent applicant under § 1.72 will be examined for compliance with the International Convention for the Protection of New Varieties of Plants. Specifically, the denomination:

- (1) must enable the plant variety to be identified;
- (2) must not be likely to cause confusion, to cause mistake or to deceive concerning the characteristics, value or identity of the plant variety or the identity of the breeder;
- (3) must not consist solely of numbers except if this is an established practice for designating plant varieties; and
- (4) must not be likely to cause confusion or mistake or to deceive as to any prior right of a third party, and shall not affect prior rights of third parties.

(b) If a proposed variety denomination is not included as part of the title of the application, when filed, the examiner shall set a period of not less than thirty days to provide a variety denomination. If a plurality of plant varieties are claimed, which make it impractical to include each variety denomination in the title of the application, each claim directed to a specific plant variety shall instead include the denomination of the claimed plant variety. In cases where no specific plant variety is claimed, for example, a patent directed to the improvement of a plant species, the denomination requirement applicable to the patenting of a plant variety or varieties will be waived.

(c) If the examiner determines that a proposed variety denomination is not suitable for recordation, the examiner shall refuse recordation thereof and shall set forth in an Office action the reasons for such refusal. An applicant disagreeing with the reasons for such refusal may request reconsideration and withdrawal of the refusal, giving the reasons therefor. If the examiner's refusal to record a proposed variety denomination is repeated and made final, the examiner shall at the same time require the applicant to propose another variety denomination for recordation.

(d) After a final requirement by the examiner for submission of a proposed new variety denomination, the applicant, in addition to making any response due on the remainder of the action, may in lieu of proposing another variety denomination petition the Commissioner for review of the examiner's holding, upon payment of the fee set forth in § 1.17(h).

(e) The applicant is required to submit for recordation the same variety denomination (or, if not in English, a translation or transliteration thereof) as that previously registered or recorded,

or proposed for registration in an earlier filed application for protection of the same variety in another member state of the International Union for the Protection of New Varieties of Plants. The applicant may submit another denomination for recordation, however, upon a showing satisfactory to the examiner as to why the denomination originally submitted or registered in another member state of the said Union is unsuitable for recordation in the United States. During pendency of an application, the examiner may require the applicant to provide information regarding all denominations for the same variety registered or proposed for registration in other member states of the said Union before the application was filed in the United States.

(f) The applicant shall indicate in the application the date of first commercial use in the United States if any, of the variety denomination proposed for recordation; or, if not commercially used prior to filing of the application, indicate during pendency of the application when the denomination has first been commercially used in this country. No variety denomination will be recorded if first commercially used after the establishment of third party proprietary rights to the denomination.

(g) A patentee in order to avoid a conflict between a recorded variety denomination and a trademark or other proprietary right, or where the recorded variety denomination is likely to be confused with another, or where business or marketing considerations dictate, may propose for recordation a substitute variety denomination for that already recorded. Such a proposal shall be in the form of a petition to the Commissioner together with the fee set forth in § 1.17(h). The proposed substitute denomination will be examined in the same manner as the denomination originally recorded, and upon recordation shall be promptly published in the *Official Gazette*. A Certificate of Correction indicating such substitute denomination shall be issued for the patent. If the patent has been assigned, only the assignee of record may apply for recordation of a substitute denomination.

(h) The Commissioner shall upon its receipt in the Office promptly publish in the *Official Gazette* each variety denomination proposed for recordation and the genus and species of the plant involved. Correspondence from the public objecting to the recordation of such denomination, if accompanied by reasons therefor, will be placed in the official file and considered by the examiner in an ex parte manner. An objection to recordation may be based on an earlier recorded or unrecorded variety denomination, a registered or common law trademark, a trade name or trade indicia, or other alleged prior right timely called to the Office's attention. The applicant shall be notified by the Office of the receipt of such correspondence. The secrecy of any pending application will be preserved in accordance with 35 U.S.C. 122. ◀

RENE TEGTMEYER,
Assistant Commissioner
for Patents

Sept. 18, 1987.

DEPARTMENT OF COMMERCE

Patent and Trademark Office
37 CFR Part 1
[Docket Number 90364-0071]
RIN: 0651-AA37

Requirements for patent applications containing nucleotide sequence and/or amino acid sequence disclosures

Agency: Patent and Trademark Office, Commerce

Action: Final Rule

Summary: The Patent and Trademark Office (PTO) is amending its regulations to establish a standardized format for descriptions of nucleotide and amino acid sequence data submitted as a part of patent applications, in conjunction with the required submission of this data in computer readable form. The standardized format is needed to permit proper examination and processing of such applications and to improve quality and efficiency of the examination process, promote conformity with usage of the scientific community, and improve dissemination of sequence data in electronic form. The standard symbols and format for sequence data, and the submission of this data in computer readable form, will be required for most disclosures of nucleotide and amino acid sequence data in patent applications filed after the effective date of the rule change.

Effective Date: October 1, 1990

For Further Information Contact: Lois E. Boland, Special Program Examiner, Office of the Assistant Commissioner for Patents, Crystal Park 2 - Suite 919, by telephone at (703) 557-8384 or by mail marked to her attention and addressed to the Commissioner of Patents and Trademarks, Washington, D.C. 20231.

Supplementary Information: Currently, problems exist in the presentation, examination and printing of nucleotide and amino acid sequence data because of the lack of uniformity in submission of sequence data to the PTO and the impracticality of properly searching and examining sequences submitted in paper form. For example, it is impractical for an examiner, searching a particularly lengthy sequence in a non-conforming format, to accurately key the query necessary to search the sequence in a computerized search. Further, the lack of standardized symbol use and standardized format results in a very difficult comparison, on the part of the examiner and the public, of what is claimed in a given patent application and what is disclosed in the prior art. Still further, the number of patent applications containing nucleotide and amino acid sequences is increasing every year. The major examination problems can be attributed to the volume of data and the use of inconsistent paper formats. The lack of consistency in symbols used and formatting requires examiners to attempt to convert the sequence data, as it appears in patent applications, into formats that are consistent with those appearing in the prior art in order to make proper evaluations of the patentability of the inventions claimed in the patent applications. Problems are also encountered in the printing of nucleotide and amino acid sequence data in patents because the data must be rekeyed under current patent printing procedures. This could easily result in the printing of erroneous sequences. In summary, the diversity and complexity of nucleotide and amino acid sequence data result in searching and analysis difficulties both within the PTO and outside the PTO, decreased accuracy of search and reproduction, and increased cost.

The PTO is amending its regulations to establish a standardized format for descriptions of nucleotide and amino acid sequence data submitted as a part of patent applications, in conjunction with the required submission of the data in computer readable form, which would result in the following advantages:

1. Cost savings in input of sequence data;
2. A practical and more accurate sequence search capability;
3. Improved interference detection;
4. More efficient examination;
5. Improved accuracy of printed sequences;
6. Creation of a PTO database of most patent-disclosed sequence data;
7. Improved public data access and dissemination in electronic form;
8. Exchange of published sequence data, in electronic form, with the Japanese Patent Office (JPO) and the European Patent Office (EPO) in a Trilateral Sequence Exchange Project;
9. Conformity with the scientific community; and
10. The encouragement of other government agencies and private vendors to include sequences appearing in patents in their data bases.

In those areas of biotechnology in which nucleotide and/or amino acid sequence information is significant, many patent applicants are accustomed to, or familiar with, the submission

of such sequence information to various sequence databases, such as GenBank, which is produced by the National Institutes of Health. Information regarding GenBank can be obtained from GenBank/Intelligenetics, Inc., 700 East El Camino Real, Mountain View, California 94040, (415) 962-7364. In order to facilitate such submissions, or merely for the purpose of researching and developing sequence information, many eventual patent applicants also generate or encode sequence information in computer readable form. In view of this, compliance with the rules herein should not pose a significant additional burden for these applicants. In order to further facilitate compliance with the rules that follow, the PTO will make available to the public input programs that are based on the Authorin program produced by GenBank. These input programs are specifically tailored to the requirements herein. The PTO presently intends to offer training for applicants and/or their attorneys to aid in their compliance with these rules. Details regarding availability of the modified Authorin program and scheduling of training programs will be announced in the PTO's *Official Gazette*.

The standard symbols and format, as well as the submission of sequence data in computer readable form, will be required for all disclosures of nucleotide and amino acid sequence data in new patent applications filed after the effective date of the rule change. Compliance with the rules, on a voluntary basis, is encouraged for applications filed prior to the effective date of these final rules. It is envisioned that, for the great majority of applications affected by these rules, applicants will not be subjected to significant additional burdens, with regard to both time and/or costs, in order to comply with these rules. However, if exceptional circumstances do arise and certain applicants experience specific hardships in attempting to comply with these rules, the PTO will consider appropriate petitions, filed in accordance with 37 CFR §1.183, to waive the rules, for which any fees may be refunded or waived dependent upon the particular circumstances. The final rules will not apply to reissue applications or reexamination proceedings filed after the effective date unless the application which matured into the patent sought to be reissued or reexamined was subject to these rules. Further, the final rules will not apply, except on a voluntary basis, to continuation or divisional applications filed after the effective date unless any application upon which 35 U.S.C. 120 priority is claimed was also subject to these rules. The final rules will apply to continuation-in-part applications filed after the effective date where any application upon which 35 U.S.C. 120 priority is claimed was subject to these rules or where the material that is newly added in the continuation-in-part includes sequence information that falls within the requirements of these rules. For those continuation-in-part applications that are filed after the effective date where the application upon which 35 U.S.C. 120 priority is claimed was not subject to these rules, compliance with these rules, on a voluntary basis, is encouraged.

The final rules define a set of symbols and procedures that will be both mandatory and the only way that an applicant will be permitted to submit certain information about a sequence that falls within the definitions used in these rules. Thus, §1.821 defines a sequence for the purpose of these final rules; sets forth the requirements for specific symbols, formats, paper and computer readable copies of the sequence; and specifies the deadlines for complying with the requirements. Sections 1.822 to 1.824 set forth detailed descriptions of the requirements that will be mandatory for the presentation of sequence data, and §1.825 sets forth procedures that will be available to an applicant in the event that amendments to the sequence information or replacement of the computer readable copy become necessary. There is nothing in these final rules that is intended to alter in any manner the prohibition against the introduction of new matter (35 U.S.C. 132 and 251), or the prohibition against the introduction of information that is not described in the application as originally filed (35 U.S.C. 112, first paragraph).

With regard to the symbols and format to be used for nucleotide and/or amino acid sequence data set forth in § 1.822 and the form and format for sequence submissions in computer readable form set forth in § 1.824, the PTO intends to accommodate progress in the areas of both standardization and computerization as they relate to sequence data by subsequently amending the rules to take into account any such progress. This progress will probably be reflected in the refinement of or liberalization of these final rules. For example, progress in the area of the standardization of sequence data will likely result

in a more comprehensive rule; and the branched sequences and the D-amino acids that are currently excluded from the rules may, in the future, be brought within the scope of the rules once the necessary standardization technology becomes available. As a further example, the computer readable form is currently limited to diskettes and tapes, but it readily can be seen that progress in the technology for developing databases of the type the PTO has envisioned will likely permit a broadening of the permissible types of computer readable forms that may be submitted. The same can be said for the computer/operating-system configurations that are currently permitted. As the PTO becomes able to provide greater refinement and liberality in these areas, the PTO will do so by appropriate amendments to the rules herein.

These final rules are part of an ongoing coordinated effort in the private sector and among the EPO, the JPO and the PTO to standardize the use of symbols and the format for sequence information, in order to permit the exchange and use of each other's published data. The PTO has signed a Memorandum of Understanding with the EPO and the JPO that calls for the capture and exchange of sequence data contained in patent applications filed with the three Offices from 1990 onward. A final agreement relating to the details of this undertaking was reached in Oct. 1989. A briefing setting forth the PTO's intentions for handling patent applications containing sequence data was held for the benefit of interested bar and industry groups on July 14, 1988. Draft rules were circulated to interested bar and industry groups on September 23, 1988. Numerous organizations and individuals filed comments in response to both the briefing and the draft rules. Finally, a notice of proposed rule-making relating to the Requirements for Patent Applications Containing Nucleotide Sequence and/or Amino Acid Sequence Disclosures was published in the Federal Register, 54 FR 18671 (May 2, 1989), and in the *Official Gazette*, 1102 O.G. 34 (May 16, 1989).

In this notice of final rulemaking, a description of the changes in the text of the proposed rules is provided along with an explanation of the reasons supporting the changes. In addition, comments received in response to the notice of proposed rule-making are analyzed. Finally, an explanation of the content of the final rules is provided.

Changes in Text of Proposed Rules

Several changes have been made in the text of the final rules from the text of the proposed rules which were published for comment in the notice of proposed rulemaking. Those changes are discussed below.

Section 1.821:

In the preamble for paragraph (a) of this section as proposed, the phrase "a sequence" as proposed has been replaced with the phrase "an unbranched sequence", and the sentence "Branched sequences are specifically excluded from this definition." has been inserted between the first and second sentences of the preamble as proposed for the purpose of clearly excluding branched sequences from the scope of the final rule. Due to the lack of a generally accepted standardized method for the representation and search of branched sequences in computer databases, it was decided that, until the requisite standards are developed, branched sequences would be excluded from the scope of the final rule. As such, these regulations are not applicable to branched sequences. In the first sentence of the preamble, "is interpreted to mean" has been changed to "means." This latter change is considered to be editorial in nature and is not intended to change the meaning of the preamble in any way.

In paragraphs (a)(1) and (a)(2) of this section, the phrase "in the description and/or the separate part of the disclosure on paper copy corresponding to, but not including," as proposed has been replaced with the phrase "as set forth in § 1.822(b), but shall not be shown explicitly in". These changes and the changes, discussed below, that were made to § 1.822(b) and the addition of § 1.822(p) were made for the purpose of clarifying the treatment to be accorded modified nucleotide bases and modified and unusual amino acids.

In paragraph (a)(2) of this section, the sentence "Only peptides or proteins containing normal peptide bonds are embraced

by this definition." as proposed has been replaced by the sentence "Any peptide or protein that can be expressed as a sequence using the symbols in § 1.822(b)(2) in conjunction with a description elsewhere in the "Sequence Listing" to describe, for example, modified linkages, cross links, end caps, non-peptidyl bonds, etc., is embraced by this definition." This change was made to clarify the scope of the rules relative to amino acids. Accordingly, an amino acid sequence will not be excluded from the scope of the rules merely due to the presence of one or several modified linkages, non-peptidyl bonds, etc. If an amino acid sequence, containing L-amino acids, can be represented by a string of amino acid abbreviations, with reference, where necessary, to a features table to explain modifications in the sequence, the sequence is embraced by the rules. The use of the terms "peptide or protein" implies, however, that the amino acids in a given sequence are linked by at least three consecutive peptide bonds.

In paragraph (b) of this section, the terms "above definition" have been changed to "definition in paragraph (a) of this section" to clearly identify the definition to which reference is being made.

In paragraph (e) of this section, third and fourth sentences have been added to explicitly set forth the procedure to be followed when a computer readable form of a new application is identical with a computer readable form of another application. In that situation, an applicant may make reference to the other application and computer readable form in lieu of filing a duplicate computer readable form in the new application.

In paragraphs (g) and (h) of this section, the phrases "the requirements of one or more of" have been changed to "any of the requirements of." A corresponding change has been made in the body of paragraphs (g) and (h) by deleting "one or more of" and "above." These changes are considered to be editorial in nature. No change in substance is intended.

In paragraph (g) of this section, the phrase "two months from the date of filing or" has been deleted from the paragraph as proposed to clearly indicate that notices will be sent by the PTO to applicants for all failures to comply with the rules. Further, the phrase "whichever is later, in which to comply, or the application will be considered to be abandoned" has been changed to "in order to prevent abandonment of the application." This latter change is considered to be editorial in nature. No change in substance is intended.

In paragraph (h) of this section, the phrase "or no international search report will be established by the United States Patent and Trademark Office as an International Searching Authority for those claims in the application that are directed to nucleotide and/or amino acid sequences" has been deleted from the paragraph as proposed. International applications that fail to comply with any of paragraphs (b) through (f) of this section will be searched to the extent possible without the benefit of the information in computer readable form. In the first sentence of this paragraph, "further" has been changed to "other" in view of the severely limited time constraints for processing PCT patent applications. In the second to the last sentence of this paragraph, the phrase "include new matter or" has been inserted before the phrase "go beyond the disclosure in the application as filed." This phrase was inserted to acknowledge the parallel, for later reference, between the U.S. and PCT standards for new matter. The last sentence of this paragraph, as proposed, has been deleted to more closely parallel paragraph (g) of this section.

Paragraph (i) has been added to this section to address the concerns of the private sector with respect to the weight that may ultimately be accorded an omission of an item of information which is not required under the rule, regardless of whether that item has been designated as "recommended" or "optional." This paragraph makes clear that neither the presence nor absence of information which is not required under the rules will create a presumption that such information is necessary to satisfy any of the requirements of 35 U.S.C. 112. Further, this paragraph states that the grant of a patent on an application that is subject to §§ 1.821 through 1.825 constitutes a conclusive presumption that the granted patent complies with the requirements of these rules.

Paragraph (j) has been added to this section to facilitate administrative processing of all application papers, computer readable forms and fees filed under this section. Accordingly, all such application papers, computer readable forms and fees should be marked "Box SEQUENCE."

Section 1.822

In paragraph (a) of this section as proposed, "following requirements" has been changed to "requirements of paragraphs (b) through (p) of this section." This change was made to clearly delineate the requirements being referenced.

In the preamble for paragraph (b) of this section, various changes have been made to the rule as proposed to clarify the codes that may be used for the nucleotide and/or amino acid sequence characters in the representations of the nucleotide and amino acid sequences and to clarify the treatment to be accorded modified nucleotide bases and modified and unusual amino acids. The phrase "and (b)(2)" has been substituted for "through (b)(4)" because the lists of modified bases and modified and unusual amino acids that were set forth in paragraphs (b)(3) and (b)(4) of this section as proposed are now separately set forth in newly drafted paragraph (p) of this section as adopted. In conjunction with the separate listing of the modified bases and modified and unusual amino acids in paragraph (p) of this section, the substance of the second sentence of this paragraph as proposed has been deleted and has been set forth in paragraph (p) of this section as adopted. Three new sentences have been added to paragraph (b) of this section as proposed. The first new sentence sets forth the principle that only those codes listed in paragraphs (b)(1) and (b)(2) shall be used in the representation of the nucleotide and amino acid sequences. The second and third new sentences describe the manner in which modified bases and amino acids may be presented in nucleotide and amino acid sequences by virtue of the use of the codes set forth in paragraphs (b)(1) and (b)(2) of this section. The changes to paragraph (b) of this section as proposed serve to clearly delineate those codes that may be used in the representation of nucleotide and amino acid sequences from those that may be used elsewhere in the description or the "Sequence Listing." Accordingly, only those codes that are to be used in the representation of sequences are now set forth in paragraph (b) of this section as adopted whereas the controlled vocabulary for modified bases and modified and unusual amino acids is now separately set forth in paragraph (p) of this section as adopted. The second sentence of this paragraph, as proposed, has been deleted from this paragraph and now appears in 1.823(a), as adopted.

In paragraph (d) of this section, the term "above" has been replaced by the term "below". The fact that the representation of double stranded nucleotide sequences will not be permitted in the "Sequence Listings" has obviated the need to accommodate those situations in which the coding regions of the coding strand of a double stranded nucleotide sequence and the amino acids corresponding to the codons in the coding strand of that nucleotide are depicted. In those situations, it was considered that the correspondence between the amino acids and the codons in the coding strand could most clearly be illustrated by positioning the amino acids above the nucleotide rather than below the nucleotide, as is more conventionally done. This arrangement was then, for the purpose of consistency, extended to the representation of all amino acids that corresponded to codons in the coding regions of a nucleotide. As stated above, because double stranded nucleotides will not be permitted in the "Sequence Listings," there is no longer a need to depict amino acids above corresponding codons. As such, paragraph (d) as adopted requires the depiction of amino acids corresponding to codons in the coding parts of a nucleotide sequence immediately below, not above, the corresponding codons.

Further, in paragraph (d) of this section, the new sentence "Where a codon spans an intron, the amino acid symbol shall be typed below the portion of the codon containing two nucleotides." has been added to the end of the paragraph, as proposed. This sentence was added to clarify the representation of an amino acid that corresponds to a codon that spans an intron. It is considered to be self-explanatory.

In paragraph (e) of this section, the term "code" has been replaced by the term "abbreviation" for consistency with paragraph (b)(2) of this section.

In paragraph (f) of this section, the sentence "Leftover bases, fewer than 10 in number, at the end of noncoding parts of a sequence shall be grouped together and separated from adjacent groups of 10 or 3 bases by a space." has been added to the end of the paragraph as proposed. This sentence was added to clarify

the representation of bases in a nucleotide sequence in those situations where an accumulation of bases, fewer than 10 in number, occur at the end of the non-coding part of a sequence.

Paragraphs (j) and (k) of this section as proposed have been changed to reflect the fact that the representation of double stranded nucleotide sequences will not be permitted in the "Sequence Listing." In paragraph (j) of this section as proposed, "single stranded" has been deleted, and "only by a single strand," has been inserted between "presented" and "in." The effect of these changes, in conjunction with the deletion of paragraph (k) as proposed, is to preclude the presentation of double stranded nucleotides in the "Sequence Listing."

Insofar as paragraph (k) of this section as proposed has been deleted, paragraphs (l) through (p) as proposed have been redesignated as paragraphs (k) through (o), respectively, as adopted.

In paragraph (n) of this section as proposed (paragraph (m) as adopted), the procedure for numbering amino acid sequences has been changed. In the first sentence of the paragraph as proposed, "shall" has been changed to "may" to indicate that the numbering procedure dependent upon the identification of the mature protein is optional, not mandatory. This change was made to alleviate the concern that there may be instances when an applicant may not have identified the mature protein. As such, an alternative numbering procedure has been set forth for use when the numbering is not based upon the identification of the mature protein. The sentence "Otherwise, the enumeration of amino acids shall start at the first amino acid at the amino terminal as number 1." has been added to the paragraph as proposed to set forth this alternative numbering procedure. The second sentence of this paragraph as proposed has been moved to the end of the paragraph as adopted so as to be applicable to both of the numbering procedures that are set forth in the paragraph as adopted. The third sentence of this paragraph as proposed has been clarified to indicate that the pre-sequences, pro-sequences (newly added), pre-pro-sequences (newly added) and signal sequences referred to are, in fact, amino acids preceding the mature protein.

In paragraph (p) as proposed (paragraph (o) as adopted), the phrase "A partial sequence shall be numbered as a separate sequence and" has been deleted, "numbered" has been changed to "presented"; "separate sequence identifiers, with" has been added between "with" and "the"; and the sentence "A sequence that is made up of one or more noncontiguous segments of a larger sequence or segments from different sequences shall be presented as a separate sequence." has been added to the end of the paragraph as proposed. These changes have been made to address the concerns that the requirements for the presentation and numbering of partial, gapped and hybrid sequences were ambiguous.

Paragraph (p) as adopted is new relative to the text of this section as proposed. The substance of this new paragraph corresponds to that set forth in the second sentence of paragraph (b) as proposed. As such, the comments made above with regard to paragraph (b) of this section are applicable herein.

Section 1.823:

In paragraph (a) of this section as adopted, two new sentences have been added to the paragraph as proposed. The first new sentence sets forth requirements relating to page and line length. The second new sentence was transferred from § 1.822(b) in its entirety. This transfer was made to provide a more logical presentation of all of the requirements for the "Sequence Listing."

In paragraph (b) of this section, the second sentence as proposed has been replaced by three new sentences to more clearly set forth the required arrangement of information in the "Sequence Listing."

In paragraph (b)(1)(i) of this section as proposed, "specify one name per line: SURNAME comma OTHER NAMES and/or INITIALS" has been added after "applicants" to clarify the format for the presentation of the applicants name in the "Sequence Listing." similar changes have been made to name designations in paragraphs (b)(1)(vii)(A) and (b)(1)(ix)(A) as proposed.

In paragraph (b)(1)(ii) of this section as proposed, "four lines maximum" has been added to the parenthetical information to indicate that the response provided should not exceed four lines.

Similar additions have been made throughout paragraph (b) of this section where the response provided may exceed the one line limitation now set forth in the preamble to paragraph (b) of this section.

In paragraph (b)(1) of this section as proposed, a new item of information has been added. This item of information relates to the number of sequences presented in the "Sequence Listing." The item is as follows: "(iii) NUMBER OF SEQUENCES (number of sequences in the "Sequence Listing" - M)." This item has been inserted after paragraph (b)(1)(ii), and paragraphs (b)(1)(iii) through (b)(1)(ix) as proposed have been redesignated as paragraphs (b)(1)(iv) through (b)(1)(x), respectively.

In paragraph (b)(1)(iii) as proposed (paragraph (b)(1)(iv) as adopted), a new information item has been added. This item relates to the addressee to which correspondence will be sent. The item is as follows: (A) ADDRESSEE (name of applicant, firm, company or institution, as may be appropriate). This item has been inserted before subheading (b)(1)(iii)(A) as proposed, and subheadings (b)(1)(iii)(A) through (E) as proposed have been redesignated accordingly.

In paragraph (b)(1)(v) as proposed (paragraph (b)(1)(vi) as adopted), "if available" has been added after "M" to indicate that the submission of current application data is mandatory only if it is available to the applicant.

In paragraphs (b)(1)(v) and (b)(1)(vi) as proposed and paragraph (b)(2)(x) as adopted, the parenthetical information provided for application and document numbers, and, filing and publication dates has been expanded to encompass Patent Cooperation Treaty applications and publications.

In paragraphs (b)(1)(v)(B), (b)(1)(vi)(C) and (b)(1)(vi)(D) as proposed, "specify as dd-MMM-yyyy" has been added after "available" to clarify the format for the presentation of date information in the "Sequence Listing." The lower case letters are employed to designate numeric responses, and the upper case letters are employed to designate alphabetical responses. As such, March 2, 1988, would be presented as 02-MAR-1988. In paragraph (b)(1)(ix)(G) as proposed (paragraph (b)(2)(x)(G) as adopted), "including month/date/year or season" has been changed to "specify as dd-MMM-yyyy, MMM-yyyy or Season-yyyy" to encompass all variations in date designations that may be encountered.

In paragraph (b)(1)(v)(C) as proposed (paragraph (b)(1)(vi)(C) as adopted), "specify each designation, left justified, within an eighteen position alpha numeric field" has been inserted after "assigned", and "to maximum of ten classification designations" has been inserted after "rep" to clarify the field length and maximum number of repetitions for the classification designations.

In paragraph (b)(1)(vi) as proposed (paragraph (b)(1)(vii) as adopted), the references to "DOCUMENT NUMBER", "document number", "document type", "PUBLICATION DATE" and "publication date" throughout this paragraph have been deleted and replaced with the appropriate references to "APPLICATION NUMBER", "application number", etc., so that the information collected in this paragraph relates only to prior applications and filing dates, not publications and publication dates. Publication information, including document numbers and publication dates, can be provided in paragraph (b)(2)(x) of this section as adopted. Further, subheading (b)(1)(vi)(B) as proposed has been deleted, and (b)(1)(vi)(A) as proposed has been clarified to include the pertinent country information. As such, subheading (b)(1)(vi)(C) has been redesignated as (b)(1)(vii)(B). Further, "specify as two letter country code and eight digit document number" has been inserted after "number,". Information regarding the manner in which PCT applications should be cited has also been added to this parenthetical. In view of the above deletion of references pertaining to publication dates, subheading (b)(1)(vi)(D) as proposed has been deleted. Further, since "PRIOR APPLICATION DATA" may repeat, the plural designations throughout the paragraph as proposed have been deleted.

Paragraph (b)(1)(ix) "PUBLICATION STATUS" as proposed has been moved to paragraph (b)(2) of this section as adopted and designated as paragraph (b)(2)(x) "PUBLICATION INFORMATION". This change permits publication information to be submitted specifically with respect to a given sequence. Further, in paragraph (b)(1)(ix) as proposed, "Have the data that are disclosed in SEQ ID NO:X been published" has been changed to "Repeat section for each relevant publication", and patent

information fields have been added in the paragraph as adopted. The patent information fields are necessary to accommodate non-literature publications. Further, the format for the residue information collected in paragraph (b)(1)(ix)(H) as proposed has been changed so that this information can be collected in one line in paragraph (b)(2)(x)(K) as adopted. This last change was necessary to reduce the number of levels of information being collected so that the computer software that has been developed to manipulate the collected information can properly distinguish all of the items of information by the use of standard ASCII characters. The use of italics to designate items of information in the rules as proposed did not conform to this ASCII character requirement.

With the exception of the addition of the new item of information for "NUMBER OF SEQUENCES," all of the changes, as discussed above, to paragraph (b)(1) of this section as proposed are considered to be nonsubstantive. These changes clarify the information that is to be submitted and facilitate the collection and manipulation of the information for database purposes.

In paragraphs (b)(2)(i)(C) and (D) of this section as proposed, "both or unknown to applicant" have been added as possible responses for the items of information relating to "STRANDEDNESS" and "TOPOLOGY" in the paragraphs as adopted. These changes address the concerns that the strandedness and topology of sequences may not always be known with certainty. Further, in each of paragraphs (b)(2)(i)(C) and (D) as proposed, additional parenthetical information has been provided to clarify that strandedness and topology relate to those characteristics of the source organism molecule.

In paragraph (b)(2)(ii) as proposed, "KIND" has been changed to "MOLECULE TYPE" in the paragraph as adopted. This change corresponds to the same change made by GenBank for collecting sequence information. Further, "with subheadings, if any" has been inserted in the parenthetical because one of the molecule types that are listed has been modified to provide a subheading not previously provided for. Specifically, the subheading "(A) DESCRIPTION" has been provided for "Other nucleic acid." The molecule types listed in this paragraph as adopted differ slightly from those listed in the proposed rule. The adopted molecule types more closely correspond to the requisite controlled vocabulary currently in use in GenBank's Authorin submission program. Further, where separate alternative paragraphs (b)(2)(ii) were provided in this section as proposed for nucleotides and peptides or proteins, these separate paragraphs have been combined in the paragraph as adopted. These alternatives were considered to be unnecessary in light of the sequence type information collected in paragraph (b)(2)(i)(B) as proposed and adopted. Paragraphs (b)(2)(ii)(A), (B) and (C) as proposed have been deleted from this section of the rule as adopted. The information in paragraph (b)(2)(ii)(A) is not considered to be useful to the database and will not be collected. Paragraphs (b)(2)(ii)(B) and (C) are separately provided for in this section as adopted in paragraphs (b)(2)(v) and (b)(2)(iii), respectively.

New paragraphs (b)(2)(iii), (b)(2)(iv) and (b)(2)(v) have been provided in this section as adopted. Paragraph (b)(2)(iii) "HYPOTHETICAL (yes/no -R)" has been provided as a separate paragraph in this section as adopted because all of the molecule types in paragraph (b)(2)(ii) could be hypothetical, not just those previously designated as hypothetical. Paragraph (b)(2)(iv) "ANTI-SENSE (yes/no -R)" has been added to accommodate an emerging trend in the technology. Paragraph (b)(2)(v) "FRAGMENT TYPE ..." has been added as a separate paragraph in this section as adopted, whereas it was collected as an item of information under paragraph (b)(2)(ii) "KIND" in this paragraph as proposed, in order to clearly delineate "KIND" or "MOLECULE TYPE" information from other unrelated items of information such as "FRAGMENT TYPE."

Further, in paragraph (b)(2)(ii)(B) as proposed (paragraph (b)(2)(v) as adopted), the "FRAGMENT TYPE" responses have been changed to clearly indicate that fragments are indeed intended by each response. As such, "N-terminal" and "C-terminal" are, in the paragraph as adopted, "N-terminal fragment" and "C-terminal fragment."

Paragraphs (b)(2)(iii)(A) through (C) as proposed will not be collected separately. Rather, in the rule as adopted, paragraph (b)(2)(vi)(A) will collect this information in "ORGANISM (scientific name of source organism)."

In paragraph (b)(2)(iii)(F) as proposed (paragraph (b)(2)(vi)(D) as adopted), the parenthetical has been expanded to incorporate the subheadings "(1) GERM LINE" and "(2) REARRANGED", and those subheadings have been deleted. This change was necessary to reduce the number of levels of information being collected so that the computer software that has been developed to manipulate the collected information can properly distinguish all of the items of information by the use of standard ASCII characters. The use of italics to designate items of information in the rules as proposed did not conform to this ASCII character requirement.

In paragraph (b)(2)(vi) as adopted (paragraph (b)(2)(iii) as proposed), "CELL LINE" and "ORGANELLE" have been added as paragraphs (b)(2)(vi)(H) and (I), respectively. These items of information were collected in paragraphs (b)(2)(iv)(A) and (b)(2)(ii), respectively, as proposed. It is considered that these items of information are more properly collected under the "ORIGINAL SOURCE" heading.

In paragraph (b)(2)(iv) as proposed, paragraph (b)(2)(iv)(A) has been deleted in view of its addition to paragraph (b)(2)(vi) as adopted.

Paragraph (b)(2)(vi) as proposed has been deleted and the corresponding information will be collected in the "FEATURE" information in paragraph (b)(2)(ix)(D) "OTHER INFORMATION." It is considered that these items of information are more properly collected under the "FEATURE" heading.

In paragraph (b)(2)(vii) as proposed (paragraph (b)(2)(ix) as adopted), "FEATURES" has been changed to "FEATURE" to indicate that one feature at a time is, in fact, being described, although multiple features may be described by virtue of repeating the field. Further, a new subheading "(A) NAME/KEY (provide appropriate identifier for feature)" has been added to the paragraph as adopted, and the remaining subparagraphs have been redesignated. This new subheading is necessary so that information relating to feature identifiers is positively requested and can, as such, be searched as a separate field. In this paragraph, the parenthetical for the subheading "LOCATION" has been expanded to encompass the information collected in the now deleted subheading "COMPLEMENT." Further, it is now explicitly stated that the location should be specified in accordance with the syntax of the DDBJ/EMBL/GenBank Feature Table Definition. This is the syntax that has been jointly developed by the three major sequence databases in Japan, Europe and the United States. As set forth above, a new subheading "(D) OTHER INFORMATION" has been added to collect the information collected in the now deleted paragraph (b)(2)(vi).

Section 1.824:

In paragraph (a) of this section as proposed, the phrase "required b § 1.821(e)" has been added after the terms "computer readable form" to provide a cross-reference to the section of the rules that requires the submission of the computer readable form.

In paragraph (b) of this section as proposed, the erroneous reference to "National" has been deleted in the paragraph as adopted.

In paragraph (d) of this section as proposed, the two sentences have been combined into a single sentence in the paragraph as adopted. This change is considered to be editorial in nature. No change in substance is intended.

In paragraph (f) of this section as proposed, the preamble has been changed to reiterate the fact that any means may be used to create the computer readable form as long as the conditions set forth in this paragraph are satisfied. Further, in order to clarify the tape requirements in this paragraph, the magnetic tape specification has been deleted from paragraph (f)(1) and a new paragraph (f)(4) has been added solely directed to magnetic tapes.

In paragraph (f)(2) as proposed, the spelling of "Xenix" has been corrected, the references to "Unix" or "System V" have been deleted, and the erroneous "LPR" designation has been changed to "lpr" in the paragraph as adopted.

In paragraph (f)(3) as proposed, a new media format has been inserted in the paragraph as adopted to accommodate the high capacity diskettes now available for the Apple Macintosh system. This new format is a "3.50 inch, 1.4 Mb storage" diskette.

In paragraph (h) as proposed, the word "phase" in the last sentence has been changed to "stage" in the paragraph as adopted.

to properly track the terminology currently in use in other sections of 37 CFR.

Section 1.825:

In paragraph (a) as proposed, a parenthetical cross-reference to the section and paragraph of these rules that establishes the requirement for the submission of the paper copy of the "Sequence Listing" has been provided in the paragraph as adopted.

In paragraph (b) as proposed, a parenthetical cross-reference to the section and paragraph of these rules that establishes the requirement for the submission of the computer readable form has been provided in the paragraph as adopted.

In paragraph (c) as proposed, the phrase "an application after the grant of a patent thereon" has been changed to "a patent, e.g., by reason of reissue or certificate of correction," to more properly state that patents, not applications, are the subject of the corrections referenced in the paragraph as adopted.

Response to and Analysis of Comments

Written comments from thirteen (13) sources were received in response to the notice of proposed rulemaking. Some suggestions made in the comments have been adopted as presented or in modified form, and others have not been adopted. A detailed analysis of the comments follows. There was no oral testimony presented at the public hearing conducted on July 12, 1989.

Comment: Two comments questioned the authority of the PTO to impose these regulations. The comments alleged that computer readable forms are not "in writing" as required by 35 U.S.C. 111, and that the rules represent a fundamental revision of 35 U.S.C. 111, 112, and 113, and cannot be reconciled with the requirements of law.

Response: 35 U.S.C. 6 gives the Commissioner the authority to establish regulations "not inconsistent with law." These rules require sequences to be submitted "in writing" as specified under 35 U.S.C. § 111. The additional requirement of the submission of a computer readable form is not inconsistent with 111. The rules do not alter, in any way, the requirements of 35 U.S.C. 112 and 35 U.S.C. 113.

Comment: One comment stated that the rules will have a significant impact on how the claims or disclosures will be interpreted. Further, it was stated that the rules preclude the applicant from being his/her own lexicographer.

Response: As stated above, the rules do not alter, in any way, the requirements of 35 U.S.C. 112. There will be no change in disclosure and/or claiming requirements after the implementation of the rules. The use of sequence identification numbers (SEQ ID NO:X) only provides a shorthand way for applicants to claim their inventions. These identification numbers do not in any way restrict the manner in which an invention can be claimed.

Comment: One comment questioned the validity of requiring applicants to ensure that there is no added matter upon amendment, which until now had been the responsibility of the PTO.

Response: This is not the first instance in which the applicant is required to ensure that there is no new matter upon amendment. The requirement is analogous to that found in 37 C.F.R. § 1.125 regarding substitute specifications. When a substitute specification is required because the number or nature of amendments would make it difficult to examine the case, the applicant must include a statement that the substitute specification includes no new matter. The necessity of requiring a substitute "Sequence Listing" upon amendment is similar to the necessity of requiring a substitute specification and, likewise, the burden is on the applicant to ensure that no new matter is added. Applicants have a duty to comply with the statutory prohibition (35 U.S.C. 132 and 251) against the introduction of new matter.

Comment: Two comments recommended that the standardized format not be made mandatory, but optional, or a less rigid code should be adopted.

Response: The stated purpose and usefulness of these rules depends upon and requires that the resultant database be accurate, uniform and complete. The Office has determined that mandatory compliance with a single standardized format is the most efficient way of accomplishing this goal.

Comment: Four comments suggested that the proposed effective date of January 1, 1990, be postponed. The Authorin

program should be available and in use. There should be a longer transition period where the standardized format serves as a guideline rather than a mandatory rule.

Response: As noted above, the effective date of the rules has been postponed. There will be a testing period after the publication but prior to the effective date of these final rules in which applicants may elect to participate on a voluntary basis.

Comment: Three comments were made to the effect that the PTO, the JPO, and the EPO should come to an agreement regarding a uniform standardized format among the three offices.

Response: The final rules are consistent with the harmonization that has been achieved among the EPO, the JPO and the PTO relating to the presentation and exchange of sequence data.

Comment: One comment expressed concern that the lack of inter-linkage with other major gene banks would cause more work and confusion rather than less.

Response: The PTO has consulted with the existing U.S. nucleotide and peptide and protein sequence data libraries during the development of the final rules presented herein. The EPO has also consulted with the major European sequence data libraries. It should also be noted that the existing nucleotide and peptide and protein sequence data libraries in the U.S., Europe and Japan have implemented regular exchanges of sequence data.

Comment: Two comments discussed differences between the proposed standard format and that of publication databases, and pointed out the difficulty to applicants in changing the way they currently submit sequence data. The comments alleged that the proposed rules indicate that the standardized format is similar to the GenBank format when, in fact, they are quite different. Also, the rules require separate listings for sequences derived from a single sequence, whereas publication databases do not.

Response: The standardized format is as close to the GenBank format as the Office could come while accommodating the special requirements of patent applications. Many applicants will have to change the way they currently submit sequence data in patent applications, but it will be a one-time change. The benefits to both the applicants and the PTO in terms of improved search capability and higher quality patents should more than compensate for any initial burden that may be experienced by some applicants. Further, GenBank is working with the PTO to produce software that will easily convert the standard GenBank presentation for nucleotides and the standard PIR presentation for peptides to the required PTO submission format. The PTO will make this modified program available to the public.

Comment: One comment questioned whether a DNA or amino acid sequence could still be part of a figure in a patent application, or whether it must be referred to in the format "SEQ ID NO."

Response: Any sequence may still be shown in a figure. Indeed, many significant sequence features may only be demonstrated by a figure. This is especially true in view of the fact that the representation of double stranded nucleotides is not permitted, according to the final rules, in the "Sequence Listing," and many significant nucleotide features, such as "sticky ends," and the like, will only be shown effectively by reference to a drawing figure. Similarly, drawing figures are recommended for use with amino acid sequences to depict structural features of the corresponding protein, such as finger regions and Kringle regions.

Comment: Two comments expressed concern over the need for all applicants to have access to the necessary computer equipment and programs.

Response: To facilitate compliance with the rules, the PTO will make a modified Authorin data input program available to all applicants for the cost of the media. Those applicants for whom compliance with the rules remains a significant hardship may petition for a waiver of the rules. See 37 CFR § 1.183.

Comment: Three comments questioned the use of a format which had advantages for production of a "hard copy" document, but would have to be reformatted for database storage and sequence searching. Separate "clean" listings of each nucleic acid and amino acid sequence were recommended.

Response: The software that has been developed for the purpose of the PTO's sequence database readily parses the requisite sequence information from the sequence data that has been formatted primarily for visual presentation and review.

Comment: Two comments stated that the "Recommended" and "Optional" information was unnecessary in identifying the sequence with particularity, would be provided elsewhere in the application and should be eliminated from the rules.

Response: The "Recommended" and "Optional" information has been retained for the purpose of developing, to the extent possible, the most comprehensive database possible for the purpose of searching applications containing sequence data. The "Recommended" and "Optional" information items constitute text database fields that will be text searchable by the search program that will be used by the PTO examiners. While this textual information may be available elsewhere in a given application, it would not be included in a sequence database and thus would not be searchable in the database if it is not included in the "Sequence Listing" and the computer readable copy of the "Sequence Listing."

Comment: Two comments suggested that the PTO train two or three clerks to convert computerized sequence data to the requested format. The comment further stated that it would be easier and cheaper for a clerk to learn to work the software and then use it every day, than to expect inventors and attorneys to relearn the system each time they file an application disclosing a sequence as herein defined.

Response: Conversion at the PTO would involve an unnecessary duplication of effort and would increase the opportunities for the introduction of errors into the database. It is not the intent of the PTO to convert data except in some, as yet unidentified, very exceptional circumstances. The service suggested in the comment can be met appropriately in the private sector.

Comment: Three comments said that the minimum thresholds for sequence length set out by § 1.821(a) were too low, encompassing amino acid sequences which are easily searchable without computer assistance and incidental nucleotide sequences, such as linkers, which are of no value to a PTO database.

Response: The minimum thresholds have been established for the purpose of developing a database that will facilitate computerized searching for both lengthy and relatively shorter sequences. The limit of four or more amino acids has been established for consistency with limits in place for industry database collections, whereas the limit of ten or more nucleotides, while lower than certain industry database limits, has been established to encompass those nucleotide sequences to which the shortest probe will bind in a stable manner. To raise the lower limit for amino acids to, for example, five amino acids, immediately illustrates the problems associated with higher thresholds. With a limit of five amino acids there would be 20^4 (160,000) possible combinations below this higher threshold versus 20^3 (8000) or fewer possible combinations below the current threshold. This difference in the number of possible combinations is significant, and plays an important role in effectively searching the applications under consideration.

Comment: Two comments recommended that sequences incidental to the invention not be subject to the rules, and that only claimed sequences be required to be listed. One comment stated that the requirements should not be limited to claimed sequences.

Response: Any disclosed sequence, whether claimed or not, is relevant for the purpose of assessing the prior art. Therefore, it is essential that all sequences, whether only disclosed or also claimed, be included in the PTO database.

Comment: Two comments suggested that sequences included as prior art not be subject to the rules.

Response: In many instances, prior art sequences may generally be referred to by name and a publication reference; in these situations, they need not be listed as part of the "Sequence Listing." However, if recitation of the sequence, i.e., as a string of particular bases or amino acids, is necessary to a discussion of these prior art sequences, it is required that these sequences be included in the "Sequence Listing" for examination purposes.

Comment: One comment inquired as to whether functionally defined sequences could be referred to by function or whether they must be listed.

Response: Any sequence that is disclosed as a sequence, i.e., as a string of particular bases or amino acids, and that otherwise meets the criteria of § 1.821(a), must be set forth as part of the "Sequence Listing." However, a sequence that is referred to only by function need not be listed.

Comment: One comment raised the question of how to deal with variations on listed sequences such as the following: Ex-

ample (1) allelic variations or "conservatively modified variants thereof." and Example (2) where the sequence "may be deleted at the C-terminus by 1, 2, 3, 4, or 5 residues."

Response: The rules do not encompass the variations listed in Examples (1) or (2). In Example (1), the sequences may be described as SEQ ID NO:X and "conservatively modified variants thereof" or allelic variations, if desired. A situation such as that in Example (2), if encompassed by the rules, would introduce far too much complexity into the "Sequence Listings" and the searching database that is currently envisioned. The possible mathematical variations that result from this type of language could reasonably require a "Sequence Listing" that would be thousands of pages in length. In Example (2), only the undeleted sequence needs to be included in the "Sequence Listing," and the sequences may be described as SEQ ID NO:X from which deletions have been made at the C-terminus by 1, 2, 3, 4 or 5 residues. The sequence search database will only contain the undeleted sequence.

Comment: Two comments inquired as to the criteria the PTO would use to determine compliance, and what opportunities would be afforded the applicant to satisfy the regulations. One comment also stated that abandonment is an unduly harsh penalty for failure to comply with the rules.

Response: Applicants will be notified of easily detectable deficiencies early in the application process. Deficiencies of a more sophisticated nature will likely only be detected by the examiner to whom the application is assigned. Applicants whose computer readable forms are damaged in the mail, are not readable, or are missing mandatory elements will be so notified shortly after receipt of the application by the PTO. Other errors or inconsistencies will be noted by the examiner early in the examination process. Upon detection of damage or a deficiency, a notice will be sent to the applicant detailing the damage or deficiency and setting a one month period for response. Extensions of time in which to reply will be available pursuant to 37 CFR 1.136. When an action by the applicant, such as a response to a notice to comply from the PTO, is determined to be a bona fide attempt to comply with the rules and it is apparent that compliance with some requirement has inadvertently been omitted, the opportunity to explain and supply the omission will be given before the question of abandonment will be considered. See 37 CFR § 1.135(c).

Comment: Two comments questioned the legal significance of sequences in the description which differ from those in the "Sequence Listing."

Response: There should not be many instances where differences occur since sequences which are listed in the "Sequence Listing" should be referred to by the assigned SEQ ID No within the text of the description and claims. A sequence may be listed as part of a figure which may differ from that listed in the "Sequence Listing." In that case, the rules represent no change from current practice regarding inconsistencies within an application.

Comment: One comment expressed concern over the likelihood of error when referring to a sequence by ID number and the consequences to the applicant of such an error.

Response: There is the possibility that errors will occur. However, referring to sequences by ID number should prove to be less prone to error than actually repeatedly reproducing the sequences.

Comment: One comment suggested that the PTO furnish the applicant with a paper copy of the data as it appears in the PTO's database so that the applicant may ensure that no errors arose in the data transfer.

Response: The PTO will undertake the furnishing of such paper copies after the implementation date of the rules. However, the necessity of continuing this procedure indefinitely will be reviewed once the integrity of the system has been established.

Comment: One comment stated that either the paper copy or the computer readable copy of the "Sequence Listing" must not be correctable by reference to the other. The PTO should clearly state the policy, and needs the right to require (not just "permit") correction of one copy where there are discrepancies.

Response: As set forth in § 1.821(e), the paper copy of the "Sequence Listing" will serve as the official copy of the "Sequence Listing" for the purposes of the patent application file. The PTO would like to permit correction of the paper copy, at the least, during the pendency of a given application by reference

to the computer readable copy thereof if both the paper and computer readable forms were submitted at the time of filing of the application and the totality of the circumstances otherwise substantiates the proposed correction. A mere discrepancy between the paper copy and the computer readable form may not, in and of itself, be sufficient to justify a proposed correction.

Comment: One comment said that if the paper copy is the official copy for priority purposes, it should be corrected (if necessary) within about nine months of the filing date in order to be used for filing under the Paris Convention.

Response: This comment is noted, but compliance with the recommended timing is, of course, contingent upon the discovery of inconsistencies within the Paris Convention priority period. It is expected that some, but certainly not all, discrepancies will be discovered within the priority period. The PTO cannot guarantee that all discrepancies in any part of an application will be discovered within the priority period.

Comment: One comment noted that although the PTO may not consider the computer readable copy to be part of the file wrapper for U.S. application purposes, the possible effect of this additional disclosure on foreign filings based upon the original filing document of the U.S. application has not been addressed or explained.

Response: The rules explicitly state that the computer readable form is merely a copy of the "Sequence Listing," and that the computer readable form will not necessarily be retained as a part of the application file. Section 1.821(e). A certified copy of a U.S. application that is obtained for the purpose of foreign filing will not include any information in computer readable form. However, it will include a copy of the "Sequence Listing." There should be no additional disclosure in the computer readable form relative to the "Sequence Listing." Section 1.821(f) clearly requires a statement that the content of the two is the same must be submitted. These sections were drafted with the foreign priority considerations in mind.

Comment: One comment recommended that the PTO state that an applicant will (rather than "may") be given the opportunity to meet the regulations when a bona fide attempt to comply has been made, but when some item has inadvertently been omitted.

Response: The grant of this further opportunity to comply is dependent upon the nature of the deficiency and the response received in attempt to cure the deficiency. If it is evident that a bona fide attempt to comply has been made, the opportunity to explain and supply the omission will be given before the question of abandonment is considered. No change to existing practice regarding inadvertent omissions is intended or contemplated. See 37 CFR § 1.135(c).

Comment: Two comments asked what an applicant should do, in view of the rule prohibiting the addition of new matter, if an error in sequencing were discovered after filing an application.

Response: The treatment accorded errors in sequencing will be no different after the implementation date of these rules than that currently accorded errors in sequencing or any other errors that are made in describing the invention in the application as originally filed.

Comment: One comment recommended that applicants not be required to submit additional computer readable copies of the "Sequence Listing" when filing a derivative application (continuation, continuation-in-part, or divisional).

Response: Additional computer readable forms will not be required in derivative or continuing applications if the sequence information is exactly the same as that in a parent application in which a complying computer readable form had been filed. In such situations, applicants must request that the previously submitted computer readable form, or the data thereon, be used in a subsequently filed application in much the same manner as applicants must now request the transfer of drawings in derivative or continuing applications. Section 1.821(e) now explicitly provides for this practice.

Comment: Four comments said the estimate that the proposed rule change would require only an additional 15 minutes was highly unrealistic. One comment noted that the time required to key in all the information other than the sequence data was less than one hour.

Response: The estimated time of approximately fifteen minutes for complying with these rules should not be interpreted

as the amount of time necessary to formulate a "Sequence Listing" submission. Rather, the estimated time only relates to the additional amount of time applicants will have to expend to comply with these rules over and above that which they would have expended previously for patent applications. It is submitted that compliance with these rules will involve only the additional submission of relevant application and computer readable form information and a minor, one-time, revision of the format for presenting sequence data, after which no additional expenditure of time for format compliance will be necessary. The time required to submit sequence and any associated information is not included in the above estimate because it is properly assumed that this information would necessarily have been submitted, though possibly in a different format, in applications filed prior to the effective date of these rules.

Comment: One comment asked whether on-line access to the PTO database would be available to the public.

Response: On-line access to the PTO database is not immediately envisioned. The PTO does plan to disseminate the patented or published portion of the database by making the information available to the public.

Comment: Two comments asked whether adequate security measures would be taken to insure that diskettes are properly identified before separation from their files.

Response: Adequate measures will be taken to insure that computer readable forms are properly identified before separation from their files. The labeling procedures required by § 1.825(h) of these final rules should minimize any identification problems.

Comment: One comment asked how the PTO intended to dispose of the disks to insure the secrecy of their contents.

Response: The secrecy of the computer readable forms will be maintained in much the same manner as the secrecy of applications is currently maintained. If computer readable forms are disposed of by the PTO, they will be disposed of in a manner that will preserve the secrecy of their contents.

Comment: One comment recommended that all sequence data meeting the minimum length criteria be routinely subject to the rules, and that a petition should be required when an applicant believes particular sequences are exempt as per 37 CFR 1.821(a).

Response: The suggestion cannot be adopted because the PTO has the burden to establish a lack of compliance with the rules, and the suggested practice would have the effect of placing the burden of establishing the need for compliance with applicants. The burden of proof does not shift to the applicant until the PTO has established a prima facie case of noncompliance.

Comment: One comment suggested that the definition of nucleotide sequences be narrowed to exclude polymers containing other than typical 5' to 3' phosphodiester linkages.

Response: The rules have been drafted so as not to exclude the types of sequences that are specifically referred to. The PTO does not want to exclude linkages of the type commonly found in naturally occurring nucleotides, e.g., eukaryotic end capped sequences.

Comment: One comment suggested that the applicability of the rules is overbroad and ambiguous. It was stated that it was unclear whether a single non-peptidyl linkage removes a peptide from applicability.

Response: Every effort has been made to eliminate ambiguity from the rules. The rules are, nonetheless, procedurally and technologically complex. They must be carefully reviewed in order to gain a comprehensive understanding of them. With regard to the specific question that has been posed, § 1.821(a)(2) was changed to address the point in question. A single non-peptidyl bond does not exclude a given peptide from the scope of the rule.

Comment: Three comments recommended that the depiction of unusual or modified bases and amino acids should be clarified. One of these comments suggested specific language for clarification. The suggested language is as follows:

A modified base or amino acid may be presented in a given sequence as the corresponding unmodified base or amino acid if the modified base or amino acid is one of those listed in paragraphs (p)(1) or (p)(2) of this section and the modification is also set forth elsewhere in the Sequence Listing (for example, FEATURES § 1.823(b)(2)(ix)). Otherwise, all bases or amino acids not appearing in paragraphs (b)(1) or (b)(2) of this section shall be listed in a given sequence as "N" or

"Xaa," respectively, with further information, as appropriate, given elsewhere in the Sequence Listing.

Response: The suggested language has been adopted in § 1.822(b) of the final rule.

Comment: One comment asked that the PTO explicitly state that the rules do not apply to applications that are pending at the time of the rule change.

Response: Only new applications filed after the effective date of the rule change will be subject to the rules; applications which are pending at that time are exempt. Compliance with the rules, on a voluntary basis, is encouraged for applications filed prior to the effective date of these final rules. The final rules will not apply, except on a voluntary basis, to continuation or divisional applications filed after the effective date unless the application upon which 35 U.S.C. 120 priority is claimed was also subject to these rules. The final rules will apply to continuation-in-part applications filed after the effective date where the application upon which 35 U.S.C. 120 priority is claimed was subject to these rules or where the material that is newly added in the continuation-in-part includes sequence information that falls within the requirements of these rules. The final rules will not apply to reissue or reexamination applications filed after the effective date unless the application which matured into the patent sought to be reissued or reexamined was subject to these rules.

Comment: One comment asked whether it would be acceptable for the inventor or the person who actually compares sequence data to sign the statement that the "Sequence Listing" conforms to the computer readable form.

Response: A statement submitted by either of those persons is acceptable as long as it is a verified statement. Any person registered to practice before the PTO may make such a statement, and it does not need to be verified. The statement may be made by any person not registered to practice before the PTO if the statement is a verified statement, i.e., in oath or declaration form.

Comment: Three comments said that the time limits set for compliance in § 1.81(g) were too short and should be extended.

Response: The time limits set are considered reasonable, and those set in § 1.821(g) are extendable pursuant to 37 CFR 1.136.

Comment: One comment noted that the requirement to indicate coding regions of a nucleic acid sequence may be inappropriate.

Response: There has been a misunderstanding of the requirements relating to the depiction of the coding regions in nucleotide sequences as well as the amino acids corresponding to the codons in those coding regions. It should be noted that the rules do not, in any way, require the depiction of coding regions or the amino acids corresponding to the codons in those coding regions. Paragraph (d) of § 1.822 only requires that where amino acids corresponding to the codons in the coding parts of a nucleotide sequence are depicted, they must be depicted *below* the corresponding codons. (Emphasis added.) There is absolutely no requirement in the rules to depict coding regions. Nor is there a requirement to separately list the amino acid sequence unless the applicant desires to discuss the amino acids as a separate sequence. That is, when the coding parts of a nucleotide sequence and their corresponding amino acids have been identified, if applicant desires to discuss those amino acids in the coding parts of the nucleotide as a separate sequence, those amino acids must also be set forth as a separate sequence. These requirements do not alter, in any way, the requirements of 35 U.S.C. 112. The separate submission of the amino acid sequence that corresponds to the coding parts of a nucleotide sequence is, however, recommended and encouraged because the amino acid sequence may not be captured in the sequence database if it is only presented in the mixed-mode format.

Comment: One comment noted that the requirement to list nucleotide coding regions as groupings of codons becomes redundant when the same sequence must be listed for each reading frame, and may be irrational for those circumstances where a single base insertion or deletion causes a change in the reading frame.

Response: As noted above, there is no requirement in the rules to depict coding regions of nucleotides. However, when an applicant does elect to depict coding regions, the rules require that they be depicted in a uniform manner.

Comment: One comment noted that the term "mature protein" should be better defined. The requirement to number amino

acids based on the determination of the mature protein is unnecessary and could lead to litigation problems. Further, the designation of pre- and pro- sequences may be impossible and is irrelevant to the search.

Response: Section 1.822(m) of the rules as adopted sets forth a procedure for numbering amino acid sequences that is an alternative to the procedure involving the identification of the mature protein. Sequences can either be numbered based upon the identification of the mature protein or based upon the first amino acid at the amino terminal as number 1.

Comment: Two comments noted that the rules did not provide for the depiction of codons that span intron/exon junctions.

Response: The rules as adopted now provide for the depiction of codons that span intron/exon junctions in § 1.822(d).

Comment: One comment asked how to represent regions where two proteins are coded on opposite strands of DNA and overlap.

Response: since the final rules do not permit the representation of double stranded nucleotides, each DNA strand must be listed separately. In this situation, each DNA strand may be listed with its corresponding amino acid sequence, and the relationship between the two may be shown in a drawing figure.

Comment: One comment noted that the rules do not provide for the representation of differentially spliced gene sequences which lead to the expression of two different amino acid sequences from a single gene or RNA.

Response: The rules do not contemplate the depiction of more than one amino acid sequence together with a single nucleotide sequence. Therefore, a differentially spliced nucleic acid sequence requires separate listings. The information may be represented by separate listings for each sequence, i.e., one nucleotide sequence and two amino acid sequences, or by listing the nucleic acid sequence twice, once with each of the different amino acid sequences. The relationship between them may also be shown in a drawing figure.

Comment: One comment recommended that applicants have the option of presenting the amino acid sequence in the one-letter form.

Response: The use of the three-letter code in the "Sequence Listing" is preferred for ease of examination. However, the modified Authorin program allows applicants to input amino acid sequences using one-letter codes or three letter codes, and will convert, where necessary, one-letter codes to the appropriate three-letter codes for the "Sequence Listing."

Comment: One comment suggested that the wording of § 1.822(p), regarding the presentation of partial sequences, subsequences and discontinuous sequences, be clarified.

Response: This language has been clarified, and can be found in § 1.822(o) as adopted.

Comment: One comment noted that there are no known naturally occurring circular amino acid sequences and that § 1.822(o) need not distinguish between circular and linear polypeptide sequences.

Response: Section 1.822(o) as proposed is now set forth in § 1.822(n) as adopted. Sequences in patent applications are not limited to those that occur naturally. Synthetic sequences are encompassed by the rules.

Comment: Three comments recommended that the PTO state explicitly that the applicant will in no way be held liable for omissions of optional or recommended items, and that the PTO would make no interpretations therefrom.

Response: The suggestion has been adopted in § 1.821(i) of the rules.

Comment: One comment recommended that the number of sequences presented in the "Sequence Listing" be included under the GENERAL INFORMATION section as a check for completeness during application processing.

Response: The suggestion has been adopted in § 1.823(b)(1)(iii) of the rules.

Comment: One comment mentioned that it was confusing to describe the items CURRENT APPLICATION DATA and PRIOR APPLICATION DATA as mandatory while saying that they are to be omitted if the information is unknown or inapplicable.

Response: The requirement for this information is similar to that currently set forth in 37 CFR 1.5. Each of the above items of information must be submitted if they are known to applicant or applicable in a given application, respectively.

Comment: One comment suggested that the PUBLICATION STATUS section be revised to accommodate patent citations.

Response: The suggestion has been adopted in § 1.823(b)(2)(x).

Comment: One comment said that the many levels of identifiers and sub-identifiers introduced unnecessary complexity.

Response: The items of information in § 1.823 have been reviewed and several levels of identifiers and sub-identifiers have been deleted.

Comment: One comment recommended that § 1.823(b)(1)(ix) not include the items BASE PAIRS and AMINO ACIDS since that information would be known from the kind of sequence listed.

Response: The suggestion has been adopted in § 1.823(b)(2)(x) of the rules.

Comment: One comment suggested that § 1.823(b)(2)(i) include "Not known to applicant" as a valid response to TOPOLOGY and STRANDEDNESS items.

Response: The suggestion has been adopted in § 1.823(b)(2)(i).

Comment: One comment suggested that "anti-sense DNA" and "anti-sense RNA" be added as a valid response under KIND in § 1.823(b)(2)(ii).

Response: A separate information item has been provided for molecule types that have anti-sense characteristics. It is in § 1.823(b)(2)(iv) as adopted.

Comment: One comment said that "Specific Organelle" was not a proper response to KIND, but was a sub-identifier under "Organelle DNA" and "Organelle RNA."

Response: All organelle information will be collected in § 1.823(b)(2)(vi)(I) as adopted.

Comment: One comment recommended that the heading KIND be used only once and the "Peptide or protein" information be listed under that single heading.

Response: The suggestion has been adopted in § 1.823(b)(2)(ii).

Comment: One comment suggested that "Whole" be included as a proper response to Peptide or protein FRAGMENT TYPE.

Response: This suggestion has not been adopted because it is presumed that no response will be given for FRAGMENT TYPE if the sequence is Whole."

Comment: One comment suggested that NAME be added as a sub-identifier under the FEATURES section.

Response: The suggestion has been adopted in § 1.823(b)(2)(ix)(A).

Comment: One comment suggested that § 1.824(f) be modified to include 1/4" tape cartridge as an acceptable magnetic medium. One comment suggested that computer readable forms produced by Digital Equipment Corporation (DEC) systems be acceptable.

Response: These suggestions have not been adopted. The initially acceptable computer readable forms and computer systems are limited to those set forth in § 1.824(a) and (f), respectively. It should be noted that any computer operating system may be utilized to produce a sequence submission, provided that the system is capable of producing a file having the characteristics specified in § 1.824 and capable of writing the properly formatted file to one of the acceptable diskettes or tapes.

Comment: One comment suggested that the PTO accept any computer readable form which is acceptable to the EPO or JPO.

Response: It is likely that, with the exception of the EPO's acceptance of optical character readable documents, the PTO will be more liberal than both the EPO and the JPO with regard to acceptable computer readable forms. The JPO will not accept any computer readable forms.

Comment: One comment recommended that where a yes/no response is desired for an item of information, it should be indicated in the parenthetical information following that item.

Response: The suggestion has been adopted throughout § 1.823(b) of the rules.

Comment: One comment suggested that a provision be made to allow a sequence listing to be the figure published in the *Official Gazette* at issuance.

Response: The PTO is exploring the feasibility of adopting this suggestion. If adopted, the Manual of Patent Examining Procedure will be revised to accommodate this suggestion.

Section 1.821(a) presents a definition for "nucleotide and/or amino acid sequences." This definition sets forth limits, in terms of numbers of amino acids and/or numbers of nucleotides, at or above which compliance with the rules that follow is required. Further, compliance with the rules is only required for unbranched sequences. Branched sequences are specifically excluded from the scope of the rules. The limit of four or more amino acids has been established herein for consistency with limits in place for industry database collections whereas the limit of ten or more nucleotides, while lower than certain industry database limits, has been established to encompass those nucleotide sequences to which the smallest probe will bind in a stable manner. Specifically, the amino acid limit is consistent with the limits in place in industry database collections, such as the National Biomedical Research Foundation Protein Identification Resource (NBRF-PIR; Washington, D.C.) database and the International Protein Information Database in Japan (JIPID; Tokyo). NBRF-PIR may include sequences having fewer than four amino acids but this is considered by the PTO to be too low because amino acid sequences with three amino acids can readily be manually searched as chemical structures rather than as sequences of the type to be submitted under these rules. The limits for amino acids and nucleotides are also consistent with those established for sequence data exchange with the JPO and the EPO.

Sections 1.821(a)(1) and 1.821(a)(2) present further definitions for those nucleotide and amino acid sequences that are intended to be embraced by the rules that follow. Nucleotide sequences are further limited to those that can be represented by the symbols set forth in § 1.822(b)(1). Amino acid sequences are further limited to those listed in § 1.822(b)(2) and those L-amino acids that are commonly found in naturally occurring proteins. The limitation to L-amino acids is based upon the fact that there currently exists no widely accepted standard nomenclature for representing the scope of amino acids encompassed by non-L-amino acids, and, as such, the process of meaningfully encoding these other amino acids for computerized searching and printing is not currently feasible. The previous limitation that "[o]nly peptides or proteins containing normal peptide bonds are embraced" by the rule has been deleted from the final rules in favor of a more liberal standard that states that the rules embrace "[a]ny peptide or protein that can be expressed as a sequence using the symbols in § 1.822(b)(2) in conjunction with a description elsewhere in the "Sequence Listing" to describe, e.g., modified linkages, cross links, end caps, non-peptidyl bonds, etc." The use of the terms "peptide or protein" implies, however, that the amino acids in a given sequence are linked by at least three consecutive peptide bonds. Accordingly, an amino acid sequence will not be excluded from the scope of the rules merely due to the presence of a single non-peptidyl bond. If an amino acid sequence can be represented by a string of amino acid abbreviations, with reference, where necessary, to a features table to explain modifications in the sequence, the sequence comes within the scope of the rules. However, the rules are not intended to encompass the subject matter that is generally referred to as synthetic resins.

Section 1.821(b) requires exclusive conformance, with regard to the manner in which the nucleotide and/or amino acid sequences are presented and described, with the rules that follow for all applications that include nucleotide and amino acid sequences that fall within the above definitions. This requirement is necessary to minimize any confusion that could result if more than one format for representing sequence data was employed in a given application. It is also expected that the preferred standard format will be more readily and widely accepted and adopted if its use is exclusive, as well as mandatory.

Section 1.821(c) requires that applications containing nucleotide and/or amino acid sequences that fall within the above definitions, contain, as a separate part of the disclosure on paper copy, a disclosure of the nucleotide and/or amino acid sequences, and associated information, using the format and symbols that are set forth in §§ 1.822 and 1.823. This separate part of the disclosure on paper copy will be referred to as the "Sequence Listing," and requires that each sequence disclosed in the application appear separately in the "Sequence Listing," with each sequence further being assigned a sequence identification number, referred to as "SEQ ID NO." A plurality of sequences may, if feasible, be presented on a single page, and this may be extended to the separate presentation of both nu-

Discussion of Specific Sections

Nucleotide and/or amino acid sequence disclosures in patent applications. (Section 1.821)

cleotide and amino acid sequences on the same page. The requirement for sequence identification numbers, at a minimum, requires that each sequence be assigned a different number for purposes of identification. However, where practical and for ease of reference, sequences should be presented in the separate part of the application in numerical order.

Section 1.821(d) requires the use of the assigned sequence identifier in all instances where the description or claims of a patent application discuss sequences regardless of whether a given sequence is also embedded in the text of the description or claims of an application. This requirement is also intended to permit references, in both the description and claims, to sequences set forth in the "Sequence Listing" by the use of assigned sequence identifiers without repeating the sequence in the text of the description or claims.

Section 1.821(e) requires the submission of a copy of the "Sequence Listing" in computer readable form. The computer readable form will be used by the PTO to establish a database for searching and printing nucleotide and amino acid sequences. This electronic database will also enable the PTO to exchange patented sequence data, in electronic form, with the JPO and the EPO. It should be noted that the PTO's database will comply with the confidentiality requirement imposed by 35 U.S.C. 122. That is, the PTO will not exchange or make public any information on any sequence until the patent application containing that information matures into a patent.

The second sentence of § 1.821(e) indicates that, as between the paper copy of the "Sequence Listing" and the computer readable copy thereof, the paper copy would serve as the official copy. However, the PTO would like to permit correction of the paper copy, at the least, during the pendency of a given application by reference to the computer readable copy thereof if both the paper and computer readable forms were submitted at the time of filing of the application and the totality of the circumstances otherwise substantiate the proposed correction. A mere discrepancy between the paper copy and the computer readable form may not, in and of itself, be sufficient to justify a proposed correction. In this regard, the PTO will assume that the computer readable form has been incorporated by reference into the application, when the paper and computer readable forms were submitted at the time of filing of the application. The PTO will attempt to accommodate or address all correction issues, but it must be kept in mind that the real burden rests with the applicant to ensure that discrepancies between the paper copy and the computer readable form are minimized. Applicants should be aware that there will be instances where the applicant may have to suffer any consequences of discrepancies between the two. All corrections would be made by appropriate fee-paid petitions. The paper copy would also serve as the official copy for priority purposes. The PTO does not desire to be bound by a requirement to permanently preserve computer readable forms for support, priority or correction purposes. For example, the PTO will make corrections, where appropriate, by reference to the computer readable form as long as the computer readable form is still available to the PTO. However, once use to the PTO for processing has ended, i.e., once the PTO has entered the data contained on the computer readable form into the appropriate database, the PTO does not intend to further preserve the computer readable form submitted by the applicant.

The last two sentences of § 1.821(e) set forth the procedure to be followed when a computer readable form of a new application is identical with a computer readable form of another application. In that situation, an applicant may make reference to the other application and computer readable form in lieu of filing a duplicate computer readable form in the new application.

Section 1.821(f) requires that the paper and computer readable copies of the "Sequence Listing" be accompanied by a statement that the content of the paper and computer readable copies are the same, at the time when the computer readable form is submitted. This statement must be a verified statement if it is made by a person not registered to practice before the PTO. Such a statement may be made by the applicant.

Section 1.821(g) requires compliance with the requirements of paragraphs (b) through (f), as discussed above, if they are not satisfied at the time of filing under 35 U.S.C. 111 or at the time of entering the national stage of an international application under 35 U.S.C. 371, within one month from the date of a notice requiring compliance. Failure to comply will result in the abandonment of the application. Submissions in response to require-

ments under this paragraph must be accompanied by a statement that the submission includes no new matter. This statement must be a verified statement if made by a person not registered to practice before the PTO. Again, such a statement may be made by the applicant. Extensions of time in which to reply to a requirement under this paragraph are available pursuant to 37 CFR 1.136. When an action by the applicant is a bona fide attempt to comply with these rules and it is apparent that compliance with some requirement has inadvertently been omitted, the opportunity to explain and supply the omission will be given before the question of abandonment is considered. See 37 CFR § 1.135(c).

Section 1.821(h) requires compliance with the requirements of paragraphs (b) through (f), as discussed above, within one month from the date of a notice requiring compliance in an international application filed in the United States Receiving Office under the Patent Cooperation Treaty (PCT), if the above noted requirements are not satisfied at the time of filing. Submissions in response to requirements under this paragraph must be accompanied by a statement that the submission does not include new matter or go beyond the disclosure in the international application as filed. This statement must be a verified statement if made by a person not registered to practice before the PTO. Such a statement may be made by an applicant. International applications that fail to comply with any of the requirements of paragraphs (b) through (f) of this section will be searched to the extent possible without the benefit of the information in computer readable form.

Section 1.821(i) makes clear that neither the presence nor absence of information which is not required under the rules will create a presumption that such information is necessary to satisfy any of the requirements of 35 U.S.C. 112. Further, this paragraph states that the grant of a patent on an application that is subject to §§ 1.821 through 1.825 constitutes a conclusive presumption that the granted patent complies with the requirements of these rules. This paragraph has been added to address the concerns with respect to the weight that may ultimately be accorded an omission of an item of information which is not required under the rule, regardless of whether that item has been designated as "recommended" or "optional."

Section 1.821(j) has been added to facilitate administrative processing of all application papers, computer readable forms and fees filed under this section. Accordingly, all such application papers, computer readable forms and fees filed in the PTO should be marked "Box SEQUENCE."

Symbols and format to be used for, nucleotide and/or amino acid sequence data. (Section 1.822)

Section 1.822 sets forth the format and symbols to be used for listing nucleotide and/or amino acid sequence data. The codes for representing the nucleotide and/or amino acid characters in the sequences are set forth in the tables of paragraphs (b)(1) and (b)(2) of this section. For the purpose of setting forth the sequence in the "Sequence Listing," only those symbols in paragraph (b)(1) for "Base codes" and in paragraph (b)(2) for "Amino acids" are to be used, as further set forth in paragraphs (c) and (e) of this section. No other symbols shall be used in nucleotide and amino acid sequences. The "Modified base controlled vocabulary" in paragraph (p)(1) and the "Modified and unusual amino acids" in paragraph (p)(2) are not to be used in setting forth the sequences; but, they may be used in the description and/or the "Sequence Listing" corresponding to, but not including, the sequence itself. However, a modified base or amino acid may be presented in a given sequence as the corresponding unmodified base or amino acid if the modified base or amino acid is one of those listed in paragraphs (p)(1) or (p)(2) of this section and the modification is also set forth elsewhere in the "Sequence Listing," for example, in the features table. Otherwise, all bases or amino acids not appearing in paragraphs (b)(1) or (b)(2) of this section must be listed in a given sequence as "N" or "Xaa," respectively, with further information given elsewhere in the "Sequence Listing."

In paragraphs (b)(2) and (e) of § 1.822, the use of three-letter codes for amino acids is required. The use of the three-letter codes for amino acids is preferred over the one-letter codes from the perspective of facilitating the examiner's review of the application papers, including the "Sequence Listing," and the public's, as well as the examiner's, use of the printed patents.

The modified Authorin program that the PTO will make available to the public will have the capability of converting from one-to three-letter amino acid codes and printing the amino acid sequence in three-letter codes regardless of input.

Paragraphs (d) through (p) of § 1.822 set forth the format for presenting sequence data. These paragraphs set forth the manner in which the characters in sequences are to be grouped, spaced, presented and numbered.

It should be noted that paragraph (d) of this section requires that amino acids corresponding to codons in the coding parts of a nucleotide sequence be listed below the corresponding codons. This is the opposite of the location set forth in the proposed rules. The fact that the representation of double stranded nucleotide sequences will not be permitted in the "Sequence Listings" has obviated the need to accommodate those situations in which the coding regions of the primary coding strand of a double stranded nucleotide sequence and the amino acids corresponding to the codons in the coding strand of that nucleotide sequence are depicted. In those situations, it was considered that the correspondence between the amino acids and the codons in the primary coding strand could most clearly be illustrated by positioning the amino acids above the nucleotides rather than below the nucleotides, as is more conventionally done. This arrangement was then, for the purpose of consistency, extended to the representation of all amino acids that corresponded to codons in the coding regions of a nucleotide sequence. As stated above, because double stranded nucleotides will not be permitted in the "Sequence Listing," there is no longer a need to depict amino acids above corresponding codons. As such, paragraph (d) as adopted requires the depiction of amino acids corresponding to codons in the coding parts of a nucleotide sequence immediately below, not above, the corresponding codons. Further, in paragraph (d) of this section, the situation in which a codon spans an intron has been addressed. In those situations, the "amino acid symbol shall be typed below the portion of the codon containing two nucleotides." This sentence was added to clarify the representation of an amino acid that corresponds to a codon that spans an intron.

In view of the number of comments that were received in which there was a misunderstanding of the requirements relating to the depiction of the coding regions in nucleotide sequences as well as the amino acids corresponding to the codons in those coding regions, it should be noted that the rules do not, in any way, require the depiction of coding regions or the amino acids corresponding to the codons in those coding regions. Paragraph (d) of this section only requires that where amino acids corresponding to the codons in the coding parts of a nucleotide sequence are depicted, they must be depicted *below* the corresponding codons. (Emphasis added.) There is absolutely no requirement in the rules to depict coding regions. Nor is there a requirement to separately list the amino acids corresponding to the codons in the coding parts of a nucleotide sequence unless the applicant desires to discuss the amino acids as a separate sequence. That is, when the coding parts of a nucleotide sequence and their corresponding amino acids have been identified, if applicant desires to discuss those amino acids in the coding parts of the nucleotide as a separate sequence, those amino acids must also be set forth as a separate sequence. The separate submission of the amino acid sequence that corresponds to the coding parts of a nucleotide sequence is, however, recommended and encouraged because the amino acid sequence may not be captured in the sequence database if it is only presented in the mixed-mode format.

Paragraphs (f) through (i) of this section are considered to be self-explanatory.

Paragraph (j) of this section states that nucleotide sequences shall only be represented by a single strand, in the 5' to 3' direction, from left to right. That is, double stranded nucleotides shall not be represented in the "Sequence Listing." A double stranded nucleotide may be represented as two single stranded nucleotides, and any relationship between the two may be shown in the drawings.

The presentation and enumeration procedures for amino acid sequences are set forth in paragraphs (k) and (m) of this section. Two alternatives are presented for numbering amino acid sequences. Amino acid sequences may be numbered with respect to the identification of the first amino acid of the first mature protein or with respect to the first amino acid appearing at the amino terminal. The enumeration procedure for nucleotides is

set forth in paragraph (l) of this section. Sequences that are circular in configuration are intended to be encompassed by these rules, and numbering procedures for them are provided in paragraph (n) of this section. The numbering procedures set forth in paragraphs (k) through (n) of this section are not necessarily intended to be consistent with all currently employed numbering procedures. The objective here is to establish a reasonable numbering procedure that can readily be followed and adhered to in the future. As a whole, these formatting procedures also reflect those that have been agreed to for electronic data exchange with the JPO and the EPO.

In paragraph (o) of this section the procedures for presenting and numbering gapped and hybrid sequences are set forth. The reference to partial sequences in the proposed rule has been deleted because a partial sequence would necessarily be numbered as a separate sequence. A sequence that is made up of one or more noncontiguous segments of a larger sequence or segments from different sequences shall be presented as a separate sequence. As previously noted, these changes have been made to address the concerns that the requirements for presentation and numbering of partial, gapped and hybrid sequences were ambiguous.

Paragraph (p) of this section provides the codes for representing modified nucleotide bases and modified and unusual amino acids. The use of the codes set forth in paragraph (p) of this section is discussed above.

Requirements for nucleotide and/or amino acid sequences as part of the application papers. (Section 1.823)

Section 1.823 sets forth the informational requirements for inclusion in the separate part of the disclosure on paper copy that would be submitted in accordance with §1.821(c). This section lists the items of information that are to be included in the "Sequence Listing," which constitutes the separate part of the disclosure on paper copy. The items of information are to be presented in the "Sequence Listing," immediately preceding the actual nucleotide and/or amino acid sequence, in the order in which those items are listed in this section. Page and line length requirements are set forth. The requirement to use a fixed width font to present sequence data is also set forth. This latter requirement is made to ensure that the desired sequence character spacing and numbering is maintained upon printing. The heading for each item of information shall not include the parenthetical explanatory information included in this section.

In § 1.823, the items of information are broken down into two categories. The first category is directed to "GENERAL INFORMATION" and includes information relating to the application being filed and the diskette/tape being submitted. It is likely that this information will be applicable for all sequences and, as such, will need to be set forth only once in a given "Sequence Listing." The second category is directed to "INFORMATION FOR SEQ ID NO:X" and includes information that, most likely, will be specific for each sequence disclosed. Where more than one sequence is disclosed, this category will be repeated and subsequent headings should be set forth as:

"(2) INFORMATION FOR SEQ ID NO:2;" "(2) INFORMATION FOR SEQ ID NO:3;" etc. Throughout the above two categories, the items of information are further broken down into categories relating to whether their submission is mandatory (M), recommended (R) or optional (O). Certain items are also designated as those that may repeat (rep) in a given "Sequence Listing." The numbering of repeated items should remain constant so that the overall numbering scheme of the "Sequence Listing" conforms to that specified in this section. The first category includes those items for which inclusion in the "Sequence Listing" is mandatory. These mandatory items of information relate to the patent application, the computer readable form, basic sequence data and the applicable priority or PCT data. A new mandatory item of information, relative to those set forth in the proposed rules, has been added to these final rules. This item relates to the number of sequences set forth in the "Sequence Listing." The reference in paragraph (b)(1)(vi)(C) of § 1.823 to "F-terms" relates to the key-word indexing of patents that is being undertaken by the JPO in conjunction with their automation plans. The second category includes those items for which inclusion in the "Sequence Listing" is recommended, but not required. These recommended items of infor-

mation provide further information relating to the sequence listed. These additional items of information are of interest to examiners and will create a more comprehensive database; as a result, the items would serve to facilitate sequence searching. The third category includes items of information that are primarily for the purpose of providing more complete information upon dissemination, for which inclusion in the "Sequence Listing" is also optional.

Throughout paragraphs (b)(1) and (b)(2) of § 1.823, the items of information relating to patent applications and patent publications should be provided, keeping in mind the appropriate standards that have been established by the World Intellectual Property Organization (WIPO).

In paragraph (b)(1)(i) of § 1.823, the item of information relating to "APPLICANT" should be limited to a maximum of the first ten named applicants in the application. Similarly, in paragraph (b)(2)(x) of § 1.823, the item of information relating to "AUTHORS" should be limited to a maximum of the first ten named authors in the publication.

In paragraph (b)(2)(ix) of § 1.823, relating to "FEATURES" or the description of the points of biological significance in a given sequence, it is recommended, but not required, that the information that is provided by the applicant conform to the controlled vocabulary that is set forth in GenBank's "Feature Representation in Nucleotide Sequence Data Libraries," Release 57.0, as may be amended. Further, the feature "LOCATION" should be specified using the syntax of the DDBJ/EMBL/GenBank Feature Table Definition.

In paragraph (b)(2)(x) of § 1.823, publication information for a given sequence is collected. The publication information encompasses both patent-type publications and non-patent literature publications. Information item "(K) RELEVANT RESIDUES IN SEQ ID NO: X" is intended to collect information relating to the correspondence between a sequence set forth in the "Sequence Listing" and published sequence information. The starting (FROM) and end (TO) positions in the listed sequence that correspond to the published sequence information should be set forth.

A sample "Sequence Listing" is included as Appendix I, following this notice. As indicated in the sample "Sequence Listing," only information that is applicable to a given sequence need be listed in the "Sequence Listing." The sample "Sequence Listing" also serves to illustrate that when the coding parts of a nucleotide sequence and their corresponding amino acids have been identified, if applicant desires to discuss those amino acids in the coding parts of the nucleotide as a separate sequence, those amino acids must also be set forth as a separate sequence. In the given sample, it can be assumed that the applicant desired to discuss the amino acids as a separate sequence. This convention will minimize ambiguities that may result in those instances where the amino acids corresponding to the coding parts of a nucleotide sequence constitute two separate amino acid sequences. In those instances, if an applicant desires to discuss the two separate amino acid sequences, they must be separately presented in the "Sequence Listing." Further, in those instances when applicant desires to discuss, as separate sequences, all three reading frames of the coding regions of a nucleotide sequence, six separate sequences should be set forth in the "Sequence Listing" to minimize confusion. These six sequences would include three nucleotide sequences separately showing each of the three reading frames of the coding regions of the sequence and three separate amino acid sequences corresponding to the translation of the three reading frames of the nucleotide sequence. A complete listing of abbreviated headings for all items of information is provided in Appendix II, also following this notice. For purposes of clarity, the appropriate responses for "(ii) MOLECULE TYPE" are also set forth in Appendix II, but only those that are applicable should be included in a given "Sequence Listing." After the heading for each item in the "Sequence Listing," the appropriate information or a yes/no answer should be provided. Where "SEQ ID NO:X" appears, the appropriate sequence identification number should be provided.

Form and format for nucleotide and/or amino acid sequence submissions in computer readable form. (Section 1.824)

Section 1.824 sets forth the form for sequence submissions in computer readable form. Any computer operating system may

be utilized to produce a sequence submission, provided that the system is capable of producing a file having the characteristics specified in § 1.824, and is capable of writing the properly formatted file to one of the acceptable diskettes or tapes. Currently, the computer readable form is being limited to diskettes or tapes. However, as noted above, it is contemplated that this may be broadened in the future in light of progress in the technology for developing and establishing databases of this type. That is, it is possible that this may be broadened in the future to encompass other media and formats. If a given sequence and its associated information cannot practically or possibly fit on a single diskette or tape, as is required in paragraph (d) of this section, an exception via a non-fee petition to waive this provision will normally be granted. As set forth in paragraph (g) of § 1.824, the computer readable forms that are submitted in accordance with these rules will not be returned to the applicant. Paragraph (h) of § 1.824 requires the labeling, with appropriate identifying information, of the computer readable forms that are submitted in accordance with these rules.

Amendments to or replacement of sequence listing and computer readable copy thereof, (Section 1.825)

Section 1.825 sets forth the procedures for amending the "Sequence Listing" and the computer readable copy thereof. The procedures that have been defined in this section involve the submission of either substitute sheets of the "Sequence Listing" or substitute copies of the computer readable form, in conjunction with statements that indicate support for the amendment in the application, as filed, and that the substitute sheets or copies include no new matter. The requirement for statements regarding the absence of new matter follows current practice relating to the submission of substitute specifications, as set forth in 37 CFR 1.125. Paragraph (c) of § 1.825 explicitly addresses the situation where amendments to the "Sequence Listing" are made after a patent has been granted, e.g., by a certificate of correction, reissue or reexamination. Paragraph (d) of § 1.825 addresses the possibility and presents a remedy for the situation where the computer readable form may be found by the PTO to be damaged or unreadable.

Other Considerations

The rule change is in conformity with the requirements of the Regulatory Flexibility Act (Pub. L. 96-354), Executive Orders 12291 and 12612, and the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 *et seq.*

The General Counsel of the Department of Commerce certified to the Chief Counsel for Advocacy, Small Business Administration, that the rule change will not have a significant impact on a substantial number of small entities (Regulatory Flexibility Act, Pub. L. 96-354) due to the limited number of entities, both small and otherwise, that are involved in the relevant technology. Further, the costs associated with the rule change would not have a significant impact on overall costs associated with filing patent applications because the rule change adopts standards, procedures, and formats which are becoming industry and international norms.

The Patent and Trademark Office has determined that this rule change is not a major rule under Executive Order 12291. The annual effect on the economy will be less than \$100 million. There will be no major increase in costs or prices for consumers, individual industries, Federal, State or local government agencies, or geographic regions. There will be no significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

The Patent and Trademark Office has also determined that this notice has no Federalism implications affecting the relationship between the National Government and the States as outlined in Executive Order 12612.

The rule contains a collection of information subject to the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 *et seq.* Collections of information relating to patent applications have previously been approved by the Office of Management and Budget under code 0651-0011. For the great majority of applications that will be filed having nucleotide and amino acid sequences falling within the limits defined herein, applicants

will not have to expend any substantial extra time to comply with these rules over and above that previously approved for patent applications. For the most part and as noted above with regard to current practice in the industry, the required information will have already been keyed into a computer system. As such, compliance with these rules will involve only the additional submission of relevant application and computer readable form information and a minor, one-time, revision of the format for presenting sequence data, after which, no additional expenditure of time for format compliance will be necessary. Any burden that may be attributed to the submission of relevant application and computer readable form information may, in fact, be more than offset by the fact that compliance with these rules will have the substantial benefit of reducing the overall time necessary to prepare applications, because a given sequence will only have to be set forth once in an application and further references thereto will be made by means of a sequence identifier. Accordingly, compliance with these rules is estimated to take approximately fifteen additional minutes, including time for reviewing instructions, maintaining data needed, and completing and reviewing the collection of information. This collection of information has been approved by the Office of Management and Budget under code 0651-0024, due to expire on June 30, 1992. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to the Office of Management and Organization, Patent and Trademark Office, Washington, D.C. 20231; and to the Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, D.C. 20503, Attention: Paperwork Reduction Project 0651-0024.

Lists of Subjects in 37 CFR Part 1:

Administrative practice and procedure, Courts, Freedom of information, Inventions and patents, Reporting and record-keeping requirements, Small businesses.

For the reasons set out in the preamble and under the authority granted to the Commissioner of Patents and Trademarks by 35 U.S.C. 6, the Patent and Trademark Office is amending Title 37 of the Code of Federal Regulations as set forth below.

PART 1—RULES OF PRACTICE IN PATENT CASES

1. The authority citation for 37 CFR Part 1 would continue to read as follows:

AUTHORITY: 35 U.S.C. 6 unless otherwise noted.

2. A new, undesignated center heading, new §§ 1.821 - 1.825, and new Appendices A and B are added to Subpart G - Biotechnology Invention Disclosures to read as follows:

APPLICATION DISCLOSURES CONTAINING NUCLEOTIDE AND/OR AMINO ACID SEQUENCES

§ 1.821 Nucleotide and/or amino acid sequence disclosures in patent applications.

(a) "Nucleotide and/or amino acid sequences" as used in §§ 1.821 through 1.825 is interpreted to mean an unbranched sequence of four or more amino acids or an unbranched sequence of ten or more nucleotides. Branched sequences are specifically excluded from this definition. Nucleotides and amino acids are further defined as follows:

(1) "Nucleotides" are intended to embrace only those nucleotides that can be represented using the symbols set forth in § 1.822(b)(1). Modifications, e.g., methylated bases, may be described as set forth in § 1.822(b), but shall not be shown explicitly in the nucleotide sequence.

(2) "Amino acids" are those L-amino acids commonly found in naturally occurring proteins and are listed in § 1.822(b)(2). Those amino acid sequences containing D-amino acids are not intended to be embraced by this definition. Any amino acid sequence that contains post-translationally modified amino acids may be described as the amino acid sequence that is initially translated using the symbols shown in § 1.822(b)(2) with the modified positions, e.g., hydroxylations or glycosylations, being

described as set forth in § 1.822(b), but these modifications shall not be shown explicitly in the amino acid sequence. Any peptide or protein that can be expressed as a sequence using the symbols in § 1.822(b)(2) in conjunction with a description elsewhere in the "Sequence Listing" to describe, for example, modified linkages, cross links and end caps, non-peptidyl bonds, etc., is embraced by this definition.

(b) Patent applications which contain disclosures of nucleotide and/or amino acid sequences, in accordance with the definition in paragraph (a) of this section, shall, with regard to the manner in which the nucleotide and/or amino acid sequences are presented and described, conform exclusively to the requirements of §§ 1.821 through 1.825.

(c) Patent applications which contain disclosures of nucleotide and/or amino acid sequences must contain, as a separate part of the disclosure on paper copy, hereinafter referred to as the "Sequence Listing," a disclosure of the nucleotide and/or amino acid sequences and associated information using the symbols and format in accordance with the requirements of §§ 1.822 and 1.823. Each sequence disclosed must appear separately in the "Sequence Listing." Each sequence set forth in the "Sequence Listing" shall be assigned a separate identifier written as SEQ ID NO:1, SEQ ID NO:2, SEQ ID NO:3, etc.

(d) Where the description or claims of a patent application discuss a sequence listing that is set forth in the "Sequence Listing" in accordance with paragraph (c) of this section, reference must be made to the sequence by use of the assigned identifier, in the text of the description or claims, even if the sequence is also embedded in the text of the description or claims of the patent application.

(e) A copy of the "Sequence Listing" referred to in paragraph (c) of this section must also be submitted in computer readable form in accordance with the requirements of § 1.824. The computer readable form is a copy of the "Sequence Listing" and will not necessarily be retained as part of the patent application file. If the computer readable form of a new application is to be identical with the computer readable form of another application of the applicant on file in the Office, reference may be made to the other application and computer readable form in lieu of filing a duplicate computer readable form in the new application. The new application shall be accompanied by a letter making such reference to the other application and computer readable form, both of which shall be completely identified.

(f) In addition to the paper copy required by paragraph (c) of this section and the computer readable form required by paragraph (e) of this section, a statement that the content of the paper and computer readable copies are the same must be submitted with the computer readable form. Such a statement must be a verified statement if made by a person not registered to practice before the Office.

(g) If any of the requirements of paragraphs (b) through (f) of this section are not satisfied at the time of filing under 35 U.S.C. 111 or at the time of entering the national stage under 35 U.S.C. 371, applicant has one month from the date of a notice which will be sent requiring compliance with the requirements in order to prevent abandonment of the application. Any submission in response to a requirement under this paragraph must be accompanied by a statement that the submission includes no new matter. Such a statement must be a verified statement if made by a person not registered to practice before the Office.

(h) If any of the requirements of paragraphs (b) through (f) of this section are not satisfied at the time of filing, in the United States Receiving Office, an international application under the Patent Cooperation Treaty (PCT) applicant has one month from the date of a notice which will be sent requiring compliance with the requirements, or such other time as may be set by the Commissioner, in which to comply. Any submission in response to a requirement under this paragraph must be accompanied by a statement that the submission does not include new matter or go beyond the disclosure in the international application as filed. Such a statement must be a verified statement if made by a person not registered to practice before the Office.

(i) Neither the presence nor the absence of information which is not required under §§ 1.821 through 1.825, in an application shall create any presumption that such information is necessary to satisfy one or more of the requirements of 35 U.S.C. 112. Further, the grant of a patent on an application that is subject

to the requirements of §§ 1.821 through 1.825 shall constitute a conclusive presumption that said patent complies with the requirements of §§ 1.821 through 1.825.

(j) Envelopes containing only application papers, computer readable forms and fees filed under this section should be marked "Box SEQUENCE."

§ 1.82 Symbols and format to be used for nucleotide and/or amino acid sequence data.

(a) The symbols and format to be used for nucleotide and/or amino acid sequence data shall conform to the requirements of paragraphs (b) through (p) of this section.

(b) The code for representing the nucleotide and/or amino acid sequence characters shall conform to the code set forth in the tables in paragraphs (b)(1) and (b)(2) of this section. No code other than that specified in this section shall be used in nucleotide and amino acid sequences. A modified base or amino acid may be presented in a given sequence as the corresponding unmodified base or amino acid if the modified base or amino acid is one of those listed in paragraphs (p)(1) or (p)(2) of this section and the modification is also set forth elsewhere in the Sequence Listing (for example, FEATURES § 1.823(b)(2)(ix)). Otherwise, all bases or amino acids not appearing in paragraphs (b)(1) or (b)(2) of this section shall be listed in a given sequence as "N" or "Xaa," respectively, with further information, as appropriate, given elsewhere in the Sequence Listing.

(1) Base codes:

<u>Symbol</u>	<u>Meaning</u>
A	A; adenine
C	C; cytosine
G	G; guanine
T	T; thymine
U	U; uracil
M	A or C
R	A or G
W	A or T/U
S	C or G
Y	C or T/U
K	G or T/U
V	A or C or G; not T/U
H	A or C or T/U; not G
D	A or G or T/U; not C
B	C or G or T/U; not A
N	(A or C or G or T/U) or (unknown or other)

(2) Amino acid three-letter abbreviations:

<u>Abbreviation</u>	<u>Amino acid name</u>
Ala	Alanine
Arg	Arginine
Asn	Asparagine
Asp	Aspartic Acid
Asx	Aspartic Acid or Asparagine
Cys	Cysteine
Glu	Glutamic Acid
Gln	Glutamine
Glx	Glutamine or Glutamic Acid
Gly	Glycine
His	Histidine
Ile	Isoleucine
Leu	Leucine
Lys	Lysine
Met	Methionine
Phe	Phenylalanine
Pro	Proline
Ser	Serine
Thr	Threonine
Trp	Tryptophan
Tyr	Tyrosine
Val	Valine
Xaa	Unknown or other

(c) A nucleotide sequence shall be listed using the one-letter code for the nucleotide bases, as in paragraph (b)(1) of this section.

(d) The amino acids corresponding to the codons in the coding parts of a nucleotide sequence shall be typed immediately below the corresponding codons. Where a codon spans an intron, the amino acid symbol shall be typed below the portion of the codon containing two nucleotides.

(e) The amino acids in a protein or peptide sequence shall be listed using the three-letter abbreviation with the first letter as an upper case character, as in paragraph (b)(2) of this section.

(f) The bases in a nucleotide sequence (including introns) shall be listed in groups of 10 bases except in the coding parts of a sequence. Leftover bases, fewer than 10 in number, at the end of noncoding parts of a sequence shall be grouped together and separated from adjacent groups of 10 or 3 bases by a space.

(g) The bases in the coding parts of a nucleotide sequence shall be listed as triplets (codons).

(h) A protein or peptide sequence shall be listed with a maximum of 16 amino acids per line, with a space provided between each amino acid.

(i) A nucleotide sequence shall be listed with a maximum of 16 codons or 60 bases per line, with a space provided between each codon or group of 10 bases.

(j) A nucleotide sequence shall be presented, only by a single strand, in the 5' to 3' direction, from left to right.

(k) An amino acid sequence shall be presented in the amino to carboxy direction, from left to right, and the amino and carboxy groups shall not be presented in the sequence.

(l) The enumeration of nucleotide bases shall start at the first base of the sequence with number 1. The enumeration shall be continuous through the whole sequence in the direction 5' to 3'. The enumeration shall be marked in the right margin, next to the line containing the one-letter codes for the bases, and giving the number of the last base of that line.

(m) The enumeration of amino acids may start at the first amino acid of the first mature protein, with number 1. The amino acids preceding the mature protein, e.g., pre-sequences, pro-sequences, pre-pro-sequences and signal sequences, when presented, shall have negative numbers, counting backwards starting with the amino acid next to number 1. Otherwise, the enumeration of amino acids shall start at the first amino acid at the amino terminal as number 1. It shall be marked below the sequence every 5 amino acids.

(n) For those nucleotide sequences that are circular in configuration, the enumeration method set forth in paragraph (1) of this section remains applicable with the exception that the designation of the first base of the nucleotide sequence may be made at the option of the applicant. The enumeration method for amino acid sequences that is set forth in paragraph (m) of this section remains applicable for amino acid sequences that are circular in configuration.

(o) A sequence with a gap or gaps shall be presented as a plurality of separate sequences, with separate sequence identifiers, with the number of separate sequences being equal in number to the number of continuous strings of sequence data. A sequence that is made up of one or more noncontiguous segments of a larger sequence or segments from different sequences shall be presented as a separate sequence.

(p) The code for representing modified nucleotide bases and modified and unusual amino acids shall conform to the code set forth in the tables in paragraphs (p)(1) and (p)(2) of this section. The modified base controlled vocabulary in paragraph (p)(1) of this section and the modified and unusual amino acids in paragraph (p)(2) of this section shall not be used in the nucleotide and/or amino acid sequences; but may be used in the description and/or the "Sequence Listing" corresponding to, but not including, the nucleotide and/or amino acid sequence.

(1) Modified base controlled vocabulary:

<u>Abbreviation</u>	<u>Modified base description</u>
ac4c	4-acetylcytidine
chm5u	5-(carboxyhydroxymethyl)uridine
cm	2'-O-methylcytidine
cmnm5s2u	5-carboxymethylaminomethyl-2-thiouridine
cmnm5u	5-carboxyaethylaminomethyluridine
d	dihydrouridine
fm	2'-O-methylpseudouridine
gal q	beta,D-galactosylqueosine
gm	2'-O-methylguanosine

<u>Abbreviation</u>	<u>Modified base description</u>
i	inosine
i6a	N6-isopentenyladenosine
m1a	1-methyladenosine
m1f	1-methylpseudouridine
m1g	1-methylguanosine
m1i	1-methylinosine
m22g	2,2-dimethylguanosine
m2a	2-methyladenosine
m2g	2-methylguanosine
m3c	3-methylcytidine
m5c	5-methylcytidine
m6a	N6-methyladenosine
m7g	7-methylguanosine
mam5u	5-methylaminomethyluridine
mam5s2u	5-methoxyaminomethyl-2-thiouridine
man q	beta,D-mannosylqueosine
mcm5s2u	5-methoxycarbonylmethyluridine
mo5u	5-methoxyuridine
ms2i6a	2-methylthio-N6-isopentenyladenosine
ms2t6a	N-((9-beta-D-ribofuranosyl-2-methylthiopurine-6-yl)carbamoyl)threonine
mt6a	N-((9-beta-D-ribofuranosylpurine-6-yl)N-methylcarbamoyl) threonine
mv	uridine-5-oxyacetic acid methylester
o5u	uridine-5-oxyacetic acid (v)
osyw	wybutosine
p	pseudouridine
q	queosine
s2c	2-thiocytidine
s2t	5-methyl-2-thiouridine
s2u	2-thiouridine
s4u	4-thiouridine
t	5-methyluridine
t6a	N-((9-beta-D-riofuanosylpurine-6-yl)carbamoyl) threonine
tm	2'-O-methyl-5-methyluridine
um	2'-O-methyluridine
yw	wybutosine
x	3-(3-amino-3 carboxypropyl)uridine, (acp3)u

(2) Modified and unusual amino acids:

<u>Abbreviation</u>	<u>Modified and unusual amino acid</u>
Aad	2-Aminoadipic acid
bAad	3-aminoadipic acid
bAla	beta-Alanine, beta-Aminopropionic acid
Abu	2-Aminobutyric acid
4Abu	4-Aminobutyric acid, piperidinic acid
Acp	6-Aminocaproic acid
Ahe	2-Aminoheptanoic acid
Aib	2-Aminoisobutyric acid
bAib	3-Aminoisobutyric acid
Apm	2-Aminopimelic acid
Dbu	2,4-Diaminobutyric acid
Des	Desmosine
Dpm	2,2'-Diaminopimelic acid
Dpr	2,3-Diaminopropionic acid
EtGly	N-Ethylglycine
EtAsn	N-Ethylasparagine
Hyl	Hydroxylysine
aHyl	allo-Hydroxylysine
3Hyp	3-Hydroxyproline
4Hyp	4-Hydroxyproline
Ide	Isodesmosine
alle	allo-Isoleucine
MeGly	N-Methylglycine, sarcosine
Melle	N-Methylisoleucine
MeLys	N-Methylvaline
Nva	Norvaline
Nle	Norleucine
Orn	Ornithine

§ 1.823 Requirements for nucleotide and/or amino acid sequences as part of the application papers.

(a) The "Sequence Listing," required by § 1.821(c), setting forth the nucleotide and/or amino acid sequences, and associated

information in accordance with paragraph (b) of this section, must begin on a new page and be titled "Sequence Listing" and appear immediately prior to the claims. Each page of the "Sequence Listing" shall contain no more than 66 lines and each line shall contain no more than 72 characters. A fixed-width font shall be used exclusively throughout the "Sequence Listing."

(b) The "Sequence Listing" shall, except as otherwise indicated, include, in addition to and immediately preceding the actual nucleotide and/or amino acid sequence, the following items of information. The order and presentation of the items of information in the "Sequence Listing" shall conform to the arrangement given below, except that parenthetical explanatory information following the headings (identifiers) is to be omitted. Each item of information shall begin on a new line, enumerated with the number/numeral/letter in parentheses as shown below, with the heading (identifier) in upper case characters, followed by a colon, and then followed by the information provided. Except as allowed below, no item of information shall occupy more than one line. Those items of information that are applicable for all sequences shall only be set forth once in the "Sequence Listing." The submission of those items of information designated with an "M" is mandatory. The submission of those items of information designated with an "R" is recommended, but not required. The submission of those items of information designated with an "O" is optional. Those items designated with "rep" may have multiple responses and, as such, the item may be repeated in the "Sequence Listing."

(1) GENERAL INFORMATION (Application, diskette/tape and publication information):

(i) APPLICANT (maximum of first ten named applicants; specify one name per line: SURNAME comma OTHER NAMES and/or INITIALS - M/rep):

(ii) TITLE OF INVENTION (title of the invention, as elsewhere in application, four lines maximum - M):

(iii) NUMBER OF SEQUENCES (number of sequences in the Sequence Listing" - M):

(iv) CORRESPONDENCE ADDRESS (M):

(A) ADDRESSEE (name of applicant, firm, company or institution, as may be appropriate):

(B) STREET (correspondence street address, as elsewhere in application, four lines maximum):

(C) CITY (correspondence city address, as elsewhere in application):

(D) STATE (correspondence state, as elsewhere in application):

(E) COUNTRY (correspondence country, as elsewhere in application):

(F) ZIP (correspondence zip or postal code, as elsewhere in application):

(v) COMPUTER READABLE FORM (M):

(A) MEDIUM TYPE (type of diskette/tape submitted):

(B) COMPUTER (type of computer used with diskette/tape submitted):

(C) OPERATING SYSTEM (type of operating system used):

(D) SOFTWARE (type of software used to create computer readable form):

(vi) CURRENT APPLICATION DATA (M, if available):

(A) APPLICATION NUMBER (U.S. application number, including a series code, a slash and a serial number, or U.S. PCT application number, including the letters PCT, a slash, a two letter code indicating the U.S. as the Receiving Office, a two digit indication of the year, a slash and a five digit number, if available):

(B) FILING DATE (U.S. or PCT application filing date, if available; specify as dd-MMM-yyyy):

(C) CLASSIFICATION (IPC/US classification or F-term designation, where F-terms have been developed, if assigned, specify each designation, left justified, within an eighteen position alpha numeric field - rep, to a maximum of ten classification designations):

(vii) PRIOR APPLICATION DATA (prior domestic, foreign priority or international application data, if applicable - M/rep):

(A) APPLICATION NUMBER (application number; specify as two letter country code and an eight digit application number; or if a PCT application, specify as

the letters PCT, a slash, a two letter code indicating the Receiving Office, a two digit indication of the year, a slash and a five digit number):

(B) FILING DATE (document filing date, specify as dd-MMM-YYYY):

(viii) ATTORNEY/AGENT INFORMATION (O):

(A) NAME (attorney/agent name; SURNAME comma OTHER NAMES and/or INITIALS):

(B) REGISTRATION NUMBER (attorney/agent registration number):

(C) REFERENCE/DOCKET NUMBER (attorney/agent reference or docket number):

(ix) TELECOMMUNICATION INFORMATION (O):

(A) TELEPHONE (telephone number of applicant or attorney/agent):

(B) TELEFAX (telefax number of applicant or attorney/agent):

(C) TELEX (telex number of applicant or attorney/agent):

(2) INFORMATION FOR SEQ ID NO: X (rep):

(i) SEQUENCE CHARACTERISTICS (M):

(A) LENGTH (sequence length, expressed as number of base pairs or amino acid residues):

(B) TYPE (sequence type, i.e., whether nucleic acid or amino acid):

(C) STRANDEDNESS (if nucleic acid, number of strands of source organism molecule, i.e., whether single stranded, double stranded, both or unknown to applicant):

(D) TOPOLOGY (whether source organism molecule is circular, linear, both or unknown to applicant)

(ii) MOLECULE TYPE (type of molecule sequenced in SEQ ID NO:X (at least one of the following should be included with subheadings, if any, in Sequence Listing - R):

- Genomic RNA;
- Genomic DNA;
- mRNA
- tRNA;
- rRNA;
- snRNA;
- scRNA;
- preRNA;
- cDNA to genomic RNA;
- cDNA to mRNA;
- cDNA to tRNA;
- cDNA to rRNA;
- cDNA to snRNA;
- cDNA to scRNA;
- Other nucleic acid;

(A) DESCRIPTION (four lines maximum):

- protein and
- peptide.

(iii) HYPOTHETICAL (yes/no - R):

(iv) ANTI-SENSE (yes/no - R):

(v) FRAGMENT TYPE (for proteins and peptides only, at least one of the following should be included in the Sequence Listing - R):

- N-terminal fragment;
- C-terminal fragment and
- internal fragment.

(vi) ORIGINAL SOURCE (original source of molecule sequenced in SEQ ID NO:X - R):

(A) ORGANISM (scientific name of source organism):

(B) STRAIN:

(C) INDIVIDUAL ISOLATE (name/number of individual/isolate):

(D) DEVELOPMENTAL STAGE (give developmental stage of source organism and indicate whether derived from germ-line or rearranged developmental pattern):

(E) HAPLOTYPE:

(F) TISSUE TYPE:

(G) CELL TYPE:

(H) CELL LINE:

(I) ORGANELLE:

(vii) IMMEDIATE SOURCE (immediate experimental source of the sequence in SEQ ID NO:X - R):

(A) LIBRARY (library -type, name):

(B) CLONE (clone(s)):

(viii) POSITION IN GENOME (position of sequence in SEQ ID NO:X in genome - R):

(A) CHROMOSOME/SEGMENT (chromosome/segment - name/number):

(B) MAP POSITION:

(C) UNITS (units for map position, i.e., whether units are genome percent, nucleotide number or other/specify):

(ix) FEATURE (description of points of biological significance in the sequence in SEQ ID NO:X - R/rep):

(A) NAME/KEY (provide appropriate identifier for feature - four lines maximum):

(B) LOCATION (specify location according to syntax of DDBJ/EMBL/GenBank Feature Tables Definition, including whether feature is on complement of presented sequence; where appropriate state number of first and last bases/amino acids in feature - four lines maximum):

(C) IDENTIFICATION METHOD (method by which the feature was identified, i.e., by experiment, by similarity with known sequence or to an established consensus sequence, or by similarity to some other pattern - four lines maximum):

(D) OTHER INFORMATION (include information on phenotype conferred, biological activity of sequence or its product, macromolecules which bind to sequence or its product, or other relevant information - four lines maximum):

(x) PUBLICATION INFORMATION (Repeat section for each relevant publication - O/rep):

(A) AUTHORS (maximum of first ten named authors of publication; specify one name per line: SURNAME comma OTHER NAMES and/or INITIALS - rep):

(B) TITLE (title of publication):

(C) JOURNAL (journal name in which data published):

(D) VOLUME (journal volume in which data published):

(E) ISSUE (journal issue number in which data published):

(F) PAGES (journal page numbers in which data published):

(G) DATE (journal date in which data published; specify as dd-MMM-yyyy, MMM-YYYY or Season-YYYY):

(H) DOCUMENT NUMBER (document number, for patent type citations only; specify as two letter country code, eight digit document number (right justified), one letter and, as appropriate, one number or a space as a document type code; or if a PCT application, specify as the letters PCT, a slash, a two digit indication of the year, a slash and a five digit number; or if a PCT publication, specify as the two letters WO, a two digit indication of the year, a slash and a five digit publication number):

(I) FILING DATE (document filing date, for patent-type citations only; specify as dd-MMM-yyyy):

(J) PUBLICATION DATE (document publication date; for patent-type citations only, specify as dd-MMM-yyyy):

(K) RELEVANT RESIDUES In SEQ ID NO:X (rep): FROM (position) TO (position)

(xi) SEQUENCE DESCRIPTION: SEQ ID NO:X:

§ 1.824 Form and format for nucleotide and/or amino acid sequence submissions In computer readable form.

(a) The computer readable form required by § 1.821(e) shall contain a printable copy of the "Sequence Listing," as defined in §§ 1.821(c), 1.822 and 1.823, recorded as a single file on either a diskette or a magnetic tape. The computer readable form shall be encoded and formatted such that a printed copy of the "Sequence Listing" may be recreated using the print commands of the computer/operating-system configuration specified in paragraph (f) of this section.

(b) The file in paragraph (a) of this section shall be encoded in a subset of the American Standard Code for Information Interchange (ASCII). This subset shall consist of all the printable ASCII characters including the ASCII space character plus line-termination, pagination and end-of-file characters associated

with the computer/operating-system configurations specified in paragraph (f) of this section. No other characters shall be allowed.

(c) The computer readable form may be created by any means, such as word processors, nucleotide/amino acid sequence editors or other custom computer programs; however, it shall be readable by one of the computer/operating-system configurations specified in paragraph (f) of this section, and shall conform to the specifications in paragraphs (a) and (b) of this section.

(d) The entire printable copy of the "Sequence Listing" shall be contained within one file on a single diskette or magnetic tape unless it is shown to the satisfaction of the Commissioner that it is not practical or possible to submit the entire printable copy of the "Sequence Listing" within one file on a single diskette or magnetic tape.

(e) The submitted diskette or tape shall be write-protected such as by covering or uncovering diskette holes, removing diskette write tabs or removing tape write rings.

(f) As set forth in paragraph (c), above, any means may be used to create the computer readable form, as long as the following conditions are satisfied. A submitted diskette shall be readable on one of the computer/operating-system configurations described in paragraphs (1) through (3), below. A submitted tape shall satisfy the format specifications described in paragraph (4), below.

- (1) Computer: IBM PC/XT/AT, IBM PS/2 or compatibles;
Operating system: PC-DOS or MS-DOS (Versions 2.1 or above);
Line Terminator: ASCII Carriage Return plus ASCII Line Feed;
Pagination: ASCII Form Feed or Series of Line Terminators;
End-of-File: ASCII SUB (Ctrl-Z);
Media:
Diskette - 5.25 inch, 360 Kb storage;
Diskette - 5.25 inch, 1.2 Mb storage;
Diskette - 3.50 inch, 720 Kb storage;
Diskette - 3.5 inch, 1.44 Mb storage;
Print Command: PRINT filename.extension;
- (2) Computer: IBM PC/XT/AT, IBM PS/2 or compatibles;
Operating system: Xenix;
Line Terminator: ASCII Carriage Return;
Pagination: ASCII Form Feed or Series of Line Terminators;
End-of-File: None;
Media:
Diskette - 5.25 inch, 360 Kb storage;
Diskette - 5.25 inch, 1.2 Mb storage;
Diskette - 3.50 inch, 720 Kb storage;
Diskette - 3.5 inch, 1.44 Mb storage;
Print Command: lpr filename;
- (3) Computer: Apple Macintosh;
Operating System: Macintosh;
Macintosh File Type: text with line termination
Line Terminator: Pre-defined by text type file;
Pagination: Pre-defined by text type file;
End-of-file: Pre-defined by text type file;
Media:
Diskette - 3.50 inch, 400 Kb storage;
Diskette - 3.50 inch, 800 Kb storage;
Diskette - 3.50 inch, 1.4 Mb storage;
Print Command: Use PRINT command from any Macintosh Application that processes text files, such as MacWrite or TeachText;
- (4) Magnetic tape: 0.5 inch, up to 2400 feet;
Density: 1600 or 6250 bits per inch, 9 track;

Format: raw, unblocked;
Line Terminator: ASCII Carriage Return plus optional ASCII Line Feed;
Pagination: ASCII Form Feed or Series of Line Terminators;
Print Command (Unix shell version given here as sample response - mt/dev/rmt0;lpr<dev/r mt0):

(g) Computer readable forms that are submitted to the Office will not be returned to the applicant.

(h) All computer readable forms shall have a label permanently affixed thereto on which has been hand printed or typed, a description of the format of the computer readable form as well as the name of the applicant, the title of the invention, the date on which the data were recorded on the computer readable form and the name and type of computer and operating system which generated the files on the computer readable form. If all of this information can not be printed on a label affixed to the computer readable form, by reason of size or otherwise, the label shall include the name of the applicant and the title of the invention and a reference number, and the additional information may be provided on a container for the computer readable form with the name of the applicant, the title of the invention, the reference number and the additional information affixed to the container. If the computer readable form is submitted after the date of filing under 35 U.S.C. 111, after the date of entry in the national stage under 35 U.S.C. 371 or after the time of filing, in the United States Receiving Office, an international application under the PCT, the labels mentioned herein must also include the date of the application and the application number, including series code and serial number.

§ 1.825 Amendments to or replacement of sequence listing and computer readable copy thereof.

(a) Any amendment to the paper copy of the "Sequence Listing" (§ 1.821(c)) must be made by the submission of substitute sheets. Amendments must be accompanied by a statement that indicates support for the amendment in the application, as filed, and a statement that the substitute sheets include no new matter. Such a statement must be a verified statement if made by a person not registered to practice before the Office.

(b) Any amendment to the paper copy of the "Sequence Listing," in accordance with paragraph (a) of this section, must be accompanied by a substitute copy of the computer readable form (§ 1.821(e)) including all previously submitted data with the amendment incorporated therein, accompanied by a statement that the copy in computer readable form is the same as the substitute copy of the "Sequence Listing." Such a statement must be a verified statement if made by a person not registered to practice before the Office.

(c) Any appropriate amendments to the "Sequence Listing" in a patent, e.g., by reason of reissue or certificate of correction, must comply with the requirements of paragraphs (a) and (b) of this section.

(d) If, upon receipt, the computer readable form is found to be damaged or unreadable, applicant must provide, within such time as set by the Commissioner, a substitute copy of the data in computer readable form accompanied by a statement that the substitute data is identical to that originally filed. Such a statement must be a verified statement if made by a person not registered to practice before the Office.

and Trademarks

APPENDIX I

SAMPLE SEQUENCE LISTING

(1) GENERAL INFORMATION:

- (i) **APPLICANT:** Doe, Joan X.
Doe, John Q.
- (ii) **TITLE OF INVENTION:** Isolation and Characterization of a Gene Encoding a Protease from *Paramecium* sp.
- (iii) **NUMBER OF SEQUENCES:** 2
- (iv) **CORRESPONDENCE ADDRESS:**
 - (A) **ADDRESSEE:** Smith and Jones
 - (B) **STREET:** 123 Main Street
 - (C) **CITY:** Smalltown
 - (D) **STATE:** Anystate
 - (E) **COUNTRY:** USA
 - (F) **ZIP:** 12345
- (v) **COMPUTER READABLE FORM:**
 - (A) **MEDIUM TYPE:** Diskette, 3.50 inch, 800 Kb storage
 - (B) **COMPUTER:** Apple Macintosh
 - (C) **OPERATING SYSTEM:** Macintosh 5.0
 - (D) **SOFTWARE:** MacWrite
- (vi) **CURRENT APPLICATION DATA:**
 - (A) **APPLICATION NUMBER:** 09/999,999
 - (B) **FILING DATE:** 28-FEB-1989
 - (C) **CLASSIFICATION:** 999/99
- (vii) **PRIOR APPLICATION DATA:**
 - (A) **APPLICATION NUMBER:** PCT/US88/99999
 - (B) **FILING DATE:** 01-MAR-1988
- (viii) **ATTORNEY/AGENT INFORMATION:**
 - (A) **NAME:** Smith, John A.
 - (B) **REGISTRATION NUMBER:** 00001
 - (C) **REFERENCE/DOCKET NUMBER:** 01-0001
- (ix) **TELECOMMUNICATION INFORMATION:**
 - (A) **TELEPHONE:** (909)999-0001
 - (B) **TELEFAX:** (909)999-0002

(2) INFORMATION FOR SEQ ID NO:1:

- (i) **SEQUENCE CHARACTERISTICS:**
 - (A) **LENGTH:** 954 base pairs
 - (B) **TYPE:** nucleic acid
 - (C) **STRANDEDNESS:** single
 - (D) **TOPOLOGY:** linear
- (ii) **MOLECULE TYPE:** genomic DNA
- (iii) **HYPOTHETICAL:** yes
- (iv) **ANTI-SENSE:** no
- (vi) **ORIGINAL SOURCE:**
 - (A) **ORGANISM:** *Paramecium* sp
 - (C) **INDIVIDUAL/ISOLATE:** XYZ2
 - (G) **CELL TYPE:** unicellular organism
- (iv) **IMMEDIATE SOURCE:**
 - (A) **LIBRARY:** genomic
 - (B) **CLONE:** Para-XYZ2/36
- (x) **PUBLICATION INFORMATION:**
 - (A) **AUTHORS:** Doe, Joan X.
Doe, Joan Q.
 - (B) **TITLE:** Isolation and Characterization of a Gene Encoding a Protease from *Paramecium* sp.
 - (C) **JOURNAL:** Fictional Genes

(86) Availability of PatentIn Computer Program and Policy Regarding Enforcement of the Requirements for Patent Applications Containing Nucleotide Sequence and/or Amino Acid Sequence Disclosure

The Patent and Trademark Office (PTO) has developed a computer program, called PatentIn, that will facilitate compliance with the Requirements for Patent Applications Containing Nucleotide Sequence and/or Amino Acid Sequence Disclosures (sequence rules: 37 CFR §§ 1.821 through 1.825). (Final rules were published in the *Federal Register*, 55 Fed. Reg. 18230 (May 1, 1990), and in the *Official Gazette*, 1114 O.G. 29 (May 15, 1990).)

The PatentIn program is now available. The program is only available for IBM PC XT, AT, PS/2 and compatible systems, having hard disk drives. Installation of PatentIn on a hard disk requires a minimum of 1.2 megabytes free disk space. The program further requires a PC with 550 kilobytes free in RAM (random access memory). The program is available on 3 1/2" or 5 1/4" diskettes. While the PatentIn program is not intended to be the sole means for complying with the sequence rules, it should be noted that it was designed to facilitate compliance with all of the mandatory and optional requirements of the rules.

The PTO did not receive the final version of the PatentIn program until after the effective date of the sequence rules. In view of this delay, the PTO has delayed sending notices to comply with the sequence rules in those applications filed that have not attempted to comply with the rules. Although the effective date of the sequence rules remains Oct. 1, 1990, and all applications filed on or thereafter must eventually comply with the rules, a grace period with respect to enforcement of the rules for most applications will be in effect until Feb. 15, 1991. At that time, notices to comply will be mailed in all applications, containing nucleotide sequence and/or amino acid sequence disclosures filed on or after Oct. 1, 1990, that have not complied or do not comply with the rules.

Requests for copies of the PatentIn program and associated materials should be made in writing, addressed to the Commissioner of Patent and Trademarks, Washington, D.C. 20231, Attention: Lois E. Boland; Special Program Examiner, Office of the Assistant Commissioner for Patents-Crystal Park 2, Ste. 919. Request should include a check for \$480.00 or the requisite authorization to charge a PTO Deposit Account. If Applicable, requests should also specify diskette size. Any questions about the sequence rules or this notice should be directed to Lois E. Boland, by telephone, at (703) 557-8384.

Dec. 19, 1990

HARRY F. MANBECK, Jr.
*Assistant Secretary and Commissioner
of Patents and Trademarks*

[1122 OG 620]

(87) Examination of Claims For Patentability Under 35 U.S.C. 103

The purpose of this notice is to inform the public of the current Patent and Trademark Office policy concerning determinations of obviousness under 35 U.S.C. 103 in view of the recent Supreme Court decision in *Sakraida v. Ag Pro*, 189 USPQ 449 (1976).

The following text is a copy of a memorandum issued to all patent examining personnel relative to this topic. "A clarification of the policy of the Patent and Trademark Office in the examination of claims for patentability under 35 U.S.C. 103 seems in order at this time in view of the Supreme Court's decision in *Sakraida v. Ag Pro*, 189 USPQ 449 (decided April 20, 1976) which is similar to the Court's earlier decision in *Anderson's-Black Rock, Inc. v. Pavement Salvage Co.*, 163 USPQ 673 (decided December 8, 1969). "Office policy has consistently been to follow *Graham v. John Deere Co.*, 148 USPQ 4559 (decided February 21, 1966) in the consideration and determination of obviousness under 35 U.S.C. 103. The three factual inquiries enunciated therein as a background for determining obviousness are as follows:

1. Determination of the scope and content of the prior art;

2. Ascertaining the differences between the prior art and the claims in issue; and
3. Resolving the level of ordinary skill in the pertinent art.

"Attention is directed to MPEP Section 706 for a more complete discussion of the application of the Graham test. "The Supreme Court reaffirmed and relied upon the Graham three-pronged test in its consideration and determination of obviousness in the fact situations presented in both the *Ag Pro* and *Black Rock* decisions. In each case, the Court went on to discuss whether the claimed combinations produced a 'new or different function' and a 'synergistic result,' but clearly decided whether the claimed inventions were unobvious on the basis of the three-way test in *Graham*. Nowhere in its decisions in those cases does the Court state that the 'new or different function' and 'synergistic result' tests supersede a finding of unobviousness or obviousness under the *Graham* test. "Accordingly, examiners should continue to apply the test for patentability under 35 U.S.C. 103 set forth in *Graham*. It should be noted that the Supreme Court's application of the *Graham* test to the fact circumstances in *Ag Pro* is somewhat stringent, as it was in *Black Rock*."

C. MARSHALL DANN,
*Commissioner of Patents
& Trademarks.*

July 8, 1976.

[949 O.G. 3]

(88) Translations of Foreign Language References

Frequently, Office actions cite references that are in a foreign language. In the event a translation of the entire text or portion of the text of the reference is readily available in the examiners' search files, a copy of the translation will normally be included with the Office action. However, applicants are cautioned that the inclusion of a translation with a foreign language reference should not be construed to mean that the examiner used or relied on the translation, or that it is accurate or an official translation made by the Patent and Trademark Office.

While this service may be infrequent, it could be increased by the submission of translations by the applicant to the Office. Accordingly, it is requested that translations of foreign language references be transmitted to the Office, and in particular be transmitted with the response to the Office action or in a separate envelope addressed to: Commissioner of Patents and Trademarks, Washington, D.C. 20231. In addition, it would be of great assistance to the Office in filing the translation, if the translation carried the following: 1. an identification of the foreign language reference and, where possible, 2. its location in the examiners' search files (e.g. location should be known if reference was cited in Office action). If identifying information is not available, the incoming translation should carry the name "Scientific Library" thereon so that it can be processed by the Library.

Oct. 26, 1977.

WILLIAM FELDMAN,
*Deputy Assistant Commissioner
for Patents.*

[964 O.G. 24]

(89) Restriction Between Inventions

The practice set out in the notice of June 20, 1968 (852 O.G. 509) is hereby revised as follows.

Under the statute an application may properly be required to be restricted to one of two or more claimed inventions only if they are able to support separate patents and they are either independent or distinct.

If it is demonstrated that two or more claimed inventions have no disclosed relationship ("independent"), restriction should be required, and it is not necessary to further show that the claimed inventions are distinct. If it is demonstrated that two or more claimed inventions have a disclosed relationship ("dependent"), then a showing of distinctness is required to substantiate a restriction requirement.

Where inventions are neither independent nor distinct, one from the other, or they are not sufficiently different to support more than one patent, their joinder in a single application must be permitted.

Every requirement to restrict has two aspects, (1) the reasons (as distinguished from the mere statement of conclusion) why the inventions *as claimed* are either independent or distinct, and (2) the reasons for insisting upon restriction therebetween.

In order to support a requirement to restrict between combination and subcombination inventions, two-way distinctness must be demonstrated.

If it can be shown that a combination, as claimed (1) does not require the particulars of the subcombination as claimed for patentability, and (2) the subcombination can be shown to have utility either by itself or in other and different relations, the inventions are distinct. When these factors cannot be shown, such inventions are not distinct.

Two or more claimed subcombinations, disclosed as usable together in a single combination, and which can be shown to be separately usable, are usually distinct from each other.

In applications claiming inventions in different statutory categories only one-way distinctness is needed to support a restriction requirement. For example, in applications containing claims to both process and apparatus, distinctness may be shown if (1) the process as claimed can be practiced by hand or by another materially different apparatus, or (2) the apparatus as claimed can be used to practice another and materially different process.

As in the notice of May 1, 1974 concerning Markush-Type claims (922 O.G. 1016), if the search and examination of an entire application can be made without serious burden, the examiner is encouraged to examine it on the merits, even though it includes claims to distinct or independent inventions.

WILLIAM FELDMAN,
*Deputy Assistant Commissioner
for Patents.*

Apr. 9, 1975.

[934 O.G. 450]

(90) Restriction Policy and Practice

The purpose of this notice is to inform the public of the results of the survey that was conducted on restriction requirements made under 35 U.S.C. 121 in the Patent Examining Groups and to report clarifications that have been implemented as a result of a review of restriction policy and practice.

The survey involved about 320 patent applications in which a restriction only Office action had been prepared by an examiner in the period between July—Sept. 1983. The selection of applications was proportioned among Groups according to the volume of restriction requirements during the period. The statistics collected (Appendix A) and the definitions (Appendix B) for each item on the survey form are provided at the end of this notice.

Some of the significant findings of the survey include:

- 19% (61/320) of the requirements surveyed were not reasonable based on a review of the record
- 35% (88/249) of the requirements surveyed (not involving an election of species) were not supported by any reasons, or contained reasons which were clearly inapplicable to the facts
- 41% (53/128) of the actions following an election and traverse did not address the arguments contained in the traverse
- 91% (48/53) of a sample of 53 applications surveyed—the attorney or agent of record had no record of receiving a telephone call requesting an oral election

In response to the results of this survey, existing guidelines in Chapter 800 of the Manual of Patent Examining Procedure (MPEP) have been reviewed with each examiner and supervisor in the Patent Examining Corps in order to promote uniformity of practice and compliance with existing guidelines. A follow-up survey will be conducted in early 1985. In addition, as a result of a review of our existing policy and guidelines, the following clarifications have been made:

- (1) Telephone Practice (MPEP 812.01)
Except in those cases where the requirement for restriction is complex, the application is being prosecuted by the applicant pro se, or the examiner knows from past experience that an election will not be made by phone, the examiner should make a telephone call to the attorney or agent of record and request an oral election in accordance with MPEP 812.01, first paragraph.

If an election cannot, or will not, be made orally at the time of the call or within a reasonable time thereafter, generally three working days, the Office action requiring the election in writing should contain the following sentence

"A telephone call was made to (name of attorney or agent) on (date) to request an oral election to the above restriction requirement, but did not result in an election being made."

- (2) Multiple Inventions In A Continuing Application
Where claims to multiple inventions within the meaning of 35 U.S.C. 121 are presented in a continuing application (continuation, division, continuation-in-part including those which may be filed under 37 CFR 1.60 or 1.62), the examiner should make (or repeat) an appropriate requirement for restriction and require an election by the applicant UNLESS

(1) the applicant acknowledges the previous requirement in the parent application and clearly indicates which invention is to be prosecuted if the requirement is repeated. The examiner should make any proper requirement for restriction in the first Office action, state how applicant has indicated an election (e.g. statement in a preliminary amendment or transmittal letter), and include an action on the merits on the claims of the elected invention;

or

- (2) The application is a continuation, but not a division or CIP filed as a File Wrapper Continuation (FWC) under 37 CFR 1.62. The examiner should assume that the requirement and election made in the parent application carries over unless otherwise indicated by applicant. The examiner's first action should include a repetition of the restriction requirement made in the parent application to the extent it is still applicable in the continuation and an indication that prosecution is being continued on the invention elected and prosecuted by applicant in the parent application.

The policy and practice of making requirements final and seeking review by way of petition (37 CFR 1.144) remains unchanged in a continuing application, whether a requirement for election was first made in the parent and renewed in the continuation application or was made for the first time in the continuation application.

- (3) Product, Process of Making, Process of Using (MPEP 806.05(i))
Practice in this situation is being amended to conform to Rule 13.2(i) of the Patent Cooperation Treaty (PCT) so that a three way requirement can be required only where the process of making is not "specially adapted" to make the product (i.e. the requirements of MPEP 806.05(f) are met). Otherwise, the process of using must be joined with the claims directed to the product and the process of making the product even though a showing of distinctness between the product and process of using the product (MPEP 806.05(h)) could be made. A determination of the patentability of the product need not be made prior to making a requirement for restriction.

The Manual of Patent Examining Procedure will be revised to reflect these clarifications in the next revision.

GERALD MOSSINGHOFF,
*Commissioner of Patents
and Trademarks.*

Aug. 1, 1984.

[1046 O.G. 2]

(91) Restriction Practice Survey II

This notice is intended to inform the public of the results of a follow-up survey of applications containing a written restriction requirement. The results of the first survey were

reported in the *Official Gazette* on Sept. 4, 1984 (1046 OG 2; Restriction Policy and Practice). Survey II involved 319 applications selected at random in the Patent Examining Groups from those in which a restriction only action had been credited to an examiner in the period of July—Sept. 1984. This period was after the Corps Management Meeting on June 5, 1984 in which restriction policy and practice were reviewed with all SPEs and Directors, and followed the distribution of review materials to all examiners. The results of Survey II showed significant improvements over the results of Survey I, but the results were still not considered satisfactory in several aspects.

Survey Procedure: The selection of applications was generally proportioned among the Groups to correspond to the relative proportion of restriction only actions that were completed in each Group in the last quarter of FY 84. A minimum of ten applications were surveyed from each Group. The distribution was as follows:

110-16	210-11	310-10
120-37	220-10	320-18
130-33	230-10	330-24
150-47	240-30	340-30
	250-13	350-20
	260-10	

TOTALS	133	84	102
--------	-----	----	-----

The survey team consisted of the same people who conducted the first survey. One person from the survey team reviewed each selected application file and completed the survey form regarding the restriction requirement(s) in the file. The same survey form was used in each survey.

In the event an application file could not be located or was not readily available, a different application was selected for the survey. In general, the substitute application was selected from those requirements completed by the same examiner assigned to the original application.

The survey did not include any design applications.

Survey Results: Statistical results of the survey are set forth on the survey form used in the Appendix including summaries on a Corps and discipline level. References in this notice to "Item" refer to the numbered items indicated on the survey form. These results indicate an improvement in all areas as which were identified as acute problems in the first survey. We did not do a telephone survey to determine whether applicant's representative had been called prior to writing the requirement.

In addition to the survey, the statistics on restriction requirements before and after the training effort following the first survey are of interest. Statistics show that the number of restriction only actions has decreased 36% Corps-wide (52% in Group 120 which had the highest volume in the first survey) following our training effort. These statistics are shown below.

Quarter	Total First Actions	Total Corps Restriction Requirements	Group 120 Restriction Requirements
Apr-Jun 1984	32,035	2,771	514
Jul-Sep 1984	32,216	1,939	220
Oct-Dec 1984	28,158	1,522	212
	(32,358)*	(1,775)*	(247)*
Oct-Dec vs Apr-Jun		—36%	—52%.

*Figures adjusted (7/6 of actual) to reflect a 7 pay period quarter for comparison with the Apr.- June and July- Sept. quarters which included 7 pay periods.

In addition, 24% of the applications in the second survey contained a specific reference to a telephone call that was made by the examiner, but did not result in an election being made. It was also apparent that some of the requirements were sufficiently complex to warrant a written communication.

The applications reviewed in the second survey resulted in the conclusion that 9% of the requirements that were made were not reasonable on the record that was reviewed (Item 10 -30/319). This compares to 19% (61/320) in the first survey. Of the 30 cases in which a conclusion of unreasonableness was made,

the requirement was traversed in 22 (73%) of those cases, not traversed in 7 cases (23%), and no response was filed in 1 case. In the 22 cases where the unreasonable requirement was traversed, the requirement was withdrawn in 10 cases, not withdrawn in 8 cases, and no subsequent action had been made in 4 cases. In the first survey, 11 unreasonable requirements were withdrawn out of 61 made. The survey form on each of the unreasonable requirements in the second survey was returned and discussed with the Group Director.

In our opinion, the reasons provided by the examiner for insisting upon restriction were not proper (either non-existent or based on the wrong criteria) in 18% (Item 5j-57/319) of the applications surveyed—compared to 35% in the first survey. In many of these cases, the reviewer determined that the requirement was justified, but for reasons which the examiner did not set forth in the requirement.

Our second survey revealed that applicant had traversed the requirements in 134 cases (Item 7c), and that where the examiner had given another action in those cases (Item 8-98), the reasons in the traverse had not been responded to in 30% (Item 8b-30/98) of the cases. This represents a very modest improvement of the results in the first survey where 41% (53/128) had not responded to the arguments presented in applicants traverse.

In addition to the statistical results, the survey team met to discuss some of the problems observed during the survey. Several members of the team again observed that problems were more likely to arise where complex requirements involving a large number of claims and/or inventions are encountered, and where the claim schedule required the application of combination—sub-combination criteria to show patentable distinctness (MPEP 806.05c—two-way distinctness). Where three or more inventions are presented in a single application, it was observed that the examiner rarely showed distinctness among all of the combinations of groups (e.g. I-II, II-III, I-III). Another observation that was frequently made was that many of the problems with incomplete requirements could have been avoided by the use of the form paragraphs and associated instructions.

Further Action: While the second survey indicated that significant improvements have been realized in our pursuit of uniformity in restriction practice, we have not achieved an acceptable level of performance in several areas. The same types of problems predominated in each survey, but are now at a reduced level. There is clearly a continuing need for supervisory review.

Supervisors will take the opportunity to emphasize the following points to examiners in their Art Units:

- (1) Use of telephone when appropriate to minimize pendency time;
- (2) Reasons to support the requirement (to satisfy the criteria for independence of patentable distinctness) and reasons for insisting upon restriction should be given in each written requirement. Mere conclusions are not sufficient;
- (3) The substance of arguments contained in applicant's traverse should be responded to in the Office action following the traverse;
- (4) A showing of two-way distinctness is required in situations where combination-subcombination criteria are applicable (MPEP 806.05c); and
- (5) Use of appropriate form paragraphs should be encouraged.

In addition, each Group will review all restriction requirements made in the Group in a pay period at least once every six months.

Finally, review of restriction practice will not be made a component part of the Quality Review Program on an ongoing basis because of the desirability of identifying problems of this type before prosecution is over and the desirability of maintaining their focus on substantive issues. Of course, the Quality Review Staff will continue to bring problems with restriction requirements to the attention of the Director when they are encountered in the course of their review procedures.

DONALD J. QUIGG,
Acting Commissioner of Patents
and Trademarks.

(92) Revised Practice Re Markush-Type Claims

This notice deals with Markush-type generic claims which include a plurality of alternatively usable substances or members. In most cases, a recitation by enumeration is used because there is no appropriate or true generic language. In many cases, the Markush-type claims include independent and distinct inventions. This is true where two or more of the members are so unrelated and diverse that a prior art reference anticipating the claim with respect to one of the members would not render the claim obvious under 35 U.S.C. 103 with respect to the other member(s).

In applications containing claims of that nature, the Examiner may require a provisional election of a single species prior to examination on the merits. The provisional election will be given effect in the event that the Markush-type claim will be examined fully with respect to the elected species and further to the extent necessary to determine patentability. Should the Markush-type claim be found not allowable, examination will be limited to the Markush-type claim and claims to the elected species, with claims drawn to species patentably distinct from the elected species held withdrawn from further consideration.

As an example, in the case of an application with a Markush-type claim drawn to the compound C-R, wherein R is a radical selected from the group consisting of A, B, C, D, and E, the Examiner may require a provisional election of a single species, CA, CB, CC, CD, or CE. The Markush-type claim would then be examined fully with respect to the elected species and any species considered to be clearly unpatentable over the elected species. If on examination the elected species is found to be anticipated or rendered obvious by prior art, the Markush-type claim and claims to the elected species shall be rejected, and claims to the non-elected species would be held withdrawn from further consideration. As in the prevailing practice, a second action on the rejected claims would be made final.

On the other hand, should no prior art be found that anticipates or renders obvious the elected species, the search of the Markush-type claim will be extended. If prior art is then found that anticipates or renders obvious the Markush-type claim with respect to a *non-elected species*, the Markush-type claim shall be rejected and claim to the non-elected species held withdrawn from further consideration. The prior art search, however, will not be extended unnecessarily to cover all non-elected species. Should applicant, in response to this rejection of the Markush-type claim, overcome the rejection, as by amending the Markush-type claim to exclude the species anticipated or rendered obvious by the prior art, the amended Markush-type claim will be re-examined. The prior art search will be extended to the extent necessary to determine patentability of the Markush-type claim. In the event prior art is found during the re-examination that anticipates or renders obvious the amended Markush-type claim, the claim will be rejected and the action made final. Amendments submitted after the final rejection further restricting the scope of the claim will not be entered.

If the members of the Markush group are sufficiently few in number or so closely related that a search and examination of the entire claim can be made without serious burden, the Examiner is encouraged to examine all claims on the merits, even though they are directed to independent and distinct inventions. In such a case, the Examiner will not follow the above procedure and will not require restriction.

This notice supersedes the practice set out in 922 O.G. 1016, dated May 1, 1974.

Although the above practice is now in effect, a rule change proposal is also being considered to provide for prosecution of multiple inventions in a single patent application by submission of additional fees.

DONALD W. BANNER,
*Commissioner of Patents
and Trademarks.*

Oct. 23, 1978.

[976 O.G. 128]

The purpose of this notice is to set forth procedural guidelines for deciding questions of unity of invention which may arise in international applications when searched by the United States Patent and Trademark Office (USPTO) as an International Searching Authority and when examined during the national phase in the United States as a Designated Office after entry under 35 U.S.C. 371 in connection with the Patent Cooperation Treaty (PCT).

The May 28, 1986, decision in *Caterpillar Tractor Co. v. Commissioner of Patents and Trademarks*, Civil Action No. 84-1212-A, (E.D. Va.) held the Patent and Trademark office interpretation of 37 CFR 1.141(b)(2) as applied to unity of invention determinations in international applications was not in accordance with the Patent Cooperation Treaty and its implementing legislation. In the Caterpillar international application, the USPTO, when acting as an International Searching Authority, held lack of unity of invention between a set of claims directed to a process for forming a sprocket and a set of claims drawn to an apparatus (die) for forging such a sprocket. The court stated that it was an unreasonable interpretation to say that the expression "specifically designed" as found in PCT Rule 13.2(ii) means that the process and apparatus can only be used with each other as set forth in the Manual of Patent Examining Procedure (MPEP) § 806.05(e).

Therefore, in considering international applications as an International Searching Authority and during the national phase as a Designated Office under 35 U.S.C. 371, PCT Rule 13.1 and 13.2 as interpreted in *Caterpillar* will be followed when considering unity of invention of claims of different categories without regard to 37 CFR 1.141. No change is being made in the restriction practice under 37 CFR 1.141(b) and (c) in United States national applications filed under 35 U.S.C. 111 outside the PCT. No change in practice is being made in regard to claims of the same category of invention either in PCT or U.S. national applications. Such a change in U.S. national restriction practices would require a statutory change in the fee levels to cover the additional examining effort required in individual patent applications.

PCT Rules 13.1 and 13.2 are reproduced below:

PCT RULE 13
Unity of Invention

13.1 Requirement

The international application shall relate to one invention only or to a group of inventions so linked as to form a single general inventive concept ("requirement of unity of invention").

13.2 Claims of Different Categories

Rule 13.1 shall be construed as permitting, in particular, one of the following three possibilities:

(i) in addition to an independent claim for a given product, the inclusion in the same international application of an independent claim for a process specially adapted for the manufacture of the said product, and the inclusion in the same international application of an independent claim for a use of the said product, or

(ii) in addition to an independent claim for a given process, the inclusion in the same international application of an independent claim for an apparatus or means specifically designed for carrying out the said process, or

(iii) in addition to an independent claim for a given product, the inclusion in the same international application of an independent claim for a process specially adapted for the manufacture of the product, and the inclusion in the same international application of an independent claim for an apparatus or means specifically designed for carrying out the process.

PCT Rule 13 only will be applied in the restriction practice used in national phase applications entered under 35 U.S.C. 371 because 35 U.S.C. 372(b)(2) provides that "The Commissioner may cause the question of unity of invention to be reexamined under section 121 of this title, within the scope of the requirements of the treaty and the Regulations".

Guidelines As to Implementation of Revised Unity of Invention Practice in International Applications and National Phase Applications Entered Under 35 U.S.C. 371

(93) Unity of Invention Practice in International Applications and National Phase Applications Entered Under 35 U.S.C. 371

(1) The revised practice for international and national phase applications will *not* be used for national applications filed under 35 U.S.C. 111.

(2) The revised practice will *not* affect the treatment of the claims of any applications (national or international) where the question of lack of unity of invention relates to other than different categories of invention issues. Therefore, restriction and unity of invention practice involving, for example, Markush type claims, genus-species, intermediate-final product or combination-subcombination situations are *not* affected for any applications by this notice.

(3) The expression "and as set forth in §§ 1.141" in 37 CFR 1.481(a) will no longer be considered operative in view of the decision in *Caterpillar Tractor Co.*, supra. The criteria of § 1.141 continue to be applicable to U.S. national applications filed under 35 U.S.C. 111 as they were in effect prior to the Caterpillar decision and essentially the same as the practice which was in effect for many years prior to the PCT implementation. That is, practice will continue as set forth in MPEP Chapter 800 as modified in 1046 OG 2 for the practice relating to product, process of making and process of using. The practice in this latter situation is that a three way requirement for restriction can only be required where the process of making is distinct from the product (i.e., the requirements of MPEP 806.05(f) are met). Otherwise, the process of using must be joined with the claims directed to the product and the process of making the product even though a showing of distinctness between the product and process of using the product (MPEP 806.05(h)) could be made. A determination of the patentability of the product need not be made prior to making a requirement for restriction.

(4) The criteria of PCT Rule 13 will be applied when determining unity of invention of claims to different categories of invention in considering international applications as an International Searching Authority and during the national phase as a Designated Office under 35 U.S.C. 371.

(5) The revised practice will apply to all international applications before the PTO as an International Searching Authority in which no search report has been issued and in all pending national stage applications entered under 35 U.S.C. 371 in which a holding of lack of unity of invention (requirement for restriction) has not been made final by the examiner or acquiesced in by the applicant as of the date of this notice.

(6) In applying PCT Rule 13 to international applications as an International Searching Authority and to national phase applications under 35 U.S.C. 371, examiners will consider for unity of invention all of the claims to different categories of invention in the application and will permit retention in the same application for searching and/or examination, of claims to the categories which meet the requirements of any one of PCT Rule 13.1(i) to (iii).

In view of the court's treatment of the USPTO's distinctness test in *Caterpillar*, the USPTO will also permit in the same international application the following two combinations:

(a) an independent claim for a given product and an independent claim for a process specially adapted for the manufacture of said product.

(b) an independent claim for a given product and an independent claim for a process of using the said product.

If the different categories of claims do not fall within any one of PCT Rule 13.2(i) to (iii) or additional combinations (a) or (b) above, i.e., they claim more or less categories of invention than permitted in any one of PCT Rule 13.2(i) to (iii) or combination (a) or (b) above, unity of invention may not be present. Further, an independent claim for a use in PCT Rule 13.2(i) and combination (b) above is construed as being limited to a claim directed to a process.

In determining unity of invention under PCT Rule 13.2(i) and (iii) and combination (a) above, the examiner will consider the word "specially" which appears before "adapted" to be an emphasis word rather than a limitation. In determining unity of invention under PCT Rule 13.2(ii), the examiner will consider the word "specifically" which appears before "designed" to be an emphasis word rather than a limitation.

Detailed Explanation

Under PCT Rule 13.2, Unity of Invention as to different categories of inventions is covered on the basis of 4 different categories of invention. They are:

- A. a product
- B. a process (for manufacture)
- C. a use of the said product
- D. an apparatus or means for carrying out the process for manufacture.

PCT Rule 13.2 provides for grouping of certain of these different categories of inventions and retaining unity of invention.

i. PCT Rule 13.2(i) provides for grouping claims to:

- A. a product
- B. a process for the manufacture of said product
- C. a use of the said product

ii. PCT Rule 13.2(ii) provides for grouping claims to:

- B. a process (e.g. for the manufacture of a product)
- D. an apparatus or means for carrying out the said process.

iii. PCT Rule 13.2(iii) provides for grouping claims to:

- A. a product
- B. a process for the manufacture of the product
- D. apparatus or means for carrying out the process.

Also permitted by the USPTO are combinations:

- (a) A. a product
B. a process for the manufacture of said product
- (b) A. a product
C. a use of the said product

If an application includes claims to all the categories of invention set forth in any one of PCT Rule 13.2(i), (ii), (iii), combinations (a) or (b) above, and no additional categories of invention are present, unity of invention exists and no additional search fees should be required or restriction requirement made.

For example, if an application contains claims to only a process for the manufacture of a product and claims to a use of a product and no product claims is present, there is lack of unity of invention since the provisions of Rule 13.2(i) do not apply and the process for manufacture of a product is independent of the use of the product since neither is dependent on the other. Also, if claims to all three categories of PCT Rule 13.2(i) are present at the time of the first Office action and all the product claims are canceled in the response to the first Office action, a requirement for restriction could be made, if appropriate, in the second Office action in view of the independent inventions remaining in the application. PCT Rule 13.2(i) would no longer apply since all three categories of claims would no longer be present in the application. However, the fact that claims to a certain category of invention are unpatentable does not affect the question of unity of invention provided the unpatentable claims are retained in the application.

Where claims to a category of invention in addition to those listed in any one of PCT Rule 13.2(i), (ii), (iii) or combinations (a) or (b) above included in an application, unity of invention may be lacking between the claims drawn to the categories set forth in any one of PCT Rule 13.2(i), (ii), (iii) or combinations (a) or (b) above, and the claims to the additional category of invention. For example, if an application contained claims to a process for manufacture, claims to an apparatus or means for carrying out the process and claims to a use of the product manufactured, there could be lack of unity of invention. In such a situation the examiner should group the claims to the process for manufacture and the claims for an apparatus or means for carrying out the process because unity of these two categories exists under PCT Rule 13.2(ii). The claims to the use of the product could be separately grouped if the "use" is shown to be "independent and distinct" of both the "process for manufacture" and the "apparatus or means for carrying out the process" as provided in Chapter 800 of the Manual of Patent Examining Procedure (MPEP).

When the claims presented in an application are directed to several categories of invention so that more than one paragraph of PCT Rule 13.2 and combinations (a) or (b) above applies,

the examiner will inspect the claims to see if the categories of invention set forth in PCT Rule 13.2, paragraphs (i), (iii) and (ii), and then combinations (a) or (b) above are present in the application in that order. For example, if the categories of PCT Rule 13.2(i) are found in the application, the claims to those categories stated in PCT Rule 13.2(i) will be considered as one invention and any claims to different categories of invention will be reviewed to determine if they are "independent and distinct" of all the claims covered in PCT Rule 13.2(i) in accordance with the provisions of Chapter 800 of the MPEP.

Under PCT Rule 13.2 and combinations (a) and (b) above, unity will exist where the claims are limited to one invention in each category of invention recited. For example, under PCT Rule 13.2(i), claims are permitted to one product, one process of manufacturing and one use. If multiple products, processes of manufacture or uses are claimed, the first invention in the category first mentioned in the claims will be considered as the elected invention. The first recited invention of each additional category which is related as described in paragraph 7 below with the first invention as indicated in the previous sentence will be considered elected. Accordingly, for example, if multiple products are claimed, the first recited product is constructively elected and the first recited process, if multiple processes adapted for making and/or using the product are claimed, is also constructively elected. Any such holding by the examiner will be made in the form of a restriction requirement in an application entered in the USPTO under 35 U.S.C. 371. Such a restriction requirement would be made on the basis of criteria set forth in MPEP Chapter 800. Applicant would have the right to traverse such a restriction requirement in the response to the Office action.

(7) The inventions recited by the claims of different categories must be drawn to related rather than independent inventions. For example, the product as claimed in PCT Rule 13.2(i) and combinations (a) and (b) above must be able to be made by the claimed process for manufacture and the use claimed must be able to use the claimed product. Likewise in PCT Rule 13.2(ii), the apparatus as claimed must be able to carry out the claimed process. In PCT Rule 13.2(iii), the claimed process of manufacture must be able to make the claimed product and the claimed apparatus or means must be able to perform the claimed process of manufacture.

(9) Applicants should clearly indicate on all application papers filed for entry under 35 U.S.C. 371 and 37 CFR 1.61 that the filing is being made under 35 U.S.C. 371. Otherwise, the application papers will be treated as having been filed under 35 U.S.C. 111.

(10) Any prior notices or policies relating to unity of invention which are inconsistent herewith are superceded to the extent they are inconsistent with this notice.

Appropriate changes in the Code of Federal Regulations will be proposed in due course to adjust the level of the search fees and national fees of § 1.445 to recover the cost of searching and examining international applications with claims to different categories of invention in a single international application. The fees were originally set based on the unity of invention practice previously in effect.

If necessary, additional guidance for processing applications under PCT Rule 13 will be issued as experience is gained.

DONALD J. QUIGG,

Assistant Secretary and
Commissioner of Patents
and Trademarks.

Aug. 15, 1986.

[1070 OG 11]

(94)

Department of Commerce
Patent and Trademark Office
37 CFR Part 1
[Docket No. 61231-7086]

Unity of Invention and Patent
Cooperation Treaty [Chapter II]

Agency: Patent and Trademark Office, Commerce.
Action: Notice of Final Rulemaking.

Summary: The Patent and Trademark Office hereby amends its regulations (1) to change the practice in handling unity of invention issues in international applications under the Patent Cooperation Treaty (PCT) and those entering the national stage under 35 U.S.C. 371 and (2) to establish procedures necessary for patent applicants to proceed under Chapter II of the Patent Cooperation Treaty. This rule change is being made because (1) the current rules for handling unity of invention issues in international applications are not consistent with the court decision in *Caterpillar Tractor Co. v. Commissioner of Patents and Trademarks*, 231 USPQ 590 (E.D. Va. 1986), and (2) legislation implementing Chapter II of the Patent Cooperation Treaty has recently been enacted. The promulgated rules will result in (1) the treatment of unity of invention issues in international applications consistently with the court decision while retaining the current practice for national applications filed under 35 U.S.C. 111, and (2) procedures adequate for applicants to proceed under Chapter II of the Patent Cooperation Treaty. **Effective Date:** July 1, 1987.

For Further Information Contact: Louis O. Maassel by telephone at (703) 557-3070 or by mail marked to his attention and addressed to the Commissioner of Patents and Trademarks, Washington, D.C. 20231.

Supplementary Information: This final rule change relates to (1) questions of unity of invention which may arise in international applications when searched as an International Searching Authority and when examined as an International Preliminary Examining Authority by the United States Patent and Trademark Office (USPTO) and during the national stage in the United States as a Designated Office after entry under 35 U.S.C. 371 pursuant to the Patent Cooperation Treaty (PCT) and (2) procedures to be followed and fees to be paid under Chapter II of the Patent Cooperation Treaty. The rule change will also increase the amount of the international search fees and national fees in international applications in view of increased average effort required by the USPTO because of changes in the rules relating to unity of invention. No fees are being established under 35 U.S.C. 41.

Background Information

Unity of Invention

The May 28, 1986, decision in *Caterpillar Tractor Co. v. Commissioner of Patents and Trademarks*, 231 USPQ 590 (E.D. Va., 1986) held that the Patent and Trademark Office interpretation of 37 CFR 1.141(b)(2) as applied to unity of invention determinations in international applications was not in accordance with the Patent Cooperation Treaty and its implementing rules. In the *Caterpillar* international application, the USPTO, acting as an International Searching Authority, had held lack of unity of invention between a set of claims directed to a process for forming a sprocket and a set of claims drawn to an apparatus (die) for forging a sprocket. The court stated that it was an unreasonable interpretation to say that the expression "specifically designed" as found in PCT Rule 13.2(ii) means that the process and apparatus have unity of invention if they can only be used with each other, as set forth in the Manual of Patent Examining Procedure (MPEP) 806.05(e).

Therefore, when the Patent and Trademark Office considers international applications as an International Searching Authority, as an International Preliminary Examining Authority, and during the national stage as a Designated or Elected Office under 35 U.S.C. 371, PCT Rule 13.1 and 13.2 will be followed when considering unity of invention of claims of different categories without regard to the practice in national applications filed under 35 U.S.C. 111. No change is being made in the current restriction practice in United States national applications filed under 35 U.S.C. 111 outside the PCT. No change in practice is being made in regard to claims of the same category of invention either in PCT international applications or in U.S. national applications. Any such change in U.S. national restriction practice would require a statutory change in the fee levels in order to cover the additional examining effort required in individual patent applications.

The unity of invention procedures set forth in the rules are already being substantially followed by the examiners in the USPTO as a result of the notice signed on Aug. 15, 1986, and

published in the *Official Gazette* on Sept. 9, 1986 at 1070 O.G. 11. The notice of Sept. 9, 1986 and any prior notices or policies relating to unity of invention which are inconsistent with the rules and procedures in this final rules notice are superseded to the extent that they are inconsistent.

The unity of invention practice set forth in PCT Rule 13 will be applied in national stage applications entered under 35 U.S.C. 371 because 35 U.S.C. 372(b)(2) provides that "The Commissioner may cause the question of unity of invention to be reexamined under section 121 of this title, within the scope of the requirements of the treaty and the Regulations". However, continuing applications filed under 35 U.S.C. 111 of international applications under the provisions of 35 U.S.C. 365(c) will be subject to the same restriction practice as other United States national applications filed under 35 U.S.C. 111. However, it is noted that where several inventions have been searched in the parent international application, the examination of such inventions in a continuing national application may not be burdensome and the examiner may consider all the inventions in such an application without making a restriction requirement.

Implementation of Unity of Invention Practice in International Applications and National Stage Applications Entered Under 35 U.S.C. 371

(1) The practice established by these rules for international and national stage applications will *not* be applied to national applications filed under 35 U.S.C. 111.

(2) The practice established by these rules will *not* affect the treatment of the claims of any applications (national or international) where the question of lack of unity of invention relates to other than different categories of invention issues.

Therefore, restriction and unity of invention practice involving, for example, Markush type claims, genus-species, intermediate-final product or combination-subcombination situations is *not* affected for any applications by this rule change.

(3) The criteria of § 1.141 would continue to be applicable to U.S. national applications filed under 35 U.S.C. 111 in a manner similar to that in effect prior to the Caterpillar decision and essentially the same as the practice which was in effect for many years prior to the PCT implementation. That is, national restriction practice will continue as set forth in MPEP Chapter 800, as modified in 1046 O.G. 2 for the practice relating to product, process of making and process of using. The practice in this latter situation is that a three way requirement for restriction can only be made where the process of making is distinct from the product (i.e., the requirements of MPEP 806.05(f) are met). Otherwise, claims to the process of using must be joined with the claims directed to the product and the process of making the product even though a showing of distinctness between the product and process of using the product (MPEP 806.05(h)) could be made. This concept is included in paragraph 1.141(b).

(4) Under the rules, the criteria of PCT Rule 13.2 will be applied when considering unity of invention of claims drawn to different categories of invention in international applications as an International Searching Authority, International Preliminary Examining Authority, and as a Designated or Elected Office in international applications which enter the national stage under 35 U.S.C. 371.

(5) Under the rules, in applying PCT Rule 13.2 to international applications as an International Searching Authority, an International Preliminary Examining Authority and to national stage applications under 35 U.S.C. 371, examiners will consider for unity of invention all of the claims to different categories of invention in the application and will permit retention in the same application for searching and/or examination, claims to the categories which meet the requirements of any one of PCT Rule 13.2(i) to (iii).

Under the rules, the USPTO will also permit in the same international or national stage application the following two combinations:

(1) An independent claim for a given product and an independent claim for a process specially adapted for the manufacture of said product.

(2) An independent claim for a given product and an independent claim for a process of using the said product.

Under the rules, if an application contains a combination of categories of claims which do not fall within any *one* of the

combinations of PCT Rule 13.2(i) to (iii) or additional combinations (1) or (2) above, i.e., they claim more or less categories of invention than permitted in any one of PCT Rule 13.2(i) to (iii) or combination (1) or (2) above, unity of invention may not be present.

Further, an independent claim for a use in PCT Rule 13.2(i) and combination (2) above will be construed as being limited to a claim directed to a process of using. In determining unity of invention under PCT Rule 13.2(i) and (iii) and combination (1) above, under the rules, the examiner will consider the word "specially" which appears before "adapted" to be an emphasis word rather than a limitation. In determining unity of invention under PCT Rule 13.2(ii), the examiner will consider the word "specifically" which appears before "designed" to be an emphasis word rather than a limitation.

Under the rules, if an application includes claims to all the categories of invention set forth in any one of PCT Rule 13.2(i), (ii), (iii), combinations (1) or (2) above, and no additional categories of invention are present, unity of invention will exist and no additional fees will be required or restriction requirement made.

For example, if an application contained claims to only a process for the manufacture of a product and claims to a use of a product and no product claim is present, there will be lack of unity of invention since the provisions of Rule 13.2(i) do not apply because claims to all categories of invention set forth in PCT Rule 13.2(i) are not included in the application and the process for manufacture of a product is independent of the use of the product since neither is dependent on the other. Also if claims to all three categories of PCT Rule 13.2(i) were present at the time of the first Office action in a national stage application and all the product claims are rejected in the first Office action, a requirement for restriction could also be made, if appropriate, in view of independent inventions being in the application without an allowable linking (product) claim.

Under the rules, where claims to a category of invention in addition to those listed in any one of PCT Rule 13.2 (i), (ii), (iii) or combinations (1) or (2) above are included in an application, unity of invention may be lacking between the claims drawn to the combination of the categories of invention set forth in any *one* of PCT Rule 13.2(i), (ii), or (iii) or combinations (1) or (2) above, and the claims to the additional category of invention. For example, if an application contains claims to a process for manufacture, claims to an apparatus or means for carrying out the process and claims to a process of using the product manufactured, there could be lack of unity of invention. In such a situation the examiner should group the claims to the process for manufacture and the claims for an apparatus or means for carrying out the process because unity of these two categories exists under PCT Rule 13.2(ii). The claims to the use of the product can be separately grouped if the "use" is shown to be "independent and distinct" of both the "process for manufacture" and the "apparatus or means for carrying out the process" as provided in Chapter 800 of the Manual of Patent Examining Procedure (MPEP).

When the claims presented in an application are directed to several categories of invention under the rules so that more than one paragraph of PCT Rule 13.2 and combinations (1) or (2) above applies, the examiner would inspect the claims to see if the categories of invention set forth in PCT Rule 13.2, paragraphs (i), (ii) and (iii), and then combinations (1) or (2) above are present in the application in that order. For example, if the categories of PCT Rule 13.2(i) are found in the application, the claims to those categories stated in PCT Rule 13.2(i) will be considered as *one* invention and any claims to different categories of invention will be reviewed to determine if they are "independent and distinct" of *all* the claims covered in PCT Rule 13.2(i) in accordance with the provisions of Chapter 800 of the MPEP.

(6) Under PCT Rule 13.2 and combinations (1) and (2) above, unity will exist where the claims are limited to *one* invention in each category of invention recited. For example, under PCT Rule 13.2(i), claims are permitted to *one* product, *one* process of manufacturing the product and *one* use of the product. If multiple products, processes of manufacture or uses are claimed, the first invention in the category first mentioned in the claims would be considered as the elected invention under the rules. The first recited invention of each additional category which is related to the first invention as indicated in the previous

sentence will be considered elected. Accordingly, for example, if multiple products are claimed, the first recited product will be considered to be constructively elected and if multiple processes adapted for making and/or using the product are claimed, the first recited process will also be constructively elected. Any additional inventions of the same category will be subject to payment of additional fees during the international stage. In a national stage application submitted under 35 U.S.C. 371 any such holding by the examiner will be made in the form of a restriction requirement. Such a restriction requirement will be made on the basis of criteria set forth in MPEP Chapter 800. Applicant will have the right to traverse such a restriction requirement in the response to the Office action.

(7) Inventions of different categories, to have unity of invention, must be related rather than independent inventions. For example, the product as claimed in PCT Rule 13.2(i) and combinations (1) and (2) above must be capable of being made by the claimed process for manufacture or being used in the claimed process of use. Likewise in PCT Rule 13.2(ii), the apparatus as claimed must be capable of carrying out the claimed process. In PCT Rule 13.2(iii), the claimed process of manufacture must be capable of preparing the claimed product and the claimed apparatus or means must be able to perform the claimed process of manufacture.

(8) Under §§ 1.494 and 1.495, applicants must indicate on all application papers filed for entry under 35 U.S.C. 371 that the filing is being made under 35 U.S.C. 371. Otherwise, the application papers will be treated as having been filed under 35 U.S.C. 111.

Patent Cooperation Treaty, Chapter II

The Patent Cooperation Treaty became effective for the United States on Jan. 24, 1978. The United States, however, was one of six countries (out of the 40 countries who have ratified or acceded to the Treaty) which had reservations not to be bound by Chapter II. The document removing the reservation as to Chapter II was deposited with the Director General of the World Intellectual Property Organization on Apr. 1, 1987. Accordingly, Chapter II of the Treaty for the United States of America, Pub. L. 99-616 and these final regulations become effective 3 months later on July 1, 1987.

Chapter I of the Patent Cooperation Treaty provides a standardized application format and a centralized filing procedure for international patent applications. Pursuant to Chapter I, an applicant may submit an International application, designating those member countries in which the applicant desires patent protection. Filing an international application has the same effect as filing a separate application in all designated member states with respect to the filing date. In addition, by filing an international application, the applicant does not have to incur the expenses associated with national patent prosecution in the designated countries until 20 months from the priority date of the international application. During this period, the applicant obtains an international search report citing prior art deemed to be relevant to the claims of the invention contained in the international application. This helps the applicant decide whether to proceed with patent prosecution in the various countries originally designated.

Chapter II of the Patent Cooperation Treaty provides two further benefits for the applicant. First, an additional 10 months is allowed, for a total of 30 months from the priority date of the international application, before the applicant must decide whether to proceed with national patent prosecution in the elected countries. Second, the applicant is provided with an international preliminary examination report. In contrast to the international search report, which provides citations of prior art pertinent to the invention, the international preliminary examination report is a non-binding opinion from an International Preliminary Examining Authority as to whether the invention is novel, involves an inventive step (is non-obvious), and is industrially applicable. A preliminary examination report will be established within 28 months from the priority date. This preliminary examination report, together with the additional 10 months before the decision to proceed with national prosecution is required, places the applicant in a better position to consider commercial factors associated with the invention and to decide whether to pursue patent protection in the various elected countries.

To take advantage of these benefits provided by Chapter II, an applicant must file a "Demand" for a preliminary examination in an appropriate International Preliminary Examining Authority prior to the expiration of the 19th month from the priority date and pay certain fees. The final rules establish the amounts of some of the necessary fees and procedures under Chapter II and also group all the rules unique to international applications in a separate area of the regulations. The rules fall into three groups: (1) those directed to procedures under Chapter I, (2) those directed to procedures under Chapter II, and (3) those directed to entering the national stage under 35 U.S.C. 371.

Changes From the Proposed Rules

In § 1.475, a new paragraph (f) has been added which sets forth in the rules the exact wording of PCT Rule 13. PCT Rule 13 was included in the proposed rules as a footnote. The incorporation of the wording of PCT Rule 13 into § 1.475(f) will make it easier to refer to and easier to locate. Sections 1.475, 1.476, 1.487 and 1.499 are also changed to refer to § 1.475(f) rather than footnote 1.

In § 1.480(c), the wording has been clarified by adding a reference to the election of the United States.

Section 1.484(f) has been modified from the proposal to permit more than one interview in those situations where the examiner considers that an additional interview would be helpful.

In § 1.485, paragraph (b) has not been included since the substance thereof is set forth in § 1.484(d).

In § 1.492(a)(2) and (3), "i" has been deleted in order to refer to both § 1.445(a)(2)(i) and (ii).

An additional paragraph (a)(4) has been added to § 1.492 and an additional paragraph (b) has been added to § 1.496 which provide for a substantially reduced national fee and special procedure, respectively, where the application has satisfied the requirements of novelty, inventive step (non-obviousness) and industrial applicability before the United States International Preliminary Examining Authority as to the identical claims which are in the application at the national stage in the Patent and Trademark Office. Amendments during subsequent prosecution will only be permitted in response to an examiner's rejections or objections. Thus, no new claims are permitted. Therefore, most of such cases will require little or no prosecution to satisfy the requirements for patentability. The title of § 1.496 has been broadened in view of the new paragraph (b) and proposed § 1.496 has been redesignated as paragraph (a).

In §§ 1.494 and 1.495, an additional paragraph has been added to indicate the date of abandonment of an international application as to the United States if the requirements of 35 U.S.C. 371(c) are not timely fulfilled.

Response to Comments Received

Specific comments were received on several of the proposed rules, particularly those relating to unity of invention and fees. Sixteen letters submitting written comments were received. Oral testimony was presented by five persons at the public hearing conducted on Apr. 6, 1987 resulting in 46 pages of testimony. All of the written and oral comments were considered in adopting the changes set forth herein. Comments suggesting modifications to the proposed rules or requesting clarification thereto appear below with responses thereto.

Comment:

A question was raised as to whether the deadline for filing a continuing application under 35 U.S.C. 365(c) and 120 was 20 or 22 months under Chapter I and 30 or 32 months under Chapter II.

Reply:

The Patent and Trademark Office considers the international application to be pending until the 22nd month from the priority date if the United States has been designated and no Demand for International Preliminary Examination has been filed prior to the expiration of the 19th month from the priority date and until the 32nd month from the priority date if a Demand for International Preliminary Examination which elected the United States of America has been filed prior to the expiration of the 19th month from the priority date provided that a copy of the international application has been communicated to the Patent and Trademark Office within the 20 or 30 month period, respectively. If a copy of the international application has not been

communicated to the Patent and Trademark Office within the 20 or 30 month period respectively, the international application becomes abandoned as to the United States 20 or 30 months from the priority date respectively. These periods have been placed in the rules as paragraph (h) of § 1.494 and paragraph (i) of § 1.495. A continuing application under 35 U.S.C. 365(c) and 120 may be filed during the pendency of the international application.

Comment:

A comment was received concerning the situation where a continuing application is filed under 35 U.S.C. 365(c) of an international application which claims priority of an earlier filed foreign application as to (1) whether the applicant must specifically claim priority in the continuing application and (2) whether the certified copy of the priority application which may have been communicated to the Patent and Trademark Office by the International Bureau may be relied upon without any need to file a certified copy of the priority application in the continuing application.

Reply:

As to item (1), it is necessary under the statute for the applicant to claim priority in the continuing application. Otherwise there is no indication that such benefit is desired in the continuation and the information may not be present for printing of any subsequent patent.

As to item (2), the certified copy of the priority application communicated by the International Bureau is placed in a folder and is not assigned a U.S. serial number unless the national stage is entered. Such folders are disposed of if the national stage is not entered. Therefore such certified copies may not be available if needed later in the prosecution of a continuing application. An alternative would be to physically remove the priority documents from the folders and transfer them to the continuing application. The resources required to request transfer, retrieve the folders, make suitable record notations, transfer the certified copies, enter and make of record such copies in the continuing applications is substantial. Accordingly, the priority documents in folders of international applications which have not entered the national stage may not be relied on.

Comment:

One comment raised the question whether a continuing application filed under 35 U.S.C. 111 and entitled to the benefit of a prior international application designating the United States under 35 U.S.C. 365(c) and 120 would be subject to the PCT unity practice of § 1.499 or the national restriction practice under § 1.141.

Reply:

A continuing application filed under 35 U.S.C. 111 would be subject to the national restriction practice as set forth in § 1.141 and Chapter 800 of the Manual of Patent Examining Procedure. Only those international applications entering the national stage under 35 U.S.C. 371 and § 1.494 or § 1.495 would be subject to the unity of invention practice set forth in § 1.499.

Comment:

Five comments were made to the effect that the unity practice set forth in the rules was not consistent with the unity of invention criteria currently under discussion in the WIPO "harmonization" treaty meetings.

Reply:

At the present time there appears to be no agreed upon unity practice in the harmonization meetings. Only a discussion document has been prepared by WIPO. The Patent and Trademark Office is currently making a very intensive study of unity of invention in the United States, Japan and the European Patent Office. The practice which may result from this study and subsequent discussions is also not clear at this time. For these reasons as well as the fee implications of such a change, it is considered preferable to proceed with a clarification of the unity of invention practice which is to be used as part of the regulations for use by patent applicants and examiners at this time and, if modification of the practice is required in the future, appropriate changes in the law and the rules will be made at that time.

Comment:

Two comments argued that the difference in treatment of unity of invention is contrary to 35 U.S.C. 372(a).

Reply:

35 U.S.C. 372(a) states:

All questions of substance and, within the scope of the requirements of the treaty and Regulations, procedure in

an international application designating the United States shall be determined as in the case of national applications regularly filed in the Patent and Trademark Office.

This section is interpreted as relating only to substantive questions of patentability which includes matters such as the definition of prior art. See PCT Article 27(5). If section 372(a) were interpreted to include items other than those relating to substantive questions of patentability, items such as requirements to obtain a filing date would be included. Clearly, an international application must only meet the filing date requirements of PCT Article 11(1) even though a U.S. national application must meet the requirements of 35 U.S.C. 111.

Comment:

One comments was received stating that the U.S. rules should define prior art for PCT purposes and also the manner of issuing International Preliminary Examination Reports.

Reply:

Prior art for PCT purposes is already defined in PCT Rule 64 and the procedures are set forth in PCT Rules 66 and 70. To repeat the substance of these PCT rules in the U.S. rules would be duplicative and possibly lead to different interpretations if different wording was used.

Comment:

One comment inquired whether the International Preliminary Examining Report was binding on a USPTO examiner in the national stage.

Reply:

An International Preliminary Examination Report is not binding on a USPTO examiner. PCT Article 33(1) clearly states that the "objective of the international preliminary examination is to formulate a preliminary and non-binding opinion." Since the USPTO has had no experience with International Preliminary Examination Reports prepared by foreign offices, as well as foreign offices having no experience with Reports prepared by the USPTO, the degree of reliance on such Reports in the national stage cannot be determined at the present time. Studies underway with the European Patent Office and the Japanese Patent Office regarding inventive step and other matters and experience with Reports from other International Preliminary Examining Authorities may be helpful in further addressing this question in the future.

Comment:

Two comments were received asking why § 1.141(b) was being changed since there was no change in U.S. restriction practice.

Reply:

No change is being made in U.S. restriction practice in applications filed under 35 U.S.C. 111. The amendments to § 1.141 basically delete expressions used in the Patent Cooperation Treaty which are not used in U.S. national practice. The criteria deleted from § 1.141(b) still remain in Chapter 800 of the Manual of Patent Examining Procedure.

Comment:

One comment was made that any interpretation by the PTO of the PCT Unity language will carry over to the Harmonization Treaty.

Reply:

The U.S. delegation to the WIPO harmonization meetings has several times requested that guidelines be prepared for consideration with the Unity of Invention Article and Rules. Any interpretation of future treaty wording would be controlled by the guidelines.

Comment:

Three comments were received that the PTO is attempting to promulgate a variation of PCT Rule 13 which is contrary to the Caterpillar decision because the U.S. rules are not identical in scope with PCT Rule 13.

Reply:

The U.S. rules relating to Unity of Invention are considered to be in accordance with PCT Rule 13 and the Caterpillar decision. Rules 1.475, 1.487 and 1.499 are not identical with PCT Rule 13.2 because the U.S. rules are somewhat broader because additional combinations are included. The U.S. rules are also consistent with the Caterpillar decision because this decision related only to the interpretation of the expressions in PCT Rule 13.2.

Comment:

One comment inquired as to the amount of the handling fee.

Reply:

The amount of the handling fee is set forth in the SCHEDULE OF FEES appearing at the end of the PCT Rules. These fees are stated in Swiss Francs. The current amount for the Handling Fee is 200 Swiss Francs. The amount in U.S. dollars will be established by the Director General based on the current exchange rates as provided in PCT Rule 57.2(c).

Comment:

One comment proposed that a rule be implemented under which an examiner must complete the first written opinion within two months of the filing of the Demand.

Reply:

Although the Office will expect an examiner to begin the International Preliminary Examination as early as possible after receipt, delay in issuing the written opinion may occur because the International Preliminary Examination fee was paid later than the filing of the Demand under PCT Rule 58.2, the application contains defects in form or contents or the application lacks unity of invention. Thus, such a rule would not be appropriate.

Comment:

One comment questioned the need to re-impose restriction (holding of lack of unity of invention) if a linking claim is not allowable.

Reply:

There is no mandatory requirement that the examiner impose a holding of lack of unity if the linking claim is shown to lack novelty and inventive step. However, if such a possibility did not exist, applicants could present broad generic claims to entire classes of inventions and thereby prevent any subsequent holding of lack of unity by the examiner.

Comment:

One comment suggested that applicants in national patent applications be allowed to take advantage of the PCT unity criteria by paying a surcharge.

Reply:

Such a fee is not provided for under 35 U.S.C. 41 and would appear to require legislative action.

Comment:

Three comments suggested that the increases in the search fees were either unlawful or inconsistent with the spirit of the Patent and Trademark Office Authorization Act passed by Congress in 1986 in view of the freeze imposed thereby.

Reply:

The Patent and Trademark Office Appropriations Act (Public Law 99-607) at Sec. 3(b) states.

(b) PATENT FEES.—The Commissioner of Patents and Trademarks may not, during fiscal years 1986, 1987, and 1988, increase fees established under section 41(d) of title 35, United States Code, except for purposes of making adjustments which in the aggregate do not exceed fluctuations during the previous 3 years in the Consumer Price Index, as determined by the Secretary of Labor. The Commissioner also may not establish additional fees under such section during such fiscal years.

The legislative history also makes clear that the prohibition against fee increases relates only to those fees established under section 41(d) and indicates that fees for new types of processing, services, or materials are not prohibited. The prohibition in the appropriation authorization is strictly limited to fees established under 35 U.S.C. 41(d) and does not affect the authority of the Commissioner to set fees under the Patent Cooperation Treaty. Note 35 U.S.C. 376 which authorizes the Commissioner to set fees for both the international and national stages. The new services relating to unity of invention are clearly not within the scope of the appropriation authorization restriction.

Comment:

Three comments stated that the \$100 fee increase for an international search is clearly excessive.

Reply:

The increase in the search fee is to recover the average estimated additional cost of processing international applications with claims to more inventions than were permitted when the current search fees were established. The increase is established also to provide for an expected higher percentage of international applications containing claims to more than one

category of invention. If experience shows these expectations were in error, fees will be adjusted in the future.

Comment:

One comment stated that the increase in the international search fee was not justified by *Caterpillar Tractor Co. v. Commissioner of Patents and Trademarks*, 231 USPQ 590 (E. D. Va. 1986) which merely clarified an aspect of existing law and did not change it.

Reply:

The decision in the Caterpillar case indicated that the Office's criteria for unity of invention on which the amount of the search fee was determined were too strict in construing the language of the Treaty and that broader criteria were permitted under the terms of the Treaty. Fees under the Patent Cooperation Treaty were set based on pre-Caterpillar interpretations of PCT Rule 13.2 by the Patent and Trademark Office. Since such broader criteria require a more extensive search than that on which the search fee was previously calculated, an increase in the search fee is necessary to cover the cost of the additional search required under the broader criteria in accordance with the Caterpillar decision.

Comment:

One comment stated that the increase in the international search fee penalizes an applicant presenting clearly a single invention.

Reply:

A broadening of the interpretation of unity of invention and the increase in the average amount of work required in searching an international application results in a higher fee being required. A more narrow interpretation of unity of invention permits a lower average fee and would tend to benefit applicants with a clearly single invention. The Caterpillar decision and majority of comments received supported a more liberal interpretation of unity of invention. Testimony at the hearing indicated a preference for spreading any additional costs among all applicants.

Comment:

One comment was received which suggested that § 1.484(d) be amended by adding a further sentence.

If, after receipt of any response to the written opinion, the Examiner is of the opinion that some or all of the claims are not patentable, the Examiner shall issue a second written opinion which identifies any patentable subject matter, including any suggestions for claim modification to properly define the invention.

Reply:

The wording of the proposed sentence is clearly inappropriate since the International Preliminary Examination Report does not make any determination of "patentability." Note PCT Article 35(2). Furthermore, the time limits for issuing an International Preliminary Examination Report are such that there may not be sufficient time in most cases to issue a second opinion and receive a response thereto. Modifications in the interview practice are a more practical way of assuring a more complete and thorough international preliminary examination.

Comment:

One comment suggested that § 1.484(f) be amended to read:

An applicant will be permitted *at least* [no more than] one personal or telephone interview, which must be conducted *prior to 27 months from the priority date* during the non-extendable time limit for response by the applicant to the written opinion.

Reply:

A less restrictive interview policy has been incorporated into § 1.484(f). The period for an interview cannot be delayed until the 27th month from the priority date since this is the time at which the examiners will be required to complete their Reports in order to allow time for reviews and mailing.

Comment:

One comment proposed that § 1.485 be amended as follows:

The time limit for response in a written opinion of the International Preliminary Examining Authority may not be extended to *expire beyond 27 months from the priority date, without the permission of the Group Director.*

Reply:

No need is seen to limit the end of the response period to the end of the 27th month since the period will be set by the examiner when a written opinion is mailed. The time limit cannot be extended (§ 1.484(d)) due to tight time frames for establishing the International Preliminary Examination Report within 28 months from the priority date. The time limits for response to a written opinion are set forth in PCT Rule 66.2(d).

Comment:

Two written comments and the oral testimony indicated that the fees for entering the national stage should be considerably less after an international search and preliminary examination. The small \$40.00 reduction in national stage fees is criticized as too small and a token fee of \$40-\$50 is stated as being more reasonable.

Reply:

The fees are based on an adjustment of the U.S. filing fee based on estimated additional work or savings. However, in view of the comments, an additional basic nation fee level has been added as § 1.492(a)(4) for those situations where the Patent and Trademark Office has established an International Preliminary Examination Report which indicates that all the claims entering the national stage have satisfied the criteria of PCT Articles 31(1) to (4). Current studies of the benefit of having PCT search reports from the searching authorities indicate an improvement in quality but no overall reduction in search or examining time. The search report from other than international searching authorities, with rare exceptions, does not allow the USPTO examiner to eliminate any part of the national search.

Comment:

One comment argued that reciprocal treatment should be given to foreign applicants for benefits given U.S. applicants.

Reply:

Although the European Patent Office offers a 20% reduction of only the search fee portion of its national stage entry fees, the resulting fee of a little under \$1000 at current exchange rates is still more than twice the amount of the highest U.S. national fee. In Japan the national fee for requesting examination is currently 26,000 yen (a little under \$200 at current exchange rates) where the search report was not prepared by the Japanese Patent Office and 6,000 yen if the search report was prepared by the Japanese Patent Office.

Comment:

One comment urged that the U.S. rules match the less restrictive EPO rules with regard to the issuance of more than one written opinion and providing additional opportunity for the applicant to communicate with the examiner.

Reply:

The proposed rules (§ 1.484) have been modified to provide for a less restrictive interview practice. The examiner should permit interview(s) during the time limit for response to the written opinion where such interviews would be useful and time is available to permit issuance of the International Preliminary Examination Report prior to the deadline of 28 months after the priority date.

Although nothing in the rules limit the proceedings to one written opinion, most demands are expected to be filed near the end of the 19th month deadline. Preparation of the first written opinion may be delayed because the fees were not paid at the time of filing the Demand, formal errors are found in the documents or unity of invention is lacking. The time limits for a reply to the first written opinion will normally be set at 2 months, although 3 months may be given where the time limit for reply ends prior to 25 months from the priority date. Response by the 25th month will allow the examiner 2 months to prepare the International Preliminary Examination Report.

However, a Demand may be filed much earlier than 19 months from the priority date and International Preliminary Examination may begin early as provided for in PCT Rule 69.1(b). Where time and other circumstances permit, a second written opinion may be provided, possibly with a one month time limit for reply.

Comment:

One comment stated that proposed § 1.485(b) is a duplication of § 1.484(d).

Reply:

Proposed paragraph (b) has been deleted in final rule 1.485.

Comment:

One comment stated that procedures for the manner of issuing International Preliminary Examination Reports should be set forth in the U.S. rules.

Reply:

Items already specifically covered in the PCT articles and rules are not needed in U.S. rules. The agreement with WIPO also regulates these matters as do the PCT search and preliminary examination guidelines.

Comment:

One comment stated that the treatment of the International Preliminary Examination Report (IPER) by the USPTO at the national stage is not clear.

Reply:

The IPER will be considered along with other relevant information when conducting a national examination for patentability. PCT Article 33(1) indicates that the objective of the International Preliminary Examination Report is to formulate a preliminary and non-binding opinion; it is not binding on any office. Any new questions relating to patentability may be raised.

Comment:

One comment stated that a dual standard of unity defies logic.

Reply:

The dual standard is necessary since the fees for patent applications filed under 35 U.S.C. 111 were set based upon an application being limited to one invention as defined at the time the fees were set which differs from the interpretation of unity under PCT required in view of the Caterpillar decision.

Comment:

One comment stated that if additional PCT international search fees are required they should be made by statutory change.

Reply:

The Commissioner is authorized by statute (35 U.S.C. 376) to set the national fee for PCT origin applications. Any change in national restriction practice for applications filed under 35 U.S.C. 111 would be made only after statutory change.

Comment:

One comment indicated that in view of the Caterpillar decision holding the Office interpretation of "specifically designed" to be an unreasonable interpretation, the Office is proposing a double standard.

Reply:

U.S. national law under 35 U.S.C. 121 does not require a consideration or interpretation of "specifically designed" to be made. This must only be made in PCT cases and those entering the national stage under 35 U.S.C. 371.

Discussion of Specific Rules

Section 1.8 is amended to indicate clearly that the certificate of mailing procedures thereunder may not be used for the filing of papers and fees relating to international applications. It should be noted that the provisions of § 1.10 regarding the filing of papers or fees by "Express Mail" apply to all papers and fees to be filed in the Patent and Trademark Office, including those relating to international applications.

Section 1.61 "Filing of applications in the United States of America as a Designated Office" is removed and the substance thereof moved to new § 1.494. Section 1.70 "Oath or declaration under 35 U.S.C. 371(c)(4)" is removed and the substance thereof moved to new § 1.497. These moves result in the rules relating to the international applications entering the national stage being located in a single area of the rules.

Section 1.101 is amended to remove the discussion of the order of examination for international applications entering the national stage, which is covered by new § 1.496.

Section 1.141 is amended to basically return the rule to its wording prior to the 1978 rule change implementing the Patent Cooperation Treaty and will be directed solely to national applications. This will avoid confusion with PCT Rule 13.2 which was interpreted by the court in *Caterpillar Tractor Co. v. Commissioner of Patents and Trademarks*, supra, to have a different meaning than intended in present § 1.141. It does, however, retain for applicants the ability to claim a "reasonable number" of species rather than only 5, which limit existed prior to the 1978 rule change. Paragraph (b) continues the practice stated in the *Official Gazette* notice of Aug. 1, 1984 published at 1046 O.G. 2. Unity of invention in international applications before the

USPTO as an International Searching Authority under Chapter I of the Patent Cooperation Treaty is covered by § 1.475. Unity of invention before the USPTO as an International Preliminary Examining Authority under Chapter II of the Patent Cooperation Treaty is covered by § 1.487. Unity of invention in international applications entering the national stage under 35 U.S.C. 371 is covered by § 1.499.

Section 1.401 is amended to include the definition of some terms used for Chapter II of the Patent Cooperation Treaty.

Section s1.414 is amended to include reference to the United States Patent and Trademark Office functioning as an Elected Office under Chapter II of the Patent Cooperation Treaty as well as a Designated Office under Chapter I.

Section 1.416 is added to indicate and describe the functioning of the United States Patent and Trademark Office as an International Preliminary Examining Authority under Chapter II of the Patent Cooperation Treaty.

Section 1.431 and 1.432 are amended, in accordance with PCT Rule 15.4(b)(ii) and amended 35 U.S.C. 361, to indicate that the time limit for payment of the designation fee is one year from the priority date or one month from the date of receipt of the international application if that one month time limit expires after the expiration of one year from the priority date.

Section 1.445 is amended to increase the amount of the international search fees to provide for recovery of the average additional cost of processing applications with claims to more inventions than were permitted under the unity of invention criteria used when the previous international search fee amounts were established. The amounts for national stage fees are removed from § 1.445 and are now set forth in § 1.492.

The international search fee and national fees were previously established based on the effort and cost to the Office of searching and examining a single invention as defined by the United States Patent and Trademark Office prior to the decision in the Caterpillar case. Since additional effort will be required to search and examine an average application under the new rules defining unity of invention, the average international search and national fee must also be increased to cover the additional cost to the Office.

Section 1.475 "Changes in person, name, or address of applicants," is redesignated as § 1.472 to allow the grouping of rules into PCT Chapter I, PCT Chapter II and national stage related rules. No change other than redesignation is made.

A new § 1.475 is added to relate to unity of invention before the International Searching Authority. Paragraph (a) clearly indicates that PCT Rule 13 is to be followed in all such cases and paragraph (b) adds combinations acceptable under unity of invention in addition to those set forth in PCT Rule 13.2. Paragraph (c) relates to the handling of claims to categories in addition to the combinations specified in paragraph (b). Paragraph (d) relates to situations in which more than one invention of the same category of invention is recited in an international application. Paragraph (e) makes clear that inventions of different categories must be related, rather than independent, for unity of invention to exist. Paragraph (f) sets forth PCT Rule 13 for the convenience of patent applicants.

Section 1.481, regarding determination of unity of invention before the International Searching Authority, is redesignated as § 1.476 and amended to delete reference to § 1.141 from paragraph (a).

Section 1.482 is redesignated as § 1.477 and amended to make clear in the title that it deals with protests to findings of lack of unity of invention before the International Searching Authority. The amendment to paragraph (b) corrects an error in referring to another paragraph of the section.

A new § 1.480 is added to deal with the Demand for an international preliminary examination. Paragraph (a) indicates that a Demand is required to be filed to obtain an international preliminary examination and that the preliminary examination fee of § 1.482(a)(1) and the handling fee of § 1.482(b) are due at the time of filing of the Demand. If the fees are not paid at the time of filing of the Demand, the United States Patent and Trademark Office acting as an International Preliminary Examining Authority will provide an opportunity to pay the fees in accordance with PCT Rules 57.4 and 58.2.

Paragraph (b) of § 1.480 specifies that the Demand must be made on a standardized form as required by PCT Rule 53.1 and that such forms are available from the United States Patent and Trademark Office.

Paragraph (c) of § 1.480 specifies that, if the Demand is made prior to the expiration of the 19th month from the priority date, the provisions of PCT Article 39 and § 1.495 shall apply to allow entry into the national stage prior to the expiration of 30 months after the priority date. The final rule has been changed to add reference to the election of the United States. If the Demand is not filed prior to the expiration of the 19th month from the priority date, the provisions of PCT Article 22 and § 1.494 shall apply to allow entry into the national stage prior to the expiration of 20 months after the priority date.

Paragraph (d) of § 1.480 indicates that withdrawal of a proper Demand will not entitle applicant to a refund of the preliminary examination fee even if no claims are found that can or will be searched (PCT Article 34(4)(a)). A Demand that is so informal that it would be considered under the PCT Rules as if it had not been submitted will not be considered a proper Demand under the rule. A change in purpose after the filing of a Demand will not entitle an applicant to a refund of the preliminary examination fee. PCT Rule 57.6 states that in no case shall the handling fee, or any supplement to the handling fee, be refunded.

A new § 1.482 is added to specify the international preliminary examination fees. Paragraph (a) sets a lower fee for the international preliminary examination where an international search fee has been paid on the international application to the United States Patent and Trademark Office as an International Searching Authority. Paragraph (a) also sets a lower additional preliminary examination fee for the preliminary examination of additional inventions found in the international application where a supplemental search fee has been paid on the international application to the United States Patent and Trademark Office as an International Searching Authority. Paragraph (b) indicates that the handling fee is prescribed in PCT Rule 57 and any necessary supplement to the handling fee shall be paid directly to the International Bureau in accordance with PCT Rule 57.1(b).

A new § 1.484 is added to describe the conduct of international preliminary examination. The rule describes that, if necessary, a written opinion will be established after consideration of any defects in accordance with PCT Rule 66.2 and after an examination to determine if the claimed invention has novelty, involves an inventive step (is non-obvious) and is industrially applicable. A written opinion prior to the international preliminary examination report would not be necessary if the international application does not contain any defects as mentioned in PCT Rule 66.2 and if all claims are found to be novel, involve an inventive step (non-obvious) and are industrially applicable. The written opinion will set a time limit for applicant to respond in accordance with PCT Rule 66.2(d). The time limit for reply will normally be two months but will be three months where the time limit will expire prior to 25 months from the priority date. The time limit may not be extended due to the tight time constraints under Chapter II of the Patent Cooperation Treaty. An international preliminary examination report will be established and one copy will be submitted to the International Bureau and one copy to applicant. The rule specifies that no international preliminary examination report will be established prior to issuance of an international search report and that no international preliminary examination will be conducted on inventions not previously searched by an International Searching Authority. Paragraph (f) specifies that at least one personal or telephone interview with the examiner will be permitted during the international preliminary examination. Additional interviews are permissible if the examiner determines that it would be helpful. Additional interviews will be governed, in part, by the time remaining before the time for issuance of the international preliminary examination report. The period during which the interview(s) can be held is limited by the non-extendable time limit for response by the applicant to a written opinion. Although nothing in this or any other rule limits the number of written opinions which may be established prior to the International Preliminary Examination Report, in most cases time will limit the number of written opinions to one.

A new § 1.485 is added to deal with amendments by applicant during international preliminary examination. An applicant is permitted by the rule to make amendments at the time of filing of the Demand and within the period set in any written opinion on the application as defined in § 1.484. Amendments under the rule would be required to be made by submitting replacement sheets and a description of how the replacement sheet differs from the

replaced sheet. If an amendment cancels an entire sheet, that amendment should be communicated by letter without a replacement sheet. Proposed paragraph (b) is not promulgated because the substance thereof is set forth in § 1.484(d).

New § 1.487 defines what constitutes unity of invention before the International Preliminary Examining Authority. The standards for unity of invention generally parallel those set in § 1.475 regarding proceedings before the International Searching Authority.

New § 1.488 is added to set forth how the International Preliminary Examining Authority will proceed in handling determinations regarding the unity of invention criteria of § 1.487.

New § 1.489 sets forth the procedures to be followed by an applicant who wishes to protest a holding of lack of unity of invention by the International Preliminary Examining Authority. The additional fees would be required to be paid if more than one invention is to be examined, but could be accompanied by a request for refund and a statement setting forth reasons for disagreement with the holding of lack of unity of invention or why the required additional fees are excessive. This rule is in accordance with PCT Rule 68.3(c).

New § 1.491 is added to define the start of the national stage. Section 1.491 is the first rule in a new group of rules relating to applications entering the national stage pursuant to 35 U.S.C. 371.

New § 1.492 is added to set forth the fees and charges for international applications entering the national stage under 35 U.S.C. 371. The basic national fee is set forth in paragraph (a) at four levels to reflect the benefit that the United States Patent and Trademark Office will derive from having previously conducted an international preliminary examination or an international search. In § 1.492(a)(2) and (3), "(i)" has been deleted in order to refer to both § 1.445(a)(2)(i) and (ii). Paragraph (a)(4) which makes reference to § 1.496(b) has been added in view of comments received that indicated that in some instances substantial reliance may be placed upon the International Preliminary Examination Reports by the Patent and Trademark Office. The rule also sets the fee for an independent claim in excess of 3 (paragraph (b)), for presentation of each claim in excess of 20 (paragraph (c)) and for an application containing a multiple dependent claims (paragraph (d)). Paragraphs (e) and (f) include the fees previously contained in § 1.445 and include the alternative times for entering the national stage pursuant to § 1.494 or § 1.495.

New § 1.494 is added to contain substantially the provisions of former § 1.61 in amended form. This section relating to filing application documents in the United States Patent and Trademark Office to enter the national stage has been grouped with other sections relating to the national stage for the convenience of applicants and examiners involved in the prosecution of international applications entering the national stage. The rule applies where no Demand for international preliminary examination has been filed prior to the expiration of the 19th month from the priority date. If such a Demand were filed, § 1.495 would apply.

Section 1.494(f) requires that a specific indication be given by the applicant when entering the national stage that the documents being submitted are being submitted under 35 U.S.C. 371. If no clear indication is found, the documents will be considered to be for a regular national application under 35 U.S.C. 111. Paragraph (g) makes clear that the various time limits set out in the rule, some of which are set by the PCT, may not be extended pursuant to § 1.136 or otherwise. The extension of time provisions, including petition and payment of a fee, set out in § 1.136(a) do not apply to the time limits of the rule or time limits set by the International Searching Authority or the International Preliminary Examining Authority. New paragraph (h) clarifies when an international application designating the United States becomes abandoned as to the United States.

New § 1.495 is added to deal with filing application documents in the United States Patent and Trademark Office to enter the national stage where a Demand for international preliminary examination has been filed with an International Preliminary Examining Authority prior to the expiration of the 19th month from the priority date. In such a case, an applicant will have 30 months from the priority date to enter the national stage. The rule parallels in many respects § 1.494. New paragraph (i) clarifies when an international application electing the United States becomes abandoned as to the United States.

New § 1.496 is added to specify in paragraph (a) that international applications in the national stage will be taken up for action based on the date when the requirements of 35 U.S.C. 371(c) are met. Paragraph (b) indicates that applications entering the U.S. national stage only with claims which have been found in an International Preliminary Examination Report to have satisfied the criteria for novelty, inventive step (non-obviousness) and industrial applicability as defined in PCT Article 33(1) to (4) will be taken up for action before other applications. Preliminary amendments may accompany the filing of the national stage application to cancel claims which do not satisfy the criteria. These applications will have paid the lower filing fee set in § 1.492(a)(4) and most will not require extensive prosecution, i.e., objection or rejection before resolving the issue of patentability. Amendments will not be permitted to be made in such applications other than in response to objections as to form or to cancel claims in response to a rejection made by the examiner in the national stage application. Such a rejection could be necessary, for example, where applicant submits information in accordance with the duty of disclosure under 37 CFR 1.56(a).

New § 1.497 is added to contain substantially the wording of removed § 1.70. This rule relates to the oath or declaration required to enter the national stage and is grouped with other national stage entry requirements.

New § 1.499 is added to cover unity of invention during the national stage. The provisions of the section are basically parallel to those of §§ 1.475 and 1.487. Paragraph (f) indicates the manner of handling a finding of lack of unity of invention on grounds other than those involving different categories of invention.

Environmental, Energy, and Other Considerations

The rule change does not have a significant impact on the quality of the human environment or conservation of energy resources.

The rule change is in conformity with the requirements of the Regulatory Flexibility Act (Pub. L. 96-354), Executive Order 12291, and the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 et seq.

The General Counsel of the Department of Commerce has certified to the Small Business Administration that the rule change will not have a significant adverse economic impact on a substantial number of small entities (Regulatory Flexibility Act, Pub. L. 96-354) because considerable savings can potentially be achieved under Chapter II of the Patent Cooperation Treaty because additional time is provided for applicants to decide whether to proceed with the cost of foreign prosecution and savings will in fact be achieved under the unity of invention practice and the provision for reduced fees for small entities entering the national stage in making an application for a United States patent.

The Patent and Trademark Office has determined that this rule change is not a major rule under Executive Order 12291. The annual effect on the economy will be less than \$100 million. There will be no major increase in costs or prices for consumers, individual industries, federal, state or local government agencies, or geographic regions. There will be no significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

The information collection requirement contained in these rules was submitted to the Office of Management and Budget (OMB) at the time of the proposed rulemaking for review under Section 3504(h) of the Paperwork Reduction Act. OMB has approved the information collection requirement and has assigned OMB control number 0651-0021 thereto.

List of Subjects in 37 CFR Part 1

Administrative practice and procedure, Authority delegations (government agencies), Courts, Inventions and patents, Lawyers.

Notice is hereby given that pursuant to the authority granted to the Commissioner of Patents and Trademarks by a 35 U.S.C. 6 and 376(b) and Pub. L. 99-616, the Patent and Trademark Office is amending Title 37 of the Code of Federal Regulations as set forth below.

PART 1—RULES OF PRACTICE IN PATENT CASES

1. The authority citation for 37 CFR Part 1 would continue to read as follows:

Authority: 35 U.S.C. 6 unless otherwise noted.

2. Section 1.8 is amended by revising paragraph (a)(2)(xi) to read as follows:

§ 1.8 Certificate of mailing.

(a) * * *

(2) * * *

(xi) The filing of international applications for patent and all papers and fees relating thereto.

* * * * *

§ 1.61 [Removed]

3. Section 1.61 is removed.

§ 1.70 [Removed]

4. Section 1.70 is removed.

5. Section 1.101 is amended by revising paragraph (a) to read as follows:

§ 1.101 Order of examination.

(a) Applications filed in the Patent and Trademark Office and accepted as complete applications are assigned for examination to the respective examining groups having the classes of inventions to which the applications relate. Applications shall be taken up for examination by the examiner to whom they have been assigned in the order in which they have been filed except for those applications in which examination has been advanced pursuant to § 1.102. See § 1.496 for order of examination of international applications in the national stage.

* * * * *

6. Section 1.141 is revised to read as follows:

§ 1.141 Different inventions in one national application.

(a) Two or more independent and distinct inventions may not be claimed in one national application, except that more than one species of an invention, not to exceed a reasonable number, may be specifically claimed in different claims in one national application, provided the application also includes an allowable claim generic to all the claimed species and all the claims to species in excess of one are written in dependent form (§ 1.75) or otherwise include all the limitations of the generic claim.

(b) Where claims to all three categories, product, process of making, and process of use, are included in a national application, a three way requirement for restriction can only be made where the process of making is distinct from the product. If the process of making and the product are not distinct, the process of using may be joined with the claims directed to the product and the process of making the product even though a showing of distinctness between the product and process of using the product can be made.

Subpart C—International Processing Provisions

7. The authority for Subpart C is revised to read as follows:

Authority: Pub. L. 94-131, 89 Stat. 685; Pub. L. 99-616, 35 U.S.C 351 through 376.

8. Section 1.401 is amended to redesignate paragraph (g) as paragraph (i) and add new paragraphs (g) and (h) as follows:

§ 1.401 Definitions of terms under the Patent Cooperation Treaty

* * * * *

(g) "Demand," when capitalized, means that document filed with the International Preliminary Examining Authority which requests an international preliminary examination.

(h) "Annexes" means amendments made to the claims, description or the drawings before the International Preliminary Examining Authority.

* * * * *

9. Section 1.414 is revised to read as follows:

§ 1.414 The United States Patent and Trademark Office as a Designated Office or Elected Office.

(a) The United States Patent and Trademark Office will act as a Designated Office or Elected Office for international applications in which the United States of America has been designated or elected as a State in which patent protection is desired.

(b) The United States Patent and Trademark Office, when acting as a Designated Office or Elected Office during international processing will be identified by the full title "United States Designated Office" or by the abbreviation "DO/US" or by the full title "United States Elected Office" or by the abbreviation "EO/US".

(c) The major functions of the United States Designated Office or Elected Office in respect to international applications in which the United States of America has been designated or elected, include:

(1) Receiving various notification throughout the international stage and

(2) Accepting for national stage examination international applications which satisfy the requirements of 35 U.S.C. 371.

10. Under "General Information," a new § 1.416 is added to read as follows:

§ 1.416 The United States International Preliminary Examining Authority.

(a) Pursuant to appointment by the Assembly, the United States Patent and Trademark Office will act as an International Preliminary Examining Authority for international applications filed in the United States Receiving Office and in other Receiving Offices as may be agreed upon by the Commissioner, in accordance with agreement between the Patent and Trademark Office and the International Bureau.

(b) The United States Patent and Trademark Office, when acting as an International Preliminary Examining Authority, will be identified by the full title "United States International Preliminary Examining Authority" or by the abbreviation, "IPEA/US."

(c) The major functions of the International Preliminary Examining Authority include:

(1) Receiving and checking for defects in the Demand;
(2) Collecting the handling fee for the International Bureau and the preliminary examination fee for the United States International Preliminary Examining Authority;

(3) Informing applicant of receipt of the Demand;

(4) Considering the matter of unity of invention;

(5) Providing an international preliminary examination report which is a non-binding opinion on the questions whether the claimed invention appears to be novel, to involve an inventive step (to be non-obvious), and to be industrially applicable; and

(6) Transmitting the international preliminary examination report to applicant and the International Bureau.

11. Section 1.431 is amended by revising paragraph (d)(2) to read as follows:

§ 1.431 International application requirements.

* * * * *

(d) * * *

(2) The designation fee, or the amount necessary to cover all the designations made in the request if not paid by the applicant within one year from the priority date or within one month from

the date of receipt of the international application if that month expires after the expiration of one year from the priority date.

* * * * *

12. Section 1.432 is amended by revising paragraph (b) to read as follows:

§ 1.432 Designation of States and payment of designation fees.

* * * * *

(b) The designation fees may be paid upon filing of the international application, but must be paid before the expiration of one year from the priority date or within one month from the date of receipt of the international application if that month expires after the expiration of one year from the priority date. Failure to timely pay the designation fee for a particular Designated State will result in the withdrawal of that designation. Failure to timely pay at least one designation fee will result in the withdrawal of the international application.

13. Section 1.445 is amended by revising the title and paragraph (a) to read as follows:

§ 1.445 International application filing, processing and search fees.

(a) The following fees and charges for international applications are established by the Commissioner under the authority of 35 U.S.C. 376:

(1) A transmittal fee (see 35 U.S.C. 361(d) and PCT Rule 14), \$170.00.

(2) A search fee (see 35 U.S.C. 361(d) and PCT Rule 16) where:

(i) No corresponding prior United States national application with basic filing fee has been filed, \$520.00.

(ii) A corresponding prior United States national application with basic filing fee has been filed, \$350.00.

(3) A supplemental search fee when required, per additional invention, \$140.00.

§ 1.475 [Redesignated as § 1.472]

14. Section 1.475 is redesignated as § 1.472.

15. A new § 1.475 is added following the heading, "Unity of Invention," to read as follows:

§ 1.475 Unity of invention before the International Searching Authority.

(a) An international application before the International Searching Authority will be considered to have unity of invention if the claims are in accordance with PCT Rule 13 (see paragraph (f) of this section).

(b) An international application containing claims to different categories of invention will be considered to have unity of invention if the claims are drawn only to one of the combinations of categories as set forth in PCT Rule 13.2 (see paragraph (f) of this section) or to the combination of—

(1) A product and a process for the manufacture of said product, or

(2) A product and a process of use of said product.

If an application contains claims to more or less than one of the combinations of categories set forth in PCT Rule 13.2 (see paragraph (f) of this section) or a combination set forth in paragraphs (b)(1) or (2) of this section, unity of invention may not be present.

(c) If an international application contains claims to a category of invention in addition to those categories included in any one of the combinations specified in paragraph (b) of this

section, lack of unity of invention may be held between the categories included in the combination and the claims to the additional category of invention.

(d) Unity of invention will exist where the claims are limited to one of the combinations of categories set forth in PCT Rule 13.2 (see paragraph (f) of this section) or in a combination set forth in paragraphs (b)(1) or (2) of this section. If multiple products, processes of manufacture or uses are claimed, the first invention of the category first mentioned in the claims of the application and the first recited invention of each of the other categories related thereto will be considered as the inventions to be searched. Any such holding by the examiner will be made of record as a holding of lack of unity of invention.

(e) The inventions recited by the claims of different categories must be related rather than independent inventions.

(f) The wording of PCT Rule 13 is as follows:

PCT Rule 13—Unity of Invention

13.1 Requirement

The international application shall relate to one invention only or to a group of inventions so linked as to form a single general inventive concept ("requirement of unity of invention").

13.2 Claims of Different Categories

Rule 13.1 shall be construed as permitting, in particular, one of the following three possibilities:

(i) in addition to an independent claim for a given product, the inclusion in the same international application of an independent claim for a process specially adapted for the manufacture of the said product, and the inclusion in the same international application of an independent claim for a use of the said product, or

(ii) in addition to an independent claim for a given process, the inclusion in the same international application of an independent claim for an apparatus or means specifically designed for carrying out the said process, or

(iii) in addition to an independent claim for a given product, the inclusion in the same international application of an independent claim for a process specially adapted for the manufacture of the product, and the inclusion in the same international application of an independent claim for an apparatus or means specifically designed for carrying out the process.

13.3 Claims of One and the Same Category

Subject to Rule 13.1, it shall be permitted to include in the same international application two or more independent claims of the same category (i.e., product, process, apparatus, or use) which cannot readily be covered by a single generic claim.

13.4 Dependent Claims

Subject to Rule 13.1, it shall be permitted to include in the same international application a reasonable number of dependent claims, claiming specific forms of the invention claimed in an independent claim, even where the features of any dependent claim could be considered as constituting in themselves an invention.

13.5 Utility Models

Any designated State in which the grant of a utility model is sought on the basis of an international application may, instead of Rules 13.1 to 13.4, apply in respect of the matters regulated in those Rules the provisions of its national law concerning utility models once the processing of the international application has started in that State, provided that the applicant shall be allowed at least two months from the expiration of the time limit applicable under Article 22 to adapt his application to the requirements of the said provisions of the national law.

16. Section 1.481 is redesignated as § 1.476 and is amended by revising paragraph (a) to read as follows:

§ 1.476 Determination of unity of invention before the International Searching Authority.

(a) Before establishing the international search report, the International Searching Authority will determine whether the international application complies with the requirement of unity of invention as set forth in PCT Rule 13 (see § 1.475(f)) and § 1.475.

17. Section 1.482 is redesignated as § 1.477 and is amended by revising the title and paragraph (b) to read as follows:

§ 1.477 Protest to lack of unity of invention before the International Searching Authority.

(b) Protest under paragraph (a) of this section will be examined by the Commissioner or the Commissioner's designee. In the event that the applicant's protest is determined to be justified, the additional fees or a portion thereof will be refunded.

18. A new Section 1.480 is added preceded by a heading to read as follows:

International Preliminary Examination

§ 1.480 Demand for international preliminary examination.

(a) On the filing of a Demand and payment of the fees for international preliminary examination (§ 1.482), the international application shall be the subject of an international preliminary examination. The preliminary examination fee (§ 1.482(a)(1)) and the handling fee (§ 1.482(b)) shall be due at the time of filing of the Demand.

(b) The Demand shall be made on a standardized printed form. Copies of the printed Demand forms are available from the Patent and Trademark Office. Letters requesting printed forms should be marked "Box PCT".

(c) If the Demand is made prior to the expiration of the 19th month from the priority date and the United States of America is elected, the provisions of § 1.495 shall apply rather than § 1.494.

(d) Withdrawal of a proper Demand will not entitle applicant to a refund of the preliminary examination fee or handling fee.

19. A new Section 1.482 is added to read as follows:

§ 1.482 International preliminary examination fees.

(a) The following fees and charges for international preliminary examination are established by the Commissioner under the authority of 35 U.S.C. 376:

(1) A preliminary examination fee is due on filing the Demand:

(i) Where an international search fee as set forth in § 1.445(a)(2) has been paid on the international application to the United States Patent and Trademark Office as an International Searching Authority, a preliminary examination fee of, \$370.00.

(ii) Where the International Searching Authority for the international application was an authority other than the United States Patent and Trademark Office, a preliminary examination fee of, \$570.00.

(2) An additional preliminary examination fee when required, per additional invention:

(i) Where a supplemental search fee as set forth in § 1.445(a)(3) has been paid on the international application to the United States Patent and Trademark Office as an International Searching Authority, \$125.00.

(ii) Where the International Searching Authority for the international application was an authority other than the United States Patent and Trademark Office, \$190.00.

(b) The handling fee is due on filing the Demand. Any necessary supplement to the handling fee shall be paid directly to the International Bureau.

(35 U.S.C. 6, 376)

20. A new § 1.484 is added to read as follows:

§ 1.484 Conduct of international preliminary examination.

(a) An international preliminary examination will be conducted to formulate a non-binding opinion as to whether the claimed invention has novelty, involves an inventive step (is non-obvious) and is industrially applicable.

(b) No international preliminary examination report will be established prior to issuance of an international search report.

(c) No international preliminary examination will be conducted on inventions not previously searched by an International Searching Authority.

(d) The International Preliminary Examining Authority will establish a written opinion if any defect exists or if the claimed invention lacks novelty, inventive step or industrial applicability and will set a non-extendable time limit in the written opinion for the applicant to respond.

(e) If no written opinion under paragraph (d) of this section is necessary, or after any written opinion and the response thereto or the expiration of the time limit for response to such written opinion, an international preliminary examination report will be established by the International Preliminary Examining Authority. One copy will be submitted to the International Bureau and one copy will be submitted to the applicant.

(f) An applicant will be permitted a personal or telephone interview with the examiner, which must be conducted during the non-extendable time limit for response by the applicant to a written opinion. Additional interviews may be conducted where the examiner determines that such additional interviews may be helpful to advancing the international preliminary examination procedure. A summary of any such personal or telephone interview must be filed by the applicant as a part of the response to the written opinion or, if applicant files no response, be made of record in the file by the examiner.

21. A new § 1.485 is added to read as follows:

§ 1.485 Amendments by applicant during international preliminary examination.

The applicant may make amendments at the time of filing of the Demand and within the time limit set by the International Preliminary Examining Authority for response to any written opinion. Any such amendments must—

(1) Be made by submitting a replacement sheet for every sheet of the application which differs from the sheet it replaces unless an entire sheet is cancelled and

(2) Include a description of how the replacement sheet differs from the replaced sheet.

If an amendment cancels an entire sheet of the international application, that amendment shall be communicated in a letter.

22. A new § 1.487 is added to read as follows:

§ 1.487 Unity of invention before the International Preliminary Examining Authority.

(a) An international application before the International Preliminary Examining Authority will be considered to have unity of invention if the claims are in accordance with PCT Rule 13 (see § 1.475(f)).

(b) An international application containing claims to different categories of invention will be considered to have unity of invention if the claims are drawn only to one of the combinations of categories as set forth in PCT Rule 13.2 (see § 1.475(f)) or to the combination of—

(1) A product and a process for the manufacture of said product or

(2) A product and a process of use of said product.

If an application contains claims to more or less than one of the combinations of categories of invention set forth in PCT Rule 13.2 (see § 1.475(f)) or a combination set forth in paragraphs (b)(1) or (2) of this section, unity of invention may not be present.

(c) If an international application contains claims to a category of invention in addition to those categories included in any one of the combinations specified in paragraph (b) of this section, lack of unity of invention may be held between the categories included in the combination and the claims to the additional category of invention.

(d) Unity of invention will exist where the claims are limited to one of the combinations of categories set forth in PCT Rule 13.2 (see § 1.475(f)) or a combination set forth in paragraphs (b)(1) or (2) of this section. If multiple products, processes of manufacture or uses are claimed, the first invention of the category first mentioned in the claims of the application and the first recited invention of each of the other categories related thereto will be considered as the inventions to be examined. Any such holding by the examiner will be made of record as a holding of lack of unity of invention.

(e) The inventions recited by the claims of different categories must be related rather than independent inventions.

23. A new § 1.488 is added to read as follows:

§ 1.488 Determination of unity of invention before the International Preliminary Examining Authority.

(a) Before establishing any written opinion or the international preliminary examination report, the International Preliminary Examining Authority will determine whether the international application complies with the requirement of unity of invention as set forth in § 1.487.

(b) If the International Preliminary Examining Authority considers that the international application does not comply with the requirement of unity of invention, it may:

(1) Issue a written opinion and/or an international preliminary examination report, in respect of the entire international application and indicate that unity of invention is lacking and specify the reasons therefor without extending an invitation to restrict or pay additional fees. No international preliminary examination will be conducted on inventions not previously searched by an International Searching Authority.

(2) Invite the applicant to restrict the claims or pay additional fees, pointing out the categories of invention found, within a set time limit which will not be extended. No international preliminary examination will be conducted on inventions not previously searched by an International Searching Authority, or

(3) If applicant fails to restrict the claims or pay additional fees within the time limit set for response, the International Preliminary Examining Authority will issue a written opinion and/or establish an international preliminary examination report on the main invention and shall indicate the relevant facts in the said report. In case of any doubt as to which invention is the main invention, the invention first mentioned in the claims and previously searched by an International Searching Authority shall be considered the main invention.

(c) Lack of unity of invention may be directly evident before considering the claims in relation to any prior art, or after taking the prior art into consideration, as where a document discovered during the search shows the invention claimed in a generic or linking claim lacks novelty or is clearly obvious, leaving two or more claims joined thereby without a common inventive concept. In such a case the International Preliminary Examining Authority may raise the objection of lack of unity of invention.

24. A new § 1.489 is added to read as follows:

§ 1.489 Protest to lack of unity of invention before the International Preliminary Examining Authority.

(a) If the applicant disagrees with the holding of lack of unity of invention by the International Preliminary Examining Authority, additional fees may be paid under protest, accompanied by a request for refund and a statement setting forth reasons for disagreement or why the required additional fees are considered excessive, or both.

(b) Protest under paragraph (a) of this section will be examined by the Commissioner or the Commissioner's designee. In the event that the applicant's protest is determined to be justified, the additional fees or a portion thereof will be refunded.

(c) An applicant who desires that a copy of the protest and the decision thereon accompany the international preliminary examination report when forwarded to the Elected Offices, may notify the International Preliminary Examining Authority to that effect any time prior to the issuance of the international preliminary examination report. Thereafter, such notification should be directed to the International Bureau.

25. A new § 1.491 is added preceded by a new heading to read as follows:

National Stage

§ 1.491 Entry into the national stage.

An international application enters the national stage when the applicant has filed the documents and fees required by 35 U.S.C. 371(c) within the periods set forth in § 1.494 or § 1.495.

26. A new § 1.492 is added to read as follows:

§ 1.492 National stage fees.

The following fees and charges for international applications entering the national stage under 35 U.S.C. 371 are established by the Commissioner under 35 U.S.C. 376:

(a) The basic national fee;

(1) Where an international preliminary examination fee as set forth in § 1.482 has been paid on the international application to the United States Patent and Trademark Office:

By a small entity (§ 1.9(f))\$150
By other than a small entity\$300

(2) Where no international preliminary examination fee as set forth in § 1.482 has been paid to the United States Patent and Trademark Office, but an international search fee as set forth in § 1.445(a)(2) has been paid on the international application to the United States Patent and Trademark Office as an International Searching Authority:

By small entity (§ 1.9(f))\$170
By other than small entity\$340

(3) Where no international preliminary examination fee as set forth in § 1.482 has been paid and no international search fee as set forth in § 1.445(a)(2) has been paid on the international application to the United States Patent and Trademark Office:

By a small entity (§ 1.9(f))\$225
By other than a small entity\$45

(4) Where the international preliminary examination fee as set forth in § 1.482 has been paid to the United States Patent and Trademark Office and the international preliminary examination report states that the criteria of novelty, inventive step (non-obviousness), and industrial applicability, as defined in PCT Article 33(1) to (4) have been satisfied for all the claims presented in the application entering the national stage (see § 1.496(b)):

By a small entity (§ 1.9(f))\$25
By other than a small entity\$50

(b) In addition to the basic national fee, for filing or later presentation of each independent claim in excess of 3:

By a small entity (§ 1.9(f))\$17
By other than a small entity\$34

(c) In addition to the basic national fee, for filing or later presentation of each claim (whether independent or dependent) in excess of 20 (Note that § 1.75(c) indicates how multiple dependent claims are considered for fee calculation purposes.):

By a small entity (§ 1.9(f))\$6
By other than a small entity\$12

(d) In addition to the basic national fee, if the application contains, or is amended to contain, a multiple dependent claim(s), per application:

By a small entity (§ 1.9(f))\$55
By other than a small entity\$110

(If the additional fees required by paragraphs (b), (c) and (d) are not paid on presentation of the claims for which the additional fees are due, they must be paid or the claims cancelled by amendment, prior to the expiration of the time period set for response by the Office in any notice of fee deficiency.)

(e) Surcharge for filing the basic national fee or oath or declaration later than 20 months from the priority date pursuant to § 1.494(c) or later than 30 months from the priority date pursuant to § 1.495(c):

By a small entity (§ 1.9(f))\$55
By other than a small entity\$110

(f) For filing an English translation of an international application later than 20 months after the priority date § 1.494(c)) or for filing an English translation of the international application or of any annexes to the international preliminary examination report later than 30 months after the priority date § 1.495(c) and (e)), ...\$26.00.

(35 U.S.C. 6, 376)

27. A new § 1.494 is added to read as follows:

§ 1.494 Entering the national stage in the United States of America as a Designated Office.

(a) Where no Demand has been filed with an appropriate International Preliminary Examining Authority by the expiration of 19 months from the priority date (see § 1.495), the applicant must fulfill the requirements of PCT Article 22 and 35 U.S.C. 371 within the time periods set forth in paragraphs (b) or (c) of this section in order to prevent the abandonment of the international application as to the United States of America. International applications for which those requirements are timely fulfilled will enter the national stage and obtain an examination as to the patentability of the invention in the United States of America.

(b) The applicant shall furnish to the United States Patent and Trademark Office not later than the expiration of 20 months from the priority date

(1) A copy of the international application, unless it has been previously communicated by the International Bureau or unless it was originally filed in the United States Patent and Trademark Office;

(2) A translation of the international application into the English language, if it was originally filed in another language;

(3) The basic national fee (see § 1.492(a); and
(4) An oath or declaration of the inventor (see § 1.497).

(c) The applicant may furnish any required English translation of the international application, the basic national fee and the oath or declaration of the inventor after 20 months but not later than the expiration of 22 months from the priority date. The payment of the processing fee set forth in § 1.492(f) is required for acceptance of an English translation later than the expiration of 20 months after the priority date. The payment of the surcharge set forth in § 1.492(e) is required for acceptance of the basic national fee or the oath or declaration of the inventor later than the expiration of 20 months after the priority date.

(d) A copy of any amendments to the claims made under PCT Article 19, and a translation of those amendments into English, if they were made in another language, must be furnished not later than the expiration of 20 months from the priority date. Amendments under PCT Article 19 which are not received by the expiration of 20 months from the priority date will be considered to be cancelled.

(e) Verification of the translation of the international application or any other document pertaining to an international application may be required where it is considered necessary, if the international application or other document was filed in a language other than English.

(f) The documents and fees submitted under paragraphs (b) and (c) of this section must be clearly identified as a submission to enter the national stage under 35 U.S.C. 371, otherwise the

submission will be considered as being made under 35 U.S.C. 111.

(g) The time limits set out in paragraphs (b), (c) and (d) of this section may not be extended pursuant to § 1.136 or otherwise.

(h) An international application becomes abandoned as to the United States 20 months from the priority date if a copy of the international application is not communicated to the Patent and Trademark Office prior to 20 months from the priority date where the United States has been designated but not elected prior to 19 months from the priority date. If a copy of the international application is communicated within 20 months to the Patent and Trademark Office, an international application will become abandoned as to the United States 22 months from the priority date if the required English translation(s), fees and oath or declaration under 35 U.S.C. 371(c) are not filed within 22 months from the priority date.

28. A new § 1.495 is added to read as follows:

§ 1.495 Entering the national stage in the United States of America as an Elected Office.

(a) Where a Demand has been filed with an appropriate International Preliminary Examining Authority and not withdrawn by the expiration of 19 months from the priority date, the applicant must fulfill the requirements of 35 U.S.C. 371 within the time periods set forth in paragraph (b) or (c) of this section in order to prevent the abandonment of the international application as to the United States of America. International applications for which those requirements are timely fulfilled will enter the national stage and obtain an examination as to the patentability of the invention in the United States of America.

(b) The applicant shall furnish to the United States Patent and Trademark Office not later than the expiration of 30 months from the priority date

(1) A copy of the international application, unless it has been previously communicated by the International Bureau or unless it was originally filed in the United States Patent and Trademark Office;

(2) A translation of the international application into the English language, if it was originally filed in another language;

(3) The basic national fee (see § 1.492(a); and

(4) An oath or declaration of the inventor (see § 1.497).

(c) The applicant may furnish any required English translation of the international application, the basic national fee and the oath or declaration of the inventor after 30 months but not later than the expiration of 32 months from the priority date. The payment of the processing fee set forth in § 1.492(f) is required for acceptance of an English translation later than the expiration of 30 months after the priority date. The payment of the surcharge set forth in § 1.492(e) is required for acceptance of the basic national fee or the oath or declaration of the inventor later than the expiration of 30 months after the priority date.

(d) A copy of any amendments to the claims made under PCT Article 19, and a translation of those amendments into English, if they were made in another language, must be furnished not later than the expiration of 30 months from the priority date. Amendments under PCT Article 19 which are not received by the expiration of 30 months from the priority date will be considered to be cancelled.

(e) A translation into English of any annexes to the international preliminary examination report, if the annexes were made in another language, must be furnished not later than the expiration of 30 months from the priority date. Translations of the annexes which are not received by the expiration of 30 months from the priority date may be submitted within 32 months from the priority date accompanied by the processing fee set forth in § 1.492(f). Translations of the annexes which are not timely received will be considered to be cancelled.

(f) Verification of the translation of the international application or any other document pertaining to an international application may be required where it is considered necessary, if the international application or other document was filed in a language other than English.

(g) The documents submitted under paragraphs (b) and (c) of this section must be clearly identified as a submission to enter the national stage under 35 U.S.C. 371, otherwise the submission will be considered as being made under 35 U.S.C. 111.

(h) The time limits set out in paragraphs (b), (c), (d) and (e) of this section may not be extended pursuant to § 1.136 or otherwise.

(i) An international application becomes abandoned as to the United States 30 months from the priority date if a copy of the international application is not communicated to the Patent and Trademark Office prior to 30 months from the priority date and a Demand for International Preliminary Examination which elected the United States of America has been filed prior to the expiration of 19 months from the priority date. If a copy of the international application is communicated within 30 months to the Patent and Trademark Office, an international application will become abandoned as to the United States 32 months from the priority date if the required English translation(s), fees and oath or declaration under 35 U.S.C. 371(c) are not filed within 32 months from the priority date.

29. A new § 1.496 is added to read as follows:

§ 1.496 Examination of international applications in the national stage.

(a) International applications which have complied with the requirements of 35 U.S.C. 371(c) will be taken up for action based on the date on which such requirements were met. However, unless an express request for early processing has been filed under 35 U.S.C. 371(f), no action may be taken prior to one month after entry into the national stage.

(b) A national stage application filed under 35 U.S.C. 371 may have paid therein the basic national fee as set forth in § 1.492(a)(4) if it contains, or is amended to contain, at the time of entry into the national stage, only claims which have been indicated in an international preliminary examination report prepared by the United States Patent and Trademark Office as satisfying the criteria of PCT Article 33(1)-(4) as to novelty, inventive step and industrial applicability. Such national stage applications in which the basic national fee as set forth in § 1.492(a)(4) has been paid may be amended subsequent to the date of entry into the national stage only to the extent necessary to eliminate objections as to form or to cancel rejected claims. Such national stage applications in which the basic national fee as set forth in § 1.492(a)(4) has been paid will be taken up out of order.

30. A new § 1.497 is added to read as follows:

§ 1.497 Oath or declaration under 35 U.S.C. 371(c)(4).

(a) When an applicant of an international application, if the inventor, desires to enter the national stage under 35 U.S.C. 371 pursuant to § 1.494 or § 1.495, he or she must file an oath or declaration in accordance with § 1.63.

(b) If the international application was made as provided in § 1.422, 1.423 or 1.425, the applicant shall state his or her relationship to the inventor and, upon information and belief, the facts which the inventor is required by § 1.63 to state.

31. A new § 1.499 is added to read as follows:

§ 1.499 Unity of invention during the national stage.

(a) An international application which has entered the national stage by meeting the requirements of 35 U.S.C. 371 will be considered to have unity of invention if the claims are in accordance with PCT Rule 13 (see § 1.475 (f)).

(b) An application in the national stage containing claims to different categories of invention will be considered to have unity of invention if the claims are drawn only to one of the combinations of categories as set forth in PCT Rule 13.2 (see § 1.475(f)) or to the combination of—

(1) A product and a process for the manufacture of said product or 31

(2) A product and a process of use of said product.

If an application contains claims to more or less than one of the combinations of categories of invention set forth in PCT Rule 13.2 (see § 1.475(f)) or a combination set forth in paragraphs (b)(1) and (2) of this section, unity of invention may not be present.

(c) If an application in the national stage contains claims to a category of invention in addition to those categories included in any one of the combinations specified in paragraph (b) of this section, lack of unity of invention may be held between the categories included in the combination and the claims to the additional category of invention.

(d) Unity of invention will exist in an application in the national stage where the claims are limited to one of the combinations of categories set forth in PCT Rule 13.2 (see § 1.475(f)) or a combination set forth in paragraph (b)(1) or (2) of this section. If multiple products, processes of manufacture or uses are claimed, the first invention of the category first mentioned in the claims of the application and the first recited invention of each of the other categories related thereto will be considered as the elected invention to be examined. Any such holding of an election by the examiner will be made in the form of a restriction requirement which confirms the election made by the presentation of the claims. Such a restriction requirement would be made on the basis of whether the inventions are independent and distinct. Applicant has the right to traverse such a restriction requirement in the response to the Office action in which the election is indicated.

(e) The inventions recited by the claims of different categories must be related rather than independent inventions.

(f) If the examiner finds that a national stage application lacks unity of invention, the examiner may in an Office action require the applicant in the response to the Office action to elect the invention to which the claims shall be restricted, this official action being called a requirement for restriction. Such requirement may be made before any action on the merits but may be made at any time before the final action at the discretion of the examiner. Review of any such requirement is provided under §§ 1.143 and 1.144.

(95) Summary Results of 1991 Patent Action Survey

The Patent and Trademark Office conducted a survey in the March-June 1991 period to gather information from patent practitioners and other Office "customers" about the quality of Office actions. Approximately 27,000 questionnaires (survey forms) were mailed with Office actions. Each survey form included 10 specific questions and provided space to make general comments. Each survey form identified only the Examining Group to which the application was assigned so that all responses would be completely anonymous.

Approximately 4,200 survey forms were returned (16% return rate).

Results

I. A tabulation of respondents' answers to the 10 specific questions revealed the following compliance rates relative to the accompanying Office actions:

35 U.S.C. 103 Rejections:

1. 72% identify portion of references relied on.
2. 70% indicate how teachings of references are modified or combined.
3. 65% communicate the rationale why the claimed invention would have been obvious.

35 U.S.C. 112, 1st para. rejections:

4. 58% sufficiently explain "new matter" position.
5. 67% sufficiently explain "non-enabling" disclosure position.

Final Rejection Practice:

- 6. 56% respond to applicant's arguments.
- 7. 52% of Advisory Actions identify new issues and/or new matter when denying entry.

Allowance Practice:

- 8. 90% of reasons for allowance were clear.

Miscellaneous:

- 9. 45% clearly communicate reasons for finding declarations/affidavits unpersuasive.
- 10. 54% of Examiner's Answers address appellant's arguments.

The questions relating to "Final Rejection Practice" and to the "Miscellaneous" topic areas asked whether examiners respond to attorney arguments and how attorneys interpret the examiners' responses to their arguments. These topic areas and others where there are relatively low compliance rates have been identified as areas of Office practice needing improvement.

The responses to the 10 survey questions show that continuous improvement has been achieved in several areas. For example, the high percentage of affirmative responses in the area of explaining 35 U.S.C. 103 rejections (72%, 70%, and 65%) reflects a clear improvement over internal surveys made within the last several years, and reflects the effectiveness of recent extensive Office training programs in this area. It is also apparent there is still room for further improvement. Another positive result was that 90% of respondents, commenting on Reasons for Allowance, felt that the reasons given were clear.

II. Analysis of respondents' general comments:

Over 1800 survey forms were returned with comments (43% of total responses). While these comments were directed toward many different areas, two major categories were apparent:

Category A: 62% of the comments expressed the need for additional quality improvement of actions.

The most commonly expressed comments in this category indicate that the quality of Office actions can be improved by giving a better explanation of the rationale or reasons in support of rejections. Examples of comments received include: all elements of claims are not addressed in 35 U.S.C. 102(b) rejections; one of the references used in a 35 U.S.C. 103 rejection is not explained; features of dependent claims were not treated; claim limitations were ignored; "boilerplate" 35 U.S.C. 103 rejections were being given; and it was difficult to understand the rationale for the rejection, and, therefore, to file a proper and meaningful response.

The second most common type of comment in this category indicated that examiners misunderstand an essential feature. For example: actions reflect a misunderstanding by the examiner of the scope and content of the prior art, the presently claimed invention, or the original disclosure. Further, comments indicate that some cited references seem to have no bearing on the claimed invention because the rejection of the claims is not supported by the disclosure of the applied reference.

Category B: 20% of the comments had compliments about the quality of Office actions.

The compliments acknowledged actions which presented a thorough analysis of the claim language with respect to the prior art references; which included suggestions for amendments to the claims so as to place the application in condition for allowance; and/or which gave a "tough" examination which would result in a stronger patent.

It is significant that the most common type of comment indicated that enhanced explanations would improve the quality of Office actions, while, at the same time, the second most common type of comment indicated that the quality of Office actions is considered to be very good in this regard. This seems to indicate that the quality of many Office actions are good, but that additional emphasis is still needed in this area.

Planned Initiatives:

The answers to the 10 questions and the comments are considered vital to current Office efforts to improve the quality of patent examination. The data, where statistically reliable, has been analyzed on an examining corps and individual group basis and the following initiatives have been, or will be, taken:

1. Update our continuing legal education program for experienced examiners with extra emphasis being placed on areas where improved performance is needed, such as the need for better motivation statements in rejections. Specific courses have been developed to provide tailored training in important areas, such as treatment of algorithms in claims, evaluating evidence submitted by applicants, and responding to applicant's arguments.
2. Enhance the Patent Academy curriculum for training junior examiners to place greater emphasis on the areas of examination where improved performance is needed, such as in responding to amendments after final rejection.
3. Implement focused training in each Examining Group to address specific technological/group specific problems that have been indicated by the survey. The training has been implemented in a variety of ways including one-on-one, art unit and group level programs. Form paragraphs have been developed to help ensure that applicant's arguments are appropriately considered and responded to in Office actions.
4. Develop follow-up surveys in order to determine if the corrective actions were successful. In this regard the answers to the questions and the concerns raised by respondents in their comments will serve as baselines for improvement.

The relatively small number of responses (only 16%, 4,200 responses from 27,000 survey forms mailed) resulted in statistically insignificant data for analysis of some questions at the group level. In part, this may have been due to confusion with prior perception surveys, requiring only a single response from each practitioner involved. Unlike perception surveys, each Patent Action Survey is specific to the Office action that accompanies it, and requests a brief response for that action. Hence, a practitioner who received more than one Office action with a survey form was requested to complete a survey form for each accompanying Office action.

The Office is planning follow-up surveys in FY-1992 and 1993. These surveys will be more meaningful and reliable if respondents answer the questions in as objective a manner as possible. Thus, respondents should try to objectively evaluate the accompanying examiner's action to see if that particular action did or did not include the feature(s) addressed by the question rather than whether there is agreement or disagreement with the examiner's position. Further, since greater participation would yield more reliable statistics, patent practitioners are encouraged to respond to future surveys.

Questions about the FY-1991 Patent Action Surveys should be directed to John Terapane, Director Group 1200, or Carolyn Ballard, Patent Action Survey Coordinator, both at (703) 308-0193.

(96) Report on the Quality Reinforcement Program

The Patent and Trademark Office (PTO) has instituted a Quality Reinforcement Program to identify services offered by the PTO that are in need of improvement. As a part of this program, the Office, in cooperation with the American Intellectual Property Law Association (AIPALA), has completed an evaluation of selected practices performed by both patent examiners and representatives of patent applicants during the examination process. The results of this evaluation are detailed in Volume I of the PTO Report of the Quality Reinforcement Program. A summary of the findings of this report is presented below. This summary is presented to report on the findings and

to solicit suggestions from both the public and employees of the Patent & Trademark Office on steps that might be taken to raise the level of performance of those practices found to be in need of improvement. The full report and evaluation, which is quite extensive with over 350 pages, is available at the PTO.

Address: Comments and inquiries should be addressed to: The Commissioner of Patents and Trademarks, Washington, D.C. 20231, to the attention of Edward Kubasiewicz, Director, Examining Group 250, Rm. CP4-9D19.

Date: Comments should be submitted by June 16, 1987.

DONALD J. QUIGG,
*Assistant Secretary and
Commissioner of Patents
and Trademarks.*

Summary of Volume 1—Report on Current Level of Performance of Selected Patent Examining Corps Practices

This is a summary of Volume I of the Quality Reinforcement Program Report, which addresses the current level of performance of selected Patent Examining Corps practices. This summary presents a background of the Quality Reinforcement Program and a synopsis of conclusions reached for each selected practice.

Background of the Quality Reinforcement Program

On Feb. 25, 1986, President Reagan issued an executive order establishing a comprehensive program for the improvement of productivity throughout all of government. From this executive order the Department of Commerce evolved a Productivity Improvement Program entitled PROJECT PRIDE. The program was announced as encompassing productivity, quality excellence and client satisfaction.

The role of U.S. Patent and Trademark Office (PTO) in PROJECT PRIDE centers around quality, and is entitled the Quality Reinforcement Program.

The goal of the PTO program is to improve the quality of patent examining functions and the timeliness and quality of other public services. In particular, the program focuses on improving the quality of practices performed in three different areas of the PTO, i.e., the Patent Examining Corps, the Office of Administration and the Office of Documentation.

The quality of an issued patent and the record before the PTO in the patented file are extremely important to the patent owner and to others who may be competitors or otherwise affected by the patent. Investment decisions and the recoupment of research, development and marketing expenditures often depend upon patent protection. Potential licensees and infringers need to know where they stand in regard to an issued patent. Patent owners and others need to be able to have a high degree of confidence in the validity of a patent. Valid patents and a clear and correct file record will help to eliminate unnecessary and expensive patent litigation costs which are currently estimated to total at least \$800 million per year.

The concern for productivity and productivity improvement is not a recent development at the PTO. During the past quarter of a century one of the most pressing problems for the Office has been a large and growing backlog of unexamined patent applications and the resulting long pendency time between filing an application and issuance of a patent. The average pendency of patent applications in 1964 was 37 months. However, average pendency dropped steadily in the 1970s until it culminated in an average pendency of 18 months in 1977. This pendency was shortlived due to a loss of adequate resources. However, pendency is once again falling and it is expected that an average pendency of 18 months will be achieved in 1989.

Historically, the Office has successfully responded to situations similar to the one in which it presently finds itself. Beginning in the 1960s when the backlog of new applications exceeded 200,000, a program designed to drastically increase the productivity of the Corps was initiated. Part of that program was what has since become known as "compact prosecution". An increased staff of examiners was restructured to take a new approach toward examining in which patentable subject matter was looked for and indicated as early in the prosecution of the case as possible, references were automatically furnished with

actions, attorneys were urged to originally file claims of the broadest possible range of scope, telephonic prosecution was instituted, first actions and application disposals became the measure of examiners' performance, preprinted first action forms were designed, etc.

The question before the Office now is whether sufficient attention is being given to quality. The intent of the Quality Reinforcement Program, as it applies to the Patent Examining Corps, is to take stock of the present situation and to consider whether any corrective action needs to be taken to improve the quality of the examination process.

The Office is currently using and improving various tools to assure a quality examined patent. These tools include the quality review program, supervisory reviews of examiner work through the performance appraisal system and through the promotion and signatory authority programs, improved and expanded examiner training, development of the automated patent system to improve the quality of examiner searching, recruitment of "top-of-the-class" new examiners, and detailed and clear guidelines on examining policy and procedure.

The Quality Reinforcement Program is a new quality tool for improving the actual quality of the patents issued as well as the record behind the issuance of these patents. This new program differs from the quality review program in that this program looks at the key pieces of the patent examining process that contribute to and make up the end product or patent rather than looking only at the end product. The Quality Reinforcement Program focuses on the effectiveness and consistency with which examiners apply existing law and procedures and how they communicate their findings to applicants. The program also focuses on the attorney's contribution to this work product. Lastly, the program focuses on the timeliness of some of the services provided by the Corps' clerical support staff. Such focusing is not intended to be carried out one time only. Rather, the methodology used in this program will be applied to any key pieces, identified by PTO personnel or the bar in the future, as needing a review of the type dictated by this program. The aim in short is to build quality and timeliness from the ground up and to maintain them at a high level.

This report presents and analyzes the findings of the Quality Reinforcement Program only as the findings relate to practices performed in the Patent Examining Corps. The portion of the program reported in this volume represents a cooperative effort between the Corps and the American Intellectual Property Law Association (AIPLA) through its Ad Hoc Committee on Quality. The focus is on certain practices involved in the prosecution, examination and processing of patent applications by both the PTO and by patent applicants and their representatives.

Methodology

The methodology adopted for the program comprises the following process:

1. select target practices,
2. determine the current quality or performance level of the target practices,
3. compare the current performance of the target practices to the desired level of performance,
4. implement, where appropriate, steps to raise the current level of performance to the desired level,
5. subsequently, determine the level of performance of the target practices, and
6. compare the current level of performance to the subsequently determined level of performance to determine what, if any, change has occurred.

Target Practices

A number of practices were targeted for the program as a result of complaints and concerns, raised by the bar and PTO personnel. The targeted practices are identified as follows:

A. Explanations of Rejections

This program targeted examiner "explanations of rejections" as a practice to be reviewed based in part on a de-emphasis by the Office on the degree to which examiners were required to include detailed explana-

tions of the supporting rationale behind their rejections during the 1970s. The PTO instituted the use of an abbreviated, handwritten form (PTO-1142) for the preparation of first Office actions during the early 1970s. The form provided for a cryptic description of how the references were being combined in a § 103 rejection and provided little space for explanation of the supporting rationale behind rejections. The form was mandatory for all first actions, and was discontinued in 1982 primarily due to complaints from the patent bar and the courts that examiner explanations of rejections were not sufficient. The inclusion of "explanations of rejections" as a targeted practice for this program enables the evaluation of whether further improvement is needed in this area.

B. Final Rejection Practice

This program targeted "final rejection practice" for review based in part on the conflicting needs of PTO and patent applicants/attorneys in this area of practice. In order to reduce the time applicants must wait to obtain a patent and to increase efficiency of the examination process, the PTO uses various incentives for examiners to make their rejections final early in the prosecution.

To the contrary, patent applicants often desire to have the examiner repeatedly reconsider his or her position or to continue to amend the claims. These conflicting incentives often lead to disputes relating to the propriety and/or timeliness of final rejections and to whether amendments are entered after an action has been made final.

C. Information Disclosure Statements

This program targeted "information disclosure statements" for review based upon concerns expressed by both applicants/attorneys and by the Patent Examining Corps over the submission of these statements.

Patent examiners, in the interest of efficiency and productivity, are benefited by the disclosure to the Office of all material information relating to the patentability of the application prior to their first Office action. However, this must be balanced against the practical reality that applicants/attorneys often don't become aware of material information until later in the prosecution, and don't have readily available translations of foreign documents or copies of documents for submission to the PTO. This practice looks at the extent to which the practical needs of both the PTO and the applicant/attorney are served by the procedures relating to "information disclosure statement".

D. Interviews

This program targeted "interviews" for review to determine the extent to which personal discussions are held between examiners and attorneys and to evaluate whether the parties consider personal interviews to be a productive or helpful means for clarifying issues that may not have been clearly communicated in earlier written communications. Selection of "interviews" as a targeted practice was based in part on isolated complaints by some examiners that interviews were not always productive for them and by some attorneys that some examiners are reluctant to hold interviews.

PTO procedures require that all business with the Office be conducted in writing (37 CFR § 1.2). To comply with this rule and still accommodate request for oral discussions with examiners, it is PTO policy that the substance of all personal interviews must be reduced to writing (see § 713.04 of the MPEP). Selection of "interviews" as a targeted practice was also based on concerns that the written record include an explanation of the substance of all oral interviews. Under this practice, the program focused on determining the perceptions of examiners and attorneys about interviews.

E. Responses by Applicant

This program targeted "responses by applicant" for review to determine the extent to which practitioners representing patent applicants submit responses to examiner actions that are complete and in compliance with current rules and procedures. Specific activities under this topic, such as the extent to which explanations of why claims are considered unobvious over the art cited by the examiner and the degree of compliance with 37 CFR § 1.116 when amendments are presented after a final rejection, were selected based upon some complaints by examiners about attorney responses in these areas.

F. Completeness of the Record

This program targeted "Completeness of the Record" for review based primarily upon the importance of a complete file record to those who must review patented files and make important decisions based upon the facts and determinations therein. The necessity of insuring a complete file record has been urged by such diverse interests as federal court judges, potential licensees, potential infringers, and those attempting to avoid infringement.

This topic looks at the extent to which examiners insure a complete file record by including a statement of reasons for allowance where appropriate, fully and properly record the search of the prior art, and check foreign priority information for accuracy and completeness. This topic does not look at the extent to which examiners explain their rejection; see targeted practice A, "Explanation of Rejections." The extent to which applicants file complete responses is covered in targeted practice E, "Responses by Applicant."

G. Compact Prosecution

This program targeted "Compact Prosecution" for review based upon its importance as a key element in current PTO efforts to reduce pendency time of applications to an average of 18 months. The premise behind compact prosecution is that pendency time will be minimized if each stage of prosecution is fully and thoroughly conducted by both examiners and applicants. The demands of such a standard have inevitably led to complaints from each side relating to the completeness of considerations and the willingness to take that "extra step". Examiners have been criticized for confining searches to only what is literally claimed, and for failing to indicate possible areas of patentability at the earliest possible stage. Applicants have been criticized for failure to claim all limitations that might be considered patentable prior to the initial search by the examiner, for amending the claims to include these limitations only after first action, and for failing to correct significant formal deficiencies prior to initial examination.

H. Appeal Practice

This program targeted "Appeal Practice" for review primarily due to the recent and substantial increase in the backlog of appealed applications awaiting decision by the Board of Patent Appeals and Interferences. Primary emphasis was placed on determining the extent to which appellant's brief and the examiner's answer are formally complete so that expeditious consideration may be given by the Board.

As a result of the high priority being given by the PTO to reduce the backlog of cases at the Board, additional survey questions were included to determine the extent to which additional requirements beyond those currently in effect for the preparation of the appellant's brief and examiner's answer would be useful to examiners and the Board.

I. Allowances After Appeal Brief

This program targeted "Allowances after Appeal" for review in response to complaints that examiners often

allow cases after appellant has filed a brief when the cases should have been allowed before the brief was filed.

J. Processing Times

This program targeted "Processing Times" for review based upon its importance to the PTO goal of reducing pendency of patent applications to 18 months.

DETERMINATION OF CURRENT LEVELS OF PERFORMANCE

The step of determining the current level of performance of the targeted practices was accomplished through a number of surveys.

One survey, called the Applications Survey, was an internal factual survey that involved selecting a sample of 150 applications on a random basis from all the examining groups. A survey team, comprising three Supervisory Patent Examiners (SPEs) and three reviewers from Quality Review, performed a detailed review of the applications according to a questionnaire, which was developed with the joint cooperation of the AIPLA Ad Hoc Quality Committee.

A second survey, called the AIPLA Survey, was an opinion questionnaire provided by the AIPLA to 5500 of its members. The questionnaire was developed jointly with the AIPLA Ad Hoc Quality Committee. The AIPLA questionnaire sought the perception of the attorneys of the quality of the work performed by the Corps relative to the targeted practices. Space was provided for the respondents to include comments on the questionnaire. Over 1100 attorneys responded to the questionnaire.

Another survey, called the Examiners Survey, was also an opinion questionnaire provided to all patent examiners and SPEs on a voluntary and anonymous basis. The questionnaire queried the examiners and SPEs about the practices of the practitioners before the PTO. Space was provided for the respondents to include comments on the questionnaire. Over 650 responses were received.

A fourth survey, called the Appeals Survey, was also an internal factual survey. The questionnaire was developed with the cooperation of the AIPLA Ad Hoc Quality Committee. The questionnaire sought data about the practices carried out in the appeal process in the PTO. For this survey, 60 applications were selected on a random basis from all the examining groups. The survey team performed a detailed review of the applications according to the questionnaire.

Three other surveys were used to gather data. All of these surveys were developed and conducted by the Office of Quality Review. Two surveys involved the review of 1878 allowed applications concerning information disclosure statements. Another survey involved the review of 290 applications allowed after appellant had filed an appeal brief, but before an examiner's answer was prepared.

Relative to the processing times, PALM reports were used to obtain data on the practices targeted for this activity.

COMPARISON OF CURRENT LEVELS TO DESIRED LEVELS

The step of comparing the current levels of performance to the desired or standard levels of performance was accomplished by setting out the desired or standard level for each target practice. Next, all the information provided by the surveys was analyzed for each target practice and compared to the desired or standard level for the target practice. The analysis resulted in the following general conclusions. (A detailed listing of all conclusions for each targeted practice is presented in Section VII of Volume I of the Quality Reinforcement Program Report.)

SUMMARY OF CONCLUSIONS

A. Explanations of Rejections

1. Identification of Statutory Basis for Rejection

Over 95% of the rejections under 35 USC §§ 103 and 112, second paragraph (clarity), cited the statutory basis for the rejection. With respect to rejections under 35 USC

§ 102, 92% of the rejections cited the statutory basis. Hence, no significant improvement is needed in specifying the statutory basis of a rejection based on 35 USC §§ 102, 103 or 112, second paragraph.

With respect to rejections under 35 USC § 112, first paragraph, 14-19% of the rejections based on a non-enabling disclosure and 42% of the rejections based on new matter failed to cite the statutory basis. Hence, improvement is needed in specifying that a rejection, based on new matter or the lack of an enabling disclosure, is under 35 USC § 112, first paragraph.

2. Explanation of Rejections Based on Prior Art

Approximately two-thirds of the rejections reviewed failed to explain why the claimed invention would have been obvious in view of the applied prior art. Over 75% of the attorneys responding to the AIPLA survey perceived rejections under 35 USC § 103 as lacking an explanation of why the claimed invention would have been obvious. Moreover, 70 comments from attorneys (the highest for any topic) were critical of the explanations of rejections under 35 USC § 103. Hence, significant improvement is needed to assure that rejections based on prior art appropriately communicate the rationale for such rejections.

3. Explanation of Rejections Under 35 USC § 112, First Paragraph, Non-Enabling Disclosure

Nineteen percent of all the non-enabling disclosure rejections reviewed failed to give reasons in support of the rejection. Hence, improvement is needed in explaining why a disclosure is non-enabling.

4. Explanation of Rejections Under 35 USC § 112, First Paragraph, New Matter

With respect to rejections based on new matter, 35% of the rejections reviewed failed to point out the language considered to be new matter, and 40% of these rejections did not give a reason why the language was considered new matter. Hence, significant improvements are needed in pointing out the language that is considered to be new matter, and explaining why the new matter is not supported by the disclosure as originally filed.

5. Explanation of Rejections Under 35 USC § 112, Second Paragraph

Approximately 90% of the rejections reviewed pointed out the claim language considered unclear. Thus, no significant improvement is needed in pointing out *what* claim language is considered unclear in rejections under the second paragraph of § 112.

Twenty-three percent of the non-final rejections reviewed failed to explain why the language was considered unclear. In final actions, 8% of the rejections failed to explain why the language was considered unclear. Hence, improvement is needed in explaining *why* the claim language is considered unclear in rejections under the second paragraph of § 112.

6. Alternative Rejections Under 35 USC §§ 102/103

Three percent of the actions reviewed contained alternative rejections under 35 USC §§ 102, 103. Ten percent of the examiners' answers reviewed contained similar rejections. The number of alternative rejections under either § 102 or § 103 was sufficiently low so that no further action is required.

B. Final Rejection Practice

1. Timely Development of Issues in Examiner and Attorney Communications

The perception surveys indicate that examiner actions and attorney responses leading up to final rejection do not adequately develop the issues. The objective Applications Survey data indicate that 32% of examiners' non-final actions do not fully respond to all arguments raised by the applicant. Improvement is needed by both examiners and attorneys in fully developing the issues prior to final.

Final rejections were found to treat all claims, but were deficient in answering all arguments presented by the applicant and in treating affidavits and declarations submitted to overcome rejections. Improvement is needed in responding to all issues raised during the prosecution when making a final rejection.

2. Appropriateness of Final Rejection

Thirteen percent of the final actions surveyed were considered premature. However, 91% of the final rejections reviewed were considered to be reasonable. Thirty-nine percent of the attorneys responding to the AIPLA survey perceived final actions as proper only occasionally or rarely.

Though examiners appear to be doing an acceptable job in making reasonable and proper final rejections, some improvement is needed. However, attorney perception is substantially lower than the factual findings. This may be due to a desire by attorneys for a more liberal after final procedure rather than improper examiner application of the current procedure.

3. Advisory Actions

Advisory actions were found to be mailed in a timely manner.

Thirty-three percent of the amendments filed after final were improperly refused entry. Only 46% of the attorneys responding to the AIPLA survey perceived that reasons given by examiners for the non-entry of amendments after final were clear almost always or most of the time. Moreover, only 50% of these attorneys perceived their response to final rejections to have been given full consideration.

In only 39% of the instances when an amendment to existing claims was entered after final did the advisory action clearly specify the grounds of rejection applicable to the amended claims.

Hence, significant improvements are needed in assuring that amendments after final:

- a. are not arbitrarily refused entry,
- b. are given sufficient consideration, and
- c. communicate the ground of rejection for any claim amended after the final rejection.

C. Information Disclosure Statements

1. Frequency and Timeliness of Submissions

Information disclosure statements are submitted either as statements in the specification or as separate papers in approximately 60% of the applications. Eighty-two percent of the statements are submitted prior to the first action. However, 47% are filed more than three months from the filing date. In 1978, just after 37 CFR § 1.56 was amended, only 21% of the statements were filed more than three months after the filing date. Twelve percent of applications on appeal had statements filed after the final rejection. Two percent of the statements are filed after the application has been allowed.

Only 11% of the statements filed more than three months after the filing date contained an explanation for the delay.

Hence, significant improvements are needed for assuring that information disclosure statements are filed in a timely manner, and with an explanation for the delay when filed late.

2. Submission Includes Explanation of Relevancy of Documents

The explanation of the relevance of the art is substantially below standard whether the citation is incorporated in the specification or is in a separate paper. Hence, significant improvement is needed in assuring that explanations of the relevance of documents cited in information disclosure statements are provided.

3. Copy of Documents Supplied

Copies of cited documents, regardless of type, are not provided in approximately 60% of cases when statements are incorporated into the specification. Even when

eliminating those statements citing only U.S. patent documents, the Applications Survey still shows a 25% level of noncompliance for specification-incorporated statements. There is a need for improvement in supplying copies of documents cited in specification-incorporated statements.

4. Translation of Foreign Documents Provided

Either a translation or a statement that a translation is not readily available is generally not provided when the citation is incorporated in the specification. While compliance with the standard is better when the citation is in a separate paper, compliance is still poor. Improvement is needed.

5. Form PTO-1449 or Equivalent

Since the use of PTO form 1449 is not mandatory, this section merely reports the degree to which the form is voluntarily used and is thus informational only. Form PTO-1449 is used in about 70% of disclosure statement submissions when the submission is in a separate paper. The form is used in about 25% of the disclosure statements incorporated in the specification.

6. Miscellaneous

Examiners considered art submitted prior to first action in 93% of cases reviewed. Improvement is needed to insure 100% compliance.

While the survey results indicate a perception by examiners that related compending applications are not being fully disclosed, no objective survey data was recorded on this topic. Since attorneys are only required to cite related applications that are *material*, the survey question does not measure perceived performance against the current standard. No conclusions can be reached based upon the survey data.

D. Interviews

1. Interviews in General

The results of the AIPLA survey indicate that, of the attorneys responding to the survey,

- a. 75% perceived interviews as productive,
- b. 89% perceived interviews to be kept as scheduled,
- c. 68% perceived examiners to be adequately prepared, and
- d. 85% perceived the interview summary form to be completed adequately.

The results of the Examiners Survey indicate that, of the examiners responding to the survey,

- a. 53% perceived interviews as productive,
- b. 96% perceived interviews to be kept as scheduled,
- c. 88% perceived attorneys to be adequately prepared, and
- d. 67% perceived attorneys as making the substance of the interview of record.

The survey results indicate that attorneys perceive that examiners are willing to grant at least one interview if timely requested. No need for improvement would appear necessary. A substantial number of attorneys (approximately 30%) feel that examiners are only occasionally or rarely willing to discuss and attempt to resolve substantive issues at interviews. However, examiners often express the desire to reserve commitments until after an interview so that full consideration of all points could be made. It cannot be concluded from the survey data whether examiners could be making more substantive commitments at interviews. No need for improvement is indicated. Some improvement is needed by attorneys in ensuring that an adequate written record of the substance of all interviews is provided.

2. Telephone Restriction

As a general policy, the examiner should telephone the attorney of record and request an oral election when

making a restriction requirement. In 62% of the restriction requirements reviewed, the policy was followed. However, the telephone is not required to be used when examiners know that an election will not be made by phone. The number of instances of the remaining 38% where no restriction was made for this reason was not determined. Hence, while it appears that some improvement is needed, the degree of need for improvement cannot be determined without further study.

E. Responses by Applicant

1. Responses under 37 CFR § 1.111

Approximately 90% of the responses reviewed were technically fully responsive to Office actions. However, the percentage of responses that explained why the claimed invention would have been unobvious in view of the prior art was significantly lower. Moreover, some of the comments from examiners indicate that they feel responses often argue references individually rather than address the combination of references set forth in the prior Office action. At least part of this may be due to the lack of an examiner explanation in rejections how references are used and combined.

Hence, no significant improvement is needed in assuring that responses under § 1.111 great all objections and rejections. However, significant improvement is needed in assuring that responses include an explanation of why it would have been unobvious to combine or modify the references in the manner suggested by the examiner.

2. Responses Under 37 CFR § 1.116

Only 16% of the amendments filed after a final rejection that were reviewed presented a showing of good and sufficient reasons why they were necessary and why they were not presented earlier. Moreover, 48% of the examiners and SPEs responding to the Examiners Survey perceived that attorneys generally do not start serious prosecution or make substantial amendments until after the final rejection.

Hence, significant improvement is needed in assuring that responses under § 1.116 explain why an amendment was not presented earlier.

3. Appeal Briefs—Responses to Rejections

Ninety-four percent of the briefs reviewed contained an explanation why the examiner's modification of the references would have been unobvious. Hence, no significant improvement is needed in assuring that briefs adequately communicate why the examiner's rejection is considered improper.

4. Affidavits/Declarations Submitted to Overcome Rejections

Approximately 20% of affidavits/declarations are not filed in a timely manner. Hence, improvement is needed in assuring that affidavits/declarations are submitted in a timely manner.

Examiner perception of the sufficiency of affidavits to either establish proper "nexus" when asserting commercial success or to present evidence to substantiate an allegation of "secondary considerations" was very low, indicating a need for at least some attorney improvement.

F. Completeness of the Record

1. Reasons for Allowance

In 22% of the applications reviewed, the reason for allowance was not clear from the record. Moreover, only 50% of the attorneys responding to the AIPSA Survey perceived the reason for allowance made of record by the examiner, as clearly establishing why the claims were allowed. Hence, significant improvement is needed in assuring that the record clearly explain why the claims were allowed.

2. Recordation of Searches

Eighty-five percent of the applications surveyed had search boxes properly filled out by the examiner. Ap-

proximately 45% of the applications, wherein an automated search was made, were lacking information about the automated search. Hence, improvements are needed in assuring that the search data are recorded in a complete and accurate manner.

3. Foreign Priority Data Verified

The priority/PCT data appearing on the face of the file wrapper were not verified in 23% of the applications reviewed. Hence, a significant improvement is needed in assuring that the priority/PCT data appearing on the file jacket are verified.

G. Compact Prosecution

1. Adequacy of Applications Prior to First Action

Applications should be devoid of obvious informalities. Significant improvement is needed in foreign origin applications since 70% of the examiners surveyed perceived foreign applications as containing substantial formal deficiencies almost always or most of the time. However, only 16% of the examiners perceived U.S. origin applications as containing substantial formal deficiencies.

The disclosure should be readily understandable and the claims should clearly define the invention to enable the examiner to conduct an adequate search. Improvement is needed in foreign origin applications since 20% of the examiners surveyed perceive such applications as lacking an adequate disclosure to permit examination almost always or most of the time. However, 97% of these examiners perceive U.S. origin applications as containing an adequate disclosure.

Claims should be presented that range from the broadest to the most detailed that applicant is willing to accept. Substantial improvement is needed in this area since the Applications Survey shows that only approximately 60% of the applications surveyed contained such a range of claims.

2. Searches

The first search should cover the invention as described and claimed. Substantial improvement is needed in conducting a more thorough search at the time of the first action since 50% of the applications surveyed revealed newly applied art in subsequent actions that should have been applied in a previous action.

A search should be made in the issuing class/subclass. Improvement is needed in this area because 11% of the allowed applications reviewed did not indicate that the issuing class/subclass was searched.

3. Indication of Allowable Subject Matter

Examiners should communicate certain aspects or features of applicant's invention that if properly claimed would receive favorable consideration. Significant improvement is needed in this area since only 59% of the applications that were deemed appropriate for an indication of allowable subject matter had such an indication.

H. Appeal Practice

1. Appellant's Brief—Format

Ninety-five percent of the briefs reviewed contained a concise explanation of the invention. However, only 46% of the explanations contained a reference back to the drawings and/or specification. Hence, a significant improvement is needed in assuring that appellant's explanation of the invention refers to the drawing and/or specification. Ninety-five percent of the briefs reviewed contained a copy of the claims. Hence, no significant improvement is needed in assuring that appellants provide a copy of the claims on appeal.

In addition, formal matters that are not currently required in briefs were found to be included in the surveyed briefs to the following extent,

- a. 27% of the briefs included a separate summary of the issues on appeal,

- b. 53% of the briefs included a citation of the references as well as an explanation of each reference,
- c. 7% of the briefs included a reference back to the drawings or specification in the copy of the claims presented in the brief; however, 58% of the examiners surveyed thought that an appeal brief would be more useful if the claims on appeal were read on the drawings or specification, and
- d. 2% of the briefs pointed out an exemplary claim; however 60% of the examiners surveyed thought that an appeal brief would be more useful if appellant is required to state whether all the claims on appeal stand or fall together.

The formal requirements of the brief should be reviewed to determine if these additional requirements would improve the manner in which issues on appeal and evidence in support thereof are set forth in the brief.

2. Examiner's Answer—Format

Ninety percent of the answers surveyed identified the status of all the claims in the applications. One hundred percent of the answers cited all the references relied upon in the appeal and pointed out any deficiencies in the copy of the claims provided by appellant. Hence, no significant improvements are needed in the format of the examiners' answers, as measured against the formal requirements for examiner's answers.

In addition, formal matters that are not currently required in examiner's answers were found to be included in the surveyed answers to the following extent,

- a. 15% of the answers included a summary of the issues on appeal,
- b. 40% of the answers included an explanation of the invention, and
- c. 28% of the answers included an explanation of the references.

The formal requirements of the examiner's answer should be reviewed to determine if these additional requirements would improve the manner in which issues on appeal and evidence in support thereof are set forth in the examiner's answer.

3. Examiner's Answer—Completeness

Seventy-two percent of the answers reviewed responded to every significant argument raised in the briefs. Hence, a significant improvement is needed in assuring that examiners' answers respond to every significant argument/issue raised by appellants.

4. Post Examiner's Answer Practice

The Appeals Survey shows that a substantial number of reply briefs are merely noted with no further comment by the examiner. The findings are inconclusive regarding the propriety of the reply briefs or whether reply briefs are being treated properly by examiners.

I. Allowance After Appeal Brief

Thirty-nine percent of applications allowed after an appeal brief had been filed were found to have no change in appellant's position. Hence, significant improvement is needed in assuring that applications are allowed at the earliest appropriate stage of prosecution.

J. Processing Times

1. 16 Mailing of Office Actions

Substantial improvement in mailing Office actions earlier than one month from the day when the examiners are given credit for the Office action has been accomplished since the inception of the Quality Reinforcement Program.

2. Mailing of Notices of Allowance

Substantial improvement in assuring that Notices of Allowances are mailed promptly has been accomplished

since the inception of the Quality Reinforcement Program.

3. Responses to Amendments After Final

Substantial improvement in mailing responses to amendments after final has been accomplished since the inception of the Quality Reinforcement Program.

Perceptions

In addition to reaching conclusions on the current level of performance of each target practice, the program determined the opinions of patent examiners and representatives of applicants on various topics involved in the examination process. A summary of their perceptions is presented below.

Examiner legal proficiency was perceived by attorneys to be in definite need of improvement.

Examiner technical competency, care in doing the job, and neatness of attire were perceived by attorneys as more positive than negative, but in need of improvement.

Clerical competency and care in doing the job were perceived by attorneys to be in definite need of improvement.

Clerical functions including neatness of attire, cooperativeness, courteousness and availability were perceived as being more positive than negative, but with substantial room for improvement.

Attorney handling of foreign origin applications was perceived by examiners to be deficient in preparation of the case for examination. Attorney practices including continued prosecution after final, interview practice, submission of information disclosure statements and explanation of reasons for disagreement with § 103 rejections were also of concern to examiners.

[1078 OG 22]

(97) Report on Results of an Oct. 1985—Feb. 1986 Survey on the Citation by Applicants of Information Disclosure Statements in Patent Applications

This report summarizes the data compiled from a sample of 1200 allowed utility applications surveyed in the Office of Quality Review during the period of Oct. 1, 1985 to Feb. 14, 1986.

For purposes of the survey, a "citation", whether appearing in the specification or in a separate paper, is defined as either (1) a listing of patents or publications together with a concise explanation of the relevance of each listed item (i.e. an "information disclosure statement" under 37 CFR 1.98(a)), or (2) a "mere listing" of patents or publications. In addition, a "reference", or "document", is defined as any patent or other publication cited by applicant.

This survey report is similar to and presented in the same general format as the survey reports published in the *Official Gazette* of Nov. 23, 1976, pages 1356 and 1357, of Sept. 26, 1978, pages 22 and 23, and of Aug. 12, 1980, pages 8 and 9. It should be noted, however, that the phrase "prior art statement" used throughout the three previous survey reports has been replaced by the more appropriate phrase "information disclosure statement" reflecting the current terminology of 37 CFR 1.97-1.99 as amended.

This survey indicates, among other things, that 60% of the sampled applications include citations by applicants. This is somewhat less than the 63% finding in the survey reported in the 1980 O.G. and the 64% finding in the 1978 survey but still represents an improvement over the 54% finding in the 1976 survey. In addition, more citations are being submitted later in the prosecution than previously. The percentage of applications having citations submitted in separate papers has increased while the percentage of applications having such papers submitted within three months of the filing of an application is down from 79% in 1978 and 73% in 1979 to 53% presently. Also, while the percentage of applications having citations accompanied by copies of references cited has increased, overall compliance with Office guidelines has decreased.

A separate, recent informal review of citations made after allowance similarly indicated frequent noncompliance with the guidelines of Section 609 of the Manual of Patent Examining Procedure. Often, citations were in the form of prior art search reports made by foreign patent offices many months or years earlier, submitted without copies of the references, discussion of

materiality, or any explanation for the late submission. The Office is presently considering action to remedy these problems

The statistics are otherwise presented without comment as follows:

	Chem.	Elec.	Mech.	Total
(1) Number of applications in sample	350	415	435	1200
(Percent of total sample)	29%	35%	36%	100%

*Commissioner of Patents
and Trademarks.*

[1040 OG 24]

(98) **Express Abandonments**

Experience over the past several months has indicated the need to clarify and re-emphasize existing practice regarding express abandonments submitted under 37 CFR 1.138.

Since 1966, when Rule 138 was revised, it is no longer required that the applicant and the assignee of record, if any, sign an express abandonment. The revised rule indicates that a patent application may be expressly abandoned by an attorney or agent of record. Therefore, prior to signing a declaration of express abandonment of a patent application, it is imperative that the attorney or agent of record exercise every precaution in ascertaining that the abandonment of the application is in accordance with the desires and best interests of the applicant. Moreover, special care should be taken to insure that the appropriate application from a group of related applications is correctly identified in the letter of abandonment.

A declaration of abandonment signed by the applicant or his attorney or agent of record becomes effective when an appropriate official of the Office takes action in recognition of the declaration. When so recognized, the date of abandonment may be the date of recognition or a different date if so specified in the declaration itself. For example, where a continuing application is filed with a request to abandon the prior application as of the filing date accorded the continuing application, the date of the abandonment of the prior application will be in accordance with the request once it is recognized.

Action in recognition of an express abandonment may take the form of an acknowledgement by the examiner or the Patent Issue Division of the receipt of the express abandonment, indicating that it is in compliance with 37 CFR 1.138 (see Section 711.01 MPEP). Alternatively, recognition may be no more than the transfer of drawings to a new application pursuant to instructions which include a request to abandon the application containing the drawings to be transferred (see 37 CFR 1.60 and Section 608.02(i) MPEP).

It is suggested that divisional applications being submitted under 37 CFR 1.60 be reviewed before filing to ascertain whether the prior application should be abandoned. Recent experience reveals that some divisional applications are being filed under 37 CFR 1.60 with requests to transfer the drawings from, and abandon, the prior application. Following the recognition of the abandonment, the attorney or agent signing the request informs the Office that the request was made by mistake for any one of a number of reasons. Care should be exercised in situations such as these as the Office looks on express abandonments as acts of deliberation, intentionally performed.

Another common situation involves the submission of an express abandonment following the allowance of an application. The express abandonment may not be recognized unless it is actually received by appropriate officials in time to act before the date of issue. In those cases, once a patent number and issue date have been assigned to the application, it is considered too late to act on the express abandonment unless a petition under Rule 313(b) or Rule 183 is granted (see Section 711.01 of MPEP).

APR. 7, 1975.

WILLIAM FELDMAN,
*Deputy Assistant Commissioner
for Patents.*

[934 O.G. 2]

(99) **Notice of Abandonment for Failure to Prosecute Application**

Effective immediately the Patent Examining Corps will mail a communication, concerning all applications becoming abandoned in the Corps for failure to prosecute, to the correspondence address of record.

The communication to be mailed will merely comprise a copy of the first page of the Office action, to which applicant failed

to properly respond, the copy including stamped language thereon indicating that the application has become abandoned and the date that the copy was mailed. The language stamped on the copy will be as follows: APPLICATION HAS BECOME ABANDONED.THISNOTICEMAILED:

In no case will the mere failure to receive a notice of abandonment affect the status of an abandoned application.

This new procedure should enable applicants to take appropriate and diligent action to reinstate an application inadvertently abandoned for failure to timely respond to an official communication. In most cases, a petition to revive under 37 CFR 1.137 will be the appropriate remedy. It may be that a response to the Office action was mailed to the Office with a certificate of mailing declaration as a part thereof (notice of October 26, 1976: 951 O.G. 1342) but was office. In this instance, adequate relief may be available by means of a petition to withdraw the holding of abandonment.

In any instance, if action is not taken promptly after receiving the notice of abandonment, appropriate relief may not be granted.

If a lack of diligent action is predicated on the contention that neither the Office action nor the notice of abandonment was received, one may presume that there is a problem with the correspondence address of record. Accordingly, your attention is directed to recent notices of May 28, 1975, and September 9, 1976, dealing with changes of address (935 O.G. 1352 and 951 O.G. 454). In essence, it is imperative that a paper notifying the Office of a change of address be filed promptly in each application in which the correspondence address is to be changed.

If an application is abandoned or a patent lapsed for an excessive time a terminal disclaimer may be required. A terminal disclaimer may also be required where the holding of abandonment or lapse is withdrawn but a determination is made that action attempting to correct the problem should have been taken in a more diligent manner.

WILLIAM FELDMAN,
*Deputy Assistant Commissioner
for Patents.*

May 9, 1977.

[959 O.G. 24]

(100) **Requirement for a Response Under
37 CFR 1.136 and 1.137 Where a
Continuing Application is Being Filed.**

This notice is intended to clarify the requirements for a response as required by 37 CFR 1.136 or 1.137 in situations involving a petition for extension of time or a petition to revive an abandoned application for the purpose of filing a continuing application.

In those instances where an extension of time or a revival of an abandoned application is sought solely for the purpose of filing a continuing application under 35 U.S.C. 120 and where the prior application is to be abandoned in favor of the continuing application, the filing of a response as required by 37 CFR 1.111, 1.113, 1.192 or other regulation is considered to be an unnecessary expenditure of resources by the applicant. Accordingly, in these situations, the Patent and Trademark Office will accept the filing of a continuing application as a response under 37 CFR 1.136 or 1.137.

To facilitate processing by the Office, any such petition for extension of time or petition to revive should specifically refer to the filing of a continuing application and also include an express abandonment of the prior application conditioned upon the granting of the petition and the granting of a filing date to the continuing application.

GERALD J. MOSSINGHOFF,
*Commissioner of Patents
and Trademarks.*

May 13, 1983.

[1031 OG 11]

(101) **Petitions Under 37 CFR 1.183 to Waive
the One Year Time Period Requirement in 37
CFR 1.137(b), 1.155(c) and 1.316(c)**

Petitions to revive an unintentionally abandoned application (37 CFR 1.137(b)) or to accept an unintentionally late paid issue fee (37 CFR 1.155(c) or 1.316(c)) must be filed within one year of the date on which the application became abandoned. In the last sentence of the above-noted subsections of 37 CFR, the Commissioner of Patents and Trademarks has indicated that petitions under 37 CFR 1.183 to waive any time period requirements for filing a request pursuant to these subsections will not be considered, but will be returned to the applicant. However, it has become apparent that under certain very limited conditions, the interests of the patent system would be better served by considering such petitions.

These very limited conditions arise when an application becomes abandoned due to an action or inaction by applicant and the Patent and Trademark Office performs a positive, documented and Official act* (e.g., by issuing an Official document) which could lead a reasonable individual to conclude that the action or inaction was appropriate. If this conclusion is a contributing factor in the applicant's failure to realize the true, abandoned status of his application in time to file a petition under one of the above-noted subsections, then conditions exist under which a § 1.183 petition will be considered.

For example, if an applicant files papers for a continuing application under 37 CFR 1.60 or 1.62 on a date when the parent application is abandoned (e.g., the applicant neglected to obtain an extension of time in the parent application), the requirements of these regulations are not satisfied and the papers should not be processed into an application. However, if in spite of this error the Office issues a filing receipt for the continuing application, a reasonable individual could conclude that the continuing application had been properly filed on a date when the parent application was pending. Further, if the lack of copendency between the parent and the continuing applications is not discovered until after one year from the date on which the parent application became abandoned, the opportunity to obtain copendency by reviving the parent application under 37 CFR 1.137(b) is lost. As an additional example, if an applicant submits a check for payment of the issue fee and the payment is improper (e.g., the check is not timely submitted or is returned to the Office unpaid due to insufficient funds), the application should be held abandoned. However, if in spite of the improper issue fee payment the Office issues the application as a patent, a reasonable individual could conclude that the issue fee payment had been proper. Further, if the improper issue fee payment is not discovered until after one year from the date on which the application became abandoned, the opportunity to request acceptance of a late paid issue fee under 37 CFR 1.155(c) or 1.316(c) is lost.

The abandonment problems described in the above-noted examples are clearly attributed to an error on the part of the applicant. Nevertheless, such a problem could be aggravated when the Office performs a positive, documented and Official act* which, in the circumstances recounted above, may be a contributing factor in the loss of an opportunity to rectify this problem by filing a petition under one of the above-noted subsections. In light of these factors, the Commissioner will exercise his authority under 37 CFR 1.183 to waive the one year period requirement for filing a petition pursuant to 37 CFR 1.137(b), 1.155(c) or 1.316(c) providing the following strictly limited conditions are present:

- (1) The applicant's action or inaction which caused the application to become abandoned was clearly an unintentional oversight which resulted from a bona fide attempt, as evidenced by Patent and Trademark Office records, to comply with patent statutes, rules and procedures in order to keep the application pending as desired; and
- (2) The Office performed a positive, documented and Official act* which could lead a reasonable individual to conclude that the action or inaction was proper and this conclusion was a contributing factor in the applicant's failure to realize the true abandoned status of his application in time to file a petition under one of the above-noted subsections; and
- (3) A petition under 37 CFR 1.183 and one of the above-noted subsections is filed within three (3) months of the date applicant is notified by the Office or otherwise

becomes aware of the abandoned status of the application; and

- (4) The petition is accompanied by a terminal disclaimer with fee under 37 CFR 1.321 dedicating to the public a terminal part, equivalent to the period of abandonment, of the term of any patent granted on the application or on any application entitled to the benefit of the filing date of the application under 35 USC 120.

For a transitional period of three (3) months from the date of this Notice, the requirement for filing a petition within three (3) months of the date referred to in condition (3), above, will not be enforced providing:

- (a) the abandoned application could have been restored to pending status if a petition under one of the above-noted subsections had been timely filed; and
- (b) the applicant made a bona fide attempt, as evidenced by Patent and Trademark Office records, to restore the abandoned application to pending status within three months of the date applicant was notified by the Office or otherwise became aware of the abandoned status of the application.

Applicants should note that this is intended to be a very limited extension of the Commissioner's discretion in exercising his authority to waive the one year period required under the above-mentioned subsections. For this reason, the above-noted conditions and provisions will be strictly adhered to and any petition under § 1.183 which fails to comply with these conditions or provisions will be denied.

***NOTE: THE FAILURE OF THE PATENT AND TRADEMARK OFFICE TO SEND AN OFFICIAL COMMUNICATION (E.G., A NOTICE OF ABANDONMENT) IS NOT CONSIDERED TO BE A POSITIVE, DOCUMENTED AND OFFICIAL ACT WITHIN THE MEANING OF THIS NOTICE.**

JAMES E. DENNY,
Deputy Assistant,
Commissioner for Patents

Aug. 26, 1985.

[1059 OG 4]

(102) **Petitions to Revive Patent Applications
Waiver of Provisions of 37 CFR § 1.137(b)**

Effective immediately, the Commissioner is suspending under 37 CFR § 1.183 that portion of 37 CFR § 1.137(b) which precludes revival of an application unintentionally abandoned for failure to timely submit a filing fee and/or an oath or declaration. 35 U.S.C. § 111; 37 CFR § 1.53(d).

Upon a review of the plain meaning of 35 U.S.C. §§ 41(a)7, 111, 133, and 151, it is concluded that § 41(a)7 does not preclude reviving a patent application unintentionally abandoned for failure to timely submit a filing fee and/or an oath or declaration pursuant to a request by the Patent and Trademark Office (Office) under 35 U.S.C. § 111 and 37 CFR § 1.53(d). Accordingly, the Office will now act on the merits of petitions to revive applications which became abandoned for failure to timely submit an appropriate filing fee and/or an oath or declaration by the applicant.

Appropriate revisions will be made to 37 CFR 1.137(b) and the Manual of Patent Examining Procedure in due course.

Nov. 5, 1990

HARRY F. MANBECK, Jr.
Assistant Secretary and Commissioner
of Patents and Trademarks

[1121 O.G. 6]

(103) **Diligence in Filing Petitions to Revive
and Petitions to Withdraw
the Holding of Abandonment**

Once an application becomes inadvertently abandoned, it is incumbent on applicant to act with diligence in providing the response necessary to continue prosecution. Petitions to revive or to withdraw the holding of abandonment must be filed promptly after applicant is notified or otherwise becomes aware of the abandonment. Unless and until the Commissioner accepts applicant's response as sufficient and complete to revive the application or to withdraw the holding of abandonment, the application remains abandoned and the burden continues to rest with applicant to exercise diligence.

Some practitioners have demonstrated a lack of diligence in filing or renewing a petition to revive or a petition to withdraw the holding of abandonment. This appears to have been a conscious decision on the practitioners' part based on the belief that any delay in filing or renewing a petition could be cured by filing a terminal disclaimer equivalent to the period of delay in prosecuting the application. While the Office does have a policy of requiring a terminal disclaimer in those situations where there has been a delay of more than six months in filing a grantable petition to revive an application that has become abandoned [37 CFR 1.137(c), 1.316(d) and 1.317(c)], the terminal disclaimer has never been authorized or set forth in the rules as a substitute for diligence. Indeed, such an interpretation would be contrary to the traditional concept of reasonable diligence and is contrary to the explicit requirement of 37 CFR 1.137(a), 1.155(b), 1.181(f), 1.316(b) and 1.137(b) that a petition to revive be filed promptly. See *In re Application of Takao*, 17 USPQ2d 1155 (Comm'r. 1990).

JAMES E. DENNY
Assistant Commissioner for
Patents-designate

[1124 OG 23]

(104)

Department of Commerce
Patent and Trademark Office
37 CFR Part 1
[Docket No. 920670-2170]
RIN 0651-AA57

**Changes in Procedures for Revival of Patent
Applications and Reinstatement of Patents**

Agency: Patent and Trademark Office, Commerce

Action: Notice of Proposed Rulemaking

Summary: The Patent and Trademark Office (Office) is proposing to amend the rules of practice in patent cases to: (1) modify the petition requirements for reviving abandoned applications; (2) extend the provisions for revival under the unintentional standards to applications abandoned under § 1.53(d); (3) modify the requirements for a petition to accept late payment of a maintenance fee filed more than six months after expiration of a patent; (4) modify the requirements for a petition to accept unavoidably delayed payment of a maintenance fee; and (5) provide for reinstatement of a patent where the delay in timely payment of a maintenance fee was unintentional, in the event that proposed statutory changes are enacted.

Dates: Written comments must be received on or before Nov. 13, 1992, to ensure consideration. An oral hearing will not be conducted.

Addresses: Address written comments to the Office of the Assistant Commissioner for Patents, Box DAC, Washington, D.C. 20231, marked to the attention of Abraham Hershkovitz. Comments may be sent by fax to the attention of Abraham Hershkovitz at (703) 305-8825.

For Further Information Contact: Abraham Hershkovitz by telephone at (703) 305-9282 or by mail marked to his attention and addressed to Office of the Assistant Commissioner for Patents, Box DAC, Washington, D.C. 20231.

Supplementary Information: Current regulations provide for revival of patent applications which were abandoned for failure to timely prosecute or failure to timely pay an issue fee under the unavoidable standard. In certain situations, patent applications can also be revived under the unintentional standard. A petition to revive under the unavoidable standard is subject to a requirement that the petition be filed promptly after the applicant is notified of, or otherwise becomes aware of, the abandonment.

Under the unavoidable standard, any petition filed more than six months after the date of abandonment of the application must be accompanied by a terminal disclaimer disclaiming the period of abandonment. Promptness is not a requirement for petitions filed under the unintentional standard. The proposed change would encourage promptness in filing petitions to revive under the unintentional standard by requiring the filing of a terminal disclaimer when the period of abandonment exceeds six months. The Office calculates the period of abandonment as being the number of months from the date of abandonment until the date of filing of a grantable petition. The proposed change would require that, in a manner similar to the current practice under the unavoidable standard, a grantable petition under the unintentional standard would have to be filed within six months of the date of abandonment, or the requirement for a terminal disclaimer would have to be satisfied. As an example, a petition to revive, under the unavoidable or the unintentional standard, filed within two months from the date of abandonment, if grantable, would not require a terminal disclaimer. However, if the petition to revive is dismissed for a deficiency such as insufficient showing (for petitions under the unavoidable standard), or lack of a statement (for petitions under the unintentional standard), or lack of a sufficient petition fee, or lack of a proposed response, and a renewed petition to revive providing the lacking item is timely filed, but is filed more than six months after the date of abandonment, then a terminal disclaimer would be required.

Section 41 of title 35, United States Code, establishes fees that the Commissioner shall charge for patent-related matters. A bill to amend title 35 with respect to the late payment of maintenance fees has been introduced on June 4, 1992, in the House of Representatives as H.R. 5328 (hereafter, Bill). The Bill proposes to:

(1) amend 35 U.S.C. § 41(c)(1) to permit reinstatement of a patent which expired unintentionally for failure to timely pay the maintenance fee, provided that the payment is made within eighteen months after the six-month grace period specified in 35 U.S.C. § 41(b); and

(2) amend 35 U.S.C. § 41(a)(7) to require a petition fee for an unintentionally delayed payment for maintaining a patent in force.

The unintentional standard is not currently available for applications abandoned under § 1.53(d) (specifically excluded in § 1.137(b)) and patents expired for failure to pay a maintenance fee. The proposed changes (some of which hinge on enactment of the Bill) would expand the applicability of the unintentional standard to applications abandoned under § 1.53(d) and patents expired for failure to pay a maintenance fee.

In order to expedite implementation of the proposed legislative changes, the proposed amendments to the rules of practice include proposals contingent upon enactment of the Bill. These changes are found in §§ 1.17(m), 1.378(a) and 1.378(c).

If the Bill is not enacted, the proposed changes to §§ 1.17(m), 1.378(a) and 1.378(c) will not include the changes proposed in the Bill regarding acceptance of late payment of maintenance fees, where the delay in payment was unintentional.

Discussion of Specific Sections to be changed or added:

(1) Patent application processing fees. (§ 1.17)

Paragraph 1.17(1) is proposed to be amended to provide for petition fees for reinstating a patent under the unavoidable standard in a manner similar to the fees charged for reviving an abandoned application or accepting delayed payment of an issue fee. In the event that the Bill is enacted, paragraph 1.17(m) is proposed to be amended to require a petition fee for reinstating a patent under the unintentional standard in a manner similar to the fee charged for reviving an abandoned application or for accepting delayed payment of the issue fee. These changes are proposed to ensure consistency with the proposed changes in § 1.378.

(2) Unavoidable or unintentional abandonment of an application

Sections 1.137, 1.155, 1.316 and 1.317 each provide for petitions to the Commissioner for relief from failure to timely

comply with a requirement of the Office. Section 1.137 provides for petitions to revive patent applications abandoned for failure to prosecute where the delay in prosecution was unavoidable (§ 1.137(a)) or the delay was unintentional (§ 1.137(b)). Section 1.155 provides for petitions for acceptance of late payment of issue fees in applications for design patents as though no abandonment had ever occurred where the delay in payment was unavoidable (§ 1.155(b)) or unintentional (§ 1.155(c)). Section 1.316 provides for petitions for acceptance of late payment of issue fees in applications for patent as though no abandonment had ever occurred where the delay in payment was unavoidable (§ 1.316(b)) or unintentional (§ 1.316(c)). Section 1.317 provides for acceptance of late payment of the balance of issue fees in patents as though no lapse had ever occurred where the delay in payment was unavoidable (§ 1.317(b)) or unintentional (§ 1.317(c)).

In order to obtain relief under the unavoidable standard in the above-noted sections, the regulations require the filing of a terminal disclaimer if the petition is filed more than six months after the date of abandonment. See §§ 1.137(c), 1.155(d), 1.316(d) and 1.317(d). The terminal period to be disclaimed is a period equivalent to the period of abandonment. The period of abandonment is considered to be the number of months lapsed from the date of abandonment until the date of filing of a grantable petition.

Petitions filed under the unintentional standard in the above-noted sections have no express promptness requirement, nor a terminal disclaimer requirement. This has led, in many cases, to a practice contrary to the intent of the unintentional provisions. Applicants have often delayed filing a petition under the unintentional standard until close to the expiration of the one-year period. In other instances, applicants delayed filing a petition under the unintentional standard because they miscalculated the one-year period and this resulted in the applicant being unable to show that the delay was unavoidable or that relief was available under the unintentional standard. *In re Application of S*, 8 USPQ2d 1630 (Comm'r pat. 1988).

The proposed change to require terminal disclaimers for petitions under the unintentional standard filed more than six months after the date of abandonment will help to ensure that petitions are filed promptly after discovery of abandonment. The same degree of promptness is required regardless of whether the petitions are filed under the unavoidable or the unintentional standards. The requirement for a terminal disclaimer should not be viewed as a substitute for the requirement of prompt filing of a petition. See *In re Application of Takao*, 17 USPQ2d 1155 (Comm'r Pat. 1990); "Diligence in Filing Petitions to Revive and Petitions to Withdraw the Holding of Abandonment", 1124 *Off. Gaz. Pat. Office* 33 (March 19, 1991).

Sections 1.137(c), 1.155(d) and 1.316(d) are proposed to be amended to reflect the current practice that a terminal disclaimer filed for the purpose of reviving an application also applies to a patent granted on any continuing application entitled to the benefit of the filing date of the subject application under 35 U.S.C. 120.

Applicants may petition under the provisions of § 1.183 for a waiver of the requirement that a period equivalent to the period of abandonment be disclaimed if it can be shown that an extraordinary situation exists in which justice requires waiver of this requirement.

In situations where petitions under the above-noted sections were not grantable because of insufficient evidence submitted or petitioner's failure to comply with certain requirements, the Office dismissed those petitions with an indication as to the missing items and warned petitioners that if reconsideration was desired a renewed petition supplying the omissions had to be filed promptly. While the promptness requirement was not precisely defined, § 1.181(f) requires the filing of petitions within two months from an action complained of in order to avoid possible dismissal of the petition on the grounds that it was not timely filed. It is proposed that the above-noted sections be amended to specify a two-month period or such time as may be set in the dismissal as being the appropriate deadline for requesting reconsideration. In those situations where petitioners require more time to gather additional evidence or items needed for reconsideration, an extension of time of up to four months may be obtained under the provisions of § 1.136(a). The filing of a renewed petition within the period specified in the decision

or within the extended period permitted under § 1.136 will satisfy the promptness requirement of petitions under the unavoidable standard. Upon failure to timely file a renewed petition under the unavoidable standard, the Office will require a showing of unavoidable delay for the entire period of abandonment. Upon failure to timely file a renewed petition under the unintentional standard, petitioner may be subject to a loss of the right to proceed under the unintentional standard if more than one year lapsed between the date of abandonment and the date the renewed petition is filed.

The unintentional provisions specified in § 1.137(b) will apply to applications abandoned under § 1.53(d). Effective November 5, 1990, the Commissioner waived, under § 1.183, the exception specified in § 1.137(b) as to applicability of petitions under the unintentional standards to applications abandoned under § 1.53(d). See "Petitions to Revive Patent Applications Waiver of Provisions of 37 CFR § 1.137(b)", 1121 *Off. Gaz. Pat. Office* at 6 (December 4, 1990). The proposed change in § 1.137(b) will incorporate this new practice into the regulations.

The Office adopted a policy wherein, under certain strictly limited conditions, the one-year period for requesting revival of an unintentionally abandoned application could be waived. Accordingly, the prohibition against requests for waiver found in §§ 1.137(b), 1.155(c), 1.316(c) and 1.317(c) is proposed to be deleted. See "Petitions Under 37 CFR 1.183 to Waive the One Year Time Period Requirement in 37 CFR 1.137(b), 1.155(c) and 1.316(c)" at 1059 *Off. Gaz. Pat. Office* 4 (October 1, 1985). However, applicants are cautioned that waiver of the one-year deadline under the unintentional standard will continue to be subject to strictly limited conditions.

(3) Issue and term of design patents (§ 1.155)

Section 1.155 is proposed to be amended to be consistent with the proposed changes to § 1.137. Paragraph (b) of § 1.155 is further proposed to be modified to correct a typographical error. In the reference to fee section 1.17(1), the letter (l) should have appeared instead of the numeral (1).

(4) Application abandoned for failure to pay issue fee (§ 1.316)

Section 1.316 is proposed to be amended to be consistent with the proposed changes to § 1.137. Paragraph (b) of § 1.316 is further proposed to be modified to correct a typographical error. In the reference to fee section 1.17(1), the letter (l) should have appeared instead of the numeral (1).

(5) Lapse patents; delayed payment of balance of issue fee (§ 1.317)

Section 1.317 contains a provision regarding issue fees paid prior to October 1, 1982. Prior to that date, the Office charged an initial base issue fee and, depending on the size of the specification and drawings printed, billed applicants for a balance of issue fee due. Subsequent to October 1, 1982, all applicants were required to pay the same issue fee regardless of the size of the specification and drawings. Reference to the date in § 1.317 may be deleted at this point in time since it is no longer relevant to pending applications. However, practice under this section continues to be relevant when a fee change becomes effective before payment is received.

In order to satisfy the requirement of 35 U.S.C. 151, the Office mails out a Notice of Allowance which specifies the sum of the issue fee due. When the issue fee amount is changed, the sum specified on the Notice of Allowance is at times different from that required at the time payment is actually received in the Office. If applicants submit issue fee payments in the amount specified on the Notice of Allowance after the effective date of a fee increase, then a balance of issue fee is due. The Office will accept payment of the amount specified on the Notice of Allowance and process the application into a patent. In accordance with 35 U.S.C. 151 and 37 CFR 1.317, a notice is sent to applicants requesting payment of the balance of the issue fee due (the difference between the fee due at time of receipt of payment in the Office and the fee specified on the Notice of Allowance) and setting a three-month period for payment. See *In re Mills*, 12 USPQ2d 1847 (Comm'r Pat. 1989). Failure to pay the balance of the issue fee within the specified three-month period will result

in lapse of the patent. Therefore, the reference to October 1, 1982, in § 1.317 is proposed to be replaced by language specifying the consequences of failure to pay the issue fee due at the time payment is made.

Other amendments are proposed to make § 1.317 consistent with the proposed changes in § 1.137. Paragraph (b) of § 1.317 is further proposed to be modified to correct a typographical error. In the reference to fee section 1.17(1), the letter (l) should have appeared instead of the numeral (1).

(6) Delayed payment of maintenance fee (§ 1.378)

Petitions to accept delayed payment of a maintenance fee in an expired patent require a showing of unavoidable delay. In the case of petitions filed more than six months after expiration of a patent, § 1.378(c) further requires a showing that the failure to timely pay the maintenance fee was beyond the control of the patentee. The Office has determined that the "beyond the control" standard does not find adequate support in the relevant statute (35 U.S.C. 41(c)) or in the legislative history of Public Law 97-247. See "Acceptance of Delayed Payment of Maintenance Fees in Expired Patents", 1115 *Off. Gaz. Pat. Office* 18 (June 12, 1990).

Furthermore, the practice of accepting late payment of maintenance fees is proposed to be modified to be more analogous to the practice of reviving abandoned applications and accepting late payment of issue fees. Additionally, the public interest is best served by prompt reinstatement of a patent in which there was an unavoidable or unintentional delay in the timely payment of the maintenance fee.

The requirements for a petition to accept late payment of a maintenance fee, where the delay was unavoidable, are outlined in paragraph (b) of § 1.378. In addition to the maintenance fee and surcharge previously required, paragraph (b) is proposed to be amended to require a petition fee and prompt filing of a petition after the patentee is notified, or otherwise becomes aware, of the expiration of the patent.

The Bill, if enacted, would amend subsection 41(c)(1) of title 35, United States Code, to permit the Commissioner to accept late payment of any maintenance fee filed within eighteen months after the six-month grace period, or within such shorter time as fixed by the Commissioner, if the delay in payment is shown to the satisfaction of the Commissioner to have been unintentional. In order to implement the legislation proposed in the Bill, if enacted, paragraph (c) of § 1.378 is proposed to be modified to permit the filing of a petition to accept late payment of a maintenance fee, where the delay in payment was unintentional.

It is in the public's interest to know as soon as possible if an expired patent will be reinstated. Accordingly, paragraph (c) of § 1.378 is proposed to be amended to permit reinstatement of an unintentionally expired patent, provided that the petition is filed within six months of the end of the grace period specified at 35 U.S.C. 41(b), or within two months of the date patentee became aware of the expiration of the patent, but not later than eighteen months after the grace period.

In addition to the timeliness deadlines set forth in the preceding paragraph, it is proposed that a petition filed under the unintentional standard of § 1.378(c) would have to include the petition fee set forth in § 1.17(m)(3), the required maintenance fee set forth in § 1.20 (e) through (g), the surcharge for an expired patent as set forth in § 1.20(i) and a statement that the delay in timely payment of the maintenance fee was unintentional.

For a transitional period of two months from the date of enactment of the Bill, the requirement, specified in proposed § 1.378(c)(5), that any petition, be filed within six months of the end of the grace period, or within two months of the date patentee became aware of the expiration of the patent, will be waived, sua sponte, pursuant to § 1.183 to allow consideration of any petition filed within eighteen months of the end of the grace period.

If the Bill is not enacted, the proposed changes to §§ 1.17, 1.378(a) and 1.378(c) will not include the changes proposed in the Bill relative to acceptance of late payment of maintenance fees under the unintentional standard.

Other Considerations

The proposed rule change is in conformity with the requirements of the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*), Executive Orders 12291 and 12612 and the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 *et seq.*

The General Counsel of the Department of Commerce has certified to the Chief Counsel for Advocacy, Small Business Administration, that these proposed rule changes will not have a significant adverse economic impact on a substantial number of small entities (Regulatory Flexibility Act, 5 U.S.C. 605(b)). The principal impact of these proposed changes is to incorporate existing Office policy into the regulations and to provide a more efficient procedure to revive abandoned applications.

The Office has determined that this proposed rule change is not a major rule under Executive Order 12291. The annual effect on the economy will be less than \$100 million. There will be no major increase in costs or prices for consumers; individuals; industries; Federal, state or local government agencies; or geographic regions because most of the proposed changes reduce procedural burdens. There will be no significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

The Office has also determined that this notice has no Federalism implications affecting the relationship between the National Government and the States as outlined in Executive Order 12612.

These proposed rule changes contain a collection of information requirements subject to the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 *et seq.*, which has previously been approved by the Office of Management and Budget under Control No. 0651-0011.

List of Subjects 37 CFR Part 1

Administrative practice and procedure, Freedom of information, Inventions and patents, Reporting and record keeping requirements

For the reasons set out in the preamble, and pursuant to the authority contained in 35 U.S.C. § 6, the Office proposes to amend 37 CFR Part 1 as follows, wherein deletions are indicated by brackets ([]) and additions by arrows (► ◄):

PART 1 - RULES OF PRACTICE IN PATENT CASES

1. The authority citation for 37 CFR Part 1 would continue to read as follows:

Authority: 35 U.S.C. 6, unless otherwise noted.

2. Section 1.17 is proposed to be amended by revising paragraphs (1) and (m) to read as follows:

§ 1.17 Patent application processing fees.

(1) For filing a petition:

1) For [the] revival of an unavoidably abandoned application under 35 U.S.C. sections 111, 133, 364, or 371, or

2) For ► the unavoidably ◄ delayed payment of the issue fee under 35 U.S.C. 151 ►, or

(3) For the unavoidably delayed payment of the maintenance fee under 35 U.S.C. 41(c)(1) ◄:

By a small entity (§ 1.9(f)) \$55.00

By other than a small entity \$110.00

(m) For filing a petition:

(1) For revival of an unintentionally abandoned application, or

(2) For the unintentionally delayed payment of the fee for issuing a patent ►, or

(3) For the unintentionally delayed payment of the fee for maintaining a patent ◄:

By a small entity (§ 1.9(f)) \$585.00

By other than a small entity \$1,170.00

3. Section 1.137 is proposed to be amended by revising paragraphs (a)-(c) and adding paragraphs (d) and (e) to read as follows:

§ 1.137 Revival of abandoned application.

(a) An application abandoned for failure to prosecute may be revived as a pending application if it is shown to the satisfaction of the Commissioner that the delay was unavoidable. A petition to revive an abandoned application must be promptly filed after the applicant is notified of, or otherwise becomes aware of, the abandonment, and must be accompanied by ►:

(1) a proposed response to continue prosecution of that application, or the filing of a continuing application, unless either has been previously filed;

(2) the petition fee as set forth in § 1.17(1); and

(3) a showing that the delay was unavoidable. ◄ [a showing of the causes of the delay, by the proposed response unless it has been previously filed, and by the petition fee set forth in § 1.17(1). Such] ► The ◄ showing must be a verified showing if made by a person not registered to practice before the Patent and Trademark Office.

(b) An application unintentionally abandoned for failure to prosecute [, except pursuant to § 1.53(d),] may be revived as a pending application if the delay was unintentional. [A petition to revive an unintentionally abandoned application must be filed within one year of the date on which the application became abandoned or be filed within three months of the date of the first decision on a petition to revive under paragraph (a) of this section which was filed within one year of the date of abandonment of the application.] A petition to revive an unintentionally abandoned application must be [accompanied by]:

(1) ► accompanied by a proposed response to continue prosecution of that application, or the filing of a continuing application, unless either has been previously filed;

(2) accompanied by the petition fee as set forth in § 1.17(m);

(3) accompanied by a statement that the abandonment was unintentional. ◄ [A statement that the abandonment was unintentional; (2) A proposed response unless it has been previously filed; and (3) a petition fee as set forth in § 1.17(m). Such] ► The ◄ statement must be a verified statement if made by a person not registered to practice before the Patent and Trademark Office. The Commissioner may require additional information where there is a question whether the abandonment was unintentional ►; and

(4) filed:

(i) within one year of the date on which the application became abandoned; or

(ii) within three months of the date of the first decision on a petition to revive under paragraph (a) of this section which was filed within one year of the date on which the application became abandoned. ◄

[The three month period set forth in this paragraph may be extended under the provisions of § 1.136(a), but no further extensions under § 1.136(b) will be granted. Petitions to the Commissioner under § 1.183 to waive any time periods for requesting revival of an unintentionally abandoned application will not be considered, but will be returned to the applicant.]

(c) Any petition pursuant to [paragraph] ► paragraphs ◄ (a) ► or (b) ◄ of this section not filed within six months of the date of abandonment ► of the application, ◄ must be accompanied by a terminal disclaimer with fee under § 1.321 dedicating to the public a terminal part of the term of any patent granted thereon equivalent to the period of abandonment of the application. ► The terminal disclaimer must also apply to any patent granted on any continuing application entitled under 35 U.S.C. § 120 to the benefit of the filing date of the application for which revival is sought.

(d) Any request for reconsideration or review of a decision refusing to revive an application upon petition filed pursuant to paragraphs (a) or (b) of this section, to be considered timely, must be filed within two months of the decision refusing to revive or within such time as set in the decision.

(e) The time periods set forth in this section cannot be extended, except that the three-month period set forth in paragraph (b)(4)(ii) and the time period set forth in paragraph (d) of this section may be extended under the provisions of § 1.136. ◄

4. Section 1.155 is proposed to be amended by revising paragraphs (b)-(d) and adding paragraphs (e) and (f) to read as follows:

§1.155 Issue and term of design patents.

(b) The Commissioner may accept the payment of the issue fee later than three months after the mailing of the notice of allowance as though no abandonment had ever occurred if upon petition the delay in payment is shown to have been unavoidable. The petition to accept the delayed payment must be promptly filed after the applicant is notified of, or otherwise becomes aware of, the abandonment, and must be accompanied by:

- (1) the issue fee, unless it has been previously submitted [.]
- (2) the fee for delayed payment [(§ 1.17(1)),] (§ 1.17(1)); and

(3) a showing that the delay was unavoidable. [Such] The showing must be a verified showing if made by a person not registered to practice before the Patent and Trademark Office.

(c) The Commissioner may, upon petition, accept the payment of the issue fee later than three months after the mailing of the notice of allowance as though no abandonment had ever occurred if the delay in payment was unintentional. [The petition to accept the delayed payment must be filed within one year of the date on which the application became abandoned or be filed within three months of the date of the first decision on a petition under paragraph (b) of this section which was filed within one year of the date of abandonment of the application.] The petition to accept the delayed payment must be [accompanied by]:

- (1) accompanied by the issue fee, unless it has been previously submitted [.]

- (2) accompanied by the fee for unintentionally delayed payment (§ 1.17(m)) [.] and

(3) accompanied by a statement that the delay was unintentional. [Such] The statement must be a verified statement if made by a person not registered to practice before the Patent and Trademark Office. The Commissioner may require additional information where there is a question whether the abandonment was unintentional; and

- (4) filed:

(i) within one year of the date on which the application became abandoned; or

(ii) within three months of the date of the first decision on a petition under paragraph (b) of this section which was filed within one year of the date on which the application became abandoned.

[The three-month period from the date of the first decision referred to in this paragraph may be extended under the provisions of § 1.136(a), but no further extensions under § 1.136(b) will be granted. Petitions to the Commissioner under § 1.183 to waive any time periods for requesting revival of an unintentionally abandoned application will not be considered, but will be returned to the applicant.]

(d) Any petition pursuant to [paragraph] paragraphs (b) or (c) of this section not filed within six months of the date of abandonment of the application, must be accompanied by a terminal disclaimer with fee under § 1.321 dedicating to the public a terminal part of the term of any patent granted thereon equivalent to the period of abandonment of the application. The terminal disclaimer must also apply to any patent granted on any continuing application entitled under 35 U.S.C. § 120 to the benefit of the filing date of the application for which revival is sought.

(e) Any request for reconsideration or review of a decision refusing to accept the delayed payment upon petition filed pursuant to paragraphs (b) or (c) of this section, to be considered timely, must be filed within two months of the decision refusing to accept the delayed payment or within such time as set in the decision.

(f) The time periods set forth in this section cannot be extended, except that the three-month period set forth in paragraph (c)(4)(ii) and the time period set forth in paragraph (e) of this section may be extended under the provisions of § 1.136.

5. Section 1.316 is proposed to be amended by revising paragraphs (b)-(d) and adding paragraphs (e) and (f) to read as follows:

§ 1.316 Application abandoned for failure to pay issue fee.

(b) The Commissioner may accept the payment of the issue fee later than three months after the mailing of the notice of allowance as though no abandonment had ever occurred if upon petition the delay in payment is shown to have been unavoidable. The petition to accept the delayed payment must be promptly filed after the applicant is notified of, or otherwise becomes aware of, the abandonment, and must be accompanied by:

- (1) the issue fee, unless it has been previously submitted [.]
- (2) the fee for delayed payment [(§ 1.17(1)),] (§ 1.17(1)); and

(3) a showing that the delay was unavoidable. [Such] The showing must be a verified showing if made by a person not registered to practice before the Patent and Trademark Office.

(c) The Commissioner may, upon petition, accept the payment of the issue fee later than three months after the mailing of the notice of allowance as though no abandonment had ever occurred if the delay in payment was unintentional. [The petition to accept the delayed payment must be filed within one year of the date on which the application became abandoned or be filed within three months of the date of the first decision on a petition under paragraph (b) of this section which was filed within one year of the date of abandonment of the application.] The petition to accept the delayed payment must be [accompanied by]:

- (1) accompanied by the issue fee, unless it has been previously submitted [.]

- (2) accompanied by the fee for unintentionally delayed payment (§ 1.17(m)) [.] and

(3) accompanied by a statement that the delay was unintentional. [Such] The statement must be a verified statement if made by a person not registered to practice before the Patent and Trademark Office. The Commissioner may require additional information where there is a question whether the abandonment was unintentional; and

- (4) filed:

(i) within one year of the date on which the application became abandoned; or

(ii) within three months of the date of the first decision on a petition under paragraph (b) of this section which was filed within one year of the date on which the application became abandoned.

[The three-month period from the date of the first decision referred to in this paragraph may be extended under the provisions of § 1.136(a), but no further extensions under § 1.136(b) will be granted. Petitions to the Commissioner under § 1.183 to waive any time periods for requesting revival of an unintentionally abandoned application will not be considered, but will be returned to the applicant.]

(d) Any petition pursuant to [paragraph] paragraphs (b) or (c) of this section not filed within six months of the date of abandonment of the application, must be accompanied by a terminal disclaimer with fee under § 1.321 dedicating to the public a terminal part of the term of any patent granted thereon equivalent to the period of abandonment of the application. The terminal disclaimer must also apply to any patent granted on any continuing application entitled under 35 U.S.C. § 120 to the benefit of the filing date of the application for which revival is sought.

(e) Any request for reconsideration or review of a decision refusing to accept the delayed payment upon petition filed pursuant to paragraphs (b) or (c) of this section, to be considered timely, must be filed within two months of the decision refusing to accept the delayed payment or within such time as set in the decision.

(f) The time periods set forth in this section cannot be extended, except that the three-month period set forth in paragraph (c)(4)(ii) and the time period set forth in paragraph (e) of this section may be extended under the provisions of § 1.136.

6. Section 1.317 is proposed to be amended by revising paragraphs (a)-(d) and adding new paragraphs (e) and (f) to read as follows:

§1.317 Lapsed patents; delayed payment of balance of issue fee.

(a) If the issue fee [was] paid [prior to October 1, 1982] ▶ is the amount specified in the Notice of Allowance, but a higher amount is required at the time the issue fee is paid ◀, any remaining balance of the issue fee is to be paid within three months from the date of notice thereof and, if not paid, the patent will lapse at the termination of the three month period.

(b) The Commissioner may accept the payment of the remaining balance of the issue fee later than the three months after the mailing of the notice thereof as though no lapse had ever occurred if upon petition the delay in payment is shown to have been unavoidable. The petition to accept the delayed payment must be promptly filed after the applicant is notified of, or otherwise becomes aware of, the lapse, and must be accompanied by ▶: ◀

(1) the remaining balance of the issue fee, unless it has been previously submitted [.] ▶: ◀

(2) the fee for delayed payment [(§ 1.17(1))] ▶ (§ 1.17(l)); ◀ and

(3) a showing that the delay was unavoidable. [Such] ▶ The ◀ showing must be a verified showing if made by a person not registered to practice before the Patent and Trademark Office.

(c) The Commissioner may, upon petition, accept the payment of the remaining balance of the ▶ issue ◀ fee later than three months after the mailing of the notice thereof as though no lapse had ever occurred if the delay in payment was unintentional. [The petition to accept the delayed payment must be filed within one year of the date on which the patent lapsed or be filed within three months of the date of the first decision on a petition under paragraph (b) of this section which was filed within one year of the date of the lapse of the patent.] The petition to accept the delayed payment must be [accompanied by] ▶: ◀

(1) ▶ accompanied by ◀ the remaining balance of the issue fee, unless it has been previously submitted [.] ▶: ◀

(2) ▶ accompanied by ◀ the fee for unintentionally delayed payment (§ 1.17(m)) [.] and ▶: ◀

(3) ▶ accompanied by ◀ a statement that the delay was unintentional. [Such] ▶ The ◀ statement must be a verified statement if made by a person not registered to practice before the Patent and Trademark Office. The Commissioner may require additional information where there is a question whether the delay in payment was unintentional ▶; and

(4) filed:

(i) within one year of the date on which the patent lapsed; or

(ii) within three months of the date of the first decision on a petition under paragraph (b) of this section which was filed within one year of the date on which the patent lapsed ◀. [The three-month period from the date of the first decision referred to in this paragraph may be extended under the provisions of § 1.136(a), but no further extensions under § 1.136(b) will be granted. Petitions to the Commissioner under § 1.183 to waive any time periods for requesting acceptance of an unintentionally delayed payment will not be considered, but will be returned to the applicant.]

(d) Any petition pursuant to [paragraph] ▶ paragraphs ◀ (b) ▶ or (c) ◀ of this section not filed within six months of the date of lapse ▶ of the patent, ◀ must be accompanied by a terminal disclaimer with fee under § 1.321 dedicating to the public a terminal part of the term of the patent equivalent to the period of lapse of the patent.

▶ (e) Any request for reconsideration or review of a decision refusing to accept the delayed payment upon petition filed pursuant to paragraphs (b) or (c) of this section, to be considered timely, must be filed within two months of the decision refusing to accept the delayed payment or within such time as set in the decision.

(f) The time periods set forth in this section cannot be extended, except that the three-month period set forth in paragraph (c)(4)(ii) and the time period set forth in paragraph (e) of this section may be extended under the provisions of § 1.136. ◀

7. Section 1.378, paragraphs (a), (b), (c) and (e) are proposed to be revised to read as follows:

§ 1.37 Acceptance of delayed payment of maintenance fee in expired patent to reinstate patent.

(a) The Commissioner may accept the payment of any maintenance fee due on a patent after expiration of the patent if, upon petition, the delay in payment of the maintenance fee is shown to the satisfaction of the Commissioner to have been unavoidable [and if the surcharge required by § 1.20(i) is paid as a condition of accepting payment of the maintenance fee] ▶ or unintentional ◀. If the Commissioner accepts payment of the maintenance fee upon petition, the patent shall be considered as not having expired, but will be subject to the conditions set forth in 35 U.S.C. 41(c)(2).

(b) Any petition to accept [the] ▶ an unavoidably ◀ delayed payment of a maintenance fee filed under paragraph (a) of this section [within six months of the expiration of the patent] must include:

(1) ▶ The petition fee set forth in § 1.17(1)(3);

(2) ▶ The required maintenance fee set forth in § 1.20 (e)-(g);

[2] ▶ (3) ◀ The surcharge set forth in § 1.20(i); and

[3] ▶ (4) ◀ A showing that the delay was unavoidable since reasonable care was taken to ensure that the maintenance fee would be paid timely ▶ and that the petition was filed promptly after the patentee was notified of, or otherwise became aware of, the expiration of the patent ◀. The showing must enumerate the steps taken to ensure timely payment of the maintenance fee ▶ the date and the manner in which patentee became aware of the expiration of the patent, and the steps taken to file the petition promptly ◀.

(c) Any petition to accept [the] ▶ an unintentionally ◀ delayed payment of a maintenance fee filed under paragraph (a) of this section [more than six months after the expiration of the patent] must [include] ▶ be ◀:

(1) ▶ accompanied by the petition fee set forth in § 1.17(m)(3);

(2) ▶ accompanied by the ◀ [The] required maintenance fee set forth in § 1.20 (e)-(g) [.] ▶: ◀

[2] ▶ (3) accompanied by the ◀ [The] surcharge set forth in § 1.20(i); and

(3) A showing that the delay was unavoidable since reasonable care was taken to ensure that the maintenance fee would be paid timely and the failure to timely pay the maintenance fee was due entirely to circumstances outside of the control of the patentee. The showing must enumerate the steps taken to ensure timely payment of the maintenance fee and the circumstances which were outside of the control of the patentee and those acting on behalf of the patentee in paying the maintenance fee. The showing must be sufficient in scope and content to meet the heavy burden of proof required to show that a delay in payment of the maintenance fee of more than six months after expiration of the patent was unavoidable.]

▶ (4) accompanied by a statement that the delay was unintentional; and

(5) filed:

(i) within six months of the end of the grace period specified at 35 U.S.C. 41(b); or

(ii) within two months of the date patentee became aware of the expiration of the patent and within eighteen months of the end of the grace period. ◀

(d) ***

(e) Reconsideration of a decision refusing to accept a maintenance fee upon petition filed pursuant to paragraph (a) of this section may be obtained by filing a petition for reconsideration within two months of, or such other time as set in, the decision refusing to accept the delayed payment of the maintenance fee. Any such petition for reconsideration must be accompanied by the petition fee set forth in § 1.17(h). After decision on the petition for reconsideration, no further reconsideration or review of the matter will be undertaken by the Commissioner. If the delayed payment of the maintenance fee is not accepted, the maintenance fee and the surcharge set forth in § 1.20(i) will be refunded following the decision on the petition for reconsideration, or after the expiration of the time for filing such a petition for reconsideration, if none is filed. [The] ▶ Any petition ◀ fee [set forth in § 1.17(h) for filing the petition for reconsideration] ▶ under this section ◀ will not be refunded unless the refusal to accept and record the maintenance fee is determined to result from an error by the Patent and Trademark Office.

Sept. 8, 1992

DOUGLAS B. COMER
Acting Assistant Secretary
and Acting Commissioner
of Patents and Trademarks

**(105) Acceptance of Delayed Payment
Maintenance Fee in Expired Patents**

Pursuant to 37 CFR § 1.183, the Commissioner is suspending that portion of 37 CFR § 1.378(c)(3) requiring a showing of circumstances "entirely outside the control of the patentee and those acting on behalf of the patentee" in paying the maintenance fees pending a notice of proposed rulemaking. The requirement is being suspended in light of the decision in *In re Patent No. 4,429,775*, and because a credible argument can be made that the requirement is contrary to law.

The Commissioner will continue to look at the circumstances supporting unavoidable delay claims and diligent action by the patentee in petitioning for reinstatement. If any party believes a petition has been wrongly denied under 37 CFR § 1.378(c)(3), a renewed petition will be considered.

May 16, 1990

HARRY F. MANBECK, Jr.
*Commissioner of Patents
and Trademarks*

[1115 O.G. 18]

**(106) Procedure for Handling Amendments
under 37 CFR 1.116**

On Oct. 1, 1982, pursuant to Public Law 97-247, the Patent and Trademark Office discontinued the previous practice in patent applications of extending without fee the shortened statutory period for response to a final rejection upon the filing of a timely first response to a final rejection (37CFR 1.116). Since Oct. 1, 1982, applicants are able to obtain additional time for a first or subsequent response to a final rejection by petitioning and paying the appropriate fee under 37 CFR 1.136(a), provided the additional time does not exceed the six month statutory period.

In order to continue to encourage the early filing of any first response after a final rejection and to take care of any situations in which the examiner does not timely respond to a first response after final rejection which is filed early in the period for response, the Office is changing the manner in which the period for response is set on any rejection mailed after Feb. 27, 1983.

Under the changed procedure, if an applicant initially responds within two months from the date of mailing of any final rejection setting a three-month shortened statutory period for response and the Office does not mail an advisory action until after the end of the three-month shortened statutory period, the period for response for purposes of determining the amount of any extension fee will be the date on which the Office mails the advisory action advising applicant of the status of the application, but in no event can the period extend beyond six months from the date of the final rejection. This procedure will apply only to a first response to a final rejection and will be implemented by including the following language in each final rejection mailed after Feb. 27, 1983:

A shortened statutory period for response to this final action is set to expire three months from the date of this action. In the event a first response is filed within two months of the mailing date of this final action and the advisory action is not mailed until after the end of the three-month shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event will the statutory period for response expire later than six months from the date of this final action.

For example, if applicant initially responds within two months from the date of mailing of a final rejection and the examiner mails an advisory action before the end of three months from the date of mailing of the final rejection, the shortened statutory period will expire at the end of three months from the date of mailing of the final rejection. In such a case, any extension fee would then be calculated from the end of the three-month period. If the examiner, however, does not mail an advisory action until after the end of three months, the shortened statutory period will

expire on the date the examiner mails the advisory action and any extension fee may be calculated from that date.

Statutory periods set in Office actions mailed before Feb. 28, 1983, will not be effected by this change in procedure.

Jan. 14, 1983.

GERALD J. MOSSINGHOFF,
*Commissioner of Patents
and Trademarks.*

[1027 OG 71]

**(107) Expedited Procedure for Processing
Amendments and Other Responses After Final
Rejection (37 CFR 1.116)**

In an effort to improve the timeliness of the processing of amendments and other responses under 37 CFR 1.116, and thereby provide better service to the public, the Patent and Trademark Office (PTO) is establishing, effective immediately, an expedited processing procedure which the public may utilize in filing amendments and other responses after final rejection under 37 CFR 1.116. In order for an applicant to take advantage of the expedited procedure the amendment or other response under 37 CFR 1.116 will have to be marked as a "Response Under 37 CFR 1.116—Expedited Procedure-Examining Group (Insert Examining Group Number)" on the upper right portion of the amendment or other response and the envelope must be marked "Box AF" in the lower left hand corner. The markings preferably should be written in a bright color with a felt point marker. If the response is mailed to the Office, the envelope should contain only responses under 37 CFR 1.116 and should be mailed to "Box AF, Commissioner of Patents and Trademarks, Washington, D.C. 20231." Instead of mailing the envelope to "Box AF" as noted above, the response may be hand-carried to the particular Examining Group or other area of the Office in which the application is pending and marked on the outside envelope "Response Under 37 CFR 1.116—Expedited Procedure-Examining Group (Insert Examining Group Number)".

Upon receipt by the PTO from the Postal Service of an envelope appropriately marked "Box AF," the envelope will be specially processed by the PTO Mail Room and forwarded promptly to the Examining Group, via the Office of Finance if any fees have to be charged or otherwise processed. Upon receipt of the response in the Examining Group it will be promptly processed by a designated clerical employee and forwarded to the examiner, via the Supervisory Primary Examiner (SPE), for action. The SPE is responsible for ensuring that prompt action on the response is taken by the examiner. If the examiner to which the application is assigned is not available and will not be available for an extended period, the SPE will ensure that action on the application is promptly taken to assure meeting the PTO goal described below. Once the examiner has completed his or her consideration of the response, the examiner's action will be promptly typed and mailed by clerical employees designated to expedite the processing of responses filed under this procedure. The Examining Group supervisory personnel, e.g., the Supervisory Primary Examiners, Supervisory Applications Clerk, and Group Director are responsible for ensuring that actions on responses filed under this procedure are promptly processed and mailed.

The PTO goal is to mail the examiner's action on the response within one month from the date on which the amendment or response is received by the PTO. The PTO is establishing monitoring procedures to determine how well the goal is being achieved. If the goal of mailing the action on the response within one month or less is not achieved in a high percentage of applications, e.g., at least 90-95% of appropriately marked responses, after a reasonable trial period, the PTO will institute further changes in procedures in the future which will give appropriate relief to applicants in cases where the delay is due to Office processing.

Applicants are encouraged to utilize this expedited procedure in order to facilitate PTO processing of responses under 37 CFR 1.116. If applicants do not utilize the procedure by appropriately marking the envelope and enclosed papers, the benefits expected

to be achieved therefrom will not be attained. The procedure cannot be expected to result in achievement of the goal in applications in which the delay results from actions by the applicant, e.g., delayed interviews, applicant's desire to file a further response, or a petition by applicant which requires a decision and delays action on the response. In any application in which a response under this procedure has been filed and no action by the examiner has been received within the time referred to herein, plus normal mailing time, a telephone call to the SPE of the relevant Group Art Unit would be appropriate in order to permit the SPE to determine the cause for any delay. If the SPE is unavailable or if no satisfactory response is received, the Group Director of the Examining Group should be contacted.

Any comments on this expedited procedure during the trial period are invited and should be directed to the attention of Rene D. Tegtmeyer, Assistant Commissioner for Patents, U.S. Patent and Trademark Office, Washington, D.C. 20231.

DONALD J. QUIGG,
*Commissioner of Patents and
Trademarks —Designate.*

Sept. 20, 1985.

[1059 OG 19]

(108) New Procedures for Recordation of Interviews

This notice establishes within the Patent and Trademark Office additional general procedures for the recordation of interviews. Proposed procedures were published in the *Official Gazette* of June 28, 1977 (959 O.G. 36) for comment from interested members of the public by August 10, 1977. Fifteen written comments were received the majority of which were favorable to the proposed procedures. Careful consideration has been given to the comments and the procedures are being adopted with a few changes.

Under present practice it is the responsibility of the applicant or the attorney or agent to make the substance of an interview of record in the application file, unless the examiner indicates he or she will do so. It is the examiner's responsibility to see that such a record is made and to correct material inaccuracies which bear directly on the question of patentability as set forth in section 713.04 of the Manual of Patent Examining Procedure (MPEP). This practice is continued and further amplified as set forth below.

Recent surveys have indicated that the substance of many interviews has not been made of record or the text thereof is incomplete as to substantive matters. In some cases, the substance of an interview may be presented as arguments in a subsequent response filed by the applicant but without any indication that they had been presented at the interview. In order to help insure a better record of examiner-applicant interviews in application files, the following new procedures are adopted to become effective for interviews conducted on and after January 1, 1978. Appropriate changes will be made in the Manual of Patent Examining Procedure (MPEP).

Examiners will complete a two-sheet carbon interleaf Interview Summary Form for each interview held where a matter of substance has been discussed by checking the appropriate boxes and filling in the blanks in neat handwritten form. Discussions regarding only procedural matters, directed solely to restriction requirements (for which interview recordation is otherwise provided for in Section 812.01 of the MPEP), or pointing out typographical errors or unreadable script in Office actions or the like, are excluded from the interview recordation procedures below.

The Interview Summary Form shall be given an appropriate paper number, placed in the file and listed on the "Contents" list on the file wrapper. The docket and serial register cards will not be updated to reflect this interview. In a personal interview, the duplicate copy of the Form will be removed and given to the applicant (or attorney or agent) at the conclusion of the interview. In the case of a telephonic interview, the copy will be mailed to the applicant's correspondence address either with or prior to the next official communication. If additional correspondence from the examiner before an allowance is not likely or if other circumstances dictate, the Form will be mailed promptly

after the telephonic interview rather than with the next official communication. The original of the completed Form will be made of record and placed in the right hand flap of the file.

The Form provides for recordation of the following information:

- Serial Number of the application
- Name of applicant
- Name of examiner
- Date of interview
- Type of interview (personal or telephone)
- Name of participant(s) (applicant, attorney or agent, etc.)
- An indication whether or not an exhibit was shown or a demonstration conducted
- An identification of the claims discussed
- An identification of the specific prior art discussed
- An indication whether an agreement was reached and if so, a description of the general nature of the agreement (may be by attachment of a copy of amendments or claims agreed as being allowable). (Agreements as to allowability are tentative and do not restrict further action by the examiner to the contrary.)
- The signature of the examiner who conducted the interview
- Names of other Patent and Trademark Office personnel present.

The Form also contains a statement reminding the applicant of his responsibility to record the substance of the interview.

It is desirable that the examiner orally remind the applicant of his obligation to record the substance of the interview in each case unless both applicant and examiner agree that the examiner will record same. Where the examiner agrees to record the substance of the interview, or when it is adequately recorded on the Form or in an attachment to the Form, the examiner will check a box at the bottom of the Form informing the applicant that he need not supplement the Form by submitting a separate record of the substance of the interview.

It should be noted, however, that the Interview Summary Form will not be considered a complete and proper recordation of the interview unless it includes, or is supplemented by the applicant or the examiner to include, all of the applicable items required below concerning the substance of the interview:

The complete and proper recordation of the substance of any interview should include at least the following applicable items:

- 1) A brief description of the nature of any exhibit shown or any demonstration conducted.
- 2) an identification of the claims discussed.
- 3) an identification of specific prior art discussed.
- 4) an identification of the principal proposed amendments of a substantive nature discussed, unless these are already described on the Interview Summary Form completed by the examiner.
- 5) a brief identification of the general thrust of the principal arguments presented to the examiner. The identification of arguments need not be lengthy or elaborate. A verbatim or highly detailed description of the arguments is not required. The identification of the arguments is sufficient if the general nature or thrust of the principal arguments made to the examiner can be understood in the context of the application file. Of course, the applicant may desire to emphasize and fully describe those arguments which he feels were or might be persuasive to the examiner.
- 6) a general indication of any other pertinent matters discussed, and
- 7) if appropriate, the general results or outcome of the interview unless already described in the Interview Summary Form completed by the examiner.

Examiners are expected to carefully review the applicant's record of the substance of an interview. If the record is not complete or accurate, the examiner will take appropriate action as set forth in MPEP Section 713.04. If the record is complete and accurate, the examiner should place the indication "Interview record OK" on the paper recording the substance of the interview along with the date and the examiner's initials.

Aug. 30, 1977.

C. MARSHALL DANN,
*Commissioner of Patents
and Trademarks.*

(111)

Patent and Trademark Office
37 CFR Parts 1 and 10
[Docklet No. 910764-1306]
RIN: 0651-AA27

[962 O.G. 21]

Duty of Disclosure**(109) Viewing of Video Tapes During Interviews**

The Patent and Trademark Office has video tape equipment available in the facilities of the Patent Academy for viewing video tapes from applicants during interviews with patent examiners.

The video tape equipment may use VHS and UHS (3/4 inch tape) cassettes.

Attorneys or applicants wishing to show a video tape during an examiner interview must be able to demonstrate that the content of the video tape has a bearing on an outstanding issue in the application and its viewing will advance the prosecution of the application. Prior approval of viewing of a video tape during an interview must be granted by the SPE. Also, use of the room and equipment must be granted by the Training Manager to avoid any conflict with the Patent Academy.

Requests to use video tape viewing equipment for an interview should be made at least one week in advance to allow the Patent Academy staff sufficient time to ensure the availability and proper scheduling of both a room and equipment.

Interviews using Office video tape equipment will be held only in the Academy facilities located in One Crystal Park, Rm. 502. Attorneys or applicants should not contact the Patent Academy directly regarding availability and scheduling of video equipment. All scheduling of rooms and equipment should be done through and by the examiner conducting the interview.

RENE D. TEGTMEYER,
*Assistant Commissioner
for Patents.*

May 6, 1986.

[1067 OG 4]

(110) Extension of Time Limit

This notice is intended to clarify certain misunderstandings and indicates the treatment given to requests for an extension of time in a situation where applicant has been given a time limit to complete an otherwise incomplete but bona fide attempt to respond to the previous Office action and advance the case to final action.

According to 37 CFR 1.135(c) when the applicant has filed a response to an examiner's action but consideration of some matter or compliance with some requirement has been inadvertently omitted, an opportunity to explain and supply the omission may be given before the question of abandonment is considered. According to the M.P.E.P., Section 710.02(c), the examiner may give applicant one month or the remainder of the period for response, whichever is longer, to complete the response. Neither the regulation nor the M.P.E.P. indicate that this time can be extended.

Under the regulation, the missing matter or lack of compliance must be considered by the examiner as being "inadvertently omitted." Once an inadvertent omission is brought to the attention of the applicant, the question of inadvertence no longer exists. Therefore, any further time to complete the response would not be appropriate under 37 CFR 1.135(c). Accordingly, no extension of time will henceforth be granted in these situations.

WILLIAM FELDMAN,
*Deputy Assistant Commissioner
for Patents.*

Nov. 28, 1977

[965 O.G. 14]

Agency: Patent and Trademark Office, Commerce

Action: Notice of final rulemaking.

Summary: The Patent and Trademark Office (Office) is amending the rules of practice in patent cases to (1) clarify the duty of disclosure for information required to be submitted to the Office; (2) provide flexible time limits for submitting information disclosure statements including the requirement for a fee in certain cases; (3) eliminate consideration of duty of disclosure issues by the Office except in disciplinary and interference proceedings, and under other limited circumstances; and (4) eliminate the striking of patent applications which are improperly executed. The Office further is amending the Patent and Trademark Office Code of Professional Responsibility to define as misconduct a failure to comply with the rules on duty of disclosure. The rules as adopted strike a balance between the need of the Office to obtain and consider all known relevant information pertaining to patentability before a patent is granted and the desire to avoid or minimize unnecessary complications in the enforcement of patents.

Effective Date: March 16, 1992. These rules will be applicable to all applications and reexamination proceedings pending or filed after the effective date.

For Further Information Contact: By telephone Charles E. Van Horn (703-305-9054) or J. Michael Thesz (703-305-9384) or by mail addressed to Commissioner of Patents and Trademarks, Washington, D.C. 20231, and marked to the attention of Charles E. Van Horn (Crystal Park 2 - Room 919).

Supplementary Information: A notice of proposed rulemaking on duty of disclosure and practitioner misconduct published in the Federal Register at 54 FR 11334 (March 17, 1989), and in the Patent and Trademark Office *Official Gazette* at 1101 Off. Gaz. Pat. Off. 12 (April 4, 1989), was withdrawn. On August 6, 1991, the Office published in the *Federal Register* a notice of proposed rulemaking relating to duty of disclosure. 56 FR 37321. The notice was also published in the *Official Gazette*. 1129 Off. Gaz. Pat. Off. 52 (August 27, 1991). Sixty written comments were received in response to the notice of proposed rulemaking. A public hearing was held on October 8, 1991. Eleven individuals offered oral comments at the hearing. The sixty written comments and a copy of the transcript of the hearing are available for public inspection in the Office of the Assistant Commissioner for Patents, Room 919, Crystal Park II, 2121 Crystal Drive, Arlington, VA.

Familiarity with the notice of proposed rulemaking is assumed. Changes in the text of the rules published for comment in the notice of proposed rulemaking are discussed. Comments received in writing and at the public hearing in response to the notice of proposed rulemaking are discussed.

The rules as adopted shall take effect as to all applications and reexamination proceedings either pending or filed on or after the effective date of these rules. Thus, any information disclosure statement that is filed on or after that date must comply with the provisions of §§1.97 and 1.98 to be entitled to consideration.

Changes in Text: The final rules contain several changes to the text of the rules as proposed for comment. Those changes are discussed below.

Section 1.17(i)(1) has been changed from the proposed text to reflect the recent increase in the amount of the fee for filing a petition from \$120.00 to \$130.00.

Section 1.56(a) has been clarified to indicate that the duty of an individual to disclose information is based on the knowledge of that individual that the information is material to patentability. A sentence has been added to §1.56(a) to express the principle that the Office does not condone the granting of a patent on an application in connection with which fraud on the Office was practiced or attempted or the duty of disclosure was violated through bad faith or intentional misconduct. In addition, §1.56(a) as proposed has been changed to indicate that if all information material to patentability of any claim issued in a patent is cited by the Office or submitted to the Office in the manner prescribed by §§1.97(b)-(d) and 1.98, the Office will consider as satisfied the

duty to disclose to the Office all information known to be material to patentability, as contrasted to the broader duty of candor and good faith. This rule does not attempt to define the spectrum of conduct that would lack the candor and good faith dealing with the Office which is expected of individuals who are associated with the filing or prosecution of a patent application.

In §1.56(b), the phrase "or being made of record" has been inserted to make it clear that information is not material to patentability within the meaning of §1.56 if it is cumulative to either information already of record in the application or contemporaneously being made of record by applicant. For example, there would be no benefit to the Office for applicant to submit to the Office 10 different documents having the same teaching simply because the information was not cumulative to the information already of record.

The term "creates" has been replaced by the term "establishes" in §1.56(b)(1). In addition, the definition of a prima facie case of unpatentability, as set out in the preamble of the notice of proposed rulemaking, has been incorporated into the rule itself. A prima facie case of unpatentability of a claim is established when the information compels a conclusion that the claim is unpatentable

- (1) under the preponderance of evidence, burden-of-proof standard,
- (2) giving each term in the claim its broadest reasonable construction consistent with the specification, and
- (3) before any consideration is given to evidence which may be submitted in an attempt to establish a contrary conclusion of patentability.

This prima facie standard conforms to the standard used by an examiner to determine whether a claim is prima facie unpatentable.

Section 1.56(b)(2) has been modified from the text of the proposed rule. The focus of this paragraph has been changed so that it now relates to information which either refutes, or is inconsistent with, a position that applicant takes in either

- (1) opposing an argument of unpatentability relied on by the Office, or
- (2) asserting an argument of patentability.

The change from the proposed rule makes clear that information is material when it either refutes, or is inconsistent with, a position taken by applicant before the Office.

Section 1.97(e) has been changed from the proposed text to make it clear that a certification could contain either of two statements. One statement is that each item of information in an information disclosure statement was cited in a search report from a patent office outside the U.S. not more than three months prior to the filing date of the statement. Under this certification, it would not matter whether any individual with a duty actually knew about any of the information cited before receiving the search report. In the alternative, the certification could state that no item of information contained in the information disclosure statement was cited in a communication from a foreign patent office in a counterpart foreign application or, to the knowledge of the person signing the certification after making reasonable inquiry, was known to any individual having a duty to disclose more than three months prior to the filing of the statement.

The changes to the text of §1.97(e) as proposed place the appropriate priority on getting relevant information to the Office promptly, with minimum burden to applicant. The text of the proposal has also been changed by adding the phrase "after making reasonable inquiry" to make it clear that the individual making the certification has a duty to make reasonable inquiry regarding the facts that are being certified. For example, if an inventor gave a publication to the practitioner prosecuting an application with the intent that it be cited to the Office, the practitioner should inquire as to when that inventor became aware of the publication before submitting a certification under §1.97(e)(ii) to the Office.

A new paragraph (h) has been added to the text of proposed §1.97. The purpose of new paragraph (h) is to ensure that no one could construe the mere filing of an information disclosure statement as an admission that the information cited in the statement is, or is considered to be, material to patentability as defined in §1.56(b). It is in the best interest of the Office and the public to permit and encourage individuals to cite information to the Office without fear of making an admission against interest.

In §1.98(a)(2)(iii), the wording has been changed to make it clear that the requirement to submit a copy of each item of information listed in an information disclosure statement does not apply to the citation of a U.S. patent application.

The requirement in proposed §1.98(a)(3) for a concise explanation of the relevance of each item of information has been substantially changed by limiting the requirement in two significant ways. First, as adopted, the requirement is limited to information that is not in the English language. Second, the explanation required is limited to the relevance as understood by the individual designated in §1.56(c) most knowledgeable about the content of the information at the time the information is submitted to the Office. Where the information listed is not in the English language, but was cited in a search report by a foreign patent office, the requirement for a concise explanation of relevance is satisfied by submitting an English language version of the search report.

In §1.98(d), the proposed text has been changed by adding the phrase "cited by or" to make it clear that legible copies of information listed in an information disclosure statement need not be submitted in a continuing application provided the information was either cited by or submitted to the Office in a prior application. A distinction between information cited by the Office or supplied by applicant to the Office serves no useful purpose in this situation.

The text of proposed §1.555 has been modified to limit the definition of information material to patentability in a reexamination proceeding to the types of information that an examiner could use in a reexamination proceeding to determine whether a claim was patentable, and to adopt other changes that parallel changes made in §1.56. Proposed §1.555(a) has been divided into two paragraphs. Paragraph (a), as adopted, substantially parallels the text of §1.56(a) as adopted. It indicates that the duty to disclose information to the Office in a reexamination proceeding is a part of the duty of candor and good faith that is owed to the Office by individuals transacting business with the Office. It further states one way that an individual may discharge the duty to disclose information material to patentability in a reexamination proceeding - i.e., by filing an information disclosure statement with the items listed in §1.98(a) as applied to individuals associated with the patent owner in a reexamination proceeding. Finally, the text of the rule has been changed to add a sentence that expresses the principle that a patent should not be granted on an application in connection with which fraud was practiced or attempted on the Office or there was any violation of the duty of disclosure through bad faith or intentional misconduct.

New paragraph (b) of §1.555 has been adopted to define information material to patentability in a reexamination proceeding. Much like the definition in §1.56(b), information is not material when it is cumulative to information of record or being made of record in the reexamination proceeding. Information is considered material when it satisfies either or both of the definitions in §1.555(b). Under §1.555(b)(1), information is material when it is a patent or printed publication that establishes, by itself or in combination with other patents or printed publications, a prima facie case of unpatentability of a claim. This definition is limited to patents or printed publications because a reexamination proceeding must be based on patents or printed publications. 35 U.S.C. 302.

The definition of a prima facie case of unpatentability of a claim pending in a reexamination proceeding has been provided in the rule. A prima facie case of unpatentability is established when the information compels a conclusion that a claim is unpatentable under the same principles that are applicable during ex parte examination of a patent application; namely

- (1) under the preponderance of evidence, burden-of-proof standard,
- (2) giving each term in the claim its broadest reasonable construction consistent with the specification, and
- (3) before any consideration is given to evidence which may be submitted in an attempt to establish a contrary conclusion of patentability.

Finally, the definition of information material to patentability in §1.555(b)(2) has been added to parallel the provision in §1.56(b)(2).

After reviewing the Office policy on whether to consider duty of disclosure and other inequitable conduct issues in interference proceedings under 35 U.S.C. 135(a), including comments from

the public directed to the statement in the notice of proposed rulemaking that the Office will not consider, evaluate, or decide fraud or other inequitable conduct issues during an interference proceeding, a new Office policy has been adopted. Effective October 24, 1991, fraud and inequitable conduct issues will be considered when properly raised inter partes in patent interference cases. 1132 Off. Gaz. Pat. Off. 33 (November 19, 1991). In addition, the Chairman of the Board of Patent Appeals and Interferences has issued a notice that provides guidance on how an issue of fraud or other inequitable conduct can be raised in an interference proceeding. 1133 Off. Gaz. Pat. Off. 21 (December 10, 1991).

Response to and Analysis of Comments: Sixty (60) written comments were received in response to the notice of proposed rulemaking. These comments, along with those made at the public hearing, have been analyzed. Some suggestions made in the comments have been adopted and others have been rejected. Responses to the comments follow.

Comment 1. Nine comments indicated that the Office should not amend §1.56 since it is presently in conformance to the materiality standard being applied by the Court of Appeals for the Federal Circuit. One comment questioned what practical value of the proposed rule would justify the burden of the change.

Reply: The amendment to §1.56 was proposed to address criticism concerning a perceived lack of certainty in the materiality standard. The rule as promulgated will provide greater clarity and hopefully minimize the burden of litigation on the question of inequitable conduct before the Office, while providing the Office with the information necessary for effective and efficient examination of patent applications.

Comment 2. One comment stated that the present rules should be maintained and strengthened since the public interest is hurt more by an unjustly issued patent than by an unjustly denied patent. Another comment disagreed and argued that an unjustly denied patent can do great harm to society.

Reply: The Office strives to issue valid patents. The Office has both an obligation not to unjustly issue patents and an obligation not to unjustly deny patents. Innovation and technological advancement are best served when an inventor is issued a patent with the scope of protection that is deserved. The rules as adopted serve to remind individuals associated with the preparation and prosecution of patent applications of their duty of candor and good faith in their dealings with the Office, and will aid the Office in receiving, in a timely manner, the information it needs to carry out effective and efficient examination of patent applications.

Comment 3. Two comments stated that the rule should not permit applicants to draft claims and a specification to avoid a prima facie case of obviousness over a reference and then to be able to withhold the reference from the examiner.

Reply: The comments reflect a correct reading of the rule in that information is not material unless it comes within the definition of §1.56(b)(1) or (2). If information is not material, there is no duty to disclose the information to the Office. The Office believes that most applicants will wish to submit the information, however, even though they may not be required to do so, to strengthen the patent and avoid the risks of an incorrect judgment on their part on materiality or that it may be held that there was an intent to deceive the Office.

Comment 4. One comment stated that promulgation of the proposed rule would result in a significant decrease in the quantity of art cited to the Office because there will be no duty to cite art relevant to a pending claim.

Reply: The Office does not anticipate any significant change in the quantity of information cited to the Office after promulgation of amended §1.56. Presumably, applicants will continue to submit information for consideration by the Office in applications rather than making and relying on their own determinations of materiality. An incentive remains to submit the information to the Office because it will result in a strengthened patent and will avoid later questions of materiality and intent to deceive. In addition, the new rules will actually facilitate the filing of information since the burden of submitting information to the Office has been reduced by eliminating, in most cases, the requirement for a concise statement of the relevance of each item of information listed in an information disclosure statement.

Comment 5. Several comments stated that an objective "but for" standard would be preferable to the proposed rule. The objective

"but for" standard would presumably consider information as a court does in an infringement proceeding with a clear and convincing, burden-of-proof standard, giving the terms in each claim a narrow construction where necessary to uphold validity.

Reply: The Office believes that amended §1.56 will provide a reasonable balance between the needs of applicants and of the Office. The suggested "but for" standard would not cause the Office to obtain the information it needs to evaluate patentability so that its decisions may be presumed correct by the courts. If the Office does not have needed information, meaningful examination of patent applications will take place for the first time in an infringement case before a district court. Courts will become increasingly less confident of the Office's product if they get the impression that practitioners and inventors can routinely withhold information from the Office, or that practitioners and inventors can make up their own minds about what is patentable. The Office should decide, in the first instance, what is patentable and any decision should be made with the best information available, including that known by the applicant. The Office notes that the House of Delegates of the American Bar Association twice, once in 1990 and again in 1991, refused to adopt a resolution favoring adoption of the "but for" standard.

Comment 6. One comment argued that proposed §1.56 does not relate to "the conduct of proceedings in the Patent and Trademark Office" (35 U.S.C. 6(a)) since the Office does not intend to reject applications as indicated by the cancellation of paragraphs (c) through (i) of current §1.56.

Reply: The amendment to §1.56 comes within the authority of the Commissioner for establishing regulations. *Norton v. Curtiss*, 433 F.2d 779, 167 USPQ 532 (CCPA 1970). The Office has reserved its inherent authority to reject an application under appropriate circumstances where fraud or other inequitable conduct has occurred. Also, the Office will consider fraud and inequitable conduct when properly raised in interference proceedings under 35 U.S.C. 135(a). The Office will also consider fraud and inequitable conduct in connection with attorney conduct under §10.23(c).

Comment 7. One comment stated that §1.56 should require only anticipatory art to be submitted during examination of an application, with a procedure such as reexamination being used after discovery in any litigation on the patent has revealed all available art.

Reply: An application is examined under all appropriate sections of Title 35, United States Code, and a presumption of validity attaches to a patent with regard to all aspects of patentability, including anticipation. 35 U.S.C. 282. Therefore, §1.56 should address more than just the submission of anticipatory information, including information relevant to patentability under 35 U.S.C. 103 and 35 U.S.C. 112.

Comment 8. One comment suggested that proposed §1.56 has some dangerous implications since courts are going to find violations of the duty of disclosure if §§1.97 and 1.98 are not complied with completely.

Reply: Section 1.56 provides that the duty of disclosure can be met by submitting information to the Office in the manner prescribed by §§1.97 and 1.98. Sections 1.97 and 1.98 are being amended so that information will be submitted to the Office in the manner and at the time which will facilitate consideration by the examiner. Applicants are provided certainty as to when information will be considered, and applicants will be informed when information is not considered. The Office does not believe that courts should, or will, find violations of the duty of disclosure because of unintentional non-compliance with §§1.97 and 1.98. If the non-compliance is intentional, however, the applicant will have assumed the risk that the failure to submit the information in a manner that will result in its being considered by the examiner may be held to be a violation.

Comment 9. Two comments stated that the Office should not delete the offense of attempted fraud from the §1.56. The comments stated that elimination of the reference to "gross negligence" in current §1.56 would be sufficient to protect the practitioner who delays submission of information with no intent to deceive the Office. One of the comments stated that the disciplinary rules alone are not sufficient to deter attempted fraud or inequitable conduct.

Reply: The language of §§1.56(a) and 1.555(a) has been modified to retain the provisions of prior §1.56(d) to indicate that the

Office does not condone fraud, attempted fraud, or violation of the duty of disclosure through bad faith or intentional misconduct.

Comment 10. One comment stated that the appropriate standards for the duty of candor are analogous to fiduciary law which requires the fiduciary to disclose not only known facts, but also facts which it should have known, i.e., a negligence standard. The comment argued that it was undesirable to measure duty of candor or fraud by a reduced measure of "intent" instead of an objective negligence standard since the Office is not bound by the U.S. Court of Appeals for the Federal Circuit decision in *Kingsdown Medical Consultants, Ltd. v. Hollister, Inc.*, 863 F.2d 867, 9 USPQ2d 1384 (Fed. Cir. 1988) (*en banc*), cert. denied, 490 U.S. 1067 (1989), and since the proposed standard is no more objective than alternative standards but is simply narrower and more certain. Another comment suggested that the Office should indicate that there is no intention to change the *Kingsdown* ruling.

Reply: Section 1.56 has been amended to present a clearer and more objective definition of what information the Office considers material to patentability. The rules do not define fraud or inequitable conduct which have elements both of materiality and of intent. The Office does not advocate any change to the *Kingsdown* ruling.

Comment 11. Two comments stated that the proposed modification of §1.56 would make submission of information to the Office an implied admission of the prima facie unpatentability of a claim. Several comments suggested that a sentence should be added to proposed §1.56 to specify that submission of information to the Office under this section shall not be deemed to be an admission or representation that the information is material to patentability.

Reply: The suggestions in the comments have been adopted by modifying §1.97 which deals with submission of information to the Office. Paragraph (h) of §1.97 now provides that the filing of an information disclosure statement shall not be considered to be an admission that the information cited in the statement is, or is to be considered to be, material to patentability as defined in §1.56.

Comment 12. One comment stated that the proposed §1.56 definition would be difficult to apply in litigation in which a different burden-of-proof standard is applied.

Reply: The definition of information material to patentability includes standards which are familiar to the Federal courts and which are capable of being handled like other issues.

Comment 13. One comment suggested that the last sentence of proposed §1.56(a), in which the Office encourages applicants to carefully examine prior art cited in foreign search reports and the closest known information, be removed from the rule and be placed in the preamble discussion so as to avoid the interpretation that the sentence creates a duty for applicants.

Reply: The suggestion is not adopted. The sentence does not create any new duty for applicants, but is placed in the text of the rule as helpful guidance to individuals who file and prosecute patent applications.

Comment 14. Three comments stated that the language of proposed §1.56(a) required revision to remove all statements or suggestions which might allow a court to consider a pending (i.e., unissued) claim for the purpose of determining whether the duty of disclosure requirement was met in view of the fact that the proposed rule was intended to indicate that there is no duty to disclose information which is material to a pending claim unless that claim ultimately issues in a patent. One comment argued that a court might interpret "the duty of candor and good faith" to be broader than the particular duty of disclosure specified in other portions of the proposed rule.

Reply: The language of §§1.56 and 1.555 has been modified to emphasize that there is a duty of candor and good faith which is broader than the duty to disclose material information. Section 1.56 further states that "no patent will be granted on an application in connection with which fraud on the Office was practiced or attempted or the duty of disclosure was violated through bad faith or intentional misconduct."

Comment 15. One comment suggested that proposed §1.56(a) be modified to clarify that both information and its materiality must be known before there is a duty to disclose the information.

Reply: The Office considers the language of §1.56(a) to be sufficiently clear in referring to a "duty to disclose to the Office all information known to that individual to be material to patent-

ability as defined in this section." If information is known to be material, it inherently must be known. Likewise, if information is not known to an individual, there is no duty to disclose the information whether it is material or not.

Comment 16. One comment stated that it should be made clear that "known" is limited to contemporaneous knowledge since a practitioner may have known something ten years ago but may not remember it presently.

Reply: Section 1.56 states that each individual associated with the filing and prosecution of a patent application has a duty to disclose all information known to that individual to be material to patentability as defined in the section. Thus, the duty applies to contemporaneously or presently known information. The fact that information was known years ago does not mean that it was recognized that the information is material to the present application.

Comment 17. One comment suggested that proposed §1.56(a) be modified to state that the duty of disclosure ends when an application becomes abandoned or allowed.

Reply: Paragraph (a) of §1.56 states that the duty to disclose information exists until the application becomes abandoned. The duty to disclose information, however, does not end when an application becomes allowed but extends until a patent is granted on that application. The rules provide for information being considered after a notice of allowance is mailed and before the issue fee is paid (§1.97(d)) and for an application to be withdrawn from issue after the issue fee has been paid. An application may be withdrawn from issue because one or more claims are unpatentable (§1.313(b)(3)) or an application may be withdrawn from issue and abandoned so that information may be considered in a continuing application before a patent issues (§1.313(b)(5)).

Comment 18. Three comments stated that the first two sentences of proposed §1.56(a) should be deleted since rules should simply instruct practitioners what to do without discussion of why they should do it or the philosophy involved.

Reply: The suggestion has not been adopted since the sentences aid in the understanding of the rule and will provide those involved in enforcing patents with an indication of the policy on which the rule is based.

Comment 19. One comment stated that §§1.56(a)(2) and (c) should be modified to refer to "individuals substantively associated with" the filing or prosecution of the patent application.

Reply: The suggestion is not adopted since the proposed rule language is clear and the suggested modification would create a redundancy with the language of §1.56(c)(3). The individuals designated in §§1.56(c)(1) and (2) as being associated with the filing or prosecution of a patent application within the meaning of the section are inherently substantively involved in the preparation or prosecution of the application.

Comment 20. One comment stated that proposed §1.56(b) should be modified to clarify that information is not material if it is cumulative to information already of record in an application or to information concurrently being made of record.

Reply: The suggestion has been adopted by adding a reference to information being made of record with regard to cumulative information in §§1.56(b) and 1.555(b).

Comment 21. One comment stated that the preamble discussion (of §1.56(b)) should indicate that test results in situations such as tests involving biological systems may properly be submitted as averages rather than as individual test runs.

Reply: Whether test results can be submitted as averages rather than as individual test runs depends on whether doing so would provide to the Office the information needed to make a proper determination on patentability. If the actual results are provided, the examiner can make an independent determination on whether some rejection is appropriate. In some cases providing averages might be misleading, but in other cases providing averages might be appropriate.

Comment 22. One comment stated that the definition of materiality in proposed §1.56(b) imposes substantial new burdens on applicants who would be required to disclose failed experiments, papers published less than one year prior to filing and experimental public uses even if they clearly are refutable and will not affect patentability. One comment stated that the proposed rule would require applicants to incur added expense for affidavits and comparison tests. Five comments stated that the Office should not require applicants to present results from clearly invalid tests since this would be contrary to usual scientific

practice. One comment argued that information should not be required to be submitted if there was no doubt that it would not preclude patentability, e.g., where common ownership existed so that the exception of 35 U.S.C. 103, second paragraph, would apply.

Reply: The definition of materiality in §1.56 does not impose substantial new burdens on applicants, but is intended to provide the Office with the information it needs to make a proper and independent determination on patentability. It is the patent examiner who should make the determination after considering all the facts involved in the particular case. The comments reflect that the Office objective of clarifying what information the Office considers to be material has been accomplished by the amendment of the rules.

Comment 23. One comment suggested that §1.56 should confine the duty of disclosure to references known to applicant or the practitioner representing applicant and not found in prior art materials in the Office.

Reply: This suggestion is not adopted since information may be in the Office but not in the application file. It is not reasonable to assume that an examiner knows of a particular item of information or appreciates its relevance to a particular invention simply because it exists somewhere in the Office.

Comment 24. One comment stated that the language "or in combination with other information" should be removed from proposed §1.56(b)(1) because it was unworkable to require an applicant to combine references against its own claims, especially since, according to the commentator, examiners and the Board of Patent Appeals and Interferences frequently misapply the law. Another comment stated that the language creates an open field for litigators to claim that an inordinate number of references could be combined.

Reply: The rule does not require an applicant to combine references against its own claims. The applicant can submit information to the Office for the examiner's consideration whether the information is considered material or not. The fact that the teachings of a large number of references must be combined for a prima facie case of obviousness does not by itself weigh against a holding of obviousness. See *In re Gorman*, 933 F.2d 982, 18 USPQ2d 1885 (Fed. Cir. 1991).

Comment 25. Four comments stated that the definition of "prima facie case of unpatentability" §1.56(b)(1) should be included in the rule itself. One comment said that the definition should not be included in the rule.

Reply: The definition has been included in the rule for clarity.

Comment 26. One comment stated that the proposed §1.56(b)(1) placed a burden on the practitioner to analyze references that is inappropriate and contradictory to a practitioner's responsibility to his client.

Reply: The rule itself does not place a burden on the practitioner to analyze references. Information can be submitted to the Office in accordance with §§1.97 and 1.98, and the examiner will consider the references.

Comment 27. One comment questioned whether an applicant would be charged with withholding material information if the "other information" (§1.56(b)(1)) necessary to cause an undisclosed reference to become material is unknown to the applicant. Another comment suggested that the language should be changed to read "other known information" to show that the information must be known to applicant to give rise to a duty of disclosure.

Reply: Paragraph (b) of §1.56 defines information material to patentability. While information may be material under the definition, there is no duty on an individual to disclose the information if the information is unknown to the individual (§1.56(a)).

Comment 28. One comment suggested that defining materiality in §1.56(b) in terms of prima facie unpatentability would permit a conspiracy of silence in which (1) the applicant knows of information but is incapable of making the legal analysis to determine whether the information is material and (2) the patent practitioner, who is equipped to determine whether information is material, does not know of the information and does not ask. Thus, it is argued there would be no violation of the duty of disclosure which requires knowledge of both information and its materiality.

Reply: The Office has set forth what information should be submitted so that the Office can make a proper determination on patentability. The term "conspiracy" has the connotation of

unlawfulness which would not be consistent with the duty of candor and good faith required in dealings with the Office.

Comment 29. One comment suggested that proposed §1.56(b)(1) should be revised to read "in combination with other information already of record in the application" to avoid the possibility that undisclosed material could be considered material in subsequent litigation when combined with information not known at the time of the prosecution to any person substantively involved in the preparation or prosecution of the application.

Reply: Paragraph (a) of §1.56 makes it clear that the Office recognizes that the duty to disclose material information is limited to such information which is known by an individual substantively involved in the preparation or prosecution of the application. Thus, while information may be material under the definition of §1.56(b)(1), there can be no duty to disclose the information if it is material only in combination with unknown information.

Comment 30. One comment stated that proposed §1.56(b) should be modified so that paragraph (b)(1) refers to information that renders a claim unpatentable ("but for"), paragraph (b)(2) remains as proposed, and a paragraph (b)(3) is added to include the definition of materiality as "the closest information over which any pending claim patentably defines." This comment suggested that this modified definition would have the advantage of not requiring the applicant to submit references which applicant knows are immaterial and to then engage in "straw man" arguments based on such references.

Reply: The suggested modification to §1.56 has not been adopted. The suggested language would seemingly require information to be filed in each application, whether the information is relevant or not, since the "closest information" would be required. Section 1.56 does not require information which is not relevant to be submitted, but only information which meets the definition of material as set out in the rule.

Comment 31. One comment stated that if proposed §1.56(b)(1) is promulgated, there would be no need for proposed §1.56(b)(2) with regard to information which would make a prima facie case of unpatentability and other information required by paragraph (b)(2) might be obscure. Another comment argued that paragraph (b)(2) was unnecessary, confusing and ambiguous and suggested changes in the language to make the requirement clear and less ambiguous.

Reply: The suggestion as to the language change to §1.56(b)(2) has been adopted. The final rule language avoids the perceived problem of requiring an applicant to submit information supporting a position taken by the examiner. It is not appropriate, however, to eliminate paragraph (b)(2) because it is an essential part of the definition of information material to patentability and will help to ensure that all material facts are brought to the attention of the examiner during the examination process.

Comment 32. One comment questioned the language of proposed §1.56(b)(2) as to how an applicant could consider a prior art reference as supporting a position of unpatentability taken by the Office while at the same time disputing that interpretation.

Reply: The language of §1.56(b)(2) has been modified to clarify that information is material to patentability if it refutes, or is inconsistent with, a position the applicant takes in (1) opposing an argument of unpatentability relied on by the Office, or (2) asserting an argument of patentability.

Comment 33. One comment stated that §1.56(b)(2) was flawed in requiring a duty to conduct a file search to make sure that no information exists which even arguably contradicts a position taken or to be taken in response to the examiner, or which supports the examiner's position which may be improper.

Reply: Section 1.56(b)(2) does not require a search of files. Under §1.56(a), the duty of disclosure is confined to that information which is known to an individual to be material as defined in paragraph (b).

Comment 34. One comment stated that proposed §1.56(c) should be modified so that the duty of any individual designated as having a duty of disclosure would terminate when such individual ceases to be substantively involved in the preparation or prosecution of the application. The comment used, as an example, an inventor who would not be aware of art cited by the examiner which would cause information known to the inventor to fall within the definition of materiality for the first time.

Reply: The suggestion in the comment is not adopted. The duty to disclose information material to patentability rests on the

individuals designated in §1.56(c) until the application issues as a patent or becomes abandoned. Paragraph (a) of §1.56 makes it clear, however, that each individual has a duty to disclose only information which is known to that individual to be material.

Comment 35. One comment stated that proposed §1.56(c)(3) should not include the assignee, or anyone to whom there is an obligation to assign the application, in the class of those who have a duty to disclose material information since there might be a "witch hunt" during litigation to find one employee with knowledge of, or possession of, information that should have been disclosed.

Reply: No modification to §1.56(c)(3) is needed since §1.56 sets forth that only individuals who are associated with the filing and prosecution of a patent application have a duty of candor and good faith, including a duty to disclose to the Office all information known to be material to patentability.

Comment 36. One comment stated that proposed §1.56(d) should be revised to expressly allow an inventor to satisfy the duty by disclosing information to the practitioner who prepares or prosecutes the application so that redundant information disclosure statements will not be required from both the inventor and the attorney or agent.

Reply: The suggestion in the comment is not adopted since the duty as described in §1.56 will be met as long as the information in question was cited by the Office or submitted to the Office in the manner prescribed by §§1.97(b)-(d) and 1.98 before issuance of the patent. Statements from both an inventor and the practitioner are not required to be submitted.

Comment 37. One comment stated that proposed §§1.52(c) and 1.67(c) should be modified to either (1) expressly permit alterations to be made in an application subsequent to the signing of the oath or declaration if a supplemental oath or declaration is later submitted, or (2) more properly, prohibit such alterations since if alterations are desirable, they can be made and the application can be filed with an unsigned oath or declaration. Another comment stated that willfully filling out false oaths should never be condoned.

Reply: The Office does not condone willfully filling out false oaths. Further, §10.23(c)(11) indicates that the Office considers it misconduct for a practitioner to knowingly file or cause to be filed an application containing a material alteration made after the signing of an accompanying oath or declaration without identifying the alteration. The Office will not consider striking an application in which an alteration was made, but a supplemental oath or declaration is required to be filed in an application containing alterations made after the signing of the oath or declaration.

Comment 38. One comment stated that the implementation of proposed §§1.63(b)(3) and 1.175(a)(7) allows for a two-month delay in the deadline for requiring declarations complying therewith.

Reply: The averments in oath or declaration forms presently in use that comply with the previous §1.63 or §1.175 will also comply with the requirements of the new rules. Therefore, the Office will continue to accept the old oath or declaration forms as complying with the new rules.

Comment 39. Five comments questioned the need for the proposed rules since statistics show that information disclosure statements are submitted early in prosecution and questioned what new service is being provided for the proposed fee in §1.97.

Reply: The Office desires to continue to encourage information to be submitted promptly so that it can be considered by the examiner when the first Office action is prepared. Some people have expressed a desire to have the option of waiting to submit information until after the first Office action, without concern that they will be subject to a charge of inequitable conduct. Section 1.97(c), as amended, will provide this option to applicants in that information will be considered later than three months after the filing date of the application (§1.97(a) prior to amendment) without a showing of promptness (prior §1.99). The fee will compensate the Office for the added expense caused by the late submission of the information and will serve as a disincentive to the intentional withholding of information even for a short period of time.

Comment 40. Two comments suggested that proposed §1.97(a) be modified so that the mechanism of proposed §1.98 would not be the only acceptable technique for submitting information.

Reply: The Office has set forth the minimum requirements for information to be considered in §§1.97 and 1.98. These rules will provide certainty for the public of exactly what the requirements are, when the Office will consider information and when the Office will not consider information. Thus, applicants are provided with means for complying with the duty of disclosure by following the rules. If information is submitted in a manner so that it is not considered by the Office, applicant will assume the risk that a court might find a violation of the duty of candor and good faith which includes the duty to disclose material information.

Comment 41. Four comments suggested that information which is recognized by applicant as being material after the period set in proposed §1.97(b) as the result of prior art cited by the examiner should be permitted to be submitted to the Office without the fee set forth in 1.17(p), the certification or the petition fee required by §1.97.

Reply: The suggestion in the comments is not adopted since it would require a certification, e.g., why the information was just recognized as being material, and would unduly complicate the rules and the procedures for considering information submitted by applicant. Applicants can avoid or, at least, minimize the problem by submitting information which is known to be relevant to the application even though it is not yet recognized as being required to be submitted because it is material to patentability. The fees charged are to compensate the Office for the additional work that will be necessary when information is submitted during an advanced stage of the examination process.

Comment 42. Two comments suggested that the period for submitting information set in proposed §1.97(b) be changed to be two months from the issuance of the Official Filing Receipt to avoid information disclosure statements being misrouted in the Office.

Reply: The suggestion in the comment is not adopted. The date that the Filing Receipt is mailed is not maintained in the application file so there would be administrative difficulty in determining when a fee or certification is required to be filed under the new rule. An application can be filed with a self-addressed return postcard so that applicant can obtain the serial number assigned to the application very soon after filing. Further, information may be filed under §1.97(b) before the mailing of a first Office action on the merits even if this occurs later than three months after the application filing date.

Comment 43. One comment questions whether §1.97(b) or §1.97(d) applies in the event of issuance of a final rejection within three months of the filing of an application. The comment indicated that paragraph (b) should apply in this situation.

Reply: Paragraph (b) would apply in this situation since the paragraph specifies that information may be filed within three months of the filing date of the application or before the mailing date of a first Office action on the merits, whichever event occurs last. Thus, information would be considered pursuant to §1.97(b) if it was filed within three months of the filing date of the application even if a final rejection was mailed prior to three months from the filing date.

Comment 44. One comment stated that proposed §1.97(b)(1) should be clarified to indicate that "the filing of a national application" includes "a continuing application which replaces the original application."

Reply: The suggested modification has not been adopted since it is not necessary for clarity. The term "national application" includes continuing applications in this and the other patent rules. It is not desirable to add the suggested language to all occurrences of the term "application" in the rules or to raise the implication that continuing applications are not included in the term in other rules by adding the suggested language to this rule.

Comment 45. One comment stated that proposed §1.97 should be changed to state that if a responsible party becomes aware of material information less than three months before issuance of an Office action, that information will be considered timely filed if it is submitted together with the response to the action. The comment also stated that the Office could go farther and implement a rule which specifies that such information will be considered timely submitted if it reaches the examiner before the response to the Office action is taken up for consideration. Three other comments stated that the Office should accept information disclosure statements with responses to Office actions, with one

comment arguing that there is no benefit in submitting two papers where one would suffice.

Reply: The suggestions in the comments are not adopted. The rule as proposed and promulgated has the advantage of being relatively easy to comply with and administer. Information should be submitted promptly so that the examiner will have the option of reviewing the information and withdrawing or revising the Office action. Requiring information to be submitted promptly contributes to the efficiency of the examination process.

Comment 46. One comment stated that there should be no fee in §1.97 associated with the filing of an information disclosure statement since this might impact negatively on the submission of material information; rather, it would be sufficient to permit material information submitted subsequent to a non-final action to support a final rejection in the next action, in the absence of the certification proposed in the rules. Another comment, however, stated that the proposed fee requirement would not be a disincentive to submission of prior art, but would force examiners to consider certain art which under current practice often is not made of record, but instead, requires the filing of a continuation application.

Reply: The fee required in the rule will serve both to cover additional expense caused the Office by the late submission of information and will also serve as a disincentive to failing to cooperate in submitting information early in the prosecution of an application rather than as a disincentive to submitting information at all.

Comment 47. One comment questioned whether information in an information disclosure statement submitted during the period set forth by proposed §1.97(c) could be used by an examiner to make the next action final if the statement was submitted with a certification under §1.97(e).

Reply: Information submitted with a certification during the period set forth in §1.97(c) will not be used to make the next Office action final on unamended claims since in this situation it is clear that applicant has submitted the information to the Office promptly after it has become known and the information is being submitted prior to a final determination on patentability by the Office.

Comment 48. One comment stated that it was unfair for the Office to require a fee for considering information pursuant to proposed §1.97(c) and then also be able to use the information in making the Office action final.

Reply: The policy is not considered to be unfair. If information is submitted during the period set forth in §1.97(c) without the certification, the fee will compensate the Office for extra work that may be caused by the failure to submit information promptly. If the cost for this extra work were not placed upon the applicant in this situation, the cost would have to be borne by all applicants through payment of higher fees. The possibility that the next Office action may be made final will further encourage prompt disclosure of information to the Office.

Comment 49. One comment suggested that information should be considered (§1.97(c)) after final rejection, since this is different from after allowance when the Office would have to go back and reconsider its work. Two comments stated that proposed §1.97(c)(1) should not penalize applicants who receive a foreign search report after a final rejection is made in the application and that the certification under §1.97(e) should be available until an advisory action after final rejection or a notice of allowability occurs in the application. Another comment stated that final action may not even be on the merits but merely administrative.

Reply: The suggestions in the comments are not adopted. Both a notice of allowance and a final rejection represent a final Office decision on patentability. Information considered after either of these actions may require the Office to alter its position. After either of these actions, information will be considered only if it is submitted promptly in accordance with §1.97(d) or is submitted in a refiled application. It should be noted that information cited in a foreign search report, if cited to the Office within three months of the date on the search report, will be considered by the Office if filed before payment of the issue fee.

Comment 50. One comment stated that proposed §1.97(d) would result in unequal treatment of U.S. inventors who file first in the Office as compared to foreign inventors who file first in a foreign country since the latter will have the results of the search made

by the foreign examining country earlier in the pendency of the U.S. application. Six comments suggested that a U.S. inventor should have the ability to make the certification of §1.97(e) and to have the Office consider the information, regardless of the stage of prosecution at which information from a foreign office is submitted.

Reply: It should be noted that the certification of §1.97(e) can be made and information considered by the Office until the issue fee is paid on the application. After the issue fee has been paid on an application, it is impractical for the Office to attempt to consider newly submitted information. The application may be withdrawn from issue at this point, however, pursuant to §1.313(b)(5) so that the information can be considered in a continuing application, or pursuant to §1.313(b)(3) if applicant states that one or more claims are unpatentable over the information that is cited. It is further noted that it is applicants, not the Office, who make decisions on when and in which countries to file an application. U.S. inventors who may desire to seek patent protection in foreign countries have the ability to utilize the provisions of the Patent Cooperation Treaty and to delay the requirement to enter the national stage until after a search report on the invention is made.

Comment 51. One comment questioned whether a certification under §1.97(e) could properly be made in situations where information known by the applicant but not considered material is cited by a foreign patent office more than three months later than the first knowledge by applicant.

Reply: The language of §1.97(e) has been modified to permit a certification to be made in the situation described in the comment. If an item of information is submitted within three months of being cited in a communication from a foreign patent office in a counterpart foreign patent application, the certification can be properly made regardless of any individual's previous knowledge of the information.

Comment 52. One comment stated that the three-month time period for submitting information from foreign patent offices under proposed §1.97(e) might be too short because not all foreign offices provide copies of references and that the Office should provide for a petition in unusual circumstances. Five comments stated that a three-month time limit for filing foreign search reports is not reasonable but rather that six months would be more reasonable.

Reply: The Office has chosen the three month time period as appropriate in view of all the factors involved in obtaining information and in the examination process. It should be noted that Office actions typically set a three-month shortened statutory period for response. A response to an Office action generally requires more time for preparation than is involved in the submitting of a foreign search report and copies of the documents cited.

Comment 53. Five comments suggested that §1.97(e) should permit a certification to be made if an individual knew of information for more than three months before it was filed but did not recognize its materiality or relevance to the application.

Reply: The suggestion in the comments is not adopted. The Office desires to encourage prompt evaluation of information as to materiality by applicants and the Office so as to contribute to the efficiency and effectiveness of the examination process. It should be noted that an applicant is not required to delay the submission of information while evaluating materiality, but can submit the information pursuant to §§1.97 and 1.98.

Comment 54. One comment stated that proposed §1.97(e) should be clarified to specify that the certificates can be made regardless of the source of the information being submitted, so long as it is disclosed within three months of receipt. One comment stated that the three-month period of proposed §1.97(e) should be measured from the receipt date of a communication from a foreign patent office.

Reply: A certification under §1.97(e) can be made if each item of information was cited in a communication from a foreign patent office in a counterpart foreign application not more than three months prior to filing the statement. A certification can also be made if no item of information was cited in a communication from a foreign patent office in a counterpart foreign application or was known to any individual designated in §1.56(c) more than three months prior to filing the information disclosure statement. The Office wishes to encourage prompt evaluation of the relevance of information and to have a date certain for determining if a certification can properly be made. Although it is recognized

that an individual actually becomes aware of the information in the communication from a foreign patent office sometime after it was mailed, the mailing date of such a communication, if it occurs prior to a first awareness of the same information, would determine the date for filing of an information disclosure statement without a fee. The Office is willing to absorb any additional cost in considering such information relevant to patentability after the time set in proposed paragraph (b) only when it is clear that an applicant is diligent in providing the information to the Office.

Comment 55. One comment stated that the cost of making a certification under §1.97(e) would be more than the \$200.00 fee proposed where no certification is made due to difficulties in obtaining information from foreign clients. The comment suggested that the rule provide for (1) the opportunity to provide documentation (as opposed to certification) illustrating when the information was received, and (2) the opportunity to submit information with increasing fees depending on when in the periods of §1.97(c) and (d) the information is submitted.

Reply: The suggestions in the comment are not adopted since they would add undue complexity to the rules and procedures. Further, the suggested provision of documentation, which presumably would be reviewed by someone in the Office, would probably add considerably to the overall expense of filing an information disclosure statement. No other comments indicated a desire for increasing fees depending on when the information is submitted.

Comment 56. Two comments stated that proposed §1.97(e) is ambiguous in using the language "to the knowledge of the person signing the certification" in that it could refer to "information and belief," "actual knowledge of the facts" or "no knowledge to the contrary." One comment stated that certifications should be able to be made on information and belief by a U.S. attorney or agent submitting a material reference received from a foreign patent attorney or agent, rather than requiring a certification from the foreign individual. Another comment suggested that the period should be calculated from when the applicant either knew or could have known of the reference because the U.S. attorney should not be penalized for delays from their foreign patent associates.

Reply: The certification under §1.97(e) should be made by a person who has knowledge of the facts being certified. The certification can be made by a practitioner who represents a foreign client and who relies on statements made by the foreign client as to the date the information first became known. A practitioner who receives information from a client without being informed whether the information was known for more than three months, however, cannot make the certification without making reasonable inquiry.

Comment 57. One comment stated that the language of proposed §1.97(e) would preclude the use of the certification in an application by corporations whose practitioners have over the years reviewed thousands of patents and technical publications, even though they are unaware of the relevance of any one thereof to the application.

Reply: The language of §1.97(e) is not intended to preclude use of the certification by representatives of corporations. The certification can be based on present, good faith knowledge about when information became known without a search of files being made. The Office, however, does desire to have information considered promptly by applicants as to materiality and to have information submitted to the Office early in the prosecution of an application.

Comment 58. One comment suggested that proposed §1.97(e) should permit certification only as to information submitted within four months of receipt from a foreign patent office, with all other late-submitted information requiring a fee so as to not open a legal quagmire implicit in the proposed certification requirement.

Reply: The suggestion in the comment is not adopted. The certification set forth in §1.97(e) is preferable since it provides the avoidance of the payment of a fee by a person who is submitting information promptly to the Office. An applicant has the option under the circumstances described in §1.97(c), however, to not make the certification and to pay the fee instead if so desired.

Comment 59. One comment suggested that proposed §1.97(f) be modified to specify that *not less than one month* will be given if a bona fide attempt is made to comply with §1.98 but part of the required content is omitted. Another comment suggested that §1.97(f) should state that the Office *will* give (rather than *may* give) additional time for compliance with §1.98.

Reply: The suggestions in the comments are not adopted. The language of §1.97(f) parallels present §1.135(c) since the practice and considerations are similar for both rules. The Office intends to provide one month to comply with §1.98 where a bona fide attempt has been made to do so.

Comment 60. One comment stated that proposed §1.97(f) should specify that the Office shall inform the applicant if a reference will not be considered due to noncompliance with §1.98 so as to avoid any argument in litigation that a certain reference was not considered due to clerical noncompliance.

Reply: The Office plans to notify applicants in accordance with §§1.97(f) and (i) if submitted information will not be considered. The examiner will also indicate in the application record what information has been considered. Further details will appear in the Manual of Patent Examining Procedure in due course.

Comment 61. One comment suggested that proposed §1.97(g) should be modified to state that the filing of an information disclosure statement shall not be construed as a representation that no other material information exists such as is set forth in current §1.97(b).

Reply: The suggestion in the comment has not been adopted since referring to "no other material information" would imply that the information being submitted was admitted to be material. There is no requirement that information being submitted be material to the application.

Comment 62. One comment suggested that proposed §1.97(h) be modified to state that information not considered by the Office will be deemed in all respects to have not been submitted by the applicant since this would make a noncompliant submission clearly not a fulfillment of the duty of candor.

Reply: The suggestion in the comment is not adopted. The Office has no need or desire to rule on lack of fulfillment of the duty of candor in such a situation. The rules are drafted such that §1.56 sets forth what information is material to patentability and §§1.97 and 1.98 set forth procedures to assure consideration of information by the Office.

Comment 63. One comment stated the Office has a duty to consider information even if this involves withdrawing an application from issue or publishing a cancellation notice and that proposed §1.97(h) should be changed to so state. Another comment stated that it would be an abdication of the duty that the Office owes to the public for information in the file to be ignored since issuance of an invalid patent can be used to discourage others in the field. The comment suggested that the Office should leave in doubt whether the information will be considered or not.

Reply: It is necessary for the Office to balance its need and desire to consider all information relevant to an application with its need for an efficient operation and its capability to consider information at various stages in the prosecution of an application. The Office is setting forth when information will and will not be considered to provide certainty for the public.

Comment 64. One comment requested information on how a United States patent application or other information (§1.98(a)(1)(iii)) should be listed on a PTO 1449 form.

Reply: The PTO 1449 has been drafted so as to provide spaces for listing documents which are available to the public and which will be printed on the patent at issuance. Other information should be listed separately from the PTO 1449 form.

Comment 65. One comment stated that §1.98(a)(2)(i) should not require the submission by applicants of United States patents listed in an information disclosure statement since the Office is better equipped to provide examiners with copies of those documents than inventors and their attorneys. Alternatively, the comment suggested that the Office should establish a procedure whereby an order for the Office to provide the copies of the patents at the usual fee can accompany the information disclosure statement.

Reply: At the present time, when the Automated Patent System has not been fully implemented, the overall cost of the Office obtaining copies of patents and associating them with application files would be greater than for applicants to provide copies with information disclosure statements. Presumably, the appli-

cant would be using a copy of the patent in preparing the statement and could easily make a copy for submission to the Office.

Comment 66. One comment suggested that §1.98(a)(2)(iii), as proposed, be clarified by substituting "except that no copy of a U.S. patent application need be included" for the proposed phrase "except a U.S. patent application."

Reply: The suggested clarification to the language of the rule has been adopted.

Comment 67. A number of comments objected to the requirement in §1.98(a)(3) for a concise explanation of the relevance of all items of information being submitted.

Reply: In response to the comments, §1.98(a)(3) has been modified to require a concise explanation only of patents, publications or other information listed in an information disclosure statement that are not in the English language. Applicants may, if they wish, provide concise explanations of why English-language information is being submitted and how it is understood to be relevant. Concise explanations are helpful to the Office, particularly where documents are lengthy and complex and applicant is aware of a section that is highly relevant to patentability.

Comment 68. Five comments stated that the proposed rules should be modified to state that if information is being submitted from a foreign search report, the requirement for a concise explanation in proposed §1.98(a)(3) may be satisfied by submitting an English-language version of the search report.

Reply: The language of §1.98(a)(3) has been modified so that no concise explanation is required for information submitted in the English language. The concise explanation requirement for non-English language information may be met by the submission of an English language version of the search report indicating the degree of relevance found by the foreign office. It is not necessary that this detail be included in the rule.

Comment 69. Five comments questioned whether the requirement in proposed §1.98(a)(3) would be satisfied by a statement that the references were cited in the prosecution of a parent application.

Reply: The requirement in §1.98(a)(3) for a concise explanation of non-English language information would not be satisfied by a statement that a reference was cited in the prosecution of a parent application. The concise explanation must explain the relevance as presently understood by the person designated in §1.56(c) most knowledgeable about the content of the information.

Comment 70. One comment suggested that proposed §1.98(a)(3) should be modified to require a concise explanation of "what is believed to be" the relevance of information listed to avoid the accusation of violation of duty of disclosure merely because more relevant portions of the information are later found. Another comment suggested that the concise explanation should state what is "reasonably understood by the person submitting the statement." Another comment stated that the applicant should be required to explain (1) only what is understood or believed about the item of information at the time the disclosure is made, or (2) why the item is listed.

Reply: The suggestions in the comments have been substantially adopted in modifying the language of §1.98(a)(3).

Comment 71. One comment stated that proposed §1.98(b) should not require the date (unless material) and place of publication of journal articles since such information is not given on search reports from foreign patent offices or on journals published by the American Chemical Society, which just give the year. Another comment indicated that sometimes it is not clear where the place of publication is.

Reply: The suggestions in the comments are not adopted. The date of publication is necessary for the Office to be able to determine if the information may be used in a rejection of the claims in an application. The place of publication refers to the name of the journal, magazine or other publication in which the article was published, which should be available in the vast majority of cases.

Comment 72. One comment suggested that §1.98(c) should not require a translation of a non-English language document to be filed if a translation is within the possession, custody or control of an individual designated in §1.56(c) because such person may not recall that there is a translation somewhere in the records of the individual, perhaps having been made for another application years earlier.

Reply: The requirement of the rule for a translation to be submitted under limited conditions is not a change in practice. See prior §§1.56(j) and 1.97(b). Since the requirement has caused little, if any, problem in the past, the suggestion of the comment is not adopted.

Comment 73. One comment suggested that §1.98(c) should be revised to make it clear that a reference that is essentially cumulative to another reference need not be listed in an information disclosure statement.

Reply: The concept that cumulative information is not material is set forth in §1.56(b). Section 1.98 does not deal with what information must be submitted, but provides an exception for cumulative information to the requirement for a copy to be submitted of each item of information listed in an information disclosure statement.

Comment 74. One comment stated that a sentence in the preamble discussion of proposed §1.98(c) was burdensome because it would require submission of incomplete or inexact translations which may have been made of an item of information. The sentence in question reads:

"But if the individual has the ability to translate the non-English language into English and has done so for the purposes of reviewing the information relative to the claimed invention, the translation would be considered 'readily available.'"

Another comment stated that proposed §1.98(c) should be modified to require a translation if the non-English language document is to be considered by the examiner since the attorney would want to prepare an accurate translation of particularly relevant references. One comment suggested that §1.98(c), or the preamble discussion, should make it clear that an English-language translation of a foreign language material reference need not be submitted where an individual merely reads in the reference in its original language and translates it mentally but does not prepare a written translation. Five other comments requested clarification on this point.

Reply: The Office does not intend to require translations unless they have been reduced to writing and are actually translations of what is contained in the non-English language information. Applicants should note, however, that most examiners do not have the ability to understand information which is not in English and that the Office will not routinely translate information submitted in a non-English language. The examiner will consider the information insofar as it is understood on its face, e.g., drawings, chemical formulas, English-language abstracts, but will not have the information translated unless it appears to be necessary to do so. Applicants are required to aid the examiner by complying with the requirements for a concise explanation in §1.98(a)(3) for information submitted in a non-English language.

Comment 75. One comment stated that §1.98(d) should be clarified to state that a copy of an item of information listed in an information disclosure statement need not be submitted if the reference was cited by the Office or previously submitted to the Office in connection with a prior application.

Reply: The suggestion in the comment is adopted. The language of §1.98(d) has been modified to state that a copy of an item of information is not required if it was previously cited by the Office or previously submitted to the Office in a prior application being relied on for an earlier filing date under 35 U.S.C. 120.

Comment 76. One comment suggested that proposed §1.98(d) should be revised to not require the submission of a copy of the information listed in an information disclosure statement if a copy of the information has previously been submitted to the Office in a prior application, whether or not the earlier application is being relied upon for an earlier filing date under 35 U.S.C. 120.

Reply: The suggestion in the comment is not adopted. The exception to the requirement for a copy of each item of information to be submitted has been made with regard to prior applications which will normally be available to, and considered by, the examiner. It would not be efficient for the examiner to be required to seek out unrelated application files to obtain a copy of an item of information when a copy could easily be submitted by applicant.

Comment 77. One comment questioned what would be considered "timely" under §1.291 so that information would be consid-

ered by the examiner without payment of a fee, in contrast to proposed §1.97 which may require a fee.

Reply: Section 1.291 has not been amended to redefine timeliness. The comment seems to imply that the fee requirements of §1.97 can be avoided through the use of a protest submitting information, but such a course of action might raise questions regarding compliance with the duty of candor and good faith required in dealings with the Office.

Comment 78. One comment stated that the Office should not drop the acknowledgment of a protest having been filed under §1.291 in a reissue application because the acknowledgment served as an indication that the protest had been received in the examining group from the mail room.

Reply: The suggestion in the comment is not adopted. Any perceived benefit from retaining the acknowledgment is outweighed by the administrative burden it causes. There is no good reason to treat the filing of protests in reissue applications differently from the filing of protests in original applications or from the filing of other papers in the Office.

Comment 79. One comment questioned whether an application could be withdrawn from issue pursuant to proposed §1.313(b)(5) without admitting unpatentability.

Reply: There is no requirement that unpatentability must be admitted before an application can be withdrawn from issue pursuant to §1.313(b)(5). The rule provides for applications to be withdrawn from issue and abandoned for consideration of information in a continuing application. This differs from a petition under §1.313(b)(3) based on unpatentability of one or more claims.

Comment 80. One comment questioned whether, if an application is withdrawn from issue pursuant to proposed §1.313(b)(5), an information disclosure statement can be submitted in the continuing application under §1.97(b) without a certification.

Reply: A continuing application is treated like any other application with regard to the times set forth in §1.97(b). Thus, for example, an information disclosure statement could be filed without a fee or certification in a continuing application within three months of the filing date of the continuing application.

Comment 81. One comment questioned whether an application withdrawn from issue pursuant to §1.313(b)(5) could have new art and amendments considered in that application rather than in a continuing application. The comment also questioned the handling of applications withdrawn from issue pursuant to §1.313(b)(3).

Reply: The language of §1.313(b)(5) makes it clear that an application withdrawn from issue thereunder is to be abandoned without further prosecution. This differs from an application withdrawn from issue pursuant to §1.313(b)(3) because applicant had admitted the unpatentability of one or more claims.

Comment 82. One comment questioned whether the continuing application mentioned in proposed §1.313(b)(5) could be a file wrapper continuing application under §1.62 and how applicants can accomplish the withdrawal from issue under proposed §1.313(b) late in the prosecution of an application.

Reply: The continuing application mentioned in §1.313(b)(5) can be a file wrapper continuing application under §1.62. Even though §1.62 requires a file wrapper continuing application to be filed before the payment of the issue fee, the Office will consider the filing of a petition to withdraw from issue under §1.313(b)(5) as sufficient grounds to waive that requirement of §1.62. Late in the prosecution of an application, the Office has difficulty in matching papers with the application file. Papers requesting that an application be withdrawn from issue after the issue fee is paid should be directed, or preferably hand-carried, to the Office of Petitions in the Office of the Assistant Commissioner for Patents.

Comment 83. Seven comments suggested that §1.555(a) should not be amended to require the submission of "all information material to patentability" since a reexamination proceeding is limited to consideration of patents and printed publications.

Reply: The suggestion in the comments has been adopted. A paragraph (b), which defines what information is material to patentability in a reexamination proceeding, has been added to the rule.

Comment 84. One comment suggested that proposed §1.555(a) should be modified to make clear that there is no duty of disclosure on employees of a corporate patent owner if the employees are not substantively involved in the preparation of the reexamination request or the reexamination proceeding.

Reply: The suggestion in the comment to modify the language in §1.555(a) has not been adopted. The rule refers to individuals who are substantively involved on behalf of the patent owner in a reexamination proceeding.

Comment 85. Two comments stated that the Office should consider fraud or other inequitable conduct issues in interference proceedings.

Reply: The suggestion in the comments has been adopted. The Office will consider inequitable conduct issues in interference proceedings as announced on November 19, 1991, in the *Official Gazette* of the Patent and Trademark Office at 1132 Off. Gaz. Pat. Off. 33.

Comment 86. One comment requested more examples with regard to proposed §10.23(c)(10) of what alteration or combination of alterations in a declaration would be considered material.

Reply: It is not the function of the rules or the rulemaking process to provide a detailed listing of what alterations may be considered to be improper. This consideration will necessarily be made in view of the totality of the circumstances involved. Practitioners would be well advised to avoid filing applications which contain alterations which have not been initialed and dated.

Comment 87. Two comments stated that §10.23(c)(10) should be amended to prohibit knowingly attempting to mislead the Office in the drafting or prosecution of a patent application. One comment stated that attempted fraud or inequitable conduct would not be prohibited by proposed §10.23(c)(10) because such conduct would not be a violation of proposed §§1.56 or 1.555.

Reply: No amendment is necessary to the language of §10.23(c)(10). It should be noted that the duty of candor and good faith in dealing with the Office is included in §§1.56 and 1.555. This duty includes a prohibition against knowingly attempting to mislead the Office.

Comment 88. Five comments stated that it would be unfair to impose the new disclosure requirements and fees on applications that are pending before the Office on the effective date of the new rule. Another comment stated that the rules should be immediately effective for all pending applications with some grace period for making the initial disclosure without penalty and without fee.

Reply: The Office will apply the new rules to all applications pending on, or filed on or after, the effective date of the rules. While this implementation may cause some burden on some applicants, other applicants will obtain benefits not otherwise available. This decision will also ease the administrative burden on the Office in implementing the new rules.

Other Considerations

The rule change is in conformity with the requirements of the Regulatory Flexibility Act, 5 U.S.C. 601 et seq., Executive Orders 12291 and 12612, and the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 et seq.

The General Counsel of the Department of Commerce has certified to the Small Business Administration that the rule change will not have a significant adverse economic impact on a substantial number of small entities (Regulatory Flexibility Act, 5 U.S.C. 605(b)) because the rules as adopted do not require individuals to submit information that they are not already aware of and are not already under an obligation to provide to the Office. The rules further promote the efficiency of the examination process by encouraging a timely submission of an information disclosure statement and by substantially eliminating rejections based on inequitable conduct, thereby reducing the costs to all patent applicants.

The Patent and Trademark Office has determined that this rule change is not a major rule under Executive Order 12291. The annual effect on the economy will be less than \$100 million. There will be no major increase in costs or prices for consumers, individual industries, Federal, state or geographic regions. There will be no significant adverse effects on competition, employment, investment, productivity or innovation, or on the ability of the United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

The Patent and Trademark Office has also determined that this rule change has no Federalism implications affecting the rela-

tionship between the National Government and the States as outlined in Executive Order 12612.

This rule contains a collection of information requirement subject to the Paperwork Reduction Act, which has previously been approved by the Office of Management and Budget under Control No. 0651-0011. Each information disclosure statement is estimated to take approximately 30 minutes, including time for reviewing instructions, gathering and maintaining data needed, and completing and reviewing the collection of information. The time estimate has been reduced from that stated in the proposal since the requirement for a concise explanation of the relevance of each item of information cited in an information disclosure statement has been limited to information submitted in a language other than English. Send comments regarding this burden estimate to the Patent and Trademark Office, Office of Management and Organization, and to the Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, D.C. 20503. (Attention Paper Reduction Project 0651-0011)

List of Subjects 37 CFR Part 1

Administrative practice and procedure, Inventions and patents, Reporting and record keeping requirements, Small businesses.

37 CFR Part 10

Administrative practice and procedure, Inventions and patents, Lawyers, Reporting and record keeping requirements.
For the reasons set forth in the preamble, 37 CFR Parts 1 and 10 are amended as follows:

Part 1 - Rules of Practice in Patent Cases

1. The authority citation for Part 1 continues to read as follows:

Authority: 35 U.S.C. 6, unless otherwise noted.

2. In §1.17, paragraph(i)(1) is revised and paragraph (p) is added to read as follows:

§1.17 Patent application processing fees.

(i)(1) For filing a petition to the Commissioner under a section of this part listed below which refers to this paragraph \$130.00

§1.12—for access to an assignment record.

§1.14—for access to an application.

§1.53—to accord a filing date.

§1.55—for entry of late priority papers.

§1.60—to accord a filing date.

§1.62—to accord a filing date.

§1.97(d)—to consider an information disclosure statement.

§1.103—to suspend action in application.

§1.177—for divisional reissues to issue separately.

§1.312—for amendment after payment of issue fee.

§1.313—to withdraw an application from issue.

§1.314—to defer issuance of a patent.

§1.334—for patent to issue to assignee, assignment recorded late.

§1.666(b)—for access to interference settlement agreement.

(p) For submission of an information disclosure statement under §1.97(c) \$200.00

3. Section 1.28, paragraph (d)(2) is revised to read as follows:

§1.28 Effect on fees of failure to establish status, or change status, as a small entity.

(d)(1) ***

(2) Improperly and with intent to deceive

(i) establishing status as a small entity,
or

(ii) paying fees as a small entity

shall be considered as a fraud practiced or attempted on the Office.

4. Section 1.51, paragraph (b) is revised to read as follows:

§1.51 General requisites of an application.

(b) Applicants are encouraged to file an information disclosure statement. See §§1.97 and 1.98.

5. Section 1.52, paragraph (c) is revised to read as follows:

§1.52 Language, paper, writing, margins.

(c) Any interlineation, erasure, cancellation or other alteration of the application papers filed should be made before the signing of any accompanying oath or declaration pursuant to §1.63 referring to those application papers and should be dated and initialed or signed by the applicant on the same sheet of paper. Application papers containing alterations made after the signing of an oath or declaration referring to those application papers must be supported by a supplemental oath or declaration under §1.67(c). After the signing of the oath or declaration referring to the application papers, amendments may be made in the manner provided by §§1.121 and 1.123 through 1.125.

6. Section 1.56 is revised to read as follows:

§1.56 Duty to disclose information material to patentability.

(a) A patent by its very nature is affected with a public interest. The public interest is best served, and the most effective patent examination occurs when, at the time an application is being examined, the Office is aware of and evaluates the teachings of all information material to patentability. Each individual associated with the filing and prosecution of a patent application has a duty of candor and good faith in dealing with the Office, which includes a duty to disclose to the Office all information known to that individual to be material to patentability as defined in this section. The duty to disclose information exists with respect to each pending claim until the claim is cancelled or withdrawn from consideration, or the application becomes abandoned. Information material to the patentability of a claim that is cancelled or withdrawn from consideration need not be submitted if the information is not material to the patentability of any claim remaining under consideration in the application. There is no duty to submit information which is not material to the patentability of any existing claim. The duty to disclose all information known to be material to patentability is deemed to be satisfied if all information known to be material to patentability of any claim issued in a patent was cited by the Office or submitted to the Office in the manner prescribed by §§1.97(b)-(d) and 1.98. However, no patent will be granted on an application in connection with which fraud on the Office was practiced or attempted or the duty of disclosure was violated through bad faith or intentional misconduct. The Office encourages applicants to carefully examine; (1) prior art cited in search reports of a foreign patent office in a counterpart application, and (2) the closest information over which individuals associated with the filing or prosecution of a patent application believe any pending claim patentably defines, to make sure that any material information contained therein is disclosed to the Office.

(b) Under this section, information is material to patentability when it is not cumulative to information already of record or being made of record in the application, and

(1) it establishes, by itself or in combination with other information, a prima facie case of unpatentability of a claim; or
(2) it refutes, or is inconsistent with, a position the applicant takes in:

(i) opposing an argument of unpatentability relied on by the Office, or

(ii) asserting an argument of patentability.

A prima facie case of unpatentability is established when the information compels a conclusion that a claim is unpatentable under the preponderance of evidence, burden-of-proof standard, giving each term in the claim its broadest reasonable construction consistent with the specification, and before any consideration is given to evidence which may be submitted in an attempt to establish a contrary conclusion of patentability.

(c) Individuals associated with the filing or prosecution of a patent application within the meaning of this section are:

(1) each inventor named in the application;

(2) each attorney or agent who prepares or prosecutes the application; and

(3) every other person who is substantively involved in the preparation or prosecution of the application and who is associated with the inventor, with the assignee or with anyone to whom there is an obligation to assign the application.

(d) Individuals other than the attorney, agent or inventor may comply with this section by disclosing information to the attorney, agent, or inventor.

7. Section 1.63, paragraphs (b)(3) and (d) are revised to read as follows:

§1.63 Oath or declaration.

(b) ***

(3) Acknowledges the duty to disclose to the Office all information known to the person to be material to patentability as defined in §1.56.

(d) In any continuation-in-part application filed under the conditions specified in 35 U.S.C. 120 which discloses and claims subject matter in addition to that disclosed in the prior copending application, the oath or declaration must also state that the person making the oath or declaration acknowledges the duty to disclose to the Office all information known to the person to be material to patentability as defined in §1.56, which became available between the filing date of the prior application and the national or PCT international filing date of the continuation-in-part application.

8. Section 1.67 is amended by adding a new paragraph (c) to read as follows:

§1.67 Supplemental oath or declaration.

(c) A supplemental oath or declaration meeting the requirements of §1.63 must also be filed if the application was altered after the oath or declaration was signed or if the oath or declaration was signed:

(1) in blank;

(2) without review thereof by the person making the oath or declaration; or

(3) without review of the specification, including the claims, as required by §1.63(b)(1).

9. Section 1.97 is revised to read as follows:

§1.97 Filing of information disclosure statement.

(a) In order to have information considered by the Office during the pendency of a patent application, an information disclosure statement in compliance with §1.98 should be filed in accordance with this section.

(b) An information disclosure statement shall be considered by the Office if filed:

(1) within three months of the filing date of a national application;

(2) within three months of the date of entry of the national stage as set forth in §1.491 in an international application; or

(3) before the mailing date of a first Office action on the merits, whichever event occurs last.

(c) An information disclosure statement shall be considered by the Office if filed after the period specified in paragraph (b) of this section, but before the mailing date of either

(1) a final action under §1.113 or

(2) a notice of allowance under §1.311,

whichever occurs first, provided the statement is accompanied by either a certification as specified in paragraph (e) of this section or the fee set forth in §1.17(p).

(d) An information disclosure statement shall be considered by the Office if filed after the mailing date of either

(1) a final action under §1.113 or

(2) a notice of allowance under §1.311,

whichever occurs first, but before payment of the issue fee, provided the statement is accompanied by:

(i) a certification as specified in paragraph (e) of this section,

(ii) a petition requesting consideration of the information disclosure statement, and

(iii) the petition fee set forth in §1.17(i)(1).

(e) A certification under this section must state either

(1) that each item of information contained in the information disclosure statement was cited in a communication from a foreign patent office in a counterpart foreign application not more than three months prior to the filing of the statement, or

(2) that no item of information contained in the information disclosure statement was cited in a communication from a foreign patent office in a counterpart foreign application or, to the knowledge of the person signing the certification after making reasonable inquiry, was known to any individual designated in §1.56(c) more than three months prior to the filing of the statement.

(f) No extensions of time for filing an information disclosure statement are permitted under §1.136. If a bona fide attempt is made to comply with §1.98, but part of the required content is inadvertently omitted, additional time may be given to enable full compliance.

(g) An information disclosure statement filed in accordance with this section shall not be construed as a representation that a search has been made.

(h) The filing of an information disclosure statement shall not be construed to be an admission that the information cited in the statement is, or is considered to be, material to patentability as defined in §1.56(b).

(i) Information disclosure statements, filed before the grant of a patent, which do not comply with this section and §1.98 will be placed in the file, but will not be considered by the Office.

10. Section 1.98 is revised to read as follows:

§1.98 Content of information disclosure statement.

(a) Any information disclosure statement filed under §1.97 shall include:

(1) A list of all patents, publications, or other information submitted for consideration by the Office;

(2) A legible copy of:

(i) Each U.S. and foreign patent;

(ii) Each publication or that portion which caused it to be listed; and

(iii) All other information or that portion which caused it to be listed, except that no copy of a U.S. patent application need be included; and

(3) A concise explanation of the relevance, as it is presently understood by the individual designated in §1.56(c) most knowledgeable about the content of the information, of each patent, publication, or other information listed that is not in the English language. The concise explanation may be either separate from the specification or incorporated therein.

(b) Each U.S. patent listed in an information disclosure statement shall be identified by patentee, patent number and issue date. Each foreign patent or published foreign patent application shall be identified by the country or patent office which issued the patent or published the application, an appropriate document number, and the publication date indicated on the patent or published application. Each publication shall be identified by author (if any), title, relevant pages of the publication, date and place of publication.

(c) When the disclosures of two or more patents or publications listed in an information disclosure statement are substantively cumulative, a copy of one of the patents or publications may be submitted without copies of the other patents or publications provided that a statement is made that these other patents or publications are cumulative. If a written English-language translation of a non-English language document, or portion thereof, is within the possession, custody or control of, or is readily available to any individual designated in §1.56(c), a copy of the translation shall accompany the statement.

(d) A copy of any patent, publication or other information listed in an information disclosure statement is not required to be provided if it was previously cited by or submitted to the Office in a prior application, provided that the prior application is properly identified in the statement and relied upon for an earlier filing date under 35 U.S.C. 120.

11. Section 1.99 is removed and reserved.

12. Section 1.175, paragraph (a)(7), is revised to read as follows:

§1.175 Reissue oath or declaration.

(a) * * *

(7) Acknowledging the duty to disclose to the Office all information known to applicants to be material to patentability as defined in § 1.56.

* * * * *

13. Section 1.193(c) is removed and reserved.

§1.193 Examiner's Answer.

14. Section 1.291, paragraphs (a) and (c), are revised to read as follows:

§1.291 Protests by the public against pending applications.

(a) Protests by a member of the public against pending applications will be referred to the examiner having charge of the subject matter involved. A protest specifically identifying the application to which the protest is directed will be entered in the application file if:

- (1) the protest is timely submitted; and
- (2) the protest is either served upon the applicant in accordance with §1.248, or filed with the Office in duplicate in the event service is not possible.

Protests raising fraud or other inequitable conduct issues will be entered in the application file, generally without comment on those issues. Protests which do not adequately identify a pending patent application will be disposed of and will not be considered by the Office.

* * * * *

(c) A member of the public filing a protest in an application under paragraph (a) of this section will not receive any communications from the Office relating to the protest, other than the return of a self-addressed postcard which the member of the public may include with the protest in order to receive an acknowledgment by the Office that the protest has been received. The Office may communicate with the applicant regarding any protest and may require the applicant to respond to specific questions raised by the protest. In the absence of a request by the Office, an applicant has no duty to, and need not, respond to a protest. The limited involvement of the member of the public filing a protest pursuant to paragraph (a) of this section ends with the filing of the protest, and no further submission on

behalf of the protestor will be considered unless such submission raises new issues which could not have been earlier presented.

15. Section 1.313, paragraph (b), is revised to read as follows:

§1.313 Withdrawal from issue.

* * * * *

(b) When the issue fee has been paid, the application will not be withdrawn from issue for any reason except:

- (1) a mistake on the part of the Office;
- (2) a violation of §1.56 or illegality in the application;
- (3) unpatentability of one or more claims;
- (4) for interference; or
- (5) for abandonment to permit consideration of an

information disclosure statement under §1.97 in a continuing application.

16. Section 1.555 is revised to read as follows:

§1.555 Information material to patentability in reexamination proceedings.

(a) A patent by its very nature is affected with a public interest. The public interest is best served, and the most effective reexamination occurs when, at the time a reexamination proceeding is being conducted, the Office is aware of and evaluates the teachings of all information material to patentability in a reexamination proceeding. Each individual associated with the patent owner in a reexamination proceeding has a duty of candor and good faith in dealing with the Office, which includes a duty to disclose to the Office all information known to that individual to be material to patentability in a reexamination proceeding. The individuals who have a duty to disclose to the Office all information known to them to be material to patentability in a reexamination proceeding are the patent owner, each attorney or agent who represents the patent owner, and every other individual who is substantively involved on behalf of the patent owner in a reexamination proceeding. The duty to disclose the information exists with respect to each claim pending in the reexamination proceeding until the claim is cancelled. Information material to the patentability of a cancelled claim need not be submitted if the information is not material to patentability of any claim remaining under consideration in the reexamination proceeding. The duty to disclose all information known to be material to patentability in a reexamination proceeding is deemed to be satisfied if all information known to be material to patentability of any claim in the patent after issuance of the reexamination certificate was cited by the Office or submitted to the Office in an information disclosure statement. However, the duties of candor, good faith, and disclosure have not been complied with if any fraud on the Office was practiced or attempted or the duty of disclosure was violated through bad faith or intentional misconduct by, or on behalf of, the patent owner in the reexamination proceeding. Any information disclosure statement must be filed with the items listed in §1.98(a) as applied to individuals associated with the patent owner in a reexamination proceeding, and should be filed within two months of the date of the order for reexamination, or as soon thereafter as possible.

(b) Under this section, information is material to patentability in a reexamination proceeding when it is not cumulative to information of record or being made of record in the reexamination proceeding, and

- (1) it is a patent or printed publication that establishes, by itself or in combination with other patents or printed publications, a prima facie case of unpatentability of a claim; or
- (2) it refutes, or is inconsistent with, a position the patent owner takes in:
 - (i) opposing an argument of unpatentability relied on by the Office, or
 - (ii) asserting an argument of patentability.

A prima facie case of unpatentability of a claim pending in a reexamination proceeding is established when the information compels a conclusion that a claim is unpatentable under the preponderance of evidence, burden-of-proof standard, giving

each term in the claim its broadest reasonable construction consistent with the specification, and before any consideration is given to evidence which may be submitted in an attempt to establish a contrary conclusion of patentability.

(c) The responsibility for compliance with this section rests upon the individuals designated in paragraph (a) of this section and no evaluation will be made by the Office in the reexamination proceeding as to compliance with this section. If questions of compliance with this section are discovered during a reexamination proceeding, they will be noted as unresolved questions in accordance with §1.552(c).

Part 10 - Representation of Others Before the Patent and Trademark Office

17. The authority citation for Part 10 continues to read as follows:

Authority: 5 U.S.C. 500; 15 U.S.C. 1123; 35 U.S.C. 6, 31, 32, 41.

18. Section 10.23, paragraphs (c)(10) and (c)(11), are revised to read as follows:

§10.23 Misconduct.

(c) ***

(10) Knowingly violating or causing to be violated the requirements of §1.56 or §1.555 of this subchapter.

(11) Knowingly filing or causing to be filed an application containing any material alteration made in the application papers after the signing of the accompanying oath or declaration without identifying the alteration at the time of filing the application papers.

Jan 9, 1992

HARRY F. MANBECK, Jr.
*Assistant Secretary and Commissioner
of Patents and Trademarks*

[1135 OG 13]

(112) Implementation of Rules on Information Disclosure Statements

New rules on the duty of disclosure and information disclosure statements, effective March 16, 1992, were published in the *Federal Register* at 57 FR 2021 (Jan. 17, 1992) and in the *Official Gazette* at 1135 Off. Gaz. Pat. Office 13 (Feb. 4, 1992).

The procedures for handling information disclosure statements (37 CFR 1.97 and 1.98) will be set forth in Section 609 of the Manual of Patent Examining Procedure (MPEP). A copy of the instructions being given to examiners for handling information disclosure statements under the new rules is being published for the benefit of the public. Also being published is a sample declaration form which incorporates language conforming to the amendment to 37 CFR 1.63 contained in the new rules. Declaration forms acceptable under the rules in effect prior to the change effective March 16, 1992, will continue to be acceptable under the new rules.

The Office is considering changing its policy regarding the printing on patents of citations of information considered in patent applications. The proposed change will not affect consideration by the examiner of information submitted to the Office in compliance with 37 CFR 1.97(b)-(d) and 1.98. The proposed change affects only the information printed on the patent. Presently, as set forth in the last paragraph of the instructions which follow, information properly submitted by applicant and considered by the examiner will be printed on the patent along with the references cited by the examiner in Office actions. It has been suggested that it would be more helpful to the Office and to the public in using a patent for future search purposes if only the references cited and/or relied upon by the examiner in Office actions were listed on the printed patent. Alternatively, it has been suggested that the references listed on a patent be differen-

tiated as to whether they were cited and/or relied on by the examiner or cited by applicant but not relied on by the examiner. The Office has a preference for the option that lists only the information cited and/or relied on by the examiner because it reduces printing costs (some citations by applicants now add several additional pages to the patent grant) and minimizes processing problems associated with correcting incomplete or inaccurate citations before the patent is printed. Public comment on these proposals is welcomed and should be directed to J. Michael Thesz (703-305-9384) or by mail directed to Mr. Thesz in the Office of the Assistant Commissioner for Patents. Comments should be received before May 29, 1992.

April 20, 1992

HARRY F. MANBECK, Jr.
*Assistant Secretary and Commissioner
of Patents and Trademarks*

[1138 OG 37]

(112a) Processing of Information Disclosure Statements Under the New Rules Effective March 16, 1992

Applicants and other individuals substantively involved with the preparation and/or prosecution of a patent application have a duty to submit to the Office information which is material to patentability as defined in 37 CFR 1.56. These individuals also may want the Office to consider information for a variety of other reasons, e.g., without first determining whether the information meets any particular standard of materiality, or because another patent office considered the information to be relevant in a counterpart or related patent application filed in another country, or to make sure that the examiner has an opportunity to consider the same information that was considered by the individuals that were substantively involved with the preparation or prosecution of a patent application.

An information disclosure statement filed in accordance with the provisions of 37 CFR 1.97 and 1.98 provides the procedure available to an applicant to submit information to the Office so that information will be considered by the examiner assigned to the application. The requirements for the content of a statement have been simplified in the new rules effective March 16, 1992, to encourage individuals associated in a substantive way with the filing and prosecution of a patent application to submit information to the Office so the examiner can determine its relevance to the claimed invention. The procedure for submitting an information disclosure statement under the new rules are designed to encourage individuals to submit information to the Office promptly.

In order to have information considered by the Office during the pendency of a patent application, an information disclosure statement in compliance with 37 CFR 1.98 as to content must be filed in accordance with the procedural requirements of 37 CFR 1.97. The requirements as to content are discussed in A below. The requirements based on the time of filing the statement are discussed in B below. Examiner handling of information disclosure statement is discussed in C below.

The Office has set forth the minimum requirements for information to be considered in 37 CFR 1.97 and 1.98. Once the minimum requirements are met, the examiner has an obligation to consider the information. These rules provide certainty for the public by defining what the requirements are, when the Office will consider information and when the Office will not consider information.

The filing of an information disclosure statement shall not be construed as a representation that a search has been made. 37 CFR 1.97(g). There is no requirement that an application for a patent make a patentability search. Further, the filing of an information disclosure statement shall not be construed to be an admission that the information cited in the statement is, or is considered to be, material to patentability as defined in 37 CFR 1.56(b). 37 CFR 1.97(h). See MPEP 706.02(b) regarding admissions by applicant.

Multiple information disclosure statements may be filed in a single application, and they will be considered, provided each is in compliance with the appropriate requirements. Use of form PTO-1449, "Information Disclosure Citation," is encouraged as

a means providing the required list of information. See C(2) below.

Information which is cited or submitted to the Office in the parent application of a file wrapper continuing application under 37 CFR 1.62 will be part of the file before the examiner and need not be resubmitted in the continuing application. Likewise, the examiner will consider information cited or submitted to the Office in a parent application when examining a continuing application and thus this information need not be resubmitted unless applicant desires the information to be printed on the patent.

A. Content

An information disclosure statement must comply with the provisions of 37 CFR 1.98 as to content in order to be considered by the Office. Each information disclosure statement must comply with the applicable provisions of A(1), A(2) and A(3) below.

A(1) Each information disclosure statement must include a list of all patents, publications, or other information submitted for consideration by the Office.

Paragraph (b) of 37 CFR 1.98 requires that each U.S. patent listed in an information disclosure statement be identified by patentee, patent number and issue date. Each foreign patent or published foreign patent application must be identified by the country or patent office which issued the patent or published the application, an appropriate document number, and the publication date indicated on the patent or published application. Each publication must be identified by author (if any), title, relevant pages of the publication, date (at least month and year) and place of publication. The place of publication refers to the name of the journal, magazine or other publication in which the information being submitted was published.

The list may not be incorporated into the specification but must be submitted in a separate paper. A separate list is required so that it is easy to confirm that applicant intends to submit an information disclosure statement, and because it provides a readily available checklist for the examiner to indicate which identified documents have been considered. A copy of a separate list will also provide a simple means of communication to applicant to indicate the listed documents that have been considered and those listed documents that have not been considered. Use of form PTO-1449, "Information Disclosure Citation," is encouraged. See C(2) below.

A(2) In addition to the list, each information disclosure statement must also include a legible copy of:

- (i) Each U.S. and foreign patent;
- (ii) Each publication or that portion which caused it to be listed; and
- (iii) All other information or that portion which caused it to be listed, except that no copy of a U.S. patent application need be included.

There are exceptions to this general rule that a copy must be provided. First, paragraph (d) of 37 CFR 1.98 states that a copy of any patent, publication or other information listed in an information disclosure statement is not required to be provided if it was previously cited by or submitted to the Office in a prior application, provided that the prior application is properly identified in the statement and relied upon for an earlier filing date under 35 U.S.C. 120. The examiner will consider information cited or submitted to the Office in a prior application relied on under 35 U.S.C. 120. This exception to the requirement for copies of information does not apply to information which was cited in an international application under the Patent Cooperation Treaty.

Second, paragraph (c) of 37 CFR 1.98 states that when the disclosures of two or more patents or publications listed in an information disclosure statement are substantively cumulative, a copy of the one of the patents or publications may be submitted without copies of the other patents or publications provided that a statement is made that these other patents or publications are cumulative. The examiner will then consider only the patent or

publication of which a copy is submitted and will so indicate on the list or form PTO-1449 submitted, e.g., by crossing-out the listing of the cumulative information.

Paragraph (c) of 37 CFR 1.98 further states that if a written English language translation of a non-English language document, or portion thereof, is within the possession, custody or control of, or is readily available to any individual designated in 37 CFR 1.56(c), a copy of the translation shall accompany the statement. Translations are not required to be filed unless they have been reduced to writing and are actually translations of what is contained in the non-English language information. If no translation is submitted, the examiner will consider the information in view of the concise explanation and insofar as it is understood on its face, e.g., drawings, chemical formulas, English language abstracts, in the same manner that non-English language information in Office search files is considered by examiners in conducting searches.

A(3) Each information disclosure statement must further include a concise explanation of the relevance, as it is presently understood by the individual designated in 37 CFR 1.56(c) most knowledgeable about the content of the information, of each patent, publication, or other information listed that is not in the English language. The concise explanation may be either separate from the specification or incorporated therein.

The requirement for a concise explanation of relevance is limited to information that is not in the English language. The explanation required is limited to the relevance as understood by the individual designated in 37 CFR 1.56(c) most knowledgeable about the content of the information at the time the information is submitted to the Office. If a translation of the information into English is submitted with the foreign language information, no concise explanation is required. There is no requirement for the translation to be verified. Where the information listed is not in the English language, but was cited in a search report by a foreign patent office in a counterpart foreign application, the requirement for a concise explanation of relevance can be satisfied by submitting an English language version of the search report which indicates the degree of relevance found by the foreign office. The requirement for a concise explanation of non-English language information would not be satisfied by a statement that a reference was cited in the prosecution of a parent, related, or copending United States application.

The concise explanation may indicate that a particular figure or paragraph of the patent or publication is relevant to the claimed invention. It might be a simple statement pointing to similarities between the item of information and the claimed invention. It is permissible but not necessary to discuss differences between the cited information and the claims.

Applicants may, if they wish, provide a concise explanation of why English-language information is being submitted and how it is understood to be relevant. Concise explanations are helpful to the Office, particularly where documents are lengthy and complex and applicant is aware of a section that is highly relevant to patentability or where a large number of documents are submitted and applicant is aware that one or more are highly relevant to patentability.

B. Time for Filing

The procedure and requirements for submitting an information disclosure statement are linked to four stages in the processing of a patent application: (1) within three months of filing, or before first Office action, whichever is later; (2) after the period in (1), but before final Office action or a Notice of Allowance, whichever is earlier; (3) after the period in (2) but on or before the issue fee is paid; and (4) after the period in (3) and up to the time the patent application can be effectively withdrawn from issue. The procedures and requirements apply to applications filed under 35 U.S.C. 111 (utility), 161 (plants), 171 (designs), and 251 (reissue), as well as international applications entering the national stage under 35 U.S.C. 371.

The requirements based on the time when the information disclosure statement is filed are summarized as follows:

Time when IDS is filed	37 CFR 1.97 Requirements
(1) Within 3 months of filing or before first Office action on the merits, whichever is later.	None (always considered).
(2) After (1) but before final action or notice of allowance.	Certification or 1.17(p) fee.
(3) After final action or notice of allowance and before payment of issue fee.	Certification, petition, and petition fee.

B(1) Statement filed BEFORE first action on the merits or within three (3) months of actual filing date (37 CFR 1.97(b)).

An information disclosure statement will be considered by the examiner if filed:

- (i) within three months of the filing date of a national application;
- (ii) within three months of the date of entry of the national stage as set forth in 37 CFR 1.491 in an international application; or
- (iii) before the mailing date of a first Office action on the merits, whichever event occurs last. A statement filed within this period requires neither a fee nor a certification of prompt filing.

The term "national application" includes continuing applications (continuations, divisions, continuations-in-part) so three-months will be measured from the actual filing date of an application as apposed to the effective date of a continuing application.

All information disclosure statements that comply with the content requirements of 37 CFR 1.98 and are filed within three months of the filing date will be considered by the examiner, regardless of whatever else has occurred in the examination process up to that point in time. Thus, in the rare instance that a final Office action or a notice of allowance is prepared and mailed prior to a date which is three months from the filing date, any information contained in a complete information disclosure statement filed within that three-month window will be considered by the examiner.

Likewise, an information disclosure statement will be considered if it is filed later than three months after the filing date but before the mailing date of a first Office action on the merits. An action on the merits means an action which treats the patentability of the claims in an application, as opposed to only formal or procedural requirements. An action on the merits would, for example, contain a rejection or indication of allowability of a claim or claims rather than just a restriction requirement (37 CFR 1.142) or just a requirement for additional fees to have a claim considered (37 CFR 1.16(d)). Thus, if an application was filed on Jan. 1 and the first Office action on the merits was not mailed until six months later on July 1, the examiner would be required to consider any proper information disclosure statement filed prior to July 1.

An information disclosure statement will be considered to have been filed on the day it was received in the Office, or on an earlier date of mailing if accompanied by a properly executed certificate of mailing under 37 CFR 1.8, or Express Mail certificate under 37 CFR 1.10. An Office action is mailed on the date indicated in the Office action.

B(2) Statement filed after B(1), but BEFORE mailing of final action or Notice of Allowance (37 CFR 1.97(c)).

An information disclosure statement will be considered by the examiner if filed after the period specified in B(1) above, but before the mailing date of either

- a final action under 37 CFR 1.113 or
- a notice of allowance under 37 CFR 1.311,

whichever occurs first, provided: (1) the statement is accompanied by either a certification as specified in 37 CFR 1.97(e) or (2) the fee set forth in 37 CFR 1.17(p). If a final action or notice of

allowance is mailed in an application and later withdrawn, the application will be considered as not having had a final action or notice of allowance mailed for purposes of considering an information disclosure statement.

(i) If information submitted during the period set forth in 37 CFR 1.97(c) with a certification is used in a new ground of rejection on unamended claims, the next Office action will not be made final since in this situation it is clear that applicant has submitted the information to the Office promptly after it has become known and the information is being submitted prior to a final determination on patentability by the Office. However, the information submitted with a certification can be used in a new ground of rejection and the next Office action made final. If the new ground of rejection was necessitated by amendment of the application by applicant. Where the information is submitted during this period with a fee, the examiner may use the information submitted, e.g., printed publication or evidence of public use, and make the next Office action final whether or not the claims have been amended, provided that no other new ground of rejection which was not necessitated by amendment to the claims is introduced by the examiner. See MPEP 706.07(a). If a new ground of rejection is introduced that is neither necessitated by an amendment to the claims nor based on the information submitted with the fee set forth in 37 CFR 1.17(p), the Office action shall not be made final.

(ii) A certification under 37 CFR 1.97(e) must state either

(a) that each item of information contained in the information disclosure statement was cited in a communication from a foreign patent office in a counterpart foreign application not more than three months prior to the filing of the statement, or

(b) that no item of information contained in the information disclosure statement was cited in a communication from a foreign patent office in a counterpart foreign application or, to the knowledge of the person signing the certification after making reasonable inquiry, was known to any individual designated in 37 CFR 1.56(c), more than three months prior to the filing of the statement.

A certification can contain either of two statements. One statement is that each item of information in an information disclosure statement was cited in a communication, such as a search report, from a patent office outside the U.S. in a counterpart foreign application not more than three months prior to the filing date of the statement. Under this certification, it does not matter whether any individual with a duty of disclosure actually knew about any of the information cited before receiving the search report. The date on the communication by the foreign patent office begins the three-month period in the same manner as the mailing of an Office action starts a three-month shortened statutory period for response. The date starting the three-month period is not the date the communication was received by a foreign associate or the date it was received by a U.S. registered practitioner. Likewise, the statement will be considered to have been filed on the date the statement was received in the Office, or on an earlier date of mailing if accompanied by a properly executed certificate of mailing under 37 CFR 1.8, or Express Mail certificate under 37 CFR 1.10.

The term counterpart foreign patent application means that a claim for priority has been made in either the U.S. application or a foreign application based on the other, or that the disclosures of the U.S. and foreign patent applications are substantively identical (e.g., an application filed in the European Patent Office claiming the same U.K. priority as claimed in the U.S. application).
